

The Book of Enoch

Chapters 1-60

(also referred to as "Ethiopian Enoch" or "I Enoch")

Chapter 1

¹The word of the blessing of Enoch, how he blessed the elect and the righteous, who were to exist in the time of trouble; rejecting all the wicked and ungodly. Enoch, a righteous man, who *was* ⁽¹⁾ with God, answered and spoke, while his eyes were open, and *while* he saw a holy vision in the heavens. This the angels showed me.

(1) N.B. The italicized words supply a gap in the text.

²From them I heard all things, and understood what I saw; that which will not take place in this generation, but in a generation which is to succeed at a distant period, on account of the elect.

³Upon their account I spoke and conversed with him, who will go forth from his habitation, the Holy and Mighty One, the God of the world:

⁴Who will hereafter tread upon Mount Sinai; appear with his hosts; and be manifested in the strength of his power from heaven.

⁵All shall be afraid, and the Watchers be terrified.

⁶Great fear and trembling shall seize them, even to the ends of the earth. The lofty mountains shall be troubled, and the exalted hills depressed, melting like a honeycomb in the flame. The earth shall be immersed, and all things which are in it perish; while judgment shall come upon all, even upon all the righteous:

⁷But to them shall he give peace: he shall preserve the elect, and towards them exercise clemency.

⁸Then shall all belong to God; be happy and blessed; and the splendour of the Godhead shall illuminate them.

[Back](#) | [Back to top](#)

Chapter 2

¹Behold, he comes with ten thousands of his saints, to execute judgment upon them, and destroy the wicked, and reprove all the carnal for everything which the sinful and ungodly have done, and committed against him. ⁽²⁾

(2) Quoted by Jude, vss. 14, 15.

[Back](#) | [Back to top](#)

Chapter 3

¹All who are in the heavens know what is transacted *there*.

²*They know* that the heavenly luminaries change not their paths; that each rises and sets regularly, every one at its proper period, without transgressing the commands, *which they have received*. They behold the earth, and understand what is there transacted, from the beginning to the end of it.

³*They see* that every work of God is invariable in the period of its appearance. They behold summer and winter: *perceiving* that the whole earth is full of water; and that the cloud, the dew, and the rain refresh it.

[Back](#) | [Back to top](#)

Chapter 4

¹They consider and behold every tree, how it appears to wither, and every leaf to fall off, except of fourteen trees, which are not deciduous; which wait from the old, to the appearance of the new *leaf*, for two or three winters.

[Back](#) | [Back to top](#)

Chapter 5

¹Again they consider the days of summer, that the sun is upon it at its very beginning; while you seek for a covered and shady spot on account of the burning sun; while the earth is scorched up with fervid heat, and you become incapable of walking either upon the ground or upon the rocks in consequence of that heat.

[Back](#) | [Back to top](#)

Chapter 6

¹They consider how the trees, when they put forth their green leaves, become covered, and produce fruit; understanding everything, and knowing that He who lives for ever does all these things for you:

²*That* the works at the beginning of every existing year, that all his works, are subservient to him, and invariable; yet as God has appointed, so are all things brought to pass.

³They see, too, how the seas and the rivers together complete their respective operations:

⁴*But* you endure not patiently, nor fulfill the commandments of the Lord; but you transgress and calumniate *his* greatness; and malignant are the words in your polluted mouths against his Majesty.

⁵You withered in heart, no peace shall be to you!

⁶Therefore your days shall you curse, and the years of your lives shall perish; perpetual execration shall be multiplied, and you shall not obtain mercy.

⁷In those days shall you resign your peace with the eternal maledictions of all the righteous, and sinners shall perpetually execrate you;

⁸Shall execrate you with the ungodly.

⁹The elect shall possess light, joy, and peace; and they shall inherit the earth.

¹⁰But you, you unholy, shall be accursed.

¹¹Then shall wisdom be given to the elect, all of whom shall live, and not again transgress by impiety or pride; but shall humble themselves, possessing prudence, and shall not repeat transgression.

¹²They shall not be condemned the whole period of their lives, nor die in torment and indignation; but the sum of their days shall be completed, and they shall grow old in peace; while the years of their happiness shall be multiplied with joy, and with peace, for ever, the whole duration of their existence.

[Back](#) | [Back to top](#)

Chapter 7

¹It happened after the sons of men had multiplied in those days, that daughters were born to them, elegant and beautiful.

²And when the angels, ⁽³⁾ the sons of heaven, beheld them, they became enamoured of them, saying to each other, Come, let us select for ourselves wives from the progeny of men, and let us beget children.

(3) An Aramaic text reads "Watchers" here (J.T. Milik, *Aramaic Fragments of Qumran Cave 4* [Oxford: Clarendon Press, 1976], p. 167).

³Then their leader Samyaza said to them; I fear that you may perhaps be indisposed to the performance of this enterprise;

⁴And that I alone shall suffer for so grievous a crime.

⁵But they answered him and said; We all swear;

⁶And bind ourselves by mutual execrations, that we will not change our intention, but execute our projected undertaking.

⁷Then they swore all together, and all bound themselves by mutual execrations. Their whole number was two hundred, who descended upon Ardis, ⁽⁴⁾ which is the top of mount Armon.

(4) Upon Ardis. Or, "in the days of Jared" (R.H. Charles, ed. and trans., *The Book of Enoch* [Oxford: Clarendon Press, 1893], p. 63).

⁸That mountain therefore was called Armon, because they had sworn upon it, ⁽⁵⁾ and bound themselves by mutual execrations.

(5) Mt. Armon, or Mt. Hermon, derives its name from the Hebrew word *herem*, a curse (Charles, p. 63).

⁹These are the names of their chiefs: Samyaza, who was their leader, Urakabameel, Akibeel, Tamiel, Ramuel, Danel, Azkeel, Saraknyal, Asael, Armers, Batraal, Anane, Zavebe, Samsaveel, Ertael, Turel, Yomyael, Arazyal. These were the prefects of the two hundred angels, and the remainder were all with them. ⁽⁶⁾

(6) The Aramaic texts preserve an earlier list of names of these Watchers: Semihazah; Artqoph; Ramtel; Kokabel; Ramel; Danieal; Zeqiel; Baraqel; Asael; Hermoni; Matarel; Ananel; Stawel; Samsiel; Sahriel; Tummel; Turiel; Yomiel; Yhaddiel (Milik, p. 151).

¹⁰Then they took wives, each choosing for himself; whom they began to

approach, and with whom they cohabited; teaching them sorcery, incantations, and the dividing of roots and trees.

¹¹And the women conceiving brought forth giants, ⁽⁷⁾

(7) The Greek texts vary considerably from the Ethiopic text here. One Greek manuscript adds to this section, "And they [the women] bore to them [the Watchers] three races—first, the great giants. The giants brought forth [some say "slew"] the Naphelim, and the Naphelim brought forth [or "slew"] the Elioud. And they existed, increasing in power according to their greatness." See the account in the Book of Jubilees.

¹²Whose stature was each three hundred cubits. These devoured all *which* the labor of men *produced*; until it became impossible to feed them;

¹³When they turned themselves against men, in order to devour them;

¹⁴And began to injure birds, beasts, reptiles, and fishes, to eat their flesh one after another, ⁽⁸⁾ and to drink their blood.

(8) Their flesh one after another. Or, "one another's flesh." R.H. Charles notes that this phrase may refer to the destruction of one class of giants by another (Charles, p. 65).

¹⁵Then the earth reproved the unrighteous.

[Back](#) | [Back to top](#)

Chapter 8

¹Moreover Azazyel taught men to make swords, knives, shields, breastplates, the fabrication of mirrors, and the workmanship of bracelets and ornaments, the use of paint, the beautifying of the eyebrows, *the use of* stones of every valuable and select kind, and all sorts of dyes, so that the world became altered.

²Impiety increased; fornication multiplied; and they transgressed and corrupted all their ways.

³Amazarak taught all the sorcerers, and dividers of roots:

⁴Armors *taught* the solution of sorcery;

⁵Barkayal *taught* the observers of the stars, ⁽⁹⁾

(9) Observers of the stars. Astrologers (Charles, p. 67).

⁶Akibeel *taught* signs;

⁷Tamiel taught astronomy;

⁸And Asaradel taught the motion of the moon,

⁹And men, being destroyed, cried out; and their voice reached to heaven.

[Back](#) | [Back to top](#)

Chapter 9

¹Then Michael and Gabriel, Raphael, Suryal, and Uriel, looked down from heaven, and saw the quantity of blood which was shed on earth, and all the iniquity which was done upon it, and said one to another, *It is* the voice of their cries;

²The earth deprived *of her children* has cried even to the gate of heaven.

³And now to you, O you holy one of heaven, the souls of men complain, saying, Obtain Justice for us with ⁽¹⁰⁾ the Most High. Then they said to their

Lord, the King, *You are* Lord of lords, God of gods, King of kings. The throne of your glory is for ever and ever, and for ever and ever is your name sanctified and glorified. You are blessed and glorified.

(10) Obtain justice for us with. Literally, "Bring judgment to us from."

(Richard Laurence, ed. and trans., *The Book of Enoch the Prophet* [London: Kegan Paul, Trench & Co., 1883], p. 9).

⁴You have made all things; you possess power over all things; and all things are open and manifest before you. You behold all things, and nothing can be concealed from you.

⁵You have seen what Azazyel has done, how he has taught every species of iniquity upon earth, and has disclosed to the world all the secret things which are done in the heavens.

⁶Samyaza also has taught sorcery, to whom you have given authority over those who are associated with him. They have gone together to the daughters of men; have lain with them; have become polluted;

⁷And have discovered crimes ⁽¹¹⁾ to them.

(11) Discovered crimes. Or, "revealed these sins" (Charles, p. 70).

⁸The women likewise have brought forth giants.

⁹Thus has the whole earth been filled with blood and with iniquity.

¹⁰And now behold the souls of those who are dead, cry out.

¹¹And complain even to the gate of heaven.

¹²Their groaning ascends; nor can they escape from the unrighteousness which is committed on earth. You know all things, before they exist.

¹³You know these things, and what has been done by them; yet you do not speak to us.

¹⁴What on account of these things ought we to do to them?

[Back](#) | [Back to top](#)

Chapter 10

¹Then the Most High, the Great and Holy One spoke,

²And sent Arsayalalyur ⁽¹²⁾ to the son of Lamech,

(12) Arsayalalyur. Here one Greek text reads "Uriel."

³Saying, Say to him in my name, Conceal yourself.

⁴Then explain to him the consummation which is about to take place; for all the earth shall perish; the waters of a deluge shall come over the whole earth, and all things which are in it shall be destroyed.

⁵And now teach him how he may escape, and how his seed may remain in all the earth.

⁶Again the Lord said to Raphael, Bind Azazyel hand and foot; cast him into darkness; and opening the desert which is in Dudael, cast him in there.

⁷Throw upon him hurled and pointed stones, covering him with darkness;

⁸There shall he remain for ever; cover his face, that he may not see the light.

⁹And in the great day of judgment let him be cast into the fire.

¹⁰Restore the earth, which the angels have corrupted; and announce life to it, that I may revive it.

¹¹All the sons of men shall not perish in consequence of every secret, by which the Watchers have destroyed, and *which* they have taught, their offspring.

¹²All the earth has been corrupted by the effects of the teaching of Azazyel. To him therefore ascribe the whole crime.

¹³To Gabriel also the Lord said, Go to the biters, ⁽¹³⁾ to the reprobates, to the children of fornication; and destroy the children of fornication, the offspring of the Watchers, from among men; bring them forth, and excite them one against another. Let them perish by *mutual* slaughter; for length of days shall not be theirs.

(13) Biters. More accurately, "bastards" (Charles, p. 73; Michael A. Knibb, ed. and trans., *The Ethiopic Book of Enoch* [Oxford: Clarendon Press, 1978], p. 88).

¹⁴They shall all entreat you, but their fathers shall not obtain *their wishes* respecting them; for they shall hope for eternal life, and that they may live, each of them, five hundred years.

¹⁵To Michael likewise the Lord said, Go and announce *his crime* to Samyaza, and to the others who are with him, who have been associated with women, that they might be polluted with all their impurity. And when all their sons shall be slain, when they shall see the perdition of their beloved, bind them for seventy generations underneath the earth, even to the day of judgment, and of consummation, until the judgment, *the effect of* which will last for ever, be completed.

¹⁶Then shall they be taken away into the lowest depths of the fire in torments; and in confinement shall they be shut up for ever.

¹⁷Immediately after this shall he, ⁽¹⁴⁾ together with them, burn and perish; they shall be bound until the consummation of many generations.

(14) He. I.e., Samyaza.

¹⁸Destroy all the souls addicted to dalliance, ⁽¹⁵⁾ and the offspring of the Watchers, for they have tyrannized over mankind.

(15) Dalliance. Or, "lust" (Knibb, p. 90; cp. Charles, p. 76).

¹⁹Let every oppressor perish from the face of the earth;

²⁰Let every evil work be destroyed;

²¹The plant of righteousness and of rectitude appear, and its produce become a blessing.

²²Righteousness and rectitude shall be for ever planted with delight.

²³And then shall all the saints give thanks, and live until they have begotten a thousand *children*, while the whole period of their youth, and their sabbaths shall be completed in peace. In those days all the earth shall be cultivated in righteousness; it shall be wholly planted with trees, and filled with benediction; every tree of delight shall be planted in it.

²⁴In it shall vines be planted; and the vine which shall be planted in it shall yield fruit to satiety; every seed, which shall be sown in it, shall produce for one measure a thousand; and one measure of olives shall produce ten presses of oil.

²⁵Purify the earth from all oppression, from all injustice, from all crime, from all impiety, and from all the pollution which is committed upon it.

Exterminate them from the earth.

²⁶Then shall all the children of men be righteous, and all nations shall pay me divine honours, and bless me; and all shall adore me.

²⁷The earth shall be cleansed from all corruption, from every crime, from all punishment, and from all suffering; neither will I again send a deluge upon it from generation to generation for ever.

²⁸In those days I will open the treasures of blessing which are in heaven, that I may cause them to descend upon earth, and upon all the works and labour of man.

²⁹Peace and equity shall associate with the sons of men all the days of the world, in every generation of it.

[Back](#) | [Back to top](#)

(No Chapter 11)

[Back](#) | [Back to top](#)

Chapter 12

¹Before all these things Enoch was concealed; nor did any one of the sons of men know where he was concealed, where he had been, and what had happened.

²He was wholly engaged with the holy ones, and with the Watchers in his days.

³I, Enoch, was blessing the great Lord and King of peace.

⁴And behold the Watchers called me Enoch the scribe.

⁵Then *the Lord* said to me: Enoch, scribe of righteousness, go tell the Watchers of heaven, who have deserted the lofty sky, and their holy everlasting station, *who* have been polluted with women.

⁶And have done as the sons of men do, by taking to themselves wives, and *who* have been greatly corrupted on the earth;

⁷That on the earth they shall never obtain peace and remission of sin. For they shall not rejoice in their offspring; they shall behold the slaughter of their beloved; shall lament for the destruction of their sons; and shall petition for ever; but shall not obtain mercy and peace.

[Back](#) | [Back to top](#)

Chapter 13

¹Then Enoch, passing on, said to Azazyel: You shalt not obtain peace. A great sentence is gone forth against you. He shall bind you;

²Neither shall relief, mercy, and supplication be yours, on account of the oppression which you have taught;

³And on account of every act of blasphemy, tyranny, and sin, which you have discovered to the children of men.

⁴Then departing *from him* I spoke to them all together;

⁵And they all became terrified, and trembled;

⁶Beseeching me to write for them a memorial of supplication, that they

might obtain forgiveness; and that I might make the memorial of their prayer ascend up before the God of heaven; because they could not themselves thenceforwards address him, nor raise up their eyes to heaven on account of the disgraceful offence for which they were judged.

⁷Then I wrote a memorial of their prayer and supplications, for their spirits, for everything which they had done, and for the subject of their entreaty, that they might obtain remission and rest.

⁸Proceeding on, I continued over the waters of Danbadan, ⁽¹⁶⁾ which is on the right to the west of Armon, reading the memorial of their prayer, until I fell asleep.

(16) Danbadan. Dan in Dan (Knibb, p. 94).

⁹And behold a dream came to me, and visions appeared above me. I fell down and saw a vision of punishment, that I might relate it to the sons of heaven, and reprove them. When I awoke I went to them. All being collected together stood weeping in Oubelseyael, which is situated between Libanos and Seneser, ⁽¹⁷⁾ with their faces veiled.

(17) Libanos and Seneser. Lebanon and Senir (near Damascus).

¹⁰I related in their presence all the visions which I had seen, and my dream;

¹¹And began to utter these words of righteousness, reproving the Watchers of heaven.

[Back](#) | [Back to top](#)

Chapter 14

¹This is the book of the words of righteousness, and of the reproof of the Watchers, who belong to the world, ⁽¹⁸⁾ according to that which He, who is holy and great, commanded in the vision. I perceived in my dream, that I was now speaking with a tongue of flesh, and with my breath, which the Mighty One has put into the mouth of men, that they might converse with it.

(18) Who belong to the world. Or, "who (are) from eternity" (Knibb, p. 95).

²And understand with the heart. As he has created and given to men *the power of* comprehending the word of understanding, so has he created and given to me *the power of* reproving the Watchers, the offspring of heaven. I have written your petition; and in my vision it has been shown me, that what you request will not be granted you as long as the world endures.

³Judgment has been passed upon you: *your request* will not be granted you.

⁴From this time forward, never shall you ascend into heaven; He has said, that on the earth He will bind you, as long as the world endures.

⁵But before these things you shall behold the destruction of your beloved sons; you shall not possess them, but they shall fall before you by the sword.

⁶Neither shall you entreat for them, not for yourselves;

⁷But you shall weep and supplicate in silence. The words of the book which I wrote. ⁽¹⁹⁾

(19) But you shall weep...I wrote. Or, "Likewise despite your tears and prayers you will receive nothing whatever contained in the writing

which I have written" (Charles, p. 80).

⁸A vision thus appeared to me.

⁹Behold, in *that* vision clouds and a mist invited me; agitated stars and flashes of lightning impelled and pressed me forwards, while winds in the vision assisted my flight, accelerating my progress.

¹⁰They elevated me aloft to heaven. I proceeded, until I arrived at a wall built with stones of crystal. A vibrating flame ⁽²⁰⁾ surrounded it, which began to strike me with terror.

(20) Vibrating flame. Literally, "a tongue of fire"

¹¹Into this vibrating flame I entered;

¹²And drew nigh to a spacious habitation built also with stones of crystal. Its walls too, as well as pavement, were *formed* with stones of crystal, and crystal likewise was the ground. Its roof had the appearance of agitated stars and flashes of lightning; and among them were cherubim of fire in a stormy sky. ⁽²¹⁾ A flame burned around its walls; and its portal blazed with fire. When I entered into this dwelling, it was hot as fire and cold as ice. No *trace* of delight or of life was there. Terror overwhelmed me, and a fearful shaking seized me.

(21) In a stormy sky. Literally, "and their heaven was water" (Charles, p. 81).

¹³Violently agitated and trembling, I fell upon my face. In the vision I looked.

¹⁴And behold there was another habitation more spacious than *the former*, every entrance to which was open before me, erected in *the midst of* a vibrating flame.

¹⁵So greatly did it excel in all points, in glory, in magnificence, and in magnitude, that it is impossible to describe to you either the splendour or the extent of it.

¹⁶Its floor was on fire; above were lightnings and agitated stars, while its roof exhibited a blazing fire.

¹⁷Attentively I surveyed it, and saw that it contained an exalted throne;

¹⁸The appearance of which was like that of frost; while its circumference resembled the orb of the brilliant sun; and *there was* the voice of the cherubim.

¹⁹From underneath this mighty throne rivers of flaming fire issued.

²⁰To look upon it was impossible.

²¹One great in glory sat upon it:

²²Whose robe was brighter than the sun, and whiter than snow.

²³No angel was capable of penetrating to view the face of Him, the Glorious and the Effulgent; nor could any mortal behold Him. A fire was flaming around Him.

²⁴A fire also of great extent continued to rise up before Him; so that not one of those who surrounded Him was capable of approaching Him, among the myriads of myriads ⁽²²⁾ who were before Him. To Him holy consultation was needless. Yet did not the sanctified, who were near Him, depart far from Him either by night or by day; nor were they removed from Him. I also was so far advanced, with a veil on my face, and trembling. Then the

Lord with his *own* mouth called me, saying, Approach hither, Enoch, at my holy word.

(22) Myriads of myriads. Ten thousand times ten thousands (Knibb, p. 99).

²⁵And He raised me up, making me draw near even to the entrance. My eye was directed to the ground.

[Back](#) | [Back to top](#)

Chapter 15

¹Then addressing me, He spoke and said, Hear, neither be afraid, O righteous Enoch, you scribe of righteousness: approach hither, and hear my voice. Go, say to the Watchers of heaven, who have sent you to pray for them, You ought to pray for men, and not men for you.

²Wherefore have you forsaken the lofty and holy heaven, which endures for ever, and have lain with women; have defile yourselves with the daughters of men; have taken to yourselves wives; have acted like the sons of the earth, and have begotten an impious offspring? ⁽²³⁾

(23) An impious offspring. Literally, "giants" (Charles, p. 82; Knibb, p. 101).

³You being spiritual, holy, and possessing a life which is eternal, have polluted yourselves with women; have begotten in carnal blood; have lusted in the blood of men; and have done as those *who are* flesh and blood do.

⁴These however die and perish.

⁵Therefore have I given to them wives, that they might cohabit with them; that sons might be born of them; and that this might be transacted upon earth.

⁶But you from the beginning were made spiritual, possessing a life which is eternal, and not subject to death for ever.

⁷Therefore I made not wives for you, because, being spiritual, your dwelling is in heaven.

⁸Now the giants, who have been born of spirit and of flesh, shall be called upon earth evil spirits, and on earth shall be their habitation. Evil spirits shall proceed from their flesh, because they were created from above; from the holy Watchers was their beginning and primary foundation. Evil spirits shall they be upon earth, and the spirits of the wicked shall they be called. The habitation of the spirits of heaven shall be in heaven; but upon earth shall be the habitation of terrestrial spirits, who are born on earth. ⁽²⁴⁾

(24) Note the many implications of vss. 3-8 regarding the progeny of evil spirits.

⁹The spirits of the giants *shall be like* clouds, ⁽²⁵⁾ which shall oppress, corrupt, fall, content, and bruise upon earth.

(25) The Greek word for "clouds" here, *nephelas*, may disguise a more ancient reading, Napheleim (Nephilim).

¹⁰They shall cause lamentation. No food shall they eat; and they shall be thirsty; they shall be concealed, and shall not ⁽²⁶⁾ rise up against the sons of men, and against women; for they come forth during the days of slaughter

and destruction.

(26) Shall not. Nearly all manuscripts contain this negative, but Charles, Knibb, and others believe the "not" should be deleted so the phrase reads "shall rise up."

[Back](#) | [Back to top](#)

Chapter 16

¹And as to the death of the giants, wheresoever their spirits depart from their bodies, let their flesh, that which is perishable, be without judgment.

⁽²⁷⁾ Thus shall they perish, until the day of the great consummation of the great world. A destruction shall take place of the Watchers and the impious.

(27) Let their flesh...be without judgment. Or, "their flesh shall be destroyed before the judgment" (Knibb, p. 102).

²And now to the Watchers, who have sent you to pray for them, who in the beginning were in heaven,

³Say, In heaven have you been; secret things, however, have not been manifested to you; yet have you known a reprobated mystery.

⁴And this you have related to women in the hardness of your heart, and by that mystery have women and mankind multiplied evils upon the earth.

⁵Say to them, Never therefore shall you obtain peace.

[Back](#) | [Back to top](#)

Chapter 17

¹They raised me up into a certain place, where there was ⁽²⁸⁾ the appearance of a burning fire; and when they pleased they assumed the likeness of men.

(28) Where there was. Or, "where they [the angels] were like" (Knibb, p. 103).

²They carried me to a lofty spot, to a mountain, the top of which reach to heaven.

³And I beheld the receptacles of light and of thunder at the extremities of the place, where it was deepest. There was a bow of fire, and arrows in their quiver, a sword of fire, and every species of lightning.

⁴Then they elevated me to a babbling stream, ⁽²⁹⁾ and to a fire in the west, which received all the setting of the sun. I came to a river of fire, which flowed like water, and emptied itself into the great sea westwards.

(29) To a babbling stream. Literally, "to water of life, which spoke" (Laurence, p. 23).

⁵I saw every large river, until I arrived at the great darkness. I went to where all of flesh migrate; and I beheld the mountains of the gloom which constitutes winter, and the place from which issues the water in every abyss.

⁶I saw also the mouths of all the rivers in the world, and the mouths of the deep.

[Back](#) | [Back to top](#)

Chapter 18

¹I then surveyed the receptacles of all the winds, perceiving that they contributed to adorn the whole creation, and *to preserve* the foundation of the earth.

²I surveyed the stone *which supports* the corners of the earth.

³I also beheld the four winds, which bear up the earth, and the firmament of heaven.

⁴And I beheld the winds occupying the exalted sky.

⁵Arising in the midst of heaven and of earth, and constituting the pillars of heaven.

⁶I saw the winds which turn the sky, which cause the orb of the sun and of all the stars to set; and over the earth I saw the winds which support the clouds.

⁷I saw the path of the angels.

⁸I perceived at the extremity of the earth the firmament of heaven above it. Then I passed on towards the south;

⁹Where burnt, both by day and night, six mountains formed of glorious stones; three towards the east, and three towards the south.

¹⁰Those which were towards the east were of a variegated stone; one of which was of margarite, and another of antimony. Those towards the south were of a red stone. The middle one reached to heaven like the throne of God; *a throne composed* of alabaster, the top of which was of sapphire. I saw, too, a blazing fire hanging over all the mountains.

¹¹And there I saw a place on the other side of an extended territory, where waters were collected.

¹²I likewise beheld terrestrial fountains, deep in the fiery columns of heaven.

¹³And in the columns of heaven I beheld fires, which descended without number, but neither on high, nor into the deep. Over these fountains also I perceived a place which had neither the firmament of heaven above it, nor the solid ground underneath it; neither was there water above it; nor anything on wing; but the spot was desolate.

¹⁴And there I beheld seven stars, like great blazing mountains, and like spirits entreating me.

¹⁵Then the angel said, This place, until the consummation of heaven and earth, will be the prison of the stars, and the host of heaven.

¹⁶The stars which roll over fire are those which transgressed the commandment of God before their time arrived; for they came not in their proper season. Therefore was He offended with them, and bound them, until the period of the consummation of their crimes in the secret year.

[Back](#) | [Back to top](#)

Chapter 19

¹Then Uriel said, Here the angels, who cohabited with women, appointed their leaders;

²And being numerous in appearance ⁽³⁰⁾ made men profane, and caused

them to err; so that they sacrificed to devils as to gods. For in the great day *there shall be* a judgment, with which they shall be judged, until they are consumed; and their wives also shall be *judged*, who led astray the angels of heaven that they might salute them.

(30) Being numerous in appearance. Or, "assuming many forms"
(Knibb, p. 106).

³And I, Enoch, I alone saw the likeness of the end of all things. Nor did any human being see it, as I saw it.

[Back](#) | [Back to top](#)

Chapter 20

¹These are the names of the angels who watch.

²Uriel, one of the holy angels, who *presides* over clamor and terror.

³Raphael, one of the holy angels, who *presides* over the spirits of men.

⁴Raguel, one of the holy angels, who inflicts punishment on the world and the luminaries.

⁵Michael, one of the holy angels, who, *presiding* over human virtue, commands the nations.

⁶Sarakiel, one of the holy angels, who *presides* over the spirits of the children of men that transgress.

⁷Gabriel, one of the holy angels, who *presides* over Ikisat, ⁽³¹⁾ over paradise, and over the cherubim.

(31) Ikisat. The serpents (Charles, p. 92; Knibb, p. 107).

[Back](#) | [Back to top](#)

Chapter 21

¹Then I made a circuit to a place in which nothing was completed.

²And there I beheld neither the tremendous workmanship of an exalted heaven, nor of an established earth, but a desolate spot, prepared, and terrific.

³There, too, I beheld seven stars of heaven bound in it together, like great mountains, and like a blazing fire. I exclaimed, For what species of crime have they been bound, and why have they been removed to this place? Then Uriel, one of the holy angels who was with me, and who conducted me, answered: Enoch, wherefore do you ask; wherefore *do you* reason with yourself, and anxiously inquire? These are those of the stars which have transgressed the commandment of the most high God; and are here bound, until the infinite number of the days of their crimes be completed.

⁴From there I afterwards passed on to another terrific place;

⁵Where I beheld the operation of a great fire blazing and glittering, in the midst of which there was a division. Columns of fire struggled together to the end of the abyss, and deep was their descent. But neither its measurement nor magnitude was I able to discover; neither could I perceive its origin. Then I exclaimed, How terrible is this place, and how difficult to explore!

⁶Uriel, one of the holy angels who was with me, answered and said: Enoch, why are you alarmed and amazed at this terrific place, at the sight of this *place of suffering*? This, he said, is the prison of the angels; and here they are kept for ever.

[Back](#) | [Back to top](#)

Chapter 22

¹From there I proceeded to another spot, where I saw on the west a great and lofty mountain, a strong rock, and four delightful places.

²Internally it was deep, capacious, and very smooth; as smooth as if it had been rolled over: it was both deep and dark to behold.

³Then Raphael, one of the holy angels who were with me, answered and said, These are the delightful places where the spirits, the souls of the dead, will be collected; for them were they formed; and here will be collected all the souls of the sons of men.

⁴These places, in which they dwell, shall they occupy until the day of judgment, and until their appointed period.

⁵Their appointed period will be long, even until the great judgment. And I saw the spirits of the sons of men who were dead; and their voices reached to heaven, while they were accusing.

⁶Then I inquired of Raphael, an angel who was with me, and said, Whose spirit is that, the voice of which reaches *to heaven*, and accuses?

⁷He answered, saying, This is the spirit of Abel who was slain by Cain his brother; and who will accuse that brother, until his seed be destroyed from the face of the earth;

⁸Until his seed perish from the seed of the human race.

⁹At that time therefore I inquired respecting him, and respecting the general judgment, saying, Why is one separated from another? He answered, Three *separations* have been made between the spirits of the dead, and thus have the spirits of the righteous been separated.

¹⁰Namely, *by* a chasm, *by* water, and *by* light above it.

¹¹And in the same way likewise are sinners separated when they die, and are buried in the earth; judgment not overtaking them in their lifetime.

¹²Here their souls are separated. Moreover, abundant is their suffering until the time of the great judgment, the castigation, and the torment of those who eternally execrate, whose souls are punished and bound there for ever.

¹³And thus has it been from the beginning of the world. Thus has there existed a separation between the souls of those who utter complaints, and of those who watch for their destruction, to slaughter them in the day of sinners.

¹⁴A receptacle of this sort has been formed for the souls of unrighteous men, and of sinners; of those who have completed crime, and associated with the impious, whom they resemble. Their souls shall not be annihilated in the day of judgment, neither shall they arise from this place. Then I blessed God,

¹⁵And said, Blessed by my Lord, the Lord of glory and of righteousness,

who reigns over all for ever and for ever.

[Back](#) | [Back to top](#)

Chapter 23

¹From there I went to another place, towards the west, unto the extremities of the earth.

²Where I beheld a fire blazing and running along without cessation, which intermitted its course neither by day nor by night; but continued always the same.

³I inquired, saying, What is this, which never ceases?

⁴Then Raguel, one of the holy angels who were with me, answered,

⁵And said, This blazing fire, which you behold running towards the west, is *that of* all the luminaries of heaven.

[Back](#) | [Back to top](#)

Chapter 24

¹I went from there to another place, and saw a mountain of fire flashing both by day and night. I proceeded towards it; and perceived seven splendid mountains, which were all different from each other.

²Their stones were brilliant and beautiful; all were brilliant and splendid to behold; and beautiful was their surface. Three *mountains* were towards the east, and strengthened by being placed one upon another; and three were towards the south, strengthened in a similar manner. There were likewise deep valleys, which did not approach each other. And the seventh mountain was in the midst of them. In length they all resembled the seat of a throne, and odoriferous trees surrounded them.

³Among these there was a tree of an unceasing smell; nor of those which were in Eden was there one of all the fragrant trees which smelt like this. Its leaf, its flower, and its bark never withered, and its fruit was beautiful.

⁴Its fruit resembled the cluster of the palm. I exclaimed, Behold! This tree is goodly in aspect, pleasing in its leaf, and the sight of its fruit is delightful to the eye. Then Michael, one of the holy and glorious angels who were with me, and *one* who presided over them, answered,

⁵And said: Enoch, why do you inquire respecting the odour of this tree?

⁶*Why* are you inquisitive to know it?

⁷Then I, Enoch, replied to him, and said, Concerning everything I am desirous of instruction, but particularly concerning this tree.

⁸He answered me, saying, That mountain which you behold, the extent of whose head resembles the seat of the Lord, will be the seat on which shall sit the holy and great Lord of glory, the everlasting King, when he shall come and descend to visit the earth with goodness.

⁹And that tree of an agreeable smell, not one of carnal *odor*, there shall be no power to touch, until the period of the great judgment. When all shall be punished and consumed for ever, this shall be bestowed on the righteous and humble. The fruit of the *tree* shall be given to the elect. For towards the

north life shall be planted in the holy place, towards the habitation of the everlasting King.

¹⁰Then shall they greatly rejoice and exult in the Holy One. The sweet odor shall enter into their bones; and they shall live a long life on the earth as your forefathers have lived; neither in their days shall sorrow, distress, trouble, and punishment afflict them.

¹¹And I blessed the Lord of glory, the everlasting King, because He has prepared *this tree* for the saints, formed it, and declared that He would give it to them.

[Back](#) | [Back to top](#)

Chapter 25

¹From there I proceeded to the middle of the earth, and beheld a happy and fertile spot, which contained branches continually sprouting from the trees which were planted in it. There I saw a holy mountain, and underneath it water on the eastern side, which flowed towards the south. I saw also on the east another mountain as high as that; and between them there were deep, but not wide valleys.

²Water ran towards the mountain to the west of this; and underneath there was likewise another mountain.

³There was a valley, but not a wide one, below it; and in the midst of them were other deep and dry valleys towards the extremity of the three. All these valleys, which were deep, but not side, consisted of a strong rock, with a tree which was planted in them. And I wondered at the rock and at the valleys, being extremely surprised.

[Back](#) | [Back to top](#)

Chapter 26

¹Then I said, What means this blessed land, all these lofty trees, and the accursed valley between them?

²Then Uriel, one of the holy angels who were with me, replied, This valley is the accursed of the accursed for ever. Here shall be collected all who utter with their mouths unbecoming language against God, and speak harsh things of His glory. Here shall they be collected. Here shall be their territory.

³In the latter days an example of judgment shall be made of them in righteousness before the saints; while those who have received mercy shall for ever, all their days, bless God, the everlasting King.

⁴And at the period of judgment shall they bless Him for his mercy, as He has distributed it to them. Then I blessed God, addressing myself to Him, and making mention, as was meet, of His greatness.

[Back](#) | [Back to top](#)

Chapter 27

¹From there I proceeded towards the east to the middle of the mountain in the desert, the level surface only of which I perceived.

²It was full of trees of the seed alluded to; and water leaped down upon it.

³There appeared a cataract composed as of many cataracts both towards the west and towards the east. Upon one side were trees; upon the other water and dew.

[Back](#) | [Back to top](#)

Chapter 28

¹Then I went to another place from the desert; towards the east of that mountain *which* I had approached.

²There I beheld choice trees, ⁽³²⁾ particularly, *those which produce* the sweet-smelling opiate, frankincense and myrrh; and trees unlike to each other.

(32) Choice trees. Literally, "trees of judgment" (Laurence, p. 35; Knibb, p. 117).

³And over it, above them, was the elevation of the eastern mountain at no great distance.

[Back](#) | [Back to top](#)

Chapter 29

¹I likewise saw another place with valleys of water which never wasted,

²*Where* I perceived a goodly tree, which in smell resembled Zaskinon. ⁽³³⁾

(33) Zaskinon. The mastic tree (Knibb, p. 118).

³And towards the sides of these valleys I perceived cinnamon of a sweet odour. Over them I advanced towards the east.

[Back](#) | [Back to top](#)

Chapter 30

¹Then I beheld another mountain containing trees, from which water flowed like Nektro, ⁽³⁴⁾ Its name was Sarira, and Kalboneba. ⁽³⁵⁾ And upon this mountain I beheld another mountain, upon which were trees of Alva.

⁽³⁶⁾

(34) Nektro. A nectar (Knibb, p. 119).

(35) Sarira, and Kalboneba. Styrax and galbanum (Knibb, p. 119).

(36) Alva. Aloe (Knibb, p. 119).

²These trees were full, like almond trees, and strong; and when they produced fruit, it was superior to all redolence.

[Back](#) | [Back to top](#)

Chapter 31

¹After these things, surveying the entrances of the north, above the mountains, I perceived seven mountains replete with pure nard, odoriferous

trees, cinnamon and papyrus.

²From there I passed on above the summits of those mountains to some distance eastwards, and went over the Erythraean sea. ⁽³⁷⁾ And when I was advanced far beyond it, I passed along above the angel Zateel, and arrived at the garden of righteousness. In this garden I beheld, among other trees, some which were numerous and large, and which flourished there.

(37) Erythraean sea. The Red Sea.

³Their fragrance was agreeable and powerful, and their appearance both varied and elegant. The tree of knowledge also was there, of which if any one eats, he becomes endowed with great wisdom.

⁴It was like a species of the tamarind tree, bearing fruit which resembled grapes extremely fine; and its fragrance extended to a considerable distance. I exclaimed, How beautiful is this tree, and how delightful is its appearance!

⁵Then holy Raphael, an angel who was with me, answered and said, This is the tree of knowledge, of which your ancient father and your aged mother ate, who were before you; and who, obtaining knowledge, their eyes being opened, and knowing themselves to be naked, were expelled from the garden.

[Back](#) | [Back to top](#)

Chapter 32

¹From there I went on towards the extremities of the earth; where I saw large beasts different from each other, and birds various in their countenances and forms, as well as with notes of different sounds.

²To the east of these beasts I perceived the extremities of the earth, where heaven ceased. The gates of heaven stood open, and I beheld the celestial stars come forth. I numbered them as they proceeded out of the gate, and wrote them all down, as they came out one by one according to their number. *I wrote down* their names altogether, their times and their seasons, as the angel Uriel, who was with me, pointed them out to me.

³He showed them all to me, and wrote down *an account of* them.

⁴He also wrote down for me their names, their regulations, and their operations.

[Back](#) | [Back to top](#)

Chapter 33

¹From there I advanced on towards the north, to the extremities of the earth.

²And there I saw a great and glorious wonder at the extremities of the whole earth.

³I saw there heavenly gates opening into heaven; three of them distinctly separated. The northern winds proceeded from them, blowing cold, hail, frost, snow, dew, and rain.

⁴From one of the gates they blew mildly; but when they blew from the two *other gates*, it was with violence and force. They blew over the earth

strongly.

[Back](#) | [Back to top](#)

Chapter 34

¹From there I went to the extremities of the world westwards;

²Where I perceived three gates open, as I had seen in the north; the gates and passages through them being of equal magnitude.

[Back](#) | [Back to top](#)

Chapter 35

¹Then I proceeded to the extremities of the earth southwards; where I saw three gates open to the south, from which issued dew, rain, and wind.

²From there I went to the extremities of heaven eastwards; where I saw three heavenly gates open to the east, which had smaller gates within them. Through each of these small gates the stars of heaven passed on, and proceeded towards the west by a path which was seen by them, and that at every period *of their appearance*.

³When I beheld *them*, I blessed; every time *in which they appeared*, I blessed the Lord of glory, who had made those great and splendid signs, that they might display the magnificence of this works to angels and to the souls of men; and that these might glorify all his works and operations; might see the effect of his power; might glorify the great labour of his hands; and bless him for ever.

[Back](#) | [Back to top](#)

(No Chapter 36)

[Back](#) | [Back to top](#)

Chapter 37

¹The vision which he saw, the second vision of wisdom, which Enoch saw, the son of Jared, the son of Malaleel, the son of Canan, the son of Enos, the son of Seth, the son of Adam. This is the commencement of the word of wisdom, which I received to declare and tell to those who dwell upon earth. Hear from the beginning, and understand to the end, the holy things which I utter in the presence of the Lord of spirits. Those who were before *us* thought it good to speak;

²And let not us, who come after, obstruct the beginning of wisdom. Until the present period never has there been given before the Lord of spirits that which I have received, wisdom according the capacity of my intellect, and according to the pleasure of the Lord of spirits; that which I have received from him, a portion of life eternal.

³And I obtained three parables, which I declared to the inhabitants of the world.

[Back](#) | [Back to top](#)

Chapter 38

¹Parable the first. When the congregation of the righteous shall be manifested; and sinners be judged for their crimes, and be troubled in the sight of the world;

²When righteousness shall be manifested ⁽³⁸⁾ in the presence of the righteous themselves, who will be elected for their *good* works *duly* weighed by the Lord of spirits; and when the light of the righteous and the elect, who dwell on earth, shall be manifested; where will the habitation of sinners be? And where the place of rest for those who have rejected the Lord of spirits? It would have been better for them, had they never been born.

(38) When righteousness shall be manifested. Or, "when the Righteous One appears" (Knibb, p. 125; cp. Charles, p. 112).

³When, too, the secrets of the righteous shall be revealed, then shall sinners be judged; and impious men shall be afflicted in the presence of the righteous and the elect.

⁴From that period those who possess the earth shall cease to be powerful and exalted. Neither shall they be capable of beholding the countenances of the holy; for the light of the countenances of the holy, the righteous, and the elect, has been seen by the Lord of spirits. ⁽³⁹⁾

(39) For the light...Lord of spirits. Or, "for the light of the Lord of spirits will have appeared on the face of the holy, the righteous, and the chosen" (Knibb, p. 126).

⁵Yet shall not the mighty kings of that period be destroyed; but be delivered into the hands of the righteous and the holy.

⁶Nor thenceforwards shall any obtain commiseration from the Lord of spirits, because their lives *in this world* will have been completed.

[Back](#) | [Back to top](#)

Chapter 39

¹In those days shall the elect and holy race descend from the upper heavens, and their seed shall then be with the sons of men. Enoch received books of indignation and wrath, and books of hurry and agitation.

²Never shall they obtain mercy, saith the Lord of spirits.

³A cloud then snatched me up, and the wind raised me above the surface of the earth, placing me at the extremity of the heavens.

⁴There I saw another vision; I *saw* the habitations and resting places of the saints. There my eyes beheld their habitations with the angels, and their resting places with the holy ones. They were entreating, supplicating, and praying for the sons of men; while righteousness like water flowed before them, and mercy like dew *was scattered* over the earth. And thus *shall it be* with them for ever and for ever.

⁵At that time my eyes beheld the dwelling of the elect, of truth, faith, and righteousness.

⁶Countless shall be the number of the holy and the elect, in the presence of God for ever and for ever.

⁷Their residence I beheld under the wings of the Lord of spirits. All the holy and the elect sung before him, in appearance like a blaze of fire; their mouths being full of blessings, and their lips glorifying the name of the Lord of spirits. And righteousness incessantly *dwelt* before him.

⁸There was I desirous of remaining, and my soul longed for that habitation. There was my antecedent inheritance; for thus had I prevailed before the Lord of spirits.

⁹At that time I glorified and extolled the name of the Lord of spirits with blessing and with praise; for he has established it with blessing and with praise, according to his own good pleasure.

¹⁰That place long did my eyes contemplate. I blessed and said, Blessed be he, blessed from the beginning for ever. In the beginning, before the world was created, and without end is his knowledge.

¹¹What is this world? Of every existing generation those shall bless you who do not *spiritually* sleep but stand before your glory, blessing, glorifying, exalting you, and saying, The holy, holy, Lord of spirits, fills the whole world of spirits.

¹²There my eyes beheld all who, without sleeping, stand before him and bless him, saying, Blessed be you, and blessed be the name of God for ever and for ever. Then my countenance became changed, until I was incapable of seeing.

[Back](#) | [Back to top](#)

Chapter 40

¹After this I beheld thousands of thousands, and myriads of myriads, and an infinite number of people, standing before the Lord of spirits.

²On the four wings likewise of the Lord of spirits, on the four sides, I perceived others, besides those who were standing *before him*. Their names, too, I know; because the angel, who proceeded with me, declared them to me, discovering to me every secret thing.

³Then I heard the voices of those upon the four sides magnifying the Lord of glory.

⁴The first voice blessed the Lord of spirits for ever and for ever.

⁵The second voice I heard blessing the Elect One, and the elect who suffer on account of the Lord of spirits.

⁶The third voice I heard petitioning and praying for those who dwell upon earth, and supplicate the name of the Lord of spirits.

⁷The fourth voice I heard expelling the impious angels, ⁽⁴⁰⁾ and prohibiting them from entering into the presence of the Lord of spirits, to prefer accusations against ⁽⁴¹⁾ the inhabitants of the earth.

(40) Impious angels. Literally, "the Satans" (Laurence, p. 45; Knibb, p. 128). *Ha-satan* in Hebrew ("the adversary") was originally the title of an office, not the name of an angel.

(41) Prefer accusations against. Or, "to accuse" (Charles, p. 119).

⁸After this I besought the angel of peace, who proceeded with me, to explain all that was concealed. I said to him, Who are those *whom* I have seen on the four sides, and who words I have heard and written down? He replied, The first is the merciful, the patient, the holy Michael.

⁹The second is he who *presides* over every suffering and every affliction of the sons of men, the holy Raphael. The third, who *presides* over all that is powerful, is Gabriel. And the fourth, who *presides* over repentance, and the hope of those who will inherit eternal life, is Phanuel. These are the four angels of the most high God, and their four voices, which at that time I heard.

[Back](#) | [Back to top](#)

Chapter 41

¹After this I beheld the secrets of the heavens and of paradise, according to its divisions; and of human action, as they weight it there in balances. I saw the habitations of the elect, and the habitations of the holy. And there my eyes beheld all the sinners, who denied the Lord of glory, and whom they were expelling from there, and dragging away, as they stood *there*; no punishment proceeding against them from the Lord of spirits.

²There, too, my eyes beheld the secrets of the lightning and the thunder; and the secrets of the winds, how they are distributed as they blow over the earth: the secrets of the winds, of the dew, and of the clouds. There I perceived the place from which they issued forth, and became saturated with the dust of the earth.

³There I saw the wooden receptacles out of which the winds became separated, the receptacle of hail, the receptacle of snow, the receptacle of the clouds, and the cloud itself, *which* continued over the earth before *the creation of* the world.

⁴I beheld also the receptacles of the moon, whence they came, whither they proceeded, their glorious return, and how one became more splendid than another. I *marked* their rich progress, their unchangeable progress, their disunited and undiminished progress; their observance of a mutual fidelity by a stable oath; their proceeding forth before the sun, and their adherence to the path *allotted* them, ⁽⁴²⁾ in obedience to the command of the Lord of spirits. Potent is his name for ever and for ever.

(42) Their proceeding forth...path allotted them. Or, "the sun goes out first and completes its journey" (Knibb, p. 129; cp. Charles, p. 122).

⁵After this *I perceived, that* the path both concealed and manifest of the moon, as well as the progress of its path, was there completed by day and by night; while each, one with another, looked towards the Lord of spirits, magnifying and praising without cessation, since praise to them is rest; for in the splendid sun there is a frequent conversion to blessing and to malediction.

⁶The course of the moon's path to the righteous is light, but to sinners it is darkness; in the name of the Lord of spirits, who created *a division*

between light and darkness, and, separating the spirits of men, strengthened the spirits of the righteous in the name of his own righteousness.

⁷Nor does the angel prevent *this*, neither is he endowed with the power of preventing it; for the Judge beholds them all, and judges them all in his own presence.

[Back](#) | [Back to top](#)

Chapter 42

¹Wisdom found not a place *on earth* where she could inhabit; her dwelling therefore is in heaven.

²Wisdom went forth to dwell among the sons of men, but she obtained not a habitation. Wisdom returned to her place, and seated herself in the midst of the angels. But iniquity went forth after her return, who unwillingly found *a habitation*, and resided among them, as rain in the desert, and as a dew in a thirsty land.

[Back](#) | [Back to top](#)

Chapter 43

¹I beheld another splendour, and the stars of heaven. I observed that he called them all by their respective names, and that they heard. In a righteous balance I saw that he weighed out with their light the amplitude of their places, and the day of their appearance, and their conversion. Splendour produced splendour; and their conversion *was* into the number of the angels, and of the faithful.

²Then I inquired of the angel, who proceeded with me, and explained to me secret things, What *their names* were. He answered. A similitude of those has the Lord of spirits shown you. They are names of the righteous who dwell upon earth, and who believe in the name of the Lord of spirits for ever and for ever.

[Back](#) | [Back to top](#)

Chapter 44

¹Another thing also I saw respecting splendour; that it rises out of the stars, and becomes splendour; being incapable of forsaking them.

[Back](#) | [Back to top](#)

Chapter 45

¹Parable the second, respecting these who deny the name of the habitation of the holy ones, and of the Lord of spirits.

²Heaven they shall not ascend, nor shall they come on the earth. This shall be the portion of sinners, who deny the name of the Lord of spirits, and who are thus reserved for the day of punishment and of affliction.

³In that day shall the Elect One sit upon a throne of glory; and shall choose

their conditions and countless habitations, while their spirits within them shall be strengthened, when they behold my Elect One, for those who have fled for protection to my holy and glorious name.

⁴In that day I will cause my Elect One to dwell in the midst of them; will change *the face of* heaven; will bless it, and illuminate it for ever.

⁵I will also change *the face of* the earth, will bless it; and cause those whom I have elected to dwell upon it. But those who have committed sin and iniquity shall not inhabit it, for I have marked their proceedings. My righteous ones will I satisfy with peace, placing them before me; but the condemnation of sinners shall draw near, that I may destroy them from the face of the earth.

[Back](#) | [Back to top](#)

Chapter 46

¹There I beheld the Ancient of days, whose head was like white wool, and with him another, whose countenance resembled that of man. His countenance was full of grace, like *that of* one of the holy angels. Then I inquired of one of the angels, who went with me, and who showed me every secret thing, concerning this Son of man; who he was; whence he was and why he accompanied the Ancient of days.

²He answered and said to me, This is the Son of man, to whom righteousness belongs; with whom righteousness has dwelt; and who will reveal all the treasures of that which is concealed: for the Lord of spirits has chosen him; and his portion has surpassed all before the Lord of spirits in everlasting uprightness.

³This Son of man, whom you behold, shall raise up kings and the mighty from their dwelling places, and the powerful from their thrones; shall loosen the bridles of the powerful, and break in pieces the teeth of sinners.

⁴He shall hurl kings from their thrones and their dominions; because they will not exalt and praise him, nor humble themselves *before him*, by whom their kingdoms were granted to them. The countenance likewise of the mighty shall He cast down, filling them with confusion. Darkness shall be their habitation, and worms shall be their bed; nor from *that* their bed shall they hope to be again raised, because they exalted not the name of the Lord of spirits.

⁵They shall condemn the stars of heaven, shall lift up their hands against the Most High, shall tread upon and inhabit the earth, exhibiting all their acts of iniquity, even their works of iniquity. Their strength shall be in their riches, and their faith in the gods whom they have formed with their own hands. They shall deny the name of the Lord of spirits, and shall expel him from the temples, in which they assemble;

⁶And *with him* the faithful, ⁽⁴³⁾ who suffer in the name of the Lord of spirits.

(43) Shall expel him...the faithful. Or, "will be driven from the houses of his congregation, and of the faithful" (Knibb, p. 132; cp. Charles, p. 131).

[Back](#) | [Back to top](#)

Chapter 47

¹In that day the prayer of the holy and the righteous, and the blood of the righteous, shall ascend from the earth into the presence of the Lord of spirits.

²In that day shall the holy ones assemble, who dwell above the heavens, and with united voice petition, supplicate, praise, laud, and bless the name of the Lord of spirits, on account of the blood of the righteous which has been shed; that the prayer of the righteous may not be intermitted before the Lord of spirits; that for them he would execute judgment; and that his patience may not endure for ever. ⁽⁴⁴⁾

(44) That his patience...endure for ever. Or, "(that) their patience may not have to last for ever" (Knibb, p. 133).

³At that time I beheld the Ancient of days, while he sat upon the throne of his glory, *while* the book of the living was opened in his presence, and *while* all the powers which were above the heavens stood around and before him.

⁴Then were the hearts of the saints full of joy, because the consummation of righteousness was arrived, the supplication of the saints heard, and the blood of the righteous appreciated by the Lord of spirits.

[Back](#) | [Back to top](#)

Chapter 48

¹In that place I beheld a fountain of righteousness, which never failed, encircled by many springs of wisdom. Of these all the thirsty drank, and were filled with wisdom, having their habitation with the righteous, the elect, and the holy.

²In that hour was this Son of man invoked before the Lord of spirits, and his name in the presence of the Ancient of days.

³Before the sun and the signs were created, before the stars of heaven were formed, his name was invoked in the presence of the Lord of spirits. A support shall he be for the righteous and the holy to lean upon, without falling; and he shall be the light of nations.

⁴He shall be the hope of those whose hearts are troubled. All, who dwell on earth, shall fall down and worship before him; shall bless and glorify him, and sing praises to the name of the Lord of spirits.

⁵Therefore the Elect and the Concealed One existed in his presence, before the world was created, and for ever.

⁶In his presence *he existed*, and has revealed to the saints and to the righteous the wisdom of the Lord of spirits; for he has preserved the lot of the righteous, because they have hated and rejected this world of iniquity, and have detested all its works and ways, in the name of the Lord of spirits.

⁷For in his name shall they be preserved; and his will shall be their life. In those days shall the kings of the earth and the mighty men, who have gained the world by their achievements, become humble in countenance.

⁸For in the day of their anxiety and trouble their souls shall not be saved; and *they shall be* in subjection to those whom I have chosen.

⁹I will cast them like hay into the fire, and like lead into the water. Thus shall they burn in the presence of the righteous, and sink in the presence of the holy; nor shall a tenth part of them be found.

¹⁰But in the day of their trouble, the world shall obtain tranquillity.

¹¹In his presence shall they fall, and not be raised up again; nor shall there be any one to take them out of his hands, and to lift them up: for they have denied the Lord of spirits, and his Messiah. The name of the Lord of spirits shall be blessed.

Chapter 48A⁽⁴⁵⁾

(45) Two consecutive chapters are numbered "48."

¹Wisdom is poured forth like water, and glory fails not before him for ever and ever; for potent is he in all the secrets of righteousness.

²But iniquity passes away like a shadow, and possesses not a fixed station: for the Elect One stands before the Lord of spirits; and his glory is for ever and ever; and his power from generation to generation.

³With him dwells the spirit of intellectual wisdom, the spirit of instruction and of power, and the spirit of those who sleep in righteousness; he shall judge secret things.

⁴Nor shall any be able to utter a single word before him; for the Elect One is in the presence of the Lord of Spirits, according to his own pleasure.

[Back](#) | [Back to top](#)

Chapter 49

¹In those days the saints and the chosen shall undergo a change. The light of day shall rest upon them; and the splendour and glory of the saints shall be changed.

²In the day of trouble evil shall be heaped up upon sinners; but the righteous shall triumph in the name of the Lord of spirits.

³Others shall be made to see, that they must repent, and forsake the works of their hands; and that glory awaits them not in the presence of the Lord of spirits; yet that by his name they may be saved. The Lord of spirits will have compassion on them; for great is his mercy; and righteousness is in his judgment, and in the presence of his glory; nor in his judgment shall iniquity stand. He who repents not before him shall perish.

⁴Henceforward I will not have mercy on them, saith the Lord of spirits.

[Back](#) | [Back to top](#)

Chapter 50

¹In those days shall the earth deliver up from her womb, and hell deliver up from hers, that which it has received; and destruction shall restore that which it owes.

²He shall select the righteous and holy from among them; for the day of their salvation has approached.

³And in those days shall the Elect One sit upon his throne, while every secret of intellectual wisdom shall proceed from his mouth, for the Lord of spirits has gifted and glorified him.

⁴In those days the mountains shall skip like rams, and the hills shall leap like young sheep ⁽⁴⁶⁾ satiated with milk; and all *the righteous* shall become *like* angels in heaven.

(46) Cp. Psalm 114:4

⁵Their countenance shall be bright with joy; for in those days shall the Elect One be exalted. The earth shall rejoice; the righteous shall inhabit it, and the elect possess it.

[Back](#) | [Back to top](#)

Chapter 51

¹After that period, in the place where I had seen every secret sight, I was snatched up in a whirlwind, and carried off westwards.

²There my eyes beheld the secrets of heaven, and all which existed on earth; a mountain of iron, a mountain of copper, a mountain of silver, a mountain of gold, a mountain of fluid metal, and a mountain of lead.

³And I inquired of the angel who went with me, saying, What are these things, which in secret I behold?

⁴He said, All these things which you behold shall be for the dominion of the Messiah, that he may command, and be powerful upon earth.

⁵And that angel of peace answered me, saying, Wait but a short time, and you shalt understand, and every secret thing shall be revealed to you, which the Lord of spirits has decreed. Those mountains which you have seen, the mountain of iron, the mountain of copper, the mountain of silver, the mountain of gold, the mountain of fluid metal, and the mountain of lead, all these in the presence of the Elect One shall be like a honeycomb before the fire, and like water descending from above upon these mountains; and shall become debilitated before his feet.

⁶In those days men shall not be saved by gold and by silver.

⁷Nor shall they have it in their power to secure themselves, and to fly.

⁸There shall be neither iron for war, nor a coat of mail for the breast.

⁹Copper shall be useless; useless also that which neither rusts nor consumes away; and lead shall not be coveted.

¹⁰All these things shall be rejected, and perish from off the earth, when the Elect One shall appear in the presence of the Lord of spirits.

[Back](#) | [Back to top](#)

Chapter 52

¹There my eyes beheld a deep valley; and wide was its entrance.

²All who dwell on land, on the sea, and in islands, shall bring to it gifts, presents, and offerings; yet that deep valley shall not be full. Their hands

shall commit iniquity. Whatsoever they produce by labour, the sinners shall devour with crime. But they shall perish from the face of the Lord of spirits, and from the face of his earth. They shall stand up, and shall not fail for ever and ever.

³I beheld the angels of punishment, who were dwelling *there*, and preparing every instrument of Satan.

⁴Then I inquired of the angel of peace, who proceeded with me, for whom those instruments were preparing.

⁵He said, These they are preparing for the kings and powerful ones of the earth, that thus they may perish.

⁶After which the righteous and chosen house of his congregation shall appear, and thenceforward unchangeable in the name of the Lord of spirits.

⁷Nor shall those mountains exist in his presence as the earth and the hills, as the fountains of water *exist*. And the righteous shall be relieved from the vexation of sinners.

[Back](#) | [Back to top](#)

Chapter 53

¹Then I looked and turned myself to another part of the earth, where I beheld a deep valley burning with fire.

²To this valley they brought monarchs and the mighty.

³And there my eyes beheld the instruments which they were making, fetters of iron without weight. ⁽⁴⁷⁾

(47) Without weight. Or, "of immeasurable weight" (Knibb, p. 138).

⁴Then I inquired of the angel of peace, who proceeded with me, saying, For whom are these fetters and instruments prepared?

⁵He replied, These are prepared for the host of Azazeel, that they may be delivered over and adjudged to the lowest condemnation; and that their angels may be overwhelmed with hurled stones, as the Lord of spirits has commanded.

⁶Michael and Gabriel, Raphael and Phanuel shall be strengthened in that day, and shall then cast them into a furnace of blazing fire, that the Lord of spirits may be avenged of them for their crimes; because they became ministers of Satan, and seduced those who dwell upon earth.

⁷In those days shall punishment go forth from the Lord of spirits; and the receptacles of water which are above the heavens shall be opened, and the fountains likewise, which are under the heavens and under the earth.

⁸All the waters, which are in the heavens and above them, shall be mixed together.

⁹The water which is above heaven shall be the agent; ⁽⁴⁸⁾

(48) Agent. Literally, "male" (Laurence, p. 61).

¹⁰And the water which is under the earth shall be the recipient: ⁽⁴⁹⁾ and all shall be destroyed who dwell upon earth, and who dwell under the extremities of heaven.

(49) Recipient. Literally, "female" (Laurence, p. 61).

¹¹By these means shall they understand the iniquity which they have

committed on earth: and by these means shall they perish.

[Back](#) | [Back to top](#)

Chapter 54

¹Afterwards the Ancient of days repented, and said, In vain have I destroyed all the inhabitants of the earth.

²And he swore by his great name, *saying*, Henceforwards I will not act thus towards all those who dwell upon earth.

³But I will place a sign in the heavens; ⁽⁵⁰⁾ and it shall be a faithful witness between me and them for ever, as long as the days of heaven and earth last upon the earth.

(50) Cp. Gen. 9:13, "I do set my bow in the cloud, and it shall be for a token of a covenant between me and the earth."

⁴Afterwards, according to this my decree, when I shall be disposed to seize them beforehand, by the instrumentality of angels, in the day of affliction and trouble, my wrath and my punishment shall remain upon them, my punishment and my wrath, saith God the Lord of spirits.

⁵O you kings, O you mighty, who inhabit the world you shall behold my Elect One, sitting upon the throne of my glory. And he shall judge Azazeel, all his associates, and all his hosts, in the name of the Lord of spirits.

⁶There likewise I beheld hosts of angels who were moving in punishment, confined in a net-work of iron and brass. Then I inquired of the angel of peace, who proceeded with me, To whom those under confinement were going.

⁷He said, To each of their elect and their beloved, ⁽⁵¹⁾ that they may be cast into the fountains and deep recesses of the valley.

(51) To each of...their beloved. Or, "Each to his own chosen ones and to his own beloved ones" (Knibb, p. 139).

⁸And that valley shall be filled with their elect and beloved; the days of whose life shall be consumed, but the days of their error shall be innumerable.

⁹Then shall princes ⁽⁵²⁾ combine together, and conspire. The chiefs of the east, among the Parthians and Medes, shall remove kings, in whom a spirit of perturbation shall enter. They shall hurl them from their thrones, springing as lions from their dens, and like famished wolves into the midst of the flock.

(52) Princes. Or, "angels" (Charles, p. 149; Knibb, p. 140).

¹⁰They shall go up, and tread upon the land of their elect. The land of their elect shall be before them. The threshing-floor, the path, and the city of my righteous *people* shall impede *the progress of* their horses. They shall rise up to destroy each other; their right hand shall be strengthened; nor shall a man acknowledge his friend or his brother;

¹¹Nor the son his father and his mother; until the number of the dead bodies shall be *completed*, by their death and punishment. Neither shall this take place without cause.

¹²In those days shall the mouth of hell be opened, into which they shall be

immersed; hell shall destroy and swallow up sinners from the face of the elect.

[Back](#) | [Back to top](#)

Chapter 55

¹After this I beheld another army of chariots with men riding in them.

²And they came upon the wind from the east, from the west, and from the south. ⁽⁵³⁾

(53) From the south. Literally, "from the midst of the day" (Laurence, p. 63).

³The sound of the noise of their chariots was heard.

⁴And when that agitation took place; the saints out of heaven perceived it; the pillar of the earth shook from its foundation; and the sound was heard from the extremities of the earth unto the extremities of heaven at the same time.

⁵Then they all fell down, and worshipped the Lord of spirits.

⁶This is the end of the second parable.

[Back](#) | [Back to top](#)

Chapter 56

¹I now began to utter the third parable, concerning the saints and the elect.

²Blessed are you, O saints and elect, for glorious is your lot.

³The saints shall exist in the light of the sun, and the elect in the light of everlasting life, the days of whose life shall never terminate; nor shall the days of the saints be numbered, who seek for light, and obtain righteousness with the Lord of spirits.

⁴Peace be to the saints with the Lord of the world.

⁵Henceforward shall the saints be told to seek in heaven the secrets of righteousness, the portion of faith; for like the sun has it arisen upon the earth, while darkness has passed away. There shall be light interminable; nor shall they enter upon the enumeration of time; for darkness shall be previously destroyed, and light shall increase before the Lord of spirits; before the Lord of spirits shall the light of uprightness increase for ever.

[Back](#) | [Back to top](#)

Chapter 57

¹In those days my eyes beheld the secrets of the lightnings and the splendours, and the judgment belonging to them.

²They lighten for a blessing and for a curse, according to the will of the Lord of spirits.

³And there I saw the secrets of the thunder, when it rattles above in heaven, and its sound is heard.

⁴The habitations also of the earth were shown to me. The sound of the thunder is for peace and for blessing, as well as for a curse, according to

the word of the Lord of spirits.

⁵Afterwards every secret of the splendours and of the lightnings was seen by me. For blessing and for fertility they lighten.

[Back](#) | [Back to top](#)

Chapter 58

¹In the five hundredth year, and in the seventh month, on the fourteenth *day* of the month, of the lifetime of Enoch, in that parable, I saw that the heaven of heavens shook; that it shook violently; and that the powers of the Most High, and the angels, thousands and thousands, and myriads of myriads, were agitated with great agitation. And when I looked, the Ancient of days was sitting on the throne of his glory, while the angels and saints were standing around him. A great trembling came upon me, and terror seized me. My loins were bowed down and loosened; my reins were dissolved; and I fell upon my face. The holy Michael, another holy angel, one of the holy ones, was sent, who raised me up.

²And when he raised me, my spirit returned; for I was incapable of enduring this vision of violence, its agitation, and the concussion of heaven.

³Then holy Michael said to me, Why are you disturbed at this vision?

⁴Hitherto has existed the day of mercy; and he has been merciful and longsuffering towards all who dwell upon the earth.

⁵But when the time shall come, then *shall* the power, the punishment, and the judgment *take place*, which the Lord of spirits has prepared for those who prostrate themselves to the judgment of righteousness, for those who abjure that judgment, and for those who take *his* name in vain.

⁶That day has been prepared for the elect *as a day of covenant*; and for sinners *as a day of inquisition*.

⁷In that day shall be distributed *for food* ⁽⁵⁴⁾ two monsters; a female monster, whose name is Leviathan, dwelling in the depths of the sea, above the springs of waters;

(54) Distributed for food. Or, "separated from one another" (Knibb, p. 143).

⁸And a male *monster*, whose name is Behemoth; which possesses, *moving* on his breast, the invisible wilderness.

⁹His name was Dendayen in the east of the garden, where the elect and the righteous will dwell; where he received *it* from my ancestor, who was man, from Adam the first of men, ⁽⁵⁵⁾ whom the Lord of spirits made.

(55) He received it...first of men. Or, "my [great-] grandfather was taken up, the seventh from Adam" (Charles, p. 155). This implies that this section of the book was written by Noah, Enoch's descendant, rather than Enoch. Scholars have speculated that this portion of the book may contain fragments of the lost Apocalypse of Noah.

¹⁰Then I asked of another angel to show me the power of those monsters, how they became separated, how they became separated on the same day, one *being* in the depths of the sea, and one in the dry desert.

¹¹And he said, You, son of man, are here desirous of understanding secret

things.

¹²And the angel of peace, who was with me, said, These two monsters are by the power of God prepared to become food, that the punishment of God may not be in vain.

¹³Then shall children be slain with their mothers, and sons with their fathers.

¹⁴And when the punishment of the Lord of spirits shall continue, upon them shall it continue, that the punishment of the Lord of spirits may not take place in vain. After that, judgment shall exist with mercy and longsuffering.

[Back](#) | [Back to top](#)

Chapter 59

¹Then another angel, who proceeded with me, spoke to me;

²And showed me the first and last secrets in heaven above, and in the depths of the earth:

³In the extremities of heaven, and in the foundations of it, and in the receptacle of the winds.

⁴*He showed me* how their spirits were divided; how they were balanced; and how both the springs and the winds were numbered according to the force of their spirit.

⁵*He showed me* the power of the moon's light, that its power is a just one; as well as the divisions of the stars, according to their respective names;

⁶*That* every division is divided; that the lightning flashes;

⁷That its troops immediately obey; and that a cessation takes place during thunder in continuance of its sound. Nor are the thunder and the lightning separated; neither do both of them move with one spirit; yet they are not separated.

⁸For when the lightning lightens, the thunder sounds, and the spirit at a proper period pauses, making an equal division between them; for the receptacle, upon which their periods depend, is *loose* as sand. Each of them at a proper season is restrained with a bridle; and turned by the power of the spirit, which thus propels *them* according to the spacious extent of the earth.

⁹The spirit likewise of the sea is potent and strong; and as a strong power causes it to ebb, so is it driven forwards, and scattered against the mountains of the earth. The spirit of the frost has its angel; in the spirit of hail there is a good angel; the spirit of snow ceases in its strength, and a solitary spirit is in it, which ascends from it like vapour, and is called refrigeration.

¹⁰The spirit also of mist dwells with them in their receptacle; but it has a receptacle to itself; for its progress is in splendour.

¹¹In light, and in darkness, in winter and in summer. Its receptacle is bright, and an angel is *in it*.

¹²The spirit of dew *has* its abode in the extremities of heaven, in connection with the receptacle of rain; and its progress is in winter and in summer. The cloud produced by it, and the cloud of the mist, become united; one gives

to the other; and when the spirit of rain is in motion from its receptacle, angels come, and opening its receptacle, bring it forth.

¹³When likewise it is sprinkled over all the earth, it forms an union with every kind of water on the ground; for the waters remain on the ground, because *they afford* nourishment to the earth from the Most High, who is in heaven.

¹⁴Upon this account therefore there is a regulation in the quantity of rain, which the angels receive.

¹⁵These things I saw; all of them, even paradise.

[Back](#) | [Back to top](#)

Chapter 60

¹In those days I beheld long ropes given to those angels; who took to their wings, and fled, advancing towards the north.

²And I inquired of the angel, saying, Wherefore have they taken those long ropes, and gone forth? He said, They are gone forth to measure.

³The angel, who proceeded with me, said, These are the measures of the righteous; and cords shall the righteous bring, that they may trust in the name of the Lord of spirits for ever and ever.

⁴The elect shall begin to dwell with the elect.

⁵And these are the measures which shall be given to faith, and *which* shall strengthen the words of righteousness.

⁶These measures shall reveal all the secrets in the depth of the earth.

⁷And *it shall be*, that those who have been destroyed in the desert, and who have been devoured by the fish of the sea, and by wild beasts, shall return, and trust in the day of the Elect One; for none shall perish in the presence of the Lord of spirits, nor shall any be capable of perishing.

⁸Then they received the commandment, all *who were* in the heavens above; to whom a combined power, voice, and splendour, like fire, were given.

⁹And first, with *their* voice, they blessed him, they exalted him, they glorified him with wisdom, and ascribed to him wisdom with the word, and with the breath of life.

¹⁰Then the Lord of spirits seated upon the throne of his glory the Elect One;

¹¹Who shall judge all the works of the holy, in heaven above, and in a balance shall he weigh their actions. And when he shall lift up his countenance to judge their secret ways in the word of the name of the Lord of spirits, and their progress in the path of the righteous judgment of God most high;

¹²They shall all speak with united voice; and bless, glorify, exalt, and praise, in the name of the Lord of spirits.

¹³He shall call to every power of the heavens, to all the holy above, and to the power of God. The Cherubim, the Seraphim, and the Ophanin, all the angels of power, and all the angels of the Lords, namely, of the Elect One, and of the other Power, who *was* upon earth over the water on that day,

¹⁴Shall raise their united voice; shall bless, glorify, praise, and exalt with the spirit of faith, with the spirit of wisdom and patience, with the spirit of

mercy, with the spirit of judgment and peace, and with the spirit of benevolence; all shall say with united voice; Blessed is He; and the name of the Lord of spirits shall be blessed for ever and for ever; all, who sleep not, shall bless it in heaven above.

¹⁵All the holy in heaven shall bless it; all the elect who dwell in the garden of life; and every spirit of light, who is capable of blessing, glorifying, exalting, and praising your holy name; and every mortal man, ⁽⁵⁶⁾ more than the powers *of heaven*, shall glorify and bless your name for ever and ever.

(56) Every mortal man. Literally, "all of flesh" (Laurence, p. 73).

¹⁶For great is the mercy of the Lord of spirits; long-suffering is he; and all his works, all his power, great as are the things which he has done, has he revealed to the saints and to the elect, in the name of the Lord of spirits.

The Book of Enoch

Chapters 61-105

(also referred to as "Ethiopian Enoch" or "1 Enoch")

Chapter 61

¹Thus the Lord commanded the kings, the princes, the exalted, and those who dwell on earth, saying, Open your eyes, and lift up your horns, if you are capable of comprehending the Elect One.

²The Lord of spirits sat upon the throne of his glory.

³And the spirit of righteousness was poured out over him.

⁴The word of his mouth shall destroy all the sinners and all the ungodly, who shall perish at his presence.

⁵In that day shall all the kings, the princes, the exalted, and those who possess the earth, stand up, behold, and perceive, that he is sitting on the throne of his glory; that before him the saints shall be judged in righteousness;

⁶And that nothing, which shall be spoken before him, shall be *spoken* in vain.

⁷Trouble shall come upon them, as upon a woman in travail, whose labour is severe, when her child comes to the mouth of the womb, and she finds it difficult to bring forth.

⁸One portion of them shall look upon another. They shall be astonished, and shall humble their countenance;

⁹And trouble shall seize them, when they shall behold this Son of woman sitting upon the throne of his glory.

¹⁰Then shall the kings, the princes, and all who possess the earth, glorify him who has dominion over all things, him who was concealed; for from the beginning the Son of man existed in secret, whom the Most High

preserved in the presence of his power, and revealed to the elect.

¹¹He shall sow the congregation of the saints, and of the elect; and all the elect shall stand before him in that day.

¹²All the kings, the princes, the exalted, and those who rule over all the earth, shall fall down on their faces before him, and shall worship him.

¹³They shall fix their hopes on this Son of man, shall pray to him, and petition him for mercy.

¹⁴Then shall the Lord of spirits hasten to expel them from his presence. Their faces shall be full of confusion, and their faces shall darkness cover. The angels shall take them to punishment, that vengeance may be inflicted on those who have oppressed his children and his elect. And they shall become an example to the saints and to his elect. Through them shall these be made joyful; for the anger of the Lord of spirits shall rest upon them.

¹⁵Then the sword of the Lord of spirits shall be drunk with their blood; but the saints and elect shall be safe in that day; nor the face of the sinners and the ungodly shall they thenceforwards behold.

¹⁶The Lord of spirits shall remain over them:

¹⁷And with this Son of man shall they dwell, eat, lie down, and rise up, for ever and ever.

¹⁸The saints and the elect have arisen from the earth, have left off to depress their countenances, and have been clothed with the garment of life. That garment of life is with the Lord of spirits, in whose presence your garment shall not wax old, nor shall your glory diminish.

[Back](#) | [Back to top](#)

Chapter 62

¹In those days the kings who possess the earth shall be punished by the angels of his wrath, wheresoever they shall be delivered up, that he may give rest for a short period; and that they may fall down and worship before the Lord of spirits, confessing their sins before him.

²They shall bless and glorify the Lord of spirits, saying, Blessed is the Lord of spirits, the Lord of kings, the Lord of princes, the Lord of the rich, the Lord of glory, and the Lord of wisdom.

³He shall enlighten every secret thing.

⁴Your power is from generation to generation; and your glory for ever and ever.

⁵Deep are all your secrets, and numberless; and your righteousness cannot be calculated.

⁶Now we know, that we should glorify and bless the Lord of kings, him who is King over all things.

⁷They shall also say, Who has granted us rest to glorify, laud, bless, and confess in the presence of his glory?

⁸And now small is the rest we desire; but we do not find *it*; we reject, and do not possess *it*. Light has passed away from before us; and darkness *has covered* our thrones for ever.

⁹For we have not confessed before him; we have not glorified the name of

the Lord of kings; we have not glorified the Lord in all his works; but we have trusted in the sceptre of our dominion and of our glory.

¹⁰In the day of our suffering and of our trouble he will not save us, neither shall we find rest. We confess that our Lord is faithful in all his works, in all his judgments, and in his righteousness.

¹¹In his judgments he pays no respect to persons; and we must depart from his presence, on account of our *evil* deeds.

¹²All our sins are truly without number.

¹³Then shall they say to themselves, Our souls are satiated with the instruments of crime;

¹⁴But that prevents us not from descending to the flaming womb of hell.

¹⁵Afterwards, their countenances shall be filled with darkness and confusion before the Son of man; from whose presence they shall be expelled, and before whom the sword shall remain to expel them.

¹⁶Thus saith the Lord of spirits, This is the decree and the judgment against the princes, the kings, the exalted, and those who possess the earth, in the presence of the Lord of spirits.

[Back](#) | [Back to top](#)

Chapter 63

¹I saw also other countenances in that secret place. I heard the voice of an angel, saying, These are the angels who have descended from heaven to earth, and have revealed secrets to the sons of men, and have seduced the sons of men to the commission of sin.

[Back](#) | [Back to top](#)

Chapter 64 ⁽⁵⁷⁾

(57) Chapters 64, 65, 66 and the first verse of 67 evidently contain a vision of Noah and not of Enoch (Laurence, p. 78).

¹In those days Noah saw that the earth became inclined, and that destruction approached.

²Then he lifted up his feet, and went to the ends of the earth, to the dwelling of his great-grandfather Enoch.

³And Noah cried with a bitter voice, Hear me; hear me; hear me: three times. And he said, Tell me what is transacting upon the earth; for the earth labours, and is violently shaken. Surely I shall perish with it.

⁴After this there was a great perturbation on earth, and a voice was heard from heaven. I fell down on my face, when my great-grandfather Enoch came and stood by me.

⁵He said to me, Why have you cried out to me with a bitter cry and lamentation?

⁶A commandment has gone forth from the Lord against those who dwell on the earth, that they may be destroyed; for they know every secret of the angels, every oppressive and secret power of the devils, ⁽⁵⁸⁾ and every power of those who commit sorcery, as well as of those who make molten

images in the whole earth.

(58) **The devils.** Literally, "the Satans" (Laurence, p. 78).

⁷*They know* how silver is produced from the dust of the earth, and how on the earth the *metallic* drop exists; for lead and tin are not produced from earth, as the primary fountain of their production.

⁸There is an angel standing upon it, and that angel struggles to prevail.

⁹Afterwards my great-grandfather Enoch seized me with his hand, raising me up, and saying to me, Go, for I have asked the Lord of spirits respecting this perturbation of the earth; who replied, On account of their impiety have their innumerable judgments been consummated before me.

Respecting the moons have they inquired, and they have known that the earth will perish with those who dwell upon it, ⁽⁵⁹⁾ and that to these there will be *no place* of refuge for ever.

(59) **Respecting the moons...dwell upon it.** Or, "Because of the sorceries which they have searched out and learnt, the earth and those who dwell upon it will be destroyed" (Knibb, p. 155).

¹⁰They have discovered secrets, and *they are* those who have been judged; but not you my son. The Lord of spirits knows that you are pure and good, *free* from the reproach of *discovering* secrets.

¹¹He, the holy One, will establish your name in the midst of the saints, and will preserve you from those who dwell upon the earth. He will establish your seed in righteousness, with dominion and great glory; ⁽⁶⁰⁾ and from your seed shall spring forth righteousness and holy men without number for ever.

(60) **With dominion...glory.** Literally, "for kings, and for great glory" (Laurence, p. 79).

[Back](#) | [Back to top](#)

Chapter 65

¹After this he showed me the angels of punishment, who were prepared to come, and to open all the mighty waters under the earth:

²That they may be for judgment, and for the destruction of all those who remain and dwell upon the earth.

³And the Lord of spirits commanded the angels who went forth, not to take up the men and preserve *them*.

⁴For those angels *presiding* over all the mighty waters. Then I went out from the presence of Enoch.

[Back](#) | [Back to top](#)

Chapter 66

¹In those days the word of God came to me, and said, Noah, behold, your lot has ascended up to me, a lot void of crime, a lot beloved and upright.

²Now then shall the angels labour at the trees; ⁽⁶¹⁾ but when they proceed to this, I will put my hand upon it, and preserve it.

(61) **Shall...labour at the trees.** Or, "are making a wooden (structure)" (Knibb, p. 156).

³The seed of life shall arise from it, and a change shall take place, that the dry land shall not be left empty. I will establish your seed before me for ever and ever, and the seed of those who dwell with you on the surface of the earth. It shall be blessed and multiplied in the presence of the earth, in the name of the Lord.

⁴And they shall confine those angels who disclosed impiety. In that burning valley *it is, that they shall be confined*, which at first my great-grandfather Enoch showed me in the west, where there were mountains of gold and silver, of iron, of fluid metal, and of tin.

⁵I beheld that valley in which there was great perturbation, and *where* the waters were troubled.

⁶And when all this was effected, from the fluid mass of fire, and the perturbation which prevailed ⁽⁶²⁾ in that place, there arose a strong smell of sulphur, which became mixed with the waters; and the valley of the angels, who had been guilty of seduction, burned underneath its soil.

(62) **The perturbation which prevailed.** Literally, "troubled them" (Laurence, p. 81).

⁷Through that valley also rivers of fire were flowing, to which those angels shall be condemned, who seduced the inhabitants of the earth.

⁸And in those days shall these waters be to kings, to princes, to the exalted, and to the inhabitants of the earth, for the healing of the soul and body, and for the judgment of the spirit.

⁹Their spirits shall be full of revelry, ⁽⁶³⁾ that they may be judged in their bodies; because they have denied the Lord of spirits, and *although* they perceive their condemnation day by day, they believe not in his name.

(63) **Revelry.** Or, "lust" (Knibb, p. 157).

¹⁰And as the inflammation of their bodies shall be great, so shall their spirits undergo a change for ever.

¹¹For no word which is uttered before the Lord of spirits shall be in vain.

¹²Judgment has come upon them, because they trusted in their carnal revelry, and denied the Lord of spirits.

¹³In those days shall the waters of that valley be changed; for when the angels shall be judged, then shall the heat of those springs of water experience an alteration.

¹⁴And when the angels shall ascend, the water of the springs shall *again* undergo a change, and be frozen. Then I heard holy Michael answering and saying, This judgment, with which the angels shall be judged, shall bear testimony against the kings, the princes, and those who possess the earth.

¹⁵For these waters of judgment shall be for their healing, and for the death ⁽⁶⁴⁾ of their bodies. But they shall not perceive and believe that the waters will be changed, and become a fire, which shall blaze for ever.

(64) **Death.** Or, "lust" (Charles, p. 176; Knibb, p. 158).

[Back](#) | [Back to top](#)

Chapter 67

¹After this he gave me the characteristical marks ⁽⁶⁵⁾ of all the secret things

in the book of my great-grandfather Enoch, and in the parables which had been given to him; inserting them for me among the words of the book of parables.

(65) **Characteristic marks.** Literally, "the signs" (Laurence, p. 83).

²At that that time holy Michael answered and said to Raphael, The power of the spirit hurries me away, and impels me on. The severity of the judgment, of the secret judgment of the angels, who is capable *of beholding*—the endurance of that severe judgment which has taken place and been made permanent—without being melted at the site of it? Again holy Michael answered and said to holy Raphael, Who is there whose heart is not softened by it, and whose reins are not troubled at this thing?

³Judgment has gone forth against them by those who have thus dragged them away; and that was, when they stood in the presence of the Lord of spirits.

⁴In like manner also holy Rakael said to Raphael, They shall not be before the eye of the Lord; ⁽⁶⁶⁾ since the Lord of spirits has been offended with them; for like Lords ⁽⁶⁷⁾ have they conducted themselves. Therefore will he bring upon them a secret judgment for ever and ever.

(66) **They shall not...eye of the Lord.** Or, "I will not take their part under the eye of the Lord" (Knibb, p. 159).

(67) **For like Lords.** Or, "for they act as if they were Lord" (Knibb, p. 159).

⁵For neither shall angel nor man receive a portion of it; but they alone shall receive their own judgment for ever end ever.

[Back](#) | [Back to top](#)

Chapter 68

¹After this judgment they shall be astonished and irritated; for it shall be exhibited to the inhabitants of the earth.

²Behold the names of those angels. These are their names. The first of them is Samyaza; the second, Arstikapha; the third, Armen; the fourth, Kakabael; the fifth, Turel; the sixth, Rumyel; the seventh, Danyal; the eighth, Kael; the ninth, Barakel; the tenth, Azazel; the eleventh, Armers; the twelfth, Bataryal; the thirteenth, Basasael; the fourteenth, Ananel; the fifteenth, Turyal; the sixteenth, Simapiseel; the seventeenth, Yetarel; the eighteenth, Tumael; the nineteenth, Tarel; the twentieth, Rumel; the twenty-first, Azazyel.

³These are the chiefs of their angels, and the names of the leaders of their hundreds, and the leaders of their fifties, and the leaders of their tens.

⁴The name of the first is Yekun: ⁽⁶⁸⁾ he it was who seduced all the sons of the holy angels; and causing them to descend on earth, led astray the offspring of men.

(68) **Yekun** may simply mean "the rebel" (Knibb, p. 160).

⁵The name of the second is Kesabel, who pointed out evil counsel to the sons of the holy angels, and induced them to corrupt their bodies by generating mankind.

⁶The name of the third is Gadrel: he discovered every stroke of death to the children of men.

⁷He seduced Eve; and discovered to the children of men the instruments of death, the coat of mail, the shield, and the sword for slaughter; every instrument of death to the children of men.

⁸From his hand were *these things* derived to them who dwell upon earth, from that period for ever.

⁹The name of the fourth is Penemue: he discovered to the children of men bitterness and sweetness;

¹⁰And pointed out to them every secret of their wisdom.

¹¹He taught men to understand writing, and *the use of* ink and paper.

¹²Therefore numerous have been those who have gone astray from every period of the world, even to this day.

¹³For men were not born for this, thus with pen and with ink to confirm their faith;

¹⁴Since they were not created, except that, like the angels, they might remain righteous and pure.

¹⁵Nor would death, which destroys everything, have effected them;

¹⁶But by this their knowledge they perish, and by this also *its* power consumes *them*.

¹⁷The name of the fifth is Kasyade: he discovered to the children of men every wicked stroke of spirits and of demons:

¹⁸The stroke of the embryo in the womb, to diminish *it*; ⁽⁶⁹⁾ the stroke of the spirit *by* the bite of the serpent, and the stroke which is *given* in the mid-day *by* the offspring of the serpent, the name of which is Tabaet. ⁽⁷⁰⁾

(69) **The stroke...to diminish it.** Or, "the blows (which attack) the embryo in the womb so that it miscarries" (Knibb, p. 162).

(70) **Tabaet.** Literally, "male" or "strong" (Knibb, p. 162).

¹⁹This is the number of the Kasbel; the principal part of the oath which the Most High, dwelling in glory, revealed to the holy ones.

²⁰Its name is Beka. He spoke to holy Michael to discover to them the sacred name, that they might understand that secret name, and thus remember the oath; and that those who pointed out every secret thing to the children of men might tremble at that name and oath.

²¹This is the power of that oath; for powerful it is, and strong.

²²And he established this oath of Akae by the instrumentality of the holy Michael.

²³These are the secrets of this oath, and by it were they confirmed.

²⁴Heaven was suspended *by it* before the world was made, for ever.

²⁵By it has the earth been founded upon the flood; while from the concealed parts of the hills the agitated waters proceed forth from the creation to the end of the world.

²⁶By this oath the sea has been formed, and the foundation of it.

²⁷During the period of *its* fury he established the sand against it, which continues unchanged for ever; and by this oath the abyss has been made strong; nor is it removable from its station for ever and ever.

²⁸By this oath the sun and moon complete their progress, never swerving from the command *given* to them for ever and ever.

²⁹By this oath the stars complete their progress;

³⁰And when their names are called, they return an answer, for ever and ever.

³¹Thus *in* the heavens *take place* the blowings of the winds: all of them have breathings, ⁽⁷¹⁾ and *effect* a complete combination of breathings.

(71) **Breathings.** Or, "spirits" (Laurence, p. 87).

³²There the treasures of thunder are kept, and the splendour of the lightning.

³³There are kept the treasures of hail and of frost, the treasures of snow, the treasures of rain and of dew.

³⁴All these confess and laud before the Lord of spirits.

³⁵They glorify with all their power of praise; and he sustains them in all that *act of* thanksgiving; while they laud, glorify, and exalt the name of the Lord of spirits for ever and ever.

³⁶And with them he establishes this oath, by which they and their paths are preserved; nor does their progress perish.

³⁷Great was their joy.

³⁸They blessed, glorified, and exalted, because the name of the Son of man was revealed to them.

³⁹He sat upon the throne of his glory; and the principal part of the judgment was assigned to him, the Son of man. Sinners shall disappear and perish from the face of the earth, while those who seduced them shall be bound with chains for ever.

⁴⁰According to their ranks of corruption shall they be imprisoned, and all their works shall disappear from the face of the earth; nor thenceforward shall there be any to corrupt; for the Son of man has been seen, sitting on the throne of his glory.

⁴¹Everything wicked shall disappear, and depart from before his face; and the word of the Son of man shall become powerful in the presence of the Lord of spirits.

⁴²This is the third parable of Enoch.

[Back](#) | [Back to top](#)

Chapter 69

¹After this the name of the Son of man, living with the Lord of spirits, was exalted by the inhabitants of the earth.

²It was exalted in the chariots of the Spirit; and the name went forth in the midst of them.

³From that time I was not drawn into the midst of them; but he seated me between two spirits, between the north and the west, where the angels received their ropes, to measure out a place for the elect and the righteous.

⁴There I beheld the fathers of the first men, and the saints, who dwell in that place for ever.

[Back](#) | [Back to top](#)

Chapter 70

¹Afterwards my spirit was concealed, ascending into the heavens. I beheld the sons of the holy angels treading on flaming fire, whose garments and robes were white, and whose countenances were transparent as crystal.

²I saw two rivers of fire glittering like the hyacinth.

³Then I fell on my face before the Lord of spirits.

⁴And Michael, one of the archangels, took me by my right hand, raised me up, and brought me out *to* where *was* every secret *of* mercy and secret *of* righteousness.

⁵He showed me all the hidden things of the extremities of heaven, all the receptacles of the stars, and the splendours of all, from whence they went forth before the face of the holy.

⁶And he concealed the spirit of Enoch in the heaven of heavens.

⁷There I beheld, in the midst of that light, a building raised with stones of ice;

⁸And in the midst of these stone vibrations ⁽⁷²⁾ of living fire. My spirit saw around the circle of this flaming habitation, on one of its extremities, *that there were* rivers full of living fire, which encompassed it.

(72) **Vibrations.** Literally, "tongues" (Laurence, p. 90).

⁹Then the Seraphim, the Cherubim, and Ophanin ⁽⁷³⁾ surrounded *it*: these are those who never sleep, but watch the throne of his glory.

(73) **Ophanin.** The "wheels" of Ezek. 1:15-21 (Charles, p. 162).

¹⁰And I beheld angels innumerable, thousands of thousands, and myriads and myriads, who surrounded that habitation.

¹¹Michael, Raphael, Gabriel, Phanuel and the holy angels who were in the heavens above, went in and out of it. Michael, Raphael, and Gabriel went out of that habitation, and holy angels innumerable.

¹²With them *was* the Ancient of days, whose head *was* white as wool, and pure, and his robe *was* indescribable.

¹³Then I fell upon my face, while all my flesh was dissolved, and my spirit became changed.

¹⁴I cried out with a loud voice, with a powerful spirit, blessing, glorifying, and exalting.

¹⁵And those blessings, which proceeded from my mouth, became acceptable in the presence of the Ancient of days.

¹⁶The Ancient of days came with Michael and Gabriel, Raphael and Phanuel, with thousands of thousands, and myriads and myriads, which could not be numbered.

¹⁷Then that angel came to me, and with his voice saluted me, saying, You are the Son of man, ⁽⁷⁴⁾ who art born for righteousness, and righteousness has rested upon you.

(74) **Son of man.** Laurence's original translation renders this phrase "offspring of man." Knibb (p. 166) and Charles (p. 185) indicate that it should be "Son of man," consistent with the other occurrences of that term in the Book of Enoch.

- ¹⁸The righteousness of the Ancient of days shall not forsake you.
- ¹⁹He said, On you shall he confer peace in the name of the existing world; for from thence has peace gone forth since the world was created.
- ²⁰And thus shall it happen to you for ever and ever.
- ²¹All who shall exist, and who shall walk in your path of righteousness, shall not forsake you for ever.
- ²²With you shall be their habitations, with you their lot; nor from you shall they be separated for ever and ever.
- ²³And thus shall length of days be with the Son of man. ⁽⁷⁵⁾
(75) **Son of man.** Literally, "offspring of man," or "the Christ who comes from the offspring of man."
- ²⁴Peace shall be to the righteous; and the path of integrity shall the righteous pursue, in the name of the Lord of spirits, for ever and ever.
- [Back](#) | [Back to top](#)
-

Chapter 71

- ¹The book of the revolutions of the luminaries of heaven, according to their respective classes, their respective powers, their respective periods, their respective names, the places where they commence their progress, and their respective months, which Uriel, the holy angel who was with me, explained to me; he who conducted them. The whole account of them, according to every year of the world for ever, until a new work shall be effected, which will be eternal.
- ²This is the first law of the luminaries. The sun *and* the light arrive at the gates of heaven, which are on the east, and on the west of it at the western gates of heaven.
- ³I beheld the gates whence the sun goes forth; and the gates where the sun sets;
- ⁴In which gates also the moon rises and sets; and *I beheld* the conductors of the stars, among those who precede them; six *gates were* at the rising, and six at the setting of the sun.
- ⁵All these respectively, one after another, are on a level; and numerous windows are on the right and on the left sides of those gates.
- ⁶First proceeds forth that great luminary, which is called the sun; the orb of which is as the orb of heaven, the whole of it being replete with splendid and flaming fire.
- ⁷Its chariot, where it ascends, the wind blows.
- ⁸The sun sets in heaven, and, returning by the north, to proceed towards the east, is conducted so as to enter by that gate, and illuminate the face of heaven.
- ⁹In the same manner it goes forth in the first month by the great gate.
- ¹⁰It goes forth through the fourth of those six gates, which are at the rising of the sun.
- ¹¹And in the fourth gate, through which the sun with the moon proceeds, in the first part of it, ⁽⁷⁶⁾ there are twelve open windows; from which issues out a flame, when they are opened in their proper periods.

(76) **Through which...part of it.** Or, "from which the sun rises in the first month" (Knibb, p. 168).

¹²When the sun rises in heaven, it goes forth through this fourth gate thirty days, and by the fourth gate in the west of heaven on a level with it descends.

¹³During that period the day is lengthened from the day, and the night curtailed from the night for thirty days. And then the day is longer by two parts than the night.

¹⁴The day is precisely ten parts, and the night is eight.

¹⁵The sun goes forth through this fourth gate, and sets in it, and turns to the fifth gate during thirty days; after which it proceeds from, and sets in, the fifth gate.

¹⁶Then the day becomes lengthened by a second portion, so that it is eleven parts: while the night becomes shortened, and is only seven parts.

¹⁷The sun *now* returns to the east, entering into the sixth gate, and rising and setting in the sixth gate thirty-one days, on account of its signs.

¹⁸At that period the day is longer than the night, being twice *as long as* the night; and become twelve parts;

¹⁹But the night is shortened, and becomes six parts. Then the sun rises up, that the day may be shortened, and the night lengthened.

²⁰And the sun returns toward the east entering into the sixth gate, where it rises and sets for thirty days.

²¹When that period is completed, the day becomes shortened precisely one part, so that it is eleven parts, while the night is seven parts.

²²Then the sun goes from the west, from that sixth gate, and proceeds eastwards, rising in the fifth gate for thirty days, and setting again westwards in the fifth gate of the west.

²³At that period the day becomes shortened two parts; and is ten parts, while the night is eight parts.

²⁴Then the sun goes from the fifth gate, as it sets in the fifth gate of the west; and rises in the fourth gate for thirty-one days, on account of its signs, setting in the west.

²⁵At that period the day is made equal with the night; and, being equal with it, the night becomes nine parts, and the day nine parts.

²⁶Then the sun goes from that gate, as it sets in the west; and returning to the east proceeds by the third gate for thirty days, setting in the west at the third gate.

²⁷At that period the night is lengthened from the day during thirty mornings, and the day is curtailed from the day during thirty days; the night being ten parts precisely, and the day eight parts.

²⁸The sun now goes from the third gate, as it sets in the third gate in the west; but returning to the east, it proceeds by the second gate of the east for thirty days.

²⁹In like manner also it sets in the second gate in the west of heaven.

³⁰At that period the night is eleven parts, and the day seven parts.

³¹Then the sun goes at that time from the second gate, as it sets in the second gate in the west; but returns to the east, *proceeding* by the first gate,

for thirty-one days.

³²And sets in the west in the first gate.

³³At that period that night is lengthened as much again as the day.

³⁴It is twelve parts precisely, while the day is six parts.

³⁵The sun has *thus* completed its beginnings, and a second time goes round from these beginnings.

³⁶Into that *first* gate it enters for thirty days, and sets in the west, in the opposite part *of heaven*.

³⁷At that period the night is contracted in its length a fourth part, that is, one portion, and becomes eleven parts.

³⁸The day is seven parts.

³⁹Then the sun returns, and enters into the second gate of the east.

⁴⁰It returns by these beginnings thirty days, rising and setting.

⁴¹At that period the night is contracted in its length. It becomes ten parts, and the day eight parts. Then the sun goes from that second gate, and sets in the west; but returns to the east, and rises in the east, in the third gate, thirty-one days, setting in the west of heaven.

⁴²At that period the night becomes shortened. It is nine parts. And the night is equal with the day. The year is precisely three hundred and sixty-four days.

⁴³The lengthening of the day and night, and the contraction of the day and night, are made to differ from each other by the progress of the sun.

⁴⁴By means of this progress the day is daily lengthened, and the night greatly shortened.

⁴⁵This is the law and progress of the sun, and its turning when it turns back, turning during sixty days, ⁽⁷⁷⁾ and going forth. This is the great everlasting luminary, that which he names the sun for ever and ever.

(77) That is, it is sixty days in the same gates, viz. Thirty days twice every year (Laurence, p. 97).

⁴⁶This also is that which goes forth a great luminary, and which is named after its peculiar kind, as God commanded.

⁴⁷And thus it goes in and out, neither slackening nor resting; but running on in its chariot by day and by night. It shines with a seventh portion of light from the moon; ⁽⁷⁸⁾ but the dimensions of both are equal.

(78) **It shines with...from the moon.** Or, "Its light is seven times brighter than that of the moon" (Knibb, p. 171). The Aramaic texts more clearly describe how the moon's light waxes and wanes by a half of a seventh part each day. Here in the Ethiopic version, the moon is thought of as two halves, each half being divided into seven parts. Hence, the "fourteen portions" of 72:9-10 (Knibb, p. 171).

[Back](#) | [Back to top](#)

Chapter 72

¹After this law I beheld another law of an inferior luminary, the name of which is the moon, and the orb of which is as the orb of heaven.

²Its chariot, *which* it secretly ascends, the wind blows; and light is given to it by measure.

³Every month at its exit and entrance it becomes changed; and its periods are as the periods of the sun. And when in like manner its light is to exist, ⁽⁷⁹⁾ its light is a seventh portion from the light of the sun.

(79) **And when in...is to exist.** I.e., when the moon is full (Knibb, p. 171).

⁴Thus it rises, and at its commencement towards the east goes forth for thirty days.

⁵At that time it appears, and becomes to you the beginning of the month. Thirty days *it is* with the sun in the gate from which the sun goes forth.

⁶Half of it is in extent seven portions, one *half*; and the whole of its orb is void of light, except a seventh portion out of the fourteen portions of its light. And in a day it receives a seventh portion, or half *that portion*, of its light. Its light is by sevens, by one portion, and by the half *of a portion*. It sets with the sun.

⁷And when the sun rises, the moon rises with it; receiving half a portion of light.

⁸On that night, when it commences its period, previously to the day of the month, the moon sets with the sun.

⁹And on that night it is dark *in* its fourteen portions, that is, *in each* half; but it rises on that day with one seventh portion precisely, and in its progress declines from the rising of the sun.

¹⁰During the remainder of its period its light increases to fourteen portions.

[Back](#) | [Back to top](#)

Chapter 73

¹Then I saw another progress and regulation which He effected in the law of the moon. The progress of the moons, and everything *relating to them*, Uriel showed me, the holy angel who conducted them all.

²Their stations I wrote down as he showed them to me.

³I wrote down their months, as they occur, and the appearance of their light, until it is completed in fifteen days.

⁴In each of its two seven portions it completes all its light at rising and at setting.

⁵On stated months it changes *its* settings; and on stated months it makes its progress *through each gate*. In two *gates* the moon sets with the sun, *viz.* in those two gates which are in the midst, in the third and fourth gate. *From the third gate* it goes forth for seven days, and makes its circuit.

⁶Again it returns to the gate whence the sun goes forth, and in that completes the whole of its light. Then it declines from the sun, and enters in eight days into the sixth gate, *and returns in seven days to the third gate*, from which the sun goes forth.

⁷When the sun proceeds to the fourth gate, the *moon* goes forth for seven days, until it passes from the fifth *gate*.

⁸Again it returns in seven days to the fourth gate, and completing all its light, declines, and passes on by the first gate in eight days;

⁹And returns in seven days to the fourth gate, from which the sun goes

forth.

¹⁰Thus I beheld their stations, as according to the fixed order of the months the sun rises and sets.

¹¹At those times there is an excess of thirty days belonging to the sun in five years; all the days belonging to each year of the five years, when completed, amount to three hundred and sixty-four days; and to the sun and stars belong six days; six days in each of the five years; *thus* thirty days belonging to them;

¹²So that the moon has thirty days less than the sun and stars.

¹³The moon brings on all the years exactly, that their stations may come neither too forwards nor too backwards a single day; but that the years may be changed with correct precision in three hundred and sixty-four days. In three years the days are one thousand and ninety-two; in five years they are one thousand eight hundred and twenty; and in eight years two thousand nine hundred and twelve days.

¹⁴To the moon alone belong in three years one thousand and sixty-two days; in five years it has fifty days less *than the sun*, for an addition being made to the *one thousand and sixty-two* days, in five years there are one thousand seven hundred and seventy days; and the days of the moon in eight years are two thousand eight hundred and thirty-two days.

¹⁵For its days in eight years are less *than those of the sun* by eighty days, which eighty days are its diminution in eight years.

¹⁶The year then becomes truly complete according to the station of the moon, and the station of the sun; which rise in the *different* gates; which rise and set in them for thirty days.

[Back](#) | [Back to top](#)

Chapter 74

¹*These are* the leaders of the chiefs of the thousands, *those which preside* over all creation, and over all the stars; with the four *days* which are added and never separated from the place allotted them, according to the complete calculation of the year.

²And these serve four days, which are not calculated in the calculation of the year.

³Respecting them, men greatly err, for these luminaries truly serve, in the dwelling place of the world, one *day* in the first gate, one in the third gate, one in the fourth gate, and one in the sixth gate.

⁴And the harmony of the world becomes complete every three hundred and sixty-fourth state of it. For the signs,

⁵The seasons,

⁶The years,

⁷And the days, Uriel showed me; the angel whom the Lord of glory appointed over all the luminaries.

⁸Of heaven in heaven, and in the world; that they might rule in the face of the sky, and appearing over the earth, become

⁹Conductors of the days and nights: the sun, the moon, the stars, and all the

ministers of heaven, which make their circuit with all the chariots of heaven.

¹⁰Thus Uriel showed me twelve gates open for the circuit of the chariots of the sun in heaven, from which the rays of the sun shoot forth.

¹¹From these proceed heat over the earth, when they are opened in their stated seasons. They are for the winds, and the spirit of the dew, when in their seasons they are opened; opened in heaven at *its* extremities.

¹²Twelve gates I beheld in heaven, at the extremities of the earth, through which the sun, moon, and stars, and all the works of heaven, proceed at their rising and setting.

¹³Many windows also are open on the right and on the left.

¹⁴One window at a *certain* season grows extremely hot. So also are there gates from which the stars go forth as they are commanded, and in which they set according to their number.

¹⁵I saw likewise the chariots of heaven, running in the world above to those gates in which the stars turn, which never set. One of these is greater than all, which goes round the whole world.

[Back](#) | [Back to top](#)

Chapter 75

¹And at the extremities of the earth I beheld twelve gates open for all the winds, from which they proceed and blow over the earth.

²Three of them are open in the front of heaven, three in the west, three on the right side of heaven, and three on the left. The first three are those which are towards the east, three are towards the north, three behind those which are upon the left, towards the south, and three on the west.

³From four of them proceed winds of blessing, and of health; and from eight proceed winds of punishment; when they are sent to destroy the earth, and the heaven above it, all its inhabitants, and all which are in the waters, or on dry land.

⁴The first of these winds proceeds from the gate termed the eastern, through the first gate on the east, which inclines southwards. From this goes forth destruction, drought, heat, and perdition.

⁵From the second gate, the middle one, proceeds equity. There issue from it rain, fruitfulness, health, and dew; and from the third gate northwards, proceed cold and drought.

⁶After these proceed the south winds through three principal gates; through their first gate, which inclines eastwards, proceeds a hot wind.

⁷But from the middle gate proceed grateful odour, dew, rain, health, and life.

⁸From the third gate, which is westwards, proceed dew, rain, blight, and destruction.

⁹After these are the winds to the north, which is called the sea. *They proceed* from three gates. The first ⁽⁸⁰⁾ gate *is that* which is on the east, inclining southwards; from this proceed dew, rain, blight, and destruction. From the middle direct gate proceed rain, dew, life, and health. And from

the third gate, which is westwards, inclining towards the south, proceed mist, frost, snow, rain, dew, and blight.

(80) **First.** Or, "seventh" (Knibb, p. 178).

¹⁰After these *in the* fourth *quarter* are the winds to the west. From the first gate, inclining northwards, proceed dew, rain, frost, cold, snow, and chill; from the middle gate proceed rain, health, and blessing;

¹¹And from the last gate, which is southwards, proceed drought, destruction, scorching, and perdition.

¹²The *account of the* twelve gates of the four quarters of heaven is ended.

¹³All their laws, all their *infliction* of punishment, and the health *produced* by them, have I explained to you, my son Mathusala. ⁽⁸¹⁾

(81) **Mathusala.** Enoch's son, Methuselah. Cp. Gen. 5:21.

[Back](#) | [Back to top](#)

Chapter 76

¹The first wind is called the eastern, because it is the first.

²The second is called the south, because the Most High there descends, and frequently there descends *he who* is blessed for ever.

³The western wind has the name of diminution, because there all the luminaries of heaven are diminished, and descend.

⁴The fourth wind, which is named the north, is divided into three parts; one of which is for the habitation of man; another for seas of water, with valleys, woods, rivers, shady places, and snow; and the third part *contains* paradise.

⁵Seven high mountains I beheld, higher than all the mountains of the earth, from which frost proceeds; while days, seasons, and years depart and pass away.

⁶Seven rivers I beheld upon earth, greater than all rivers, one of which takes its course from the west; into a great sea its water flows.

⁷Two come from the north to the sea, their waters flowing into the Erythraean sea, ⁽⁸²⁾ on the east. And with respect to the remaining four, they take their course in the cavity of the north, *two* to their sea, the Erythraean sea, and two are poured into a great sea, where also it is said *there is* a desert.

(82) The Red Sea.

⁸Seven great islands I saw in the sea and on the earth. Seven in the great sea.

[Back](#) | [Back to top](#)

Chapter 77

¹The names of the sun are these: one Aryares, the other Tomas.

²The moon has four names. The first is Asonya; the second, Ebla; the third, Benase; and the fourth, Erae.

³These are the two great luminaries, whose orbs are as the orbs of heaven; and the dimensions of both are equal.

⁴In the orb of the sun *there is* a seventh portion of light, which is added to it from the moon. ⁽⁸³⁾ By measure it is put in, until the seventh portion of *the light of* the sun is departed. They set, enter into the western gate, circuit by the north, and through the eastern gate go forth over the face of heaven.

(83) **A seventh portion...from the moon.** Or, "seven parts of light which are added to it more than to the moon" (Knibb, p. 182).

⁵When the moon rises, it appears in heaven; and the half of a seventh portion of light is all *which is* in it.

⁶In fourteen *days* the whole of its light is completed.

⁷By three quintuples light is put into it, until *in* fifteen *days* its light is completed, according to the signs of the year; it has three quintuples.

⁸The moon has the half of a seventh portion.

⁹During its diminution on the first day its light decreases a fourteenth part; on the second day it decreases a thirteenth part; on the third day a twelfth part; on the fourth day an eleventh part; on the fifth day a tenth part; on the sixth day a ninth part; on the seventh day it decreases an eighth part; on the eighth day it decreases a seventh part; on the ninth day it decreases a sixth part; on the tenth day it decreases a fifth part; on the eleventh day it decreases a fourth part; on the twelfth day it decreases third part; on the thirteenth day it decreases a second part; on the fourteenth day it decreases a half of its seventh part; and on the fifteenth day the whole remainder of its light is consumed.

¹⁰On stated months the moon has twenty-nine days.

¹¹It also has a period of twenty-eight days.

¹²Uriel likewise showed me another regulation, when light is poured into the moon, how it is poured into it from the sun.

¹³All the time that the moon is in progress with its light, it is poured *into it* in the presence of the sun, until *its* light is in fourteen days completed in heaven.

¹⁴And when it is wholly extinguished, its light is consumed in heaven; and on the first day it is called the new moon, for on that day light is received into it.

¹⁵It becomes precisely completed on the day that the sun descends into the west, while the moon ascends at night from the east.

¹⁶The moon then shines all the night, until the sun rises before it; when the moon disappears in turn before the sun.

¹⁷Where light comes to the moon, there again it decreases, until all its light is extinguished, and the days of the moon pass away.

¹⁸Then its orb remains solitary without light.

¹⁹During three months it effects in thirty days *each month* its period; and during three *more* months it effects it in twenty-nine days each. *These are the times* in which it effects its decrease in its first period, and in the first gate, *namely*, in one hundred and seventy-seven days.

²⁰And at the time of its going forth during three months it appears thirty days each, and during three *more* months it appears twenty-nine days each.

²¹In the night it appears for each twenty *days* as *the face of* a man, and in the day as heaven; for it is nothing else except its light.

Chapter 78

¹And now, my son Mathusala, I have shown you everything; and *the account of* every ordinance of the stars of heaven is finished.

²He showed me every ordinance respecting these, which *takes place* at all times and in all seasons under every influence, in all years, at the arrival and under the rule of each, during every month and every week. *He showed me* also the decrease of the moon, which is effected in the sixth gate; for in that sixth gate is its light consumed.

³From this is the beginning of the month; and its decrease is effected in the sixth gate in its period, until a hundred and seventy-seven days are completed; according to the mode of calculation by weeks, twenty-five *weeks* and two days.

⁴*Its period* is less than that of the sun, according to the ordinance of the stars, by five days in one half year ⁽⁸⁴⁾ precisely.

(84) **In one half year.** Literally, "in one time" (Laurence, p. 110).

⁵When that *their* visible situation is completed. Such is the appearance and likeness of every luminary, which Uriel, the great angel who conducts them, showed to me.

Chapter 79

¹In those days Uriel answered and said to me, Behold, I have showed you all things, O Enoch;

²And all things have I revealed to you. You see the sun, the moon, and those which conduct the stars of heaven, which cause all their operations, seasons, and arrivals to return.

³In the days of sinners the years shall be shortened.

⁴Their seed shall be backward in their prolific soil; and everything done on earth shall be subverted, and disappear in its season. The rain shall be restrained, and heaven shall stand still.

⁵In those days the fruits of the earth shall be late, and not flourish in their season; and in their season the fruits of the trees shall be withholden.

⁶The moon shall change its laws, and not be seen at its proper period. But in those days shall heaven be seen; and barrenness shall take place in the borders of the great chariots in the west. *Heaven* shall shine more than *when illuminated by* the orders of light; while many chiefs among the stars of authority shall err, perverting their ways and works.

⁷Those shall not appear in their season, who commanded them, and all the classes of the stars shall be shut up against sinners.

⁸The thoughts of those who dwell on the earth shall transgress within them; and they shall be perverted in all their ways.

⁹They shall transgress, and think themselves ⁽⁸⁵⁾ gods; while evil shall be multiplied among them.

(85) **Themselves.** Or, "them" i.e., the chiefs among the stars (vs. 6)
(Knibb, p. 186).

¹⁰And punishment shall come upon them, so that all of them shall be destroyed.

[Back](#) | [Back to top](#)

Chapter 80

¹He said, O Enoch, look on the book which heaven has gradually dropped down; ⁽⁸⁶⁾ and, reading that which is written in it, understand every part of it.

(86) **The book which...dropped down.** Or, "the book of the tablets of heaven" (Knibb, p. 186).

²Then I looked on all which was written, and understood all, reading the book and everything written in it, all the works of man;

³And of all the children of flesh upon earth, during the generations of the world.

⁴Immediately after I blessed the Lord, the King of glory, who has thus for ever formed the whole workmanship of the world.

⁵And I glorified the Lord, on account of his long-suffering and blessing towards the children of the world.

⁶At that time I said, Blessed is the man, who shall die righteous and good, against whom no catalogue of crime has been written, and with whom iniquity is not found.

⁷Then those three holy ones caused me to approach, and placed me on the earth, before the door of my house.

⁸And they said unto me, Explain everything to Mathusala your son; and inform all your children, that no flesh shall be justified before the Lord; for he is their Creator.

⁹During one year we shall leave you with your children, until you shalt again recover your strength, that you may instruct your family, write these things, and explain them to all your children. But in another year they shall take you from the midst of them, and your heart shall be strengthened; for the elect shall point out righteousness to the elect; the righteous with the righteous shall rejoice, congratulating each other; but the sinners with sinners shall die,

¹⁰And the perverted with the perverted shall be drowned.

¹¹Those likewise who act righteously shall die on account of the works of man, and shall be gathered together on account of the works of the wicked.

¹²In those days they finished conversing with me.

¹³And I returned to my fellow men, blessing the Lord of worlds.

[Back](#) | [Back to top](#)

Chapter 81

¹Now, my son Mathusala, all these things I speak unto you, and write for you. To you I have revealed all, and have given you books of everything.

²Preserve, my son Mathusala, the books written by your father; that you may reveal them to future generations.

³Wisdom have I given you, to your children, and your posterity, that they may reveal to their children, for generations for ever, this wisdom in their thoughts; and that those who comprehend *it* may not slumber, but hear with their ears; that they may learn this wisdom, and be deemed worthy of eating *this* wholesome food.

⁴Blessed are all the righteous; blessed *are* all who walk in righteousness; in whom no crime *is found*, as in sinners, when all their days are numbered.

⁵With respect to the progress of the sun in heaven, it enters and goes out of *each* gate for thirty days, with the leaders of the thousand classes of the stars; with four which are added, and appertain to the four quarters of the year, which conduct them, and accompany them at four periods.

⁶Respecting these, men greatly err, and do not calculate them in the calculation of every age; for they greatly err respecting them; nor do men know accurately that they are in the calculation of the year. But indeed these are marked down for ever; one in the first gate, one in the third, one in the fourth, and one in the sixth:

⁷So that the year is completed in three hundred and sixty-four days.

⁸Truly has been stated, and accurately has been calculated that which is marked down; for the luminaries, the months, the fixed periods, the years, and the days, Uriel has explained to me, and communicated to me; whom the Lord of all creation, on my account, commanded (according to the might of heaven, and the power which it possesses both by night and by day) to explain *the laws of light* to man, of the sun, moon, and stars, and of all the powers of heaven, which are turned with their respective orbs.

⁹This is the ordinance of the stars, which set in their places, in their seasons, in their periods, in their days, and in their months.

¹⁰These are the names of the those who conduct them, who watch and enter in their seasons, according to their ordinance in their periods, in their months, in *the times of* their influence, and in their stations.

¹¹Four conductors of them first enter, who separate the four quarters of the year. After these, twelve conductors of their classes, who separate the months and the year *into* three hundred and sixty-four *days*, with the leaders of a thousand, who distinguish between the days, as well as between the four additional ones; which, *as* conductors, divide the four quarters of the year.

¹²These leaders of a thousand are in the midst of the conductors, and the conductors are added each behind his station, and their conductors make the separation. These are the names of the conductors, who separate the four quarters of the year, who are appointed *over them*: Melkel, Helammelak,

¹³Meliyal, and Narel.

¹⁴And the names of those who conduct them are Adnarel, Jyasusal, and Jyelumeal.

¹⁵These are the three who follow after the conductors of the classes of

stars; each following after the three conductors of the classes, which themselves follow after those conductors of the stations, who divide the four quarters of the year.

¹⁶In the first part of the year rises and rules Melkyas, who is named Tamani, and Zahay. ⁽⁸⁷⁾

(87) **Tamani, and Zahay.** Or, "the southern sun" (Knibb, p. 190).

¹⁷All the days of his influence, *during* which he rules, are ninety-one days.

¹⁸And these are the signs of the days which are seen upon the earth. In the days of his influence *there is* perspiration, heat, and trouble. All the trees become fruitful; the leaf of every tree comes forth; the corn is reaped; the rose and every species of flowers blossoms in the field; and the trees of winter are dried up.

¹⁹These are the names of the conductors who are under them: Barkel, Zelsabel; and another additional conductor of a thousand is named Heloyalef, the days of those influence have been completed. The other conductor next after them *is* Helemmelek, whose name they call the splendid Zahay. ⁽⁸⁸⁾

(88) **Zahay.** Or, "sun" (Knibb, p. 191).

²⁰All the days of his light are ninety-one days.

²¹These are the signs of the days upon earth, heat and drought; while the trees bring forth their fruits, warmed and concocted, and give their fruits to dry.

²²The flocks follow and yeon. ⁽⁸⁹⁾ All the fruits of the earth are collected, with everything in the fields, and the vines are trodden. This takes place during the time of his influence.

(89) **Follow and yeon.** Mate and bear young.

²³These are their names and orders, and *the names* of the conductors who are under them, of those who are chiefs of a thousand: Gedaeyal, Keel, Heel.

²⁴And the name of the additional leader of a thousand is Asphael.

²⁵The days of his influence have been completed.

[Back](#) | [Back to top](#)

Chapter 82

¹And now I have shown you, my son Mathusala, every sight which I saw prior to your birth. I will relate another vision, which I saw before I was married; they resemble each other.

²The first was when I was learning a book; and the other before I was married to your mother. I saw a potent vision;

³And on account of these things besought the Lord.

⁴I was lying down in the house of my grandfather Malalel, *when* I saw in a vision heaven purifying, and snatched away. ⁽⁹⁰⁾

(90) **Purifying, and snatched away.** Or, "was thrown down and removed" (Knibb, p. 192).

⁵And falling to the earth, ⁽⁹¹⁾ I saw likewise the earth absorbed by a great abyss; and mountains suspended over mountains.

(91) **And falling to the earth.** Or, "and when it fell upon the earth"

(Knibb, p. 192).

⁶Hills were sinking upon hills, lofty trees were gliding off from their trunks, and were in the act of being projected, and of sinking into the abyss.

⁷*Being alarmed* at these things, my voice faltered. ⁽⁹²⁾ I cried out and said, The earth is destroyed. Then my grandfather Malalel raised me up, and said to me: Why do you thus cry out, my son? And wherefore thus do you lament?

(92) **My voice faltered.** Literally, "the word fell down in my mouth" (Laurence, p. 118).

⁸I related to him the whole vision which I had seen. He said to me, Confirmed is that which you have seen, my son;

⁹And potent the vision of your dream respecting every secret sin of the earth. Its substance shall sink into the abyss, and a great destruction take place.

¹⁰Now, my son, rise up; and beseech the Lord of glory (for you are faithful), that a remnant may be left upon earth, and that he would not wholly destroy it. My son, all this *calamity* upon earth comes down from heaven; upon earth shall there be a great destruction.

¹¹Then I arose, prayed, and entreated; and wrote down my prayer for the generations of the world, explaining everything to my son Mathusala.

¹²When I went down below, and looking up to heaven, beheld the sun proceeding from the east, the moon descending to the west, a few *scattered* stars, and everything which God has known from the beginning, I blessed the Lord of judgment, and magnified him: because he hath sent forth the sun from the chambers ⁽⁹³⁾ of the east; that, ascending and rising in the face of heaven, it might spring up, and pursue the path which has been pointed out to it.

(93) **Chambers.** Literally, "windows" (Laurence, p. 119).

[Back](#) | [Back to top](#)

Chapter 83

¹I lifted up my hands in righteousness, and blessed the holy, and the Great One. I spoke with the breath of my mouth, and with a tongue of flesh, which God has formed for all the sons of mortal men, that with it they may speak; giving them breath, a mouth, and a tongue to converse with.

²Blessed are you, O Lord, the King, great and powerful in your greatness, Lord of all the creatures of heaven, King of kings, God of the whole world, whose reign, whose kingdom, and whose majesty endure for ever and ever.

³From generation to generation shall your dominion *exist*. All the heavens are your throne for ever, and all the earth your footstool for ever and for ever.

⁴For you have made *them*, and over all you reign. No act whatsoever exceeds your power. With your wisdom is unchangeable; nor from your throne and from your presence is it ever averted. You know all things, see and hear them; nor is anything concealed from you; for you perceive all

things.

⁵The angels of your heavens have transgressed; and on mortal flesh shall your wrath remain, until the day of the great judgment.

⁶Now then, O God, Lord and mighty King, I entreat you, and beseech you to grant my prayer, that a posterity may be left to me on earth, and that the whole human race may not perish;

⁷That the earth may not be left destitute, and destruction take place for ever.

⁸O my Lord, let the race perish from off the earth which has offended you, but a righteous and upright race establish for a posterity ⁽⁹⁴⁾ for ever. Hide not your face, O Lord, from the prayer of your servant.

(94) **For a posterity.** Literally, "for the plant of a seed" (Laurence, p. 121).

[Back](#) | [Back to top](#)

Chapter 84

¹After this I saw another dream, and explained it all to you, my son. Enoch arose and said to his son Mathusala, To you, my son, will I speak. Hear my word; and incline your ear to the visionary dream of your father. Before I married your mother Edna, I saw a vision on my bed; ⁽⁹⁵⁾

(95) This second vision of Enoch seems to portray in symbolic language the complete history of the world from the time of Adam down to the final judgment and the establishment of the Messianic Kingdom (Charles, p. 227).

²And behold, a cow sprung forth from the earth;

³And this cow was white.

⁴Afterwards a female heifer sprung forth; and with it another heifer: ⁽⁹⁶⁾ one of them was black, and one was red. ⁽⁹⁷⁾

(96) **Another heifer.** The sense seems to require that the passage should read, "two other heifers" (Laurence, p. 121).

(97) Cain and Abel.

⁵The black heifer then struck the red one, and pursued it over the earth.

⁶From that period I could see nothing more of the red heifer; but the black one increased in bulk, and a female heifer came with him.

⁷After this I saw that many cows proceeded forth, resembling him, and following after him.

⁸The first female young one also went out in the presence of the first cow; and sought the red heifer, but found him not.

⁹And she lamented with a great lamentation, while she was seeking him.

¹⁰Then I looked until that first *cow* came to her, from which time she became silent, and ceased to lament.

¹¹Afterwards she calved another white cow.

¹²And again calved many cows and black heifers.

¹³In my sleep also I perceived a white bull, which in like manner grew, and became a large white bull.

¹⁴After him many white cows came forth, resembling him.

¹⁵And they began to calve many *other* white cows, which resembled them and followed each other.

[Back](#) | [Back to top](#)

Chapter 85

¹Again I looked attentively, while sleeping, and surveyed heaven above.

²And behold a single star fell from heaven.

³Which being raised up, ate and fed among those cows.

⁴After that I perceived *other* large and black cows; and behold all of them changed their stalls and pastures, while their young began to lament one with another. Again I looked in *my* vision, and surveyed heaven; when behold I saw many stars which descended, and projected themselves from heaven to where the first star was,

⁵Into the midst of those young ones; while the cows were with them, feeding in the midst of them.

⁶I looked at and observed them; when behold, they all acted after the manner of horses, and began to approach the young cows, all of whom became pregnant, and brought forth elephants, camels, and asses.

⁷At these all the cows were alarmed and terrified; when they began biting with their teeth, swallowing, and striking with their horns.

⁸They began also to devour the cows; and behold all the children of the earth trembled, shook with terror at them, and suddenly fled away.

[Back](#) | [Back to top](#)

Chapter 86

¹Again I perceived them, when they began to strike and to swallow each other; and the earth cried out. Then I raised my eyes a second time towards heaven, and saw in a vision, that, behold, there came forth from heaven as it were the likeness of white men. One came forth from thence, and three with him.

²Those three, who came forth last, seized me by my hand; and raising me up from the generations of the earth, elevated me to a high station.

³Then they showed me a lofty tower on the earth, while every hill became diminished. And they said, Remain here, until you perceive what shall come upon those elephants, camels, and asses, upon the stars, and upon all the cows.

[Back](#) | [Back to top](#)

Chapter 87

¹Then I looked at that one of the four *white men*, who came forth first.

²He seized the first star which fell down from heaven.

³And, binding it hand and foot, he cast it into a valley; a valley narrow, deep, stupendous, and gloomy.

⁴Then one of them drew his sword, and gave it to the elephants, camels,

and asses, who began to strike each other. And the whole earth shook on account of them.

⁵And when I looked in the vision, behold, one of those four angels, who came forth, hurled from heaven, collected together, and took all the great stars, whose form partly resembles that of horses; and binding them all hand and foot, cast them into the cavities of the earth.

[Back](#) | [Back to top](#)

Chapter 88

¹Then one of those four went to the white cows, and taught them a mystery. While the cow was trembling, it was born, and became a man, ⁽⁹⁸⁾ and fabricated for himself a large ship. In this he dwelt, and three cows ⁽⁹⁹⁾ dwelt with him in that ship, which covered them.

(98) Noah.

(99) Shem, Ham, and Japheth.

²Again I lifted up my eyes towards heaven, and saw a lofty roof. Above it were seven cataracts, which poured fourth on a certain village much water.

³Again I looked, and behold there were fountains open on the earth in that large village.

⁴The water began to boil up, and rose over the earth; so that the village was not seen, while its whole soil was covered with water.

⁵Much water was over it, darkness, and clouds. Then I surveyed the height of this water; and it was elevated above the village.

⁶It flowed over the village, and stood higher than the earth.

⁷Then all the cows which were collected there, while I looked on them, were drowned, swallowed up, and destroyed in the water.

⁸But the ship floated above it. All the cows, the elephants, the camels, and the asses, were drowned on the earth, and all cattle. Nor could I perceive them. Neither were they able to get out, but perished, and sunk into the deep.

⁹Again I looked in the vision until those cataracts from that lofty roof were removed, and the fountains of the earth became equalized, while other depths were opened;

¹⁰Into which the water began to descend, until the dry ground appeared.

¹¹The ship remained on the earth; the darkness receded; and it became light.

¹²Then the white cow, which became a man, went out of the ship, and the three cows with him.

¹³One of the three cows was white, resembling that cow; one of them was red as blood; and one of them was black. And the white cow left them.

¹⁴Then began wild beasts and birds to bring forth.

¹⁵Of all these the different kinds assembled together, lions, tigers, wolves, dogs, wild boars, foxes, rabbits, and the hanzar.

¹⁶The siset, the avest, kites, the phonkas, and ravens.

¹⁷Then the white cow ⁽¹⁰⁰⁾ was born in the midst of them.

(100) Abraham.

¹⁸And they began to bite each other; when the white cow, which was born in the midst of them, brought forth a wild ass and a white cow at the same time, and *after that* many wild asses. Then the white cow, ⁽¹⁰¹⁾ which was born, brought forth a black wild sow and a white sheep. ⁽¹⁰²⁾

(101) Isaac.

(102) Esau and Jacob.

¹⁹That wild sow also brought forth many swine.

²⁰And that sheep brought forth twelve sheep. ⁽¹⁰³⁾

(103) The twelve patriarchs.

²¹When those twelve sheep grew up, they delivered one of them ⁽¹⁰⁴⁾ to the asses. ⁽¹⁰⁵⁾

(104) Joseph.

(105) The Midianites.

²²Again those asses delivered that sheep to the wolves, ⁽¹⁰⁶⁾

(106) The Egyptians.

²³And he grew up in the midst of them.

²⁴Then the Lord brought the eleven *other* sheep, that they might dwell and feed with him in the midst of the wolves.

²⁵They multiplied, and there was abundance of pasture for them.

²⁶But the wolves began to frighten and oppress them, while they destroyed their young ones.

²⁷And they left their young in torrents of deep water.

²⁸Now the sheep began to cry out on account of their young, and fled for refuge to their Lord. One ⁽¹⁰⁷⁾ however, which was saved, escaped, and went away to the wild asses.

(107) Moses.

²⁹I beheld the sheep moaning, crying, and petitioning their Lord.

³⁰With all their might, until the Lord of the sheep descended at their voice from *his* lofty habitation; went to them; and inspected them.

³¹He called to that sheep which had secretly stolen away from the wolves, and told him to make the wolves understand that they were not to touch the sheep.

³²Then that sheep went to the wolves with the word of the Lord, when another met him, ⁽¹⁰⁸⁾ and proceeded with him.

(108) Aaron.

³³Both of them together entered the dwelling of the wolves; and conversing with them made them understand, that thenceforwards they were not to touch the sheep.

³⁴Afterwards I perceived the wolves greatly prevailing over the sheep with their whole force. The sheep cried out; and their Lord came to them.

³⁵He began to strike the wolves, who commenced a grievous lamentation; but the sheep were silent, nor from that time did they cry out.

³⁶I then looked at them, until they departed from the wolves. The eyes of the wolves were blind, who went out and followed them with all their might. But the Lord of the sheep proceeded with them, and conducted

them.

³⁷All his sheep followed him.

³⁸His countenance *was* terrific and splendid, and glorious was his aspect. Yet the wolves began to follow the sheep, until they overtook them in a certain lake of water. ⁽¹⁰⁹⁾

(109) The Red Sea.

³⁹Then that lake became divided; the water standing up on both sides before their face.

⁴⁰And while their Lord was conducting them, he placed himself between them and the wolves.

⁴¹The wolves however perceived not the sheep, but went into the midst of the lake, following them, and running after them into the lake of water.

⁴²But when they saw the Lord of the sheep, they turned to fly from before his face.

⁴³Then the water of the lake returned, and that suddenly, according to its nature. It became full, and was raised up, until it covered the wolves. And I saw that all of them which had followed the sheep perished, and were drowned.

⁴⁴But the sheep passed over this water, proceeding to a wilderness, which was without both water and grass. And they began to open their eyes and to see.

⁴⁵Then I beheld the Lord of the sheep inspecting them, and giving them water and grass.

⁴⁶The sheep *already mentioned* was proceeding *with them*, and conducting them.

⁴⁷And when he had ascended the top of the lofty rock, the Lord of the sheep sent him to them.

⁴⁸Afterwards I perceived their Lord standing before them, with an aspect terrific and severe.

⁴⁹And when they all beheld him, they were frightened at his countenance.

⁵⁰All of them were alarmed, and trembled. They cried out after that sheep; and to the other sheep who had been with him, and who was in the midst of them, *saying*, We are not able to stand before our Lord, or to look upon him.

⁵¹Then that sheep who conducted them went away, and ascended the top of the rock;

⁵²When the *rest of the* sheep began to grow blind, and to wander from the path which he had shown them; but he knew it not.

⁵³Their Lord however was moved with great indignation against them; and when that sheep had learned *what had happened*,

⁵⁴He descended from the top of the rock, and coming to them, found that there were many,

⁵⁵Which had become blind;

⁵⁶And had wandered from his path. As soon as they beheld him, they feared, and trembled at his presence;

⁵⁷And became desirous of returning to their fold,

⁵⁸Then that sheep, taking with him other sheep, went to those which had

wandered.

⁵⁹And afterwards began to kill them. They were terrified at his countenance. Then he caused those which had wandered to return; who went back to their fold.

⁶⁰I likewise saw there in the vision, that this sheep became a man, built a house ⁽¹¹⁰⁾ for the Lord of the sheep, and made them all stand in the house.

(110) **A house.** A tabernacle (Milik, p. 205).

⁶¹I perceived also that the sheep which proceeded to meet this sheep, their conductor, died. I saw, too, that all the great sheep perished, while smaller ones rose up in their place, entered into a pasture, and approached a river of water. ⁽¹¹¹⁾

(111) The river Jordan.

⁶²Then that sheep, their conductor, who became a man, was separated from them, and died.

⁶³All the sheep sought after him, and cried for him with bitter lamentation.

⁶⁴I saw likewise that they ceased to cry after that sheep, and passed over the river of water.

⁶⁵And that there arose other sheep, all of whom conducted them, ⁽¹¹²⁾ instead of those who were dead, and who had *previously* conducted them.

(112) The Judges of Israel.

⁶⁶Then I saw that the sheep entered into a goodly place, and a territory delectable and glorious.

⁶⁷I saw also that they became satiated; that their house was in the midst of a delectable territory; and that sometimes their eyes were opened, and that sometimes they were blind; until another sheep ⁽¹¹³⁾ arose and conducted them. He brought them all back; and their eyes were opened.

(113) Samuel.

⁶⁸Then dogs, foxes, and wild boars began to devour them, until *again* another sheep ⁽¹¹⁴⁾ arose, the master of the flock, one of themselves, a ram, to conduct them. This ram began to butt on every side those dogs, foxes, and wild boars, until they all perished.

(114) Saul.

his eyes, and saw the ram in the midst of them, who had laid aside his glory.

⁷⁰And he began to strike the sheep, treading upon them, and behaving himself without dignity.

⁷¹Then their Lord sent the *former* sheep *again* to a still different sheep, ⁽¹¹⁵⁾ and raised him up to be a ram, and to conduct them instead of that sheep who had laid aside his glory.

(115) David.

⁷²Going therefore to him, and conversing with him alone, he raised up that ram, and made him a prince and leader of the flock. All the time that the dogs ⁽¹¹⁶⁾ troubled the sheep,

(116) The Philistines.

⁷³The first ram paid respect to this latter ram.

⁷⁴Then the latter ram arose, and fled away from before his face. And I saw that those dogs caused the first ram to fall.

⁷⁵But the latter ram arose, and conducted the smaller sheep.

⁷⁶That ram likewise begat many sheep, and died.

⁷⁷Then there was a smaller sheep, ⁽¹¹⁷⁾ a ram, instead of him, which became a prince and leader, conducting the flock.

(117) Solomon.

⁷⁸And the sheep increased in size, and multiplied.

⁷⁹And all the dogs, foxes, and wild boars feared, and fled away from him.

⁸⁰That ram also struck and killed all the wild beasts, so that they could not again prevail in the midst of the sheep, nor at any time ever snatch them away.

⁸¹And that house was made large and wide; a lofty tower being built upon it by the sheep, for the Lord of the sheep.

⁸²The house was low, but the tower was elevated and very high.

⁸³Then the Lord of the sheep stood upon that tower, and caused a full table to approach before him.

⁸⁴Again I saw that those sheep wandered, and went various ways, forsaking that their house;

⁸⁵And that their Lord called to some among them, whom he sent ⁽¹¹⁸⁾ to them.

(118) The prophets.

⁸⁶But these the sheep began to kill. And when one of them was saved from slaughter ⁽¹¹⁹⁾ he leaped, and cried out against those who were desirous of killing him.

(119) Elijah.

⁸⁷But the Lord of the sheep delivered him from their hands, and made him ascend to him, and remain with him.

⁸⁸He sent also many others to them, to testify, and with lamentations to exclaim against them.

⁸⁹Again I saw, when some of them forsook the house of their Lord, and his tower; wandering on all sides, and growing blind,

⁹⁰I saw that the Lord of the sheep made a great slaughter among them in their pasture, until they cried out to him in consequence of that slaughter. Then he departed from the place of *his habitation*, and left them in the power of lions, tigers, wolves, and the zeebt, ⁽¹²⁰⁾ and in the power of foxes, and of every beast.

(120) **Zeebt**. Hyenas. (Knibb, p. 209).

⁹¹And the wild beasts began to tear them.

⁹²I saw, too, that he forsook the house of their fathers, and their tower; giving them all into the power of lions to tear and devour them; into the power of every beast.

⁹³Then I began to cry out with all my might, imploring the Lord of the sheep, and showing him how the sheep were devoured by all the beasts of prey.

⁹⁴But he looked on in silence, rejoicing that they were devoured, swallowed up, and carried off; and leaving them in the power of every beast for food. He called also seventy shepherds, and resigned to them *the care* of the sheep, that they might overlook them;

⁹⁵Saying to them and to their associates, Every one of you henceforwards

overlook the sheep, and whatsoever I command you, do; and I will deliver *them* to you numbered.

⁹⁶I will tell you which of them shall be slain; these destroy. And he delivered the sheep to them.

⁹⁷Then he called to another, and said, Understand, and watch everything which the shepherds shall do to these sheep; for many more of them shall perish than I have commanded.

⁹⁸Of every excess and slaughter, which the shepherds shall commit, *there shall be* an account; as, how many may have perished by my command, and how many they may have destroyed of their own heads.

⁹⁹Of all the destruction *brought about by* each of the shepherds there shall be an account; and according to the number I will cause a recital to be made before me, how many they have destroyed of their own heads, and how many they have delivered up to destruction, that I may have this testimony against them; that I may know all their proceedings; and that, delivering *the sheep* to them, I may see what they will do; whether they will act as I have commanded them, or not.

¹⁰⁰*Of this*, however, they shall be ignorant; neither shall you make any explanation to them, neither shall you reprove them; but there shall be an account of all the destruction *done* by them in their respective seasons. Then they began to kill, and destroy more than it was commanded them.

¹⁰¹And they left the sheep in the power of the lions, so that very many of them were devoured and swallowed up by lions and tigers; and wild boars preyed upon them. That tower they burnt, and overthrew that house.

¹⁰²Then I grieved extremely on account of the tower, and because the house of the sheep was overthrown.

¹⁰³Neither was I afterwards able to perceive whether they *again* entered that house.

¹⁰⁴The shepherds likewise, and their associates, delivered them to all the wild beasts, that they might devour them. Each of them in his season, according to his number, was delivered up; each of them, one with another, was described in a book, how many of them, one with another, were destroyed, in a book.

¹⁰⁵More, however, than was ordered, every *shepherd* killed and destroyed.

¹⁰⁶Then I began to weep, and was greatly indignant, on account of the sheep.

¹⁰⁷In like manner also I saw in the vision him who wrote, how he wrote down one, destroyed by the shepherds, every day. He ascended, remained, and exhibited each of his books to the Lord of the sheep, *containing* all which they had done, and all which each of them had made away with;

¹⁰⁸And all which they had delivered up to destruction.

¹⁰⁹He took the book up in his hands, read it, sealed it, and deposited it.

¹¹⁰After this, I saw shepherds overlooking for twelve hours.

¹¹¹And behold three of the sheep ⁽¹²¹⁾ departed, arrived, went in; and began building all which was fallen down of that house.

(121) Zerubbabel, Joshua, and Nehemiah.

¹¹²But the wild boars ⁽¹²²⁾ hindered them, although they prevailed not.

(122) The Samaritans.

¹¹³Again they began to build as before, and raised up that tower, which was called a lofty tower.

¹¹⁴And again they began to place before the tower a table, with every impure and unclean kind of bread upon it.

¹¹⁵Moreover also all the sheep were blind, and could not see, as were the shepherds likewise.

¹¹⁶Thus were they delivered up to the shepherds for a great destruction, who trod them under foot, and devoured them.

¹¹⁷Yet was their Lord silent, until all the sheep in the field were destroyed. The shepherds and the sheep were all mixed together; but they did not save them from the power of the beasts.

¹¹⁸Then he who wrote the book ascended, exhibited it, and read it at the residence of the Lord of the sheep. He petitioned him for them, and prayed, pointing out every act of the shepherds, and testifying before him against them all. Then taking the book, he deposited it with him, and departed.

Chapter 89

¹And I observed during the time, that thus thirty-seven ⁽¹²³⁾ shepherds were overlooking, all of whom finished in their respective periods as the first. Others then received them into their hands, that they might overlook them in their respective periods, every shepherd in his own period.

(123) **Thirty-seven.** An apparent error for *thirty-five* (see verse 7). The kings of Judah and Israel (Laurence, p. 139).

²Afterwards I saw in the vision, that all the birds of heaven arrived; eagles, the avest, kites and ravens. The eagle instructed them all.

³They began to devour the sheep, to peck out their eyes, and to eat up their bodies.

⁴The sheep then cried out; for their bodies were devoured by the birds.

⁵I also cried out, and groaned in my sleep against the shepherd which overlooked the flock.

⁶And I looked, while the sheep were eaten up by the dogs, by the eagles, and by the kites. They neither left them their body, nor their skin, nor their muscles, until their bones alone remained; until their bones fell upon the ground. And the sheep became diminished.

⁷I observed likewise during the time, that twenty-tree shepherds ⁽¹²⁴⁾ were overlooking; who completed in their respective periods fifty-eight periods.

(124) The kings of Babylon, etc., during and after the captivity. The numbers *thirty-five* and *twenty-three* make *fifty-eight*; and not *thirty-seven*, as erroneously put in the first verse (Laurence, p. 139).

⁸Then were small lambs born of those white sheep; who began to open their eyes and to see, crying out to the sheep.

⁹The sheep, however, cried not out to them, neither did they hear what they uttered to them; but were deaf, blind, and obdurate in the greatest degrees.

¹⁰I saw in the vision that ravens flew down upon those lambs;

¹¹That they seized one of them; and that tearing the sheep in pieces, they

devoured them.

¹²I saw also, that the horns grew upon those lambs; and that the ravens lighted down upon their horns.

¹³I saw, too, that a large horn sprouted out on an animal among the sheep, and that their eyes were opened.

¹⁴He looked at them. Their eyes were wide open; and he cried out to them.

¹⁵Then the dabela ⁽¹²⁵⁾ saw him; all of whom ran to him.

(125) **Dabela.** The ibex, probably symbolizing Alexander the Great (Laurence, p. 140).

¹⁶And besides this, all the eagles, the avest, the ravens and the kites, were still carrying off the sheep, flying down upon them, and devouring them. The sheep were silent, but the dabela lamented and cried out.

¹⁷Then the ravens contended, and struggled with them.

¹⁸They wished among them to break his horn; but they prevailed not over him.

¹⁹I looked on them, until the shepherds, the eagles, the avest, and the kites came.

²⁰Who cried out to the ravens to break the horn of the dabela; to contend with him; and to kill him. But he struggled with them, and cried out, that help might come to him.

²¹Then I perceived that the man came who had written down the names of the shepherds, and who ascended up before the Lord of the sheep.

²²He brought assistance, and caused every one to see him descending to the help of the dabela.

²³I perceived likewise that the Lord of the sheep came to them in wrath, while all those who saw him fled away; all fell down in his tabernacle before his face; while all the eagles, the avest, ravens, and kites assembled, and brought with them all the sheep of the field.

²⁴All came together, and strove to break the horn of the dabela.

²⁵Then I saw, that the man, who wrote the book at the word of the Lord, opened the book of destruction, of that destruction which the last twelve shepherds ⁽¹²⁶⁾ wrought; and pointed out before the Lord of the sheep, that they destroyed more than those who preceded them.

(126) The native princes of Judah after its delivery from the Syrian yoke.

²⁶I saw also that the Lord of the sheep came to them, and taking in his hand the sceptre of his wrath seized the earth, which became rent asunder; while all the beasts and birds of heaven fell from the sheep, and sunk into the earth, which closed over them.

²⁷I saw, too, that a large sword was given to the sheep, who went forth against all the beasts of the field to slay them.

²⁸But all the beasts and birds of heaven fled away from before their face.

²⁹And I saw a throne erected in a delectable land;

³⁰Upon this sat the Lord of the sheep, who received all the sealed books;

³¹Which were open before him.

³²Then the Lord called the first seven white ones, and commanded them to bring before him the first of the first stars, which preceded the stars whose

form partly resembled that of horses; the first star, which fell down first; and they brought them all before him.

³³And he spoke to the man who wrote in his presence, who was one of the seven white ones, saying, Take those seventy shepherds, to whom I delivered up the sheep, and *who* receiving them killed more of them than I commanded. Behold, I saw them all bound, and standing before him. First came on the trial of the stars, which, being judged, and found guilty, went to the place of punishment. They thrust them into *a place*, deep, and full of flaming fire, and full of pillars of fire. Then the seventy shepherds were judged, and being found guilty, were thrust into the flaming abyss.

³⁴At that time likewise I perceived, that one abyss was thus opened in the midst of the earth, which was full of fire.

³⁵And to this were brought the blind sheep; which being judged, and found guilty, were all thrust into that abyss of fire on the earth, and burnt.

³⁶The abyss was on the right of that house.

³⁷And I saw the sheep burning, and their bones consuming.

³⁸I stood beholding him immerge that ancient house, while they brought out its pillars, every plant in it, and the ivory infolding it. They brought it out, and deposited it in a place on the right side of the earth.

³⁹I also saw, that the Lord of the sheep produced a new house, great, and loftier than the former, which he bound by the former circular spot. All its pillars were new, and its ivory new, as well as more abundant than the former ancient *ivory*, which he had brought out.

⁴⁰And while all the sheep which were left were in the midst of it, all the beasts of the earth, and all the birds of heaven, fell down and worshipped them, petitioning them, and obeying them in everything.

⁴¹Then those three, who were clothed in white, and who, holding me by my hand, had before caused me to ascend, while the hand of him *who* spoke held me; raised me up, and placed me in the midst of the sheep, before the judgment took place.

⁴²The sheep were all white, with wool long and pure. Then all who had perished, and had been destroyed, every beast of the field, and every bird of heaven, assembled in that house: while the Lord of the sheep rejoiced with great joy, because all were good, and had come back again to his dwelling.

⁴³And I saw that they laid down the sword which had been given to the sheep, and returned it to his house, sealing it up in the presence of the Lord.

⁴⁴All the sheep would have been inclosed in that house, had it been capable of containing them; and the eyes of all were open, gazing on the good One; nor was there one among them who did not behold him.

⁴⁵I likewise perceived that the house was large, wide, and extremely full. I saw, too, that a white cow was born, whose horns were great; and that all the beasts of the field, and all the birds of heaven, were alarmed at him, and entreated him at all times.

⁴⁶Then I saw that the nature of all of them was changed, and that they

became white cows;

⁴⁷And that the first, *who* was in the midst of them, spoke, when that word became ⁽¹²⁷⁾ a large beast, upon the head of which were great and black horns;

(127) **Spoke, when that word came.** Or "was a wild-ox, and that wild-ox was..." (Knibb, p. 216).

⁴⁸While the Lord of the sheep rejoiced over them, and over all the cows.

⁴⁹I lay down in the midst of them: I awoke; and saw the whole. This is the vision which I saw, lying down and waking. Then I blessed the Lord of righteousness, and gave glory to Him.

⁵⁰Afterwards I wept abundantly, nor did my tears cease, so that I became incapable of enduring it. While I was looking on, they flowed on account of what I saw; for all was come and gone by; every individual circumstance respecting the conduct of mankind was seen by me.

⁵¹In that night I remembered my former dream; and therefore wept and was troubled, because I had seen that vision.

Chapter 90

¹And now, my son Mathusala, call to me all your brethren, and assemble for me all the children of your mother; for a voice calls me, and the spirit is poured out upon me, that I may show you everything which shall happen to you for ever.

²Then Mathusala went, called to him all his brethren, and assembled his kindred.

³And conversing with all his children in truth,

⁴*Enoch* said, Hear, my children, every word of your father, and listen in uprightness to the voice of my mouth; for I would gain your attention, while I address you. My beloved, be attached to integrity, and walk in it.

⁵Approach not integrity with a double heart; nor be associated with double-minded men: but walk, my children, in righteousness, which will conduct you in good paths; and be truth your companion.

⁶For I know, that oppression will exist and prevail on earth; that on earth great punishment shall in the end take place; and that there shall be a consummation of all iniquity, which shall be cut off from its root, and every fabric *raised by* it shall pass away. Iniquity, however, shall again be renewed, and consummated on earth. Every act of crime, and every act of oppression and impiety, shall be a second time embraced.

⁷When therefore iniquity, sin, blasphemy, tyranny, and every *evil* work, shall increase, and *when* transgression, impiety, and uncleanness also shall increase, *then* upon them all shall great punishment be inflicted from heaven.

⁸The holy Lord shall go forth in wrath, and upon them all shall great punishment from heaven be inflicted.

⁹The holy Lord shall go forth in wrath, and with punishment, that he may execute judgment upon earth.

¹⁰In those days oppression shall be cut off from its roots, and iniquity with fraud shall be eradicated, perishing from under heaven.

¹¹Every place of strength ⁽¹²⁸⁾ shall be surrendered with its inhabitants; with fire shall it be burnt. They shall be brought from every part of the earth, and be cast into a judgment of fire. They shall perish in wrath, and by a judgment overpowering them for ever.

(128) **Every place of strength.** Or, "all the idols of the nations" (Knibb, p. 218).

¹²Righteousness shall be raised up from slumber; and wisdom shall be raised up, and conferred upon them.

¹³Then shall the roots of iniquity be cut off; sinners perish by the sword; and blasphemers be annihilated everywhere.

¹⁴Those who meditate oppression, and those who blaspheme, by the sword shall perish.

¹⁵And now, my children, I will describe and point out to you the path of righteousness and the path of oppression.

¹⁶I will again point them out to you, that you may know what is to come.

¹⁷Hear now, my children, and walk in the path of righteousness, but shun that of oppression; for all who walk in the path of iniquity shall perish for ever.

[Back](#) | [Back to top](#)

Chapter 91

¹That which was written by Enoch. He wrote all this instruction of wisdom for every man of dignity, and every judge of the earth; for all my children who shall dwell upon earth, and for subsequent generations, conducting themselves uprightly and peaceably.

²Let not your spirit be grieved on account of the times; for the holy, the Great One, has prescribed a period to all.

³Let the righteous man arise from slumber; let him arise, and proceed in the path of righteousness, in all its paths; and let him advance in goodness and eternal clemency. Mercy shall be showed to the righteous man; upon him shall be conferred integrity and power for ever. In goodness and in righteousness shall he exist, and shall walk in everlasting light; but sin shall perish in eternal darkness, nor be seen from that time forward for evermore.

[Back](#) | [Back to top](#)

Chapter 92

¹After this, Enoch began to speak from a book.

²And Enoch said, Concerning the children of righteousness, concerning the elect of the world, and concerning the plant of righteousness and integrity.

³*Concerning* these things will I speak, and *these things* will I explain to you, my children: I *who* am Enoch. In consequence of that which has been shown to me, from my heavenly vision and from the voice of the holy

angels ⁽¹²⁹⁾ have I acquired knowledge; and from the tablet of heaven have I acquired understanding.

(129) **Holy angels.** A Qumran text reads, "Watchers and Holy Ones," clearly denoting heavenly Watchers who did not fall along with the wicked ones (Milik, p. 264). See also Dan. 4:13, "a watcher and a holy one came down from heaven"; 4:17, "watchers, and...holy ones."

⁴Enoch then began to speak from a book, and said, I have been born the seventh in the first week, while judgment and righteousness wait with patience.

⁵But after me, in the second week, great wickedness shall arise, and fraud shall spring forth.

⁶In that week the end of the first shall take place, in which mankind shall be safe. ⁽¹³⁰⁾

(130) **Mankind shall be safe.** Or, "a man will be saved" (Knibb, p. 224).

⁷But when *the first* is completed, iniquity shall grow up; and *during the second week* he shall execute the decree ⁽¹³¹⁾ upon sinners.

(131) The Deluge after the first (in the middle of the second) Millennium (2500 B.C.).

⁸Afterwards, in the third week, during its completion, a man ⁽¹³²⁾ of the plant of righteous judgment shall be selected; and after him the Plant ⁽¹³³⁾ of righteousness shall come for ever.

(132) King David at the end of the third Millennium (1000 B.C.).

(133) The Messiah at the end of the fourth Millennium (4 B.C. to 30 A.D.).

⁹Subsequently, in the fourth week, during its completion, the visions of the holy and the righteous shall be seen, the order of generation after generation *shall take place*, and a habitation shall be made for them. Then in the fifth week, during its completion, the house of glory and of dominion ⁽¹³⁴⁾ shall be erected for ever.

(134) The establishment (30 A.D.) and building of the Church through the fifth (and sixth) Millennium.

¹⁰After that, in the sixth week, all those who are in it shall be darkened, the hearts of all of them shall be forgetful of wisdom, and in it shall a Man ⁽¹³⁵⁾ arise and come forth.

(135) The Messiah at the end of the sixth Millennium.

¹¹And during its completion He shall burn the house of dominion with fire, and all the race of the elect root shall be dispersed. ⁽¹³⁶⁾

(136) The destruction of Jerusalem and the disbursement of those who dwell in that land at the end of the sixth (and the beginning of the seventh) Millennium.

¹²Afterwards, in the seventh week, a perverse generation shall arise; abundant shall be its deeds, and all its deeds perverse. During its completion, the righteous shall be selected from the everlasting plant of righteousness; and to them shall be given the sevenfold doctrine of his whole creation.

¹³Afterwards there shall be another week, the eighth ⁽¹³⁷⁾ of righteousness, to which shall be given a sword to execute judgment and justice upon all

oppressors.

(137) The beginning of the eighth Millennium.

¹⁴Sinners shall be delivered up into the hands of the righteous, who during its completion shall acquire habitations by their righteousness; and the house of the great King shall be established for celebrations for ever. After this, in the ninth week, shall the judgment of righteousness be revealed to the whole world.

¹⁵Every work of the ungodly shall disappear from the whole earth; the world shall be marked for destruction; and all men shall be on the watch for the path of integrity.

¹⁶And after this, on the seventh day of the tenth week, there shall be an everlasting judgment, which shall be executed upon the Watchers; and a spacious eternal heaven shall spring forth in the midst of the angels.

¹⁷The former heaven shall depart and pass away; a new heaven shall appear; and all the celestial powers *shall* shine with sevenfold splendour for ever. Afterwards likewise shall there be many weeks, which shall externally exist in goodness and in righteousness.

¹⁸Neither shall sin be named there for ever and for ever.

¹⁹Who is there of all the children of men, capable of hearing the voice of the Holy One without emotion?

²⁰Who is there capable of thinking his thoughts? Who capable of contemplating all the workmanship of heaven? Who of comprehending the deeds of heaven?

²¹He may behold its animation, but not its spirit. He may be capable of conversing *respecting it*, but not of ascending *to it*. He may see all the boundaries of these things, and meditate upon them; but he can make nothing like them.

²²Who of all men is able to understand the breadth and length of the earth?

²³By whom have been seen the dimensions of all these things? Is it every man who is capable of comprehending the extent of heaven; what its elevation is, and by what it is supported?

²⁴How many are the numbers of the stars; and where all the luminaries remain at rest?

[Back](#) | [Back to top](#)

Chapter 93

¹And now let me exhort you, my children, to love righteousness, and to walk in it; for the paths of righteousness are worthy of acceptance; but the paths of iniquity shall suddenly fail, and be diminished.

²To men of note in their generation the paths of oppression and death are revealed; but they keep far from them, and do not follow them.

³Now, too, let me exhort you *who are* righteous, not to walk in the paths of evil and oppression, nor in the paths of death. Approach them not, that you may not perish; but covet,

⁴And choose for yourselves righteousness, and a good life.

⁵Walk in the paths of peace, that you may live, and be found worthy. Retain

my words in your inmost thoughts, and obliterate them not from your hearts; for I know that sinners counsel men to commit crime craftily. They are not found in every place, nor does every counsel possess a little of them.

⁶Woe to those who build iniquity and oppression, and who lay the foundation of fraud; for suddenly shall they be subverted, and never obtain peace.

⁷Woe to those who build up their houses with crime; for from their very foundations shall their houses be demolished, and by the sword shall they *themselves* fall. Those, too, who acquire gold and silver, shall justly and suddenly perish. Woe to you who are rich, for in your riches have you trusted; but from your riches you shall be removed; because you have not remembered the Most High in the days of your prosperity.

⁸You have committed blasphemy and iniquity; and are destined to the day of the effusion of blood, to the day of darkness, and to the day of the great judgment.

⁹This I will declare and point out to you, that he who created you will destroy you.

¹⁰When you fall, he will not show you mercy; but your Creator will rejoice in your destruction.

¹¹Let those, then, who shall be righteous among you in those days, detest sinners, and the ungodly.

[Back](#) | [Back to top](#)

Chapter 94

¹O that my eyes were clouds of water, that I might weep over you, and pour forth my tears like rain, and rest from the sorrow of my heart!

²Who has permitted you to hate and to transgress? Judgment shall overtake you, ye sinners.

³The righteous shall not fear the wicked; because God will again bring them into your power, that you may avenge yourselves of them according to your pleasure.

⁴Woe to you who shall be so bound by execrations, that you cannot be released from them; the remedy being far removed from you on account of your sins. Woe to you who recompense your neighbour with evil; for you shall be recompensed according to your works.

⁵Woe to you, false witnesses, you who aggravate iniquity; for you shall suddenly perish.

⁶Woe to you, sinners; for you reject the righteous; for you receive or reject *at pleasure* those who *commit* iniquity; and their yoke shall prevail over you.

[Back](#) | [Back to top](#)

Chapter 95

¹Wait in hope, you righteous; for suddenly shall sinners perish from before

you, and you shall exercise dominion over them, according to your will.
²In the day of the sufferings of sinners your offspring shall be elevated, and lifted up like eagles. Your nest shall be more exalted than that of the avest; you shall ascend, and enter into the cavities of the earth, and into the clefts of the rocks for ever, like conies, from the sight of the ungodly;
³Who shall groan over you, and weep like sirens.
⁴You shall not fear those who trouble you; for restoration shall be yours; a splendid light shall shine around you, and the voice of tranquility shall be heard from heaven. Woe to you, sinners; for your wealth makes you resemble saints, but your hearts reproach you, *knowing* that you are sinners. This word shall testify against you, for the remembrance of crime.
⁵Woe to you who feed upon the glory of the corn, and drink the strength of the deepest spring, and in *the pride of* your power tread down the humble.
⁶Woe to you who drink water at pleasure; for suddenly shall you be recompensed, consumed, and withered, because you have forsaken the foundation of life.
⁷Woe to you who act iniquitously, fraudulently, and blasphemously; there shall be a remembrance against you for evil.
⁸Woe to you, powerful, who with power strike down righteousness; for the day of your destruction shall come; *while* at that very time many and good days shall be the portion of the righteous, *even* at the period of your judgment.

[Back](#) | [Back to top](#)

Chapter 96

¹The righteous are confident that sinners will be disgraced, and perish in the day of iniquity.
²You shall yourselves be conscious of it; for the Most High will remember your destruction, and the angels shall rejoice over it. What will you do sinners? And where will you fly in the day of judgment, when you shall hear the words of the prayer of the righteous?
³You are not like them who in this respect witness against you; you are associates of sinners.
⁴In those days shall the prayers of the righteous come up before the Lord. When the day of your judgment shall arrive; and every circumstance of your iniquity be related before the great and the holy One;
⁵Your faces shall be covered with shame; while every deed, strengthened by crime, shall be rejected.
⁶Woe unto you, sinners, who in the midst of the sea, and on dry land, are those against whom an evil record exists. Woe to you who squander silver and gold, not obtained in righteousness, and say, We are rich, possess wealth, and have acquired everything which we can desire.
⁷Now then will we do whatsoever we are disposed to do; for we have amassed silver; our barns are full, and the husbandmen of our families are like overflowing water.
⁸Like water shall your falsehood pass away; for your wealth will not be

permanent, but shall suddenly ascend from you, because you have obtained it all iniquitously; to extreme malediction shall you be delivered up.

⁹And now I swear to you, crafty, as well as simple ones; that you, often contemplating the earth, you *who are* men, clothe yourselves more elegantly than married women, and both together more so than unmarried ones, ⁽¹³⁸⁾ everywhere *arraying yourselves* in majesty, in magnificence, in authority, and in silver: but gold, purple, honour, and wealth, like water, flow away.

(138) **Than married women...unmarried ones.** Or, "than a woman and more coloured (garments) than a girl..." (Knibb, p. 230).

¹⁰Erudition therefore and wisdom are not theirs. Thus shall they perish, together with their riches, with all their glory, and with their honours;

¹¹While with disgrace, with slaughter, and in extreme penury, shall their spirits be thrust into a furnace of fire.

¹²I have sworn to you, sinners, that neither mountain nor hill has been or shall be subservient ⁽¹³⁹⁾ to woman.

(139) **Subservient.** Literally, "a servant." Perhaps in furnishing them with treasures for ornaments (Laurence, p. 159).

¹³Neither in this way has crime been sent down to us upon earth, but men of their own heads have invented it; and greatly shall those who give it efficiency be execrated.

¹⁴Barrenness shall not be *previously* inflicted on woman; but on account of the work of her hands shall she die childless.

¹⁵I have sworn to you, sinners, by the holy and the Great One, that all your evil deeds are disclosed in the heavens; and that none of your oppressive acts are concealed and secret.

¹⁶Think not in your minds, neither say in your hearts, that every crime is not manifested and seen. In heaven it is daily written down before the Most High. Henceforwards shall it be manifested; for every act of oppression which you commit shall be daily recorded, until the period of your condemnation.

¹⁷Woe to you, simple ones, for you shall perish in your simplicity. To the wise you will not listen, and that which is good you shall not obtain.

¹⁸Now therefore know that you are destined to the day of destruction; nor hope that sinners shall live; but in process of time you shall die; for you are not marked for redemption;

¹⁹But are destined to the day of the great judgment, to the day of distress, and the extreme ignominy of your souls.

²⁰Woe to you, obdurate in heart, who commit crime, and feed on blood. Whence *is it that* you feed on good things, drink, and are satiated? Is it not because our Lord, the Most High, has abundantly supplied every good thing upon earth? To you there shall not be peace.

²¹Woe to you who love the deeds of iniquity. Why do you hope for that which is good? Know that you shall be given up into the hands of the righteous; who shall cut off your necks, slay you, and show you no compassion.

²²Woe to you who rejoice in the trouble of the righteous; for a grave shall

not be dug for you.

²³Woe to you who frustrate the word of the righteous; for to you there shall be no hope of life.

²⁴Woe to you who write down the word of falsehood, and the word of the wicked; for their falsehood they record, that they may hear and not forget folly.

²⁵To them there shall be no peace; but they shall surely die suddenly.

[Back](#) | [Back to top](#)

Chapter 97

¹Woe to them who act impiously, who laud and honour the word of falsehood. You have been lost in perdition; and have never led a virtuous life.

²Woe to you who change the words of integrity. They transgress against the everlasting decree; ⁽¹⁴⁰⁾

(140) **They transgress...the everlasting decree.** Or, "they distort the eternal law" (Knibb, p. 232).

³And cause the heads of those who are not sinners to be trodden down upon the earth.

⁴In those days you, O righteous, shall have been deemed worthy of having your prayers rise up in remembrance; and shall have deposited them in testimony before the angels, that they might records the sins of the sinners in the presence of the Most High.

⁵In those days the nations shall be overthrown; but the families of the nations shall rise again in the day of perdition.

⁶In those days they who become pregnant shall go forth, carry off their children, and forsake them. Their offspring shall slip from them, and while suckling them shall they forsake them; they shall never return to them, and never instruct their beloved.

⁷Again I swear to you, sinners, that crime has been prepared for the day of blood, which never ceases.

⁸They shall worship stones, and engrave golden, silver, and wooden images. They shall worship impure spirits, demons, and every idol, in temples; but no help shall be obtained for them. Their hearts shall become impious through their folly, and their eyes be blinded with mental superstition. ⁽¹⁴¹⁾ In their visionary dreams shall they be impious and superstitious, lying in all their actions, and worshipping a stone. Altogether shall they perish.

(141) **Mental superstition.** Literally, "with the fear of their hearts" (Laurence, p. 162).

⁹But in those days blessed shall they be, to whom the word of wisdom is delivered; who point out and pursue the path of the Most High; who walk in the way of righteousness, and who act not impiously with the impious.

¹⁰They shall be saved.

¹¹Woe to you who expand the crime of your neighbour; for in hell shall you be slain.

¹²Woe to you who lay the foundation of sin and deceit, and who are bitter on earth; for on it shall you be consumed.

¹³Woe to you who build your houses by the labour of others, every part of which is constructed with brick, and with the stone of crime; I tell you, that you shall not obtain peace.

¹⁴Woe to you who despise the extent of the everlasting inheritance of your fathers, while your souls follow after idols; for to you there shall be no tranquillity.

¹⁵Woe to them who commit iniquity, and give aid to blasphemy, who slay their neighbour until the day of the great judgment; for your glory shall fall; malevolence shall He put into your hearts, and the spirit of his wrath shall stir *you* up, that every one of you may perish by the sword.

¹⁶Then shall all the righteous and the holy remember your crimes.

[Back](#) | [Back to top](#)

Chapter 98

¹In those days shall fathers be struck down with their children in the presence of each other; and brethren with their brethren shall fall dead: until a river shall flow from their blood.

²For a man shall not restrain his hand from his children, nor from his children's children; his mercy will be to kill them.

³Nor shall the sinner restrain his hand from his honoured brother. From the dawn of day to the setting sun shall the slaughter continue. The horse shall wade up to his breast, and the chariot shall sink to its axle, in the blood of sinners.

[Back](#) | [Back to top](#)

Chapter 99

¹In those days the angels shall descend into places of concealment, and gather together in one spot all who have assisted in crime.

²In that day shall the Most High rise up to execute the great judgment upon all sinners, and to commit the guardianship of all the righteous and holy to the holy angels, that they may protect them as the apple of an eye, until every evil and every crime be annihilated.

³Whether *or not* the righteous sleep securely, wise men shall then truly perceive.

⁴And the sons of the earth shall understand every word of that book, knowing that their riches cannot save them in the ruin of their crimes.

⁵Woe to you, sinners, when you shall be afflicted on account of the righteous in the day of the great trouble; shall be burnt in the fire; and be recompensed according to your deeds.

⁶Woe to you, perverted in heart, who are watchful to obtain an accurate knowledge of evil, and to discover terrors. No one shall assist you.

⁷Woe to you, sinners; for with the words of your mouths, and with the work of your hands, have you acted impiously; in the flame of a blazing fire

shall you be burnt.

⁸And now know, that the angels shall inquire into your conduct in heaven; of the sun, the moon, and the stars, *shall they inquire* respecting your sins; for upon earth you exercise jurisdiction over the righteous.

⁹Every cloud shall bear witness against you, the snow, the dew, and the rain: for all of them shall be withholden from you, that they may not descend upon you, nor become subservient to your crimes.

¹⁰Now then bring gifts of salutation to the rain; that, not being withholden, it may descend upon you; and to the dew, if it has received from you gold and silver. But when the frost, snow, cold, every snowy wind, and every suffering belonging to them, fall upon you, in those days you will be utterly incapable of standing before them.

[Back](#) | [Back to top](#)

Chapter 100

¹Attentively consider heaven, all you progeny of heaven, and all the works of the Most High; fear him, nor conduct yourselves criminally before him.

²If He shut up the windows of heaven, restraining the rain and dew, that it may not descend upon the earth on your account, what will you do?

³And if He send his wrath upon you, and upon all your deeds, you are not they who can supplicate him; you who utter against his righteousness, language proud and powerful. To you there shall be no peace.

⁴Do you not see the commanders of ships, how their vessels are tossed about by the waves, torn to pieces by the winds, and exposed to the greatest peril?

⁵That they therefore fear, because their whole property is embarked with them on the ocean; and that they forbode evil in their hearts, because it may swallow them up, and they may perish in it?

⁶Is not the whole sea, all its waters, and all its commotion, the work of him, the Most High; of him who has sealed up all its exertions, and girded it on every side with sand?

⁷*Is it not* at his rebuke dried up, and alarmed; while all its fish with everything *contained* in it die? And will not you, sinners, who are on earth, fear him? Is not He the maker of heaven and earth, and of all things which are in them?

⁸And who has given erudition and wisdom to all that move *progressive* upon the earth, and over the sea?

⁹Are not the commanders of ships terrified at the ocean? And shall not sinners be terrified at the Most High?

[Back](#) | [Back to top](#)

(No Chapter 101)

[Back](#) | [Back to top](#)

Chapter 102

¹In those days, when He shall cast the calamity of fire upon you, whither will you fly, and where will you be safe?

²And when He sends forth his word against you, are you not spared, and terrified?

³All the luminaries are agitated with great fear; and all the earth is spared, while it trembles, and suffers anxiety.

⁴All the angels fulfill the commands *received* by them, and are desirous of being concealed from the presence of the great Glory; while the children of the earth are alarmed and troubled.

⁵But you, sinners, are for ever accursed; to you there shall be no peace.

⁶Fear not, souls of the righteous; but wait with patient hope for the day of your death in righteousness. Grieve not, because your souls descend in great trouble, with groaning, lamentation, and sorrow, to the receptacle of the dead. In your lifetime your bodies have not received a recompense in proportion to your goodness, but in the period of your existence have sinners existed; in the period of execration and of punishment.

⁷And when you die, sinners say concerning you, As we die, the righteous die. What profit have they in their works? Behold, like us, they expire in sorrow and in darkness. What advantage have they over us? Henceforward are we equal. What will be within their grasp, and what before their eyes for ever? For behold they are dead; and never will they again perceive the light. I say unto you, sinners, You have been satisfied with meat and drink, with human plunder and rapine, with sin, with the acquisition of wealth and with the sight of good days. Have you not marked the righteous, how their end is in peace? For no oppression is found in them even to the day of their death. They perish, and are as if they were not, while their souls descend in trouble to the receptacle of the dead.

[Back](#) | [Back to top](#)

Chapter 103

¹But now I swear to you, righteous, by the greatness of his splendour and his glory; by his illustrious kingdom and by his majesty, to you I swear, that I comprehend this mystery; that I have read the tablet of heaven, have seen the writing of the holy ones, and have discovered what is written and impressed on it concerning you.

²*I have seen* that all goodness, joy, and glory has been prepared for you, and been written down for the spirits of them who die eminently righteous and good. To you it shall be given in return for your troubles; and your portion of *happiness* shall far exceed the portion of the living.

³The spirits of you who die in righteousness shall exist and rejoice. Their spirits shall exult; and their remembrance shall be before the face of the Mighty One from generation to generation. Nor shall they now fear disgrace.

⁴Woe to you, sinners, when you die in your sins; and they, who are like you, say respecting you, Blessed are these sinners. They have lived out their whole period; and now they die in happiness and in wealth. Distress

and slaughter they knew not while alive; in honour they die; nor ever in their lifetime did judgment overtake them.

⁵*But* has it not been shown to them, that, *when* to the receptacle of the dead their souls shall be made to descend, their evil deeds shall become their greatest torment? Into darkness, into the snare, and into the flame, which shall burn to the great judgment, shall their spirits enter; and the great judgment shall take effect for ever and for ever.

⁶Woe to you; for to you there shall be no peace. Neither can you say to the righteous, and to the good who are alive, In the days of our trouble have we been afflicted; every *manner of* trouble have we seen, and many evil things have suffered.

⁷Our spirits have been consumed, lessened, and diminished.

⁸We have perished; nor has there been a possibility of help for us in word or in deed: we have found none, but have been tormented and destroyed.

⁹We have not expected to live day after day.

¹⁰We hoped indeed to have been the head;

¹¹But we have become the tail. We have been afflicted, when we have exerted ourselves; but we have been devoured by sinners and the ungodly; their yoke has been heavy upon us.

¹²Those have exercised dominion over us who detest and who goad us; and to those who hate us have we humbled our neck; but they have shown no compassion towards us.

¹³We have been desirous of escaping from them, that we might fly away and be at rest; but we have found no place to which we could fly, and be secure from them. We have sought an asylum with princes in our distress, and have cried out to those who were devouring us; but our cry has not been regarded, nor have they been disposed to hear our voice;

¹⁴But rather to assist those who plunder and devour us; those who diminish us, and hide their oppression; who remove not their yoke from us, but devour, enervate, and slay us; who conceal our slaughter, nor remember that they have lifted up their hands against us.

[Back](#) | [Back to top](#)

Chapter 104

¹I swear to you, righteous, that in heaven the angels record your goodness before the glory of the Mighty One.

²Wait with patient hope; for formerly you have been disgraced with evil and with affliction; but now shall you shine like the luminaries of heaven. You shall be seen, and the gates of heaven shall be opened to you. Your cries have cried for judgment; and it has appeared to you; for an account of all your sufferings shall be required from the princes, and from every one who has assisted your plunderers.

³Wait with patient hope; nor relinquish your confidence; for great joy shall be yours, like that of the angels in heaven. Conduct yourselves as you may, still you shall not be concealed in the day of the great judgment. You shall not be found like sinners; and eternal condemnation shall be far from you,

so long as the world exists.

⁴And now fear not, righteous, when you see sinners flourishing and prosperous in their ways.

⁵Be not associates with them; but keep yourselves at a distance from their oppression; be you associated with the host of heaven. You, sinners, say, All our transgressions shall not be taken account of, and be recorded. But all your transgressions shall be recorded daily.

⁶And be assured by me, that light and darkness, day and night, behold all your transgressions. Be not impious in your thoughts; lie not; surrender not the word of uprightness; lie not against the word of the holy and the mighty One; glorify not your idols; for all your lying and all your impiety is not for righteousness, but for great crime.

⁷Now will I point out a mystery: Many sinners shall turn and transgress against the word of uprightness.

⁸They shall speak evil things; they shall utter falsehood; execute great undertakings; ⁽¹⁴²⁾ and compose books in their own words. But when they shall write all my words correctly in their own languages,

(142) **Execute great undertakings.** Literally, "create a great creation" (Laurence, p. 173).

⁹They shall neither change or diminish them; but shall write them all correctly; all which from the first I have uttered concerning them. ⁽¹⁴³⁾

(143) Despite Enoch's mandate, his book was most certainly "changed" and "diminished" by later editors, though these fragments of it have survived.

¹⁰Another mystery also I point out. To the righteous and the wise shall be given books of joy, of integrity, and of great wisdom. To them shall books be given, in which they shall believe;

¹¹And in which they shall rejoice. And all the righteous shall be rewarded, who from these shall acquire the knowledge of every upright path.

Chapter 104A

¹In those days, saith the Lord, they shall call to the children of the earth, and make them listen to their wisdom. Show them that you are their leaders;

²And that remuneration *shall take place* over the whole earth; for I and my Son will for ever hold communion with them in the paths of uprightness, while they are still alive. Peace shall be yours. Rejoice, children of integrity, in the truth.

[Back](#) | [Back to top](#)

Chapter 105

¹After a time, my son Mathusala took a wife for his son Lamech.

²She became pregnant by him, and brought forth a child, the flesh of which was as white as snow, and red as a rose; the hair of whose head was white like wool, and long; and whose eyes were beautiful. When he opened them,

he illuminated all the house, like the sun; the whole house abounded with light.

³And when he was taken from the hand of the midwife, Lamech his father became afraid of him; and flying away came to his own father Mathusala, and said, I have begotten a son, unlike to *other children*. He is not human; but, resembling the offspring of the angels of heaven, is of a different nature *from ours*, being altogether unlike to us.

⁴His eyes are *bright* as the rays of the sun; his countenance glorious, and he looks not as if he belonged to me, but to the angels.

⁵I am afraid, lest something miraculous should take place on earth in his days.

⁶And now, my father, let me entreat and request you to go to our progenitor Enoch, and learn from him the truth; for his residence is with the angels.

⁷When Mathusala heard the words of his son, he came to me at the extremities of the earth; for he had been informed that I was there: and he cried out.

⁸I heard his voice, and went to him saying, Behold, I am *here*, my son; since you have come to me.

⁹He answered and said, On account of a great event have I come to you; and on account of a sight difficult to be *comprehended* have I approached you.

¹⁰And now, my father, hear me; for to my son Lamech a child has been born, who resembles not him; and whose nature is not like the nature of man. His colour is whiter than snow; he is redder than the rose; the hair of his head is whiter than white wool; his eyes are like the rays of the sun; and when he opened them he illuminated the whole house.

¹¹When also he was taken from the hand of the midwife,

¹²His father Lamech feared, and fled to me, believing not that *the child* belonged to him, but that he resembled the angels of heaven. And behold I am come to you, that you might point out to me the truth.

¹³Then I, Enoch, answered and said, The Lord will effect a new thing upon the earth. This have I explained, and seen in a vision. I have shown you that *in* the generations of Jared my father, those who were from heaven disregarded the word of the Lord. Behold they committed crimes; laid aside their class, and intermingled with women. With them also they transgressed; married with them, and begot children. ⁽¹⁴⁴⁾

(144) After this verse, one Greek papyrus adds, "who are not like spiritual beings, but creatures of flesh" (Milik, p. 210).

¹⁴A great destruction therefore shall come upon all the earth; a deluge, a great destruction, shall take place in one year.

¹⁵This child which is born to your *son* shall survive on the earth, and his three sons shall be saved with him. When all mankind who are on the earth shall die, he shall be safe.

¹⁶And his posterity shall beget on the earth giants, not spiritual, but carnal. Upon the earth shall a great punishment be inflicted, and it shall be washed from all corruption. Now therefore inform your son Lamech, that he who is born is his child in truth; and he shall call his name *Noah*, for he shall be to

you a survivor. He and his children shall be saved from the corruption which shall take place in the world; from all the sin and from all the iniquity which shall be consummated on earth in his days. Afterwards shall greater impiety take place than that which had been before consummated on the earth; for I am acquainted with holy mysteries, which the Lord himself has discovered and explained to me; and which I have read in the tablets of heaven.

¹⁷In them I saw it written, that the generation after generation shall transgress, until a righteous race shall arise; until transgression and crime perish from off the earth; until all goodness come upon it.

¹⁸And now, my son, go tell your son Lamech,

¹⁹That the child which is born is his child in truth; and that there is no deception.

²⁰When Mathusala heard the word of his father Enoch, who had shown him every secret thing, he returned with understanding, and called the name of that child Noah; because he was to console the earth on account of all its destruction.

²¹Another book, which Enoch wrote for his son Mathusala, and for those who should come after him, and preserve their purity of conduct in the latter days. You, who have laboured, shall wait in those days, until the evil doers be consumed, and the power of the guilty be annihilated. Wait, until sin pass away; for their names shall be blotted out of the holy books; their seed shall be destroyed, and their spirits slain. They shall cry out and lament in the invisible waste, and in the bottomless fire shall they burn. ⁽¹⁴⁵⁾ There I perceived, as it were, a cloud which could not be seen through; for from the depth of it I was unable to look upwards. I beheld also a flame of fire blazing brightly, and, as it were, glittering mountains whirled around, and agitated from side to side.

(145) **In the bottomless fire shall they burn.** Literally, "in the fire shall they burn, where there is no earth" (Laurence, p. 178).

²²Then I inquired of one of the holy angels who was with me, and said, What is this splendid *object*? For it is not heaven, but a flame of fire alone which blazes; and *in it there is* the clamour of exclamation, of woe, and of great suffering.

²³He said, There, into that place which you behold, shall be thrust the spirits of sinners and blasphemers; of those who shall do evil, and who shall pervert all which God has spoken by the mouth of the prophets; all which they ought to do. For respecting these things there shall be writings and impressions above in heaven, that the angels may read them and know what shall happen both to sinners and to the spirits of the humble; to those who have suffered in their bodies, but have been rewarded by God; who have been injuriously treated by wicked men; who have loved God; who have been attached neither to gold nor silver, nor to any good thing in the world, but have given their bodies to torment;

²⁴To those who from the period of their birth have not been covetous of earthly riches; but have regarded themselves as a breath passing away.

²⁵Such has been their conduct; and much has the Lord tried them; and their

spirits have been found pure, that they might bless his name. All their blessings have I related in a book; and He has rewarded them; for they have been found to love heaven with an everlasting aspiration. *God has said*, While they have been trodden down by wicked men, they have heard from them revilings and blasphemies; and have been ignominiously treated, while they were blessing me. And now will I call the spirits of the good from the generation of light, and will change those who have been born in darkness; who have not in their bodies been recompensed with glory, as their faith may have merited.

²⁶I will bring them into the splendid light of those who love my holy name: and I will place each of them on a throne of glory, of glory *peculiarly* his own, and they shall be at rest during unnumbered periods. Righteous is the judgment of God;

²⁷For to the faithful shall he give faith in the habitations of uprightness. They shall see those, who have been born in darkness unto darkness shall be cast; while the righteous shall be at rest. Sinners shall cry out, beholding them, while they exist in splendour and proceed forwards to the days and periods prescribed to them.

[Back](#) | [Back to top](#)

The Book of the Secrets of Enoch

Chapters 1-68

(also referred to as "Slavonic Enoch" or "2 Enoch")

Chapter 1

Enoch's encounter with the two angels of God

¹There was a wise man, a great artificer, and the Lord conceived love for him and received him, that he should behold the uppermost dwellings and be an eye-witness of the wise and great and inconceivable and immutable realm of God Almighty, of the very wonderful and glorious and bright and many-eyed station of the Lord's servants, and of the inaccessible throne of the Lord, and of the degrees and manifestations of the incorporeal hosts, and of the ineffable ministration of the multitude of the elements, and of the various apparition and inexpressible singing of the host of Cherubim, and of the boundless light.

²At that time, he said, when my one hundred and sixty-fifth year was completed, I begat my son Mathusal.

³After this too I lived two hundred years and completed of all the years of my life three hundred and sixty-five years.

⁴On the first day of the month I was in my house alone and was resting on my bed and slept.

⁵And when I was asleep, great distress came up into my heart, and I was weeping with my eyes in sleep, and I could not understand what this distress was, or what would happen to me.

⁶And there appeared to me two men, exceeding big, so that I never saw such on earth; their faces were shining like the sun, their eyes too *were* like a burning light, and from their lips was fire coming forth with clothing and singing of various kinds in appearance purple, their wings *were* brighter than gold, their hands whiter than snow.

⁷They were standing at the head of my bed and began to call me by my name.

⁸And I arose from my sleep and saw clearly those two men standing in front of me.

⁹And I saluted them and was seized with fear and the appearance of my face was changed from terror, and those men said to me:

¹⁰Have courage, Enoch, do not fear; the eternal God sent us to you, and lo! You shalt to-day ascend with us into heaven, and you shall tell your sons and all your household all that they shall do without you on earth in your house, and let no one seek you till the Lord return you to them.

¹¹And I made haste to obey them and went out from my house, and made to the doors, as it was ordered me, and summoned my sons Mathusal and Regim and Gaidad and made known to them all the marvels those *men* had

told me.

[Back](#) | [Back to top](#)

Chapter 2

The instruction of Enoch to his sons

¹Listen to me, my children, I know not whither I go, or what will befall me; now therefore, my children, I tell you: turn not from God before the face of the vain, who made not Heaven and earth, for these shall perish and those who worship them, and may the Lord make confident your hearts in the fear of him. And now, my children, let no one think to seek me, until the Lord return me to you.

[Back](#) | [Back to top](#)

Chapter 3

Of Enoch's assumption; how the angels took him into the first heaven

¹It came to pass, when Enoch had told his sons, that the angels took him on to their wings and bore him up on to the first heaven and placed him on the clouds. And there I looked, and again I looked higher, and saw the ether, and they placed me on the first heaven and showed me a very great Sea, greater than the earthly sea.

[Back](#) | [Back to top](#)

Chapter 4

Of the angels ruling the stars

¹They brought before my face the elders and rulers of the stellar orders, and showed me two hundred angels, who rule the stars and *their* services to the heavens, and fly with their wings and come round all those who sail.

[Back](#) | [Back to top](#)

Chapter 5

Of how the angels keep the store-houses of the snow

¹And here I looked down and saw the treasure-houses of the snow, and the angels who keep their terrible store-houses, and the clouds whence they come out and into which they go.

[Back](#) | [Back to top](#)

Chapter 6

Of the dew and of the olive-oil, and various flowers

¹They showed me the treasure-house of the dew, like oil of the olive, and the appearance of its form, as of all the flowers of the earth; further many angels guarding the treasure-houses of these *things*, and how they are made to shut and open.

Chapter 7

Of how Enoch was taken on to the second heaven

¹And those men took me and led me up on to the second heaven, and showed me darkness, greater than earthly darkness, and there I saw prisoners hanging, watched, awaiting the great and boundless judgment, and these angels were dark-looking, more than earthly darkness, and incessantly making weeping through all hours.

²And I said to the men who were with me: Wherefore are these incessantly tortured? They answered me: These are God's apostates, who obeyed not God's commands, but took counsel with their own will, and turned away with their prince, who also *is* fastened on the fifth heaven.

³And I felt great pity for them, and they saluted me, and said to me: Man of God, pray for us to the Lord; and I answered to them: Who am I, a mortal man, that I should pray for angels? Who knows whither I go, or what will befall me? Or who will pray for me?

[Back](#) | [Back to top](#)

Chapter 8

Of the assumption of Enoch to the third heaven

¹And those men took me thence, and led me up on to the third heaven, and placed me there; and I looked downwards, and saw the produce of these places, such as has never been known for goodness.

²And I saw all the sweet-flowering trees and beheld their fruits, which were sweet-smelling, and all the foods borne *by them* bubbling with fragrant exhalation.

³And in the midst of the trees that of life, in that place whereon the Lord rests, when he goes up into paradise; and this tree is of ineffable goodness and fragrance, and adorned more than every existing thing; and on all sides *it is* in form gold-looking and vermilion and fire-like and covers all, and it has produce from all fruits.

⁴Its root is in the garden at the earth's end.

⁵And paradise is between corruptibility and incorruptibility.

⁶And two springs come out which send forth honey and milk, and their springs send forth oil and wine, and they separate into four parts, and go round with quiet course, and go down into the PARADISE OF EDEN, between corruptibility and incorruptibility.

⁷And thence they go forth along the earth, and have a revolution to their circle even as other elements.

⁸And here there is no unfruitful tree, and every place is blessed.

⁹And *there are* three hundred angels very bright, who keep the garden, and with incessant sweet singing and never-silent voices serve the Lord throughout all days and hours.

¹⁰And I said: How very sweet is this place, and those men said to me:

[Back](#) | [Back to top](#)

Chapter 9

The showing to Enoch of the place of the righteous and compassionate

¹This place, O Enoch, is prepared for the righteous, who endure all manner of offence from those that exasperate their souls, who avert their eyes from iniquity, and make righteous judgment, and give bread to the hungering, and cover the naked with clothing, and raise up the fallen, and help injured orphans, and who walk without fault before the face of the Lord, and serve him alone, and for them is prepared this place for eternal inheritance.

[Back](#) | [Back to top](#)

Chapter 10

Here they showed Enoch the terrible place and various tortures

¹And those two men led me up on to the Northern side, and showed me there a very terrible place, and *there were* all manner of tortures in that place: cruel darkness and unilluminated gloom, and there is no light there, but murky fire constantly flaming aloft, and *there is* a fiery river coming forth, and that whole place is everywhere fire, and everywhere *there is* frost and ice, thirst and shivering, while the bonds are very cruel, and the angels fearful and merciless, bearing angry weapons, merciless torture, and I said:

²Woe, woe, how very terrible is this place.

³And those men said to me: This place, O Enoch, is prepared for those who dishonour God, who on earth practice sin against nature, which is child-corruption after the sodomitic fashion, magic-making, enchantments and devilish witchcrafts, and who boast of their wicked deeds, stealing, lies, calumnies, envy, rancour, fornication, murder, and who, accursed, steal the souls of men, who, seeing the poor take away their goods and themselves wax rich, injuring them for other men's goods; who being able to satisfy the empty, made the hungering to die; being able to clothe, stripped the naked; and who knew not their creator, and bowed to the soulless *and lifeless* gods, who cannot see nor hear, vain gods, *who also* built hewn images and bow down to unclean handiwork, for all these is prepared this place among these, for eternal inheritance.

[Back](#) | [Back to top](#)

Chapter 11

Here they took Enoch up on to the fourth heaven where is the course of sun and moon

¹Those men took me, and led me up on to the fourth heaven, and showed me all the successive goings, and all the rays of the light of sun and moon.

²And I measure their goings, and compared their light, and saw that the sun's light is greater than the moon's.

³Its circle and the wheels on which it goes always, like the wind going past

with very marvellous speed, and day and night it has no rest.

⁴Its passage and return *are accompanied by* four great stars, *and* each star has under it a thousand stars, to the right of the sun's wheel, *and by* four to the left, each having under it a thousand stars, altogether eight thousand, issuing with the sun continually.

⁵And by day fifteen myriads of angels attend it, and by night a thousand.

⁶And six-winged ones issue with the angels before the sun's wheel into the fiery flames, and a hundred angels kindle the sun and set it alight.

[Back](#) | [Back to top](#)

Chapter 12

Of the very marvellous elements of the sun

¹And I looked and saw other flying elements of the sun, whose names *are* Phoenixes and Chalkydri, marvellous and wonderful, with feet and tails in the form of a lion, and a crocodile's head, their appearance *is* empurpled, like the rainbow; their size *is* nine hundred measures, their wings *are like* those of angels, each *has* twelve, and they attend and accompany the sun, bearing heat and dew, as it is ordered them from God.

²Thus *the sun* revolves and goes, and rises under the heaven, and its course goes under the earth with the light of its rays incessantly.

[Back](#) | [Back to top](#)

Chapter 13

The angels took Enoch and placed him in the east at the sun's gates

¹Those men bore me away to the east, and placed me at the sun's gates, where the sun goes forth according to the regulation of the seasons and the circuit of the months of the whole year, and the number of the hours day and night.

²And I saw six gates open, each gate having sixty-one stadia and a quarter of one stadium, and I measured *them* truly, and understood their size *to be* so much, through which the sun goes forth, and goes to the west, and is made even, and rises throughout all the months, and turns back again from the six gates according to the succession of the seasons; thus *the period* of the whole year is finished after the returns of the four seasons.

[Back](#) | [Back to top](#)

Chapter 14

They took Enoch to the west

¹And again those men led me away to the western parts, and showed me six great gates open corresponding to the eastern gates, opposite to where the sun sets, according to the number of the days three hundred and sixty-five and a quarter.

²Thus again it goes down to the western gates, *and* draws away its light, the greatness of its brightness, under the earth; for since the crown of its

shining is in heaven with the Lord, and guarded by four hundred angels, while the sun goes round on wheel under the earth, and stands seven great hours in night, and spends half *its course* under the earth, when it comes to the eastern approach in the eighth hour of the night, it brings its lights, and the crown of shining, and the sun flames forth more than fire.

[Back](#) | [Back to top](#)

Chapter 15

The elements of the sun, the Phoenixes and Chalkydri broke into song

¹Then the elements of the sun, called Phoenixes and Chalkydri break into song, therefore every bird flutters with its wings, rejoicing at the giver of light, and they broke into song at the command of the Lord.

²The giver of light comes to give brightness to the whole world, and the morning guard takes shape, which is the rays of the sun, and the sun of the earth goes out, and receives its brightness to light up the whole face of the earth, and they showed me this calculation of the sun's going.

³And the gates which it enters, these are the great gates of the calculation of the hours of the year; for this reason the sun is a great creation, whose circuit *lasts* twenty-eight years, and begins again from the beginning.

[Back](#) | [Back to top](#)

Chapter 16

They took Enoch and again placed him in the east at the course of the moon

¹Those men showed me the other course, that of the moon, twelve great gates, crowned from west to east, by which the moon goes in and out of the customary times.

²It goes in at the first gate to the western places of the sun, by the first gates with *thirty-one days* exactly, by the second gates with thirty-one days exactly, by the third with thirty days exactly, by the fourth with thirty days exactly, by the fifth with thirty-one days exactly, by the sixth with thirty-one days exactly, by the seventh with thirty days exactly, by the eighth with thirty-one days perfectly, by the ninth with thirty-one days exactly, by the tenth with thirty days perfectly, by the eleventh with thirty-one days exactly, by the twelfth with twenty-eight days exactly.

³And it goes through the western gates in the order and number of the eastern, and accomplishes the three hundred and sixty-five and a quarter days of the solar year, while the lunar year has three hundred fifty-four, and there are wanting *to it* twelve days of the solar circle, which are the lunar epacts of the whole year.

⁴Thus, too, the great circle contains five hundred and thirty-two years.

⁵The quarter *of a day* is omitted for three years, the fourth fulfills it exactly.

⁶Therefore they are taken outside of heaven for three years and are not added to the number of days, because they change the time of the years to two new months towards completion, to two others towards diminution.

⁷And when the western gates are finished, it returns and goes to the eastern to the lights, and goes thus day and night about the heavenly circles, lower than all circles, swifter than the heavenly winds, and spirits and elements and angels flying; each angel has six wings.

⁸It has a sevenfold course in nineteen years.

[Back](#) | [Back to top](#)

Chapter 17

Of the singings of the angels, which it is impossible to describe

¹In the midst of the heavens I saw armed soldiers, serving the Lord, with tympana and organs, with incessant voice, with sweet voice, with sweet and incessant *voice* and various singing, which it is impossible to describe, and *which* astonishes every mind, so wonderful and marvellous is the singing of those angels, and I was delighted listening to it.

[Back](#) | [Back to top](#)

Chapter 18

Of the taking of Enoch on to the fifth heaven

¹The men took me on to the fifth heaven and placed me, and there I saw many and countless soldiers, called Grigori, of human appearance, and their size *was* greater than that of great giants and their faces withered, and the silence of their mouths perpetual, and there was no service on the fifth heaven, and I said to the men who were with me:

²Wherefore are these very withered and their faces melancholy, and their mouths silent, and *wherefore* is there no service on this heaven?

³And they said to me: These are the Grigori, who with their prince Satanail rejected the Lord of light, and after them are those who are held in great darkness on the second heaven, and three of them went down on to earth from the Lord's throne, to the place Ermon, and broke through their vows on the shoulder of the hill Ermon and saw the daughters of men how good they are, and took to themselves wives, and befouled the earth with their deeds, who in all times of their age made lawlessness and mixing, and giants are born and marvellous big men and great enmity.

⁴And therefore God judged them with great judgment, and they weep for their brethren and they will be punished on the Lord's great day.

⁵And I said to the Grigori: I saw your brethren and their works, and their great torments, and I prayed for them, but the Lord has condemned them *to be* under earth till *the existing* heaven and earth shall end for ever.

⁶And I said: Wherefore do you wait, brethren, and do not serve before the Lord's face, and have not put your services before the Lord's face, lest you anger your Lord utterly?

⁷And they listened to my admonition, and spoke to the four ranks in heaven, and lo! As I stood with those two men four trumpets trumpeted together with great voice, and the Grigori broke into song with one voice, and their voice went up before the Lord pitifully and affectingly.

Chapter 19

Of the taking of Enoch to the sixth heaven

¹And thence those men took me and bore me up on to the sixth heaven, and there I saw seven bands of angels, very bright and very glorious, and their faces shining more than the sun's shining, glistening, and there is no difference in their faces, or behaviour, or manner of dress; and these make the orders, and learn the goings of the stars, and the alteration of the moon, or revolution of the sun, and the good government of the world.

²And when they see evildoing they make commandments and instruction, and sweet and loud singing, and all *songs* of praise.

³These are the archangels ⁽¹⁾ who are above angels, measure all life in heaven and on earth, and the angels who are *appointed* over seasons and years, the angels who are over rivers and sea, and who are over the fruits of the earth, and the angels who are over every grass, giving food to all, to every living thing, and the angels who write all the souls of men, and all their deeds, and their lives before the Lord's face; in their midst are six Phoenixes and six Cherubim and six six-winged ones continually with one voice singing one voice, and it is not possible to describe their singing, and they rejoice before the Lord at his footstool.

(1) **Archangels.** Or, "ruling angels."

Chapter 20

Hence they took Enoch into the seventh heaven

¹And those two men lifted me up thence on to the seventh heaven, and I saw there a very great light, and fiery troops of great archangels ⁽²⁾, incorporeal forces, and dominions, orders and governments, cherubim and seraphim, thrones and many-eyed ones, nine regiments, the Ioanit stations of light, and I became afraid, and began to tremble with great terror, and those men took me, and led me after them, and said to me:

(2) **Archangels.** Or, "chief angels."

²Have courage, Enoch, do not fear, and showed me the Lord from afar, sitting on His very high throne. For what is there on the tenth heaven, since the Lord dwells there?

³On the tenth heaven is God, in the Hebrew tongue he is called Aravat ⁽³⁾.

(3) **Aravat.** Or, "Father of creation."

⁴And all the heavenly troops would come and stand on the ten steps according to their rank, and would bow down to the Lord, and would again go to their places in joy and felicity, singing songs in the boundless light with small and tender voices, gloriously serving him.

Chapter 21

Of how the angels here left Enoch, at the end of the seventh heaven, and went away from him unseen

¹And the cherubim and seraphim standing about the throne, the six-winged and many-eyed ones do not depart, standing before the Lord's face doing his will, and cover his whole throne, singing with gentle voice before the Lord's face: Holy, holy, holy, Lord Ruler of Sabaoth, heavens and earth are full of Your glory.

²When I saw all these things, those men said to me: Enoch, thus far is it commanded us to journey with you, and those men went away from me and thereupon I saw them not.

³And I remained alone at the end of the seventh heaven and became afraid, and fell on my face and said to myself: Woe is me, what has befallen me?

⁴And the Lord sent one of his glorious ones, the archangel ⁽⁴⁾ Gabriel, and *he* said to me: Have courage, Enoch, do not fear, arise before the Lord's face into eternity, arise, come with me.

(4) **Archangel.** Or, "one of the seven highest angels, named Gabriel."

⁵And I answered him, and said in myself: My Lord, my soul is departed from me, from terror and trembling, and I called to the men who led me up to this place, on them I relied, and *it is* with them I go before the Lord's face.

⁶And Gabriel caught me up, as a leaf caught up by the wind, and placed me before the Lord's face.

⁷And I saw the eighth heaven, which is called in the Hebrew tongue Muzaloth, changer of the seasons, of drought, and of wet, and of the twelve constellations of the circle of the firmament, which are above the seventh heaven.

⁸And I saw the ninth heaven, which is called in Hebrew Kuchavim, where are the heavenly homes of the twelve constellations of the circle of the firmament.

[Back](#) | [Back to top](#)

Chapter 22

In the tenth heaven the archangel Michael led Enoch to before the Lord's face

¹On the tenth heaven, *which is called* Aravoth, I saw the appearance of the Lord's face, like iron made to glow in fire, and brought out, emitting sparks, and it burns.

²Thus *in a moment of eternity* I saw the Lord's face, but the Lord's face is ineffable, marvellous and very awful, and very, very terrible.

³And who am I to tell of the Lord's unspeakable being, and of his very wonderful face? And I cannot tell the quantity of his many instructions, and various voices, the Lord's throne *is* very great and not made with hands, nor the quantity of those standing round him, troops of cherubim and seraphim, nor their incessant singing, nor his immutable beauty, and who shall tell of the ineffable greatness of his glory.

⁴And I fell prone and bowed down to the Lord, and the Lord with his lips said to me:

⁵Have courage, Enoch, do not fear, arise and stand before my face into eternity.

⁶And the archistrategē ⁽⁵⁾ Michael lifted me up, and led me to before the Lord's face.

(5) **Archistrategē.** Or, "the commander of the armies of the nations, named Michael."

⁷And the Lord said to his servants tempting them: Let Enoch stand before my face into eternity, and the glorious ones bowed down to the Lord, and said: Let Enoch go according to Your word.

⁸And the Lord said to Michael: Go and take Enoch from out *of* his earthly garments, and anoint him with my sweet ointment, and put him into the garments of My glory.

⁹And Michael did thus, as the Lord told him. He anointed me, and dressed me, and the appearance of that ointment is more than the great light, and his ointment is like sweet dew, and its smell mild, shining like the sun's ray, and I looked at myself, and *I* was like one of his glorious ones ⁽⁶⁾.

(6) **Glorious ones.** Or, "one of the seven highest angels."

¹⁰And the Lord summoned one of his archangels by name Pravuil, whose knowledge was quicker in wisdom than the other archangels, who wrote all the deeds of the Lord; and the Lord said to Pravuil: Bring out the books from my store-houses, and a reed of quick-writing, and give *it* to Enoch, and deliver to him the choice and comforting books out of your hand.

[Back](#) | [Back to top](#)

Chapter 23

Of Enoch's writing, how he wrote his wonderful journeyings and the heavenly hosts and himself wrote three hundred and sixty-six books

¹And he was telling me all the works of heaven, earth and sea, and all the elements, their passages and goings, and the thunderings of the thunders, the sun and moon, the goings and changes of the stars, the seasons, years, days, and hours, the risings of the wind, the numbers of the angels, and the formation of their songs, and all human things, the tongue of every human song and life, the commandments, instructions, and sweet-voiced singings, and all things that it is fitting to learn.

²And Pravuil told me: All the things that I have told you, we have written. Sit and write all the souls of mankind, however many of them are born, and the places prepared for them to eternity; for all souls are prepared to eternity, before the formation of the world.

³And all double thirty days and thirty nights, and I wrote out all things exactly, and wrote three hundred and sixty-six books.

[Back](#) | [Back to top](#)

Chapter 24

Of the great secrets of God, which God revealed and told Enoch, and spoke with him face to face

¹And the Lord summoned me, and said to me: Enoch, sit down on my left with Gabriel.

²And I bowed down to the Lord, and the Lord spoke to me: Enoch, beloved, all *that* you see, all things that are standing finished I tell to you even before the very beginning, all that I created from non-being, and visible things from invisible.

³Hear, Enoch, and take in these my words, for not to My angels have I told my secret, and I have not told them their rise, nor my endless realm, nor have they understood my creating, which I tell you to-day.

⁴For before all things were visible, I alone used to go about in the invisible things, like the sun from east to west, and from west to east.

⁵But even the sun has peace in itself, while I found no peace, because I was creating all things, and I conceived the thought of placing foundations, and of creating visible creation.

[Back](#) | [Back to top](#)

Chapter 25

God relates to Enoch, how out of the very deepest parts came forth the visible and invisible

¹I commanded in the very lowest *parts*, that visible things should come down from invisible, and Adoil ⁽⁷⁾ came down very great, and I beheld him, and lo! He had a belly of great light.

(7) **Adoil.** Or, "Light of creation."

²And I said to him: Become undone, Adoil, and let the visible *come* out of you.

³And he came undone, and a great light came out. And I *was* in the midst of the great light, and as there is born light from light, there came forth a great age, and showed all creation, which I had thought to create.

⁴And I saw that *it was* good.

⁵And I placed for myself a throne, and took my seat on it, and said to the light: Go thence up higher and fix yourself high above the throne, and be a foundation to the highest things.

⁶And above the light there is nothing else, and then I bent up and looked up from my throne.

[Back](#) | [Back to top](#)

Chapter 26

God summons from the very deepest a second time that Archas, heavy and very red should come forth

¹And I summoned the very lowest a second time, and said: Let Archas ⁽⁸⁾ come forth hard, and he came forth hard from the invisible.

(8) **Archas.** Or, "Spirit of creation."

²And Archas came forth, hard, heavy, and very red.

³And I said: Be opened, Archas, and let there be born from you, and he came undone, an age came forth, very great and very dark, bearing the creation of all lower things, and I saw that *it was* good and said to him:
⁴Go thence down below, and make yourself firm, and be a foundation for the lower things, and it happened and he went down and fixed himself, and became the foundation for the lower things, and below the darkness there is nothing else.

[Back](#) | [Back to top](#)

Chapter 27

Of how God founded the water, and surrounded it with light, and established on it seven islands

¹And I commanded that there should be taken from light and darkness, and I said: Be thick, and it became thus, and I spread it out with the light, and it became water, and I spread it out over the darkness, below the light, and then I made firm the waters, that is to say the bottomless, and I made foundation of light around the water, and created seven circles from inside, and imaged *the water* like crystal wet and dry, that is to say like glass, *and* the circumcession of the waters and the other elements, and I showed each one of them its road, and the seven stars each one of them in its heaven, that they go thus, and I saw that it was good.

²And I separated between light and between darkness, that is to say in the midst of the water hither and thither, and I said to the light, that it should be the day, and to the darkness, that it should be the night, and there was evening and there was morning the first day.

[Back](#) | [Back to top](#)

Chapter 28

The week in which God showed Enoch all his wisdom and power, throughout all the seven days, how he created all the heavenly and earthly forces and all moving things even down to man

¹And then I made firm the heavenly circle, and *made* that the lower water which is under heaven collect itself together, into one whole, and that the chaos become dry, and it became so.

²Out of the waves I created rock hard and big, and from the rock I piled up the dry, and the dry I called earth, and the midst of the earth I called abyss, that is to say the bottomless, I collected the sea in one place and bound it together with a yoke.

³And I said to the sea: Behold I give you *your* eternal limits, and you shalt not break loose from your component parts.

⁴Thus I made fast the firmament. This day I called me the first-created [Sunday].

[Back](#) | [Back to top](#)

Chapter 29

Then it became evening, and then again morning, and it was the second [Monday]; The fiery essence

¹And for all the heavenly troops I imaged the image and essence of fire, and my eye looked at the very hard, firm rock, and from the gleam of my eye the lightning received its wonderful nature, *which* is both fire in water and water in fire, and one does not put out the other, nor does the one dry up the other, therefore the lightning is brighter than the sun, softer than water and firmer than hard rock.

²And from the rock I cut off a great fire, and from the fire I created the orders of the incorporeal ten troops of angels, and their weapons are fiery and their raiment a burning flame, and I commanded that each one should stand in his order.

³And one from out the order of angels, having turned away with the order that was under him, conceived an impossible thought, to place his throne higher than the clouds above the earth, that he might become equal in rank to my power.

⁴And I threw him out from the height with his angels, and he was flying in the air continuously above the bottomless.

[Back](#) | [Back to top](#)

Chapter 30

And then I created all the heavens, and the third day was, [Tuesday]

¹On the third day I commanded the earth to make grow great and fruitful trees, and hills, and seed to sow, and I planted Paradise, and enclosed it, and placed as armed *guardians* flaming angels, and thus I created renewal.

²Then came evening, and came morning the fourth day.

³[Wednesday]. On the fourth day I commanded that there should be great lights on the heavenly circles.

⁴On the first uppermost circle I placed the stars, Kruno, and on the second Aphrodit, on the third Aris, on the fifth Zoues, on the sixth Ermis, on the seventh lesser the moon, and adorned it with the lesser stars.

⁵And on the lower I placed the sun for the illumination of day, and the moon and stars for the illumination of night.

⁶The sun that it should go according to each constellation, twelve, and I appointed the succession of the months and their names and lives, their thunderings, and their hour-markings, how they should succeed.

⁷Then evening came and morning came the fifth day.

⁸[Thursday]. On the fifth day I commanded the sea, that it should bring forth fishes, and feathered birds of many varieties, and all animals creeping over the earth, going forth over the earth on four legs, and soaring in the air, male sex and female, and every soul breathing the spirit of life.

⁹And there came evening, and there came morning the sixth day.

¹⁰[Friday]. On the sixth day I commanded my wisdom to create man from seven consistencies: one, his flesh from the earth; two, his blood from the dew; three, his eyes from the sun; four, his bones from stone; five, his

intelligence from the swiftness of the angels and from cloud; six, his veins and his hair from the grass of the earth; seven, his soul from my breath and from the wind.

¹¹And I gave him seven natures: to the flesh hearing, the eyes for sight, to the soul smell, the veins for touch, the blood for taste, the bones for endurance, to the intelligence sweetness [enjoyment].

¹²I conceived a cunning saying to say, I created man from invisible and from visible nature, of both are his death and life and image, he knows speech like some created thing, small in greatness and again great in smallness, and I placed him on earth, a second angel, honourable, great and glorious, and I appointed him as ruler to rule on earth and to have my wisdom, and there was none like him of earth of all my existing creatures.

¹³And I appointed him a name, from the four component parts, from east, from west, from south, from north, and I appointed for him four special stars, and I called his name Adam, and showed him the two ways, the light and the darkness, and I told him:

¹⁴This is good, and that bad, that I should learn whether he has love towards me, or hatred, that it be clear which in his race love me.

¹⁵For I have seen his nature, but he has not seen his own nature, therefore *through* not seeing he will sin worse, and I said After sin *what is there* but death?

¹⁶And I put sleep into him and he fell asleep. And I took from him a rib, and created him a wife, that death should come to him by his wife, and I took his last word and called her name mother, that is to say, Eva.

[Back](#) | [Back to top](#)

Chapter 31

God gives over paradise to Adam, and gives him a command to see the heavens opened, and that he should see the angels singing the song of victory

¹Adam has life on earth, and I created a garden in Eden in the east, that he should observe the testament and keep the command.

²I made the heavens open to him, that he should see the angels singing the song of victory, and the gloomless light.

³And he was continuously in paradise, and the devil understood that I wanted to create another world, because Adam was lord on earth, to rule and control it.

⁴The devil is the evil spirit of the lower places, as a fugitive he made Sotona ⁽⁹⁾ from the heavens as his name was Satanail ⁽¹⁰⁾, thus he became different from the angels, *but his nature* did not change *his* intelligence as far as *his* understanding of righteous and sinful *things*.

(9) **Sotona.** Or, "Diana."

(10) **Satanail.** Or, "the impious one." *Ha-satan* in Hebrew means "the adversary" referring here to the "lead" adversary, or Lucifer.

⁵And he understood his condemnation and the sin which he had sinned

before, therefore he conceived thought against Adam, in such form he entered and seduced Eva, but did not touch Adam.

⁶But I cursed ignorance, but what I had blessed previously, those I did not curse, I cursed not man, nor the earth, nor other creatures, but man's evil fruit, and his works.

[Back](#) | [Back to top](#)

Chapter 32

After Adam's sin God sends him away into the earth from where he took him from, but does not wish to ruin him for all years to come

¹I said to him: Earth you are, and into the earth whence I took you you shalt go, and I will not ruin you, but send you whence I took you.

²Then I can again receive you at My second presence.

³And I blessed all my creatures visible and invisible. And Adam was five and half hours in paradise.

⁴And I blessed the seventh day, which is the Sabbath, on which he rested from all his works.

[Back](#) | [Back to top](#)

Chapter 33

God shows Enoch the age of this world, its existence of seven thousand years, and the eighth thousand is the end, neither years, nor months, nor weeks, nor days

¹And I appointed the eighth day also, that the eighth day should be the first-created after my work, and that *the first seven* revolve in the form of the seventh thousand, and that at the beginning of the eighth thousand there should be a time of not-counting, endless, with neither years nor months nor weeks nor days nor hours.

²And now, Enoch, all that I have told you, all that you have understood, all that you have seen of heavenly things, all that you have seen on earth, and all that I have written in books by my great wisdom, all these things I have devised and created from the uppermost foundation to the lower and to the end, and there is no counsellor nor inheritor to my creations.

³I am self-eternal, not made with hands, and without change.

⁴My thought is my counsellor, my wisdom and my word are made, and my eyes observe all things how they stand here and tremble with terror.

⁵If I turn away my face, then all things will be destroyed.

⁶And apply your mind, Enoch, and know him who is speaking to you, and take thence the books which you yourself have written.

⁷And I give you Samuil ⁽¹¹⁾ and Raguil ⁽¹²⁾, who led you up, and the books, and go down to earth, and tell your sons all that I have told you, and all that you have seen, from the lower heaven up to my throne, and all the troops.

(11) **Samuil**. Or, "Sariel."

(12) **Raguil**. Or, "Raguel."

⁸For I created all forces, and there is none that resists me or that does not subject himself to me. For all subject themselves to my monarchy, and labour for my sole rule.

⁹Give them the books of the handwriting, and they will read *them* and will know me for the creator of all things, and will understand how there is no other God but me.

¹⁰And let them distribute the books of your handwriting—children to children, generation to generation, nations to nations.

¹¹And I will give you, Enoch, my intercessor, the archistrateger Michael, for the handwritings of your fathers Adam, Seth, Enos, Cainan, Mahaleleel, and Jared your father.

[Back](#) | [Back to top](#)

Chapter 34

God convicts the idolaters and sodomitic fornicators, and therefore brings down a deluge upon them

¹They have rejected my commandments and my yoke, worthless seed has come up, not fearing God, and they would not bow down to me, but have begun to bow down to vain gods, and denied my unity, and have laden the whole earth with untruths, offences, abominable lecheries, namely one with another, and all manner of other unclean wickedness, which are disgusting to relate.

²And therefore I will bring down a deluge upon the earth and will destroy all men, and the whole earth will crumble together into great darkness.

[Back](#) | [Back to top](#)

Chapter 35

God leaves one righteous man of Enoch's tribe with his whole house, who did God's pleasure according to his will

¹Behold from their seed shall arise another generation, much afterwards, but of them many will be very insatiate.

²He who raises that generation, *shall* reveal to them the books of your handwriting, of your fathers, *to them* to whom he must point out the guardianship of the world, to the faithful men and workers of my pleasure, who do not acknowledge my name in vain.

³And they shall tell another generation, and those *others* having read shall be glorified thereafter, more than the first.

[Back](#) | [Back to top](#)

Chapter 36

God commanded Enoch to live on earth thirty days, to give instruction to his sons and to his children's children and after thirty days he was again taken on to heaven

¹Now, Enoch, I give you the term of thirty days to spend in your house, and tell your sons and all your household, that all may hear from my face what is told them by you, that they may read and understand, how there is no other God but me.

²And that they may always keep my commandments, and begin to read and take in the books of your handwriting.

³And after thirty days I shall send my angel for you, and he will take you from earth and from your sons to me.

[Back](#) | [Back to top](#)

Chapter 37

Here God summons an angel

¹And the Lord called upon one of the older angels, terrible and menacing, and placed him by me, in appearance white as snow, and his hands like ice, having the appearance of great frost, and he froze my face, because I could not endure the terror of the Lord, just as it is not possible to endure a stove's fire and the sun's heat, and the frost of the air.

²And the Lord said to me: Enoch, if your face be not frozen here, no man will be able to behold your face.

[Back](#) | [Back to top](#)

Chapter 38

Mathusal continued to have hope and to await his father Enoch in his house day and night

¹And the Lord said to those men who first led me up: Let Enoch go down on to earth with you, and await him till the determined day.

²And they placed me by night on my bed.

³And Mathusal expecting my coming, keeping watch by day and by night at my bed, was filled with awe when he heard my coming, and I told him, Let all my household come together, that I tell them everything.

[Back](#) | [Back to top](#)

Chapter 39

Enoch's pitiful admonition to his sons with weeping and great lamentation, as he spoke to them

¹Oh my children, my beloved ones, hear the admonition of your father, as much as is according to the Lord's will.

²I have been let come to you to-day, and announce to you, not from my lips, but from the Lord's lips, all that is and was and all that is now, and all that will be till judgment-day.

³For the Lord has let me come to you, you hear therefore the words of my lips, of a man made big for you, but I am one who has seen the Lord's face, like iron made to glow from fire it sends forth sparks and burns.

⁴You look now upon my eyes, *the eyes* of a man big with meaning for you,

but I have seen the Lord's eyes, shining like the sun's rays and filling the eyes of man with awe.

⁵You see now, my children, the right hand of a man that helps you, but I have seen the Lord's right hand filling heaven as he helped me.

⁶You see the compass of my work like your own, but I have seen the Lord's limitless and perfect compass, which has no end.

⁷You hear the words of my lips, as I heard the words of the Lord, like great thunder incessantly with hurling of clouds.

⁸And now, my children, hear the discourses of the father of the earth, how fearful and awful it is to come before the face of the ruler of the earth, how much more terrible and awful it is to come before the face of the ruler of heaven, the controller of quick and dead, and of the heavenly troops. Who can endure that endless pain?

[Back](#) | [Back to top](#)

Chapter 40

Enoch admonishes his children truly of all things from the Lord's lips, how he saw and heard and wrote down

¹And now, my children, I know all things, for this *is* from the Lord's lips, and this my eyes have seen, from beginning to end.

²I know all things, and have written all things into books, the heavens and their end, and their plenitude, and all the armies and their marchings.

³I have measured and described the stars, the great countless multitude *of them*.

⁴What man has seen their revolutions, and their entrances? For not even the angels see their number, while I have written all their names.

⁵And I measured the sun's circle, and measured its rays, counted the hours, I wrote down too all things that go over the earth, I have written the things that are nourished, and all seed sown and unsown, which the earth produces and all plants, and every grass and every flower, and their sweet smells, and their names, and the dwelling-places of the clouds, and their composition, and their wings, and how they bear rain and raindrops.

⁶And I investigated all things, and wrote the road of the thunder and of the lightning, and they showed me the keys and their guardians, their rise, the way they go; it is let out *gently* in measure by a chain, lest by a heavy chain and violence it hurl down the angry clouds and destroy all things on earth.

⁷I wrote the treasure-houses of the snow, and the store-houses of the cold and the frosty airs, and I observed their season's key-holder, he fills the clouds with them, and does not exhaust the treasure-houses.

⁸And I wrote the resting-places of the winds and observed and saw how their key-holders bear weighing-scales and measures; first, they put them in *one* weighing-scale, then in the other the weights and let them out according to measure cunningly over the whole earth, lest by heavy breathing they make the earth to rock.

⁹And I measured out the whole earth, its mountains, and all hills, fields, trees, stones, rivers, all existing things I wrote down, the height from earth

to the seventh heaven, and downwards to the very lowest hell, and the judgment-place, and the very great, open and weeping hell.

¹⁰And I saw how the prisoners are in pain, expecting the limitless judgment.

¹¹And I wrote down all those being judged by the judge, and all their judgment *and sentences* and all their works.

[Back](#) | [Back to top](#)

Chapter 41

Of how Enoch lamented Adam's sin

¹And I saw all forefathers from *all* time with Adam and Eva, and I sighed and broke into tears and said of the ruin of their dishonour:

²Woe is me for my infirmity and *for that* of my forefathers, and thought in my heart and said:

³Blessed *is* the man who has not been born or who has been born and shall not sin before the Lord's face, that he come not into this place, nor bring the yoke of this place.

[Back](#) | [Back to top](#)

Chapter 42

Of how Enoch saw the key-holders and guards of the gates of hell standing

¹I saw the key-holders and guards of the gates of hell standing, like great serpents, and their faces like extinguishing lamps, and their eyes of fire, their sharp teeth, and I saw all the Lord's works, how they are right, while the works of man are some *good*, and others bad, and in their works are known those who lie evilly.

[Back](#) | [Back to top](#)

Chapter 43

Enoch shows his children how he measured and wrote out God's judgments

¹I, my children, measured and wrote out every work and every measure and every righteous judgment.

²As *one* year is more honourable than another, so is *one* man more honourable than another, some for great possessions, some for wisdom of heart, some for particular intellect, some for cunning, one for silence of lip, another for cleanliness, one for strength, another for comeliness, one for youth, another for sharp wit, one for shape of body, another for sensibility, let it be heard everywhere, but there is none better than he who fears God, he shall be more glorious in time to come.

[Back](#) | [Back to top](#)

Chapter 44

Enoch instructs his sons, that they revile not the face of man, small or great

¹The Lord with his hands having created man, in the likeness of his own face, the Lord made him small and great.

²Whoever reviles the ruler's face, and abhors the Lord's face, has despised the Lord's face, and he who vents anger on any man without injury, the Lord's great anger will cut him down, he who spits on the face of man reproachfully, will be cut down at the Lord's great judgment.

³Blessed is the man who does not direct his heart with malice against any man, and helps the injured and condemned, and raises the broken down, and shall do charity to the needy, because on the day of the great judgment every weight, every measure and every makeweight *will be* as in the market, that is to say *they are* hung on scales and stand in the market, *and every one* shall learn his own measure, and according to his measure shall take his reward.

[Back](#) | [Back to top](#)

Chapter 45

God shows how he does not want from men sacrifices, nor burnt-offerings, but pure and contrite hearts

¹Whoever hastens to make offerings before the Lord's face, the Lord for his part will hasten that offering by granting of his work.

²But whoever increases his lamp before the Lord's face and make not true judgment, the Lord will *not* increase his treasure in the realm of the highest.

³When the Lord demands bread, or candles, or *the flesh of beasts*, or any other sacrifice, then that is nothing; but God demands pure hearts, and with all that *only* tests the heart of man.

[Back](#) | [Back to top](#)

Chapter 46

Of how an earthly ruler does not accept from man abominable and unclean gifts, then how much more does God abominate unclean gifts, but sends them away with wrath and does not accept his gifts

¹Hear, my people, and take in the words of my lips.

²If any one bring any gifts to an earthly ruler, and have disloyal thoughts in his heart, and the ruler know this, will he not be angry with him, and not refuse his gifts, and not give him over to judgment?

³Or *if* one man make himself appear good to another by deceit of tongue, but *have* evil in his heart, then will not *the other* understand the treachery of his heart, and himself be condemned, since his untruth was plain to all?

⁴And when the Lord shall send a great light, then there will be judgment for the just and the unjust, and there no one shall escape notice.

[Back](#) | [Back to top](#)

Chapter 47

Enoch instructs his sons from God's lips, and hands them the handwriting of this book

¹And now, my children, lay thought on your hearts, mark well the words of your father, which are all *come* to you from the Lord's lips.

²Take these books of your father's handwriting and read them.

³For the books are many, and in them you will learn all the Lord's works, all that has been from the beginning of creation, and will be till the end of time.

⁴And if you will observe my handwriting, you will not sin against the Lord; because there is no other except the Lord, neither in heaven, nor in earth, nor in the very lowest *places*, nor in the *one* foundation.

⁵The Lord has placed the foundations in the unknown, and has spread forth heavens visible and invisible; he fixed the earth on the waters, and created countless creatures, and who has counted the water and the foundation of the unfixed, or the dust of the earth, or the sand of the sea, or the drops of the rain, or the morning dew, or the wind's breathings? Who has filled earth and sea, and the indissoluble winter?

⁶I cut the stars out of fire, and decorated heaven, and put it in their midst.

[Back](#) | [Back to top](#)

Chapter 48

Of the sun's passage along the seven circles

¹That the sun go along the seven heavenly circles, which are the appointment of one hundred and eighty-two thrones, that it go down on a short day, and again one hundred and eighty-two, that it go down on a big day, and he has two thrones on which he rests, revolving hither and thither above the thrones of the months, from the seventeenth day of the month Tsivan it goes down to the month Thevan, from the seventeenth of Thevan it goes up.

²And thus it goes close to the earth, then the earth is glad and makes grow its fruits, and when it goes away, then the earth is sad, and trees and all fruits have no florescence.

³All this he measured, with good measurement of hours, and fixed a measure by his wisdom, of the visible and the invisible.

⁴From the invisible he made all things visible, himself being invisible.

⁵Thus I make known to you, my children, and distribute the books to your children, into all your generations, and amongst the nations who shall have the sense to fear God, let them receive them, and may they come to love them more than any food or earthly sweets, and read them and apply themselves to them.

⁶And those who understand not the Lord, who fear not God, who accept not, but reject, who do not receive the *books*, a terrible judgment awaits

these.

⁷Blessed is the man who shall bear their yoke and shall drag them along, for he shall be released on the day of the great judgment.

[Back](#) | [Back to top](#)

Chapter 49

Enoch instructs his sons not to swear either by heaven or earth, and shows God's promise, even in the mother's womb

¹I swear to you, my children, but I swear not by any oath, neither by heaven nor by earth, nor by any other creature which God created.

²The Lord said: There is no oath in me, nor injustice, but truth.

³If there is no truth in men, let them swear by the words, Yea, yea, or else, Nay, nay.

⁴And I swear to you, yea, yea, that there has been no man in his mother's womb, *but that* already before, even to each one there is a place prepared for the repose of that soul, and a measure fixed how much it is intended that a man be tried in this world.

⁵Yea, children, deceive not yourselves, for there has been previously prepared a place for every soul of man.

[Back](#) | [Back to top](#)

Chapter 50

Of how none born on earth can remain hidden nor his work remain concealed, but God bids us to be meek, to endure attack and insult, and not to offend widows and orphans

¹I have put every man's work in writing and none born on earth can remain hidden nor his works remain concealed.

²I see all things.

³Now therefore, my children, in patience and meekness spend the number of your days, that you inherit endless life.

⁴Endure for the sake of the Lord every wound, every injury, every evil word and attack.

⁵If ill-requitals befall you, return *them* not either to neighbour or enemy, because the Lord will return *them* for you and be your avenger on the day of great judgment, that there be no avenging here among men.

⁶Whoever of you spends gold or silver for his brother's sake, he will receive ample treasure in the world to come.

⁷Injure not widows nor orphans nor strangers, lest God's wrath come upon you.

[Back](#) | [Back to top](#)

Chapter 51

Enoch instructs his sons, that they hide not treasures in the earth, but bids them give alms to the poor

- ¹Stretch out your hands to the poor according to your strength.
- ²Hide not your silver in the earth.
- ³Help the faithful man in affliction, and affliction will not find you in the time of your trouble.
- ⁴And every grievous and cruel yoke that come upon you bear all for the sake of the Lord, and thus you will find your reward in the day of judgment.
- ⁵It is good to go morning, midday, and evening into the Lord's dwelling, for the glory of your creator.
- ⁶Because every breathing *thing* glorifies him, and every creature visible and invisible returns him praise.

[Back](#) | [Back to top](#)

Chapter 52

God instructs his faithful, how they are to praise his name

- ¹Blessed is the man who opens his lips in praise of God of Sabaoth and praises the Lord with his heart.
- ²Cursed every man who opens his lips for the bringing into contempt and calumny of his neighbour, because he brings God into contempt.
- ³Blessed is he who opens his lips blessing and praising God.
- ⁴Cursed is he before the Lord all the days of his life, who opens his lips to curse and abuse.
- ⁵Blessed is he who blesses all the Lord's works.
- ⁶Cursed is he who brings the Lord's creation into contempt.
- ⁷Blessed is he who looks down and raises the fallen.
- ⁸Cursed is he who looks to and is eager for the destruction of what is not his.
- ⁹Blessed is he who keeps the foundations of his fathers made firm from the beginning.
- ¹⁰Cursed is he who perverts the decrees of his forefathers.
- ¹¹Blessed is he who imparts peace and love.
- ¹²Cursed is he who disturbs those that love their neighbours.
- ¹³Blessed is he who speaks with humble tongue and heart to all.
- ¹⁴Cursed is he who speaks peace with his tongue, while in his heart there is no peace but a sword.
- ¹⁵For all these things will be laid bare in the weighing-scales and in the books, on the day of the great judgment.

[Back](#) | [Back to top](#)

Chapter 53

Enoch confirms the word from the Lord's lips to his children that they must obey the will of the Lord on their own

- ¹And now, my children, do not say: Our father is standing before God, and is praying for our sins, for there is there no helper of any man who has sinned.

²You see how I wrote all works of every man, before his creation, *all* that is done amongst all men for all time, and none can tell or relate my handwriting, because the Lord see all imaginings of man, how they are vain, where they lie in the treasure-houses of the heart.

³And now, my children, mark well all the words of your father, that I tell you, lest you regret, saying: Why did our father not tell us?

[Back](#) | [Back to top](#)

Chapter 54

Enoch instructs his sons, that they should hand the books to others also

¹At that time, not understanding this let these books which I have given you be for an inheritance of your peace.

²Hand them to all who want them, and instruct them, that they may see the Lord's very great and marvellous works.

[Back](#) | [Back to top](#)

Chapter 55

Here Enoch shows his sons, telling them with tears, that the time has approached for him to be taken up into heaven, as the angels are standing before him

¹My children, behold, the day of my term and time have approached.

²For the angels who shall go with me are standing before me and urge me to my departure from you; they are standing here on earth, awaiting what has been told them.

³For to-morrow I shall go up on to heaven, to the uppermost Jerusalem to my eternal inheritance.

⁴Therefore I bid you do before the Lord's face all *his* good pleasure.

[Back](#) | [Back to top](#)

Chapter 56

Methosalam asks of his father blessing, that he may take Enoch food to eat

¹Mathosalam having answered his father Enoch, said: What is agreeable to your eyes, father, that I may make before your face, that you may bless our dwellings, and your sons, and that your people may be made glorious through you, and then *that* you may depart thus, as the Lord said?

²Enoch answered to his son Mathosalam *and* said: Hear, child, from the time when the Lord anointed me with the ointment of his glory, *there has been no* food in me, and my soul remembers not earthly enjoyment, neither do I want anything earthly.

[Back](#) | [Back to top](#)

Chapter 57

Enoch bade his son Methosalam to summon all his brethren

¹My child Methosalam, summon all your brethren and all your household and the elders of the people, that I may talk to them and depart, as is planned for me.

²And Methosalam made haste, and summoned his brethren, Regim, Riman, Uchan, Chermion, Gaidad, and all the elders of the people before the face of his father Enoch; and he blessed them, *and* said to them:

[Back](#) | [Back to top](#)

Chapter 58

Enoch's instructions to his sons

¹Listen to me, my children, to-day.

²In those days when the Lord came down on to earth for Adam's sake, and visited all his creatures, which he created himself, after all these he created Adam, and the Lord called all the beasts of the earth, all the reptiles, and all the birds that soar in the air, and brought them all before the face of our father Adam.

³And Adam gave the names to all things living on earth.

⁴And the Lord appointed him ruler over all, and subjected to him all things under his hands, and made them dumb and made them dull that they be commanded of man, and be in subjection and obedience to him.

⁵Thus also the Lord created every man lord over all his possessions.

⁶The Lord will not judge a single soul of beast for man's sake, but adjudges the souls of men to their beasts in this world; for men have a special place.

⁷And as every soul of man is according to number, similarly beasts will not perish, nor all souls of beasts which the Lord created, till the great judgment, and they will accuse man, if he feed them ill.

[Back](#) | [Back to top](#)

Chapter 59

Enoch instructs his sons wherefore they may not touch unclean meat because of what comes from it

¹Whoever defiles the soul of beasts, defiles his own soul.

²For man brings clean animals to make sacrifice for sin, that he may have cure of his soul.

³And if they bring for sacrifice clean animals, and birds, man has cure, he cures his soul.

⁴All is given you for food, bind it by the four feet, that is to make good the cure, he cures his soul.

⁵But whoever kills beast without wounds, kills his own souls and defiles his own flesh.

⁶And he who does any beast any injury whatsoever, in secret, it is evil practice, and he defiles his own soul.

[Back](#) | [Back to top](#)

Chapter 60

He who does injury to the soul of another man, does injury to his own soul

¹He who works the killing of a man's soul, kills his own soul, and kills his own body, and there is no cure for him for all time.

²He who puts a man in any snare, shall stick in it himself, and there is no cure for him for all time.

³He who puts a man in any vessel, his retribution will not be wanting at the great judgment for all time.

⁴He who works crookedly or speaks evil against any soul, will not make justice for himself for all time.

[Back](#) | [Back to top](#)

Chapter 61

Enoch instructs his sons to keep themselves from injustice, to help others and to share

¹And now, my children, keep your hearts from every injustice, which the Lord hates. Just as a man asks something for his own soul from God, so let him do to every living soul, because I know all things, how in the great time to come there is much inheritance prepared for men, good for the good, and bad for the bad, without number many.

²Blessed are those who enter the good houses, for in the bad houses there is no peace nor return from them.

³Hear, my children, small and great! When man puts a good thought in his heart, brings gifts from his labours before the Lord's face and his hands made them not, then the Lord will turn away his face from the labour of his hand, and *that* man cannot find the labour of his hands.

⁴And if his hands made it, but his heart murmur, and his heart cease not making murmur incessantly, he has not any advantage.

[Back](#) | [Back to top](#)

Chapter 62

Of how it is fitting to bring one's gifts in faith, because there is no repentance after death

¹Blessed is the man who in his patience brings his gifts with faith before the Lord's face, because he will find forgiveness of sins.

²But if he take back his words before the time, there is no repentance for him; and if the time pass and he do not of his own will what is promised, there is no repentance after death.

³Because every work which man does before the time, is all deceit before men, and sin before God.

[Back](#) | [Back to top](#)

Chapter 63

Of how not to despise the poor, but to share with them equally, lest you be murmured against before God

¹When man clothes the naked and fills the hungry, he will find reward from God.

²But if his heart murmur, he commits a double evil; ruin of himself and of that which he gives; and for him there will be no finding of reward on account of that.

³And if his own heart is filled with his food and his own flesh, clothed with his own clothing, he commits contempt, and will forfeit all his endurance of poverty, and will not find reward of his good deeds.

⁴Every proud and magniloquent man is hateful to the Lord, and every false speech, clothed in untruth; it will be cut with the blade of the sword of death, and thrown into the fire, and shall burn for all time.

[Back](#) | [Back to top](#)

Chapter 64

Of how the Lord calls up Enoch, and people took counsel to go and kiss him at the place called Achuzan

¹When Enoch had spoken these words to his sons, all people far and near heard how the Lord was calling Enoch. They took counsel together:

²Let us go and kiss Enoch, and two thousand men came together and came to the place Achuzan where Enoch was, and his sons.

³And the elders of the people, the whole assembly, came and bowed down and began to kiss Enoch and said to him:

⁴Our father Enoch, *may* you *be* blessed of the Lord, the eternal ruler, and now bless your sons and all the people, that we may be glorified to-day before your face.

⁵For you shalt be glorified before the Lord's face for all time, since the Lord chose you, rather than all men on earth, and designated you writer of all his creation, visible and invisible, and redeemed of the sins of man, and helper of your household.

[Back](#) | [Back to top](#)

Chapter 65

Of Enoch's instructions to his sons

¹And Enoch answered all his people saying: Hear, my children, before that all creatures were created, the Lord created the visible and invisible things.

²And as much time as there was and went past, understand that after all that he created man in the likeness of his own form, and put into him eyes to see, and ears to hear, and heart to reflect, and intellect wherewith to deliberate.

³And the Lord saw all man's works, and created all his creatures, and divided time, from time he fixed the years, and from the years he appointed

the months, and from the months he appointed the days, and of days he appointed seven.

⁴And in those he appointed the hours, measured them out exactly, that man might reflect on time and count years, months, and hours, *their* alternation, beginning, and end, and that he might count his own life, from the beginning until death, and reflect on his sin and write his work bad and good; because no work is hidden before the Lord, that every man might know his works and never transgress all his commandments, and keep my handwriting from generation to generation.

⁵When all creation visible and invisible, as the Lord created it, shall end, then every man goes to the great judgment, and then all time shall perish, and the years, and thenceforward there will be neither months nor days nor hours, they will be adhered together and will not be counted.

⁶There will be one aeon, and all the righteous who shall escape the Lord's great judgment, shall be collected in the great aeon, for the righteous the great aeon will begin, and they will live eternally, and then too there will be amongst them neither labour, nor sickness, nor humiliation, nor anxiety, nor need, nor brutality, nor night, nor darkness, but great light.

⁷And they shall have a great indestructible wall, and a paradise bright and incorruptible, for all corruptible things shall pass away, and there will be eternal life.

[Back](#) | [Back to top](#)

Chapter 66

Enoch instructs his sons and all the elders of the people, how they are to walk with terror and trembling before the Lord, and serve him alone and not bow down to idols, but to God, who created heaven and earth and every creature, and to his image

¹And now, my children, keep your souls from all injustice, such as the Lord hates.

²Walk before his face with terror and trembling and serve him alone.

³Bow down to the true God, not to dumb idols, but bow down to his similitude, and bring all just offerings before the Lord's face. The Lord hates what is unjust.

⁴For the Lord sees all things; when man takes thought in his heart, then he counsels the intellects, and every thought is always before the Lord, who made firm the earth and put all creatures on it.

⁵If you look to heaven, the Lord is there; if you take thought of the sea's deep and all the under-earth, the Lord is there.

⁶For the Lord created all things. Bow not down to things made by man, leaving the Lord of all creation, because no work can remain hidden before the Lord's face.

⁷Walk, my children, in long-suffering, in meekness, honesty, in provocation, in grief, in faith and in truth, in *reliance on* promises, in illness, in abuse, in wounds, in temptation, in nakedness, in privation, loving one another, till you go out from this age of ills, that you become

inheritors of endless time.

⁸Blessed are the just who shall escape the great judgment, for they shall shine forth more than the sun sevenfold, for in this world the seventh part is taken off from all, light, darkness, food, enjoyment, sorrow, paradise, torture, fire, frost, and other things; he put all down in writing, that you might read and understand.

[Back](#) | [Back to top](#)

Chapter 67

The Lord let out darkness on to the earth and covered the people and Enoch, and Enoch was taken up on high, and light came again in the heaven

¹When Enoch had talked to the people, the Lord sent out darkness on to the earth, and there was darkness, and it covered those men standing with Enoch, and they took Enoch up on to the highest heaven, where the Lord *is*; and he received him and placed him before his face, and the darkness went off from the earth, and light came again.

²And the people saw and understood not how Enoch had been taken, and glorified God, and found a roll in which was traced The Invisible God; and all went to their dwelling places.

[Back](#) | [Back to top](#)

Chapter 68

Conclusion

¹Enoch was born on the sixth day of the month Tsivan, and lived three hundred and sixty-five years.

²He was taken up to heaven on the first day of the month Tsivan and remained in heaven sixty days.

³He wrote all these signs of all creation, which the Lord created, and wrote three hundred and sixty-six books, and handed them over to his sons and remained on earth thirty days, and was again taken up to heaven on the sixth day of the month Tsivan, on the very day and hour when he was born.

⁴As every man's nature in this life is dark, so are also his conception, birth, and departure from this life.

⁵At what hour he was conceived, at that hour he was born, and at that hour too he died.

⁶Methosalam and his brethren, all the sons of Enoch, made haste, and erected an altar at that place called Achuzan, whence and where Enoch had been taken up to heaven.

⁷And they took sacrificial oxen and summoned all people and sacrificed the sacrifice before the Lord's face.

⁸All people, the elders of the people and the whole assembly came to the feast and brought gifts to the sons of Enoch.

⁹And they made a great feast, rejoicing and making merry three days, praising God, who had given them such a sign through Enoch, who had

found favour with him, and that they should hand it on to their sons from generation to generation, from age to age.

¹⁰ Amen.

BOOK OF ENOCH

BY R. ISHMAEL BEN ELISHA

THE HIGH PRIEST

CHAPTER I

INTRODUCTION: *R. Ishmael ascends to heaven to behold the vision of the Merkaba and is given in charge to Metatron*

AND ENOCH WALKED WITH GOD: AND HE WAS NOT; FOR GOD TOOK HIM
(Gen. v. 24)

Rabbi Ishmael said:

(1) When I ascended on high to behold ¹the vision of the *Merkaba*¹ and had entered the six Halls, one within the other: (2) as soon as I reached the door of the seventh Hall I stood still in prayer before the Holy One, blessed be He, and, lifting up my eyes on high (i.e. towards the Divine Majesty), I said: (3) "Lord of the Universe, I pray

1-1 so *DE. A.*: 'in my vision the Merkaba'

Chh. i and ii. (Additional, see Introduction, section 7.) Chh. i and ii; which are not extant in *BCL*, form an introduction to the book, supplying the explanation of the frame of chh. iii-xlviii A, purporting to be revelations and communications given to R. Ishmael by Metatron-Enoch. By the present introductory chapters is indicated that the occasion of these revelations was Rabbi Ishmael's ascent to behold the vision of the *Merkaba* (the Divine Chariot). R. Ishmael's ascension to heaven and intercourse with Metatron, or the Prince of the Presence, forms an intrinsic part of the *Legend of the Ten Martyrs*, including the so-called *Apocalyptic Fragment* (*BH.* v. 167-169, vi. 19-35; *Siddur R. 'Anram Gaon*, 3 b, 12 b-13 a; Gaster, *RAS's Journal*, 1893, pp. 609 seqq.). The R. Ishmael version of *Shi'ur Qoma* is also framed as a revelation to R. Ishmael from Metatron. See further Introduction, sections 7 c and 10. The 'R. Ishmael' introduced in these writings is, acc. to them, one of the ten martyrs, contemporary with R. 'Aqiba, also one of these martyrs with whom he exchanged opinions and contended teachings on mystical subjects, was a High Priest and the son of a High Priest, hence in possession of the Great Divine Name, by force of which he was able to ascend to heaven. The time of the martyrdom was the beginning of the second century.

Behold the vision of the Merkaba. Identical expression: *Hek. R. BH.* iii. 83. entered the six Halls etc. For the conception of the seven Halls cf. note on ch. xviii. 3 and chh. x. 2, xvi. 1, xxxvii. 1, xxxviii. 1, xlviii c 8 and esp. *Hek. R.* The Halls are situated in the highest of the seven heavens. The *Merkaba* and the Throne of Glory are, acc. to the earlier conceptions represented here, located to the seventh Hall. For later developed conceptions cf. *Zohar*, i. 38 a-45 b, ii. 245 a-269 a; *Pardes Rimmonim*, Gate xxiv, and Intr. R. 'Aqiba also narrates his ascent to the seven Halls, in *Pirge R. Ishmael*, ch. xviii (*Bodl. MICH.* 175, foll. 20 a seq.). one within the other, lit. 'chamber within chamber', the Halls being arranged in concentric circles. Cf. *Mass. Hek.* iv ("the seven Halls, one within the other").

thee, that the merit of Aaron, the son of Amram, the lover of peace and pursuer of peace, who received the crown of priesthood from Thy Glory on the mount of Sinai, be valid for me in this hour, so that *Qafsiel*², the prince, and the angels with him may not get power over me nor throw me down from the heavens”.

(4) Forthwith the Holy One, blessed be He, sent to me Metatron, his Servant (*Ebed*) the angel, the Prince of the Presence, and he, spreading his wings, with great joy came to meet me so as to save me from their hand.

(5) And he took me by his hand in their sight, saying to me: “Enter in peace before the high and exalted King³ and behold the picture of the *Merkaba*”.

(6) Then I entered the seventh⁴ Hall, and he led me to the camp(s)⁵ of *Shekina* and placed me before ⁶the Holy One, blessed be He⁶, to behold the *Merkaba*.

(7) As soon as the princes of the *Merkaba* and the flaming *Seraphim* perceived me, they fixed their eyes upon me. Instantly trembling and shuddering seized me and I fell down⁷ and was benumbed by the radiant image of their eyes and the splendid appearance of their faces; until the Holy One, blessed be He, rebuked them, saying:

(8) “My servants, my *Seraphim*, my *Kerubim* and my *Ophannim*! Cover ye your eyes before Ishmael,⁸ my son,⁸ my friend, my beloved one and my glory, that he tremble not nor shudder!” (9) Forthwith Metatron the Prince of the Presence, came and restored my spirit

2 *DE*: ‘Qaspiel’ 3 so with *DE*. *A* om. 4 *E*: ‘fourth’ 5 *DE*: ‘sight’

(3) that the merit of Aaron... be valid for me, ‘be valid’, lit. ‘complete, complement my measure’. so that *Qafsiel*... and the angels with him may not get power over me. *Qafsiel* is here evidently the guardian of the seventh Hall. The forms *Qafsiel* and *Qaspiel* interchange. *Qaspiel* is one of the guardians of the seventh Hall acc. to *Hek. R.* xx. Cf. *ib.* xv and xix. *Zohar*, ii. 243 b. The form *Qafsiel* is attested in *Zohar*, iii. 3 b and *S. Raziel*, 4 b. For the guardians of the Halls, see ch. xviii. 3. (4) sent to me Metatron etc. also acc. to *Legend of the Ten Martyrs*, *BH.* vi. 19 seqq. Metatron is sent to take care of R. Ishmael. Cf. *Rev. of Moses Yalqut Re’ubeni*, ii. 67 a b.

(6) camp(s) of *Shekina*. Cf. note on ch. xviii. 4 and chh. xxxii. 4, xxxv. 3.

(7) princes of the *Merkaba*. Cf. ch. xxii. 10. *Seraphim*. Cf. ch. xxvi.

(8) The *Seraphim*, *Kerubim* and *Ophannim*. Cf. chh. xxvi, xxii and xxv. They are here indicated as angels of the seventh Hall by the *Merkaba*: *Merkaba*-angels. The highest class of the *Merkaba*-angels is possibly, acc. to the present representation, the *Chayyoth* ‘beneath and above the Throne’ of vs. 12. Cover ye your eyes. Cf. ch. xxii v 5 seq.

(9) Cf. *Ap. Abrah.* x (ed. box): “Go, Jaobel, and by means of my ineffable Name raise me yonder man and strengthen him from his trembling”.

and put me upon my feet. (10) After that (moment) there was not in me strength enough to say a song before the Throne of Glory of the glorious King, the mightiest of all kings, the most excellent of all princes, until after the hour had passed.

(11) After one hour (had passed) the Holy One, blessed be He, opened to me the gates of *Shekina*, the gates of Peace, the gates of Wisdom, the gates of Strength, the gates of Power, the gates of Speech (*Dibbur*), the gates of Song, the gates of *Qëdushsha*, the gates of Chant.

(12) And he enlightened my eyes and my heart by words of psalm, song, praise, exaltation, thanksgiving, extolment, glorification, hymn and eulogy⁹. And as I opened my mouth, uttering a song before ¹⁰the Holy One, blessed be He¹⁰, the Holy *Chayyoth* beneath and above the Throne of Glory answered and said: "HOLY" and "BLESSED BE THE GLORY OF YHWH FROM HIS PLACE!" (i.e. chanted the *Qëdushsha*).

CHAPTER II

The highest classes of angels make inquiries about R. Ishmael, which are answered by Metatron

R. Ishmael said:

(1) In that hour the eagles¹ of the Merkaba, the flaming 'Ophannim and the *Seraphim* of consuming fire ²asked ^{2a}Metatron, saying to him:

9 lit. 'power' i.e. proclamation of God's power. 10-10 DE: 'the Throne of Glory'

Ch. ii. 1 E: 'children' 'servants' corr. 2 DE ins. 'came (and)' 2a-2a E om.

(10) to say a song. R. 'Aqiba, when arriving in the seventh Hall, utters a song of praise acc. to P. R. *Ishmael*, ch. xviii (referred to above). (11) opened to me the gates etc. The gates are the gates of treasures on high 'under the Throne of Glory', cf. ch. viii. gates of *Shekina* is difficult. Jellinek in E suggests the emendation: 'gates of Understanding' (cf. ch. viii and the expression 'the 50 gates of understanding'). (12) psalm, song...eulogy (נעימה). Cf. *Zohar*, iii. 50 a, נעימות (= chanting). the Holy *Chayyoth*...answered. The Holy *Chayyoth* utter the *Qëdushsha* responses; cf. ch. xx. 2. Vide Introduction, section 17 a.

Ch. ii. The present chapter setting forth the inquiries of the angels concerning the admittance of R. Ishmael to the high heavens is a travesty of the similar passages, chh. iv. 7, vi. 2, xlviii d 7.

(1) the eagles of the Merkaba. One of the four *Chayyoth* is described as 'Eagle' in accordance with Ezek. i. 10, x. 14. The plural 'eagles' can be accounted for on the assumption that the tradition here represented holds the view that there existed two (or several) classes of *Chayyoth*. This may perhaps be hinted at in the preceding chapter, vs. 12: 'the *Chayyoth* beneath and above the Throne'. "The higher and the lower *Chayyoth*": *Zohar* frequ. "Two eagles": *Zohar*, iii. 170 b.

(2) "Youth! Why sufferest thou one born of woman to enter and behold the Merkaba?^{2a} From which nation, from which tribe is this one? What is his character?"

(3) Metatron answered and said to them:

"From the nation of Israel whom the Holy One, blessed be He, chose for his people ³from among seventy tongues (nations)³, from the tribe of Levi, ⁴whom he set aside as a contribution⁴ to his name and from the seed of Aaron whom the Holy One, blessed be He, did choose for his servant and put upon him the crown of priesthood on Sinai".

(4) Forthwith they spake and said:

"Indeed, this one is worthy to behold the *Merkaba*". ⁵And they said⁵: "Happy is the people that is in such a case!" (Ps. cxliv. 15).

CHAPTER III

Metatron has 70 names, but God calls him 'Youth'

R. Ishmael said:

(1) ²¹In that hour¹ I asked Metatron, the angel, the Prince of the Presence²: "What is thy name?" (2) He answered me: "I have seventy names, corresponding to the seventy tongues³ of the world

2a-2a E om. 3-3 so with D. A corr. 4-4 D: 'who offered heave offerings'
5-5 DE: 'as it is written'

Ch. iii. BCL begin with this chapter. 1-1 B om. 2-2 C: 'When I had ascended to the Merkaba, I asked Metatron to write down for me all that has been written concerning the angel, the Prince of the Presence, and thus said I to him' 3 BCL: 'nations'

Chh. iii-xvi. The 'Enoch-Metatron piece'. See Introduction, sections 5 and 8.

Ch. iii, while stating that Metatron has seventy names 'corresponding to (the number of) nations of the world' gives the distinction to the name 'Youth' (*Na'ar*) as being that by which he is called by his 'King', the Holy One. Hereby it forms the introduction to the following chapter which is framed as an explanation of this name as applied to Metatron—the explanation being acc. to that chapter, vs. 10, that Metatron, as identical with Enoch, the son of Jared (Gen. v. 18, 21-24) who was taken up to the heavens and made an angel-prince, is as 'a youngster and a youth among the other angels and princes (existent from the days of Creation) in days months and years'.

(2) I have seventy names corresponding to the seventy tongues (BCL: nations) of the world. The statement ascribing seventy names to Metatron, occurs also ch. xlviii. D 1, 9 et frequ. (cf. ch. xxix). The seventy names of Metatron are here connected with the seventy tongues (nations) of the world which represent the world in its entirety, i.e. their reason of existence is conceived of as founded on Metatron's functions as concerned with the nations of the world or with the affairs of the world as a whole. Hence the passage reflects the tradition of Metatron being the *Prince of the World*. Since the seventy nations are represented in heaven

and all of them ⁴are based upon⁴ the name ⁵Metatron, angel of the Presence⁵; but ⁶my King⁶ calls me 'Youth' (*Na'ar*)".

4-4 *BCL*: 'are similar to' 'are a reflection of' 5-5 *B*: 'of my King and my Creator' *C*: 'my King, the Holy One, blessed be He' *DE*: 'the King of the Kings of kings' *L*: 'kings' (corr. for 'my king') 6-6 *L*: 'kings' (corr. for 'my king')

by the seventy (or seventy-two) 'princes of kingdoms' (cf. on chh. xvii. 8 and xxx. 2), the Prince of the World is depicted as the prince and ruler of these (see ch. xxx) and this function is also assigned to Metatron: chh. x. 3, xvi. 2, xlviii c 9 (cf. notes *ad loca*). In the last-mentioned passage, ch. xlviii c 9, Metatron's rulership over the seventy princes is expressly connected with his character of bearer of seventy names and he is there also pictured as wielding executive and governing power over the world and the nations through the seventy princes as agencies. Cf. *YR*. i. 57 b (quotation from *'Emeq ha-mMelek*): "Metatron is the Prince of the World, for he distributes maintenance to the princes of the nations of the world". In the rest of the present book Metatron's rulership is mainly presented in its celestial aspect; he is the prince, ruler and judge of the children of heaven, only implicitly brought into connection with the things terrestrial. Nowhere in this book is he definitely stated to be 'the Prince of the World'. This term is not used by the present Enoch-Metatron section and in the latter part of the book the 'Prince of the World' appears as different from Metatron (see chh. xxx. 2 and xxxviii. 3 and notes).

all of them are based upon the name of my King, the Holy One (acc. to the readings of *BCDE[L]* and the reading implied by the opening words of ch. iv: 'Why art thou called by the name of thy Creator, by seventy names?'). This is another aspect of the origin and import of Metatron's seventy names: they are a reflection of the seventy names of the Most High (cf. the reading of *BCL*). The same is stated in chh. xlviii c 9, xlviii d 1, 5, appearing also in the form of the dictum 'called by the name of His Master, for "my name is in him" (*Ex*. xxiii. 21)' and in the ascribing to Metatron of the name 'the lesser *YHWH*': chh. xii. 5, xlviii d 1. There are two lines of ideas to be distinguished here: (1) Metatron's names are conceived of as 'based upon' the Divine Name *κατ' ἐξοχήν*, the *Tetragrammaton*, which simply means that the different names contain the *YHWH* or *YaH* as component part. This is not a trait exclusive to the Metatron-conception, but applied to various other high princes and angels, cf. ch. x. 3 and esp. ch. xxix. 1. (2) Acc. to the other line of thought the seventy names of Metatron are actually one by one the counterparts, images, reflections of the seventy names of the Godhead (cf. ch. xlviii d 5: 'seventy names of His by which they call the King of Kings of kings in the high heavens'). This is an exclusive feature of the Metatron-picture, as is also the name 'the Lesser *YHWH*'.

based upon the name Metatron. This strange expression which is attested only in *A* occurs also *Hek. Zot. Bodd.* MICH. 9, fol. 69 b, where it signifies that the divers names are to be understood as referring to the angel-prince known as 'Metatron' (the names given there are such as nos. 6, 46, 84 of ch. xlviii d 1 and '*Pisqon*, *Sigron*, *Zebodiel* etc.'). The expression might, however, also refer to variants of the name 'Metatron', e.g. *Mitatron*, *Mittron*, *Mitton*, *Mitmon*, 'Atmon', 'Otron', etc.; cf. ch. xlviii d 1 and *Yalqut Re'ubeni*, 56 b. The reading of *BCDE* is presumably correct here. Cf. above.

my King calls me Youth (*Na'ar*). The name *Na'ar* is regularly ascribed to Metatron; cf. on ch. xlviii d 1. It is also applied to the Prince of the World, *TB. Yeb.* 16 b. The derivations and explanations of the name differ. The present section (cf. iv. 1, 10), as has already been pointed out, explains it from Metatron's identity with Enoch. In *TB. Yeb. ib.* the name '*Na'ar*, Youth' is deduced from Ps. xxxvii. 25: "I have been a youth and now am old", which is made to refer to the Prince of the World (who was young in the days of Creation). The *Tosaphoth* on

CHAPTER IV

Metatron is identical with Enoch who was translated to heaven at the time of the Deluge

R. Ishmael said:

(1) I asked Metatron and said to him: “¹Why art thou called¹ by the name of thy Creator, by seventy names? Thou art greater than all the princes, higher than all the angels, beloved more than all the servants, honoured above all the mighty ones in kingship, greatness and glory: why do they call thee ‘Youth’ in the high heavens?”

(2) He answered and said to me: “²Because I am² Enoch, the son of Jared. (3) For when the generation of the flood sinned and were

1-1 so *CD*. *A*: ‘callest thou’ (corr.) *B*: ‘is thy name (like the name of thy Creator)’
2-2 so *BCDEL*. *A*: ‘for the reason that he (the Na’ar) is also (Enoch etc.)’

this passage state that Enoch-Metatron and the Prince of the World are both called *Na’ar*, yet they must not, acc. to the Tosaphists, be identified: Ps. xxxvii. 25 refers to the Prince of the World only, not to Enoch-Metatron. This of course implies that the verse in question was acc. to one tradition referred to Metatron (in fact Metatron is, apparently with reference to Ps. xxxvii. 25, described both as ‘*Na’ar*, Youth’ and ‘*Zāqēn*, Old, Eldest’; cf. *Yalquṭ Re’ubeni*, i. 60 a). See further the Introduction.

In *Zohar*, i. fol. 223 b *et al.* the appellation *Na’ar* as given to Enoch-Metatron is derived from Prov. xxii. 6, ‘*Chānōk la-nNa’ar*’, which is interpreted: ‘Enoch was made (the) *Na’ar*’. The present verse is quoted in *Zohar*, i. 37 b, from ‘Book of Enoch’.

Ch. iv. This chapter is framed as an explanation of the name ‘*Na’ar*, Youth’ as applied to Metatron. It relates how Metatron is Enoch of Gen. v who was removed to heaven and there made into an angel-prince. The reason of his translation was the sinfulness of the generation of the Flood to which he was to bear witness to future generations and in the world to come. His testimony was to justify the destruction of all living beings in that generation through the Flood. The high angels ‘*Azza*, ‘*Uzza* and ‘*Azzael* enter protest against Enoch’s translation, but God rebukes them and elevates Enoch into a ruler and prince over them.

(1) Why art thou called by the name of thy Creator etc. This part of the question is not answered in the chapter. It is to be considered merely as a repetition of the statement of the foregoing chapter. The real question is: Why do they call thee ‘Youth’ in the high heavens?

(2) Because I am Enoch the son of Jared. The identity of Enoch and Metatron is proclaimed in *Targ. Yer.* in the well-known passage to Gen. v. 24. There the ground for identification seems to have been the function of Scribe assigned both to Enoch and Metatron. For Enoch as Scribe cf. e.g. *Yub.* iv. 23, 2 *En.* liii. 2; for Metatron, *TB. Chag.* 15 a. This function of Enoch-Metatron is not emphasized in the present book, although the office of ‘witness’ of the sins of the generation in its original conception is probably connected with that of ‘scribe’; see the next verse.

(3) when the generation of the flood sinned and were confounded in their deeds, saying unto God: Depart from us. . . (Job xxi. 14). The sins of the generation of the Deluge are not defined as to their nature, except as a rebellion. Acc.

confounded in their deeds, saying unto God: 'Depart from us, for we desire not the knowledge of thy ways (Job xxi. 14)', then the Holy One, blessed be He, removed me from their midst to be a witness against them in the high heavens to all the inhabitants of the world, that ³they may not say: 'The Merciful One is cruel³'.

(4) ADEL:

What sinned all those multitudes, their wives, their sons and their daughters, their horses, their mules and their cattle and their property, and all the birds of the world, all of which the Holy One, blessed be He, destroyed from the world together with them in the waters of the flood?

BC:

What sins had they committed, all those multitudes? Or, let it be they sinned, what had their sons and their daughters, their mules and their cattle sinned? And likewise, all the animals, domestic and wild, and the birds in the

3-3 so BCDEL. A: 'the Merciful One is not cruel'

to chh. v, vi the sin of the generation that caused the removal of the *Shekina* and with the *Shekina*, of Enoch, was idolatry; cf. on ch. v. 6. The expression 'Depart from us etc. (Job xxi. 14)' is used already in *Jub.* xi. 6 in connection with the idolatry of the early times (the name '*Seroh* = *Suru*: depart' or *saru*). Cf. *Gen. R.* xxxi. 6: the '*chamas* (violence)' of which the earth was filled in the time of the Flood acc. to *Gen.* vi. 13, comprised the three cardinal sins, adultery, idolatry and bloodshed. to be a witness against them. The idea of Enoch's removal to heaven in order to be a witness against the sins of mankind is attested in *Jub.* iv. 21 seqq. His function of witness is there made the essential part of his office as Scribe: "(22) And he (Enoch) testified to the Watchers who had sinned with the daughters of men... And Enoch testified against them all. (23) And he was taken from amongst the children of men, ... into the Garden of Eden... and behold there he *writes down* the condemnation and the judgement of the world, and all the *wickedness of the children of men*. (24) And on account of it God brought the waters of the flood upon all the land". (Enoch's testimony brings about the decree of destruction, contrast the present chapter.) The same idea of Enoch as witness in heaven against man's sin persists in later traditions; cf. *YR.* i. 57 a (perhaps dependent upon the present fragment): "'When the generation of the flood sinned God took him (Enoch) to be a witness against them': (so that if anyone might say:) if man sinned that was because he was created from the four elements or because his generation were wicked men, God would answer: Behold, Enoch was also in a generation of wicked men, and he also was created of the four elements (*scil.* yet he did not sin)".

that they may not say: 'The Merciful One is cruel. (4) What sinned all those multitudes etc.' Enoch-Metatron is to bear witness to the justice of God's decree of destroying not only mankind, but all living beings, including the cattle and the wild beasts, in the waters of the Flood. How Enoch's testimony was to refute the charge of cruelty that might otherwise be raised against God is not further explained. No answer is given to the question: 'What did the cattle, beasts and birds sin?' The answer is probably to be understood thus: *even the animals were implicated in the wickedness of the generation*. The question is noted in Rabbinic. Cf. *Gen. R.* xxviii. 8, where it is stated that in the generation of the Flood even the animals sinned: "as it is written (*Gen.* vi. 12): 'all flesh had corrupted its way upon the earth'. 'All men' is not written here, but 'all flesh'

ADL:

E:

BC:

Nor may say: What though the generation of the flood did sin; the beasts and the birds, what had they sinned, that they should perish with them?

what had they sinned that they should perish the world? that God did destroy from the world?' with them?'

(5) Hence the Holy One, blessed be He, lifted me up⁵ in their lifetime⁵ before their eyes to be a witness against them to the future world. And the Holy One, blessed be He, ⁶assigned me for⁶ a prince and a ruler among the ministering angels.

(6) In that hour⁷ ⁸three of the ministering angels, 'UZZA, 'AZZA and 'AZZAE⁸ came forth and brought charges against me in the high

4 C ins. 'what did they sin, and those that were taken away with them' 5-5 BC om. L: 'in their lifetime from the world' 6-6 (B) CL: 'made me into'. Above acc. to DE, lit. 'joined me to the ministering angels as a prince and a ruler'. A corr. (*Ziggēwdni: me signavit?*) 7 BCL ins. 'when the Holy One, blessed be He, took me up to the high heavens' 8-8 D: 'three angels, 'Azza, 'Uzza and 'Azrael' B: 'three angels: Mal'aki, 'Azza and 'Azrael' CE: 'three of the angels (of) 'Azza and 'Azrael' L: 'three angels, Mamlaḳeti, 'Azza and 'Azrael' YR. i. 35 a: 'three angels from among the angels of 'Azza and 'Azrael.'

(i.e. including the animals). Yea, even the earth fell to whoredom". Similarly *TB. Sanh.* 108 a (attr. to R. Yochanan): "'all flesh had corrupted its way upon the earth'; this means to say, that the cattle defiled themselves with the beasts and the beasts with the cattle and all of them with men and men with all of them". Parallel is *Pirqe de R. El'ezer*, ch. xiv: "(with reference to the curse put upon the earth on account of Adam's sin) If Adam sinned, what was the sin of the earth? Only this, that the earth did not denounce the evil doings of man". In other connections we find the very question repudiated as an undue criticism of God's ways; so with reference to the narrative of 1 Sam. xv. 3 and Deut. xxi. 4 in *TB. Yoma*, 22 b and *Eccl. R.* vii. 33: "(in the former case) If the men had sinned, what were the sins of the women, what the sins of the infants, the cattle, oxen and asses? (and in the latter case) If man sinned, what was the sin of the cattle?" No answer is given but a quotation by *Bath Qōl* of *Eccl.* vii. 16, "Be not righteous over much", explained thus: "Do not think that thou canst judge about what is just and unjust better than thy Creator!" Cf. also *TB. Shabb.* 54 b, 55 a.

(6) three of the ministering angels, 'Uzza, 'Azza and 'Azrael. The three angels, 'Azza, 'Uzza and 'Azrael are in the present chapter represented as belonging to the order of ministering angels, inhabitants of the high heavens, whereas acc. to ch. v they are evil agencies, inspirers of idolatry. They are usually mentioned as two only ('Azza and 'Azrael, 'Uzza and 'Azziel, etc.), not as three. (The readings of CE and YR, in fact, have 'Azza and 'Azrael only.) Cf. however 2 *En.* xviii. 4 and note on v. 9 (important parallel).

The names are in all probability of an early origin: they can be traced to 1 *En.*, to gnostic works (see Introduction) and in Talmud. The meaning of the words is pellucid: Strength, Might-God, Divine Power. Most of the preserved traditions represent them as fallen angels. They are attached to the speculations centring round the mystical piece Gen. vi. 1-4. In 1 *En.* vi. 7 'Asael' is one of the leaders of the angels who fell and led mankind astray into fornication and idolatry. The

heavens, saying before the Holy One, blessed be He: "9 Said not the Ancient Ones (First Ones) rightly before Thee: 10 'Do not create man! '10" 11 The Holy One, blessed be He, answered and said unto

9 BCDEL ins. 'Lord of the Universe!'
11 C ins. 'for he will sin' A ins. 'again'

10-10 C: 'Let not man be created!'

conception of 'Azza and 'Azrael as fallen angels evidently underlies the dictum, attributed to the school of R. Ishmael, recorded in *TB. Yoma*, 67 a, acc. to which 'Azazel of Lev. xvi. is to be considered as a composition of 'Azza and 'Azrael, 'for Azazel atoned for the sins of these'. *Rashi*, *ad locum*, connects 'Azza and 'Azrael with 'the sons of God' in Gen. vi. 2 (cf. 1 *En.* vi and Charles' note on 1 *En.* vi. 6).

In *Zohar* the same view is repeatedly set forth. See vol. i. 19 b, 23 a, 25 a b, 37 a with *Tosefta*, 55 a, 58 a, 126 a, vol. iii. 194 a, 208 a and 'Idra Rabba. 'Azza and 'Azrael (in this form they are always referred to in *Zohar*) are the angels who had been thrown down from heaven 'from their state of holiness', and after that went astray with the daughters of men (*Nd'amah*, Gen. iv. 22) and also taught mankind sorceries (cf. ch. v. 9)—being now definitely unable to leave the lower regions (ctr. the present verse). A slightly modified version of the idea is found in 'Idra Rabba: "'Azza and 'Azrael are the 'giants' (Gen. vi. 6), not the sons of God (*ib.* 2)"—this is perhaps a reminiscence of the distinction emphasized in the *Book of Jubilees* between the sons of Elohim and the demons, the sons of the sons of the Elohim—"for the sons of God were not on earth but Azza and Azrael were on earth". The same is quoted from *Midrash Ruth* by *Siuni*, in *YR*, i. 61 b.

BH. iv. 127-8, instead of 'Azza and 'Azrael', has 'Shamchazai and 'Azrael'. *Shamchazai* is of course identical with the *Semiazaz* or *Semjaza* of 1 *En.* vi. 7, viii. 3 (cf. Charles, *ad loca*).

In the present chapter 'Azza, 'Uzza and 'Azrael are represented as high angels, accusing man before God on account of his sin: 'Said not the first ones rightly before Thee, Create thou not man?' One of the traditional statements about 'Azza and 'Azrael in the adduced references, in fact, reveals the view that the fall of these angels was caused by their accusing man before God. Thus e.g. in a citation in *Yalqut Re'ubeni*, i. 61 a, with reference to Gen. vi. 2: "the 'sons of God' are 'Azza and 'Azza'el who laid accusations (against man) before their Master and he threw them down from the holy place on high... and they defiled themselves with the daughters of men", and *ib.* (from *Kanfe Yona*), also with reference to Gen. vi. 2: "'Azza and 'Azrael are the angels that laid accusations against man and said: 'Why didst Thou create him? For he is going to sin and to provoke Thee'. The Holy One, blessed be He, said to them: 'Behold! If ye go down to the lower world, ye will sin as he', and He cast them down. And they are the 'sons of God' who took themselves wives from among the daughters of men... and after they had fallen into sin... they were no longer angels" and when they desired to return to their former place, they were unable to do so. Essentially the same is found in *Zohar*, i. 23 a, 37 a *Tosefta*. In *Zohar* they are even identified with 'the first ones' who opposed man's creation in the beginning.

This tradition harmonizes the two views represented in chh. iv and v respectively: the one regarding these angels as belonging to the celestial household, the other as evil agencies, demons inspiring idolatry. In their present setting the two views cannot, however, be harmonized: acc. to ch. v 'Azza, 'Uzza and 'Azrael are evil agencies (that is, acc. to the harmonizing view, fallen angels) before Enoch's translation to the heavens, acc. to ch. iv, on the other hand, they are still high angels in the presence of the Holy One, at the time when Enoch is taken up to heaven. Furthermore, the writer of ch. iv evidently does not think of the angels in question as fallen angels at all, to judge from the following expression: "he (Enoch-Metatron)

them: "I have made and I will bear, yea, I will carry and will deliver". (Is. xlv. 4.)

(7) As soon as they saw me, they said before Him: "Lord of the Universe! What is this one that he should ascend to the height of heights? Is not he one from among the sons of [the sons of] those who perished in the days¹² of the Flood? ¹³"What doeth he in the Rasia?"¹³

(8) Again, the Holy One, blessed be He, answered and said to them: "What are ye, that ye enter and speak in my presence? I delight in this one more than in all of you, and hence he shall be a

¹² so *AL*. *BCD*: 'waters'

¹³-¹³ *DLE* om.

shall be a prince and a ruler *over you in the high heavens*", and from the representation in vs. 9: the angels yield and pay Enoch-Metatron due homage.

There are instances of traditions according with the view of the present chapter, representing 'Azza, 'Uzza or 'Azzael ('Azziel) as high angels and princes, with permanent membership in the Celestial Court. They are then often connected with the proceedings of Judgement. Thus acc. to *Sib. Or.* ii. 217, 'Azziel is one of five angels who lead the souls of men to judgement. Acc. to *S. ha-Chesheq* (*Add.* 27120), fol. 12 b, 'Azzael is one of the "10 heads of the Great Sanhedrin in heaven". Acc. to a quotation from "a commentary on *Ma'areketh ha-'Elohuth*" in *Yalqut Re'ubeni*, i. 55 a, 'Azza is the head of the angels of Justice, 'Uzziel the head of the angels of Mercy (cf. ch. xxxiii), but both under the authority of Metatron. *S. Razi'el*, 40 a represents 'Azzael as one of the seven angels near God's Throne, cf. *ib.* 40 b, and *Hek. R. BH.* iii. 96, 99, introduces 'Uzziel as one of the guardians of the fifth Hall. Cf. *S. Razi'el*, 27 b.

Said not the First Ones rightly before Thee: Do not create man! For the angels as opposing man's creation cf. e.g. *Gen. R.* viii. 5. Striking is here the parallel *TB. Sanhedrin*, 38 a: when God was about to create man, he first created a company of angels whom he asked whether they consented to man's creation or not. Upon being told of man's future deeds, they said "Let not man be created"—and were consequently consumed by the Divine Fire. The same happened with another company that God called into being immediately after. But the third acquiesced and remained in life. However, as soon as they "came to the men of the generation of the flood and of the generation of the dispersion whose deeds were confounded (cf. vs. 3) they said before him: 'Master of the World! Said not the first ones rightly before Thee: Create thou not man?' whereupon God answered with the first part of the scriptural verse laid in God's mouth also here: Is. xlv. 4". The same narrative is echoed in *Ma'yan Chokma, BH.* i. 60 seq. in God's rebuke of *Hadarniel*. In the quoted *Talmud*-passage the expression 'first ones' naturally refers to the first created company of angels, here it simply means the angels present at man's Creation and opposing it. For the expression 'first ones' used of certain angels cf. also *TB. Ber.* 5 a (of Mikael).

(7) Is not he one from among the sons of those who perished in the days of the Flood? This seems to imply, not only that Enoch was counted as one of the men of the generation of the Flood, but even as living after the Flood or in the days of the Flood, a view which of course entirely disagrees with the chronological system of *Gen.* v, vii. 11, acc. to which Enoch disappeared from earth more than 600 years (669) before the Flood.

(8) What are ye etc. God's answer in the same expressions as those of the angels. that ye enter and speak. Even the highest angels are not allowed to enter before God's presence, with some distinguished exceptions (cf. the conception

prince and a ruler over you in the high heavens." (9) Forthwith all stood up and went out to meet me, prostrated themselves before me and said: "Happy art thou and happy is thy father ¹⁴ for thy Creator doth favour thee".

(10) And because I am small and a youth among them ¹⁵ in days, months and years¹⁵, therefore they call me "Youth" (*Na'ar*).

CHAPTER V

The idolatry of the generation of Enosh causes God to remove the Shekina from earth. The idolatry inspired by 'Azza, 'Uzza and 'Azziel

R. Ishmael said: Metatron, the Prince of the Presence, said to me:

(1) ¹From the day¹ when the Holy One, blessed be He, expelled

¹⁴ C ins. 'and thy mother' ¹⁵⁻¹⁵ BCL: 'in years'

Ch. v. 1-1 BCL, YR. i. 59 a: 'on the day'

of the Curtain of *MAQOM*: on ch. xlv. 1, x. 1). he shall be a prince and a ruler over you in the high heavens for I delight in this one more than in all of you. This probably is meant to refer not only to 'Azza, 'Uzza and 'Azrael, but to the ministering angels with them or else their suite of angels. Notice how CE in vs. 6 represents 'Azza and 'Azrael not as individual angels but as an *order of angels*, just as in the old tradition of 1 En. vi seqq. *Asael* was only one of the leaders of a multitude of angels. Metatron a ruler over 'Azza and 'Azrael: cf. quotation *Yalqut Re'ubeni*, i. 55 a, referred to above, a ruler over the princes and angels in general: cf. ch. x. 3, 4.

(9) Happy art thou and happy is thy father. This beatitude echoes the conception of "the *Zakut* of a Pious Posterity" (Schechter's expression, *Aspects*, pp. 195 seqq.). The merits of the sons retroact upon and determine the fate of the fathers.

(10) because I am small and a youth among them. This is the answer to the opening question of the present chapter. Cf. note *ib*. The angels are existent from the days of Creation. Cf. above.

Ch. v. This chapter treats of the removal of Shekina from earth on account of the idolatry of Enosh and his generation. It contains no definite reference to the subject proper of the present section: Enoch(-Metatron) and his translation to heaven. Furthermore, it represents a different tradition from that of ch. iv as to the nature of the angels 'Azza, 'Uzza and 'Azrael. The connection with the context is, however, established by ch. vi. 1, 3, which associate the translation of Enoch to heaven with the removal of Shekina from earth. The chapter may therefore in its present position be considered as an introduction to ch. vi, offering a preparatory explanation of the reason and circumstances of the removal of Shekina, there alluded to. As regards the relationship between ch. iv on one hand and chh. v and vi on the other, it might be safe to assume that they represent respectively two different lines of tradition as to the translation of Enoch: one (ch. iv) connecting it with the sins of the generation of the flood of which he was to bear testimony to coming generations, the other (chh. v, vi) holding the view that Enoch—as the

the first Adam from the Garden of Eden (and onwards), *Shekina* was dwelling upon a *Kerub* under the Tree of Life.

(2) And the ministering angels ²were gathering together² and going down from heaven in parties, ³from the *Raqia'* in companies and from the heavens in camps³ ⁴to do His will in⁴ the whole world.

(3) And the first man and ⁵his generation⁵ were sitting outside the gate of the Garden to behold the radiant appearance of the *Shekina*.

2-2 *B*: 'were entering' *CL*: 'were assembling' *DE*: 'were leaping' 3-3 *BCL*: 'and in companies and camps from *Raqia'*' *E* om. 4-4 *DE*: 'to roam, to fly over' 5-5 *EL*: 'and Eve'

only righteous man of his generation—was taken up on the occasion of *Shekina's* return to the heavens. The object of Enoch's translation, acc. to the latter view, was apparently not his function of witness, but is expressed by the last words of ch. vi: 'I have taken him as a tribute from my world' or 'as my only reward for all my labour with the first generations of the world'.

(1) From the day...*Shekina* was dwelling etc. This represents the frequently attested idea that the original abode of the *Shekina* was among the 'terrestrials, *ha-tTachtonim*' (*Cant. R.* vi, *Num. R.* xii. 5; cf. Abelson, *Immanence of God in Rabbinical Literature*, pp. 117-139). The specific view of the present passage is, that *Shekina* remained on earth after the first Adam's fall until the rise of idolatry in the generation of Enosh. Acc. to *Cant. R.* vi (see Abelson, *op. cit.* p. 136) *Shekina* was removed from earth already with Adam's sin; to the first heaven, and then in six subsequent stages corresponding to the six following epochs of men's degradation from heaven to heaven (the epochs are acc. to that passage: the sins of Cain, of the generation of Enoch, of the generation of the Flood, of the Dispersion, of the Sodomites and of the Egyptians in the days of Abraham). Acc. to *Num. R.* xii. 5 (in a dictum attributed to R. Simeon ben Yochai) the *Shekina* was dwelling on earth in the beginning, was removed with the sin of Adam, and returned with the erection of the Tabernacle. *Ib.* (acc. to Rab) the *Shekina* is also said never to have taken up its abode on earth until the erection of the Tabernacle. Cf. on vs. 13. The *Shekina* here stands for the manifestation of God, to all intents and purposes identical with the manifestation on 'the Throne of Glory': when on earth *Shekina* is no longer in heaven, see vs. 11.

upon a Kerub. Cf. chh. xxii. 12, 16, xxiv. 1, 17. upon a Kerub under the Tree of Life. Cf. *Apoc. Mosis*, xxii. 3, 4: "When God appeared in Paradise mounted on the chariot of His Cherubim with the *angels* proceeding before him... And the Throne of God was fixed where the Tree of Life was". Here the *Kerub* takes the place of the Throne of Glory which is left in the highest of the heavens, acc. to vs. 11.

(2) And the ministering angels were... going down from heaven in companies etc. Cf. *Apoc. Mosis*, xvii. 1, xxii. 3 seq. *Alph. R.* '*Aqiba*, letter '*Aleph*': "when the first Adam beheld the Sabbath, he opened his mouth in praise of the Holy One: then the ministering angels went down from heaven in companies..."; *ib.*: (in the world to come) "the angels will come down in companies from heaven to the Garden of Eden". And *ib. BH.* iii. 60: "(when God had created Eve and brought her to Adam) all the heavenly household went down... to the Garden of Eden". Cf. *Yer. Chag.* 77 a, 4 *Ex.* vi. 3.

(3) the first man and his generation were sitting outside the gate of the Garden to behold the radiant appearance of the *Shekina*. Although expelled from the Garden of Eden Adam and his generation still partake of the splendour of *Shekina*. Cf. *TB. Ber.* 17 a: "(in the world to come) the righteous will be sitting with crowns

✓(4) For the splendour of the *Shekina* traversed the world from one end to the other ⁶(with a splendour) 365,000 times (that) of the globe of the sun⁶. And everyone who ⁷made use of⁷ the splendour of the *Shekina*, on him no flies and no gnats did rest, neither was he ill nor suffered he any pain. No demons got power over him, neither were they able to injure him.

(5) When the Holy One, blessed be He, went out and went in: ⁸from the Garden to Eden, from Eden to the Garden, from the Garden to *Raqia'* and from *Raqia'* to the Garden of Eden⁸ then all and everyone beheld the splendour⁹ of His *Shekina* and they

6-6 DE: 'in one moment, 365,000 and to the globe of the sun' A reads '65,000' instead of '365,000' (BCDEL). 7-7 DE: 'beheld' 8-8 BCDEL: 'from Eden to the Garden, from the Garden to *Raqia'* and from *Raqia'* to the Garden of Eden' 9 so BCDL. A: 'splendour of the image'

on their heads and enjoy the splendour of the *Shekina*". The idea of the radiance of *Shekina* is closely related to that of the heavenly light, of which the light created on the first day was an emanation and which is reserved for the righteous in the world to come. Cf. next vs.

(4) The splendour of the *Shekina* traversed the world from one end to the other... And everyone who made use of the splendour of the *Shekina*... No demons got power over him. For a discussion of the conception of the 'splendour (*ziw*) of the *Shekina*' see Abelson, *op. cit.* pp. 85-89. [The splendour of the *Shekina* is here apparently conceived of as a light-substance protecting from illnesses, from the power of demons and from everything evil and unclean.] For the idea of the splendour of *Shekina* as protecting from demons cf. *Num. R.* xii. 3. It is also conceived of as a sustaining substance, a spiritual food, both for the angels and the saints. *TB. Ber.* 17 a (see Abelson, *op. cit.* p. 87; Kohler, *Jewish Theology*, p. 198). *Yalqut* on Ps. viii (*TB. Shabbat*, 88 a): "when God spread the splendour of *Shekina* over Moses the angels could not burn him". *Yalqut* on Ps. xlv: "the righteous will feed on the splendour of *Shekina* and... they will receive no injury". 'The splendour of *Shekina*' is further used as an attribute of honour and glorification for the highest angels; cf. ch. xxii. 7, 13. Cf. 4 *Ex.* vii. 42, 122, Rev. xxi. 23 (notes in box, *Ezra-Apocalypse*, pp. 85, 127, 161). [The conception of the splendour of the *Shekina* is sometimes seen under the aspect of the 'first light of Creation' or as 'the uncreated light of the Divine Presence' of which the first light is an emanation: this light is referred to in similar terms as those used of 'the splendour of the *Shekina*'.] Cf. in the present connection *Gen. R.* xi. 2, xii. 5: "in the light which God created on the first day (so *Gen. R.* xi. 2; *ib.* xii. 5: the light by which the world was created) the first Adam saw from one end of the world to the other... but as soon as the Holy One, blessed be He, beheld the deeds of the generation of Enosh, of the Deluge and of the Dispersion he took it away and treasured it... for the righteous in the world to come". *Sim. TB. Chag.* 12 a.

(5) went out and went in: from the Garden to Eden. The Garden of Eden is the greater whole of which Eden is a part: *Gen. R.* xv, the Garden and Eden are two distinct things: *TB. Ber.* 34 b. For the expression 'went out and went in etc.' cf. the account of *Shekina*'s ten different journeys in the Temple in *Lam. R. Pröem.* 25. The idea is probably deduced from *Gen. iii.* 8 ("and they heard the voice of the Lord God walking in the Garden"): the passage is interpreted in this sense in *Num. R.* xiii. 4 (although there God's *Shekina* is said to have had its permanent abode in heaven, from where it went down and went up again).

¹⁰were not injured¹⁰; (6) until ¹¹the time of¹¹ the generation of Enosh ¹²who was the head of all idol worshippers of the world¹². (7) And ¹³what did the generation of Enosh do?¹³ They went from one end of the world to the other, and each one brought silver, gold, precious stones and pearls in ¹⁴heaps like unto mountains and hills¹⁴ making idols out of them throughout all the world. And they erected the idols in every quarter of the world: the size of each idol was 1000 parasangs. (8) And they brought down the sun, the moon, planets and constellations, and placed them before the idols on their right hand and on their left, to attend them even as they attend¹⁵ the Holy One, blessed be He, as it is written (1 Kings xxii. 19): "And all the host of heaven was standing by him on his right hand and on his left".

(9) What power was in them that they were able to bring them down? They would not have been able to bring them down but for ¹⁶'UZZA, 'AZZA and 'AZZIEL¹⁶ who taught them ¹⁷sorceries whereby they brought them down and made use of them¹⁷.

10-10 L: 'did not consume away' 11-11 lit. 'came' 12-12 E om.
13-13 E om. 14-14 lit. 'in mountains and hills' 15 with BCDEL,
reading *pi*"*el*. A has *hithpa*"*el*: 'make use of' 16-16 CL: 'Azza and 'Azza'el'
D: 'Azza and 'Azza'el' E: 'Uzza and 'Azza'el' cf. ch. iv. 7. 17-17 C om.
L: 'the art of sorceries'

(6) until the time of the generation of Enosh who was the head of all idol worshippers of the world. The generation of Enosh is here specifically connected with idolatry. In Rabbinic the cardinal sins of idolatry, adultery and bloodshed (and the calling of God's name in vain and sorceries) are often promiscuously referred to the generations of Enosh, of the Deluge and of the Dispersion. But cf. *Lam. R. Prēm.* 24: "the generation of Enosh who were the heads of idol-worshippers".

(7) And they erected the idols in every quarter of the world: the size of each idol was 1000 parasangs. This as well as the following vs. seems to presuppose the view of the men of this generation as being of immeasurably higher stature than those of later generations, an idea occasionally met with in Rabbinic.

(8) And they brought down the sun, the moon, planets and constellations. There is perhaps here a covert trace of an original representation of the generation of Enosh as worshippers of the sun and the planets. In the present form the heavenly bodies are made the attendants of the idols: they placed them before the idols to attend them like as they attend the Holy One, blessed be He. The idea is to illustrate how man put the idols in all respects in the same place as that which rightly belonged to God alone. *Yalqut* to Gen. iv. 26 quotes an account of the deeds of the generation of Enosh of a similar character as vs. 7 and 8 here (idols of copper, brass, iron, wood, stone).

(9) What power was in them. . . 'Uzza, 'Azza and 'Azziel who taught them sorceries, whereby they brought them down. The quotation *Šūmī, Yalqut Re'ubenī*, i. 53 a, has 'Shemchazai and Azzael' (so also BH. iv. 127-128, *Yalq. Šīm.* Gen. xlv; cf. on the following vs.). On 'Azza, 'Uzza and 'Azzael see on ch. iv. 6. Here they are represented as evil agencies, teaching men sorceries and thereby supporting or rather inspiring the idolatry. The tradition here set forth is of course

(10) In that time the ministering angels brought charges (against them) before the Holy One, blessed be He, saying before him: "Master of the World! What hast thou to do with the children of men? As it is written (Ps. viii. 4) 'What is man (Enosh) that thou art mindful of him?' 'Mah Adam' is not written here, but 'Mah Enosh', for he (Enosh) is the head of the idol worshippers. (11) Why hast thou left

a direct descendant of that which has found expression in the pseudepigraphal writings, esp. 1 *En.* vi, vii, viii: Šemiazaz and Asael among other leaders of the fallen angels who corrupted mankind, vii. 1: "they began to...defile themselves with them, and they taught them charms and enchantments". viii. 1: "Azazel taught men...and made known to them the metals (cf. 'gold, silver etc.' here)...and all kinds of costly stones (cf. here)... (3) Semjaza taught enchantments... Baraqijal astrology. Kokabel the constellations,... Shamsiel the signs of the sun, Sariel the course of the moon", vide Charles, *ad loca.* Add *Jub.* iv. 22, v. 1, xi. 4 seqq.: "they made for themselves molten images, and they worshipped each their idol... and malignant spirits assisted and seduced them into committing transgression and uncleanness". 2 *En.* vii, xviii. 2 *En.* xviii. 4 is of special interest in the present connection, since it shows that already at an early time a tradition obtained that had fixed the number of these angels as three—as against the tradition of the passages quoted in 1 *En.* representing them as a large number: "and of them (*Grigori* = Watchers) there went three to the earth from the Throne of God to the place Ermon. And they entered into dealings etc." Later the number is further reduced to two, so always in *Zohar*; cf. on vs. 6 of ch. iv. Cf. *Midrash Peḡirath Moshe*, BH. i. 129: "the angels 'Azza and 'Azza'el went down from the heavens and became corrupt in their ways".

(10) At that time the ministering angels brought charges against man before God etc. 'What is man etc.' This verse, Ps. viii. 4, is traditionally made to express the animosity of the angels against man, and rather suitably. See *Tanchuma*, Par. *Bechuggothai* (Lev. xxvi); *Gen. R.* viii. 5 (in connection with the creations of man); *P. R. 'El.* xiii uses the similar passage Ps. cxliv. 3, 4 ("The ministering angels said before the Holy One, blessed be He: 'Lord of all the World, what is man that thou takest knowledge of him or the son of man that thou takest account of him'"). Cf. *Jerachmeel*, xxii. 1, and *Ma'yan Chokma*, BH. i. 58. But the form of accusation here recorded is also, in particular, attributed to the angels 'Azza and 'Azrael. Thus in *Zohar* several times, 'Azza and 'Azrael are said to have used this argument when opposing man's Creation, *Zohar*, i. 23 a, and another quotation in YR, i. 60 a. A strange similarity with the present chapter is exhibited by the fragment quoted in *Yalqut* on Gen. vi. 2 (from *Midrash Abkir*): "the disciples of R. Yoseph asked him: what is 'Azrael? he answered them: as soon as the generation of the flood (cf. ch. iv) stood up and worshipped idols (cf. the present chapter) the Holy One was sorely grieved. Then forthwith came the two angels *Shemchazai* and 'Azza'el and said before him: Master of the World! Did we not say before thee when thou didst create thy world: what is man that thou art mindful of him. He answered them: if ye were to go down to earth, the evil impulse would get power over you more than over man... Let us go down.... He said: Go down and dwell with them. As soon as they were on earth, they corrupted their ways with the daughters of men....". In that passage almost all the different statements about 'Azza and 'Azrael are woven together. Cf. on ch. iv. 6.

(11) Why hast thou left the highest of the high heavens etc. This presupposes that when *Shekina* was dwelling on earth it was absent from the 'Araboth *Raqia'*.

ADE:

the highest of the high heavens, the abode of thy glorious Name, and the high and exalted Throne in 'Araboth on high

B:

the 'Araboth Raqia' which are full of thy glory, mighty and high alike, and the high and exalted Throne in the 'Araboth Raqia' in the highest

CL:

the highest of the high heavens which are filled with the majesty of thy glory and are high, uplifted and exalted, and the high and exalted Throne in the Raqia' 'Araboth on high

and art gone and dwellest with the children of men who worship idols and equal thee to the idols. (12) ¹⁸Now thou art on earth and the idols likewise. What hast thou to do with ¹⁹the inhabitants of the earth ¹⁹who worship idols? ¹⁸ (13) Forthwith the Holy One, blessed be He, lifted up His *Shekina* from the earth, from their midst²⁰.

(14) In that moment came the ministering angels, the troops of hosts and the armies of 'Araboth in thousand camps and ten thousand hosts: they fetched trumpets and took the horns in their hands and surrounded the *Shekina* with all kinds of songs. ²¹And He ascended²¹ to the high heavens, as it is written (Ps. xlvii. 5): "God is gone up with a shout, the Lord with the sound of a trumpet".

18-18 B om. C: 'now that thou art on earth, thou art become in condition like as the inhabitants of the earth who worship idols' 19-19 L: 'those who go down to earth and are idol-worshippers' 20 C adds: 'and the *Shekina* ascended to heaven' 21-21 BCDEL om.

(13) Forthwith the Holy One... lifted up His *Shekina* from the earth... and he ascended to the high heavens. 'The Holy One' and '*Shekina*' are here practically synonymous. The idolatry is one of the main causes of the disappearance of the *Shekina* from on earth. Cf. *Sifre* (ed. Friedmann), 104 a, *Mekilta*, 72 a, *Tanchuma Lev.*, *Par. behar* (Schechter, *Aspects*, p. 223, Abelson, *op. cit.* p. 101). The idol erected in the Holy of Holies by Manasse, by its presence, its "face" drives out the *Shekina* from the Temple. The *Shekina* and the idols cannot remain in the same place: this is the burden of the remonstrances of the angels acc. to vs. 12. Cf. *Cant. R.* vi, *Num. R.* xii. 5, already referred to, note on vs. 1. Cf. also *Lam. R. Prohem.* 24 (in connection with the destruction of the Temple): "I have no abode on earth. I will remove my *Shekina* from earth and take it up to my former place".

(14) And he ascended to the high heavens etc. Already acc. to ch. xlviii c the narrative about *Shekina*'s removal from on earth is connected with the taking up of Enoch as can be seen from the parallel to the present chapter found *ib.* (i.e. ch. xlviii c) vs. 1: "When I beheld the men of the generation of the flood (ctr. here and cf. ch. iv) that they were corrupt, then I went and removed my *Shekina* from among them. And I lifted it up on high with the sound of a trumpet and with a shout as it is written (Ps. xlvii. 5) 'God is gone up with a shout etc.'"

CHAPTER VI

Enoch lifted up to heaven together with the Shekina.

Angels' protests answered by God

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) When the Holy One, blessed be He, desired¹ to lift me up on high, He first sent 'Anaphiel H (H = Tetragrammaton), the Prince, [and he took me from their midst in their sight and carried² me³ in great glory³ upon^{3a} a fiery chariot with fiery horses, servants⁴ of glory.] And he lifted me up to the high heavens together with the *Shekina*.

1 C: 'sought me' 2 so BCDL. A: 'led me' 3-3 BCL: 'on a great kerub' 3a BCL: 'in' 4 BDEL: 'and a servant' C: 'and with songs'

Chh. vi seqq. The translation of Enoch. On the affinities of the representations of Enoch's translation in 1 *En.*, 2 *En.*, and 3 *En.* vide Introduction, 7 (a) and (b).

Ch. vi. According to this chapter Enoch was translated together with the *Shekina*. [The *Shekina* was removed from earth on account of the idolatry of men.] The chapter is a sequel to the antecedent chapter; cf. note *ib.* intr. As was pointed out above, note on v. 14, the connection of the removal of *Shekina* with the translation of Enoch is also attested in the 2nd Enoch-Metatron piece, ch. xlviii c 1. There, as in ch. vii, it is referred to the sins of the generation of the Flood (ch. iv). Besides, the present chapter contains a new specimen of angelic accusation against man before God or of protest against privileges awarded to man: in this case Enoch's ascension to the high heavens.

(1) When the Holy One . . . desired to lift me up . . . He first sent 'Anaphiel H. For 'Anaphiel cf. ch. xviii. 18 and note. Acc. to *Hek. R.* xxii Anaphiel is the highest of the angels, "higher than the Prince of the Presence and greater than he". Ch. xvi here (acc. to reading of BDL) he is the angel sent to 'punish' Metatron with strokes of lashes of fire. The meaning of the name: 'Branch of God' is explained ch. xviii *ib.* He represents the overarching majesty and sovereignty of God in the heavens, ramifying through all the firmaments. Hence he is also conceived of as protecting guide. The Tetragrammaton (H) is contained in his name, cf. on chh. x. 3, xxx. 1; cf. *Hek. R.* xxi. YR. i. 5 a (from *Sōdē Rāzā*): "the ring with the seal of heaven and earth (cf. on ch. xlviii d 5) are entrusted to him and all in heaven and earth kneel down and prostrate themselves before him".

upon a fiery chariot with fiery horses. The biblical narrative of Elijah's ascension to heaven has been suggestive here. In mystical literature the biblical traits ascribed to Elijah are referred to Enoch and vice versa: they are regarded as belonging to the same category of saintly men, since they were both removed from earth in their lifetime. "1 *En.* 70 describes Enoch's final translation in terms of that of Elijah" (CHARLES, 1 *En.* xlix). (Cf. 1 *En.* lxxxix. 52, xciii. 8, 4 *Ez.* vi. 26, note (m) in Box, *Esra-Ap.* pp. 77 seq.) In later mysticism Elijah is often identified with the 'twin-brother of Metatron', *Sandalphon*, in explicit analogy with the identification of Enoch with Metatron (YR. i. 54 b, 57 b, 58 a; cf. Introduction).

(2) As soon as I reached the high heavens, the Holy *Chayyoth*, the 'Ophannim, the *Seraphim*, the *Kerubim*, the Wheels of the *Merkaba* (the *Galgallim*), and the ministers of ⁵the consuming fire⁵, perceiving my smell⁶ from a distance⁷ of 365,000^{7a} myriads of parasangs, said:

A:

"What smell of one born of woman and what taste of a ⁸white drop⁸ (is this) that ascends on high, and (lo, he is merely) a gnat among those who 'divide flames (of fire)'?"

B:

"What is one born of woman between (among) us? The taste of a ⁸white drop⁸ which ascends to the high heavens to minister⁹ among those who 'divide flames of fire'?"

CDEL:

"What smell¹⁰ of ¹¹a woman-born is this and what taste of a ⁸white drop⁸ that ascends to the high heavens to minister ¹²among dividers¹² of flames."

5-5 C: 'the fire which consumeth fire' L: 'the heavenly fire' 'the fire above'
6 BE: 'spirit' ('*ruhi*' for '*rehi*') 7 So BCDEL. A: 'among smells'
7a L: '5360' YR. i. 55 b: '5380' and om. 'myriads' 8-8 lit. 'drop of semen'
9 read *pi'el* instead of *hithpa'el*. 10 E: 'spirit' 11 L ins. 'a drop of'
12-12 C: 'here and in (those) cut of flames' L: 'between hedges of flames'

(2) the Holy *Chayyoth*, the 'Ophannim, the *Seraphim*, the *Kerubim*, the Wheels of the *Merkaba* and the ministers of the consuming fire. This is evidently intended as an enumeration of the highest classes of angels. The classes here mentioned are the five classes of *Merkaba*-angels of the angelological section, chh. xxi, xxv, xxvi, xxii and xix resp. The 'ministers of the consuming fire' may refer to the ministering angels in general—whose substance is fire—or to the angels in charge of the fire issuing forth from under the Throne (cf. on ch. xxxiii. 4). For the present enumeration cf. the parallel in the following chapter. All these highest classes of angels are here represented as protesting against the privilege awarded to the man Enoch of ascending to the high heavens. Cf. *P. R. 'El. passim*. Cf. also *Deut. R.* xi. 4 (the *Galgallim* of the *Merkaba* and the flaming *Seraphim* praise God for not regarding persons—with reference to Moses).

perceiving my smell etc. For the expression cf. *Gen. R.* xxxiv. 10: "God perceived the smell of Abraham, the Patriarch, ascending from the furnace... of *Chananya*, *Misael* and *Azaria*... the smell of the generation of the religious persecution". There it equals 'foresaw'. Here it perhaps denotes the idea that any intrusion of a lower, unclean element or being into the higher heavens is immediately sensed and guarded against.

What smell of a woman-born... (ACDEL), what is a woman-born between (among) us (B)... Cf. *TB. Shabbat*, 88b: "R. Yehoshua ben Lewi said: in the hour when Moses ascended on high, the ministering angels said before the Holy One, blessed be He: Master of the World, what is a woman-born among us", i.e. 'what has he to do here?' The expressions 'one born of woman' and 'taste of a drop of *semen*' are of course used in a contemptuous sense, denoting the extreme insignificance of man in the eyes of the high angels. what taste of a white drop (A) etc. There is a play here on the two-fold meaning of the word *ta'am*, viz. 'taste' and 'reason, ground' ('what is the reason that one conceived of a white drop should ascend...') those who 'divide flames of fire.' The expression is deduced from *Ps.* xxix. 7 and denotes the angel-princes. In *Alph. R. 'Aqiba BH.* iii. 45, it is used of the 'Voice'.

(3) The Holy One, blessed be He, answered and spake unto them: "My servants, ¹³my hosts¹³, my *Kerubim*, my '*Ophannim*, my *Seraphim*! Be ye not displeased on account of this! Since all the children of men have denied me ¹⁴and my great Kingdom and are gone worshipping¹⁴ idols, I have removed my *Shekina* from among them and have lifted it up on high. ¹⁵But this one whom I have taken from among them is an ELECT ONE among (the inhabitants of) the world ¹⁶and he is equal to all of them in faith¹⁶, righteousness and perfection of deed¹⁷ and ¹⁸I have taken him for (as) a tribute from¹⁹ my world¹⁸ under all the heavens¹⁵".

13-13 so BCDELZ. A: 'host of (my Kerubim)' 14-14 L: 'and worship'
 15-15 L: 'but this one (only) have I taken from my whole world under all the heavens'
 16-16 BC om. 17 so DE. A: 'beauty, form (*tabnith*)'
 18-18 S, YR. i. 55 b (*Pirge Hekaloth*): 'he is the (only) reward that I have received for all my labour under all the heavens'

(3) My servants, my hosts, my *Kerubim* etc. Cf. ch. i. 8. A close parallel is the answer attributed to God acc. to *Hek. R.* xxix. 2 (on the protest of the angels against the revelation of the 'secret' to the *Yorede Merkaba*): "My ministering angels, my servants, be ye not displeased on account of this etc."

he is equal to all of them in faith, righteousness and perfection of deed states the justification for the translation of Enoch: his merits, his perfection. This is not explicit in ch. iv, but might have been understood. Enoch is worth as much as the whole generation.

I have taken him for a tribute (or: he is my reward, remuneration; YR.). There is a covert allusion here to the destruction of the rest of the generation, hence to the Flood: *Enoch is the only one preserved from the ruin of the first generation, God's only remuneration for all his labour*. Also in the tradition represented by chh. v, vi, Enoch was connected with the Flood (as is explicitly stated in the parallel ch. xlviii c 1, several times referred to). The original tradition seems to have been somewhat like this: Owing to the general downfall of the first generation, caused by the idolatry arising among men with Enosh and his followers—an idolatry inspired by the demons or fallen angels—*Shekina* was removed from earth, and on the removal of the *Shekina* followed the destruction of the entire race in the waters of the Flood. One righteous man, Enoch, was exempted from the general fate of his contemporaries: he was taken up to the heavens together with the *Shekina*.

The aspect in which Enoch's translation is seen here is his being the tribute from the first generation, God's remuneration—the Creation of the first generation had not been in vain. In ch. iv it is seen from the aspect of the function assigned to Enoch of being a witness before coming generations, in the world to come, to the sinfulness and corruption of the generation that was ultimately destroyed in the waters of the Flood.

CHAPTER VII¹*Enoch raised upon the wings of the Shekina to the place of the Throne, the Merkaba and the angelic hosts*

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

When the Holy One, blessed be He, took me away from the generation of the Flood, he lifted me on the wings of the wind of *Shekina* to the highest heaven and brought me into the great palaces of the '*Araboth Raqia*' on high, where are ²the glorious Throne of *Shekina*², the *Merkaba*³, the troops of anger, the armies of vehemence, the fiery *Shin'anim*⁴, the ⁵flaming *Kerubim*, and the burning '*Ophan-nim*', the flaming servants, the flashing *Chashmallim* and the lightening *Seraphim*⁵. And he placed me (there) to attend the Throne of Glory day after day.

¹ B places this chapter at the end of ch. xiv. ²⁻² BCL: 'the glory of Shekina'
³ B: 'the chariots of the mighty ones of anger' L: 'the chariots of the mighty ones'
 C: 'the great chariots of anger' ⁴ C: 'Accusers' 'Satans' ⁵⁻⁵ lit. 'the
Kerubim of firebrands' and the '*Ophanim* of (burning) coal and the servants of
 flame and the *Chashmallim* of spark and the *Seraphim* of lightning'

Ch. vii. Another short version of the translation of Enoch, connecting it with the generation of the Flood but also containing traces of its relation to the removal or lifting up of *Shekina* ('on the wings of the wind of the *Shekina*'). lifted me on the wings of the wind of *Shekina*. The wings of *Shekina*, a common metaphorical expression, often used as denoting proselytism; cf. Abelson, *op. cit.* p. 90. Here it rather expresses the protection given to Enoch from the Godhead (against the fury of the angels?), *TB. Shabbat*, 88 b: "when Moses was to ascend on high... God spread over him of the splendour of His *Shekina*, that the angels might not be able to burn him". For 'wings of the wind' cf. *chh.* xxxiv. 1, xxxvii. 2. Cf. 2 *En.* iii. 1 (Enoch raised upon the wings of the angels, upon the clouds etc.). Acc. to *Mysteries of St John and the Holy Virgin*, 6 b, St John is raised "on the wing of the light of the Cherub". Cf. ch. vi. 1 (BCL). where are the... Throne... the *Merkaba*, the troops of anger etc., the most prominent of the glories contained in the highest of the heavens, the '*Araboth Raqia*'. Cf. *Mass. Hek.* v ("in the seventh Hall of '*Araboth Raqia*' are the Throne... the Chariots of the *Kerubim*... *Seraphim*, '*Ophanim*, *Chayyoth*, the *Chashmallim* of splendour and majesty, etc."). A parallel is ch. xlviii c 4, but notice the difference: there Enoch-Metatron is represented as appointed over and a minister of all the different classes of high angels, as well as of the Throne. Here he is represented as attendant of the Throne only (cf. however, x. 3). See ch. xv. 1. the fiery *Shin'anim*. The name *Shin'anim* is deduced from vs. 18 of the mystical Ps. lxxviii. The *Shin'anim* as a class of angels occurs frequently in enumerations of angelic orders.

the flaming servants. Cf. on ch. vi. 2.

the flashing *Chashmallim*. One of the ten classes of angels, in common with the *Shin'anim*. Cf. also ch. xlviii c and *Mass. Hek.* v, referred to above. The name is derived from the *Chasmal* of Ezek. i. 4. Cf. on ch. xxxiv. 1. The *Chashmallim* are in *Chag.* 13 b explained as "the angels (*Chayyoth*) who are sometimes silent

CHAPTER VIII

*The gates (of the treasures of heaven)
opened to Metatron*

R. Ishmael said: Metatron, the Prince of the Presence, said to me:

(1) Before He appointed me to attend the Throne of Glory, the Holy One, blessed be He, opened to me

three hundred thousand gates of Understanding

three hundred thousand gates of Subtlety

three hundred thousand gates of Life

1-1 Following is the order of the attributes in the other readings:

B (10): wisdom... understanding... life... subtlety... grace and loving-kindness... love... Tora... maintenance... meekness... fear of sin

C (12): loving-kindness... understanding... life... subtlety... Shekina... power

(*chash*) and sometimes speak (*mallel*): they are silent when the Word emanates from the Holy One, blessed be He, they speak when He has ceased speaking."

to attend the Throne of Glory day after day. This is a traditional function of Metatron, the Prince of the Presence. Cf. ch. xlviii c 4. *Hek. R.* xi: "when the angel of the Presence enters to exalt and magnify the Throne of Glory and to prepare the seat for the Mighty One in Jacob". *Hek. Zot. (Bodl. MICH. 9 fol. 67 b)*: "Metatron is the president of the Divine Thrones of Glory (of Dan. vii. 9)". But Metatron has also a Throne of his own: chh. x. 1-3, xvi. 1, 2, xlviii c 8.

Ch. viii. (1) The Holy One, blessed be He, opened to me three hundred thousand gates of Understanding etc. The gates are the gates of the treasures of the heavens ('Araboth). Metatron is appointed over the stores of 'Araboth acc. to ch. x. 6, xlviii c 3. The treasures are the treasures of wisdom, understanding etc. i.e. the attributes by which the world is sustained. The abstract qualities here enumerated are to a large extent identical with those named as the agencies by which God created the world in, e.g. *TB. Chag. 12 a* ("wisdom, understanding, knowledge, strength, might etc."), *Ab. R. Nathan*, xxvii, xliii. Cf. ch. xli. 3: "wisdom, understanding, knowledge etc. by which the world is sustained"; and *Alph. R. 'Aqiba*, BH. iii. 20: "God supplies the world day by day with gifts, without which the world could not subsist for a single day: spirit and soul, knowledge and wisdom and subtlety, counsel and might, and the different senses". The idea is, that the abstract qualities on which the world is founded and by which it is sustained emanate from God. Yet we are here in no way nearer the conception of the 'Ten Sefirot' than in the passages cited from *TB. Chag. 12 a* etc. For wisdom and understanding treasured in heaven cf. 4 *Ex. v. 9*, "then shall intelligence hide itself and wisdom withdraw to its chamber", where the essential idea of the present representation is already extant: wisdom and intelligence as at work in the world have their home in 'chambers' (i.e. in heaven) from where they have emanated and whither they return. Cf. also ch. xlviii d 2, and for the 'opening of the gates of the treasures' *Alph. R. 'Aqiba*, letter Aleph: "5000 gates of wisdom were opened to Moses on Sinai corresponding to the five books of the Law, and 8000 gates of understanding, corresponding to the eight prophets and 11,000 gates of knowledge corresponding to the eleven writings". three hundred thousand gates of Life. The 'treasures of life' in heaven are frequently referred to. Cf. e.g. *Chag. 12 b*: "in 'Araboth Raqia' are... the treasures of life..."; ch. x. 6 here.

three hundred thousand gates of 'grace and loving-kindness'
 three hundred thousand gates of love
 three hundred thousand gates of Tora
 three hundred thousand gates of meekness
 three hundred thousand gates of maintenance
 three hundred thousand gates of mercy
 three hundred thousand gates of fear of heaven¹.

(2) In that hour the Holy One, blessed be He, added in me wisdom unto wisdom, understanding unto understanding, subtlety unto subtlety, knowledge unto knowledge, mercy unto mercy, instruction unto instruction, love unto love, loving-kindness unto loving-kindness,

and might... grace and loving-kindness... love... instruction (Tora)... maintenance... fear of sin... meekness

E (12): wisdom... understanding... subtlety... life... peace... Shekina... power and might... strength... grace and loving-kindness... love... meekness... fear of sin

YR. i. 54 b (12): wisdom... understanding... life... subtlety... Shekina... power and might... grace and loving-kindness... love... Tora... maintenance... meekness... fear of sin

L (12): wisdom... understanding... life... subtlety... Shekina... might... grace and loving-kindness... love... Tora... maintenance... meekness... fear of sin

D (15): wisdom... understanding... life... subtlety... peace... Shekina... power and might... strength... grace and loving-kindness... love... Tora... maintenance... mercy... meekness... fear of heaven

three hundred thousand gates of Tora. Cf. *Alph. R. 'Aqiba, BH. iii. 43, 44*: "The Holy One, blessed be He, appointed Moses over all Israel, and over all the treasures of Tora, and over all treasures of wisdom, and over all treasures of understanding". It is interesting to note, that acc. to this conception there is a special treasury of *Tora* (= the Celestial Tora?) besides the treasures of wisdom and of understanding. Acc. to another conception the Tora is itself formed of the elements of wisdom and understanding, the 'secrets of the treasures'; cf. on ch. xlviii D 2, 3.

gates of maintenance (*Parnasa*). Even the maintenance and sustenance of the needs of the world has its source in heaven. Cf. *Alph. R. 'Aqiba*, letter *Zain*: "*Zain*, that is the Name of the Holy One, blessed be He, for he feeds and maintains (*mepharnes*) all his creatures, day after day, as it is said (Ps. civ. 28): 'thou openest thine hand, they are filled with good'". From the 'maintenance' *Parnasa*, stored in heaven, the seventy princes of kingdoms take and "throw down to the nations of the world their maintenance" acc. to the *Lesser YR.*, *sub voce Nedibim* et freq. "*Metatron distributes Parnasa among all the companies of angels*" (*YR. i. 56*, quoting *Pardes*).

The opening the treasures or gates to Metatron presumably connotes not only the bestowal upon him of their contents (as in vs. 2) but also that they are put in his charge and to his distribution. As Prince over the Princes he has to distribute their contents among the angels, and perhaps also as functional Prince of the World to the earth and nations.

added in me wisdom unto wisdom etc. The attributes here enumerated are on the whole identical with those of vs. 1. Hence the idea probably is that the contents of the opened treasures were conferred upon Metatron. more than all the children of heaven. The unique position of Metatron is here emphasized.

goodness unto goodness, meekness unto meekness, power unto power, strength unto strength, might unto might, brilliance unto brilliance, beauty unto beauty, splendour unto splendour,² and I was honoured and adorned with all these good and praiseworthy things more than all the children of heaven.

CHAPTER IX

Enoch receives blessings from the Most High and is adorned with angelic attributes

R. Ishmael said: Metatron, the Prince of the Presence, said to me:

(1) After all these things the Holy One, blessed be He, put His hand upon me and blessed me with 5360¹ blessings. (2) And I was raised² and enlarged to the size of the length and width of the world. (3) And He caused 72 wings to grow on me, 36 on each side. And

² C adds: 'and honour unto all honour, majesty unto all majesty, glory unto all glory and greatness unto all greatness'

Ch. ix. 1 so BCL. A: 'one thousand, 305 thousands' DE: 'one thousand, 365 thousand' ² BC: 'elated'

Ch. ix. The subject of the present chapter is the metamorphosis through which Enoch was made into a high angel. This metamorphosis is viewed from another aspect in ch. xv. Here the different angelic attributes conferred on Metatron are: immense height of stature, wings, eyes covering the whole of his body, and light.

(1) blessed me with 5360 blessings. This connects the present chapter with its antecedent: the blessings are presumably conceived of as contained in the heavenly treasures, opened to Enoch and the contents of which are bestowed upon him. The treasures of blessing(s) are mentioned as contained in the 'Araboth, e.g. TB. Chag. 12 b. The number 5360 is intended to reflect the number 365.

(2) I was raised to the size of the length... of the world. The immense size of the high angels is a constantly reiterated theme. Cf. ch. xxi. 1: "each of the Chayyoth is as the space of the world" (cf. Chag. 13 a), chh. xxii. 3, xxv. 4, xxvi. 4. The idea prevails: the greater an angel is (in rank) the larger his size. Cf. the versions of the *Rev. of Moses* (*Ma'yan Chokma*, BH. i. 58, etc., YR. ii. 66 b-67 b, Zohar, ii. 58 a): "Hadarniel is greater than Qemuel by 60 myriads of parasangs, Sandalfon is higher of stature than Hadarniel by 500 years' journeying distance". Thus, in the other Enoch-Metatron piece of the present book, ch. xlviii c 5, the size of Metatron is seen from this comparative aspect: "I made him higher of stature than all. The height of his stature surpasses all others by ten thousand parasangs". The similar tradition preserved in Zohar, e.g. i. 21 a: "Metatron is glorified more than the highest angels (the Chayyoth) and higher than these by 500 parasangs".

(3) 72 wings. The number seventy-two is frequently used in the present book. It generally seems to imply reference to the rule of the world: the seventy-two princes of kingdoms, cf. note on ch. xvii. 8. Metatron is in the present section the ruler of the seventy-two princes of kingdoms: chh. x. 3, xiv. 1, xvi. 1 and 2. It is possible that the seventy-two wings here—extending over the whole world

each wing³ was as the whole world³. (4) And He fixed on me 365 eyes: each eye was as the great luminary. (5) And He left no kind of splendour, brilliance, radiance, beauty ⁴in (of) all the lights of the universe⁴ that He did not fix on me.

3-3 so *BCDEL*. *A*: 'filled the world'
the universe'

4-4 so *BCL*. *A*: 'praise, lights of

—symbolize Metatron's rulership over these. 36 on each side may be compared with ch. xvi. 1: 'the princes of kingdoms were standing... on my right hand and on my left'.

(4) 365 eyes. For the number 365 (= the number of days of the solar year) as mystical number cf. chh. v. 4, xxi. 3 ('the size of each wing of the Chayyoth as 365 wings'), xxxiii. 4 ('the breadth of each of the fiery rivers is 365 thousand parasangs'). The body of an angel-prince covered with eyes (round about) is a regular feature of the descriptions of angels: cf. chh. xxii. 8 ('his body is full of eyes', of Kerubiel), xxv. 2, where the number of eyes assigned to the angel-prince in question ('*Ophanniel*') is devised on the basis of calendary calculations ('8466 eyes corresponding to the number of hours of a year'), xxvi. 6. Cf. notes *ad loca*. each eye was as the great luminary. An identical statement about the eyes of Seraphiel, ch. xxvi. 6.

(5) fixed on me all kinds of splendour, brilliance etc. of the lights (luminaries) of the world. Cf. in the angelological descriptions: chh. xxii. 4, xxv. 6, xxvi. 2, 4. Cf. also *Mass. Hek.* iv: "On every door in the Hall(s) of 'Araboth there are fixed 365 thousand myriads of different kinds of lights like unto the great luminary'".

The repeated references by comparisons to the 'world' in the present chapter, vss. 2, 3, 5, and the possible allusion to the seventy-two princes of kingdoms or to the rule of the world in vs. 3 (cf. above) might conceivably be traces, if not intentional symbolical expressions, of Metatron's function as the Prince of the World. Vs. 2, 'I was raised to the size of the world', might also be a remnant of Metatron's connection with the speculations on the Primordial Man, the '*Adam Qadmon*'. Acc. to *Chag.* 12 a the first Adam reached from one end of the world to the other. This connection, which like the identification of Metatron with the Prince of the World (existing from the Days of Creation), was perhaps suspended in consequence of Metatron's identification with Enoch, reappears in later cabbalistic literature: the statement that Enoch-Metatron is the *Neshāmā* of the first Adam, who left him before the sin of Adam (just as the universal size of the first Adam is represented as diminished through Adam's sin: *TB. Chag.* 12 a) is frequent. The difficulties arising from Metatron's identification with Enoch were now overcome through the new conceptions brought in with the doctrine of metempsychosis and related speculations.

CHAPTER X

God places Metatron on a throne at the door of the seventh Hall and announces through the Herald, that Metatron henceforth is God's representative and ruler over all the princes of kingdoms and all the children of heaven, save the eight high princes called YHWH by the name of their King

R. Ishmael said: Metatron, the Prince of the Presence, said to me:

(1) All these things the Holy One, blessed be He, made for me:
¹He made me¹ a Throne, similar to the ²Throne of Glory. And He spread over me ³a curtain of splendour and brilliant appearance, of

1-1 so ins. DE.

2 C ins. 'make of the'

3-3 BCL om.

Ch. x. This chapter presents Metatron as adorned with special attributes, distinguishing him from the other angels: a throne and a curtain, both reflections of the Throne and Curtain of the Godhead. He is furthermore explicitly pronounced a ruler over the princes of kingdoms and the children of heaven, a rulership defined as a vice-regency for the Holy One. The chapter really forms an explanation of the names 'Metatron' and 'Prince of the Presence'.

(1) He made me a Throne. This is *in itself* no feature confined to the descriptions of Metatron. Instances are frequent of thrones assigned to angels or meritorious dead. 1 *En.* cviii. 12 ("I will bring forth in shining light [cf. here] those who have loved My holy name, and I will seat each one on the throne of his honour"). Cf. CHARLES, *ad locum*, Rev. iv. 4. In the 'Apocalyptic Fragment' preserved e.g. in *BH.* v. 167-169 David has a "Throne of fire" erected for him over against the Throne of His Creator. Acc. to *Gedullah Moshe* Moses sees in the seventh heaven "70 thrones fixed, of precious stones, pearls, gold etc.... there are thrones for the scholars of the Law, for the *chassids*, the just etc. of different splendour acc. to merit of the occupants". And acc. to *Alph. R.* 'Aqiba, *BH.* iii. 34, the righteous in the world to come will each be seated before the Glory of the Holy One, on a throne of gold "like a king". For thrones assigned to angels cf. *Mass. Hek.* vii, acc. to which seven angels as court-officers are sitting upon seven thrones before the Curtain. Cf. Rev. xx. 4 ("I saw thrones, and they sat upon them", acc. to Bousset, *Comm. ad loc.* probably Christ and the angels as 'Gerichtsbeisassen'). The view predominant in Rabbinic seems to be that 'there is no sitting in heaven': *TB. Chag.* 15 a. Assigning a seat or a throne to any angel-prince or to any one beside the Holy One, might endanger the recognition of the absolute sovereignty and unity of the Godhead. Cf. ch. xvi. Acc. to the passage *Chag.* 15 a, just referred to, the privilege of 'sitting' was accorded to Metatron in his character as 'scribe': he was allowed "to sit and write down the merits of Israel". Here, no doubt, the assigning a Throne to Metatron is meant to denote his unique position: his character of God's representative or vice-regent. This is borne out by vss. 3 and 4 and also by what immediately follows: the Throne is similar to, *mē'en*, that is 'the counterpart of', the Throne of Glory. The character of Metatron's throne as an image of or counterpart of God's Throne is particularly emphasized by the additional feature: Metatron receives a curtain similar to the Curtain of the Throne of Glory. For the conception of the Curtain cf. note on ch. xiv. 1.

beauty, grace⁴ and mercy, similar to⁵ the curtain of the Throne of Glory; and on it were fixed all ⁵kinds of lights in the universe⁵.

(2) And He placed it at the door of the Seventh Hall and seated me on it.

(3) And the herald went forth ⁶ into every heaven, saying: ⁷This is⁷ Metatron, ⁸my servant⁸. I have made him into a prince and a ruler over all the princes of my kingdoms ⁹ and over all the children

4 DE om. 5-5 C: 'splendour and brilliance from all lights' cf. ch. ix. 4.
6 ABD ins. 'concerning me' 7-7 so C. 8-8 C om. 9 L ins. the gloss: 'the angels'

The Curtain regularly represents the recording of the Divine decrees with regard to the world, the secrets of the world's creation and sustenance, etc., in short the innermost Divine Secrets; cf. note referred to.

(2) He placed it at the door of the Seventh Hall and seated me on it. This is an often-repeated statement. It is in ch. xlviii c 8 made to denote his function as judge and ruler over the princes and the children of heaven, as even here, acc. to verses following. In *Rev. Moses* (YR. ii. 66 b, *Siuni*, 93 c d, Gaster, *RAS's Journal*, 1893) it is said: "Metatron, Prince of the Presence, stands before the door of the Hall of the Holy One, blessed be He, and he sits and judges all the hosts on high like a judge standing before the King". The contradiction between the two statements 'sits' and 'stands' in this passage is probably due to the influence of the tradition mentioned above, that there is no sitting in heaven, responsible also for the account of Metatron being divested of his privilege of *yeshiba* in *Chag.* 15 a and ch. xvi here. On his throne at the door of the seventh Hall Metatron faces all the hosts of the heavens, over which he has jurisdiction.

(3) the herald went forth into every heaven. The conception of the heavenly herald announcing important decrees of the Most High in the heavens is attested also in *Hek. R.* vi (BH. iii. 88, as ch. iv): "the herald went forth from the '*Araboth Raqia'* etc." and in *Rev. Mos.*, *Yalqut Re'ubeni*, ii. 66 b: "*Galliṣur* stands behind the Curtain and gets knowledge of the decrees of the Holy One and heralds it. . . and the herald commits it to Elijah and Elijah stands as herald on the mount Horeb". This is Metatron, my servant. HERE THEN IS THE POINT—in the course of the exposition of the present chapter—WHERE ENOCH IS PROCLAIMED AS METATRON. It is significant that THIS PROCLAMATION IS MADE TO COINCIDE WITH HIS BEING SET UP ON A THRONE—as a ruler over the princes and angels. See Introduction, section 12 (5). my servant, i.e. 'Ebed. 'Ebed or God's Servant is an old-established name of Metatron. Cf. chh. xlviii c 1, xlviii d 1 (no. 17) and note. It seems to have been especially associated with the Prince of the Presence conception. Cf. *Hek. R.* xiii, BH. iii. 93: "*Surya*, 'Ebed, the Prince of the Presence" (*Surya* is a common equivalent of Metatron as the Prince of the Presence, cf. no. 84, ch. xlviii. 1). In *Hek. Zot.* (Bodl. mch. fol. 70a) the attribute 'my servant' is applied to Metatron as God's representative or vice-regent: "when I (the Holy One) leave the Throne of Glory to go down among the children of men". In *Hek. R. BH.* iii. 104, Metatron is called "'Ebed-YHWH, long-suffering and of great mercy". It is probable that the "'Ebed" is derived from the picture of God's servant in Is. xlix. 1, etc.

I have made him into a prince and a ruler over all the princes of my kingdoms (= my princes of kingdoms). Here, as in ch. xvi. 1, 2, Metatron is explicitly stated to have special authority over the princes of kingdoms. This is a feature in the Prince of the World tradition: ch. xxx. 2. In the shorter Enoch-Metatron piece, ch. xlviii c, vs. 9, Metatron's character of ruler over the princes of kingdoms and thereby as functional Prince of the World is better preserved than here: he is there depicted as ruler over the nations of the world 'who smites kings

of heaven, *except the eight great princes, the honoured and revered ones who are called* ¹⁰YHWH, *by the name of their King*¹⁰. (4) And every angel ¹¹and every prince¹¹ who has a word to speak ¹²in my presence (before me)¹² shall go into his presence (before him) and shall speak to him (instead). (5) ¹³And every command that he utters to you¹³ in my name do ye observe and fulfil. For the Prince of Wisdom and the Prince of Understanding ¹⁴have I committed to him¹⁴ to instruct him in the wisdom of heavenly things and of earthly

10-10 so with *BCDL(E)*. *A*: 'by the name of H their King' *E*: 'H by the name of the World' (corrupt for: 'H, by the name of the King of the World?') 11-11 *D om.* 12-12 *BCL om.* 13-13 lit. 'every word that he shall speak to you' 14-14 so acc. to *BCL*. *BL* lit. 'I have committed him (sing. = the Prince of Wisdom and of Understanding)' *C*: 'I have committed them (plur.)' *A*: 'are ministers to him'

and sets up kings'. Here his rulership is viewed mainly or exclusively from its celestial aspect, he is the ruler over the princes of kingdoms as inhabitants of the heavens, in common with all the children of heaven. Except the eight great princes... who are called YHWH by the name of their king. 'Called by the name YHWH' (cf. on chh. iii. 2, xxix. 1) probably means that these angels have the *Tetragrammaton* as part of their names, as '*Anaphiel H* of ch. vi. 1, the higher ones of the angels enumerated ch. xviii, and the Merkaba princes chh. xix, xx, xxii, xxv, xxvi, xxvii. Which these angels are who are exempt from the jurisdiction of Metatron is not stated here. One might from ch. vi. 1 conjecture that '*Anaphiel* was regarded as one of them. A parallel can be brought from *Hek. R.* xxii, *BH.* iii. 99. This parallel is indeed so close that it can with some degree of certainty be assumed to represent the same tradition as the present passage. The guardians of the seventh Hall are enumerated—"and each of them, his name is called by the name of the King of the World"—(in the enumeration this statement is shown to signify the form of names of which the *Tetragrammaton* forms the latter part: *SSTIEL YHWH*, *N(ZURIEL YHWH, etc.)*. The greatest of them is '*Anaphiel H* (in whose charge the ring with the seal of heaven and earth is committed, cf. on vi. 1): "before him all on high kneel down, fall on their faces and pay homage to him when they see him. And those angels, standing before the Throne of Glory, who do not prostrate themselves before the Prince of the Presence, they prostrate themselves before '*Anaphiel YHWH*'. 'Those angels' are evidently the angels in *Hek. R.* made into 'the guardians of the Seventh Hall'. The names of these angels are only seven in the enumeration, but acc. to the general scheme of *Hek. R.* (see chh. xv, xvii, etc.) the number of the guardians of each Hall is 'eight': likewise in *Mass. Hek.* iv ("there are eight guardians of the door of each of the seven Halls"). Hence also *Hek. R.* xxii might originally have had: "eight great princes, called H". This clause is most probably additional here, cf. Introduction, section 8(u).

(4) Every angel... who has a word to speak in my presence, shall go ... to him. HERE THE EPITHET 'PRINCE OF THE PRESENCE' IS EXPLAINED. (5) And every command that he utters to you in my name do ye observe and fulfil. THIS IS CLEARLY A PROCLAMATION OF METATRON AS GOD'S VICE-REGENT. Ex. xxiii. 21 may have been suggestive (Ex. xxiii. 20-22 are traditionally referred to the Prince of the Presence): "Beware of him and provoke him not: obey his voice". Here Metatron's jurisdiction extends only over the angels, ctr. ch. xlviii c 9. But his connection with the affairs of the 'world' is implied by the following, for the Prince of Wisdom and the Prince of Understanding have I committed to him to instruct him in the wisdom of heavenly things and of earthly things. 'The Prince of Wisdom and Prince of Understanding':

things, in the wisdom of this world and of the world to come. (6) Moreover, I have set him over all the treasures of the palaces of 'Arabôth and over all the stores¹⁵ of life¹⁵ that¹⁶ I have^{16 17} in the high heavens.

CHAPTER XI

God reveals all mysteries and secrets to Metatron

R. Ishmael said: Metatron, the angel, the Prince of the Presence, said to me:

(1) ¹Henceforth the Holy One, blessed be He, revealed to me¹ all

15-15 *L* om. 16-16 *E*: 'are' 17 *B* ins. 'in my world'

Ch. xi. 1-1 *BCL*: 'the Holy One, blessed be He, revealed to me, the spring (well) of'

cf. ch. xlviii D 1 (no. 105) and 2 ('all the treasures of wisdom are committed in his hand'). The functions of the Prince of Wisdom are then naturally merged into the conception of Metatron: Metatron is the Prince of Wisdom. Cf. on ch. xviii. 11, 16. Metatron instructed in the 'secrets' is the subject of the following chapter. There it is God himself who instructs him. Cf. in 2 *En.* xxxiii. 11, 12: "two angels Ariukh and Pariukh appointed by God as *guardians of the Enoch-literature*".

(6) I have set him over all the treasures of... 'Araboth. Cf. ch. viii. Acc. to the present chapter Metatron's initiation in the wisdoms of heaven and earth and his disposal over the treasures is a necessary condition for (and corollary of) his office as God's representative. *Stores of Life*: ch. viii. 1, 4 *Ez.* viii. 54, *Alph. R.* 'Aqiba, *BH.* iii. 26, 44.

Ch. xi. That METATRON IS IN POSSESSION OF ALL SECRETS AND MYSTERIES is an essential feature of the traditions concerning him. Cf. the other Enoch-Metatron piece of the present book: ch. xlviii c 7 (and 4). He is called the 'Knower of Secrets' *ib.* and *Hek. R.* ("wise in the secrets and Master of the mysteries"). The same is implied in chh. viii, x. 5. As a 'knower of secrets' he is also the 'revealer of secrets'. This is the eighty-eighth of the names in ch. xlviii D 1 and the sixty-seventh in the treatise *Names of Metatron*, *Bodl. MICH.* 256, foll. 29 a-44 a. He is the Prince of Wisdom and the Prince of Understanding: ch. xlviii D 1 (105), 2, 6. He reveals the 'secret' to Moses: *ib.* 7. He is the guide and revealer of secrets to R. Ishmael acc. to the frame of the present book, to R. Ishmael and R. 'Aqiba (*e. a.*) acc. to *Hek. R.* (in the form of 'Surya'), *Hek. Zot.*, *Shi'ur Qoma*, the *Apocalyptic Fragment*, *BH.* v. 167-169, and in various scattered fragments (see Introduction). Also called 'guide of all treasures', e.g. *BH.* ii. 117. Besides it needs hardly to be pointed out that the revelation of secrets to Enoch and Enoch as possessor of and revealer of heavenly secrets is a prominent trait of the 1 and 2 *En.* Cf. also CHARLES, 1 *En.* xlix. 3, 4.

(1) Henceforth the Holy One... revealed to me. Acc. to vs. 5 of the preceding chapter the angel(s) called the Prince of Wisdom and Prince of Understanding are the instructors of Enoch-Metatron. Here it is the Holy One himself who reveals the secrets to him. An important parallel to this is found in 2 *En.* xxiii, xxiv. In ch. xxiii the angel *Vretil* tells Enoch of 'all the works of heaven and earth, etc. etc.', in ch. xxiv again it is God himself who reveals to Enoch 'the secrets of Creation'. The reason of the change is there to be seen in the explicit statement that these latter secrets are not even revealed to the angels and could therefore be handed over to Enoch only by God himself. It is probable that a similar idea has been at work here. It is at least certain that Metatron was thought to receive more

the mysteries of Tora and all the secrets of wisdom ²and all the depths of the Perfect Law²; ³and all living beings' thoughts of heart and all the secrets of the universe³ and all the secrets⁴ of Creation were revealed unto me even as they are revealed unto ⁵the Maker of Creation⁵.

(2) And I watched intently⁶ to behold ⁷the secrets of the depth and the wonderful mystery⁷.

⁹ABL:

Before a man did think ⁸in secret, I saw^{8a} (it) and before a man made a thing I beheld it. (3) And there was no thing on high nor in the depth of the world hidden from me.¹⁰

Before a man did think, I knew what was in his thought. (3) And there was no thing above on high nor below in the deep hidden from me.

9

2-2 so BEL (L om. 'Perfect') A: lacuna. C reads: 'all the secrets of understanding and all the depths of the mysteries of the Tora' 3-3 BCL om. 4 BC: 'orders' 5-5 C: 'the Creator of the work(s) of the Beginning' 6 lit. 'much' BCL om. DE: 'from that time onward' 7-7 perhaps to be emended with C: 'the deep secrets and the wonderful mysteries' 8 B ins. 'I knew, and before he did think' 8a L: 'I knew' and om. 'in secret' 9-9 DE corr. from 'before a man did think etc.' to the end of the chapter. 10 B adds: 'from the Creator of the World alone'

of the 'secrets' than the angels in general; cf. ch. viii. 2 end: 'I was honoured and adorned with all these... things more than all the children of heaven', referring *inter alia* to 'wisdom, understanding, knowledge'.

all the mysteries of Tora and all the secrets of wisdom and all the depths of the Perfect Law. The mysteries of the Tora is a technical term, denoting THE INNER ESSENCE OF WHICH THE TORAH ITSELF IS AN EXPRESSION, FORM, PHENOMENON. They are not to be defined as the sum of mystical interpretations of the Tora: the mystical interpretation aims at finding these secrets by the study of the Tora, in which they are embodied (cf. e.g. *Baraita of R. Meir*, *Pirke Ab.* vi: "Whosoever is busy in the Tora for its own sake... to him the mysteries of Tora are revealed"). They are in fact the 'mysteries of mysteries', the fundament not 'only' of the Tora but of the universe, of heaven and earth: cf. ch. xlviii D 8 and note *ad locum*. In the term are thus comprised also the following: the secrets of Wisdom and the depths of the Perfect Law and also the Secrets of Creation. See Introduction, section 14 (1). Cf. *Alph. R.* 'Aqiba, BH. iii. 43, 44, acc. to which God revealed to Moses (since Moses received the Tora on Sinai he was also thought to have received the 'Secrets' either directly from God or through Metatron; cf. ch. xlviii D 3, 7 seq.) 'the Tora... and opened to him the treasures of Wisdom, which the Holy One... revealed to him, that he might see by His Wisdom all the orders of Creation...' Perfect Law. The expression is derived from Ps. xix. 8. Cf. *Alph. R.* 'Aqiba, BH. iii. 14: "But for the Perfect Law (*Torā Temimā*) the whole world would not subsist" and *vice versa*.

all living beings' thoughts of heart... (2) Before a man did think, I knew, etc. (3) ...no thing... on high nor... in the deep hidden from me. Metatron seems here to be invested with the attribute of omniscience proper only to 'the Maker of the World'. All past, present and future events are recorded with God (on the Curtain cf. on ch. xlv. 1). These were also shown to Moses acc. to the passage *Alph. R.* 'Aqiba, BH. iii. 44, referred to above.

CHAPTER XII

God clothes Metatron in a garment of glory, puts a royal crown on his head and calls him "the Lesser YHWH"

R. Ishmael said: Metatron, the Prince of the Presence, said to me:

(1) By reason of the love with which the Holy One, blessed be He, loved me more than all the children of heaven, He made me a garment of glory¹ on which were fixed² all kinds of ³ lights, and He clad me ⁴in it⁴. (2) ⁵And He made me a robe of honour on which were fixed all kinds of beauty, splendour, brilliance and majesty ⁶⁵. (3) And he made me a royal crown in which were fixed forty-nine costly stones

1 so BCL. lit. 'highness' A corr. 2 so C. ABDEL om. 3 B ins. 'beauty, splendour and majesty and' 4-4 supplied from C. 5-5 DE om. 6 CL add: 'and wrapped me (in it)'

Ch. xii. Continued description of Enoch's exaltation, ending with the climax: ENOCH-METATRON CALLED THE LESSER YHWH. A very close parallel to this chapter is found in 2 En. xxi. 5-11, xxii. 5. Vide Introduction, section 7 (b). (1) The Holy One...made me a garment of glory. Cf. 2 En. xxii. 8 (lvi. 2): God bids Michael clothe Enoch with 'the raiment of glory'. [In early traditions the 'garment of glory' ('raiment of honour', etc.) represents the light-substance in which the inhabitants of the high heavens appear; the 'glory' is light, splendour, probably conceived of as a reflection, outflow of the Divine Glory, the Splendour of Shekina. The putting on 'the raiment of glory' is a necessary condition of entering the highest heavens, God's abode of light. Hence it is also a mark of the holy, celestial nature of its bearer.] Cf. how acc. to Asc. Is. ix. 2-11 (vii. 25) Isaiah can only ascend to the highest heaven after having received the garment of glory. 'Garments of glory' are designed for the righteous and elect: 1 En. lxii. 15, 16. Similarly Esdras ii. 39 ("those which are departed from the shadow of the world and have received glorious garments of the Lord"), explained ib. iv. 45 ("they that have put off the mortal clothing and put on the immortal"), 1 En. cviii. 12 (vide CHARLES' notes *ad loca cit.*), 2 Cor. v. 3 seq., Rev. iii. 5, iv. 4, vi. 11, vii. 9, 13, 14, Alph. R. 'Aqiba, BH. iii. 28 and 34 (the righteous will be sitting on thrones before the Glory in royal garments and royal crowns).

[The garment of glory and robe of honour is here assigned to Metatron as distinguished from the other angels: 'by reason of the love with which [He] loved me more than all the children of heaven'. The writer has Metatron's rulership, his vice-regency in view. THE GARMENT AND ROBE ASSIGNED TO HIM ARE TO BE UNDERSTOOD AS SYMBOLS OF HIS DERIVED KINGSHIP. This is apparent from the following context: Metatron crowned with a crown of kingship and especially by his pronouncement as the Lesser YHWH.] Acc. to Alpha Beta de Metatron (Add. 15299, fol. 81 b) Metatron "is clad in eight garments, made out of the splendour of Shekina (ib. 81 a: when the righteous parts from this world the Prince of the Presence conducts him to the Garden of Eden and there he clothes him in eight garments from the splendour of Shekina)". THE GARMENT(S) OF GLORY ARE A DISTINCTION ASSIGNED ALSO TO MESSIAH acc. to Pirke Mashiach, BH. iii. 73 ("God will clothe Messiah in splendour and majesty... and garments of glory").

(3) And he made me a royal crown. 'Crowns' often termed 'Crowns of Glory' are frequently, one might say regularly, ascribed to angel-princes. Cf. in

like unto⁷ the light of the globe of the sun. (4) For its splendour went forth⁸ in the four quarters of the 'Araboth Raqia', and in (through) the seven heavens, and in the four quarters of the world⁸. And⁹ he put it⁹ on my head.

(5) And¹⁰ He called me¹⁰ THE LESSER YHWH in the presence of all His¹¹ heavenly household; as it is written (Ex. xxiii. 21): "For my name is in him".

7-7 B: 'shining as'

8-8 B: 'from one end of the world to the other, and in the seven heavens and in the four quarters of the world'

9-9 lit. 'he wreathed it'

C: 'they put that crown'

10-10 BC: 'they called me (by the name of)'

11 BCL: 'the'

the present book chh. xvi. 1, 2 (princes of kingdoms), xvii. 8 (item), xviii. 1-22 (all the angels and princes); in the angelological section, the Merkaba-angels and the princes set over them: chh. xxi. 4, xxii. 5, 11, xxv. 6, xxvi. 7, 8, further xxxix. 2, xl. 2, xlviii c 4. The Divine Names, ch. xlviii B 1. Cf. Rev. iv. 4. The righteous are to receive crowns in the world to come or in the after-life, e.g. 2 Esdras ii. 45. Alph. R. 'Aqiba, BH. iii. 34, and *ib.* 36, God is represented as crowning the letters on the Merkaba with a crown of kingship and a crown of glory. In the present book 'the crown of kingship' is the special emblem of Metatron and of the seventy-two princes of kingdoms (whose ruler he is): ch. xvii. 8 (cf. xvi. 1, 2); in ch. xviii all the angel-princes are depicted with 'crowns of glory' except the 'seventy-two princes of kingdoms' who have 'crowns of kingship'. They are the celestial rulers over the nations of the world. The royal crown here is apparently meant to distinguish Metatron as representative ruler. The following chapter makes it clear that METATRON'S CROWN WAS CONCEIVED OF AS A COUNTERPART OF 'KETHER NORA' OF THE HOLY ONE AS KING OF THE WORLD (cf. ch. xxix. 1). its splendour went forth etc. Cf. ch. xxv. 6.

(5) And He called me the Lesser YHWH... "For my name is in him." The tradition that Metatron bears the name of his Master is attested in *TB. Sanh.* 38 b, with the same scriptural support as here, viz. Ex. xxiii. 21. The passage is frequently referred to Metatron. The reference has been interpreted from the equal numerical value of Metatron and *Shaddai* (the name of God Almighty). The original meaning was, however, as here, that METATRON ACTUALLY WAS CALLED BY THE DIVINE NAME OR NAMES. Such seems to be the import even of *TB. Sanh.* 38 b, since there Ex. xxiv. 1 is referred to Metatron: "And He said unto Moses, Come up unto YHWH"; 'Come up unto YHWH' is to be understood: 'Come up unto Metatron'. A very important parallel is found in *Apocalypse of Abraham* (ed. BOX), ch. 10: "I am called *Jaol* by Him who moveth that which existeth with me on the seventh expanse upon the firmament, a power in virtue of the ineffable Name that is dwelling in me". *Jaol* is made up of the Divine Names, and therefore 'God's Name is in Him'. For Metatron called 'the Lesser YHWH' cf. BH. ii. 61, 114, 117, and also 3 *En.* xlviii c 7, xlviii d 1 (no. 102: 'the Lesser YHWH, after the name of his Master, "for my name is in him (Ex. xxiii. 21)"; *ib.* no. 14, YHWH is included as one of the names of Metatron). *Sepher ha-Qoma* ('*Inyane Merkaba*'), Bodl. OPP. 467, fol. 61 b (where the variant reading, however, differs): "The Explicit Name, which is Metatron, the Youth" (var. "the explicit name which Metatron announces"). In the commentary on *Sepher ha-Qoma* (Bodl. OPP. 658, fol. 101 a): "for Metatron's name is YHWH the Lesser". Add. 27142 quotes from *Hekaloth* (et al.) "And he (Metatron) is the crown of the attributes of the Holy One, and his name is as the name of His Master: THE LESSER YHWH" Add. 15299, fol. 134 a (*Widdiy Yaphé*): "all the princes that are standing beneath the Lesser YHWH". Cf. *Zohar*, i. 21 a. [The ascribing to Metatron of the name YHWH

CHAPTER XIII

God writes with a flaming style on Metatron's crown the cosmic letters by which heaven and earth were created

R. Ishmael said: Metatron, the angel, the Prince of the Presence, the Glory of all heavens, said to me:

(1) Because of the ¹great love and ¹mercy with which the Holy One, blessed be He, loved ²and cherished ²me more than all the children of heaven, He wrote with his finger with a flaming style upon the crown on my head the letters by which were created ³heaven and earth, the seas and rivers³, ⁴the mountains and hills,⁴ the planets and constellations ⁵, the lightnings, winds, earthquakes ⁶and voices (thunders)⁶, the snow and hail, the storm-wind and the

ha-QATAN is very near to ascribing to him an intermediary Function of Deity. But it here denotes his function of being God's representative. As His representative the Most High has conferred upon him part of His essence which is in His name. Cf. how acc. to later traditions Metatron is regarded as part of the Shekina, the body of Shekina, "the Shekina is called by his name Metatron" (YR. i. 57 a). Further on the significance of the name 'the Lesser YHWH' see Introduction, section 8. (Add. 27199, fol. 114 a: שם הגדול כי שמי בקרבו speaking of Metatron.) The expression 'the little Iao' is found in *Pistis Sophia* (ed. Horner), page 6 (12b) (ed. Schmidt, pp. 7, 8). Cf. Introduction, 8 (p) and 11 H 2 (a).

Ch. xiii. (Cf. the parallel chapter xli.) ON THE CROWN WITH WHICH THE HOLY ONE CROWNED METATRON ACC. TO THE PRECEDING CHAPTER VS. 3, HE WRITES THE MYSTICAL LETTERS "BY WHICH HEAVEN AND EARTH ETC. WERE CREATED". This is indicated as a distinction assigned to Metatron over 'all the children of heaven' (cf. ch. xii. 1). The idea is presumably to denote that Metatron's crown is the counterpart of the Crown of the Most High, just as Metatron's throne and curtain (ch. x. 1) are the counterparts of the Divine Throne and Curtain resp. Acc. to *Alph. R. 'Aqiba*, BH. iii. 13 and iii. 50, the "22 letters by which the whole Torah was given to the Tribes of Israel... are engraved with a flaming style on the Fearful Crown (cf. ch. xxix. 1)". And the latter passage continues: "and when the Holy One, blessed be He, desired to create the world, they all went down and stood before Him". *Mass. Hek.* vii: "the crown with the Explicit Name is on His (fore)head".

(1) the letters by which were created heaven and earth. Which are these letters? In three different ways the conception of 'Creation by letters' is expressed: (1) the world was created by the letter *Beth*, being the first one of the letters of the Tora (*Bērēshith*): *Gen. R.* i. 14, *Tʿf. Chag.* 77 c, *Alph. R. 'Aqiba*, BH. iii. 5: for on the Tora the Creation was based; (2) the letters of the Divine Name are the constituents of the world (*Zohar*, ii. 76 a b), especially the letters of the YHWH and 'EHYE, viz. י, ה, ו, א. But also in particular the letters *Yod* and *He* (common to both these names and found in the name YAH). The biblical passage *Is. xxvi. 4*

tempest; the letters by which were created all ⁷the needs of the world ⁸and all ⁸⁷the orders of Creation.

(2) And every single letter ⁹sent forth ⁹¹⁰time after time as it were ¹⁰¹¹lightnings, ¹²time after time as it were ¹²torches, ¹²time after time as it were ¹²flames of fire, ¹²time after time ¹²¹¹(rays) like [as] the rising of the sun and the moon and the planets.

7-7 *L* om. 8-8 so with *BDE*. *A*: 'upon all' 9-9 *L*: 'flew off'
10-10 *BDE*: 'figures like unto' or 'figures of aspects as' 11-11 *DE* om.
12-12 *B* as in 10-10.

(cf. ch. xlii. 4) is used as support, interpreted thus: "By *Yōd Hē* He created the worlds". The 'worlds': "the world to come with *Yōd*, this world by *He*" or *vice versa* (*YR*. i. 8 b). From the word *behibbare'ām*, read *bē Hē bē'ā'ām* (by He did He create them), in *Gen*. ii. 4, support is brought for the statement: 'by *He* heaven and earth were created'. The first word of the *Tora* (*Bērēshith*, read *Bārā Sheth* (He created (by) six) together with the passage *Is*. xxvi. 4 already mentioned (interpreted: By *YH YHWH* he created the worlds) are used as support for the creation of heaven and earth and the world by the six letters: ה, י, ה, י, ה, י (*Ma'ase Bereshith*, *S. Raziell*, *Or*. 6577 foll. (19 b, 20 a b). Cf. for further references: *TB. Men*. 29 b, *Tf. Chag*. 77, *Gen. R*. xii. 2, 9, *Mass. Hek*. vii, *Alph. R. 'Aqiba*, *BH*. iii. 23, 24, 53, 55, 56, *YR*. i. 4 b, 8 b. (3) The world was created by the twenty-two letters (which of course are also regarded as constituting the Divine Name). *Pirqe R. Ishm.* (*Bodl. MICH*. 175, foll. 20 a-26 a, ch. xxi cont.) the statement to this effect is based likewise upon *Is*. xxvi. 4. The creation of everything in heaven and on earth by means of the twenty-two letters is notably the fundamental doctrine of the *S. Yeşira*: "By means of the 22 letters, by giving them a form and a shape, by mixing them and combining them in different ways, God made the soul of all that which has been created and of all that which will be" (ii. 2, cited by Abelson in *Jewish Mysticism*, p. 104). Cf. *ib.* p. 100 from *Ber*. 55 a: "Bezalel knew how to join together the letters by means of which the heavens and earth were created". Cf. also the "Sa'adya" commentary on *S. Yeşira*, ii. 2. As no special letters are named here and no reference is made to the 'name', also because the wording suggests a plurality, THE 'LETTERS' ARE PRESUMABLY IN THE PRESENT CHAPTER TO BE UNDERSTOOD AS THE 22 LETTERS. In ch. xlviii d 5 the conferment upon Metatron of the twenty-two letters is explicitly stated.

(2) And every single letter sent forth etc. Cf. ch. xxxix. 1 and ch. xlviii b 1, from which it appears as if the reading of *L* might probably be original: 'flew off'. Cf. notes *ad loca*. On 'the mystical letters' *vide* Introduction, section 14 (1).

The idea of creation by letters (of the Name) is to be traced back in the Enoch literature to 1 *En*. lxix. 14-25: "the hidden Name (enuniated) in the oath... and these are the secrets of this oath... through it the earth was founded... the sea was created... the depths made fast... the sun and moon complete their course" (Charles' ed.).

CHAPTER XIV

All the highest princes, the elementary angels and the planetary and sideric angels fear and tremble at the sight of Metatron crowned

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) When the Holy One, blessed be He, put this crown on my head, (then) trembled before me all the Princes of Kingdoms who are in the height ¹of 'Araboth Raqia' and all the hosts of every heaven¹; and even ²the princes (of) the 'Elim, the princes (of) the 'Er'ellim and the princes (of) the *Tafšarim*², who are greater than all the

1-1 *L. om.* 2-2 so with *BL.* *A:* 'the princes of the 'Er'elim and the princes of the 'Elim *Tafšarim* and the princes of the 'Er'ellim' *DE:* 'the princes 'Elim and the princes 'Tafšarim'

Ch. xiv. In the form of a narrative of how different princes and angels trembled before Metatron, when they saw him crowned by the Most High, the PRESENT CHAPTER GIVES AN EXPOSITION OF THE VARIOUS ANGELIC POWERS UNDER METATRON'S AUTHORITY. These comprise mainly: (1) the princes of kingdoms, including Samael ('who is greater than all of them'); (2) the princes (of) the 'Elim, 'Er'ellim and *Tafšarim*; (3) the so-called 'rulers of the world', i.e. (a) the angels appointed over the elementary powers of the world, fire, ice, wind, lightning, thunder, snow, rain, (b) the angels appointed over the heavenly bodies, including the angels of 'the day' and 'the night'. It will be noticed that these angels and angelic functions fall within the traditional dominion of the 'Prince of the World': METATRON IS HERE (cf. on chh. ix. 5, x. 3) DENOTED AS VIRTUAL PRINCE OF THE WORLD, HAVING AUTHORITY OVER THE 72 PRINCES OF KINGDOMS (cf. ch. xxx) AND OVER THE 'RULERS OF THE WORLD'.

(1) all the Princes of Kingdoms. Metatron is particularly depicted as the ruler over the princes of kingdoms; cf. chh. x. 3, xvi. 1, 2, xlviii c 9, and on iii. 2. For the conception of the princes of kingdoms—the representatives of the nations of the world—see on ch. xvii. 8 and cf. chh. xviii. 2, xxx. 2. who are in the height of 'Araboth Raqia', the highest of the heavens. The princes of kingdoms are usually represented as having their place in the highest of the heavens, near the Throne of God. They form the Celestial *Beth Din*, the Divine Council (ch. xxx). See on ch. xvii. 8 (in Raqia') and xviii. 2 (in the 'Araboth Raqia', but in rank under the guardians of the Halls of Araboth).

'Elim, the princes of the 'Elim. A class of angels mentioned also chh. xv B 1 and xix. 6 (in the reading of *B*). The name is derived from Ex. xv. 11 and Ezek. xxxii. 21. *Mekilta* on the former passage explains 'Elim' as "those who minister before the Holy One in the high heavens", thus denoting them as angels. The 'Er'ellim and 'Tafšarim, also in ch. xxxiii. 7. The 'Er'ellim, denoting angels (in general?) in *Ket.* 104 a and *Yer. Kil.* 32 a, are derived from Is. xxxiii. 7. They are one of the 'ten classes of angels' (under the rulership of Mikael, *Mass.* 'Asiluth, *Zohar*, Ex. xliii; *Maimon*, *Y. Ch. Y. T.*), also mentioned as one of the first classes of angels in *YR.* i. 13 a (from *Midrash Kōnēn*) and i. 31 a (from 'Ör ha-Chayyim). The *Tafšarim* (*Jer.* li. 27, *Nah.* iii. 17) occur here and in ch. xxxix. 2 only. For the hosts of every heaven (*om. by L*) cf. xvii. 2.

ministering angels who minister before the Throne of Glory, ⁴shook, feared and trembled before me ³when they beheld me³⁴.

(2) Even Sammael ⁵, the Prince of the Accusers, who is greater than all the princes of kingdoms on high, feared and trembled before me.

(3) And even the angel⁶ of fire, and the angel⁶ of hail, and the angel⁶ of the wind, ⁷and the angel of the lightning,⁷ and the angel of anger, ⁸and the angel of the thunder⁸, and the angel of the snow, and the angel of ⁹the rain; and the angel of the day, and the angel of the night, ¹⁰and the angel of the sun and the angel of the moon¹⁰ and the angel of the planets and the angel of the constellations ¹¹who rule the world under their hands, feared ¹²and trembled and were affrighted before me, when they beheld me¹².

¹³(4) These are the names of the rulers of the world: *Gabriel*, the

3-3 *E* om. 4-4 *L* om. 5 *DE* ins. 'the Evil One' 6 *BL*: 'angels'
 7-7 *B* om. 8-8 *D*: 'the angel of the storm-wind, the angel of the earthquake'
B: 'the angel of the earthquake and the angel of commotion and the angel of hail'
L: 'and the angels of the earthquake and the thunder' 9 *L* ins. 'the lightning
 and' (cf. 7-7) 10-10 *L* om. 11-11 *L* om. from 'who rule...' vs. 3 to vs. 5.
 12-12 *B* om. 13-13 *B* om. vs. 4.

(2) Sammael, the Prince of the Accusers, who is greater than all the princes of kingdoms. For Sammael cf. on ch. xxvi. 21. He is here put in relation to the princes of kingdoms, probably regarded as the chief of these princes. As 'the prince of Rome'—ch. xxvi. 12—he is naturally included in this category, and as a representative of Rome, Israel's greatest oppressor, he also becomes the representative of all the Gentile nations and the leader of the princes who accuse Israel (represented by Mikael) on high. From this point of view one trend of traditions regards the princes of kingdoms, under Sammael, as evil, demoniacal powers. In the present book the tendency is contrary: in ch. xxx the princes of kingdoms, under the Prince of the world, together plead the cause of the world before God in a universal sense, and here they are all subjected under the rulership of Metatron whose authority supersedes that of Sammael.

(3) The angels of the elementary forces of fire, hail, wind, lightnings, etc., are comprised with those of the heavenly bodies under the category of 'rulers of the world' ('who rule the world under their hands'). Cf. 2 *En.* iv-vi where the first heaven is said to contain "the rulers of the orders of the stars" together with the angels guarding "the treasures of snow, ice, clouds and dew". The names and characteristics of the angels of 1 *En.* vi. 7 and viii show a combination of elementary and sidereal-planetary powers: Kokabiel, evidently = Kokbiel of vs. 4 (planets or stars), Shamsiel (= Shimshiel of vs. 4: the sun), Sariel (the moon) and Ezeqeel (= Ziqiel of vs. 4: the sparks or lightnings); cf. Zaqiel, Baraqijal (= Baraqiel: lightnings), Jomjael (= Yomiel?, prince of the day, here Shimshiel). For the close connection of the gods, angels or rulers of elementary and planetary phenomena attested in Persian religion, Mithraism and Gnosticism cf. Bousset, *Hauptprobleme der Gnosis*, pp. 223-237. Cf. Diels, *Elementum*, pp. 41 seqq., pointing out that the στοιχεῖα, 'elements', of N.T.-time comprise elementary powers and planets (Gal. iv. 3, 9, Col. ii. 8, 20 etc.) For planetary angels, spirits or demons cf. 1 *En.* lx 15-22, 2 *En.* xv, xvi. 7, *Jub.* ii. 2, 4 *Ez.* vi. 41, 2 *Bar.* vi. 1, item 1 *En.* lxi. 10 ("principalities...and the powers of earth and water"), *ib.* lxvi. 2 ("angels...over the

angel of the fire, *Baradiel*, the angel of the hail, *Ruchiel* who is appointed over the wind, *Baraqiel* who is appointed over the lightnings, *Za'amiel* who is appointed over the vehemence, *Ziqiel* who is appointed over the sparks, *Zi'iel* who is appointed over the commotion, *Za'aphiel* who is appointed over the storm-wind, *Ra'amiel* who is appointed over the thunders, *Ra'ashiel* who is appointed over the earthquake, *Shalgiel* who is appointed over the snow, *Matariel* who is appointed over the rain, *Shimshiel* who is appointed over the day, *Lailiel* who is appointed over the night, *Galgalliel* who is appointed over the globe of the sun, *'Ophanniel* who is appointed over the globe of the moon, *Kokbiel* who is appointed over the planets, *Rahatiel* who is appointed over the constellations¹³¹¹.

(5) And they all fell prostrate, when they saw me. And they were not able to behold me because of the majestic glory and beauty of ¹⁴the appearance of the shining¹⁴ light of the crown of glory upon my head.¹⁵

14-14 *L* om.

15 here follows in *B* a recension of ch. vii, in *L* a version of

powers of the waters"), *ib.* lxix. 2 (Kokabel, Baraqel, cf. vi, viii referred to above), *ib.* vs. 22 ("the spirits of the water and of the winds"). (4) **Gabriel the angel of the fire.** This seems to be a remnant of a tradition, connecting the archangels or the four 'Presences' with the elements and planets. Such a tradition is preserved in *Tiqqunē Zohar*, no. 70 ("Mikael is appointed over the water or seas, Gabriel over the fire, Uriel over the wind, Raphael over the 'dust of the ground', the earth"). For Uriel as the angel of the fire, see BOX, *Ezra-Ap.* pp. 20, 21. Shimshiel, the angel over the day. The name is derived from *Shemesh* (sun). *Shemesh* and *Yom* are often equivalent (cf. *TB. Ab. Zar.* 4 b, 5 a, *Rashi*). The name *Yomiel* which would have been more strictly in accordance with the scheme of the preceding angelic names (each derived from the name of their function or of the element over which they are appointed) occurs already in 1 *En.* vi. 7 ('Jomjael' cf. above). In *Hek. Zot. Bodl.* MICH. 9, fol. 68 a, '*Yomael*' is one of seven angels connected with the seven heavens. Cf. note on ch. xvii. 3. Cf. also Shamsiel, 1 *En.* viii. 3 (who taught men "the signs of the sun"). For Galgalliel, 'Ophanniel, Kokbiel, Rahatiel, as angels over sun, moon, planets and constellations, see the identical representation—in a fuller form—in ch. xvii. 4-7. Cf. ch. xlvi. 3 (Rahatiel). 'Ophanni'el as the prince of the Ophannim, see ch. xxv (which preserves traces of the connection of this angel with "the globe of the moon"). *Vide* the consummate exposition of the angelic names in the parallel passage of 1 *En.* vi (with variant readings) given by CHARLES, in *The Book of Enoch*, Oxford, 1912, pp. 16, 17!

(5) **crown of glory.** . . . Metatron's crown is here called 'crown of glory', in contrast to the preceding where it is always referred to as 'crown of kingship'.

CHAPTER XV

Metatron transformed into fire

R. Ishmael said: Metatron, the angel, the Prince of the Presence, the Glory of all heavens, said to me:

(1) As soon as the Holy One, blessed be He, took me ¹in (His) service¹ to attend the Throne of Glory and ²the Wheels (*Galgallim*) of the *Merkaba* and the needs³ of *Shekina*, forthwith my flesh was changed into flames, my sinews into flaming fire, my bones into coals of burning juniper, ⁴the light of⁴ my eye-lids into ⁵splendour of⁵ lightnings, my eye-balls into fire-brands, the hair of my head into hot flames, all my limbs into wings of burning fire and the whole of my body into glowing fire.

(2) And on my right were divisions⁶ of fiery flames, on my left ⁷fire-brands were burning⁷, round about me ⁸stormwind and tempest were blowing⁸ and in front of me and behind me was roaring of ⁹thunder with earthquake⁹. ¹⁰

1-1 so A. D: 'in joy' BCL om. 2 C ins. 'by consequence' 3 CSYR: 'arrangements' 4-4 BCL om. 5-5 B: 'sparks of' CL om. 6 so B. A: 'dividers' (cf. on ch. vi. 2). 7-7 so with (B)CDbEL. A corr. 8-8 so with BDE. A corr. L: 'were blown, roused' instead of 'were blowing' C om. 'were blowing' 9-9 BCDEL: 'thunder upon thunder' 10 CL end here. Cf. 16 on ch. xiv and 1 on ch. xvi.

Ch. xv. This chapter in common with ch. ix treats of the metamorphosis through which Metatron-Enoch was made into an angel. His body and substance are wholly changed into fire. For fire as the regular substance of the angels, see Introduction (Angelol., Nature, etc., of the angels). The *Tos.* (*Yeb.* 16 b) record the *piyyutic* statement: "Metatron, the Prince, who was made from flesh into fire", meaning "Enoch is Metatron". See YR. i. 54 b.

(1) my limbs into wings of burning fire. Cf. ch. ix. 2.

(2) on my right were divisions of fiery flames etc. High angel-princes surrounded by fire, thunder, tempest and storm-wind is a frequent representation of the angelological section, chh. xviii-xxvi. Cf. e.g. chh. xviii. 25, xxii. 9, 13, etc., xxxiv, xxxvii.

2-2 L om.

3-3 L: 'they opened to him the habitations of

Ch. xv B. THIS ADDITIONAL PIECE which is embodied in B and L in a disconnected style PRESERVES A FRAGMENT OF AN 'ASCENSION OF MOSES' (vss. 2 seqq.). This 'Ascension of Moses' was connected with the Metatron-tradition, in so far as Metatron plays the rôle of an intermediary between the Deity and Moses (cf. ch. xlviii D 7): vss. 4 and 5. Cf. also the *Gedullath Moshe* and the quotation from *Pirge Hekalot* by R. Ishmael in YR. ii. 66 a ("Said to me Metatron, the Prince of the Presence; When Moses ascended on high, the Holy One, blessed be He, gave me command and conferred on me from his Shi'ur Qoma (stature) seventy thousand myriads by seventy thousand myriads of parasangs..."). (1) Metatron is standing before the Most High: 'Prince of the Presence'.

(1) he goes in under the Throne of Glory, the place of the treasures and also of the 'Tabernacle of the Youth'. he has a great tabernacle on high. The Tabernacle (Sanctuary) of Metatron under the Throne: *Sepher Qoma* (Bodl. opp. 467, fol. 61 a), "Metatron goes in under the Throne to say the 'Blessed'", acc. to *Hilkoth Metatron*, Add. 27199, fol. 114 a, item "to prostrate himself before the Holy One" (commentary on *Sepher ha-qQoma*, Bodl. opp. 658, fol. 101 a). "The Tabernacle of the Youth whose name is Metatron" was completed by the ministering angels simultaneously with the completion of the Tabernacle on earth acc. to *Num. R.* xii. 15 (with reference to Nu. vii. 1). Cf. *Zohar*, ii. 159 a and Introduction. Metatron is the High Priest on high (*Shemoth shel Metatron*, Bodl. MICH. 256, fol. 29 a), thus occupying the position elsewhere assigned to Mikael. Cf. *Zohar*, iii. 50 a: *two* Altars on high. The priest of the inner Altar is כהן עליון מכלל and of the outer Mikael, ישראל רבא, and he brings forth the fire of deafness etc. Literally the same is said in *S. ha-'qQoma* (Bodl. opp. 467, foll. 61 a b) with the addition "(from the mouth of the Holy One) and the Explicit Name that the Youth Metatron recites (i.e. in the Tabernacle)".

(2) he fasted 121 fasts, i.e., probably, 121 days. The sudden introduction of

and he saw the innumerable⁴ companies of the hosts ⁵round about him. And they desired⁵ to burn him. But Moses prayed for mercy, first⁶ for Israel and after that⁷ for himself: and He who sitteth on the Merkaba opened the windows that are above the heads of the Kerubim. And a host of 1800 advocates⁸—and the Prince of the Presence, Metatron, with them—went forth to meet Moses. And they took⁹ the prayers of Israel⁹ and put them¹⁰ ¹¹as a crown¹¹ on the head of the Holy One, blessed be He.

(3) And they said (Deut. vi. 4): "Hear, O Israel; the Lord our God is one Lord"

4 lit. 'companies of'
8 L ins. 'of Israel'

5-5 L om. corr.
9-9 L: 'his prayer'

6 L om.
10 L: 'it'

7 L ins. 'he asked mercy'
11-11 L om.

the theme of the revelations to Moses is perhaps to be accounted for by the traditional association of the Tabernacle on high with the Tabernacle completed by Moses and by Metatron's function as revealer of the 'secrets' to Moses. Cf. ch. xlviii D 3, 7. the habitations of the chashmal. *chashmal*, derived from Ezek. i. 4, is interpreted either as an angelic name (*chashmal*, *chashmallim*, cf. note on ch. vii) or as a celestial Matter. In any case the 'abodes of the chashmal' here mean the highest or central place in heaven. Acc. to Gikatillas, *Sod ha-Chashmal*, the prophet (or the seer) after having entered the successive Halls at last arrives at the 'Hall of the Chashmal', the Chashmal being the equivalent of the 'Chayyoth of fire' (*Arze Lebanon*, 40 a b. Cf. 41 a: "the inner *chashmal* and the outer *chashmal* etc."). the heart of the Lion, the Lion = one of the four Chayyoth, Ezek. i. 10. they desired to burn him. Cf. the *Rev. of Moses*, e.g. YR. ii. 66 b ("I—Moses—saw the company of the angels of dread who surround the Throne of Glory...and they all desired to burn me"): it is a symbol of guard. Cf. i. 3, 4. opened the windows that are above the heads of the Kerubim. These are the windows through which the prayers of men are let into the Presence of the Godhead. In the *Widduy Yaphe* the supplicant prays that the Kerubim who are by the side of the Chayyoth and the Throne of Glory may open "the windows that are in the Throne of Glory...in the habitations" and let in his prayer before Him who sitteth on the Kerub, etc. 1800 advocates, i.e. angels who plead in favour of Israel. The *kerub* is advocate already in *TB. Chag.* 13 b. the prayers of Israel...as a crown. This represents the frequent idea of the prayers wreathed into diadems on the head of the Most High. Usually the angel-prince *Sandalfon* is assigned the function of receiving the prayers of the righteous and making them into crowns for 'his Creator'. Here this function is ascribed to the advocating angels under Metatron. (*Sandalfon* is nowhere mentioned in the present book.) (Cf. *Chag.* 13 b, *Rev. Moses* YR. ii. 66 b, *Zohar*, ii. 58 a, i. 167 b.) Acc. to *Yalqut Chadash*, *mal'akim*, no. 25, "Metatron brings the prayers of Israel before the Holy One, blessed be He". *Ib. ib.* no. 9, "There are three who receive the prayers: 'Akatriel (cf. vs. 4), Metatron and *Sandalfon*", of these three, acc. to *ib. ib.* no. 38, 'Akatriel receives the prayers of the 'neshāmā' (the spirit, the highest part of man), Metatron those of the *ru'ach* (the soul, as it is perhaps best translated), *Sandalfon* those of the *nefesh* (the mental or vital part of man). And *ib. ib.* no. 95, Metatron receives the prayers and ascends through 900 of the 955 heavens (cf. ch. xlviii A 1), handing them over to *Akatriel*. A class of angels receiving the prayers, as here, is also represented in *Masseket Asilut*, ch. v (Jellinek, *Ginze Chokmath ha-qabbala*), "in the world of 'Asiyya are the 'Ophannim and (the angels who) receive the prayers and requests..."

(3) And they said "Hear, O Israel etc." This seems to indicate that the fragment was connected with a midrashic exposition of the *Shēma*. It is difficult

B:

L:

and their face shone and rejoiced and the face of Shekina shone and over Shekina rejoiced

and they said to Metatron: "What are these? And to whom do they give all this honour and glory?" And they answered: "To the Glorious Lord of Israel". And they spake:

B:

L:

"Hear, O Israel: the Lord, our God, is one Lord. To whom shall be given abundance of honour and majesty but to Thee YHWH, the Divine Majesty, the King, living and eternal".

(4) *In that moment spake Akatriel Yah Yehod Sebaoth and said to Metatron, the Prince of the Presence: "Let no prayer that he prayeth before me return (to him) void. Hear thou his prayer and fulfil his desire whether (it be) great or small¹²".*

(5) *Forthwith Metatron, the Prince of the Presence, said to Moses: "Son of Amram! Fear not, ¹³for now God delights in thee¹³. And ask thou ¹⁴thy desire¹⁴ of the Glory and Majesty. For thy face shines from one end of the world to the other". But Moses answered him: "(I fear*

12 ins. with L. B om.

13-13 L om.

14-14 L: 'thy need'

to determine the different subjects of the sentences of the present verse. 'They' and 'their' probably refer to the advocating angels mentioned in the preceding verse, except in they give all this honour etc. which is equivalent to 'is given all this honour...' and in they answered which should be emended 'he (Metatron) answered'.

(4) In that moment spake Akatriel Yah Yehod Sebaoth. *Akatriel Yah Yehod Sebaoth* is here in all probability a name of the Most High, not of an angel: cf. 'prayer that he prayeth before me' and vs. 5: '(Metatron says, probably with reference to the words attributed to *Akatriel* in this verse,) now God delights in thee'. *Akatriel* as a name of God occurs in the well-known passage *Ber.* 7 a. *Akatriel* ("the crown of God", "God crowned") is *cabbalistically* the name of the Godhead as manifested on the Throne of Glory. He is identical with the *Kerub ha-mMeyuchad* (*Or.* 5510, fol. 127 b) and represents the *sefira Keter*. *Akatriel* is, however, also a frequent name of an angel, in this case usually without the appendix *Yah Yehod Sebaoth*; cf. quotations in note on vs. 2 above. It may be apposite here to give the view of Cordovero (*Parde*s, quoted *YR.* i. 90 a): he maintains that *Akatriel* even in *Ber.* 7 a refers to an angel, not to God: "said R. Ishmael, I saw *Akatriel Yah YHWH Sebaoth* etc. This means the angel who receives the prayers, and not the King of the Glory, for if so, he (R. Ishmael) would not have said 'I saw'—God forbid! As is known, *Akatriel* is a prince on high and not God. And the '*Yah Yah Sebaoth*' means nothing more than that he is like other angels who are called by the name of their Master (cf. on *xxix.* i, x. 3, iii. 2)".

Hear thou his prayer and fulfil his desire. HENCE METATRON IS CONCEIVED OF AS GOD'S REPRESENTATIVE NOT ONLY TO THE ANGELS BUT ALSO TO MAN. The underlying idea is here probably Metatron's identification with the 'angel' of *Ex.* xxxiii. 20 seqq.

(5) For thy face shines from one end of the world to the other. Cf. *Ex.* xxxiv. 29. Moses has obtained from the ethereal light or splendour of the Divine

lest I bring guiltiness upon myself". Metatron said to him: "Receive the letters of the oath, in (by) which there is no breaking the covenant"¹⁵ (which precludes any breach of the covenant).

CHAPTER XVI¹

Probably additional

Metatron divested of his privilege of presiding on a Throne of his own on account of Acher's misapprehension in taking him for a second Divine Power

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, the Glory of all heaven, said to me:

(1) At first I was sitting upon a² great Throne at the door of the Seventh Hall; and I was judging³ the children of heaven, ⁴the household on high⁴ by authority of the Holy One, blessed be He. And I divided Greatness, Kingship, Dignity, Rulership, Honour and Praise, and Diadem and Crown of Glory unto all the princes of kingdoms,

¹⁵ the additions following upon this are in *B* definitely stated not to belong to 'the Baraita'

Ch. xvi. 1 Chh. xvi-xxii om. by *E*. Ch. xvi is not included in the *Part of Baraitas from the Ma'ase Merkaba* in *L*, but a recension of it follows immediately after the version of ch. xii, without reference to source. 2 so *BDL*. *A*: 'the' 3 *L* ins. 'all' 4-4 *BDL* om.

Glory. For 'the oath' cf. 1 *En*. lxix. 14-25. The oath contains Divine letters, i.e. letters of the Divine names. Cf. Introduction, section 14 (1).

Ch. xvi. The present chapter is a different version of the well-known narrative in *Chag*. 15 a (cf. *Tos. Chag*. 2, 3, *Yer. Chag*. ii. 1, fol. 77 b). The main DIFFERENCES between the two versions are: (1) in *Chag*. 15 a Metatron's privilege of 'sitting' in the heavens is explained from his being the scribe, recording the merits of Israel, here the view of the preceding chapters is accepted (ch. x. 2 seqq.) acc. to which Metatron was seated on a Throne of his own as judge and ruler over the angels, in particular the princes of kingdoms, (2) in *Chag*. the reason for or justification of the punishment administered on Metatron is that he did not rise when he saw Acher beholding him (so as to prevent the misapprehension as to the Unity of the Godhead; this is omitted here, (3) the execution of punishment is in *Chag*. attributed to a plurality of angels, not further defined, here the angel '*Anaphiel*', known from ch. vi. 1 and allied traditions (see on ch. x. 3) as having occupied a position above Metatron, is used for this purpose. (*A*: 'Aniyyel').

(1) At first I was sitting upon a great Throne at the door of the Seventh Hall. Cf. ch. x. 1-3. THE OPENING GIVES THE IMPRESSION THAT THE CH. IS AN INDEPENDENT FRAGMENT. INDEED VS. 1 REPEATS THE DETAILS OF CHH. X, XLVIII C 8, 9, WITH THE EXPLICIT ADDITION THAT THE DISTINCTIONS IN QUESTION, CONFERRED UPON METATRON, WERE ONLY TEMPORARY ('AT FIRST', 'IN THE BEGINNING'). The rôle here assigned to Metatron is markedly primarily the rulership over the princes of kingdoms. Over these he presides in the Celestial Court, passing judgement upon the heavenly household but also as conferring upon them their authority and

while I was presiding (lit. sitting) in the Celestial Court (*Yeshiba*), and the princes of kingdoms were standing before me, on my right and on my left—by authority of the Holy One, blessed be He.

(2) But when Acher⁵ came to behold the vision of the Merkaba and fixed his eyes on me, he feared and trembled before me and his soul was affrighted even unto departing from him, because of fear, horror and dread of me, when he beheld me sitting upon a throne like a king with all the ministering angels standing by me as my servants and all the princes of kingdoms 'adorned with crowns'⁶ surrounding me: (3) in that moment he opened his mouth and said: "Indeed, there are two Divine Powers in heaven!" (4) Forthwith *Bath Qol* (the Divine Voice) went forth 'from heaven' from before the Shekina and said: "Return, ye backsliding children (Jer. iii. 22), except Acher!"

5 DL: 'Elisha ben Abuya who is (also called) Acher' B: (instead of 'Acher came') 'came Elisha ben Abuya and he was standing behind (corr. reading for 'Acher') YHWH' 6-6 so DL (cf. on vs. 3 of ch. xii, chh. xvii. 8, xviii. 3 beg.). AB: 'wreathing crowns' (cf. also vs. 1 here: 'divided...crown...until etc.') 7-7 BDL om.

emblems of rulership: again a trait of the Prince of the World conception. presiding in the Celestial Court or council. Metatron is depicted in a position similar to that of God presiding in the Celestial *Beth Din* in chh. xxviii c 7-9, xxx. The conception is implied in ch. x and ch. xlviii c 8, 9. Metatron's presidency in his *yeshiba* is apparently pictured after the pattern of God's presidency in the highest *Beth Din*, and naturally so, Metatron being God's representative and vice-regent. by authority of the Holy One, blessed be He. It is emphasized that Metatron's presidency in the *yeshiba* and his rulership are derived from 'his King'.

(2) when Acher came to behold the vision of the Merkaba. Acher, as Elisha ben Abuya was called after his 'fall', is a well-known figure of Rabbinic (in modern time characterized as 'the Faust of the Talmud'): see, besides *Chag.* 15 a and *Yer. Chag.* 77 b, *Rut. R.* vi, *Eccl. R.* to vii. 8, 26 (*P. Aboth*, iv. 25), further Graetz, *Gnostizismus u. Judentum*, pp. 62-71, *Chaluz*, v. 66-72, Smolenskin in *Hash-Shachar*, v. 66-72, Steinschneider, *Elisha ben Abuya*, Bacher in *Agada der Tannaiten* (*R. Meir*, etc.) came to behold the vision of Merkaba: acc. to the Talmud-passages he was one of the four who 'entered Paradise' in their lifetime, an expression evidently denoting mystical experiences and speculations on the '*Ma'ase Merkaba*', here he is simply denoted as one of those who beheld the vision of the Merkaba (as R. Ishmael, ch. i. 1 seq.).

(3) Indeed, there are two Divine Powers in heaven (cf. *Chag.* 15 a: "are there, God forbid, two Divine Powers?"). Acher is described as giving vent to the most abominable heretic view, that denying the absolute Unity of the Godhead. The Talmudic tradition emphasizes Acher's aberration into heresy, and also, as it seems, that his heresy was caused by his mystical speculations. Acher, after having entered Paradise 'cut the plantations', i.e., probably, seduced scholars from the right faith. (Cf. also the Tosaphists *ad locum*, *Chag.* 15 a).

(4) Bath Qol went forth...and said: "Return, ye backsliding children, except Acher!" (identical with *Chag.* 15 a). Acher was to be excluded from the opportunity of forgiveness through repentance, offered to all other children of God.

(5) Then came 'Aniyel⁹, the Prince, the honoured, glorified, beloved, wonderful, revered and fearful one, in commission from ¹⁰the Holy One, blessed be He¹⁰ and ¹¹gave me sixty strokes with lashes of fire¹¹ and made me stand on my feet.

CHAPTER XVII¹

The princes of the seven heavens, of the sun, moon, planets and constellations and their suites of angels

R. Ishmael said: Metatron, the angel, the Prince of the Presence, the glory of all heavens, said to me:

(1) Seven (are the) princes, the great, beautiful², revered, wonderful

9 BDL: 'Anaphiel יַהֲוִה' 10-10 DL: 'MAQOM' (the Divine Majesty) 11-11 lit. 'struck me with sixty lashes of fire' B: '(and) brought with him sixty lashes and hosts of fire'

Ch. xvii. 1 Chh. xvii-xxi om. by B. Extant in D and A only. Cf. ch. xv. 10, ch. xvi. 1. 2 D om.

(5) Then came 'Anaphiel (BDL) H etc. Cf. ch. vi. 1 and on ch. x. 3. The chapter accepts the tradition acc. to which 'Anaphiel is assigned a position higher than that of Metatron. He is given six epithets, exactly as in *Hek. R.* xxii. 1. In *Chag.* 15 a the executors of the punishment are not defined ("they brought out Metatron and struck him..."). Cf. introd. of notes on the present chapter. For the punishment of angels with lashes of fire cf. *Yoma*, 77 a (Gabriel). made me stand on my feet, i.e. Metatron was deprived of his privilege of sitting on a throne.

Tosaf. Chag. 15 a, explains: להוריע לו שלא היה לו יכולת יתר מאחרים.

Note. The position of ch. xvi within the present 'Enoch-Metatron piece' of the Hebrew Book of Enoch is discussed in the Introduction, section 8 (v).

THE ANGELOLOGICAL SECTION: chh. xvii-xxii, xxv-xxviii. 6.

Ch. xvii. With the present chapter begins a section treating exclusively of the different angels, princes and orders of angels which may conveniently be called 'the angelological section'. It comprises chh. xvii-xxii, xxv-xxviii. 6, containing at least THREE DIFFERENT EXPOSITIONS: ch. xvii (A 2), ch. xviii (A 3) and chh. xix-xxii, xxv-xxviii. 6 (A 1). On the angelology of this section, see Introduction, section 13 (1 A, B, C).

Ch. xvii presents an angelological system from the highest to the lower orders. The highest are the seven princes over the seven heavens, i.e. the seven archangels. Next to these come the princes appointed over the heavenly bodies, four in number. Each of these princes have under them myriads of angels.

(1) seven are the princes... who are appointed over the seven heavens... Mikael etc. It is noticeable that order and forms of the names of the princes of the seven heavens, the archangels, are not identical with those of vs. 3. Besides, the readings of A and D differ. In fact, great uncertainty seems to have prevailed from the very earliest as to the names of the seven archangels. No two sources extant, from 1 *En.* xx to mediaeval *Qabbala*, present exactly the same order and names of these angels. Cf. further on vs. 3.

and honoured ones who are appointed over the seven heavens. And these are they:

A:

MIKAEL, GABRIEL, SHATQIEL, SHACHAQIEL, BAKARIEL, BARDARIEL, PACHRIEL.

D:

MIKAEL and GABRIEL, SHATQIEL and BARADIEL and SHACHAQIEL and BARAQIEL and SIDRIEL.

(2) And every one of them is the prince of the host of (one) heaven. And each one of them is accompanied by 496,000 myriads of ministering angels.

(3) MIKAEL, the great prince, is appointed over the seventh heaven, the highest one, which is in the 'Araboth.

(2) each one of them is accompanied by 496,000 myriads of ministering angels. The number 496,000 (myriads) generally refers to the ministering angels as performers of the *Qēdushsha* (cf. chh. xxxv. 1, xl. 3). 496 is the numerical value of *Malkut* (Kingdom): the song-uttering angels proclaim God's sovereignty, 'take upon themselves the yoke of the Kingdom of heaven' (ch. xxxv. 6). The hosts of song-uttering angels are usually depicted as under the authority, not of the seven archangels—'princes of the host'—but of the four 'princes of the army' (ch. xxxv. 3), 'the four presences' (1 *En.* xxxix f., see on xviii. 4): MIKAEL, GABRIEL, 'URIEL (Nuriel) and RAPHAEL. The conception of the four presences is closely connected with that of the seven archangels.

Each one of them is the prince of the host of one heaven. (3) Mikael... is appointed over the seventh heaven, Gabriel, the prince of the host, is appointed over the sixth heaven etc. The expression 'princes of the hosts' is used of Mikael and Gabriel in *Alph. R.* 'Aqiba, BH. iii. 48. Metatron is called 'one of the princes of the host' in *Shi'ur Qoma* (Bodl. MICH. 175, fol. 18 b). The term is probably derived from Josh. v. 14 ("the captain of the host of the Lord"), "the prince of the host of YHWH" which is referred either to Metatron or to Mikael or to Gabriel (cf. *Siuni*, 53 b-d). The idea of the multitudes of angels as divided in hosts, distributed through the seven heavens underlies ch. xviii. 1 (cf. also ch. xiv. 1). The tendency of arranging the orders of the angels according to the system of the seven heavens appears already in the Pseudepigrapha, although the traditions are somewhat confused. *Test. Levi*, iii. assigns different classes of angels to each of the seven heavens (1st heaven: "the spirits of the retributions for the vengeance"; 2nd heaven: "the hosts of the armies which are ordained for the day of judgement"; 3rd heaven: acc. to rec. 3 (BA^{BS}) = 2nd heaven (a); 4th heaven: "thrones and dominions in which always they offer praise to God"; 5th: "angels who bear answers (prayers) to the angels of the presence"; 6th: "the archangels who minister and make propitiation to the Lord"; 7th: "the Glory of God and the angels of the Presence" (BA^{BS})). See CHARLES, A and P, *ad loc.* Acc. to 2 *En.* iii-ix, to the first heaven are located the rulers of the stars and the angels set over the treasuries of ice, snow, clouds, etc., to the 4th the sun and moon and the angels over them together with "an armed host of angels praising God", to the 5th the Grigori (Watchers), to the 6th "seven bands of angels... who make the orders and learn the goings of the stars and the alteration of the moon and the revolution of the sun... (who are) appointed over seasons and years etc.", to the 7th "fiery troops of great archangels etc." In 3 *Bar.* the angels attending the sun, moon (and the stars ch. ix. 1) are assigned to the 3rd heaven, in the 5th heaven (*ib.* xi. 1 seqq.) is Mikael "who holds the keys of the Kingdom of Heaven". In *Ascension of Isaiah* similarly the seven heavens are depicted as containing different hosts of angels, each surpassing the lower one in glory. (*Vide* CHARLES, *Asc. Is.* in T.E.D.)

GABRIEL, the prince of the host, is appointed over the sixth heaven which is in *Mākōn*.

³SHATAQIEL, prince of the host, is appointed over the fifth heaven which is in *Mā'ōn*.³

SHAḤAQI'EL⁴, prince of the host, is appointed over the fourth heaven which is in *Zebul*.

BADARIEL⁵, prince of the host, is appointed over the third heaven which is in *Sheḥaqim*.

The seven archangels (holy angels who watch) are enumerated in the well-known passage, ch. xx of 1 *En.*, together with the dominions of their rulership: *Uriel, Raphael, Raguel, Mikael, Saraqael, Gabriel, Remiel*. In none of the adduced passages the present conception of the archangels as rulers each over one of the seven heavens, is developed: the archangels are generally assigned to a specified heaven (the 6th or 7th, cf. the references to *Test. Levi* and 2 *En.* above). Parallels to the present picture are, however, found in *Pirqe R. Ishmael* (*Bodl. MICH.* 175, foll. 20 seqq.), ch. xxi cont. and *Hek. Zot.* (*Bodl. MICH.* 9, foll. 67 b, 68 a), although with different names and order. In the former passage, which is closely dependent upon the representation of *Chag.* 12 b, the names of the princes of the respective heavens are: *Wilōn-QEMUEL* (and the angels of destruction, cf. *Test. Levi* above and *Gedullat Moshe*), *Raqia'-GALLISUR, Shechagim-SHAPHIEL, Zebul-MIKAEL* (in accordance with *Chag.* 12 b), *Ma'on-GABRIEL, Makon-SANDALFON, 'Araboth-no name given*. In *Hek. Zot.* the seven angels "praising the Holy One, blessed be He, in each heaven" are: 1st heaven, MIKAEL; 2nd, GABRIEL; 3rd, SODIEL; 4th, 'AKATRIEL; 5th, RAPHAEL; 6th, BODIEL; 7th, YOMAEI. A trace of the tradition locating the archangels, each to one of the seven heavens, is perhaps recognizable also in *Test. of Solomon*, vss. 59 seqq. (ed. Conybeare, *YQR.* vol. xi. 1-45), "RAPHAEL...BAZAZATH who has his seat in the second heaven...RATHANAEL who sits in the third heaven...IAMETH...".

The close connection with the rulers of the heavenly bodies in which the archangels as princes of the seven heavens are represented in the present chapter is perhaps indicative of the range of ideas from which the conception has emerged: the planetary or sidereal speculations. The important role played by these speculations is discernible also in the pseudepigraphal passages referred to above. It is possible, that the idea of the seven archangels as rulers over the seven heavens was brought about through the conception of the heavens as planetary spheres, the archangels being originally the princes of the seven planets. The conception of the seven heavens as planetary spheres is attested in 2 *En.* xxviii. 3: "the seven stars, each one of them in its heaven". Cf. *YR.* i. 15 b, 16 b. This idea was probably obscured by the parallel tendency of assigning the heavenly bodies to a definite heaven, a tendency at work in the pseudepigraphal works in question and in its final form represented in the tradition locating the sun, moon, planets and constellations to *Raqia'*, the 2nd heaven (in Rabbinic, *Chag.* 12 b *et al.* and throughout the present book). The tradition of the seven archangels with their suites as rulers over the planets (including dominion over constellations and elements) might be traced in the representation of 2 *En.* xix, acc. to which seven bands of angels "make the orders and learn the goings of the stars"; cf. above. This conception obtains in later sources: *YR.* i. 6 a: "MIKAEL is appointed over Saturn, BARAQIEL over Jupiter, GABRIEL over Mars, RAPHAEL over the sun, CHASDIEL over Mercury, SIDQIEL over Venus, 'ANA'EL over the moon", *ib.* i. 16 a: "Mikael: the Sun, Gabriel: the Moon, Qaphsiel: Saturn, Sammael: Mars, Raphael: Jupiter, 'Ana'el: Venus". A trace of the same idea is possibly to be seen in vss. 35-41 of *Testament of Solomon*; seven archangels rule over and frustrate the seven demons

BARAKIEL⁶, prince of the host, is appointed over the second heaven which is in ⁷the height of (*Merom*)⁷ *Raqia'*.

PAZRIEL⁸, prince of the host, is appointed over the first⁹ heaven which is in *Wilōn*, which is in *Shamayim*.

(4) Under them is GALGALLIEL¹⁰, the prince who is appointed over the globe (*galgal*) of the sun, and with him are 96 great and honoured angels who move¹¹ the sun in *Raqia'*.¹²

(5)¹³ Under them¹³ is 'OPHANNIEL, the prince who is set over the globe (*'ophan*) of the moon. And with him are 88¹⁴ angels who move¹¹ the globe of the moon 354 thousand parasangs every night at the time when the moon stands in the East at its turning point.¹⁵ And when is the moon sitting in the East at its turning point? Answer: in the fifteenth day of every month.¹⁵

(6) Under them is RAHAṬIEL, the prince who is appointed over the constellations. And he is accompanied by 72 great and honoured angels. And why is he called RAHAṬIEL? Because he makes the stars run (*marhit*) in their orbits and courses 339 thousand parasangs every night from the East to the West, and from the West to the East. For

connected with 'the seven stars' (the seven planets or the Pleiades, cf. Conybeare's note *in locum*). Of these seven high angels six are named: LAMECHALAL, BARUCH-IACHEL, MARMARATH (Marmaraoth, vs. 94), BALTHIEL, ASTERAOTH, URIEL. Uriel is the angel set over the stars acc. to 1 *En.* lxxii-lxxxii. In 1 *En.* xx Raguel is "one of the holy angels who takes vengeance on the world of luminaries".

As regards the names of the seven archangels it has already been pointed out that all the different sources vary on this point. To the passages given above may be added *Test. Salomon*, vss. 73-81: the names are there: MIKAEL, GABRIEL, URIEL, SABRAEL, ARAEL, IAOTH, ADONAEI. From the different enumerations can be seen that the names most frequently recurring are those of the 'four presences', "Mikael, Gabriel, Raphael and Uriel", and of these Mikael and Gabriel are common to most of the sources. (Cf. how 1 *En.* lxxxvii. 2, 3 clearly represents the seven archangels as consisting of four, i.e. Presences and three with them.) Of the rest some are evidently derived from the old lists of superior angels, of which parts are preserved e.g. in 1 *En.* vi, viii, lxix (as Watchers, Fallen Angels), lxxxii. 10-20 (leaders of the stars, rulers of seasons and months). Baraqiel (D) here is the Baraqijal of 1 *En.* vi, Baraqiel, *ib.* lxix. 2. Cf. Barakiel (A) with Berkael 1 *En.* lxxxii. 17, Badariel (A) with Batael 1 *En.* vi. 7, Batarjal *ib.* lxix. 2. The names are older than the conception of the seven archangels. But it is significant that such names are chosen as originally represent the angels ruling over the heavenly bodies and over the elementary powers. in Wilon which is in Shamayim, 'which is in Shamayim' is a gloss. 'Shamayim' is the Hebrew synonym of Wilon (*velum*) as name of the first heaven.

(4-7) Under them are Galgalliel... 'Ophanniel... Rahaṭiel... Kokbiel, with subservient angels. The heavenly bodies are divided in the four categories of sun, moon, planets and constellations as in *Chag.* 12 b, and, as there, are assigned to the second heaven, the *Raqia'*. Each of these four categories is assigned a special prince, who is accompanied by a number of assistant angels. In the present system these

the Holy One, blessed be He, has made a tent for all of them, for the sun, the moon, the planets and the stars in which they travel at night from the West to the East.

(7) Under them is KOKBIEL, the prince who is appointed over all the planets. And with him are 365,000 myriads of ministering angels, great and honoured ones who move¹⁶ the planets from city to city and from province to province in the *Raqia'* of heavens.

16 so D. A: 'bring down'

princes and angels are made to rank under the seven archangels as princes of the seven heavens. As has already been pointed out, it is highly probable, that the original representation was one of the seven archangels as princes each over one of the seven spheres as containing the planets with constellations. The present systematization can be regarded as a modification of this original view to the established notion of the *Raqia'*, the second heaven, as the place of the heavenly bodies.

The names of the princes, GALGALLIEL, 'OPHANNIEL, RAHAṬIEL, KOKBIEL are uniform with those of ch. xiv. 4. *Rahaṭiel* also occurs in ch. xlv. 3 in a similar function. 'Ophanniel is the prince of the 'Ophannim, ch. xxv. The names *Galgalliel*, 'Ophanniel and *Kokbiel* are derived from *Galgāl* (globe, i.e. of the sun), *Ophan* (globe, i.e. of the moon) and *Kokab* (planet) respectively. *Rahaṭiel* is, acc. to the intimation of vs. 6, derived from *rahaṭ* (to run). In *TB. Ber.* 32 b, *Rahaṭon* is the technical term for divisions of angels who have immediate rule over the stars and planets. *Rahaṭiel* is the prince over planets and constellations or luminaries in general acc. to *S. Razi'el*, 19 b, 21 b (cf. also *Qeneh Binah*, 34 b, and *S. ha-Chesheq. Add.* 27120, fol. 14 b). *Galgalliel* and 'Ophanniel seem to be comparatively late devices. *Kokbiel* is of early origin, cf. *Kokabiel*, 1 *En.* vi. 7, *Kokabel*, *ib.* viii. 3 (who "taught constellations"), *lxix.* 2.

For the conception of angels who 'move the heavenly bodies' cf. 1 *En.* lxxii-lxxxii ("the Book of the Heavenly Luminaries": CHARLES), URIEL being there the prince over the heavenly bodies; lxxii. 3 ("the leaders of the stars"), lxxv. 1 ("the leaders of the heads of the thousands who are placed over the whole creation and over all the stars"), lxxix, lxxx. 1 ("the leaders of the stars of the heaven and all those who turn them"), 6 ("chiefs of the stars"), lxxxii. 4 and esp. 10-20 (the names of the leaders of the stars), 4 *Ez.* vi. 3, 2 *En.* xi. 3-5 (15 myriads of angels attend the sun during the day, and 1000 by night), *Midrash 'Asereth Ma'amaroth*, *BH.* i. 64 ("365 angels are set over the sun, moving it from window to window in *Raqia'*"), 3 *Bar.* vi. 1 seqq. (the chariot of the sun drawn by forty angels), vss. 13, 16 ("for the sun is made ready by the angels"), *ib.* vii. 4 ("I saw the shining sun and the angels which draw it"), ix. 1 seqq. (the moon sitting on a wheeled chariot: "and there were before it oxen and lambs and a multitude of angels... the oxen and lambs... they also are angels"). The derivation of the numbers ninety-six and eighty-eight in vss. 4 and 5 resp. is not clear. The number seventy-two of the angels assisting RAHAṬIEL, the prince of the constellations, corresponds to the seventy-two divisions of the zodiac (cf. the seventy-two princes of kingdoms, vs. 8, etc.). KOKBIEL again, vs. 7, is assisted by 365,000 myriads of ministering angels. Literally the same statement is made about KOKBIEL in *S. Razi'el*, 19 b. These angels "move the planets (*kokabim*)". It is noteworthy, that acc. to *TB. Ber.* 32 b, referred to above, the different camps (of angels), in the last instance sorting under the constellations, have each under them "365,000 myriads of planets (*kokabim*) corresponding to the days of the sun (i.e. the solar year)". The latter parts of vss. 5 and 6 are somewhat obscure. They might be remnants of expositions of the courses of the heavenly bodies, such as are given at length in 1 *En.* lxxii-lxxxii (the 'portals of the sun'); ch. lxxii, the moon; ch. lxxiv, the portals of sun, moon, stars and all the works of

(8) And over them are SEVENTY-TWO PRINCES OF KINGDOMS on high corresponding to the 72 tongues of the world. And all of them are crowned with royal crowns and clad in royal garments and wrapped in royal cloaks. And all of them are riding on royal horses and they are holding royal sceptres in their hands. And before each one of

heaven; ch. lxxv. 6 seqq., cf. ch. lxxviii. 7 seq., "and fifteen parts of light are transferred to the moon till the fifteenth day (when) her light is accomplished (vs. 5 here)". The conception of the 'tent' for the sun, etc., is usually referred to Ps. xix. 5 (and 7).

(8) over them are seventy-two princes of kingdoms... *lit.* 'above them etc.' It is difficult to reconcile this vs. with the preceding. To whom does 'above them' refer? To the 365,000 myriads of angels of vs. 7 or to the princes and angels of the heavenly bodies in general? No doubt, as the context now stands, the seventy-two princes of kingdoms are intended as princes over the angels who 'move the planets', by analogy with the seventy-two assistant angels of vs. 6. This would seem to be additional, since the real counterpart of the assistant angels of vss. 4, 5, 6 are in vs. 7, the 365,000 myriads of angels. The expression 'above them' is not appropriate in the sense which it is here made to denote, the right phrase would have been e.g. 'over them are appointed' (ועליהם ממונים). The inception 'above them' rather presupposes an exposition of the order of angelic classes, proceeding from the lower to the higher ones, hence quite contrary to that of the present chapter. The fragment is more akin to the angelological section, chh. xix seqq., to which it may even originally have belonged, since the beginning of that section is missing in the present book. See note on ch. xix. 1.

By the compiler of the present chapter the seventy-two princes of kingdoms are made the rulers over the planets. The conception of the princes of kingdoms as rulers of planets and constellations is frequently represented in later sources. Their appellation properly refers to their function as angelic leaders of the destinies of the nations, as representatives in heaven of the kingdoms on earth. As such their number is usually given as seventy (corresponding to the number of nations (tongues) of the world, enumerated Gen. x). The idea of heavenly guardians of the nations occurs in Dan. x. 20, 21, and is fully developed in Sir. xvii. 17, 1 En. lxxxix. 59 seqq. (in the metaphor of the seventy shepherds), Targ. Yer. to Gen. xi. 7, 8, TB. Yoma, 77 a, Sukka, 29 a, Gen. R. lxxviii, lxxvii, Ex. R. xxi, Lev. R. xxix, P. R. 'El. xxiv. They plead the cause of their resp. nations before God, each suffers punishment with the nation under his protection, they form the celestial *Beth Din* etc. For this range of ideas see chh. xxx. 1, 2, xlvi c 9 and note on xxx. 2.

The leader of the princes of kingdoms is acc. to *Midr. Abkir*, *Yalq. on Gen.* no. 132, Targ. Ps. xxxvii. 7, 8, MIKAEL, prince of Israel; acc. to ch. xxx here, the Prince of the World; and acc. to the Enoch-Metatron sections of the present book, Metatron (chh. x. 3, xiv. 1, xvi. 1, 2, xlviii c 9, cf. also xlviii d 5). In their aspect of leaders of the Gentile nations they were sometimes regarded as evil agencies (so already 1 En. lxxxix. 65, 69, xc. 17, 22, 23, 25), and as their chief was then named SAMMAEL, the prince of Rome (cf. chh. xiv. 2, xxvi. 12).

When associated with the idea of the planets and constellations as determining or ruling the destinies of the nations, it was only natural that the conception should develop into that of the princes of kingdoms as rulers over the heavenly bodies—just as the Prince of the World was made the ruler of planets and constellations (cf. ch. xxxviii. 3). This development may have begun at an early time. The seventy shepherds are already in 1 En. connected with the rulers of the world, the Watchers or Fallen Angels who, symbolized by stars, are judged together with the seventy shepherds acc. to 1 En. xc. 24. (On the identification of the princes of kingdoms with the Watchers see note on ch. xxix intr.) For the Watchers as rulers of elements, constellations, planets, etc., see 1 En. vi-viii, lxix, note on vs. 3 above and on

them when he is travelling in *Raqia'*, royal servants are running with great glory and majesty

A:

even as on earth they (princes) are travelling in chariot(s) with horsemen and great armies and in glory and greatness with praise, song and honour.

D:

and before every one of them, when travelling in *Raqia'*, there are running great armies, even as (the custom is) on earth, with chariot(s), in glory and greatness, praise, song and honour.

ch. xiv. 3, 4. The connection of the 'gods of the nations' with the planets is perhaps to be seen also in *TB. Sukka*, 29 a. Acc. to *Ma'areket ha-'Elohuth*, 128 b, "the nations are allotted to the Princes and Constellations". *YR.*, i. 15 a, gives the following quotation from *Tub-ha-'Ares*: "In the seven firmaments (heavens), under them, are the seven planets... (*Shešem Chanokol*: Saturn, Jupiter, Mars, Sun, Venus, Mercury and Moon) and in these seven heavens are the Spirits of the seventy nations, ten nations under each planet, and the twelve constellations give abundance unto them".

Probably under the influence of their sideric significance the number of the princes of kingdoms was changed from seventy to seventy-two (the number of the divisions of the zodiac). In the present book they are mentioned as seventy-two in chh. xviii. 3, xxx. 2 and here. Ch. xlviii c 9, on the other hand, has 'seventy princes'. Cf. note on ch. xxx. 2 and also on ch. xlviii b 1. The two princes added were later understood as MIKAEL and GABRIEL or as MIKAEL and SAMMAEL. Acc. to *YR.*, i. 18 a, MIKAEL is the Prince of Israel and GABRIEL the Prince of all the nations of the world. A curious effect of the alteration of seventy into seventy-two is the gloss in the present verse: corresponding to the 72 tongues of the world, which is of course a mis-emption of the regular expression "corresponding to the 70 tongues of the world".

all of them are crowned with royal crowns etc., to designate them as rulers. Cf. notes on chh. xii. 3, xviii. 1.

when he is travelling in *Raqia'*. This seems to indicate that the princes of kingdoms were assigned to the second heaven, the region of the heavenly bodies and thus would tend to show, that the fragment itself, apart from the context, designates the princes of kingdoms as sideric rulers. Usually the princes of kingdoms are represented as being in the highest of the heavens, by the Throne of Glory: chh. xvi. 1, 2, xxx. 1, 2. Acc. to ch. xviii. 3, being in rank above the princes of the heavens, but below the guardians of the Halls, they are probably conceived of as having their abode in the highest of the heavens, but outside the Halls. Acc. to the passage quoted *YR.*, i. 15 a, referred to above, each of the seven heavens would contain a number of these princes. This is stated also in *Alph. R. 'Aqiba*, *BH.* iii. 36 ("then come all the princes of kingdoms in every heaven").

Passages in the present book mentioning the 'princes of kingdoms' are chh.: x. 3, xiv. 1, 2, xvi. 1, 2, xvii. 8, xviii. 2, 3, xxx. 2, xlviii c 9, d 5; cf. also ch. xxvi. 12.

CHAPTER XVIII

The order of ranks of the angels and the homage received by the higher ranks from the lower ones

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, the glory of all heaven, said to me:

(1) THE ANGELS OF THE FIRST HEAVEN, when(ever) they see their prince, they dismount from their horses and fall on their faces.

And THE PRINCE OF THE FIRST HEAVEN, when he sees the prince of the second heaven, he dismounts, removes the *crown of glory* from his head and falls on his face.

Ch. xviii. Angelological system A 3 (see Introduction, section 13 (1 c)).

This chapter (extant in *D* and *A* only) introduces an independent exposition of the angelic hierarchy. The point of connection with the preceding chapter is the mention of the princes of the seven heavens. In ch. xvii, however, these 'princes of the seven heavens' are regarded as constituting the highest rank of angels. That this is so is clear from the facts that the princes of the seventh and sixth heavens are identified with Mikael and Gabriel resp. and that they occur at the head of a classification which is arranged in an order beginning from the highest. In the present chapter, on the contrary, the princes of the heavens form the lowest class of angels in an enumeration from the lowest to the highest.

A peculiarity of this chapter which separates it in character from both ch. xvii and the rest of the angelological section is the monotonous repetition of the words 'when *X* see(s) *X* he (they) remove(s) the crown . . . from his (their) head and fall(s) etc.' the technical means by which the inferiority of one rank of angels or one angel-prince to the subsequently mentioned is indicated.

Another characteristic feature of this chapter are the abstruse forms of the names of most of the angels as compared with those of the other parts of the book, where the names are formed from the functions assigned to the angels. Here the derivations are obscure. It is noteworthy that most of the names are found in *Hek. R.*, to which this chapter even otherwise seems to be related—e.g. by the conception of 'the watchers of the doors of the Halls' (vs. 3), the common derivation of 'ANAPHIEL (vs. 19) etc. Though several of these angel-names are not registered by Schwab, *VA*, and a couple of them are ἀπαξλεγόμενα as far as printed books are concerned, they are preserved in many prayers, magical formulas, etc., extant in MSS. References are given below at each name.

(1) The angels of the first heaven . . . the prince of the first heaven . . . second heaven etc. On the seven heavens see note on ch. xvii. 3. The princes, *sārīm*, of the several heavens are pictured as having each one his suite of angels. They are mounted on horses (cf. *Mass. Hek.* iv and *Hek. R.* xvii seqq.) and pay homage one to the other when meeting. Unlike ch. xvii the present chapter mentions no names of these princes. That is to say, that the tradition embodied here probably knows no names of the 'princes of the heavens'. Consequently, in the view of this tradition, the heavens and their rulers form a comparatively low and unimportant part of the heavenly splendours, whereas the author of ch. xvii presumably sees all the glory of the Divine Court contained within the seven heavens.

Crown of glory is the mark of distinction common to all the angels and princes in this chapter with the exception of the seventy-two princes of kingdoms (vs. 3) and the two highest princes acc. to vs. 25, to whom is assigned the 'crown of royalty'. Crowns are in the Talmudic-Midrashic literature as well as in the Apocalyptic

And THE PRINCE OF THE SECOND HEAVEN, when he sees the prince of the third heaven, he removes the crown of glory from his head and falls on his face.

And THE PRINCE OF THE THIRD HEAVEN, when he sees the prince of the fourth heaven, he removes the crown of glory from his head and falls on his face.

And THE PRINCE OF THE FOURTH HEAVEN, when he sees the prince of the fifth heaven, he removes the crown of glory from his head and falls on his face.

¹And THE PRINCE OF THE FIFTH HEAVEN, when he sees the prince of the sixth heaven, he removes the crown of glory from his head and falls on his face.

And THE PRINCE OF THE SIXTH HEAVEN, when he sees the prince of the seventh heaven, he removes the crown of glory from his head and falls on his face.¹

(2) And THE PRINCE OF THE SEVENTH HEAVEN, when he sees THE SEVENTY-TWO PRINCES OF KINGDOMS, he removes the crown of glory from his head and falls on his face.

²(3) And the seventy-two princes of kingdoms, when they see THE DOOR KEEPERS OF THE FIRST HALL IN THE 'ARABOTH RAQIA' in the

1-1 D: 'And the prince of the fifth heaven from before the prince of the sixth and the prince of the sixth heaven before the prince of the seventh heaven' 2 D inserts as title: 'The Order of the Halls'

attributed to (a) God himself: *TB. Chag.* 13 b, *Ber.* 7 a, *Ex. R.* xxi; (b) the righteous in the world to come: *TB. Ber.* 17 a, b, *Lev. R.* xx, *Test. Benj.* iv. 2, *Asc. Is.* vii. 22, viii. 26, ix. 10; (c) angels: *chh.* xvi. 2, xl. Cf. *ch.* xii. 3. For the removing of the crown(s) as token of homage cf. *Rev.* iv. 4, 10. An exact parallel of expression is found in *Alph. R.* 'Aqiba, rec. B, *BH.* iii. p. 61.

(2) The seventy-two princes of kingdoms. They are the representatives in heaven of the different kingdoms on earth, but are also connected with the planets and constellations. Concerning them cf. notes on *chh.* xvii. 8 and xxx. 1, 2. In *ch.* xxx they are supplemented by a leader, 'the Prince of the World' (cf. *TB. Yeb.* 16b, *Chull.* 60 a, *Sanh.* 94 a). Their number varies between seventy and seventy-two: *1 En.* lxxxix. 59, *P. R.* 'El. xxiv, *TB. Sukka.* 29 a. It is possible that the number seventy-two originated from the addition to the seventy princes of Mikael and Sammael (or Mikael and Gabriel) as their rulers. Mikael is the representative of Israel and Sammael of Rome and thereby the chief of all the Gentile nations. More probable is, however, that the number seventy-two is arrived at from astrological considerations. See note on *ch.* xvii. 8. Peculiar to this chapter is their position between the prince of the seventh heaven and the door-keepers of the Halls, their abode being usually near the Throne of Glory (*ch.* xxx, *Pesiqtha.* xxvii, *TB. Sukka.* 29 a). In *ch.* xvii, again, they have their place in the second heaven (Raquia') and are in rank under not only the princes of the heavens but also the princes of the sun, moon and constellations. (Cf. however note on *ch.* xvii. 8.)

(3) The door keepers of the first Hall in the 'Araboth Raquia'. The seven Halls or Palaces are situated in the highest of the seven heavens, the 'Araboth Raquia', and are pictured as arranged in concentric circles, 'one within the other' (*ch.* i. 1). The conception of the seven Halls which plays so conspicuous a rôle in

highest, they remove the royal crown from their head and fall on their faces.

³And THE DOOR KEEPERS OF THE FIRST HALL, when they see the door keepers of the second Hall, they remove the crown of glory from their head and fall on their faces.

And THE DOOR KEEPERS OF THE SECOND HALL, when they see the door keepers of the third Hall, they remove the crown of glory from their head and fall on their faces.

And THE DOOR KEEPERS OF THE THIRD HALL, when they see the door keepers of the fourth Hall, they remove the crown of glory from their head and fall on their faces.

And THE DOOR KEEPERS OF THE FOURTH HALL, when they see the door keepers of the fifth Hall, they remove the crown of glory from their head and fall on their faces.

And THE DOOR KEEPERS OF THE FIFTH HALL, when they see the door keepers of the sixth Hall, they remove the crown of glory from their head and fall on their faces.

And THE DOOR KEEPERS OF THE SIXTH HALL, when they see the DOOR KEEPERS OF THE SEVENTH HALL, they remove the crown of glory from their head and fall on their faces.³

(4) And the door keepers of the seventh Hall, when they see THE FOUR GREAT PRINCES, the honoured ones, WHO ARE APPOINTED OVER

3-3 *D* simplifies: 'And the door keepers of the first Hall before the door keepers of the second Hall, and the door keepers of the second Hall before (those of) the third, and the door keepers of the third Hall before those of the fourth etc.'

Hek. R. is in the present book quite outside the centre of interest. Cf. chh. i. 1, x. 2, xvi. 1, xxxvii. 1, xxxviii. 1, xlviii c 8. The door keepers of the Halls are in this chapter without names and definite number. In these respects it differs from *Hek. R.* xv, where each Hall is said to be guarded by eight angels, of which the names are given (chh. xv, xvii et seq.). Of these names—which comprise the door keepers of the first six Halls—two, viz. GEBURATIEL and ANAPHIEL, recur later in the present chapter (vss. 14 and 19) as names of higher angels.

Mass. Hek. iv, agreeing with *Hek. R.*, gives the number of the door keepers of each Hall as eight.

Names of the chiefs of the door keepers of the Halls are found in *Pirqe R. 'Ishm.* xx (*Bodl. MICH.* 175, foll. 20 a-26 a), although different from those of *Hek. R.* As chief of the guardians of the fourth Hall occurs SAGNESAGIEL of vs. 11 here. Cf. *Zohar*, i. 41 a and ii. 245 a-268 b.

The functions of the door keepers of the Halls are the guarding of the entrance to the Halls generally and especially the control of the admittance of the aspirants to the vision of the *Merkaba*, so that nobody may enter who is not 'worthy' ('*rā'ūy*') acc. to *Hek. R.* (cf. ch. xvii *e.a.*). This is probably implied also in ch. i. 3, where R. Ishmael begs God to protect him against the zeal of *Qašpiel* (or *Qašiel*), an angel-prince who in this connection, no doubt, is to be considered as (one of) the guardian(s) of the door of the seventh Hall (cf. *ib.* vs. 2; *Zohar*, ii. 248 b).

(6) The four great princes...who are appointed over the four camps of

THE FOUR CAMPS OF SHEKINA, they remove the crown(s) of glory from their head and fall on their faces.

(5) And the four great princes, when they see TAG'AS, ⁵the prince, great and honoured⁵ with song (and) praise, at the head of all the

5-5 in aramaic.

Shekina. In ch. xxxvii the four camps of *Shekina* are mentioned together with 'the four chariots of *Shekina*'. In ch. xxxv all the myriads of camps of angels are said to be arranged in four rows, at the head of each row there being 'a prince of the army'. Probably 'the four great princes' here are to be understood as identical with the princes of the army in ch. xxxv. 3. In this case the camps of *Shekina* are the four companies of ministering angels arranged by the Throne of Glory, especially in their aspect as performers of *Qēdushsha*.

In other writings 'the four camps of *Shekina*' is not an infrequent term and in later cabbalistic traditions a considerable amount of speculation centres round this conception. (Cf. here esp. *Zohar*, iii. 50 a: ר' מישרין)

Now one generally finds that the 'princes of the camps of *Shekina*' are named as Mikael, Gabriel, Uriel (more seldom: Nuriel) and Raphael. Cf. *Mass. Hek.* vi: "four companies of ministering angels praise before the Lord; the first *camp* under Mikael to the right, the second *camp* under Gabriel to the left, the third under Uriel before Him and the fourth under Raphael from behind", and it is added "the *Shekina* is in the middle".

Acc. to *Ma'ase Merhaba* (*Add.* 26922) 'the princes of the four camps of *Shekina*' are: Mikael, Gabriel, Uriel and Raphael, standing to the right, to the left, in front of and behind the Throne of Glory resp.

In *P. R. 'El.* iv the four angels Mikael, Uriel, Gabriel and Raphael stand by the Throne of Glory as leaders of four camps of angels glorifying the Most High. A similar picture is drawn by the *Widdury Yaphe* (*Add.* 15299, fol. 113 b).

The 'three men' visiting Abraham, Gen. xviii. 2 seqq. are in *Siḡmī ad loc.* once identified with the angels Mikael, Gabriel and Raphael, and again with Raphael, Uriel and Gabriel, "who are the camp of *Shekina*".

The conception of the four princes in charge of the 'uttering of the Song' before the Holy One, is traceable as far back as 1 *En. chh.* xxxix. 12, 13 and xl, lxxi, ix. 1, where there are mentioned "FOUR PRESENCES ON THE FOUR SIDES OF THE LORD OF SPIRITS... uttering praises before the Lord of Glory". Their names are here: Mikael, Raphael, Gabriel and *Phanuel*. See also 2 *En.* xviii. 9, and CHARLES, 1 *En.* note on xl. 2.

Towards the formation of the idea of 'four princes of the four camps of *Shekina*', speculations on the "four living creatures" of Ezek. i. 5, 10, and the traditions of the four princes Mikael, Gabriel, Raphael and Uriel have, presumably, combined. In later cabbalistic sources one actually finds that the 'four camps of *Shekina*' are referred to the 'Eagle-Ox-Lion-Man' vision, e.g. *YR.* i. 80 a (*Meg. 'Anuq.*).

Instances of other developments of the conception of 'the camps of Shekina': the four camps of *Shekina* are imaged by the arrangement of the "armies of Israel", Nu. i. 3, acc. to *Bachya* (*ad loc.*); they surround the *Shekina* or "the body of *Shekina*" which is the same as the "Greater Metatron", but are above the Lesser Metatron who stands on the heads of the living creatures, the *Chayyoth* (*YR.* i. 57 a); "in the camp of *Shekina* are Metatron, Sandalphon, Uriel, Raphael, Mikael, Gabriel" (*Shēnē Luchoth ha-Berith*, cited by Derek 'Emeth on *Zohar*, i. 149 b).

(5) Tag'as. (תגאס). Not included in Schwab, *VA.* The name occurs in the prayer attributed to R. *Hammuna ben Sabha* (*Or.* 6577, fol. 13 a, *Add.* 27187, fol. 67 b, *Add.* 27199, fol. 299 e.a.), and also in another, anonymous, prayer in *Add.* 15299, fol. 104 b. In these cases it is a Divine name (really a double *temura*) always followed by טעצצ and letters of the *Tetragrammaton*. The epithet 'great

children of heaven, they remove the crown of glory from their head and fall on their faces.

(6) And Tag'aṣ, ⁵the great and honoured prince⁵, when he sees BARAṬṬIEL⁶, the great prince of three fingers in the height of 'Araboth, the highest heaven, he removes the crown of glory from his head and falls on his face.

(7) And Baraṭṭiel⁶, the great prince, when he sees HAMON, the great prince, the fearful and honoured, pleasant and terrible one—who maketh all the children of heaven to tremble, when the time draweth nigh (that is set) for the saying of the '(Thrice) Holy', as it is written (Isa. xxxiii. 3): "At the noise of the tumult (*hāmōn*) the peoples are fled; at the lifting up of thyself the nations are scattered"—he removes the crown of glory from his head and falls on his face.

(8) And Hamon, the great prince, when he sees ṬUTRESIEL⁷, the great prince, he removes the crown of glory from his head and falls on his face.

5-5 in aramaic. 6 *D*: 'Aṭaphiel' 7 so acc. to the full reading of *D*. *A*: מטריאל. *D* adds 'וי' after the name.

and honoured prince' (שרא רבא ויקריא) is the same as that given to Metatron in the beginning of *Shi'ur Qoma* (*Bodl. opp.* 467, fol. 58 a, *opp.* 563, fol. 52 b, *S. Raziel*). Cf. also in *S. Elijahu, beg....* רבא ליה מיכאל שרא רבא.

This angel is said to be 'honoured with song and praise' and to stand 'at the head of all the children of heaven'. In view of the functions commonly assigned to the 'princes of the camps of the *Shekina*' of the preceding verse (see note above) these expressions are probably to be understood as referring to the performance of the 'Thrice Holy' and to the angels uttering the *Qēdushsha*. The function of the angel may be that of a conductor of the song-uttering angels.

(6) Baraṭṭiel (ברטטאל). Neither this nor the 'Aṭaphiel of *D* is included in Schwab, *VA*. Aṭaphiel is found in *Hilk. Mal'akim La*, fol. 117 b. of three fingers. Cf. *Hilk. Mal'akim, ib.*: "'Aṭaphiel lifteth up the 'Araboth Raqia' on his fingers". Also ch. xxxiii. 3 of the present book ('the Holy Chayyoth bear the Throne of Glory... each one with three fingers'). Does the attribute 'of three fingers' here possibly stand in any connection with the recital of the Thrice Holy?

(7) Hamon, המון ('tumult'). The expression 'makes the children of heaven to tremble etc.' probably means 'announces the arrival of the time appointed for the *Qēdushsha*'. The trembling and fear with which all the heavenly household is seized at the moment before the recital of the Thrice Holy is pictured e.g. in ch. xxxviii. For the attributes 'fearful, honoured, pleasant and terrible' cf. the parallels of chh. xx. 1, xxii. 1, xxv. 1, xxvi. 1. This method of heaping epithets after the name of a high angel-prince is frequently employed in *Hek. R*. The attributes were probably from the beginning intended as marks of distinction, applied according to a certain system to denote the resp. rank assigned to each prince. (Cf. also in *Mandaic.*)

(8) Ṭutresiel. See Schwab, *VA*, pp. 134, 136. The name is of frequent occurrence, although in variant forms. Schwab explains it as 'διούροπος El', 'piercing God'. Here and in *Midrash Sar Tora* it is the name of an angel. Often it appears as one of the names of the Godhead (*Hek. R.* xi. 2, xii, xiii, xv) or of Metatron (*Sefer ha Chesheq*, foll. 4 b, 8 a).

There are many variants of the name, which are enumerated in *Hek. R.* xii.

(9) And Tūtresiel⁷ H', the great⁹ prince, when he sees ATRUGIEL⁸, the great⁹ prince, he removes the crown of glory from his head and falls on his face.

(10) And Atrugiel⁸ the great⁹ prince, when he sees NA'ARIRIEL H', the great⁹ prince, he removes the crown of glory from his head and falls on his face.

(11) And Na'aririel H', the great⁹ prince, when he sees SASNIGIEL¹⁰, the great⁹ prince, he removes the crown of glory from his head and falls on his face.

(12) And Sasnigiel H', when he sees ZAZRIEL H', the great⁹ prince, he removes the crown of glory from his head and falls on his face.

(13) And Zazriel H', the prince, when he sees GEBURATIEL H', the prince, he removes the crown of glory from his head and falls on his face.

7 so acc. to the full reading of *D*. *A*: מַטְרִיֶּסִיָּאֵל. *D* adds 'י' after the name.
8 *D*: 'ATRUGNIEL י' 9 *D* om. 10 *D* adds 'י' after the name.

See also *S. Raziel*, 40 a, 43 b. The STUTREYAH of *Zohar*, ii. 245 b, 246 a, is perhaps also a variant (through transposition of the letters) of the same name.

(9 and 10) Atrugiel or Atrugniel (*D*) not in Schwab, *VA*. It is to be considered identical with the 'Atrigiel' of *Hek. R.* xxii. 1 and 3, the name of one of the door keepers of the seventh Hall. The form *Tagriel*, *ib.* xv and xvii, is apparently also a variant. Cf. the names 'Atrigi(a)sh' (cited from *Hek. R.* xxx) and *Aṭarniel* in Schwab, *VA*, p. 51. Schwab derives the former from *τράγος*, he-goat, goat-buck, the traditional symbol of a demon (cf. *sa'ir*).

Na'aririel: i.e. Na'ar 'El (Na'ar = Child, Youth, the name of Metatron, ch. iii). Occurs in *Hek. R.* in the form of Na'aruriel as the name of one of the door keepers of the seventh Hall (ch. xxii, together with Atrugiel). The 'H' forming the second part of the name of this and the following princes stands for the *Tetragrammaton* (like 'י' in *D*). Cf. the expression 'called by the name of YHWH', ch. ix. 3 and note, *ad locum*.

(11) Sasnigiel is one of the variants of 'Sagnesagiel' or 'Segansagel', in ch. xlviii. 1, 2 appearing as the last of the names of Metatron, with the epithet 'the Prince of Wisdom'. Probably derived from נָנִין (treasure), cf. גִּבּוֹרֵי חֵכְמָה.

In the *Apocalyptic Fragment* (e.g. *BH.* v. 167-169) likewise, it is the name of "the prince of the Presence" who shows R. Ishmael the future.

Other forms are:

SASNIEL: *S. Raziel*, 24 a, 41 a; ZEGANZEGAE: *ib.* 2 b, called "the Prince of the Tora"; SANSAGGIEL: Schwab, *VA*, cf. the explanation given there; ZANGEZIEL: *Midrash Petirath Moshe*; here he is introduced as Moses' teacher and, together with Mikael and Gabriel, fetching Moses' soul at the time of his death. He is also called "Prince of the world" (probably identical with *Metatron*).

In *Pirqe R. Ishmael*, xx, he is the chieftain of the door keepers of the fourth Hall.

Acc. to *Berith Menucha*, 37 a, he is one of the Seraphim and is appointed over "the peace".

(12) Zazriel, probably = 'the Strength of God,' 'the strong God.' Cf. the following names.

(13) Geburatiel = 'the strength of God'. Cf. the preceding verse. Acc. to *Hek. R.* xv and xvii, he is one of the door keepers of the fourth Hall. See Schwab, *VA*, p. 91.

(14) And Geburatiel H', the prince, when he sees 'ARAPHIEL¹¹ H', the prince, he removes the crown of glory from his head and falls on his face.

(15) And 'Araphiel¹¹ H', the prince, when he sees 'ASHRUYLU¹², the prince, ¹³who presides in all the sessions of the children of heaven¹³, he removes the crown of glory from his head and falls on his face.

(16) And Ashruylu H'¹², the prince, when he sees GALLIŞUR H', THE PRINCE, WHO REVEALS ¹⁴ALL THE SECRETS OF THE LAW (*Tora*)¹⁴, he removes the crown of glory from his head and falls on his face.

11 D: 'Ta'raphiel'

12 D: 'Ashruyli' "

13-13 D: 'who is the head [over] all the students on high' 14-14 D: 'the secret of the crown of the Law, the crown of Holiness, the crown of Kingship'

(14) 'Araphiel' = 'the neck of God' (the neck is the symbol of strength). Acc. to *Hek. R.* xxi, he is one of the guardians of the second Hall. See Schwab, *ib.* p. 217.

(15) 'Ashruylu' = 'who causes to dwell', 'who causes to rest', *scil.* the disciples of Tora in the heavenly colleges, hence the function here assigned to him: 'presideth in all the sessions of the children of heaven'. That the colleges on earth have their counterparts in heaven is a common Rabbinic idea. Cf. the somewhat different picture of Metatron's function in ch. xlviii c 12.

In accordance with the present view is the epithet 'prince of Tora' given to this angel in *S. Razel*, 45 a. In *Hek. R.* xii, 'Ashruylii' is one of the twenty names of the Godhead; *ib.* xxx (*Sar Tora*) it is the name of an angel-prince. Cf. the interpretation, Schwab, *VA*, p. 77.

(16) Gallişur... who reveals all the secrets of the Law. The name is of comparatively frequent occurrence. *Pesiqta R.* par. xx, explains it as "he who reveals the reasons of the Creator" (*Şur*, Is. xxvi. 4).

The same explanation of the name 'Gallişur' is repeated, with the addition of some other details, in *Ma'yan Chokma*, BH. i. 60, in 'Aggadath Shema' Israel, BH. v. 165, also in *S. Razel*, 41 b, 42 a, 42 b, and *P. R. 'El.* iv, further in citations in *Siuni*, 93 d, and *YR.* ii. 67 a. Acc. to these sources he is identical with the angel, called 'Razel' (= 'the secret(s) of God'); he hears the Divine decrees from behind the 'Curtain' (cf. ch. xlv. 1) and reveals them to the world; he stands next to the *Chayyoth* and spreads his wings, so that the ministering angels shall not be consumed by the fire that goes forth from the breath of the *Chayyoth*. Acc. to *S. Razel*, 42 b, he is one of the Princes of the Law.

In *Sefer ha-Yashar* ("the book of the righteous", *Add.* 15299, fol. 91 a b) it is related, that the book in question "was given to Adam by the hand of Gallişur". (Note the similar narrative in *S. Razel*, 3 a, which is probably another version of *S. ha-Yashar*, where the name of angel is Razel.)

In a prayer in the same MS., fol. 144 a, he is invoked—with the 'kinnuyim' (or supplementary names) of 'Yephiphyah' (cf. ch. xlviii d 4) and *Yophiel*—to give assistance in the study of the Tora.

From these sources it appears that the traditions assigned to him mainly two functions: revealer of the Divine Secrets and Prince of the Law. These two functions are here, rightly, comprised in the one "revealer of all the secrets of the Law". The Divine secrets are embodied in the Tora, constituting its inner meaning, the technical term for which is "the secrets of the Law". (Cf. on chh. ix. 1 and xlviii d 7 et seqq.)

As the Prince of the Law he is here probably connected with the Divine Judgement

(17) And Galliṣur H', the prince, when he sees ZAKZAKIEL H', the prince who is appointed to write down the merits of Israel on the Throne of Glory, he removes the crown of glory from his head and falls on his face.

(18) And Zakzakiel H', the great¹⁵ prince, when he sees 'ANAPH(I)EL H', the prince¹⁶ who keeps the keys of the heavenly Halls, he removes the crown of glory from his head and falls on his face¹⁶. Why is he called by the name of 'Anaphiel? Because the bough of his honour and majesty and his crown and his splendour and his brilliance covers (overshadows)¹⁷ all the chambers of 'Araboth Raqia' on high even as the Maker of the World (doth overshadow them). Just as it is written with regard to the Maker of the World (Hab. iii. 3): "His glory covered the heavens, and the earth was full of his praise", even so do the honour and majesty of 'Anaphiel cover all the glories of 'Araboth the highest.

¹⁵ D om. ¹⁶⁻¹⁶ D: 'he removes the crown of glory from his head and falls on his face. And 'Anaphiel, the prince, he is appointed to keep the keys of the Halls of 'Araboth Raqia'. ¹⁷ so D. A om., probably taking ענף as a verb, thus giving the meaning: 'Because his honour etc. (overbranch) overshadow all the chambers etc.'

which in its different aspects is represented in nearly all the following angel-names; through the said epithet he is also connected with the foregoing 'Ashruylu'.

(17) Zakzakiel, 'Merit-God', is the same both with regard to name and function as 'Zekukiel' of *S. Raziel*, 21 b: "the Prince of the merits of Israel".

(18) 'Anaphiel, 'the branch of God'. In ch. vi of the Enoch-Metatron piece of the present book he is the angel who removes Enoch to the heavens; *ib.* ch. xvi (acc. to the reading of *BD*) he is the angel who gave Metatron sixty strokes with lashes of fire. (Vide *Introd.* section 8 u, x, y).

Acc. to *Hek. R.* xv, xvii, he is one of the door keepers of the fourth Hall. *Ib.* ch. xxii. 4, he is one of the guardians of the seventh Hall. A similar, partly literally identical, explanation of his name as in the second part of the present verse is given there.

The expression 'who keeps the keys of the Halls of 'Araboth Raqia' is the only trace in this chapter of the connection of the high angel-princes enumerated here with the guardianship of the heavenly Halls, whereas all of them that recur in *Hek. R.* are there guardians of one or the other of the Halls, mostly the seventh or the fourth. He has here the control of all the Halls.

The said statement "keeps the keys of the Halls of 'Arabōth Raqia'" together with the following part of the verse attribute a remarkably high position to 'Anaphiel: he is compared with "the Creator of the world". In *Hek. R.* xxii, he is called "the most beloved of all the guardians of the heavenly Halls, the Prince, 'Ebed (the Servant, Metatron's name), who is called thus by the name of his Master". A similarly high position is also implied by the passages in the Enoch-Metatron piece, just referred to. Another instance is the quotation from 'Sōdē Rāzā' in *YR.* i. 5 a: "the angel 'Anaphiel, to him are given in charge the 'ring' and the seal of heaven and earth, and all on high kneel down and prostrate themselves before him".

(19) And when he sees SOTHER 'ASHIEL H', the prince, the great, fearful and honoured one, he removes the crown of glory from his head and falls on his face. Why is he called ¹⁸Sother Ashiel¹⁸? Because he is appointed ¹⁹over the four heads of the fiery river over against the Throne of Glory; and every single prince who goes out or enters before the *Shekina*, goes out or enters only by his permission. For the seals of ²⁰the fiery river²⁰ are entrusted to him. And furthermore, his height is 7000 myriads of parasangs. And he stirs up the fire of the river; and he goes out and enters before the *Shekina* to expound ²¹what is written (recorded)²¹ concerning the inhabitants of the world. According as it is written (Dan. vii. 10): "the judgement was set, and the books were opened".

18-18 so D. A: 'Sother and Ashiel' 19 A ins.: 'from the beginning'
 20-20 so D. A: 'the four fiery rivers' (corrupt for 'the four heads of the fiery river'?) 21-21 so D. A om.

(19) Sother 'Ashiel H' = 'who stirs up the fire of God'. The explanations of the name as they appear in the present verse are quoted in *Hilkot ha Kisse La*, fol. 138 a. A points: סוֹתֵר אֲשִׁיֵּל (no other names in this ch. pointed).

He is here the angel appointed over the fiery river *Nehar di-Nur*, the speculations on which evolved from the beginning of Dan. vii. 10, the passage quoted in this verse. For the conceptions of the fiery river, see note on ch. xxxiii. 5.

The four heads of the fiery river. It is difficult to discern from A, whether 'four' or 'seven' are meant, the characters for 'daleth' (= 4) and 'zain' (= 7) being, in the current script employed there, almost indistinguishable. In *Hil. ha Merkaba* (Add. 27199, fol. 126 a) however, the "heads of the fiery river of the Throne of Glory" are definitely stated as four. If 'seven' is the correct reading here, the number '7000 myriads' would be explained as derived from 'the seven heads of the fiery river'. Ch. xxxiii. 4 mentions 'seven fiery rivers', an amplification frequently met with in the '*Södē Rāzā*' by Eleazar of Worms (cf. e.g. the quotation from this writing, YR. i. 4 b). The fiery river, usually described as issuing forth "from under the Throne of Glory" or "from the perspiration of the holy *Chayyoth*" is here simply described as being situated over against the Throne of Glory and is in the present connection probably conceived of as dividing the Throne of Glory with the *Shekina* from the world of the common angels and angel-princes, through which 'fiery stream' they must pass when they wish to enter before the *Shekina*. On this assumption the expression 'every prince... does not go out nor enter but by his permission' would be intelligible: *Sother 'Ashiel*, who is the guardian of the fiery river, also controls who shall pass through it to the *Shekina*. The fiery river as a bath of purification and preparation for the angels is a common idea in this and related writings. Cf. note on ch. xxxiii. 5.

he goes out and enters before the *Shekina* to expound what is written concerning the inhabitants of the world (*lit.* 'to expound in the writings of'). A perhaps reads: 'enters to the Curtain of the inhabitants of the world', i.e. the Curtain, on which everything is recorded acc. to ch. xlv. 1 seqq.). This strange expression obtains its elucidation by the quotation of Dan. vii. 10 with its reference to 'the Judgement'. The fiery river is also, and foremost, the symbol of the execution of the judgement on man. Hence *Sother 'Ashiel* is connected with the Divine Judgement, as far as he 'stirs up the fire of the *Nehar di-Nur*'. He, as it were, regulates the heat of the fire according to the requirements of judgement.

(20) And Sother 'Ashiel ²²the prince²², when he sees ²³SHOQED CHOZI²³, the great prince, the mighty, terrible and honoured one, he removes the crown ²⁴of glory²⁴ from his head and falls upon his face. And why is he called ²⁵Shoqed Chozi²⁵? Because he weighs ²⁶all the merits (of man)²⁶ in a balance in the presence of the Holy One, blessed be He.

(21) And when he sees ZEHANPURYU²⁷ H', the great prince, the mighty and terrible one, honoured, glorified and feared in all the heavenly household, he removes the crown of glory from his head and falls on his face. Why is he called Zehanpuryu²⁸? Because he rebukes the fiery river and pushes it back to its place.

(22) And when he sees 'AZBUGA H', the great prince, glorified, revered, honoured, adorned, wonderful, exalted, beloved and feared among all

26-26 D om.

27 D: 'Zephatharyi'

28 D: 'thus'

(20) Shoqed Chozi, also in the forms '*Shaqad Hozii*', '*Sheqar Chozii*' (the former in the readings of *D* and *Midrash Sar Tora*, the latter in *Hek. R.* and *S. Raziel*, 45 a). Derivations uncertain ('Waking' or 'Watching and Seeing'; Schwab, *VA*, p. 259: 'False Seer' [based upon the form '*Sheqar Chozii*']). Cf. the name '*Sheqadyahiel*', *Hek. R.* xxii and Schwab, *ib.*

The explanation given in the present verse rather presupposes a form '*SHEQAL ZAKI*' ('weighing merits') or similar. (Cf. Mandaitic: *Abathur*, Introd. sect. 13 Ce.)

In *S. Raziel*, 45 a (where other names of this ch. recur), he is mentioned after '*Ashruylu*' as one of "the Princes of Tora". In *Hek. Zot. (Bodl. MICH.* 8, foll. 68 b, 69 a) the name recurs twice, in the form of *Sheqad Chozyah* (a) in a hymn to God, (b) as the name in which Metatron is invoked by the scholar who is watching and praying during the night.

For the idea of 'weighing merits' cf. box, *Ezra Apocalypse*, p. 19, note p; 1 *En. xli.* 1.

(21) Zehanpuryu. Explained by Schwab, *VA*, thus: "this is the face of fear" (p. 121). More probable, at least in the connection in which the name appears here, is the explanation or reading of *S. Raziel*, 45 a: '*Zeh Paṭar*' = '*this one exempts*', '*this one sets free*'. In this chapter he represents the attribute of mercy, a constituent part of the Judgement, acc. to chh. xxxi and xxxiii et. freq. Such is at least the apparent significance of the words: 'pushes the fiery river back'. Contrast the function given to Sother 'Ashiel acc. to vs. 19 of stirring up the *Nehar di-Nur*, an expression which is there explicitly referred to the Judgement. The fiery river is the means of or symbol of punishment and execution of judgement.

In *Hek. R.* xvii. 5, he is called "Prince of the Presence". *Ib.* xxi, he is one of the guardians of the seventh Hall. There might be some connection between this name and the 'PURIEL' of *Test. Abraham*, ch. xii, the name of one of the two high angels who function at the Judgement.

(22) 'Azbuga. Schwab, *VA*, p. 49, explains it as 'messenger'. Zunz, *GV*, p. 148, contains the notice that *Hek. Zot.* explains the name as denoting 'strength' (*ib.*). It recurs in *Midrash Sar Tora* and several times in *Berith Menucha*.

In a prayer in *S. ha Chesheq* (*Add.* 27120, fol. 11 b) he is invoked to deliver the suppliant from "every evil, disease and affliction". In this writing '*Azbuga* is mostly one of the names of the Godhead. It is also the name of a '*temurā*'.

In *S. Raziel*, 42 b, it is inscribed on an amulet which also contains the names of

the great princes who know the mystery of the Throne of Glory, he removes the crown of glory from his head and falls on his face. Why is he called 'Azbuga? Because in the future he will gird (clothe)²⁹ the righteous and pious of the world with the garments of life and wrap them in the cloak of life, that they may live in them an eternal life.

(23) And when he sees the two great princes, the strong and glorified ones who are standing above him, he removes the crown of glory from his head and falls on his face. And these are the names of the two princes³⁰:

SOPHERIEL H' (WHO) KILLETH, (Sopheriel H' the Killer), the great prince, the honoured, glorified, blameless, venerable, ancient and mighty one; (and) ³¹SOPHERIEL H' (WHO) MAKETH ALIVE (Sopheriel H' the Lifegiver), the great prince, the honoured, glorified, blameless, ancient and mighty one³¹.

29 so *Da. A*: 'because he is girded etc.' 30 so *D. A*: 'the angels, the princes' 31-31 in *D* this is transferred after 'he writes him in the books of the dead' vs. 24.

KERUBIEL (ch. xxii), SOPHERIEL (vss. 23 and 24 of the present chapter), YEPHIPHYA (ch. xlviii D 4) and GALLISUR (vs. 16 of this chapter).

the princes who know the mystery (or 'secrets' D) of the Throne of Glory. This probably refers to angels, who enjoy the privilege of constant access to the Throne of Glory, and hence know the *inner reasons of the Divine decrees*. The expression, then, has the same import as the phrase 'stand inside the Curtain' applied to some high angels. Cf. further, ch. xlv. 1 and references there.

Garments of life. Cf. 1 *En. lxii. 15, 16*: "and the righteous and elect shall have risen from the earth...and they shall have been clothed with garments of glory, and they shall be the garments of life from the Lord of Spirits". 2 *Esdras ii. 45*: "These be they that have put off the mortal clothing and put on the immortal". Cf. also 2 *En. xxii. 8*. For the conceptions expressed by the terms 'garments of glory' or 'garments of life' cf. note on ch. xii. 1. *The garments of life are here the means by which eternal life is conferred upon the righteous*, possibly according to the literary principle of 'pars pro toto'. They are the outer appearance of the essentially changed or new body (of the righteous in the future life), constituted of light-substance. *Vide CHARLES, 1 En.*, notes on chh. lxii. 16 and cviii. 12. 'Azbuga' is in the present chapter explained from מִצָּר (= 'gird') and בִּגְדָּה (= 'garment').

(23) Sopheriel... The name Sopheriel is not found in Schwab, *VA*. It occurs in *S. Raziel*, 21 b, as the name of "the Prince, appointed over the books of life", thus with the same function as is here assigned to the one of the two princes with that name.

It is obvious that the name here is understood as 'Sopheriel', i.e. 'the Scribe (of God)'. But the writing or spelling of the name (*Sin-Shin* instead of *Samek*) suggests that the name *earlier* or *originally* was referred to the word 'Shophar' (= 'trumpet'), meaning the angel who blows the trumpet, *scil.* at the judgement, perhaps at the time for the opening of the books (for this idea cf. BOX, *Ezra Apocalypse*, ch. vi. 23 and note d, p. 75). Since the angel, if this be correct, already was connected with the judgement, the change to the present interpretation was comparatively easy. In *S. Raziel*, 42, is found the similar name *Shaphriel* from 'Shefer' (= 'beauty').

The angels function as scribes. They are differentiated into two, one for 'life' and one for 'death' in accordance with the noticeable tendency of the book to place

(24) Why is he called Sopheriel H' who killeth (Sopheriel H' the Killer)? Because he is appointed over the books of the dead: [so that] everyone, when the day of his death draws nigh, he writes him in the books of the dead.

Why is he called Sopheriel H' who maketh alive (Sopheriel H' the Lifegiver)? Because he is appointed over the books of the living (of life), so that every one whom the Holy One, blessed be He, will bring into life, he writes him in the book of the living (of life), by authority of *MAQOM*. Thou might perhaps say: "Since the Holy One, blessed be He, is sitting on a throne, they also are sitting when writing". (Answer): The Scripture teaches us (1 Kings xxii. 19, 2 Chron. xviii. 18): "And all the host of heaven are standing by him".

two polar opposites side by side. Cf. also ch. xxxiii. 2 and note (two scribes) and note on ch. xlv. 2.

The attributes 'H who killeth' and 'H who maketh alive' are in all probability derived from 1 Sam. ii. 6: "the Lord (H = YHWH) killeth and maketh alive". This passage is also used *TB. Rosh ha Shana*, 16 a, as point of support for the views concerning the Judgement which are expressed there.

(24) Books of the dead. . . books of the living. The 'books of the dead and the books of the living' are here merely the books recording the moments designed for each individual's birth and death. The books of the living contain the names of the living, the books of the dead those of the dead. Otherwise 'the book(s) of life' regularly refer to the righteous, which are recorded in this book for eternal life, for God's remembrance, and hence, when mentioned, 'the book(s) of death or the dead' are conceived of as containing the names of the wicked, for perdition. Parallel with this conception goes that, according to which 'the books' record the deeds of 'the world' or of the righteous and the wicked separately. The former idea is represented in the O.T. (Is. iv. 3, Ex. xxxii. 32 seq., Ps. lxix. 29, cxxxix. 16, Mal. iii. 16, Dan. xii. 1), in 1 *En.* xlvii. 3, civ. 1, cviii. 3, *Jub.* xxx. 20, 22, xxxvi. 10, *Ap. Elijah*, iv. 2, xiv. 5; Rev. iii. 5, xiii. 8, xvii. 8, xx. 12, 15, xxi. 27;—the latter in chh. xxx. 2 and xxvii. 2 of the present book, Is. lxxv. 6, Neh. xiii. 14, Dan. vii. 10, 1 *En.* lxxxi. 4, lxxxix. 61 et seqq., xc. 17, 20, xcvi. 6, xcvi. 7 seqq., civ. 7, cviii. 7 seqq., 2 *En.* l. 1, lii. 15, liii. 2 seqq., *Ap. Bar.* xxv. 1, *Copt. Apoc. El.* lii. 13 seqq., xi. 1 seqq., *Asc. Is.* ix. 26, 4 *Ez.* vi. 20, Rev. xx. 12. For references and discourses see BOX, *Exra Apocalypse*, p. 74, note y on ch. vi. 20; Dalman, *Worte Jesu*, i. 171; Zimmern in *Keilinschriften des Alten Testaments*, 3rd ed., ii. 505; Bousset, *Rel. d. Judentums*, p. 247; Weber, *Jüd. Theol.* 2nd ed., pp. 242, 282 et seqq.: further *Rosh ha Shana*, 15 b e.a., and the discourse on New Year's Day as day of Judgement in Piebig, *Mischna Traktat Rosch ha-Schana*, pp. 41-45. (Note. The '3 books' *ib.* p. 43, and note on ch. xlv. 1 of the present book.)

Māqōm = 'place', one of the technical terms of the Divine Majesty. Cf. the expression 'the Curtain of *Maqom*', e.g. ch. xlv. 1.

Thou might perhaps say etc. The suggestion that the scribes must be sitting when writing is refuted. "There is no sitting in heaven" cf. *Chag.* 15 a. The scriptural passage from which this is deduced, 1 Kings xxii. 19, is the one regularly used for the purpose. Acc. to *TB. Chag.* 15 a, however, Metatron, in his function as scribe, was at first allowed to 'sit and write', and in the Enoch-Metatron piece (chh. iii-xv) Metatron is placed on a Throne. Apart from this there seems to have been a set of traditions which felt no objection against ascribing 'yēshibā' ('sitting') to angel-princes or righteous dead. (For references see note on ch. x. 1.) To the other prevailing view which was rigorous in this respect, it was probably the case

"The host of heaven" ³² (it is said) in order to show us, that even the Great Princes, none like whom there is in the high heavens, do not fulfil the requests of the *Shekina* otherwise than standing. But how is it (possible that) they (are able to) write, when they are standing? It is like this:

(25) One is standing on the wheels of the tempest and the other is standing on the wheels of the storm-wind.

The one is clad in kingly garments, the other is clad in kingly garments.

The one is wrapped in a mantle of majesty and the other is wrapped in a mantle of majesty.

The one is crowned with a royal crown, and the other is crowned with a royal crown.

³² *D* ins. 'is not written here, but "and *all* the host of heaven"'

of the 'scribes' that suggested a deviation from the strict rule; the question was raised as here: 'how can they write, if they must be standing?' Cf. further ch. xvi and notes.

The unwillingness to admit any 'sitting in heaven', apart from the Throne of God, has arisen from the interest of guarding the Unity of the Godhead: there must not be even the appearance of two Divine Powers (*Chag.* 15 a, ch. xvi).

With the two princes *Sopheriel H'*, 'none like whom there is in the high heavens', the angelological system of the present chapter is concluded. They are the highest of the angels of the hierarchy, the different ranks of which are here enumerated from the lowest to the highest. From this it is clear that ch. xviii is independent of the following chapters xix seqq., which from their present context appear as a continuation of the angelological system here set forth. *At the beginning of this chapter it was shown in the notes that this chapter is also independent of its antecedent chapter. In fact, it stands out by itself from all the rest of the book.*

The reason why it was embodied in the angelological section is apparently its seeming connection with ch. xvii owing to the mention in both chapters of the angels and the princes of the different heavens. Besides, the beginning of ch. xix, 'above these three angels', indicates a preceding exposition of high angel-princes, and when the original beginning of the fragment, of which chh. xix seqq. are a continuation was lost, ch. xviii was put in as a substitute, although not a very happy one.

(25) This verse, with its lengthy and extravagant descriptions of the 'two angels' constitutes a striking contrast to the concise, summarizing character of the foregoing part of the chapter. The beginning of the verse is not very lucidly connected with vs. 24. The question 'how are they writing when standing?' is not intelligibly answered. It is difficult to understand how it could facilitate the writing to be standing 'on the wheels of the tempest'. Hence it is probable that vs. 25 is a later addition to the chapter. The end of the verse shows that the angels referred to are scribes like the princes *Sopheriel*. The addition was probably composed for the preceding verses, not adduced from another context.

The features used in the following description of the two angels are mainly those constantly recurring in descriptions of high angel-princes. Cf. the descriptions of KERUBIEL (ch. xxii. 1-9), OFFANNIEL (ch. xxv. 1-4), SERAPHIEL (ch. xxvi. 1-7).

standing on wheels Cf. ch. xxii. 7.

clad in kingly garments etc. Cf. chh. xii. 1, xvii. 8.

crowned with a royal crown Cf. *ib.* and frequently.

The one's body is full of eyes, and the other's body is full of eyes.

The appearance of one is like unto the appearance of lightnings, and the appearance of the other is like unto the appearance of lightnings.

The eyes of the one are like the sun in its might, and the eyes of the other are like the sun in its might.

³³ The one's height is like the height of the seven heavens, and the other's height is like the height of the seven heavens.

The wings of the one are as (many as) the days of the year, and the wings of the other are as (many as) the days of the year.

The wings of the one extend over the breadth of *Raqia'*, and the wings of the other extend over the breadth of *Raqia'*.

The lips of the one, are as the gates of the East, and the lips of the other are as the gates of the East.

The tongue of the one is as high as the waves of the sea, and the tongue of the other is as high as the waves of the sea.

From the mouth of the one a flame goes forth, and from the mouth of the other a flame goes forth.

From the mouth of the one there go forth lightnings and from the mouth of the other there go forth lightnings.

From the sweat of the one fire is kindled, and from the perspiration of the other fire is kindled.

From the one's tongue a torch is burning, and from the tongue of the other a torch is burning.

On the head of the one there is a sapphire stone, and upon the head of the other there is a sapphire stone.

³³ *D* ins. 'the one's splendour is like the splendour of the Throne of Glory and the other's splendour is like that of the Throne of Glory'

body full of eyes Cf. ch. xxii. 8.

the eyes are like the sun in its might Cf. ch. xxvi. 6.

their height like the height of the seven heavens Cf. ch. xxv. 4 etc., and esp. ch. xxii. 3.

wings as many as the days of the year, i.e. 365; cf. ch. xxv. 2, also ch. xxi. 3.

from the mouth of the one a flame goes forth Cf. e.g. ch. xxii. 4.

from the perspiration of them fire is kindled Cf. the current saying "from the perspiration of the *Chayyoth* a fiery river goes forth". *Gen. R.* lxxviii beg., *Lam. R.* on ch. iii. 23. Cf. the note on ch. xxxiii. 4.

From the one's tongue a torch is burning Cf. ch. xxii. 4: 'his tongue is a consuming fire'.

On the head of the one there is a sapphire stone Cf. ch. xxvi. 5: 'the sapphire stone upon his head'; also ch. xxii. 13.

On the shoulders of the one there is a wheel of a swift cherub, and on the shoulders of the other there is a wheel of a swift cherub.

One has in his hand a burning scroll, the other has in his hand a burning scroll.

The one has in his hand a flaming style, the other has in his hand a flaming style.

The length of the scroll is 3000 myriads of parasangs; the size of the style is ³⁴3000 myriads of parasangs³⁴; the size of every single letter that they write is 365 parasangs.

CHAPTER XIX¹

Rikbiel, the prince of the wheels of the Merkaba. The surroundings of the Merkaba. The commotion among the angelic hosts at the time of the Qēdushsha

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Above ²these three angels, these great princes² there is one

34-34 D: '3000 parasangs'. This is perhaps a better reading. It is more natural, that the style should not have the same length as the whole scroll.

1 D includes this chapter in the foregoing. 2-2 D: 'them, the *two* angels, these high princes' (למעלה מהן מושני).

a wheel of a swift cherub. Cf. the expression 'chariots of a swift cherub', ch. xxiv. 17.

The scroll and style are of fire, the heavenly matter. 'Graven with a flaming style' is an uncommonly frequent expression, referring e.g. to the letters engraved on the 'Fearful Crown', the Names on the Throne of Glory, etc. Cf. e.g. ch. xxxix. 1 and references in note, *ad loc.* Item, ch. xiii.

The scribes are represented as writing with a style of fire on a scroll of flames. Cf. *Midrash 'Aséreth Ma'amaroth*: "Tora was written down by the arm of the Holy One, blessed be He, with dark fire on white fire".

The numbers used in describing the sizes of the scroll, the style and the letters are based on 3000 and 365. The number 365 is used very often in this book, see esp. ch. ix. 3. It was conceived of as a cosmic and celestial number, being the number of the days of the solar year. The 3000 is probably made up of 1000 times 3, the number 3 being, of old, a mystical number. Cf. the 300 thousand 'gates' of ch. viii.

Chh. xix-xxii, xxv, xxvi. (Angelological system A 1, see Introduction, section 13 (1 A).)

Chh. xix-xxii, xxv, xxvi, form an angelological description of a systematic structure. The centre, from which the system is evolved, is the conception of the *Merkaba* with the Throne of Glory. The objects of the exposition are the angel-princes, appointed over the 'wheels of the *Merkaba*' and over the four classes of superior angels who minister at the *Merkaba* and by the Throne, as well as these angels themselves.

Prince, distinguished, honoured, noble, glorified, adorned, fearful, valiant, strong, great, magnified, glorious, crowned, wonderful, exalted, blameless, beloved, lordly, high and lofty, ancient and mighty, like unto whom there is none among the princes. His name

For the *Merkaba* speculations—derived from Ezek. i and x—and the different arrangements of the details of the *Merkaba*-picture, see the Introduction, sections 13 and 14.

The importance of these chapters consists primarily in the fact that they reveal a clear attempt at systematization. Beginning with 'the wheels of the *Merkaba*', the description proceeds from the lowest to the highest of the four classes of superior angels which, wanting a more adequate comprehensive appellation, may be called the *Merkaba*-angels. They are arranged in an order, placing the *Chayyoth* as the lowest and the *Seraphim* as the highest, thus: *Chayyoth*, *Kerubim*, *'Ophannim*, *Seraphim*. This order is by no means the one generally accepted. In most cases in the earlier cabalistic literature it seems that the writers had no clear view of the mutual order of the *Merkaba*-angels, and the cases that suggest an intended classification, represent, when compared, nearly all possible permutations of the four classes in question. Furthermore, all of them are not mentioned, in such classifications, some omitting the *Chayyoth*, others the *Kerubim* and so on. It may suffice as an illustration, to refer to the arrangement presented in ch. xxii c 2, where the order is as follows: 'the *Galgallim*, the *Kerubim*, the *'Ophannim*... the Holy *Chayyoth*, the Throne of Glory'. Cf. further the Introduction, section 13 (1 A).

On the other hand, in *P. R. 'El* iv, we meet with an order of the four classes of superior angels which is identical with the order represented in this section. In contrast with the present system, however, *P. R. 'El* puts the 'wheels of the *Merkaba*' together with the *'Ophannim* and the 'princes' assigned as chieftains over the resp. classes of angels here, do not appear there.

(1) Above these three angels, these great princes. The beginning of the chapter points to a preceding description of angels. In the present context the opening words refer to ch. xviii. That it is highly improbable, however, that ch. xviii was the original antecedent of ch. xix, has been pointed out above, note on ch. xviii. 24. Who are then, originally, the angels and princes referred to? No answer can be given to this question apart from mere conjectures. First of all, the words 'these three angels' or, as the reading of *D* runs, "them, the two angels" sound like a gloss. They might, in fact, easily have been an emendation made by the redactor who combined ch. xix with ch. xviii. By this gloss—if our assumption is correct—ch. xix is made to refer to the last named princes of ch. xviii. This is particularly so, if the reading of *D* be adopted (the two princes are then, of course, the two *Sopheriel H*, ch. xviii. 23–25). Assuming that the original beginning of the chapter had the form 'above these great princes', the subject of the preceding angelological fragment to which this expression refers, might have been, say, the 'princes of kingdoms'. Now the princes of kingdoms are the subject of the last verse of ch. xvii. The style of ch. xvii. 8 is also similar to that of the present section. It opens with the phrase 'above these', which is the regular inceptive expression of all the chapters in this section. IT IS POSSIBLE THAT CH. XVII. 8 BELONGED TO THE SAME ANGELOLOGICAL EXPOSITION, POSSIBLE ALSO THAT IT IMMEDIATELY PRECEDED WHAT IS NOW CH. XIX. Further, on the connection of ch. xvii. 8 with the rest of that chapter, see note, *ad loc.*

distinguished, honoured, noble etc. On the epithets added to the name of an angel-prince cf. note on ch. xviii. 7 and chh. xx. 1, xxii. 1, xxv. 1 and xxvi. 1. The attributes are in the present case over twenty in number. This manner of excelling in variations of terms resembles the fashion of *Hek. R.* The words used here are mostly adduced from the O.T.

is RIKBIEL H', the great and revered prince³ who is standing by the Merkaba.

(2) And why is he called RIKBIEL? Because he is appointed over the wheels of the *Merkaba*, and they are given in his charge. (3) And how many are the wheels? Eight; two in each direction. And there are four winds compassing them round about. And these are their names: "the Storm-Wind", "the Tempest", "the Strong Wind", and "the Wind of Earthquake". (4) And under them four fiery

³ so *D.* *A.*: 'name'

Rikbiel. The names of the present section (with the exception of RADWERIEL, ch. xxvii) have a very simple derivation. RIKBIEL is derived from '*Rekeb*' (= 'chariot' = '*Merkaba*'), CHAYYIEL is made to correspond to '*Chayyoth*', KERUBIEL to '*Kerubim*', OPHANNIEL to '*Ophanim*', SERAPHIEL to '*Seraphim*'.

The name RIKBIEL is not given by Schwab, *VA.* It recurs, however, twice in *Add.* 27199. The first time it is in the quotation of vss. 2-7 of the present chapter, see below. The second time in *Hilkoth ha Kisse*, fol. 138 a b, in a passage from an anonymous source, immediately following the quotation of ch. xxiii. 20 (cf. note, *ib.*) and (SOTHER ASHIEL), ch. xviii. 19 (cf. note, *ad loc.*), preceding the quotation of ch. xxii (KERUBIEL). The passage runs: "RIKBIEL H, the great and fearful prince by name, is standing by the *Merkaba* (cf. the last words of vs. 1 here) and he is appointed over the eight wheels of the *Merkaba*, two in each direction" Since this passage occurs in between quotations from this book it is probably directly dependent upon this chapter and might be regarded as a quotation. Notice, that the epithet "great and fearful prince" are regarded as part of the name.

(2) In a midrashic commentary on Ezek. i. 16 in *Add.* 27199, fol. 81 a, there is a passage on RIKBIEL which appears as a literal, though unacknowledged quotation, of vss. 2-7 of the present chapter.

the wheels of the Merkaba. (Hebrew: *galgille ham-merkaba*), wheels: '*galgallim*'. The GALGALLIM are here, at least acc. to vss. 2 and 3, understood in their literal sense, although they, in vs. 7, are represented as speaking and apparently on a level with the four classes of Merkaba angels. Cf. for the present conception *Mass. Hek.* vii, e.g. "the wheels of the Merkaba upon which is the Throne of Glory". In *Alph. R.* '*Aqiba* the four *Chayyoth* appear "from under the wheels of the chariot of His Throne (i.e. the Merkaba carrying the Throne of Glory)". (Contrast vs. 5 here.) In other connections they are clearly represented as one of the angelic classes, e.g. *Mass. Hek.* v: "In the seventh Hall are the Throne of Glory, the chariots of the Kerubim, the camps of the Seraphim, the '*Ophanim*', the '*Chayyoth*' and the '*Galgallim*' of consuming fire". In this passage it is noteworthy that the '*Ophanim*' and the '*Galgallim*' appear as two distinct angelic classes. Originally the words '*Ophanim*' and '*Galgallim*' were, on the whole, identical notions, both meaning 'wheels'. See note on ch. xxv. 5. A third significance of the '*Galgallim*' is 'heavenly bodies', mainly occurring in the later cabbalistic literature. And through further developments of the speculations on the '*Galgallim*', they are again identified with the '*Ophanim*', or, according to another trend of thoughts, the '*Ophanim*' are made the rulers of the '*Galgallim*' or celestial spheres. Cf. note on ch. xxv. 5.

(3) The number of the wheels is presumably derived from Ezek. i. (not x): a wheel in the middle of a wheel by the side of each of the four living creatures.

four winds etc. 'Storm-wind' and 'tempest' are well-established parts of any descriptions of the celestial wonders. Cf. chh. xxxiv and xviii. 25. 'Storm-wind, East-Wind, Strong Wind and Wind of Earthquake' are represented in ch. xxiii. 15, 3, 2 and 6.

rivers are continually running, one fiery river on each side. And round about them, between the rivers, four clouds are planted (placed), and these they are: "clouds of fire", "clouds of lamps", "clouds of coal", "clouds of brimstone" and they are standing over against [their] wheels.

(5) ⁴ And the feet of the *Chayyoth* are resting upon the wheels. And between one wheel and the other earthquake is roaring and thunder is thundering.

(6) And when the time draws nigh for the recital of the *Song*, (then) the multitudes of wheels are moved, the multitude of clouds tremble, all the chieftains (*shallishim*) are made afraid, all the horsemen (*parashim*) do rage, all the mighty ones (*gibborim*) are excited, all the hosts (*šēba'im*) are afrighted, all the troops (*gēdudim*) ⁵are in fear⁵, all the appointed ones (*mēmunnim*) haste away, all the princes (*sarim*) and armies (*chayyēlim*) ⁶ are dismayed, all the servants (*mēsharētim*) do faint and all⁷ the angels (*mal'akim*) and divisions (*dēgalim*) travail with pain.

⁴ A ins. 'and these'
'and 'Elim'

5-5 ins. in accordance with D. A om.
7 so D. A om 'all.'

6 D ins.

(4) four fiery rivers. The number 'four' is to correspond with the four directions, the four *Chayyoth* etc. The four fiery rivers here should be compared with the mention in ch. xviii. 19 of 'the four heads of the fiery river'. Cf. note, *ib*. The fiery rivers here run under the feet of the *Chayyoth*. Cf. the usual expression: 'the fiery river goes forth from the perspiration of the *Chayyoth*'. The present conception of four fiery rivers is related to that of the rivers flowing between the four camps of Shekina as presented in ch. xxxvii. 1. Cf. *ib*. Clouds between the rivers, surrounding them. Cf. ch. xxxvii. 2. The object of the 'clouds' is acc. to ch. xxiv. 2 to protect from the heat of the fire. See also ch. xxxiii. 3.

(5) the feet of the *Chayyoth* are resting upon the wheels. In accordance with the system of the present section the *Chayyoth* have their place next above the wheels of the Merkaba. Angels standing on wheels, cf. ch. xviii. 25 and ch. xxii. 7.

The different names of angelic classes and positions enumerated in vs. 6 are most of them deduced from the O.T. where they represent various divisions and orders within an army. This is natural from the point of view of these writers who picture the 'hosts of angels' as armies, camps and troops. The words 'appointed', 'princes', 'servants', 'angels', are familiar from the other chapters of the book. Cf. chh. xiv; iv, xxxix; xxx, vi; see Index; the other terms are all found in the enumeration in *Mass. Hek. v* of the contents of the seventh Hall and the different angelic classes there ("armies, hosts, troops, ranks (*ma'arakoth*), divisions and armies of chieftains, the men of war, mighty ones, powers (*'azuzoth*) *ta'ašumoth* (Ps. lxxviii. 36) horsemen, the officers of armies, princes etc."). The presentation of all the different 'hosts' and 'princes' has the object of enhancing the impression of the SOLEMNITY OF THE MOMENT, WHEN 'THE SONG' IS TO BE SUNG. The commotion of all heavens and all angels at the sound of the *Trisagion* is described in ch. xxxviii. Cf. also ch. xviii. 7. For passages recalling the present vs. see 1 *En. lxi. 10, 11*, 2 *En. xx. 1* seqq., *Ma'yan Chokma, BH. i. 59*, *Zohar, ii. 136 a b*. For *dēgalim* applied to angelic troops cf. *Num. R. par. ii* with reference to Ps. lxxviii. 18, *Shir. R. on ii. 4*. In the quotation *La, fol. 81 a*, only eight classes are mentioned, viz. *shallishim, parashim, šebaim, gibborim, memunnim, sarim, mal'akim, degalim*.

(7) And one wheel makes a sound to be heard to the other and one *Kerub* to another, one *Chayyā* to another, one *Seraph* to another (saying) (Ps. lxviii. 5) "Extol to him that rideth in '*Araboth*', by his name *Yah* and rejoice before him!"

CHAPTER XX

CHAYYLIEL, *the prince of the Chayyoth*

R. Ishmael said: Metatron, the angel, the Prince of the Presence, said to me:

(1) Above these there is one great and mighty prince. His name is CHAYYLIEL *H'*, a noble and revered prince, a 'glorious and' mighty prince, a great and revered prince, a prince before whom all the children of heaven do tremble, a prince who is able to swallow up the whole earth in one moment (at a mouthful).

(2) And why is he called CHAYYLIEL *H'*? Because he is appointed over the *Holy Chayyoth* ² and smites the *Chayyoth* ² with lashes of

1-1 ins. with *D* (for the sake of symmetry).

2-2 ins. from *D*. *A* om.

(7) one wheel makes a sound to be heard to the other. After the pattern of Is. vi. 3: "and one cried unto another, and said etc." A parallel to the present verse occurs *Mass. Hek.* vii: "and one *Bath Qōl* by the side of one wheel (referring to the 'wheels of the *Merkaba*') and another *Bath Qōl* by the side of another wheel; in that moment one wheel causes (its voice) to be heard to another wheel with thunder and earthquake. . . (saying) 'Extol to him that rideth in '*Araboth*', by his name *Yah*, and rejoice before him'". The psalm here cited is the one specifically used in mystical interpretations. There are several cabbalistic commentaries on this psalm. The special attention of the mystics was drawn to this psalm already in the tannaitic period if not earlier. From the vs. referred to here, the name of the highest of the heavens, '*Araboth*', was deduced (cf. *Chag.* 12 b). Other passages of this psalm to which special interest was devoted are vss. 17 and 18.

Elsewhere the *Galgallim* of the *Merkaba* are stated to partake in the celestial *Qēdushsha*, e.g. in the quotation, *YR.* v. 5 b: "the wheels of the *Merkaba* say: 'Blessed be the Glory of *H'* from his place etc.'"

Ch. xx. (1) Above these *scil.* RIKBIEL and the *Galgallim* of the *Merkaba*, described in the foregoing chapter.

Chayyiel. The name of the Prince is chosen to correspond to the word '*Chayyoth*'. It is, however, derived from *Chayil* (= 'army') rather than from *Chayyā*. In accordance with this derivation 'CHAYYLIEL' was probably originally the name of the prince over the *Chaylim* (= 'the armies of angels', cf. ch. xix. 6). A remnant of a tradition to this intent is perhaps the passage, occurring in *Hilkoth ha Mal'akim La*, fol. 123 a, according to which he has the function of punishing the ministering angels, when they do not say the Song in the right time. The 'armies' sometimes are equivalent with the 'ministering angels'. In the same passage CHAYYLIEL is also the prince, appointed over the *Chayyoth*.

(2) smites the *Chayyoth* with lashes of fire. Here, where the expression 'smites the *Chayyoth*' stands in juxtaposition to 'glorifies them, when they give praise',

fire: and glorifies them, when they give praise and glory and rejoicing and he causes them to make haste to say³ "Holy" and "Blessed be the Glory of *H'* from his place!" (i.e. the *Qēdushsha*).

CHAPTER XXI

The Chayyoth

R. Ishmael said: Metatron, the angel, the Prince of the Presence, said to me:

(1) Four (are) the *Chayyoth* corresponding to the four winds. Each *Chayyā* is as the space of the whole world. And each one has four faces; and each face is as the face of the East. (2) Each one has four wings and each wing is like the cover (roof) of the universe. (3) And each one has faces in the middle of faces and wings in the middle of wings. The size of the faces is (as the size of) 248 faces, and the size of the wings is (as the size of) 365 wings.

(4) And every one is crowned with 2000 crowns on his head. And each crown is like unto the bow in the cloud. And its splendour is like unto the splendour of the globe¹ of the sun¹. And the sparks that go forth from every one are like the splendour of the morning star (planet Venus) in the East.

³ D ins. 'after me (Metatron)'

1-1 Inserted from D. A om.

it seems that the 'smiting' would best be explained as referring to the punishment executed upon the *Chayyoth*, if they do not say the 'Holy' in the proper manner. Such an idea would better harmonize with a context, where 'ministering angels' had been substituted for '*Chayyoth*'. Cf. how acc. to YR. i. 15 a, "God smites the *Chayyoth*".

Ch. xxi. The *Chayyoth* (singular form: *Chayya*) are the "four living creatures" of Ezek. i. They are, acc. to the present section, placed next above the wheels of the Merkaba. Acc. to ch. xxii c and *Hek. R.* xiii, they have their place immediately under the Throne of Glory, above the '*Ophanim*' and the '*Kerubim*'. For other representations see the introductory section.

(1) The number of the *Chayyoth* and the faces and wings of each one is in accordance with Ezek. i. 5 seq. *Like the space of the whole world*, cf. ch. ix. 1, and the immense measures ascribed to the *Chayyoth* in *TB. Chag.* 13 a ("the feet of the *Chayyoth* are of a size like that of the seven heavens, the ankles of corresponding measure, the knees of corresponding measure, and so forth"). (3) Faces in the middle of faces etc. Cf. 'the heart in the middle of the heart of the lion (i.e. one of the four *Chayyoth*)' in ch. xv b. The conceptions have probably been developed by force of analogy from Ezek. i. 16 ("a wheel in the middle of a wheel"). The numbers '248' and '365' correspond to the number of positive and negative laws resp. Cf. ch. xxxiii. 4. (4) crowned with 2000 crowns. Crowns are regular attributes of high angels, cf. note on chh. xii. 3, xviii. 1.

CHAPTER XXII¹KERUBIEL, *the Prince of the Kerubim.**Description of the Kerubim*

R. Ishmael said: Metatron, the angel, the Prince of the Presence, said to me:

(1) Above these ^{1a} there is one prince, noble, wonderful, strong, and praised with all kinds of praise. His name is KERUBIEL *H'*, a mighty prince, full of power and strength

AD:

a prince of highness, and Highness (is) with him, a righteous prince, and righteousness (is) with him, a holy prince, and holiness (is) with him, a prince

B:

a prince of highness, and with him (there is) a righteous prince, of righteousness, and with him a holy prince, of holiness, and with him (there is) a prince

glorified in (by) thousand hosts, exalted by ten thousand armies.

(2) At his wrath the earth trembles, at his anger the camps are moved, from fear of him the foundations are shaken, at his rebuke the '*Araboth* do tremble.

1 Here B continues.

1 a D: 'the *Chayyoth*'

Ch. xxii. (1) Kerubiel. In this form the name is not found in Schwab, VA. Cf. however, *KRBIEL*, p. 157, *ib.*, and *Kerubiyah*, *ib.*

In *Hilkoth ha Kisse*, *Add.* 27199, fol. 138 b, after mention being made of SOTHER 'ASHI'EL (cf. xviii. 19) and RIKBIEL (ch. xix), there occurs a summary of the functions ascribed to KERUBIEL, a passage which is apparently drawn from vss. 1, 3-5, 7-9, of the present chapter.

A similar abridged quotation (*ba'arikut mizzeh ham mal'ak*) occurs in YR. i. 54 a, from *Sode Raza*, a quotation which is important, because it begins with Gen. v. 24, also forming the beginning of the present book, a fact which shows that the compiler of the *Sode Raza* used as one of his sources an Enoch-fragment or a book of Enoch which contained descriptions of Kerubiel, and, by consequence, probably also the essential parts of the angelological section of the present book.

In *Widduy Yaphe* (*Add.* 15299, fol. 133 b) he appears at the head of the *Kerubim* as here, but *ib.* fol. 134 b he is in common with SERAPHIEL (ch. xxvi. 8), represented as one of the twenty-six angels 'who carry the *Merkaba*'.

In the enumeration of different classes of angels which is given in *Mass.* 'Asilut (frequently referred to in notes and Introduction), the 'prince of the Kerubim' is called 'KERUBIEL'.

Even so in *S. ha Chesheq* (*Add.* 27120, fol. 14 b) KERUBIEL is introduced as the angel appointed over the *Kerubim*.

Acc. to 1 *En.* xx. 7, the prince of the *Kerubim* is GABRIEL, and acc. to *Zohar*, Ex. 43 (YE), this function is assigned to 'KERUB'.

The variant reading of B is most likely due to a false punctuation and subsequent transposition of the word '*immō*' (= 'with him').

(3) His stature is full of (burning) coals. The height of his stature is as the height of the seven heavens the breadth of his stature is as the wideness of the seven heavens and the thickness of his stature is as the seven heavens.

(4) ²The opening of his mouth is like a lamp of fire². His tongue ³is a consuming fire³. His eyebrows are like unto the splendour of the lightning. His eyes are like sparks ⁴of brilliance⁴. His countenance is like a burning fire.

(5) And there is a crown of holiness upon his head on which (crown) the Explicit Name is graven, and lightnings go forth from it. And the bow of *Shekina* is between his shoulders.

(6) AD: B:

And his sword is upon his loins and his arrows⁵ And his sword is like unto a lightning; and upon his loins there are arrows like

2-2 B: 'from his mouth there burns as it were a lamp of fire' D: 'the opening of his mouth burns like a lamp of fire' 3-3 so B. AD: 'consumes fire'

4-4 B omits. 5 D: 'arrow'

(3) His stature etc. The simpler reading of *Hilkoth Kisse* (see above) might with advantage be adopted: "his stature is as high as the seven heavens and the thickness of his stature is as the width of the sea". On the measures of high angels cf. ch. ix. 1, xxi. 1 and notes. Also ch. xlviii c 5.

(4) The opening of his mouth is like a lamp of fire etc. The description of the body of this angel-prince is in the usual terms conveying that he is wholly made up of fire. The substance of the angels' body is regularly fire. So it is said in 2 *En.* xxix. 1, 3, with regard to God's creation of the angels: "for all the heavenly hosts I (God) fashioned a nature like that of fire: their weapons are fiery, their garment is a burning flame...". Descriptions of this kind are frequent. Cf. 2 *En.* i. 5 ("their faces shone like the sun, their eyes like burning lamps, fire came forth from their lips... their wings were brighter than gold"). Cf. also *Chibbut ha Qeber*, i, *Mass. Hek.* iv, *Rev.* xix. 11-15.

Occasionally one finds the statement that some angels are made of water in contrast with others who are made of fire or that the angels in general are composed of fire and water. E.g. *Midrash 'Asereth haDēbārōth*, pp. 64 seqq., *BH.* (on the contents of '*Araboth*): "the angels are made of fire and water, and there is peace between them etc.", based on Job xxv. 2. Cf. ch. xlii.

(5) And there is a crown of holiness upon his head. The term 'crown of holiness' instead of the more usual 'crown of glory', probably with reference to the attribute of 'holiness' conferred upon this prince in vs. 1.

on which the Explicit Name is graven. Cf. ch. xii. 1 and note, also ch. xxxix. 1. Acc. to *Shir Rabba*, i, the explicit name was engraved on the crowns given to the Israelites at mount Sinai.

the bow of *Shekina*. The (heavenly counterpart of) the 'bow in the cloud' is probably meant. This has become a regular part of the speculations on the heavenly splendours, cf. ch. xxii c 4, 7. Then also it is understood as referring to the angel's weapon.

(6) his sword is upon his loins. Sword is a frequent concomitant attribute of the angel of death or of the angels of destruction. Cf. *Rev. R. Joshua ben Levi*, *BH.* ii. 48.

are like lightnings in his girdle. And a shield of consuming fire (is) on his neck and coals of juniper are round about him. unto a flame, and upon his armour and shield there is a consuming fire, and upon his neck there are coals of burning juniper and (also) round about him (there are coals of burning juniper).

(7) And the splendour of *Shekina* is on his face; and the horns of majesty on his wheels; and a royal diadem upon his skull.

(8) And his body is full of eyes. And wings are covering the whole of his high stature (lit. the height of his stature is all wings).

(9) On his right hand a flame is burning, and on his left a fire is glowing; and coals are burning from it⁶. And firebrands go forth from ⁷his body⁷. And lightnings are cast forth from his face. With him there is alway thunder upon (in) thunder, by his side there is ever earthquake upon (in) earthquake*.

(10) And the two princes of the Merkaba are together ⁸with him⁸.

6 so *B*. *A*: 'from his body' *D*: 'from him' 7-7 so *BD*. *A*: 'him' 8-8 lit. 'the two princes of the Merkaba are in his place' *B* reads: 'are of his size (like his stature)'

(7) the splendour of *Shekina* is on his face. On the conception of the splendour of *Shekina* see Abelson, *Immanence*, pp. 85-89, and cf. note on ch. v. 4. When it is said to be on the face of KERUBIEL here, it is to be understood as a reflection of God's glory, in analogy with the 'glory' that the first Adam possessed before his fall (*Ber. R.* xii) and which is to be restored to the righteous in the world to come (cf. *Alph. R. 'Aqiba*, letter *Kaph*, beg.).

horns of majesty on his wheels. The angels are often depicted as horned, cf. vs. 13 (horns of glory) and ch. xxix. 2 (horns of splendour). Horned angels are referred to in *Mass. Hek.* v (angels of horns of majesty: *ba'alē qarnē hōd*). Instead of 'on his wheels' one would have expected 'on his head'. Cf. vs. 13. No doubt the angel was imagined as having 'wheels', but it is possible that the reading here is corrupt ('*ofan*' as a synonym of '*galgal*' having been put in the place of the latter?). But cf. *Ezek.* x. 12. For Messiah ben Joseph as 'horned' cf. note on xlv. 5.

(8) his body is full of eyes. The angels have eyes all round to be able to see without turning: "there is no back in heaven" (*Chag.* 15 a). The passage forming the point of support is such a one as *Ezek.* x. 12. Cf. further chh. ix. 3, xxv. 2, 6, xxvi. 6, *Hek. R.* xxii. wings are covering the whole of his high stature. Cf. ch. ix. 2, *Hek. R. ib.* For vs. 8 and 9 in general cf. *Chibbut ha Qeber*, i.

(10) the two princes of the Merkaba. Cf. ch. i. 7. The princes of the *Merkaba* are carrying the *Merkaba* acc. to *Widduy Yaphe*, fol. 133 b. 'The princes of the *Merkaba*' are on the level with MIKAEL, GABRIEL, METATRON and SANDALPHON in so far as they, in contrast to other angels, are exempt from being burnt in the fiery river and 'created anew' acc. to *Šuni*, quoted by the *Smaller Yalqut Re'ubeni* under '*Mal'ak*'. In *Alph. R. 'Aqiba*, letter *Mem*, *BH.* iii, they are one of the highest classes of angels; together with the *Chayyoth* they minister by the *Merkaba*. In *Midrash Sar Tora*, *BH.* iii, *Hek. R.* xxx, an angel, called SIRBIEL, is defined as "one of the princes of the *Merkaba*".

* The literal translation 'thunder in thunder' etc. is presumably that which best corresponds to the idea in the mind of the writer: that thunder was thundering from the midst of thunder, earthquake roaring from the midst of earthquake.

(11) Why is he called KERUBIEL ⁹H', the Prince⁹. Because he is appointed over ¹⁰the chariot of the *Kerubim*. And the mighty *Kerubim* are given in his charge. And he adorns¹⁰ the crowns on their heads and polishes the diadem upon their skull.

(12) ¹¹He magnifies the glory of their appearance.¹¹ And he glorifies¹² the beauty of their majesty. ¹³And he increases the greatness of their honour. He causes the song of their praise to be sung. He intensifies their beautiful strength. He causes the brilliance of their glory to shine forth. He beautifies their goodly mercy and loving-kindness. He frames the fairness of their radiance. He makes their merciful beauty even more beautiful. He glorifies their ¹⁴upright majesty¹⁴. He extols the order of their praise, to stablish the dwelling-place of him "who dwelleth on the *Kerubim*".

(13) And the *Kerubim* are standing by the Holy *Chayyoth*,
and their wings are raised up to their heads (lit. are as the height
of their heads)

and *Shekina* is (resting) upon them

and the brilliance of the Glory is upon their faces

and ¹⁵song and praise¹⁵ in their mouth

and their hands are under their wings

¹⁶and their feet are covered by their wings¹⁶

and horns of glory¹⁷ are upon their heads

and the splendour of *Shekina* on their face

and *Shekina* is (resting) upon them

9-9 D om. 10-10 B: 'the chariots of the *Chayyoth*. And he adorns the
majesty and' 11-11 B om. 12 so D. AB: 'hastens' 13 BD ins. 'he
increases their beauty' 14-14 B: 'majestic strength' 15-15 D: 'song
of praise' 16-16 B om. 17 B: 'majesty'

In the two latter of these instances the 'princes of the *Merkaba*' are clearly indicated as more than two in number. Confer further on ch. i. 7 ('the princes of the *Merkaba* and the flaming *Seraphim*').

The expression 'are on his place' or 'are together with him' is perhaps a sign that the princes of the *Merkaba* had a function or occupied a position here ascribed to KERUBIEL or the *Kerubim*, a view which the writer tried to harmonize with his own in this way.

(11) KERUBIEL is the prince of the *Kerubim*. The *Kerubim* described here are "the four *Kerubim*" (Ezek. x). In the Pseudepigrapha they are mentioned, esp. in *Apoc. Moses* and 1 *En.* and 2 *En.* Further see the introductory section. mighty *Kerubim* is the expression used also in *Mass. Hek.* iv. chariot(s) of the *Kerubim*, also ch. xxiv. 1. Cf. *Apoc. Mos.* xxii. 3 ("when God appeared in paradise, mounted on the chariots of his *Kerubim*"), and *ib.* xxxviii. 3.

(13) and *Shekina* is resting upon them and the... Glory is upon their faces. Cf. Ezek. x. 18. 'The brilliance of the Glory' is the resplendence of the 'Glory' of *Shekina*. their hands are under their wings, perhaps deduced from Ezek. x. 7. their feet are covered etc. obviously from Is. vi. 2. horns of glory

and sapphire stones are round about them
and columns of fire on their four sides
and columns of firebrands beside them.

(14) There is one sapphire on one side¹⁸ and another sapphire on another side¹⁸ and under¹⁹ the sapphires¹⁹ there are coals of burning juniper.

(15) And one *Kerub* is standing in each direction but the wings of the *Kerubim* compass each other above their skulls in glory; and they spread them to sing with them a song to him that inhabiteth the clouds and to praise with them the fearful majesty of the king of kings.

(16) And KERUBIEL *H'*, the prince who is appointed over them, he arrays them in comely, beautiful and pleasant orders and he exalts them in all manner of exaltation, dignity and glory. And he hastens them—in glory and might—to do the will of their Creator every moment. For above their lofty heads abides continually²⁰ the glory of the high king²⁰ “who dwelleth on the *Kerubim*”.

CHAPTER XXII B

L(mr), following after the B:

rec. of ch. xxii C. vss. 1-3
(middle):

R. Ishmael said to me: Metatron, the angel, the Prince of the Presence, said to me:

(1) *And there is a court
before the Throne of Glory,*

(1) *How are the angels standing on
high? He said: Like a bridge that is*

18-18 ins. with DB. A om.
sapphires'

19-19 so D. B: 'the sapphire' A: 'their
20-20 so DB. A: 'a great glory of the king'

Cf. vs. 7. sapphire stones. Cf. Ezek. i, etc. (vs. 26). columns of fire on their four sides. Cf. Ezek. x. 7.

(15) spread them to sing with them. The *Kerubim* are represented as singing with their wings. The 'sound' or 'voice of the cherubims' wings' of Ezek. x. 5 is interpreted as the sound of a song. Acc. to *Hek. R.* xi. 4: "the wings of the Chayyoth are full of rejoicing." The *Kerubim* themselves are singing acc. to vs. 13. Cf. 2 *En.* xix. 6 *e.a.* ("the indescribable singing of the host of the Cherubim").

(16) Cf. chh. xxv. 5, xxvi. 8.

The additional fragments, here marked chh. xxii B and xxii C, follow in B immediately after ch. xxii. Another recension of ch. xxii C occurs in *Add.* 27199, fol. 78 a, referred to here as '*L(o)*' or '*Lo*'. In the same MS. fol. 126 a (*Helak Merkaba*) there is a third recension, containing a version of ch. xxii C 1-3 (middle), followed by a piece parallel to but differing markedly from ch. xxii B 1, 3, 4: '*Lmr*'.

(1) there is a court before the Throne of Glory (*Lmr*). The place of God's manifestation in the highest heavens is depicted in the simile of the innermost part

(2) *which no seraph nor angel can enter, and it is 36,000 myriads of parasangs, as it is written (Is. vi. 2): "and the Seraphim are standing above him" (the last word of the scriptural passage being 'ל') [numerical value: 36]].*

(3) *As the numerical value of ל' (36) is the number of the bridges there.*

(4) *And there are 24 myriads of wheels of fire. And the ministering angels are 12,000 myriads. And there are 12,000 rivers of hail, and 12,000 treasuries of snow.*

And in the seven Halls are chariots of fire and flames, without reckoning, or end or searching. (Lmr. ends here.)

placed over a river so that every one can pass over it, likewise a bridge is placed from the beginning of the entry to the end. (2) And three ministering angels surround it and utter a song before YHWH, the God of Israel. And there are standing before it lords of dread and captains of fear, thousand times thousand and ten thousand times ten thousand in number and they sing praise and hymns before YHWH, the God of Israel.

(3) *Numerous bridges are there: bridges of fire and numerous bridges of hail. Also numerous rivers of hail, numerous treasuries of snow and numerous wheels of fire.*

(4) *And how many are the ministering angels? 12,000 myriads: six (thousand myriads) above and six (thousand myriads) below. And 12,000 are the treasuries of snow, six above and six below. And 24 myriads of wheels of fire, 12 (myriads) above and 12 (myriads) below. And they surround the bridges and the rivers of fire and the rivers of hail. And there are numerous ministering angels, forming entries, for all*

of a Sanctuary. The seventh Hall is called 'the Holy of Holies'. The entry (B), then, is the entry of the innermost part of the sanctuary. The conception of 'bridges' in heaven is attested in *Hek. R. BH. iii. 93*. They are the bridges that are placed over the fiery rivers (cf. *ib.*). (2) three ministering angels. Probably the leaders of the song-uttering angels, who sometimes are represented as three, usually as four (cf. note on ch. xxxv. 3). lords of dread and captains of fear. Guardian angels who inspire dread and fear, cf. *Rev. Moses, YR. ii. 66 b* ("I saw the angels of dread who surround the Throne"). thousand times thousand etc. Derived from *Dan. vii. 10*. Cf. *chh. xxxv. 6, xxxvi. 1, Zohar, ii. 252 b*.

(3, 4) rivers of fire, rivers of hail. Cf. *ch. xlii. 1, 7*. wheels (*galgallim*) of fire. The wheels of fire are possibly conceived of as angelic beings. Cf. *Zohar, ii. 252 b* (in the fourth Hall): "under the *Chayyoth* are four *Seraphim* (cf. *vs. 1 acc. to Lmr*) . . . from these four *Seraphim* . . . there go forth flames of fire and from these flames are made 72 *galgallim* burning in the fire and from that fire is made the *Nehar di-Nur*". the treasuries of snow are usually said to be 'under the throne'. six above and six below etc. 'Above' and 'below' probably in relation to the

the creatures that are standing in the midst thereof, corresponding to (over against) the paths of *Raqia' Shamayim*.

(5) *What doeth YHWH, the God of Israel, the King of Glory? The Great and Fearful God, mighty in strength, doth cover his face.*

(6) *In 'Araboth are 660,000 myriads of angels of glory standing over against the Throne of Glory and the divisions of flaming fire. And the King of Glory doth cover His face; for else the 'Araboth Raqia' would be rent asunder in its midst because of the majesty, splendour, beauty, radiance, loveliness, brilliancy, brightness and excellency of the appearance of (the Holy One,) blessed be He.*

(7) *There are numerous ministering angels performing his will, numerous kings, numerous princes in the 'Araboth of his delight, angels who are revered among the rulers in heaven, distinguished, adorned with song and bringing love to remembrance: (who) are affrighted by the splendour of the Shekina, and their eyes are dazzled by the shining beauty of their King, their faces grow black and their strength doth fail.*

(8) *There go forth rivers of joy, streams of gladness, rivers of rejoicing, streams of triumph, rivers of love, streams of friendship—(another reading:) of commotion—and they flow over and go forth before the Throne of Glory and wax great and go through the gates of the paths of 'Araboth Raqia' at the voice of the shouting and musick of the CHAYYOTH, at the voice of the rejoicing of the timbrels of his 'OPHANNIM and at the melody of the cymbals of His Kerubim. And they wax great and go forth with commotion with the sound of the hymn: "HOLY, HOLY, HOLY, IS THE LORD OF HOSTS; THE WHOLE EARTH IS FULL OF HIS GLORY!"*

bridges. for all the creatures that are standing in the midst thereof.... The 'creatures' probably refer to human beings, perhaps the souls or spirits who are ascending towards their abode near the Throne of Glory, i.e. after death. It is improbable that the *Yörädē Merkaba* are meant here. The angels are placed so as to form an entry, through the midst of which the souls proceed.

(6) the king of Glory doth cover His face.... This part of the verse recurs literally identical in *Hek. R.* xi, *BH.* iii. 92, and *Or.* 6666, fol. 4 b. the veil with which the Most High covers his face is often identified with the *Pargod*, cf. on ch. xlv. 1. Cf. also *Mass. Hek.* iii and *Chag.* 12 b.

(8) There go forth rivers of joy etc. The whole of this verse recurs in *Hek. R.* viii. 4, *BH.* iii. 90, *Or.* 6666, fol. 3 a. Only the very last sentence is somewhat different in *Hek. R.*: "(go forth with commotion) with *Qëdushsha*, at the hour when Israel say before Him: 'HOLY, HOLY, HOLY etc.' as it is written (Is. vi. 3) HOLY, HOLY, HOLY". In common with the rest of the book this chapter makes no reference to the *Qëdushsha* chanted by the congregation on earth.

CHAPTER XXII c

(in *B*, *Lo* and *Lmr*)

^{L. H.}
⁰*R. Ishmael said: Metatron, the Prince of the Presence said to me:*⁰

(1) *What is the distance between one bridge and another? 12 myriads of parasangs. ¹Their ascent is 12 myriads of parasangs, and their descent 12 myriads of parasangs^{1, 2}*

(2) *(The distance) between the rivers of dread and the rivers of fear is 22 myriads of parasangs; between the rivers of hail and the rivers of darkness³ 36 myriads of parasangs; between the chambers⁴ of lightnings and the clouds of compassion⁵ 42 myriads of parasangs; ⁶between the clouds of compassion⁸ and the Merkaba 84 myriads of parasangs; between the Merkaba and the Kerubim 148^{8a} myriads of parasangs⁷; between the Kerubim and the 'Ophannim 24 myriads of parasangs; between the Ophannim and the chambers of chambers 24 myriads of parasangs; ⁹between the chambers of chambers and the Holy Chayyoth ¹⁰40,000 myriads of¹⁰ parasangs; between one wing (of the Chayyoth) and another*

0-0 *Lo*: 'R. Ishmael said' *Lmr* om (follows upon a par. to ch. xxxvii). 1-1 *L(o)*: '(12 myriads of parasangs) in their ascent and 12 myriads of parasangs in their descent. 12 myriads of parasangs' corr. *L(mr)* om. 2 *Lmr* adds: 'and there are the rivers of dread' 3 *Lmr*: 'snow' 4 *Lmr*: 'orders' 5 *Lo*: 'heat' *Lmr*: 'consolation' 6 *Lmr* ins. the gloss: '(why) clouds of consolation? Because they console the Glory (the Most High)' 7-7 *Lo* om. 8 *Lmr*: 'consolation' 8a *Lmr*: '185' 9 *Lmr* ins. the explanatory gloss: 'and in these chambers are honour and majesty. This is the mystical meaning (of the passage Ezek. i. 16), and the appearance of the 'Ophannim and their work' 10-10 so with *Lmr* and *Lo*. *B*: '1000'

Ch. xxii C. (1) *What is the distance between one bridge and another? 12 myriads of parasangs.* The present chapter is mainly concerned with measures and distances. This was an early theme of the mystical traditions. A striking parallel is the well-known passage in *Chag.* 13 a (the distances between the heavens and the measures of the different parts of the body of the *Holy Chayyoth*). It was probably referred to as *Seder Shi'urin*. Cf. the *Shi'ur Qōmā*. The latter part of vs. 1 is a variant of the former part. (2) Vss. 2 and 3, by way of an exposition of the distances and measures gives a definite *Merkaba*-picture. The order is from the lower to the highest parts: rivers of dread—rivers of fear—rivers of hail—rivers of darkness—chambers of lightnings—clouds of compassion—the beginning of the *Merkaba* proper—the *Kerubim*—the 'Ophannim—the chambers of chambers—the *Holy Chayyoth*—the Throne. It will be seen that this order is entirely different from that implied in the angelological section, chh. xix-xxii, xxv seqq., and also from that of ch. xxxiii. 2 seqq. In placing the *Chayyoth* next to the Throne as the highest of the *Merkaba*-angels, this fragment agrees with *Hek. R.* xiii and the regular representation of *Zohar*, and also with the passage *Chag.* 13 a, referred to above. When it is said: "the *Holy Chayyoth* carry the Throne of Glory", this does not necessarily imply the *Chayyoth* being designed as the highest of the *Merkaba*-angels; the other classes may be conceived of as surrounding the Throne (cf. ch. xxxiii. 2, 3). The chambers of chambers are here the treasures and storehouses of the Most High.

12 myriads of parasangs; ¹¹ and the breadth of each one wing is of that same measure¹¹; and the distance between the Holy Chayyoth and the Throne of Glory is ¹²30,000 myriads of parasangs¹².

(3) And from the foot of the Throne to ¹³the seat¹³ there are 40,000 myriads of parasangs¹⁴. And the name of Him that sitteth on it: let the name be sanctified!

[(4) And the arches of the Bow are set above the 'Araboth, and they are 1000 thousands and 10,000 times ten thousands (of parasangs) high. Their measure is after the measure of the 'Irin and Qaddishin (Watchers and Holy Ones) ¹⁵. As it is written (Gen. ix. 13) "My bow I have set in the cloud". It is not written here "I will set" but "I have set", (i.e.) already; clouds that surround the Throne of Glory. As His clouds pass by, the angels of hail (turn into) burning coal.

(5) And a fire of the voice goes down from¹⁶ by the Holy Chayyoth. And because of the breath of that voice they "run" (Ezek. i. 14) to another place, fearing lest it command them to go; and they "return" lest it injure them from the other side. Therefore "they run and return" (Ezek. i. 14).

(6) And these arches of the Bow are more¹⁷ beautiful and radiant than¹⁸ the radiance of the sun during the summer solstice. And they are whiter than a flaming fire and they are great and beautiful.

(7) Above ¹⁹the arches of the Bow¹⁹ are the wheels of the 'Ophannim.

11-11 *Lmr*: 'and the same (measure) is its length and its breadth' 12-12 so with *Lmr*. *Lo*: '30 myriads of parasangs' *B*: 'of that same measure'
13-13 *Lmr*: 'where He is seated' 14 *Lmr* continues here with a parallel to ch. xxii c, see text *ib*. 15 *Lo* ins. the gloss: 'and this is what the poet lays down: the arches of the Bow with the wing(s) of the dragon' 16 *Lo* om.
17 *Lo* om. 18 *Lo*: 'as' 19-19 *Lo* om.

(3) from the foot of the Throne etc. The R. Aqiba version of *Shi'ur Qoma* has: "from the seat of His Glory (Yāqār, not Kabod) downwards is (a distance of) 118,000 parasangs" (half the numerical value of נֹרָא בְּחֵד, "and of great power": Ps. cxlvii. 5). Cf. *Hek. R.* x, *BH.* iii. 91 ("from His Throne of Glory upwards is a distance of 180,000 myriads of parasangs").

Vss. 4-7 cannot be harmonized with the Merkaba-picture of the preceding verse. They are in reality a mystical commentary on Ezek. i. 14 seqq., starting from the conception of the Celestial Bow, brought about by the combination of Gen. ix. 13 with Ezek. i. 28. Also in *Zohar*, i. 71 b, the passage Gen. ix. 13 is used to elucidate the mystical meaning of passages in the first chapter of Ezekiel. These vss. may have been added here on account of the reference to 'measures' in vss. 4 and 7. after the measure of the 'Irin and Qaddishin. Cf. Rev. xxi. 17. The measures laid down in 'Shi'ur Qoma' are said *ib.* to be acc. to the measures of the Most High, to whom a span (*zéret*) means the distance from one end of the world to the other. For the 'Irin and Qaddishin see ch. xxviii. Vs. 4 recurs in *S. Raziél*, 30 a, preceding *Shi'ur Qoma*. (5) a fire of the voice etc. is an allusion to the *Qol H^anullā* of Ezek. i. 24. It is here conceived of as a Divine Voice. The Voice goes forth in fire. The *Chayyoth* fearing the fire: cf. *Hek. R. BH.* iii. 104. (7) vs. 7 recurs in *S. Raziél*, 4 a.

Their height is 1000 thousand and 10,000 times 10,000 units of measure after the measure of the Seraphim and the Troops (Gēdudim).]

CHAPTER XXIII

The winds blowing 'under the wings of the Kerubim'

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) There are numerous winds blowing under the wings of the *Kerubim*.

There blows "the Brooding Wind", as it is written (Gen. i. 2): "and the wind of God was brooding upon the face of the waters".

(2) There blows "the Strong Wind¹", as it is said (Ex. xiv. 21): "and the Lord caused the sea to go back by a strong east wind all that night".

¹ Ins. with BDE. A om. E continues here. DE put at the beginning of this chapter as heading, 'Order of the winds'.

Chh. xxiii and xxiv stand out by themselves from the rest of the book. They are nearest akin to the chapters describing the heavens from their quasi-physical aspects, and can therefore conveniently be reckoned as belonging to section 6. (See the survey of the contents of the present book.) The different 'winds' and 'chariots' are enumerated. Their names are deduced from passages of the O.T. where the words '*rūāch*' resp. '*merkaba*', '*rékeb*' or similar occur in different connections or with different attributes.

An almost literal parallel to ch. xxiii, although in a shorter form (the winds are reduced to eight), is found, YR. i. 9 a, quoted from *Sōdē Rāzā*: "There are eight winds. The first is 'the wind of jealousy', as it is written (Gen. vi. 3), 'My wind shall not always strive with man', the second is 'the Wind blowing in the world', as it is written (Gen. i. 2): 'the wind of God was brooding upon the face of the waters'; the third is 'the angel-wind' as it is written (1 Kings xix. 11): 'but the Lord was not in the wind', etc." As the word for 'wind' is also that for 'spirit', in all passages referred to here, where the English version has 'spirit', this word has been replaced by 'wind' in accordance with the significance '*rūāch*' has assumed throughout the chapter.

Parallels for the present method of deriving 'names' of different heavenly objects from O.T. passages and enumerating them are found in *Mass. Hek. i* and in *Alph. R. 'Aqiba*, letter *Zain*.

In *Mass. Hek. i* it is the Thrones of the Holy One, blessed be He, which are dealt with according to this principle. The wording is almost literally the same as that of the present chapters. "Numerous thrones has the Holy One, blessed be He. He has 'the Established Throne' as it is written... He has 'the Throne of Justice and Righteous-ness'... He has the Throne of Loving-kindness... He has the Throne of Yah, as it is written (Ex. xvii. 16): 'Because a hand is lifted up upon the throne of Yah'. (Cf. ch. xxiv. 20 here), etc."

In *Alph. R. 'Aqiba, ib.* the 'keys of the Holy one' are the objects. The 'winds', 'chariots', 'thrones' and 'keys' of the said passages are to be understood in their literal sense.

Ch. xxiii. (1) blowing under the wings of the *Kerubim*. This trait forms

(3) There blows "the East Wind"¹ as it is written (Ex. x. 13): "the east wind brought the locusts".

(4) There blows "the Wind of Quails"² as it is written (Num. xi. 31): "And there went forth a wind from the Lord and brought quails".

(5) There blows "the Wind of Jealousy" as it is written (Num. v. 14): "And the wind of jealousy came upon him".

(6) There blows the "Wind of Earthquake" as it is written (1 Kings. xix. 11): "and after that the wind of the earthquake; but the Lord was not in the earthquake".

(7) There blows the "Wind of *H'*"³ as it is written (Ex. xxxvii. 1): "and he carried me out by the wind of *H'* and set me down".

(8) There blows the "Evil Wind"³ as it is written (1 Sam. xvi. 23): "and the evil wind departed from him"⁴.

(9) There blow the "Wind of Wisdom"⁵ and the "Wind of Understanding" and the "Wind of Knowledge" and the "Wind of the Fear of *H'*"⁵ as it is written (Is. xi. 2): "And ⁶the wind of ⁶*H'* shall rest upon him; ⁷the wind of wisdom and understanding, the wind of counsel and might, the wind of knowledge and of the fear of *H'*".

(10) There blows the "Wind of Rain", as it is written (Prov. xxv. 23): "the north wind bringeth forth rain".

(11) There blows the "Wind of Lightnings", as it is written (Jer. x. 13, li. 16): "he maketh lightnings for the rain and bringeth forth the wind out of his treasures".

(12) ⁸There blows the "Wind, Breaking the Rocks", as it is written (1 Kings xix. 11): "the Lord passed by and ⁹a great and strong wind (rent the mountains and brake in pieces the rocks before the Lord)".^{8, 7}

(13) There blows the "Wind of Assuagement of the Sea", as it is written (Gen. viii. 1): "and God made a wind to pass over the earth, and the waters assuaged".

7-7 *B* om.

from 'the wind of wisdom etc.' vs. 9 to the end of vs. 12.

8-8 *E* om.

9 so *D*. *AB*: 'in'

the point of connection with ch. xxii, treating of the *Kerubim*. (6) and after that the wind. . . . The scriptural verse in question is interpreted in a sense different from the natural ('but the Lord was not in the wind: and after the wind an earthquake, etc.), in order to furnish the notion 'wind of earthquake'.

(14) ¹⁰There blows the "Wind of Wrath" ¹¹, as it is written (Job i. 19): "and behold there came a great wind from the wilderness and smote the four corners of the house and it fell". ¹⁰

(15) There blows the "Storm-Wind", as it is written (Ps. cxlviii. 8): "Storm-wind, fulfilling his word".

(16) And Satan is standing among these winds, ¹²for "storm-wind" is nothing else but "Satan" ¹², and all these winds do not blow but under the wings of the *Kerubim*, as it is written (Ps. xviii. 11): "and he rode upon a cherub and did fly, yea, and he flew swiftly upon the wings of the wind".

(17) And whither go all these winds ¹³? The Scripture teaches us, that they go out from under the wings of the *Kerubim* and descend on the globe of the sun, as it is written (Eccl. i. 6): "¹⁴The wind goeth toward the south and turneth about unto the north; it turneth about continually in its course and the wind ¹⁴ returneth again to its circuits". And from the globe of the sun they return and descend upon [¹⁵the rivers and ¹⁵ the seas, upon] the mountains and upon the hills, as it is written (Am. iv. 13): "For lo, he that formeth the mountains and createth the wind".

(18) And from the mountains and the hills they return and descend to the seas and the rivers; and from the seas and the rivers they return and descend upon ¹⁷ ¹⁶ (the) cities and provinces; and from the cities and provinces they return and descend into the Garden, and from the Garden they return and descend to Eden, as it is written (Gen. iii. 8): "walking in the Garden in the wind of day". And in the midst of the Garden they join together and blow from one side to

10-10 B om. 11 DE add: 'and Sorrow' 12-12 so D. BE om. A: 'for Satan has no wind (spirit?)' 13 BDE add: '(when) descending' 14-14 so DE(B). A om. 15 A ins. 'in the Garden and from the Garden and into' 16-16 B om. 17 DE ins. 'the country and from the country they return and descend upon'

(16) Satan is standing among these winds etc. Satan, acc. to the reading adopted above, is represented by 'the Storm-wind'. The winds are thus divided into good and evil ones. Cf. 1 En. xxxiv. 3: "and out of one portal they (the winds) blow for good: but when they blow through the other two portals it is with violence and affliction on the earth. The 'storm-wind' represents the destructive agency among the winds.

(17) The winds are represented as going out from under the wings of the *Kerubim*. The idea common to older and later Apocalyptic and Rabbinic is that the winds are kept in treasures in heaven, from where there are sent out and whereto they return.

(18) into the Garden, and from the Garden . . . to Eden. On the relation between the 'Garden' and 'Eden' cf. note on ch. v. 5.

And in the midst of the Garden they join together. Cf. *Cant. R. Par.* iv. 31: "in the world to come God will make the north wind and the south wind to blow

the other and are perfumed with the spices of the Garden even from its remotest parts, until¹⁸ they separate from each other, and, filled with the scent of the pure spices, they bring the odour from the remotest parts of Eden and the spices of the Garden to the righteous and godly who in the time to come shall inherit the Garden of Eden and the Tree of Life, as it is written (Cant. iv. 16): "Awake, O north wind; and come thou south; blow upon my garden, that the spices thereof may flow out. Let my beloved come into his garden and eat his precious fruits".

CHAPTER XXIV

The different chariots of the Holy One, blessed be He

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, the glory of all heaven, said to me:

(1) Numerous chariots has the Holy One, blessed be He:

He has the "Chariots of (the) *Kerubim*¹", as it is written (Ps.

¹⁸ so with *DE*. *A* om. corr.

¹ *DE*: '(a) kerub'

together as one". are perfumed with the spices of the Garden. For the fragrance and sweet odour of the trees of *Gan Eden*, esp. of the Tree of Life, cf. 2 *En*. viii. 2, 3. In *Apoc. Pauli* the 'perfuming winds' are replaced by 'εὐωδέσταιον ὕδωρ', which "flows from the root of the tree of life". Cf. also *Rev. R. Joshua ben Levi*, Paradise, 5th Compartment: "a perfume breathes through it, more exquisite than the perfume of Lebanon" (Gaster's translation).

they bring... the spices of the Garden to the righteous... in the time to come. Here we are at once translated into a picture of the future world. It would have been more natural if the relative sentence ('who etc.') had not appeared here, for then 'the righteous and godly' could have been referred to the common conception, according to which they are already living in Paradise, having been brought there immediately after death. The author's glide from present to future time is, however, comprehensible and excused by the poetical form of expression of the chapter.

Also acc. to 2 *En*. ix, "the fragrances of the Garden of Eden are prepared for the righteous". Cf. especially *Num. R.* xiii. 3 (there, as here, with reference to Cant. iv. 16): "In the world to come God will make a feast for the righteous in the Garden of Eden. Neither balsam nor spices will then be needed, for the North Wind and the South Wind will come down and bring with them all the spices of the Garden of Eden and they will spread their perfume". See *Introd.* sect. 16, 6.

Ch. xxiv. The same method that is used in regard to the 'winds' in the foregoing chapter is here applied to the 'chariots'. The key to the understanding of the often far-fetched deductions from scriptural passages can be expressed by the principle: "WHENEVER IT IS STATED IN THE HOLY WRIT THAT GOD APPEARS, IT MUST BE ASSUMED THAT HE APPEARS ON A VEHICLE". Thus, e.g. when it is said (vs. 5), 'I saw the Lord standing upon the altar', this is interpreted as referring to 'the Chariot of the altar'; 'appeared in the Tent' is interpreted as 'appeared in the Chariot of the Tent', etc.

(1) the Chariots of the *Kerubim*. This forms the connecting link with ch. xxii,

xviii. 11, 2 Sam. xxii. 11): "And he rode upon a cherub and did fly".

(2) He has the "Chariots of Wind", as it is written (*ib.*): "and he flew swiftly upon the wings of the wind".

(3) He has the "Chariots of (the) Swift Cloud", as it is written (Is. xix. 1): "Behold, the Lord rideth upon a swift cloud".

(4) He has "the Chariots of Clouds", as it is written (Ex. xix. 9): "Lo, I come unto thee in a cloud".

²(5) He has the "Chariots of the Altar", as it is written (Am. ix. 1): "I saw the Lord standing upon the Altar".

(6) He has the "Chariots of *Ribbotaim*", as it is written (Ps. lxxviii. 18): "The chariots of God are *Ribbotaim*; thousands of angels".

(7) He has the "Chariots of the Tent", as it is written (Deut. xxxi. 15): "And the Lord appeared in the Tent in a pillar of cloud".²

(8) He has the "Chariots of the Tabernacle", as it is written (Lev. i. 1): "And the Lord spake unto him out of the tabernacle".

(9) He has the "Chariots of the Mercy-Seat", as it is written (Num. vii. 89): "then he heard ³the Voice³ speaking unto him from upon the mercy-seat".

(10) He has the "Chariots of Sapphire Stone", as it is written (Ex. xxiv. 10): "and there was under his feet as it were a paved work of sapphire stone".

(11) He has the "Chariots of Eagles", as it is written (Ex. xix. 4): "I bare you on eagles' wings". ⁴Eagles literally are not meant here but "they that fly swiftly as eagles".⁴

(12) ⁵He has the "chariots of Shout", as it is written (Ps. xlvii. 6): "God is gone up with a shout".⁵

(13) He has the "Chariots of '*Araboth*'", as it is written (Ps. lxxviii. 5): "Extol Him that rideth upon the '*Araboth*'".

(14) He has the "Chariots of Thick Clouds", as it is written (Ps. civ. 3): "who maketh the thick clouds His chariot".

(15) He has the "Chariots of the *Chayyoth*⁶", as it is written (Ezek. i. 14): "and the *Chayyoth*⁶ ran and returned". ⁷They run by permission and return by permission, for *Shekina* is above their heads.⁷

2-2 B om. vss. 5-7.
om. (perhaps gloss).
7-7 B om

3-3 B: 'YYY' (i.e. YHWH) MT as above.
5-5 B om. 6 so BDE. A: 'the Living Ones' (*Chayyim*).

4-4 BDE

treating of the *Kerubim* in general and mentioning the 'chariots of the *Kerubim*', vs. 11. Cf. *ib.* note.

(15) They run by permission *scil.* of the *Shekina*. *Shekina* is above their heads. Cf. the expression '*Shekina* is resting upon them', with reference

(16) He has the "Chariots of Wheels (*Galgallim*)", as it is written (Ezek. x. 2): "And he said: Go in between the whirling wheels".

(17) He has the "Chariots of a Swift *Kerub*", as it is written (?⁸): "riding on a swift cherub".

And at the time when He rides on a swift kerub, as he sets one of His feet upon him, before he sets the other foot upon his back, he looks through ¹⁰eighteen thousand¹⁰ worlds at one glance. And he discerns and sees into them all and knows what is in all of them—and then he sets down the other foot upon him, according as it is written (Ezek. xlvi. 35): "Round about eighteen thousand".

Whence do we know that He looks through every one of them every day? It is written (Ps. xiv. 2): "He looked down from heaven upon the children of men ¹¹to see if there were any that did understand, that did seek after God¹¹".

8 The reference is a confusion of Ps. xviii. 10 with Is. xix. 1. *B* om. vs. 17. 9 *D*: 'cloud' cf. vs. 3. 10-10 so *BDE*. *A*: '18,000 thousands (of worlds)' 11-11 *B* om.

to the *Kerubim*, in ch. xxii. 13. The *Chayyoth* carry the Throne of Glory, the seat of *Shekina*.

Note the systematic order of the 'chariots' in vss. 15 seqq. The Chariots are those of 'the *Chayyoth* (vs. 15), the *Galgallim* (vs. 16), the *Kerub* (vs. 17), the '*Ophanim* (vs. 18) and the Divine Thrones (vss. 19 seqq.)'. This order recalls the system of the *Merkaba*-representation in the angelological section, chh. xix-xxii, xxiv seqq.: four classes of *Merkaba*-angels arranged according to rank under and next to the Divine Throne. If the order here presented is intentional, it appears that the *Merkaba*-picture of this chapter is different from that of the angelological section referred to: the arrangement (and names) of the superior classes of angels here is not congruent with that of the latter. Cf. further note on ch. xix and Introduction.

(16) Chariots of Wheels (*Galgallim*). On the *Galgallim* cf. note on ch. xix. 2.

(17) Chariots of a Swift Kerub. Cf. *P. R. 'El*. iv: "When God looks out on the earth his Chariots are on the wheels (*Galgallim*, cf. the preceding vs.), when riding in heaven, on a swift Kerub".

before he sets the other foot etc. The expression occurs also *Hek. R. iii. 2 et al.* he looks through 18,000 worlds at one glance. "It was presumed that our present earth was preceded by many others which were not good in the eyes of the Creator (*Gen. R. iii. 9, ix. 2*) who traverses in all 18,000 worlds". The 18,000 worlds are co-existent with the present world.

The number 18,000 is here deduced from Ezek. xlvi. 35. So also in *S. Raziel*, 36 (*Ma'ase Bereshith*).

Acc. to '*Abōdā Zārā*, 3 b, the number is derived from Ps. lxviii. 18, interpreted somewhat in the following sense: 'God rides (through) twenty thousands (i.e. 20,000 worlds) less two thousand (worlds)'. This interpretation is repeated in later cabbalistic works, e.g. '*Peli'a*' (cited *YR. i. 7 b*).

In the Talmud-passages just mentioned the Holy One is represented as traversing all the 18,000 worlds "on his SWIFT KERUB".

The number 18,000 is lastly deduced even in a third way, viz. from the first word of the Tora: *Bereshith*. The number of the letters of this word when written in full (*beth, resh, shin*, etc.) is 18. Hence the interpretation: "18 (scil. thousand worlds) created God".

With the conception of 18,000 worlds may be compared that of 955 heavens: ch. xlvi. 1 (cf. note, *ib.*).

¹²(18) He has the "Chariots of the 'Ophannim", as it is written (Ezek. x. 12): "and the 'Ophannim were full of eyes round about".¹²

(19) He has the "Chariots of ¹³His Holy Throne¹³", as it is written (Ps. xlvii. 8): "God sitteth upon his holy throne".

(20) He has the "chariots of the Throne of *Yah*", as it is written (Ex. xvii. 16): "Because a hand is lifted up upon the Throne of *Jah*".

¹⁴(21) He has the "Chariots of the Throne of Judgement", as it is written (Is. v. 16): "but the Lord of hosts shall be exalted in judgment".¹⁴

(22) He has the "Chariots of the Throne of Glory", as it is written (Jer. xvii. 12): "The Throne of Glory, set on high from the beginning,¹⁵ is the place of our sanctuary¹⁵".

(23) He has the "Chariots of the High and Exalted Throne", as it is written (Is. vi. 1): "I saw the Lord sitting upon the high and exalted throne".¹⁶

CHAPTER XXV

'Ophphanniel, the prince of the 'Ophannim.

Description of the 'Ophannim

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Above these there is one great prince, revered, high¹, lordly, fearful, ancient and strong. 'OPHPHANNIEL *H'* is his name.

12-12 *B* om.

16 *B* ends with this chapter.

1 *DE*: 'honoured'

(19-23) The Chariots of his Holy Throne... of the Throne of *Yah*... of the Throne of Judgement... of the Throne of Glory... of the High and Exalted Throne. The word 'chariots' seems here to be merely a metaphorical expression (= the vehicle of God's manifestation?). For the different 'Thrones' of God see *Mass. Hek.* i, ii. All the names of 'Thrones' of the present verses recur there, partly with the same scriptural references.

Ch. xxv. The continuation of ch. xxii.

(1) Above these... The opening words of the chapter make it evident that it cannot possibly be a continuation of the preceding chapter, as it appears to be from its present place. With ch. xxii, however, it fits in well, both with regard to style, phraseology and general arrangement. It treats of the third class of Merkaba-angels, the 'Ophannim, and their prince, 'OPHPHANNIEL, in a manner very similar to that of chh. xix-xxii, with regard to *Chayyoth* and *Kerubim*. 'Ophphanniel. The name occurs, chh. xiv. 10 and xvii. 5, as the name of the angel set over the course of the moon. Cf. *S. Raziël*, 19 b. No instance attributing to 'OPHPHANNIEL the function assigned to him in the present chapter is found among the references in Schwab, *VA*.

There seem to have been two different traditions concerning the name of the

(2) He has sixteen faces, four faces on each side, ²(also) hundred wings on each side². And he has 8466 eyes, corresponding to the days of the year.

A:

DE:

2190—and some say 2116—on each side³. 2191 (E: 2196) and sixteen on each side.

(3) And those two eyes of his face, in each one of them lightnings are flashing, and from each one of them firebrands are burning; and no creature is able ⁴ to behold them: for anyone who looks at them is burnt instantly.

(4) His height is (as) the distance of 2500 years' journey. No eye⁵ can behold and no mouth can tell the mighty power of his strength⁶ save the King of kings, the Holy One, blessed be He, alone.

(5) Why is he called 'OPHPHANNIEL?

Because he is appointed over the 'Ophannim and the 'Ophannim

2-2 D om. 3 A repeats the last sentence. 4 so DE. A ins. 'to stand (and)' 5 so D. A: 'house' 6 so DE. A: 'eyes'

leader of the 'Ophannim. According to one it was 'OPHPHANNIEL, according to the other RAPHAEL. The former tradition is represented by this chapter, the latter by Zohar, Ex. xliii. In *Masseket 'Asilut* the two are foisted together, so that there RAPHAEL and 'OPHPHANNIEL are given as the chieftains of the 'Ophannim.

(2) he has 8466 eyes etc. The number of the eyes is a calendary one. The text is, however, corrupt, the reading of DE worse than that of A. If, instead of 'days of the year', we read (as Jellinek suggests in note, *ad locum*, in E) 'hours of the days of the year', the number 8466 would correspond to a lunar year of 352½ days; the fourth part of 8466 is 2116 (plus ½), the number of eyes on each of the four sides, according to one of the variants of A. The other variant, 2190, is the exact fourth part of the number of hours of the solar year, if counted as 365 days of 24 hours each. The variants of A thus point to two different readings, one of which used 'solar' numbers, the other 'lunar' ones. This fact does not imply any contention between solar and lunar calculations as in the earlier Apocrypha. In the present book the solar and lunar numbers are merely cosmic numbers, used side by side, apparently of equal value, although the solar ones are more frequent. The only reason to consider the variant, giving the lunar numbers, as the original in this case, is the fact that 'OPHPHANNIEL elsewhere—chh. xiv. 10 and xvii. 5 of the present book and *S. Raziel*, 19 b—is connected with the course of the moon (notice the use of the number 354 in connection with 'OPHPHANNIEL, ch. xvii. 5). Besides, the numbers 8466 and 2116 may be corrupt for 8496 and 2124 resp., corresponding to a lunar year of 354 days.

A parallel passage in *Mass. Hek.* iv runs (using solar numbers): "In each Hall there are 8766 gates of lightnings, corresponding to the number of hours of the days of a year". This parallel is pointed out by Jellinek in his note (referred to above) and is the point of support for the emendations suggested by him.

(3) two eyes that are in his face. His face, being pictured as that of a man, has two eyes only, whereas the rest of his body is wholly covered with eyes: see the preceding verse.

(4) appointed over the 'Ophannim. On the 'Ophannim cf. Introduction. The 'Ophannim have here, as well as in 1 *En.* lxi. 10, lxxi. 7, 2 *En.* xxix. 3, *Yer. Ber.* iv. 5,

are given in his charge.⁷ He stands⁸ every day and attends and beautifies⁹ them. And he exalts and orders their apartment (*DE*: runnings) and¹⁰ polishes their standing-place¹⁰ and makes bright their dwellings, makes their corners even¹¹ and cleanses their seats. And he waits upon them early and late, by day and by night, to increase their beauty, to make great their dignity and to make them 'diligent in praise of their Creator.

(6) And all the '*Ophannim* are full of eyes,¹² and they are all full of brightness¹²; ¹³¹⁴ seventy two sapphire stones are fixed on their garments on their right side¹⁴ and seventy two sapphire stones are fixed on their garments on their left side¹³.

(7) And four¹⁵ carbuncle¹⁶ stones are fixed on the crown of every single one, the splendour of which proceeds in the four directions of '*Araboth* even as the splendour of the globe of the sun proceeds in all the directions of the universe. ¹⁷And why is it called Carbuncle (*Baréqet*)?¹⁷ Because its splendour is like the appearance of a light-

7 *A* ins. 'And he is appointed to attend the '*Ophannim*' 8 *A* ins. 'over them'
 9 *E*: 'makes them to fear and refreshes them' 10-10 *E*: 'assembles their meeting (congregation)' 11 *DE* instead of 'makes even' read: 'refreshes'
 12-12 *DE*: 'and all of them are full of wings, eyes over against wings, wings corresponding to eyes, and in between them splendour and radiance are shining as the light of the planet Venus' 13-13 *E* om. 14-14 *D* om. 15 *E*: 'seventy two' 16 so *D*. *EA*: 'sapphire' 17-17 so *D*. *A*: (Why is it called *Beraqot* (lightnings) (carbuncles)) *E*: 'Why is he called by the name of ŠIDQIEL?'

lost all traces of their original character of wheels (*galgallim*). Cf. the similar development of the traditions concerning the *Galgallim* (see note on ch. xix. 2).

Here the '*Ophannim* are depicted as one of the classes of Merkaba-angels, with the regular appearance of angels (with eyes, garments, crowns etc. cf. vs. 6).

Later the '*Ophannim* are identified with the *Galgallim*, e.g. in the cabbalistic treatise on the Throne, the Merkaba and the Shekina, contained in *Harley Or.* 5510, fol. 127 a: "the '*Ophannim*, they are (the same as) the *Galgallim*".

When the *Galgallim* are identified with the spheres or heavenly bodies, the conception of the '*Ophannim* as those who 'move the spheres' arises. Such is the representation of the '*Ophannim* in *Shefa 'Tal* (by R. Sheftel Horwitz, ed. 1612), fol. 41 c: "... the '*Ophannim*, who act in the '*Asiyyatic* world ('the world of creative matter') and move the spheres, as it is written (Ezek. i. 15) '... behold one '*Ophan* upon the earth' etc."

It was, no doubt, through the connection of the '*Ophannim* with the 'globes' that '*OPHANNIEL* was made the prince appointed over the 'globe of the moon'.

(6) 72 sapphire stones are fixed on their garments. Cf. ch. xii. 1, and for the use of the number 72, vs. 1 of ch. ix.

(7) four carbuncle stones on the crown.... Carbuncle stone is mentioned as one of the different kinds of precious stones fixed on "the floor of the '*Araboth*'' in *Mass. Hek.* iv, where a similar statement is made to its splendour as here: "its splendour proceeds through the whole universe and through all the seven heavens".

why is it called Carbuncle? There is a certain confusion in the readings of the latter part of the verse. The reading of *D* is adopted in the translation, as being

ning¹⁸ (*Baraq*). And tents of splendour, tents of brilliance, tents of brightness as of sapphire and carbuncle inclose them because of¹⁹ the shining appearance of their eyes¹⁹.

CHAPTER XXVI

SERAPHIEL, *the Prince of the Seraphim.*

Description of the Seraphim

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Above these there is one prince, wonderful, noble, great, honourable, mighty, terrible, a chief and leader¹ and a swift scribe¹, glorified, honoured and beloved.

(2) He is altogether filled with splendour, full of praise and shining; and he is wholly full of brilliance, of light and of beauty; and the whole of him is filled with goodliness² and greatness.

18 *E*: '(the planet) Jupiter' 19-19 *A*: 'the shining appearance of them (the 'Ophannim), and of their eyes and before them (=and of their faces?)'. The adopted reading is that of *DE*.

1-1 *DE* om. 2 *A* omitting 'goodliness' has here a lacuna.

the most plausible: the unfamiliar word '*Bareqet*' is explained as derived from '*Baraq*' ('lightning'). The reading of *E* is based on the assumption that the word to be explained is that of an angel: the expression '*wəlāmmā niqrā šēmō* . . . = why is he called by the name. . . ' is the regular phrase introducing the explanation of an angel's name. Hence *E* presents the reading: "Why is he called by the name of ŠIDQIEL? Because his splendour is like the splendour of the planet Jupiter (*Šēdeq*)".

The reading of *E* is probably due to an emendation of a copyist. It is, however, difficult to understand why he should have substituted 'ŠIDQIEL' and 'Šēdeq' for '*Bareqet*' and '*Baraq*' resp. (it would have been more natural to choose, say, the name 'BARAQIEL', cf. ch. xiv. 10), unless one may assume, that he was dependent upon some tradition, according to which ŠIDQIEL was the Prince of the 'Ophannim. Acc. to *Zohar* and *Mass. Ašilut*, ŠIDQIEL is the leader of the class of angels, which is called *Shin'anim*. tents of splendour etc. The tents, like the clouds of ch. xxxiv. 2, serve the purpose of protecting the other angels from the splendour of the 'Ophannim.

(1) a swift scribe. As this attribute is omitted by *D* and *E*, and no second statement occurs in the chapter to the effect that SERAPHIEL had the function of a scribe, scarcely any importance can be ascribed to this single expression. It is possible that a copyist, missing a clear reference to the identity of the 'scribes' or 'scribe' in the present angelological section, there being only an occasional mention of 'scribes' in ch. xxvii. 2, concluded that SERAPHIEL, the highest of the princes of the Merkaba-angels held this function. To the 'scribes' was assigned a high position near the Throne of God. The conception is mainly connected with that of the Judgement.

(3) His countenance is altogether like (that of) angels, but his body is like an eagle's body.

(4) His splendour is like unto lightnings, his appearance like fire brands, his beauty like unto sparks, his honour like ³fiery coals³, his majesty like *chashmals*, his radiance like the light of the planet Venus. The image of him is like unto the Greater Light. His height is as the seven heavens. The light from his eyebrows is like the sevenfold light.

(5) The sapphire stone upon his head is as great as the whole universe and like unto the splendour of the very heavens in radiance.

(6) His body is full of eyes like the stars of the sky, innumerable and unsearchable. Every eye is like the planet Venus. Yet, there are some of them like the Lesser Light and some of them like unto the Greater Light. From his ankles to his knees (they are) like unto stars of lightning, from his knees to his thighs like unto the planet Venus⁴, from his thighs to his loins like unto the moon, from his loins to his neck like the sun, from his neck to his skull like unto the Light Imperishable. (Cf. Zeph. iii. 5.)

(7) The crown on his head is like unto the splendour of the Throne of Glory. The measure of the crown is the distance of 502 years' journey. There is no kind of splendour, no kind of brilliance, no kind of radiance, no kind of light in the universe but is fixed on that crown.

(8) The name of that prince is SERAPHIEL *H'*. ⁵And the crown on

3-3 so *D*. *A*: 'streams'
stars'

5-5 *DE* om.

4 *E* instead of 'the planet Venus' reads 'the shining

(6) The description of the appearance of the body of SERAPHIEL in this verse seems to indicate that his body was conceived of as having human form, in contradiction to the statement made in vs. 3.

(7) The crown on his head. On the crown as regular accompaniment-feature of descriptions of high angels, cf. ch. xii. 3 note (also ch. xviii. 1). The measure of the crown is. . . Cf. *Shi'ur Qoma*, *Bodl. opp.* 467: the measure of the crown on the head of the manifested Godhead is 500,000 by 500,000 (measures).

(8) Seraphiel *H'*. See Schwab, *VA.* p. 260. Among the different passages treating of 'SERAPHIEL' that which is nearest akin to the present representation is *Zohar*, ii. 252 b (*Hekaloth*), where SERAPHIEL is given as the name of one of the four *Seraphim*, viz. the first one.

Acc. to *S. Raziel*, 36 b, he is appointed over one of the gates of the heavenly apartments.

Acc. to *Widduy Yaphe* (*Add.* 15299, fol. 133 b) SERAPHIEL is one of the twenty-six angels who carry the *Merkaba*.

In *S. ha Chesheq* he is invoked together with other angels by the suppliant, praying for "knowledge in purity".

In *Berith Menucha*, fol. 47 c, SERAPHIEL is mentioned as one of the company of 'consuming' or 'burning' angels. The words 'SERAPHIEL' and '*Seraphim*' are deduced from the verb '*saraph*' ('burn', 'to burn'). Cf. the explanation of the

his head, its name is "the Prince of Peace".⁵ And why is he called by the name of SERAPHIEL *H'*? Because he is appointed over the *Seraphim*. And ⁶ the flaming *Seraphim* are given in his charge. And he presides over them by day and by night and teaches them song, praise, proclamation of beauty, might and majesty; that they may proclaim the beauty of their King in all manner of Praise and Sanctification (*Qēdushsha*).

(9) How many are the *Seraphim*? Four, corresponding to the four winds of the world. And how many wings have they ⁷each one of them? Six, corresponding to the six days of Creation. And how many faces have they? ⁷Each one of them ⁷four faces.⁸

(10) ⁹The measure of the *Seraphim* and the height of each one of them correspond to the height of the seven heavens.⁹ The size of each wing is like the measure of all *Raqia'*. The size of each face is like that of the face of the East.

5-5 DE om. 6 A ins. 'the Holy *Seraphim* and'
add: 'in each direction'

7-7 DE om. 8 DE

9-9 E om.

name '*Seraphim*' in vs. 12 of the present chapter. Hence SERAPHIEL, acc. to '*Antachhat Binyanīm*, fol. 38 b (cited Schwab, *ib.*), is invoked in case of fire.

And the crown on his head, its name is "the Prince of Peace." This statement is peculiar to A: it is not found in D and E. It is somewhat out of keeping with the style of this section, as well as of the whole book, in so far as it is the only instance where a special, artificial, name is given to any part of an angel's body or adornment. The attribution of special names to the different parts of the body of the Godhead is a marked feature of *Shiur Qoma*, and even of *Hek. Zot*. The sentence is no doubt a gloss.

in all manner of Praise and Sanctification. The *Seraphim* are singing praises to their Creator and especially the *Qēdushsha* or *Trisagion*. That the *Seraphim* perform the *Qēdushsha* is definitely stated also in the *Testament of Adam* (Patrologia Syriaca), in *Ma'yan Chokma*, BH. i. 58-64, and in the *Qēdushsha* of the Additional service for Sabbath and Festivals (the *Qēdushsha le-Musaph*). The last mentioned runs: "We will revere and sanctify thee as in the secret whisper of the Holy *Seraphim* who sanctify Thy name in Holiness, as it is written by the hand of the prophet (Is. vi. 3), 'And one cried unto another and said, Holy, Holy, Holy, etc.'"¹⁰ The entire conception of the *Qēdushsha*-singing *Seraphim* is of course deduced from Is. vi. It is uncertain whether *Qēdushsha* here is really = *Trisagion*.

The *Seraphim* are identical with the *Chalkadri* of 2 En. xii and xv. 1 (according to CHARLES) and, probably, also with the 'serpents' of 1 En. xx. 7 ("Gabriel, one of the holy angels, who is over Paradise and the serpents and the Cherubim"). Cf. 2 En. xix. 6.

In *Apoc. Mosis*, xxxiii. 3, the *Seraphim* are connected with the *Merkaba* as here.

They appear as one of the classes of superior angels in 1 En. lxi. 10: "And He will summon all the host of the heavens, and all the holy ones above, and the host of God, the *Kerubin*, *Seraphin* and '*Ophannin*'; and *ib.* lxxi. 7: "And round about were *Seraphin*, *Cherubin* and *Ophannin*...". Cf. further 2 En. xix. 6, xxix. 3, *TB. Chag.* 12 b.

As the first (and highest) rank of angels they are represented (as here) in the Coptic *Mysteries of St John* and the *Holy Virgin*, fol. 6 b (Budge's ed.): "I saw all the ranks of the angels. The first rank contained the *Seraphim*".

(11) And each one of them gives forth light like unto the splendour of the Throne of Glory: so that not even the Holy *Chayyoth*, the honoured '*Ophannim*, nor the majestic *Kerubim* are able to behold it. For everyone who beholds it, his eyes are darkened because of its great splendour.

(12) Why are they called *Seraphim*? Because they burn (*saraph*) the writing tables of Satan: Every day Satan is sitting, together with SAMMAEL, the Prince of Rome, and with DUBBIEL, the Prince of Persia, and ¹⁰they write¹⁰ the iniquities of Israel on writing tables which they hand over to the *Seraphim*, in order that they may present them before the Holy One, blessed be He, so that He may destroy Israel from the world. But the *Seraphim* know ¹¹from the secrets¹¹ of the Holy One, blessed be He, ¹²that he desires not,¹² that this

10-10 DE: 'he writes'
D. A om.

11-11 E: 'in a vision from'

12-12 ins. from

Berith Menucha, 38 b, also puts the *Seraphim* in the highest rank, under the leadership of YEHOEL.

Further on the *Seraphim*, see the Introduction.

(12) Every day Satan is sitting, together with Sammael etc. Satan is here the Prince of the Accusers, SAMMAEL and DUBBIEL being merely his assistants. This function tends more and more to be transferred to SAMMAEL, who as the representative of Rome, the head of the Gentile Nations, naturally becomes the chief supraterritorial enemy of Israel. So, ch. xiv. 2, SAMMAEL is explicitly named 'the Prince of the Accusers'. Likewise, in the *Pirqe Mashiach*, BH. iii. 68, SAMMAEL appears as the official accuser of Israel. In the earlier Apocrypha he is the angel of death, e.g. *Sir.* xxv. 24; 3 *Bar.* iv. 8, ix. 7. He is also identified with the serpent of the Genesis narrative of the primordial sin, or at least considered as the angel who led Adam astray acc. to 3 *Bar.* iv. 8, ix. 7. Traces of his character as angel of death are found even in later writings, e.g. *Midrash Peṭirath Moshe*, BH. i. 125, acc. to which 'SAMMAEL, the head of the Accusers' aspires to fetch Moses' soul at the time of his death. In the same line fall his functions of prince of the *Nehar di-Nur*, the fiery river (*Zohar*, i. 40 a, ii. 243 b), and angel of Gehenna (*Midrash Kohen*, 'Arze Lebanon, 3 b, P. R. 'El. xxxi, xiii). As Prince of Rome Sammael is mentioned in *Gen. R.* lxxvii, in *Pirqe Mashiach*, *ib.*, in *Hek. R.* iv, v and freq. As such he obtains a prominent place among 'the Princes of Kingdoms', even at times represented as their leader. Cf. notes on chh. xiv. 2 and xvii. 8.

For DUBBIEL as the Prince of Persia cf. *TB. Yoma*, 77 a. *Vide* Intro. sect. 7.

For 'Satan' and 'Satans' as having access to heaven, *vide* CHARLES, *The Book of Enoch*, p. 66, on the relation of 'The Parables' of 1 *En.* to the rest of the book. Acc. to 1 *En.* xl. 7, the Satans have access to heaven.

that they may present them before the Holy One. This conception of the Seraphim as having the function of handing over documents or petitions to the Holy One, is represented in a somewhat different form in the statement occurring in *Lev. R.* xxii and *Eccl. R.* x, that the record of man's deeds during the past day is during his sleep transmitted by the '*nëshāmā*' to a *Kerub* and by the *Kerub* to a *Seraph*, who in his turn presents it before the Holy One, blessed be He. The conception is based on the assumption that the *Seraphim* are the class of *Merkaba*-angels who stand next to the Throne.

know from the secrets of the Holy One. It was thought that some of the highest angels enjoyed the privilege of partaking in the knowledge of God's secrets;

people Israel should perish. What do the *Seraphim*? Every day do they receive (accept) them from the hand of Satan and burn them in the burning fire over against the high and exalted Throne¹³ in order that¹⁴ they may not come¹⁴ before the Holy One, blessed be He, at the time when he is sitting upon the Throne of Judgement, judging the whole world in truth.

CHAPTER XXVII

RADWERIEL, *the keeper of the Book of Records*

R. Ishmael said: Metatron, the Angel¹ of *H'*¹, the Prince of the Presence, said to me:

(1) Above the *Seraphim* there is one prince, exalted above all the

13 *E* adds: 'of Glory'

14-14 so *DE*. *A*: 'he may not present them'

Ch. xxvii. 1-1 *E* om.

they knew beforehand the decrees and the reasons of the decrees. Cf. chh. xxviii. 4, x. 1, xlv. 1, 2 and notes resp., xviii. 16 and note. A technical term for this knowledge of the Divine secrets was the expression "know from inside the Curtain" or "hear from behind the Curtain". Cf. *Chag*. 16 a (concerning the ministering angels), *Chibbut ha Qeber*, iv (of the angel of death), *Ma'yan Chokma*, et freq. (of the angel *Gallishur*).

receive them from the hand of Satan and burn them... that they may not come before the Holy One etc. Cf. how acc. to 1 *En*. xl, "the four presences on the four sides of the Lord of Spirits" "fend off the Satans and forbid them to come before the Lord of Spirits to accuse them who dwell on the earth" (vs. 7). The accusations have no power to alter the Divine decrees concerning Israel, so far as they are sufficiently counterpoised by high merits on the part of Israel (for instance their acceptance of the Tora on mount Sinai, without which acceptance the whole world could not have subsisted). Of this impotence of the accusations the burning 'of the writing tables of Satan' is a metaphor.

The *Seraphim* are here represented as frustrating the plottings of the accusing angels. In *P. R. 'El*. on the contrary, SAMMAEL, the *Chayyoth* and the *Seraphim* in unity desire man's fall and plan to bring it about.

sitting upon the Throne of Judgement, judging the whole world in truth. The interest begins to turn to the Judgement. Similarly, in the independent angelological exposition contained in ch. xviii, the functions of the last enumerated angels centre round the different aspects of the Divine Judgement. The Throne of Glory seems to the visionary as he directs his gaze higher, to reveal itself as the Throne of Judgement. For the expression 'judging in truth' cf. ch. xxxi. 1.

Ch. xxvii. Ch. xxvii, although belonging to the same angelological section as the preceding chapters, leaves the subject of the angels of the *Merkaba* and the princes appointed over them and approaches the subject of the Judgement, already alluded to by the last verse of the foregoing chapter. It treats of RADWERIEL, the heavenly registrar, the keeper of the Case of Writings, of which the most important is 'the Book of Records'. On 'the Book of Records' the Judgement is to be based.

(1) Radweriel H'. The name is, so far as is known to the present writer, an ἀπαξ-λεγομενον. So is also the reading of *E*: 'Daryoel'. But it seems very probable that

princes, wondrous more than all the servants. His name is RADWERIEL² *H'* who is appointed over the treasuries of the books.

(2) He fetches forth the Case³ of Writings (with) the Book of Records in it, and brings it before the Holy One, blessed be He.⁴ And he breaks the seals of the case⁴³,⁶ opens it,⁵ takes out⁵ the books and delivers them before the Holy One, blessed be He⁶. And the Holy One, blessed be He, receives them of his hand and gives them in his sight to the Scribes, that they may read them⁷ in the Great *Beth Din*⁷ in the height of 'Araboth Raqia', before the heavenly household.

2 *E*: 'Dāryō'el' *D* marks, through vowel points, the pronunciation 'Radweriel', which is adopted above. 3-3 *E* om. 4-4 *D* om. 5-5 so *E*. *A* corr.: 'gives' 6-6 *D* om. 7-7 so *DE*. *A* (seemingly): 'before the Holy One, blessed be He, the Great One'

there exists a connection as well with regard to name as function between RADWERIEL here and the 'VRETIL' of 2 *En.* xxii. 11, 12 (and xxiii): "*And the Lord called one of his archangels, by name Vretil, who was more wise than the other archangels and wrote down all the doings of the Lord. And the Lord said to Vretil, 'Bring forth the books from my store-places, and give a reed to Enoch and interpret to him the books' etc.*"

The affinities between this and the features represented in the present chapter are obvious. 2 *En.*: VRETIL, an archangel, more wise than the other archangels—*here*: RADWERIEL, above the *Seraphim*, the highest of the Merkaba-angels, exalted above all the Princes etc.; 2 *En.*: VRETIL brings forth the books from God's store-places—*here*: RADWERIEL is appointed over the treasuries of the books and fetches forth the 'Case of Writings with the Book of Records'.

The derivation of the words 'RADWERIEL' or 'VRETIL' is uncertain: from the Greek *εὐπρεπής* (thus signifying 'fluent speech, fluent reading'?). Cf. vs. 3. He may originally have had the function, here assigned to the scribes, of 'reading the books before the Great *Beth Din* in heaven'.

(2) Case of Writings. The Hebrew word, here translated 'Case', is used in this sense in *TB. Soṭa*, 22 d, *Meg.* 26 b *et al.*, also *Alph. R.* 'Aqiba, letter *Qoph*.

Book of Records (or 'of remembrance'). On the three main lines of conceptions of the 'books' at the Judgement cf. note on ch. xviii. 24. The 'book of records' evidently is conceived of as recording all the deeds of the inhabitants of the world relevant to the issues at the Judgement. The Book of Records is the basis of the Judgement also acc. to the liturgical prayer 'וְיִתְּנָה תְּקֵף' ("and thou wilt remember all that is forgotten, and wilt open the Book of Records").

takes out the books. The plural might either refer to other books besides and inclusive of the Book of Records or be due to a confusion between two traditions, one knowing one 'Book' only, the other speaking of 'the books'. The second tradition is represented, e.g. in 4 *Ez.* vi. 20, *Ap. Bar.* xxiv. 1, *Rev.* xx. 12, not to mention *Dan.* vii. 10.

gives them... to the scribes, that they may read them. A similar situation, with the same expressions, is pictured in the *Alph. R.* 'Aqiba, letter *Qoph*, only with the difference that it there takes place at the court of the Pharaoh. The illustrative features are borrowed from the writer's ideas of the proceedings at a royal court.

The Great *Beth Din* or *Sanhedrin* or Court of Justice. Cf. chh. xxviii. 9 and xxx. 1. The *Sanhedrin* on earth had its counterpart in heaven, the *Beth Din Shel-ma'ala* under the presidency of the Most High himself. The members of the *Beth Din* on high were the highest angels, according to ch. xxx evidently the seventy-two princes of kingdoms together with the Prince of the World, acc. to ch. xxviii. 9,

(3) And why is he called RADWERIEL⁸? Because out of every word that goes forth from his mouth an angel is created: and he stands in the songs (in the singing company) of the ministering angels and utters⁹ a song before ¹⁰the Holy One, blessed be He¹⁰ when the time draws nigh for the recitation of the (*Thrice*) *Holy*.

8 E: 'Dāryō'el'

9 E: 'they utter'

10-10 E: 'him'

presumably, the '*Irin* and *Qaddishin* (cf. notes, *ad loca*). See also *Hek. R.* v. 3, *BH.* iii. 87.

Concerning the conception of 'Scribes' cf. on ch. xxxiii. 2. Acc. to some passages, there is only one 'Scribe' as such: e.g. ch. xxxiii. 2 (in the reading of *E*) and *Hek. R.* v. 1. Acc. to chh. xviii. 23-25 and xxxiii. 2 (in the adopted reading) the Scribes are two in number. They record the deeds of the inhabitants of the world in the 'books', and also write down the divine decrees (*Hek. R.* v. 1). Here they are even more represented as reading what is written in the books before the *Beth Din* (cf. *Alph. R.* '*Aqiba*, letter *Qoph*, referred to above). The last function was perhaps, as already suggested, originally assigned to VRETIL-RADWERIEL: in 2 *En.* xxii. 12, VRETIL is asked to "interpret to him (Enoch) the books".

(2) Why is he called Radweriel? Because out of every word that goes forth from his mouth an angel is created. This explanation of the name presupposes the form 'DIBBURIEL' or 'DABARIEL'. The form 'DABAR YAH' is found in a MS. acc. to Schwab, *VA*. The derivation is perhaps a mere construction on the part of the writer. Exchanging 'W' for 'B' he reads '*Ra-Dabariel*' or '*Radibburiel*', regarding the '*Ra*' as an epenthesis.

The ascribing to an angel-prince of the faculty of creating an angel by the 'word of his mouth' is rather singular. Such a statement is otherwise made of God, e.g. ch. xl. 4, *Chag.* 14 a, *Gen. R. Par.* lxxviii, *Lam. R.* on iii. 23. It would seem that the present passage could be made to refer to 'RADWERIEL' only on the assumption that it is one of the different names of the Godhead, and not the name of an angel. The whole of vs. 3 might have been adduced from a treatise on the Divine Names. The instances where the same name at one time or in one writing is represented as the name of an angel, and in another as one of the names of the Godhead, are frequent in the cabbalistic literature. Cf. the case of 'TAG'AS', note on ch. xviii. 5; the '*Pardes*' (quoted *YR.* i. 90 a) discusses the '*Akatriel*' of *Ber.* 7 a, rejecting the view that it is the name of the Most High, and maintains that '*Akatriel*' is "a Prince on high".

he stands etc. The 'he' probably refers to the created angel. in the songs. The Hebrew here might be translated 'in the service' instead of 'in the songs, i.e. in the singing company' of the ministering angels. But the latter is presumably the correct interpretation. The exact meaning is: 'he stands and sings the songs (*shiroth* as a technical term) which the ministering angels sing'. Cf. *Gen. R.* lxxviii: "God creates every day a new order of angels who utter a song, etc." See note on ch. xl. 4. On RADWERIEL *vide* *Introd.* sect. 13 A (6).

CHAPTER XXVIII

The 'Irin and Qaddishin

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Above all these there are four great princes, '*Irin* and *Qaddishin* by name: high, honoured, revered, beloved, wonderful and glorious ones, greater than all the children of heaven. There is none like unto them among all the celestial princes and none their equal among all the Servants. For each one of them is equal to all the rest together.

(2) And their dwelling is over against the Throne of Glory, ¹and their standing place ²over against the Holy One, blessed be He²,

1-1 *E* om. 2-2 so *D*. *A* uncertain, corr.; perhaps: 'is the place of the Throne (*Beth ha-kKisse*)'

Ch. xxviii. (1) '*Irin* and *Qaddishin*, i.e. the Watchers and the Holy Ones.

The '*Irin* and the *Qaddishin* are acc. to the present angelological system at the summit of the hierarchy of angels. They form the council of the Most High (vs. 4), have executive power over the terrestrials (vs. 6) and, acc. to the latter part of the chapter, they assist at the forensic as well as retributive judgement, being both 'court-officers' and executors of the Divine decrees.

The '*Irin* are mentioned in 1 *En.* (as 'Watchers'), alone or together with the *Qaddishin* (= 'Holy Ones') in chh. vi-xvi, xix, lxxxvi *et al.* In 2 *En.* they appear as the '*Grigori*', *ib.* xviii.

The expression 'Holy Ones' occurs frequently in 1 *En.* (chh. ix. 3, xii. 2, xiv. 23, xxxix. 5, xlvii. 2, lvii. 2, lx. 4, lxi. 8, 10, 12, lxv. 12, lxix. 13, lxxi. 8, lxxx. 5, cvi. 19. *Vide* CHARLES, 1 *En.* Index II, "Angels, the holy ones"). In ch. ix. 3 it refers to the four archangels or 'Presences', in ch. lxxx. 5 to the seven archangels, in ch. xlvii. 2 possibly to the *Chayyoth*, in chh. xxxix. 5, lx. 4, lxi. 8, lxv. 12 to the angels or 'children of heaven' in general, the distinction from other classes of angels or as a definite class being uncertain, as is the case also with chh. lvii. 2 and lxxi. 8. Of special interest here are ch. xii. 2 ("watchers and the holy ones"), ch. xiv. 23 ("the most holy ones who were nigh to him did not leave by night [= watchers] nor depart from him"). These passages indicate a conception of the '*Irin* and *Qaddishin* as a special class of angels, intimately connected with each other, and hence show affinity with the presentations of our chapter. Cf. also ch. lxix. 13.

As regards the 'Watchers' we meet with two different traditions in 1 *En.* One, the more prominent, is embodied in chh. vi-xvi, xix, lxxxvi, represents the watchers as fallen angels, identifying them with "the sons of God" (Gen. vi). The other view agrees with that of the present chapter in placing the Watchers near the Divine Presence and is represented in chh. xii. 2, xiv. 23, lxi. 12 ("those who sleep not above in heaven" = 'the Watchers') and, possibly, ch. cvi. 19. (Cf. however, CHARLES's distinction in *Pseudepigrapha* (*A and P*. II), p. 188, note 5.)

Notice the expression, 1 *En.* xx. 1: "the holy angels who watch", with reference to the seven archangels.

The names and conception are, of course, deduced from Dan. iv. 14 (10). See vss. 4, 8 and 9 here. The present interpretation of the said passage in Daniel is, however, by no means the general one. Cf. the commentaries.

(2) their dwelling is over against the Throne of Glory... over against the

so that the brilliance of their dwelling is a reflection of the brilliance of the Throne of Glory¹. And the splendour of their countenance is ³a reflection of³ the splendour of *Shekina*.

(3) And they are glorified by the glory of ⁴the Divine Majesty (*Gēbūrā*)⁴ and praised by (through) the praise of *Shekina*.

(4) And not only that, but the Holy One, blessed be He, does nothing in his world without first consulting them, but after that he doeth it. As it is written (Dan. iv. 17): "The sentence is by the decree of the '*Irin* and the demand by the word of the *Qaddishin*."

(5) The '*Irin* are two and the *Qaddishin* are two. And how are they standing before the Holy One, blessed be He? ⁵It is to be understood, that one '*Ir* is standing on one side and the other '*Ir* on the other side, and one *Qaddish* is standing on one side and the other on the other side.

1-1 E om. 3-3 so DE. A: 'like unto, similar to' 5 here the parallel of D breaks off.

4-4 E: '*Shekina*'

Holy One... the brilliance of their dwelling is a reflection of... the Throne etc. This is best paralleled by what is said with regard to Metatron, chh. vii, x. 1 seq., xlviii c 4, 5, 7. These expressions will presumably convey the exclusive position of the '*Irin* and *Qaddishin*. They are depicted as having their abode at the very top of the hierarchical structure: face to face with the Throne of Glory and the *Shekina*. For 'the splendour of *Shekina*' see note on ch. v. 4. Ch. xxii. 7 and 13, the splendour of *Shekina* is said to be on the face of KERUBI'EL, resp. the *Kerubim*. But there the splendour of *Shekina* is received from above; 'the *Shekina* is resting upon them', *ib.* 13.

(3) they are glorified by the glory of the Divine Majesty and praised by the praise of *Shekina*. The glorification and praise directed towards the *Shekina* are reflected also on the '*Irin* and the *Qaddishin*, owing to their near association with the Godhead.

(4) the Holy One, blessed be He, does nothing... without first consulting them. Cf. *TB. Sanh.* 38 b: "the Holy One, blessed be He, doeth nothing without consulting the heavenly household, as it is written (Dan. iv. 17): 'The sentence is by the decree of the watchers etc.'" What in Talmud is applied to the angels in general ('the heavenly household') is here referred to the definite class of angels called '*Irin* and *Qaddishin*. The idea of God consulting the angels is common in Rabbinic: "when God wished to create the first Adam, he took counsel with the ministering angels" (e.g. *Gen. R.* viii. 4). The important feature here is that the function of Divine counsellors is limited to a specified class of angels; and this is evidently due to the attempt to systematize, characteristic to the present section. Of necessity the advising function could be ascribed to none but the highest class of angelic beings.

(5) The '*Irin* are two and the *Qaddishin* are two. The '*Irin* and *Qaddishin* are acc. to this verse only four in number. In vs. 9 they must be conceived of as being a larger number. The 'Holy Ones', 1 *En.* ix. 3, are four, being identified with 'the four Presences, MIKAEL, URIEL, RAPHAEL and GABRIEL'. Otherwise the "Watchers (and Holy Ones)" of 1 *En.* are numerous: acc. to ch. vi. 6 they are 200. There might possibly be some connection between the passage 1 *En.* ix. 3 and the present vs. (traces of the same tradition?). Cf. note on ch. xxviii. 9.

(6) And ever do they exalt ⁶the humble⁶, and they abase to the ground those that are proud, and they exalt to the height those that are humble.

(7) And every day, as the Holy One, blessed be He, is sitting upon the Throne of Judgement and judges the whole world, and the Books of the Living and the Books of the Dead are opened before Him,

6-6 A om.

(6) And ever do they exalt the humble. A seems to read: 'And they make high the world'. abase...those that are proud and...exalt...those that are humble. This idea is deduced from Dan. iv. 17: "the most High ruleth in the kingdom of men, and giveth it to whomsoever he will, and setteth up over it the basest of men", which follows after the words cited in support of the conception of the *'Irin* and *Qaddishin*. What there is said with reference to God has been transferred to the *'Irin* and *Qaddishin*, the counsellors and executors of the Divine decrees. Cf. ch. xlviii c 9.

CHH. XXVIII. 7-XXXIII. 2.

The Divine Judgement and the Heavenly Tribunal.

With vss. 7-10 of the present chapter (xxviii) a certain change in character is noticeable. The main difference is that the systematic exposition of the foregoing part, with its specific manner of expression seems to be ended. The theme which already from ch. xxvi. 12 has begun to verge into the conceptions of the Judgement is henceforth (till ch. xxxiii. 3) altogether absorbed in the different aspects of the Divine Judgement, the heavenly assize and the execution of the Divine decrees. But, in contrast to the preceding angelological section, this section reveals no clear progressive structure in the treatment of its subject, but leaves rather the impression of a complex of culled fragments from the different traditions of the proceedings at the Divine Court of Justice.

A divergence in the present vss. of ch. xxviii from the preceding has already been referred to: the *'Irin* and *Qaddishin* are in vs. 5 said to be four in number, vs. 9 presupposes a considerably larger number. Chh. xxix and xxx furthermore maintain the identity of the *'Irin* and *Qaddishin* with the seventy-two princes of kingdoms. (Acc. to the angelological section the 72 princes of kingdoms probably occupy a comparatively low place in the angelic hierarchy, see note on ch. xvii. 8.)

For divergences within the section notice e.g. (1) ch. xxviii. 7, the books on which the judgement is to be based are 'the Books of the Living and the Books of the Dead'; ch. xxx. 2 speaks only of 'the book in which all the doings of the world are recorded'; and ch. xxxii. 1 of 'the book': (2) chh. xxxi. 1 and xxxiii. 1, two different representations of the same idea: the relation between the agencies of Justice and Mercy at the Judgement (esp. from the point of view of mediation between them). For the different conceptions of the Judgement cf. also the Introduction, sect. 16.

(7) every day as the Holy one...is sitting upon the Throne of Judgement, i.e. every day, at the time when. The judgement here is daily. Cf. the dictum of R. Yose, *Tosefta Rosh ha Shana*, i, "man is judged every day". It is both *forensic* and *retributive*. The cases (vss. 8, 9) refer to the continual happenings in the daily life of man (and the world in general), and the decrees are executed immediately.

the Books of the Living and the Books of the Dead. Cf. ch. xviii. 23 seq. In view of the character of the Judgement as daily, the Books of the Dead are here probably of the same significance as in ch. xviii. 24; they record the time destined for every man's death. The Books of the Living may be the records of the time destined for a man's entering life on earth, but are perhaps also conceived of as

then all the children of heaven are standing before him in fear, dread, awe and trembling. At that time, (when) the Holy One, blessed be He, is sitting ⁷ upon the Throne of Judgement⁸ ⁹to execute judgement⁹, his garment is white as snow, the hair on his head as pure wool ¹⁰and the whole of his cloak¹⁰ is like the shining light. And he is covered with righteousness all over as with a coat of mail.

(8) And those *'Irin* and *Qaddishin* are standing before him like court officers before the judge. And they raise and argue every case and close the case that comes before the Holy One, blessed be He, in judgement, according as it is written (Dan. iv. 17): "The sentence is by the decree of the *'Irin* and the demand by the word of the *Qaddishin*."

(9) Some of them argue and others pass the sentence in the Great *Beth Din* in *'Araboth*. Some of them make the requests from before ¹¹the Divine Majesty¹¹ and some close the cases before the Most High. Others ¹²finish by going down¹² and (confirming =) executing the sentences on earth below. ¹³According as it is written¹³ (Dan.

7 E ins. 'as judge' 8 E: 'Presence' 9-9 E om. 10-10 so E.
A corr.: 'and he is wholly lifted up' 11-11 so with E. A has a lacuna.
12-12 E om., thus reading 'others execute the sentences etc.' 13-13 A lacuna.

recording the deeds (merits and transgressions) of the living (= the Book of Records, chh. xxx. 2, xxvii. 2).

Throne of Judgement... garment is white as snow etc. This is deduced from Dan. vii. 9. The Throne of Judgement as a conception plays a prominent part in 1 En. xc. 20, xlv. 3, lv. 4, lxi. 8, lxix. 27 (only in the first of these instances, however, called "the Throne of Judgement", in the others "the Throne of Glory"), also 4 Ez. vii. 33 ("And the Most High shall be revealed upon the throne of judgement"). See BOX, *Ezra-Apocalypse*, p. 118.

(8) And those *'Irin* and *Qaddishin* are standing before him like court officers before the judge. Acc. to *Mass. Hek*. "seven court-officers are sitting on seven thrones" before the Holy One. A quotation, YR. i. 7 a, from the writings of Eleazar of Worms treats of the "seven court officers (*shoferim*) in heaven by whose demand every decree is executed, whether for good or for evil, abundance or privation, war or peace".

they raise and argue... and close the case. The cases include all different issues arising from the course of the daily life of the inhabitants on earth. Acc. to *Ex. R.* xxxi, angels act as defensors and accusers of man at the judgement: "when a man has committed a transgression and stands before God to receive judgement, then some angels plead in his defence, others accuse him guilty".

(9) Some of them argue and others pass the sentence... some of them make the requests... some close the cases... others finish by... executing the sentences. Cf. Sa'adya's *commentary* on Dan. iv. 17: "The *'Irin* are the Holy Angels of anger and fury who pass the sentence". (Notice, by the way, how Sa'adya represents the angels in question as one class only, called *'Irin*, regarding the *'Qaddishin* = Holy Ones' as an attribute—further, how he identifies them with "the angels of anger and fury" usually but another name for the 'angels of destruction', cf. note on ch. xxxi. 2.) Cf. also *Hilkoth Mal'akim*, *Add.* 27199, fol. 124 a: "the angel who passes the sentence and who issues the demands is called *'Ir* and *Qaddish*".

It is evident from the way in which the various functions are depicted as divided

iv. 13, 14): "Behold an *'Irin* and a *Qaddish* came down from heaven and cried aloud and said thus, Hew down the tree, and cut off his branches, shake off ¹⁴his leaves¹⁴, and scatter his fruit: ¹⁵let the beasts get away from under it, and the fowls from his branches¹⁵".

(10) Why are they called *'Irin* and *Qaddishin*? By reason that they sanctify the body and the spirit with lashes of fire on the third day of the judgement, as it is written (Hos. vi. 2): "After two days will he revive us: on the third he will raise us up, and we shall live before him."

14-14 *A* lacuna.

15-15 *E* om.

between the *'Irin* and *Qaddishin*, that they are in this verse regarded as comprising a comparatively large number. One might, with some certainty, venture the conjecture that the underlying idea here is the representation of the *'Irin* and the *Qaddishin* as the Heavenly *Beth Din*. The *'Irin* and *Qaddishin* would then be conceived of as 70 or 72. This is confirmed by the confusion in the two chapters following next, between these angels and the 72 princes of kingdoms who acc. to ch. xxx constitute the heavenly *Beth Din*. Also, in *Zohar*, e.g. ii. 6 a, the *'Irin* and *Qaddishin* of Dan. iv. 14 are explicitly interpreted as "the 72 members of *Sanhedrin* who consider the judgements of the world".

That the *'Irin* and *Qaddishin* in 1 *En.*, according to the prevalent representation there, are counted as a large number (e.g. ch. vi. 6: 200) is already recalled above. On the other hand, in later cabbalistic writings, they are likewise often pictured as a numerous class of angels, e.g. YR. i. 162 b (quotation from *Sôdê Rāsā*), they are referred to with the formula "the troops of *'Irin* and *Qaddishin*".

(10) they sanctify the body and the spirit with lashes of fire. The expression 'the body and the spirit' may be taken in two different senses, viz. as referring either to the angels in question (the *'Irin* and *Qaddishin*) or to the body and spirit of a man who has undergone judgement; the judgement of man, referred to here, would in this case be the so-called *Din ha-qQéber*, the judgement on man immediately after his death. The interpretation of the present sentence in the sense of 'sanctify the body and spirit of the judged man' is probably the correct one, esp. in view of the difficulty, that otherwise arises, of explaining the meaning of the words immediately following: 'on the third day of judgement'. 'The third day' cannot very well be meant '*absolutē*', since the judgement here is daily and continual. But with the assumed interpretation it will naturally take on the meaning 'the third of the three days that man is judged', the third day being also the final one, on which the sentence passed on man is consummated through his purification in fire ('by lashes of fire'). Cf. ch. xlv.

The result thus arrived at accords with *Masséket Chibbut ha-qQeber*, BH. i. 151: "The ministering angels (corresponding to the *'Irin* and *Qaddishin* of the present verse) receive man, after his death, from the hands of the angel of death; they judge him on the first two days on account of his character as developed during his life, through his observance or neglect of the statutes of *Tora*; on the third day they judge him, spirit, soul and body, by strokes with lashes of fire". This is a description of the *Din ha-qQéber*, referred to above.

The bath of sanctification or purification in fire is depicted as forming the conclusion of judgement also with regard to the ministering angels, in *Revelation of Moses* (tr. Gaster, rec. B, in *Royal Asiatic Society's Journal*, 1893): "the Almighty sits and judges the ministering angels, and after the judgement they bathe in that river of fire and are renewed". Cf. ch. xxxvi.

It is true that in other connections the *Qaddishin* are represented as 'sanctifying

CHAPTER XXIX

Description of a class of angels

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Each one of them ^(angel) has seventy names corresponding to the seventy tongues ¹of the world¹. And all of them are (based) upon

1-1 E om.

themselves in fire'. Thus in *Shemoth shel Metatron*, Bodl. MICH. 256, fol. 40 b, we read: "Metatron admonishes the angels every third day to bathe and purify themselves in the fiery river (*Nehar di-Nur*)".

Ch. xxix. Ch. xxix contains a short description of angels, the names or class of which are not defined in the chapter. As the context now stands, the description is, by the opening words 'each one of them', made to refer to the 'Irin and Qaddishin of the foregoing chapter. On the other hand, the following chapter, xxx, in defining 'the great princes who are called H' by the name of the Holy One' as the 72 Princes of Kingdoms, seems to have in view no others than the angels of the present chapter, of which it is stated here that their names are 'based upon the Name of the Holy One'.

Thus, in the present arrangement of the context, the 'Irin and Qaddishin are, by inference, identical with the Princes of Kingdoms. The identification is justifiable, since the functions of both categories, as represented in chh. xxviii. 7-xxx, are practically congruent: they are both depicted as constituting the Celestial *Beth Din*, the Divine Council or Court of Justice.

It is scarcely probable, however, that ch. xxix is the original continuation of ch. xxviii. 7-10. It gives the impression of being a fragment from an angelological description from some other source. When considered by itself, it can best be understood as treating of the Princes of Kingdoms, for the reason that the expression 'seventy names corresponding to the seventy tongues of the world' naturally—and usually—connects the angels or angel of which it is used, with the conception of the seventy nations and their representative body in the heavens.

Still it seems to be a necessary conclusion that to the Redactor, responsible for the present arrangement of chh. xxviii-xxx seqq., the identity of the 'Irin and Qaddishin with the Princes of Kingdoms, did not, at least, present any difficulty. Some tradition to this effect might have obtained. As a trace of such a tradition, although from a late source, may perhaps be regarded the passage on the Princes of Kingdoms in Menahem Reqanati's *Commentary on the Pentateuch*, Gen. x. 5 (E^f): "70 princes are set over the 70 nations. . . they are the 70 princes who surround the Throne of Glory and they are the same that are called in the Song of Solomon (Cant. iii. 3) 'the Watchmen (*Shōmērim*) that go about the city', for by their hands the decrees from on high are issued (cf. ch. xxviii. 8 seq.)."

Convergences between the conceptions of the Watchers and of the Representatives of the Nations (the Princes of Kingdoms) may have occurred at an early period, although then perchance in another aspect. The Watchers (1 En.) as well as the Princes of Kingdoms, acc. to a different trend of traditions, were regarded as evil agencies in the world (cf. 1 En. lxxxix. 59-65 and note on ch. xxviii. 1). The Watchers become the leaders of corrupt mankind on earth and the Princes of Kingdoms are the rulers of the Gentile nations: occasionally the leader of the Watchers is mentioned as SATANIEL or SAMMAEL, and the Princes of Kingdoms, as evil agencies, are later regularly represented as headed by SAMMAEL. Cf. on this TB. Sota, 9 a, Sha'are 'Orā, 65 a, 'Emeq ha-mMelek, 121 b et al.

the name of the Holy One, blessed be He. And every several name is written with a flaming style ² upon the Fearful Crown (*Kéther Nōrā*) which is on the head of the high and exalted King.

(2) And from each one of them there go forth sparks and lightnings. And each one of them is beset with horns of splendour round about. From each one lights are shining forth, and each one is surrounded by tents of brilliance³ so that not even the *Seraphim* and the *Chayyoth* who are greater than all the children of heaven are able to behold them.

2 *A* adds: 'of iron'

3 *E*: 'Understanding (*Binā*)'

(1) seventy names corresponding to the seventy tongues... (based) upon the name of the Holy One. Exactly the same is said with regard to Metatron, chh. iii. 1 and xlviii c 9. The expression 'seventy names corresponding to the seventy tongues' is a formula, conveying the connection of the angels in question with the seventy nations. So ch. xlviii c 9 the ascribing to Metatron of seventy names is clearly connected with his character of chief of the seventy princes of the seventy nations. The phrase 'based upon the Name of the Most High' with regard to a name, means that it contains the elements of the *Tetragrammaton*. Cf. note on ch. x. 3 and the angelic names ch. xviii. 9-24. written with a flaming style. Cf. chh. xiii. 1, xxxix. 1, xli. 4. upon the Fearful Crown... on the head of the... King. The Fearful Crown '*Kéther Nōrā*' is the technical term for the crown on the head of the Most High as seated on the Throne of Glory. In magical writings the 'Fearful Crown' plays a prominent role, being, together with 'the Great Seal', the most effectual of magical formulas. Cf. *Hek. Zot. (Bodl. MICH. 9, fol. 66 a)*: "the Fearful Crown...(follow some mystical letters)...this is the crown with which one conjures all the Princes of Wisdom". Cf. also *Mass. Hek. vii*: "the crown on the forehead of the Holy One, blessed be He, on which the Explicit Name is graven".

(2) And from each one of them there go forth sparks and lightnings etc. This verse repeats the phraseology of the angelological section. For 'horns of splendour' cf. ch. xxii. 6. For 'tents of brilliance', ch. xxv. 6. "not even the *Seraphim* and the *Chayyoth* etc.' cf. ch. xxvi. 11. Does the present fragment know only the *Seraphim* and the *Chayyoth* as *Merkaba*-angels? Or does it regard the *Seraphim* and the *Chayyōth* as the two highest classes of superior angels by the *Merkaba*? (Cf. *Zohar*, ii. 252 b. תחות היא חיותא ארבעה שרפין... מאלין ארבע כד נטלי נפקי שביבין דאשא ומאלין שביבין אתעבירו שבעין ותרין גלגלין מלהמן באשא)

CHAPTER XXX

*The 72 princes of Kingdoms and the Prince of the World
officiating at the Great Sanhedrin in heaven*

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Whenever the Great *Beth Din* is seated in the '*Araboth Raqia*' on high ¹there is no opening of the mouth for anyone in the world save¹ those great princes who are called *H'* by the name of the Holy One, blessed be He.

1-1 *E* om. corr.

Ch. xxx. Another representation of the daily judgement in the Celestial *Beth Din*. The function of court-officers (ch. xxviii. 8) is here attributed to the Princes of Kingdoms with their leader, the Prince of the World. In contrast with ch. xxviii. 8, 9, this function is here seen exclusively from the aspect of defence or plea in favour of the world (vs. 2). The accusing part is hereby implicitly reserved for the Most High himself.

(1) Whenever (lit. every fixed time that) the Great *Beth Din* is seated. Every day, at a fixed time, the Great Sanhedrin assembles in the highest of the heavens, the '*Araboth*', under the presidency of the Holy One. This is explicit from vs. 2: 'every day at the hour that', and 'pleads... before the Holy One, blessed be He'. The sittings of the *Beth Din* are here for judgement, although the judgement may include all the various decisions with regard to the affairs of the world. But the Celestial *Beth Din* has even a wider scope. So, e.g. in *Gen. R.* xlix. 6, it is said that God introduces new *Halakas* daily in His Celestial *Beth Din*. For the *Beth Din Shelma'ala* as giving daily decisions with regard to the happenings of the world cf. *Hek. R.* i-iii seqq.

there is no opening of the mouth for anyone in the world etc. For the expression in this sense cf. *Alph. R.* '*Aqiba*, *BH.* iii. 57. Cf. also the phrase 'opening of the mouth for the *Minim* (heretics, Christians)' = scriptural points of support for heretical beliefs. Here it apparently means that no one is allowed to speak either as accuser or defender except the Great Princes called *H'*.

great princes... called *H'* by the name of the Holy One. Ch. x. 3 speaks of '8 great princes called *H'* by the name of their King', to whom also is assigned an exceptional status. Cf. note, *ib.*, and *Hek. R.* xxi. 'called *H'*' etc. In most cases simply means that the *Tetragrammaton* forms the latter part of the name. It seems to have been a general assumption, that the highest circle of angels were marked out from the other angels by the common distinction of the *Tetragrammaton* as part of their name, whereby their names were 'based upon the Name of the Holy One'. But the traditions are at variance as to the further character, number and function of these highest angels. Thus, in the present book, ch. x. 3 (already referred to), 'the 8 Great Princes, called *H'* etc.' occupy so high a position as to be above the jurisdiction of Metatron (the Lesser ימחנן), which includes all the other angels and princes; in the angelological classification of ch. xviii each one of the sixteen highest princes have the '*H'*' at the end of their names; in the angelological section, chh. xix-xxii, xxv-xxvii (xxviii), the six princes there named have likewise all the *Tetragrammaton* as part of their names. (It is in fact altogether in harmony with that angelological section, when ch. xxix, the '*Irin* and *Qaddishin*, the highest of the princes acc. to ch. xxvii. 1-6, are in ch. xxix represented, or made

(2) How many are those princes? Seventy-two princes of the kingdoms of the world besides the Prince of the World who speaks (pleads) in favour of the world before the Holy One, blessed be He,

to be represented, as having their names 'based upon the name of the Holy One'. Acc. to *Hek. R.* xxii. 1, the highest angels who are there the door-keepers of the Seventh Hall and seven in number, have all names of the form X-H'; in the preceding chapter of *Hek. R.* one meets with the statement that the awe-inspiring power of these guardians of the seventh Hall and of their names lies just in the fact that "each one of them, his name is called (based) upon the name of the King of the Universe".

In the present chapter again, the Princes H' are defined as the

(2) Seventy-two princes of the kingdoms, and this evidently because, acc. to the view contended here, the seventy-two princes of kingdoms, inclusive of the Prince of the world, form the highest angelic order in their capacity of constituting the Celestial *Beth Din*.

For the different conceptions of the Princes of Kingdoms, cf. note on ch. xvii. 8. Here they are decidedly conceived of as the REPRESENTATIVES OF THE NATIONS OF THE WORLD. The conception of representatives in heaven of the various kingdoms on earth is a well-known, early idea attested in the O.T., Dan. x. 20, 21; it occurs in *Sir.* xvii. 17 ("for every nation He appointed a ruler. But Israel is the Lord's part"). Since the nations were counted as seventy, the number of these representatives was at first usually given as seventy (cf. ch. xlviii c 9); so in 1 *En.* lxxxix. 59 (seventy shepherds). Apposite for the resemblance to vs. 2 of the present chapter is *Targ. Yer.* to Gen. xi. 7, 8 ("every nation has its own guardian angel who pleads the cause of the nation under his protection"). In *Talmud* the conception occurs, e.g. *TB. Yoma*, 77 a (MIKAEŁ, the prince of Israel, DUBIEL, the prince of Persia etc.), *Sukka*, 29 a (the Gods of the nations suffer punishment with them). Cf. further *Gen. R.* lxviii, lxxvii, *Ex. R.* xxi, *Lev. R.* xxix, *Pesikta R.* xxiii, xxvii, *P. R. 'El.* xxiv. Notice, how in *Mass. Hek.* the conception of seventy princes is replaced by that of "70 thrones of the Holy One, blessed be He, corresponding to the nations of the world".

For discussion of the origin of the number 72 as ascribed to these princes, see note on ch. xvii. 8. In the present connection—the seventy-two princes of kingdoms constituting the Great *Sanhedrin* of heaven—one is reminded of the fact that the Great *Sanhedrin* proper, of which the *Beth Din shelma'ala* is a counterpart, is in a few Mishna passages represented as consisting of seventy-two members: *M. Zebachim*, i. 3, *Yad.* iii. 5, iv. 2.

For the princes of kingdoms as the Celestial *Beth Din* cf. also Bachya's *Commentary on the Pentateuch*, Par. *Beha'aloteka* (162 b): "The Holy One, blessed be He, said to the 70 angels who surround the Throne of Glory... and they are the Beth Din of the Holy One". Cf. *Zohar*, i. 173 b, and *Mass. Hek.* v. 70, thrones always surrounding the Shekina. The 'thrones' in *Zohar* are angelic beings when termed כְּרִסְוֹן, and similarly their 'thrones' are termed קְתֹרֵי.

the Prince of the World who speaks in favour of the world. The Prince of the World is here, then, the leader of the princes of kingdoms. He combines the functions of the rulers of the nations: they plead each one the cause of his nation, the Prince of the World pleads the cause of all the nations together, of the world in its entirety. There is no reference here to any contrast between the Gentile Nations, the idolaters, and Israel. On the contrary, the representation is strikingly universal in its character. The Accuser is God himself, whereas acc. to other views, the Prince of Israel and the princes of the nations, especially the prince of Rome (or of Persia) are represented as accusing each other before the Most High. Cf. the Introduction.

For the conception of the nations (or their representatives) appearing before God in judgement or pleading before God, cf. *inter alia* 4 *Ezra* vii. 37, and the reference in *BOX, Ezra-Apocalypse*, p. 124, note *ad loc.*, to the passage in *TB. 'Aboda Zara*, 2 a b =

every day, at the hour when the book is opened in which are recorded all the doings of the world, according as it is written (Dan. vii. 10): "The judgement was set and the books were opened."

CHAPTER XXXI

(The attributes of) Justice, Mercy and Truth by the Throne of Judgement

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) At the time when the Holy One, blessed be He, is sitting on the Throne of Judgement, (then) Justice is standing on His right and Mercy on His left and Truth¹ before His face.

¹ so E. A: 'in Truth' (cf. Is. xvi. 5, quoted vs. 2).

"the nations appear before God in the future age to receive their reward. They are summoned up singly, are asked what they have done in the world, and each is condemned (Rome, Persia and other nations)".

On the Prince of the World see note on ch. xxxviii. 2, and cf. notes on chh. iii. 2, ix. 2-3, x. 3, xlviii c 9. In the Enoch-Metatron pieces, chh. iii-xv and xlviii c, Metatron occupies the same position as the Prince of the World here, i.e. leader of the princes of kingdoms and, notably, Metatron and the Prince of the World are acc. to one trend of traditions, identical. Here, in so far as Metatron is represented as the speaker, this is not the case.

at the hour when the book is opened etc. This is the same view of the book, forming the base of the judgement, that we meet with in ch. xxvii. 2, 'the Book of Records'. Cf. note, *ib.* The 'records' are here perhaps conceived of more from the point of view of the nations or the world at large than of the individual.

Ch. xxxi. Another short, independent, piece on the Judgement, characterized by the representation of the hypostasized attributes of Justice, Mercy and Truth as agencies at the Divine Judgement.

Justice and Mercy as attributes of God is a subject of speculation from the earlier periods: "Palestinian as well as Alexandrian theology recognized the two attributes of God, '*middath ha din*' and '*middath ha rahamim*'" (*Sifre Deut.* 27, Philo, *De Opific. Mundi*, 60) and the contrast between justice and mercy is a fundamental doctrine of the Cabala" (*JE*, article 'Justice'). Among the Tannaites the doctrine of Justice and Mercy as the two main attributes of God was connected particularly with the name of R. Meir. Cf. Bacher, *Agada der Tannaiten*, vol. ii. p. 60, and *TB. Ber.* 48 b, *Gen. R.* xxvi, *Ab. R. Natan*, xxxii, R. 'Aqiba, *TB. Sanh.* 67 b.

(1) At the time (or: in the hour) when the Holy One... is sitting on the Throne of Judgement. Although not clearly indicated, the judgement is probably here, as in the preceding chapters, the daily judgement, for which is appointed a fixed time, cf. ch. xxx. 2 and note.

Justice is standing on His right hand, Mercy on His left and Truth before His face. Since Mercy in vs. 2 is represented as supporting man, Justice probably stands for the accusing function at the judgement. Justice and Mercy as agencies at the judgement or of attributes of God as Judge are perhaps indicated in the Talmudic dictum as to the two Thrones, one of Justice, the other of Mercy (*Sedaqa*), *TB. Chag.* 14 a, *Sanh.* 38 b (attributed to R. 'Aqiba from R. Jose the Galilean).

(2) And when man² enters before Him to judgement, ³(then) there comes forth from the splendour of the Mercy towards him as (it were) a staff³ and stands in front of him. Forthwith man falls upon his face, (and) all the angels of destruction fear and tremble ⁴before him⁴, according as it is written (Is. xvi. 5): "And with mercy shall the throne be established, and he shall sit upon it in truth."

2 E: 'a wicked man' 3-3 E prob. corr.: 'the Mercy goes out from judgement towards him' 4-4 E: 'on his right'

For the hypostasized attribute of Justice as accusing cf. *Alph. R. 'Aqiba, 2nd rec., BH. iii. 50*: "In that hour the attribute of Justice said before the Holy One, blessed be He, 'Lord of the Universe, even the righteous are designated for death (i.e. have sinned—according to Law no man shall be justified)'"

For a later representation of the roles of Justice and Mercy cf. *Sha'are 'Ora*, quoted YR. 7 b, vol iii: "The attribute of Justice gives to the supplicant... riches and all good things, but the attribute of Justice prevents (interrupts, annuls) the decision and says, Let us consider whether this supplicant is worthy that his supplication be granted him, and if not, let him be judged in the Great *Sanhedrin* etc." Notice the combination here of the two conceptions of Justice-Mercy and of the Great *Sanhedrin*.

The distinctive feature of the present chapter, vs. 1, is the introduction of the third attribute, the Truth, as mediating between Justice and Mercy. The combination of truth with judgement is deduced from or, rather, occurs already in the O.T. Reference is in vs. 2 explicitly made to Is. xvi. 5. Then in 4 *Ezra*, vii. 34 ("But judgement alone shall remain and truth shall stand"). For references to parallels in Rabbinic see BOX, *Ez. Apoc.* p. 122, note *ad loc.* Cf. further *Alph. R. 'Aqiba*, beg. ("The Holy One... is called Truth, and He sits on His Throne... in Truth... all his judgements are judgements of truth, and all his ways are Mercy and Truth"), and ch. xxvi. 12. The mediating character of the attribute of Truth is here symbolically indicated by the place assigned to it 'before the face of the Most High' between 'Justice' to the right and 'Mercy' to the left. Another expression of the mediation at the judgement is found, ch. xxxiii. 1 ("Angels of mercy, of peace, and of destruction").

The distinction involved in the expressions 'to the right', 'to the left', does not carry the extreme symbolical significance of certain gnostic systems and esp. the later *Qabbala*: there the accusing role is always assigned to the left side, the favour-pleading to the right. In the system of Ten *Sefiróth* Justice is on the left, Mercy on the right (contrast here).

(2) when man enters before Him to (receive) judgement, i.e. immediately after death, cf. note on ch. xxviii. 10. there comes forth from the splendour of the Mercy towards him as (it were) a staff and stands in front of him. This evidently means that the attribute of Mercy wields a protecting, supporting influence over man against forces working for the strict application of the principles of justice. And this influence is represented as prevailing over the latter, at least such seems to be the import of the words following: all the angels of destruction fear and tremble before him. The angels of destruction represent the execution of the decrees of justice (cf. ch. xxxii. 1), i.e. the punishment of man's sin. Here it appears that 'the staff' from the 'splendour of the Mercy' protects man from the rage of the angels of destruction.

For the conception of the angels of destruction cf. 1 *En. liii. 3* ("I saw all the angels of punishment abiding and preparing all the instruments of Satan [for the sinners]"), lvi. 1, lxiii. 1 ("In those days shall the mighty and the kings... implore God to grant them a little respite from His angels of punishment"). 2 *En. x. 3*; *Ap. Petri*, 6, 8. *TB. Shab. 55 a*, presents an instance of the connection between the

CHAPTER XXXII

The execution of judgement on the wicked. God's sword

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) ¹When the Holy One, blessed be He, opens¹ the Book half of

1-1 E: 'when they open before the Holy One, blessed be He'

angels of destruction and the attribute of Justice (as accusing and desiring the strict enforcement of the Law): "God said to Gabriel (with reference to the situation, Ezek. ix. 4 seqq.), 'Go and write on the forehead of the righteous a mark of ink, that the angels of destruction may not get power over them, but on the forehead of the wicked a mark of blood, that the angels of destruction may have power over them'. Then said the attribute of Justice before the Holy One... '... In what respect are those better than these?'" Cf. *ib.* 152 b, 89 a; *Yer. Shebu'oth*, vi. 37 a; *Rev.* vii. 2, xii. 7; *Test. Abr.* xii, xiii; *Gēdullath Moshe*, section *Gehinnom*; *Masseketh Gehinnom*, *BH.* i. 142; *Alph. R.* 'Aqiba, *BH.* iii. 62. See also ch. xlv. 2 and note. In these instances they appear mainly in two aspects: one is that of executors of punishment and of the divine decrees in general in the world, the other that of officials of *Gehenna* appointed over the wicked (and intermediate).

On their number and names the different sources are at variance, from those speaking of two angels of destruction, usually called 'APH and CHĒMA (i.e. anger and fury), cf. SIMKIEL and ZA'APHIEL, ch. xlv. 2, to those counting them in thousands and myriads. *Rev. of Moses* (tr. Gaster, *RAS's Journal*, 1893, p. 589) represents the angel-prince QEMU'EL as the chieftain of 12,000 angels of destruction.

The 'man' who acc. to the present chapter, obtains the support of the attribute of Mercy is apparently man in general, the vast majority, perhaps those who elsewhere (e.g. ch. xlv) are referred to as the class of intermediate, 'bēnōniyyim'.

Instances of the attribute of Mercy pleading for man in opposition to the prosecuting activity of the attribute of Justice are numerous in later Qabbala. *YR.* i. 94 a, quotes from 'Asara Ma'amaroth the following passage: "The attribute of Mercy occupies itself with the merit of every creature... if a man commits a transgression, then the attribute of Justice comes to punish the man on account of the transgression but the attribute of Mercy says: 'Even if the man's hand has sinned, lo, yet his eye has not sinned... if thou wilt punish his body on account of the sin of the hand, lo, even the eye will suffer, and so it will be punished unjustly'", and continues the passage: "in this way the Mercy prevents tribulations and plagues from visiting the world (as punishments for the sins of mankind)".

Ch. xxxii. This chapter treats of the aspect of the judgement consisting in the execution of judgement on the wicked. The execution of the Divine decrees is referred to in ch. xxviii. 9, the executors there being the 'Irin and Qaddishin. The identity of the executors of judgement is in the present chapter not revealed. Regarded as immediate continuation of ch. xxxi. 1 of this chapter would imply that they are 'the angels of destruction'. That is, however, the natural conclusion presenting itself at a slight examination of the chapter, since the execution of judgement is here that on the wicked only, not of the Divine decrees in general. The plurality of angelic beings indicated by the words 'they go out from before Him in every moment' can in this connection scarcely be interpreted as any others than the angels of destruction, whose essential function is the punishment of the wicked.

(1) When the Holy One... opens the Book etc. One book as the basis of judgement here as chh. xxx and xxvii. 2 (i.e. the Book of Records). Cf. notes, *ib.*

which is fire and half flame, (then) they go out from before Him in every moment to execute the judgement on the wicked ²by His sword (that is) ²drawn forth out of its sheath and the splendour of which shines like a lightning and pervades the world from one end to the other, ³as it is written (Is. lxvi. 16): "For by fire will the Lord plead (and by his sword with all flesh)."

(2) And all the inhabitants of the world (*lit.* those who come into the world) fear and tremble before Him, when they behold His sharpened sword like unto a lightning from one end of the world to the other³, and sparks ⁴and flashes⁴ of the size of the stars of *Raqia'* going out from it; according as it is written (Deut. xxxii. 41): "⁵If I whet⁵ the lightning of my sword".

2-2 *E*: 'and His sword is'
'and sparks etc.' vs. 2.

3-3 *E* omits from 'as it is written etc.' vs. 1 till
4-4 *E* om. 5-5 *E* om.

they go out from before Him in every moment. 'They' is best understood as 'the angels of destruction'; cf. above and note on ch. xxxi. 2. For the angels of destruction as executing punishment on the wicked in the world, cf. *Hek. R.* v: "R. Ishmael said: 'What did the *Beth Din* on high do? In that hour they commanded the angels of destruction and they went down (to earth) and made a "consumption even determined" upon Caesar Lupinus". Further *Alph. R. 'Aqiba*, *BH.* iii. 50, 51 (with reference to the destruction of Jerusalem): "In that hour six angels of destruction were sent down on Jerusalem, and they destroyed the people in it... and these they were: '*Aph*, *Chema* (cf. note, ch. xxxi. 2), *Qeseph* (= 'wrath'), *Mashchith* (= 'destroyer', Ex. xii. 23), *Mashmid* (also = 'destroyer'), *Mekallé* (= 'consumer')... And each one of them had a two-edged sword in his hand"; *ib. BH.* iii. 62 (in a context, treating of the idolaters of the world), "Forthwith '*Aph* and *Chema*, two angels of destruction... drew their sword... in order to destroy the world". Cf. further the references adduced in the note on ch. xxxi. 2. The expression every moment prompts the conclusion that the execution of the punishment is one that takes place in this world continually (as well as through periods of great crises); this is confirmed by pointing to the parallel passages just referred to. We are even in this chapter concerned with the daily judgement. Against this conclusion does not speak what follows:

by His sword (that is) drawn forth out of its sheath. In the two passages from *R. 'Aqiba* cited above, the angels of destruction are represented as armed with swords. Here the sword by means of which the punishment is executed is 'the sword of God', a conception, acc. to the statements in the present chapter itself, deduced from Is. lxvi. 16 and Deut. xxxii. 41. The sword of God is a well-known, eschatological, symbol of the O.T. Cf. Is. xxvii. 1, xxxiv. 5, xlvi. 10, xlvii. 6, lxvi. 16, Ezek. xxi. 3 seqq. Later we meet with the same symbol of punishment and vengeance in 1 *En.* e.g. xc. 17, 19 (connected with the opening of the 'book'), "opened the book... and a sword was given to the sheep"; *ib.* xci. 12, "and a sword shall be given to it, that a righteous judgement may be executed". Add *ib.* xc. 34, lxxxviii. 2. Other instances of the same symbolic use of 'the sword' are Rev. i. 16, ii. 12, 16, vi. 3, 4, xix. 15. It may be noted that 'the sword' in this chapter again, as in the O.T., is God's sword, although wielded by the angels of destruction.

(3) And all the inhabitants of the world fear and tremble... when they behold His... sword... from one end of the world to the other. This is more in the style of a description of the Last Judgement. Perhaps the writer unconsciously falls in with the eschatological phraseology. Or, more probably, the situation in

CHAPTER XXXIII

*The angels of Mercy, of Peace and of Destruction by
the Throne of Judgement. The scribes. (vss. 1, 2)*

*The angels by the Throne of Glory and the
fiery rivers under it. (vss. 3-5)*

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) At the time that the Holy One, blessed be He, is sitting on the Throne of Judgement, ¹ (then) the angels of Mercy are standing on His right, the angels of Peace are standing on His left and the angels of Destruction are standing in front of Him.

1 E adds: 'of truth'

the writer's mind may be that of a great general Divine visitation, such as a war. Passages representing the Divine sword as visible to an assembly or large number of people simultaneously, occur in Rabbinic: e.g. *Sifre* on Deut. xi. 12 (cf. *Lev. R.* xxxv, *Deut. R.* iv): "(At Sinai) A book and a sword came down from heaven... and the Voice was heard, saying: 'If you practise the doctrine of this book, you shall be saved from the sword, but if not, you shall be punished by it'". It should be noted that the 'sword' in this passage is said to be identical with the sword of Gen. iii. 24, which is another of the fundamental references on which the conception of the 'sword' is based. See *Gen. R.* xxi. 14 (the sword personified).

Ch. xxxiii. 1-2. Vss. 1 and 2 of the present chapter constitute the last fragment of the context treating of the Judgement. The representation of vs. 1 is but another version of the conception of the principal agencies at the Judgement, already met with in ch. xxxi. The hypostasized attributes of Justice, Mercy and Truth of ch. xxxi. 1 are here replaced by the *angels* of mercy, peace and destruction. It is safe to assume that the angels of mercy here more or less exactly correspond with the attribute of Mercy there as to significance and function, i.e. represent the activity of plea in favour of man. As regards the angels of peace their character of mediating forces is confirmed by the frequent usage of the term 'peace' for the mediation between two opposites, see ch. xlii. 7. The correspondence between the angels of destruction and the attribute of Justice was attested, note on ch. xxxi. 2, esp. in the passage quoted from *TB. Shab.* 55a. The attribute of Justice perhaps more emphasizes the accusing part, the angels of destruction, again, the punishment, the strict carrying out of the principles of justice.

(1) the angels of Mercy are standing on His right. In contrast with ch. xxxi. 1, the defending agencies, the '*melammedim zakuth*' are assigned the place to the right side, cf. note, *ib.* The strict system of the later Qabbala is however not applied even here, since the opposing agency of the '*melammedim choba*' on the left is missing.

For the angels of mercy pleading in favour, cf. *Hilkot ha-hKisse* (*Add.* 27199, fol. 139 a): "211 myriads of angels of mercy are standing there (by the Throne) and they plead in favour of Israel". *ib.* fol. 125 a (*Hilkot Mal'akim*): the 'angels of mercy' are the performers of the Thrice-Holy part of the *Qēdushsha*, perhaps a symbolic expression of the meritorious properties of the performance of the *Qēdushsha* (ch. xl. 1). The angels of mercy have their attentions and efforts fixed on the 'merits': cf. end of note on ch. xxxi. 2.

(2) And one scribe is standing beneath² Him, and ³another scribe³ above Him.

(3) And the glorious *Seraphim*

A:

E:

surround them like fire-brands round about the Throne of Glory.

surround the Throne on its four sides with walls of lightnings, and the '*Ophanim*' surround them with fire-brands round about the Throne of Glory.

2 so E. A: above Him'

3-3 so E. A: 'a *Kerub*'

The expression 'angels of peace' is perhaps derived from Is. xxxiii. 7. The 'angel of peace' is Enoch's guide acc. to 1 *En.* xl. 8, lii. 5, liii. 4, lvi. 2 *et al.* Cf. also *Test. Dan.* vi. 5, *Asher*, vi. 6.

On the angels of destruction see notes on chh. xxx. 2 and xxxii. 1 (xliv. 2).

(2) one scribe is standing beneath Him, and another scribe above Him (acc. to the reading of E adopted above). The scribes record all the facts that have regard to the Divine Judgement, the fixed times appointed for man's entering and leaving this world (ch. xviii. 23, 24), his observance or non-observance of the Divine statutes, all 'the doings of the world', not only as to individuals but with reference to nations and the world at large (chh. xxvii. 2, xxviii. 7, xxx. 2). Besides such 'facts' the scribes also write down the decisions of judgement, the Divine decrees with regard to man after death as well as to the living.

For instances related to the ideas here presented cf. *Chibbut ha-qQeber*, BH. i. 150: "a scribe and one appointed with him (function at man's death)... counting the number of his days and years"; *Sefer Chasidim* (EJ. ii. 333): "two scribes record the place assigned for every man, whether in Paradise or Hell"; *Hek. R.* v. 1 (in the *Legend of the Ten Martyrs*): "in that hour, the Holy One, blessed be He, ordered the Scribe incessantly to write down dire decrees and terrible plagues... for the wicked Rome". Note also *Hek. R.* xx, where GABRIEL, the scribe, is represented as writing down the merits and deeds of a man, desiring to behold the vision of the *Merkaba*, and also his application for the grant of this privilege.

Ch. xxxiii. 3-5. With vss. 3 seqq. of the present chapter the theme of the Divine Judgement is abandoned. What follows in this chapter is a short representation of the Throne of Glory, the *Merkaba*-angels surrounding it and the seven fiery rivers flowing through all the seven heavens down to Gehenna, thus forming a concise summary of the *Merkabah*-picture: the heavenly glories with the Throne at their centre. Since the emphasis here is neither on the Judgement-Throne—as in the section on the Judgement, just concluded—nor on the angelic classes of the heavenly hierarchy—as in the angelological section—it may be convenient to include these verses in the section comprising chh. xxiii, xxiv, xxxiv, xxxvii, which deals with various wonders of the heavens (the Throne of Glory, the '*Araboth*' and the seven heavens in general), esp. from the quasi-physical aspect. This section is of the same fragmentary, unsystematical character as the section on the Judgement.

As regards the relation between vss. 1, 2 on one hand and vss. 3-5 on the other, it is quite probable that they belong together even originally, the compiler having put this chapter in its present place merely because the two opening verses referred to the subject of the preceding chapters, the Judgement.

Considered as a unity the present chapter forms another instance of the *Merkabah* picture revealing the Throne in its highest aspect as a Judgement-Throne. This tendency is noticeable in both the angelological expositions: ch. xviii and chh. xix-xxviii. Cf. note on ch. xxvi. 12.

(3) This verse presents three classes of *Merkaba*-angels: acc. to A, *Kerub*,

And clouds of fire and clouds of flames compass them to the right and to the left; and the Holy *Chayyoth* carry the Throne of Glory from below: each one ⁴with three fingers. ⁵The measure of the fingers of each one ⁴is 800,000 and 700 times hundred, (and) 66,000 ⁶parasangs.

(4) And underneath the feet of the *Chayyoth* seven fiery rivers are running and flowing. And the breadth⁷ of each river is 365 thousand parasangs ⁸and its depth is 248 thousand myriads of parasangs⁸. Its length is unsearchable and immeasurable.

(5) And each river turns round in a bow in the four directions of 'Araboth Raqia', and (from there) it falls down to *Mā'ōn* and is

4-4 *E* om.

5 *A* repeats: 'each one with three fingers'

6 *E*: '6000'

7 *E*: 'length'

8-8 *E* om.

Seraphim and *Chayyoth*; acc. to *E* (probably the correct reading), *Seraphim*, 'Ophanim and *Chayyoth*; thus in both readings omitting one of the classes of the angelological section (besides the wheels of *Merkaba*). Apart from this, the adopted reading presents the same order as that of the angelological section: *Seraphim*, 'Ophanim, (*Kerubim*), *Chayyoth*.

For the 'clouds of fire and clouds of flames' cf. the 'four clouds', ch. xix. 4 and chh. xxxix and xxxvii.

the Holy *Chayyoth* carry the Throne of Glory. This is a frequent statement. Cf. *Gen. R.* lxxviii, *Lam. R.* to iii. 23.

each one with three fingers. Cf. ch. xvii. 6. The measures of the fingers present some difficulty. Originally the passage might have contained some reference to the different measures ascribed to each of the three fingers, e.g. the first one 80,000, the second 70,000, the third 66,000, in a gradation intended to convey a correspondence in proportions to the second, third and fourth fingers of a human hand, respectively. For measures of the *Chayyoth* cf. ch. xxi. 1-3 and note, *Chag.* 13 a.

(4) seven fiery rivers running and flowing underneath the feet of the *Chayyoth*. Cf. ch. xix. 4 (under the wheels of the *Merkaba*, upon which the feet of the *Chayyoth* are resting, four fiery rivers are continually running) and note, *ib.*, ch. xviii. 19 and note (the four heads of the fiery river), the fiery river of ch. xxxvi, the fiery rivers between the camps of *Shekina* in ch. xxxvii. Note also 'the rivers of fire', flowing in the midst of rivers of water', ch. xlii. 7. In 1 *En.* cf. ch. xiv. 19: "from underneath the throne came streams of flaming fire so that I could not look thereon" (seven rivers, *ib.* lxxvii. 5-7). 365 number of positive, 248 of negative statutes.

The conception of 'rivers of fire' from underneath the Throne of Glory or the *Chayyoth* is an amplification of that of the fiery river, derived from Dan. vii. 10, "a fiery stream issued and came forth from before him", and after this passage frequently called *Nehar di-Nur* and sometimes *Rigyon* (e.g. *Rev. of Moses*, BH. i. 59). Acc. to *Gen. R.* lxxviii, *Lam. R.* iii. 21 (with reference to *Lam.* iii. 23); the *Nehar di-Nur* goes forth from the perspiration of the *Chayyoth* who are perspiring under the burden of the Throne(s). Acc. to *Mass. Geh.* simply "from under the Throne of Glory".

The amplification of the conception of one fiery river into that of several rivers of fire, beginning with the assumption of four heads of the *Nehar di-Nur* (ch. xviii) is at variance as to the number of these rivers, one tendency being to make them into four (corresponding to the number of the *Chayyoth* and the 'winds'), another to count them as seven (so here).

(5) And each river turns round in a bow in the four directions of 'Araboth Raqia'. Cf. ch. xxiii. 17, 18. and (from there)... to Ma'ōn and is

stayed (?), and from *Mā'ōn* to *Zebul*, from *Zebul* to *Shechaqim*, from *Shechaqim* to *Raqia'*, from *Raqia'* to *Shamayim* and from *Shamayim* upon the heads of the wicked who are in Gehenna, as it is written (Jer. xxiii. 19): "Behold a whirlwind of the Lord, even his fury, is gone, yea, a whirling tempest; it shall burst upon the head of the wicked".

stayed (?), etc. The heavens are enumerated with the omission of *Makon* and the substitution of the Hebrew name *Shamayim* for the Latin *Wilon* (*velum* or Greek *βῆλον*). In ch. xvii. 3 both these names are given for the first heaven. In *Seder Rabba di Ber. Rabba* the *Wilon* and *Shamayim* appear as two different heavens, viz. the first and second respectively.

A parallel to the present conception of the fiery river(s) going through all the heavens and eventually falling down upon the heads of the wicked in Gehenna is found in *Mass. Geh. iv* (*BH. i. 149*): "the fiery river goes down upon them (the wicked in Gehenna) and it runs from one end of the universe to the other". Similarly in the fragment, translated by Gaster, *RAS's Journal*, 1893, pp. 599-605, called *Description of Hell*: "the river *Di-nur* floweth from beneath the Throne of Glory and falleth over the heads of the sinners". Cf. 2 *En. x. 2*: "in Gehenna there is a fiery river coming forth and it floweth from one end of the world to the other". In *TB. Chag. 13 b*, the fiery river from the perspiration of the *Chayyoth* is said to "fall down upon the heads of the wicked in Gehenna" with reference to Jer. xxiii. 19, the scriptural passage adduced also by our verse. Cf. further *Apoc. Petri*, 8, *Apoc. Pauli*, 57. *Hek. R. xiii* (*Rigyon* surrounds His Throne... and covers all the chambers of the Hall of '*Araboth Raqia'* with fire-smoke).

In the vss. 4 and 5 of the present chapter we meet with a conception of fiery rivers that is brought about through an amalgamation of various views concerning the *Nehar di-Nur*.

(1) Founding upon Dan. vii. 10 the *Nehar di-Nur* became a constituent part of the picture of the splendours by the Throne. Flowing from underneath the Throne its origin was explained from the perspiration of the *Chayyoth*, heavily burdened by the weight of the Throne. In this aspect it serves no definite purpose other than to add to the glory of 'the Holy One, blessed be He, who sitteth on the Throne of Glory'.

(2) Brought into connection with the 'thousand thousands and ten thousand times ten thousand' angels ministering before the Throne acc. to the same passage, Dan. vii. 10, from which the conception of the *Nehar di-Nur* was deduced—especially in their function of performers of the *Qēdushsha* or 'the Song' the fiery river became the bath of purification, by which the song-uttering angels were thought to prepare themselves for the saying of the Thrice Holy: see ch. xxxvi.

(3) Once connected with the ministering angels even other functions than the last named were assigned to the *Nehar di-Nur*. In the fiery river the angels were "renewed every morning" (in accordance with Lam. iii. 23). To the tradition holding the view that the song-uttering angels live only so long as to perform the *Qēdushsha* and then perish, the fiery river was the substance from which they were formed and whither they were sent back again: *TB. Chag. 14 a*, *Gen. R. lxxviii*, *Lam. R. iii. 21*. From this conception there is only a short step to that of the fiery river as the place of punishment for those of the ministering angels who uttered the Song untimely or improperly: ch. xlvii. 2.

(4) Lastly the *Nehar di-Nur*, as derived from Dan. vii. 10, is brought to bear upon the "judgement and the books" mentioned *ib.* Already serving the purpose of sanctification, purification and punishment of the ministering angels, it was easily made an integral part of the Divine Judgement. On one hand it served to purify man in general from sin after death (on the third day of judgement: cf. the purification with lashes of fire, ch. xxviii. 10, *Chibbut ha-qQeber*, *BH. i. 151*),

CHAPTER XXXIV

The different concentric circles round the Chayyoth, consisting of fire, water, hailstones etc. and of the angels uttering the Qëdushsha responsorium

R. Ishmael said: Metatron; the Angel, the Prince of the Presence, said to me:

(1) The hoofs of the *Chayyoth* are surrounded by seven clouds of

the means of purification and preparation of the Intermediate (the '*benoniyyim*', cf. ch. xlv. 5), on the other hand it became the means of punishment of the wicked (in Gehenna), a conception which is attestedly old and related to that of the punishment of the wicked in a sea of fire etc. Cf. Rev. xix. 20, compared with 2 *En.* x. 2, CHARLES's notes on both passages, and Boeklen, *Die Verwandtschaft der jüd.-christlichen mit der persischen Eschatologie*, pp. 119 seqq.

In the present vss. it is primarily the conceptions indicated in the points (1) and (4) that have been foisted together. As the place of the wicked was conceived of as Gehenna, Gehenna being situated below the heavens, it was necessary, in order to reconcile the different views (*Nehar di-Nur* in '*Araboth* and as means of punishment) to present the *Nehar di-Nur* or the fiery rivers as flowing from the Throne of Glory in the '*Araboth* through the heavens down to Gehenna. In *Ma'yan Chokma* (Rev. Mosis), *BH.* i. 58-64, the points (3) and (4) are combined: "after having undergone the judgement the ministering angels bathe in the fiery river and are renewed. And then the fiery river... falls down upon the heads of the wicked in Gehenna, as it is written (Jer. xxiii. 19): 'Behold a whirlwind of the Lord... it shall burst upon the head of the wicked'". Cf. vs. 5 above.

Ch. xxxiv. This chapter, in common with the latter part of the foregoing chapter, treats of the glories of heaven with emphasis laid on the celestio-physical parts of these. The centre is the Throne of Glory, the feet of the *Chayyoth* carrying the Throne, and out from this centre the heavenly splendours are represented as evolving in concentric circles. This tendency towards a view arranging the heavenly objects concentrically round the Throne of Glory is noticeable in a number of earlier and later cabalistic writings, and is, moreover, extended to the cosmological theories of the structure of heavens and earths and their foundations. Cf. especially *Midrash Kōnēn*.

A parallel to the present chapter is ch. xxxvii. For parallels in other writings reference can be made to *Midrash Kōnēn*, *BH.* ii. 33, *Seder Rabba di Bereshit Rabba* (in Werthheimer's *Batte Midrashot*) and *Helak Merkaba*, *Add.* 27199, fol. 126 a.

In *Midrash Kōnēn*, *ib.*, where the 'concentricism' is already extended so as to include the whole cosmos—the lowest of the seven earths, the '*Ereṣ ha-tTachtona*', and the highest of the heavens, the '*Araboth* with the Throne of Glory, being on the same circle—the passage runs: "the outside of the '*Eres ha-tTachtona* is surrounded by fire and water, the water by earthquake and trembling, these by lightning and thunder, the lightning and thunder by sparks and commotion, the sparks and commotion by the likeness of the *Chayyoth* (Ezek. i. 5), the likeness of the *Chayyoth* by '*Rāsō wā-Shōb*' (Ezek. i. 14), the *Rāsō wā-Shōb* by (those who utter) the Voice of Speech (Ezek. i. 24)... (these by) the still small Voice (1 Kings xix. 12)... (this by) those who utter the '*Holy*',... (these by) those who utter the '*Blessed* be the Glory of H from His place'... (these by) those who say 'Blessed be the Glory of H for ever and ever'..." *Seder R. di Bereshith R.*, repeating this, adds (after "those who utter the Holy"): "and behind all these are the Holy *Chayyoth*, and the '*Ophannim* and

burning coals. The clouds of burning coals are surrounded on the outside by seven walls of flame(s). The seven walls of flame(s) are surrounded on the outside by seven walls of hailstones (stones of 'El-gabish, Ezek. xiii. 11, 13, xxviii. 22). The hailstones are surrounded on the outside by ¹stones of hail (stone of *Bārād*). The stones of hail are surrounded on the outside by stones of "the wings of the tempest". The stones of "the wings of the tempest" are surrounded on the outside by ¹flames of fire. The flames of fire are surrounded by the chambers of the whirlwind. The chambers of the whirlwind are surrounded on the outside by ²the fire and the water².

(2) Round about ²the fire and the water² are those who utter the

1-1 E om.

2-2 E: 'walls of fire and water'

the Throne of Glory (cf. here ch. xxxiii. 3 and beginning of this chapter) and the feet of *Shekina* are resting upon their heads... and thousand thousands and ten thousand times ten thousand ministering angels are standing round the feet of *Shekina* (cf. 'thousand camps of fire etc.', vs. 2 here)".

Helak Merkaba, referred to above, has the following representation: "Behind the Throne is the Wind, that surrounds the Throne, and Light surrounds the Wind, and splendour surrounds the light, fire surrounds the splendour etc.... and the colour of *chashmal* (Ezek. i. 4) surrounds the flames, and clouds surround the *chashmal* etc."

are surrounded on the outside by, *lit.* 'in front of' or 'before... are placed in a circle, are surrounded'. hailstones—stones of hail—stones of the wings of the tempest. These are used as mystical terms, and it is difficult to determine to what extent the writer when using them has a definite or clearly conceived idea in his mind as to what they represent. The 'el-gabish' seems, like 'chashmal', to have been a difficult and hence mysterious word which, especially as it occurs only in Ezekiel, was thought to have a deeper mystical connotation. It is then natural that it came to be regarded as denoting a celestial substance or object. 'Wings of the tempest' as a technical term occurs also e.g. in ch. xviii. 25. In *Midrash Kōnēn*, beginning of the *Ma'ase Bereshith*, the "wings of the tempest" appears as a definite part of the cosmological structure (after 'the mountains' and 'the wind' and next to 'Ereš ha-tTachtona'). As an illustration of the use of expressions like those of the present chapter in a mystical-technical sense, attention may be drawn to the passage preceding the one just referred to, *Midrash Kōnēn* (BH. ii. 32 seqq.): in a long enumeration of the foundations of the universe (the one resting upon or in the other) we meet with the statement: "the 'Ereš ha-tTachtona' is stretched out upon (over) the waters, the waters upon pillars of *chashmal*, the pillars of *chashmal* rest upon mountains of hailstones, the mountains of hailstones upon the mountains of hail, the mountain of hail upon the treasures of snow etc." See also ch. xix. 3, 4.

For the walls of flames, walls of fire, flames of fire etc. (fire being the celestial substance, κατ' ἐξοχήν), cf. *Mass. Hek.* iv, according to which four walls surround the splendours in 'Araboth Raqia', "one of lappid (firebrands), another of flames, the third of burning fire, the fourth of lightnings". And *ib.* "the seven Halls (of 'Araboth) are all of them full of coal, firebrands, sparks, lightnings, pillars of coal, pillars of burning fire, pillars of lightnings, pillars of fires, pillars of flames".

fire and water. Cf. ch. xlii. 7. The counterbalance of the two polar opposites of fire and water is a well-established part of the cosmological speculations as well as of those of the mysteries of the heavens.

(2) Round about... are those who utter the "Holy"... those who utter the

"*Holy*". Round about those who utter the "*Holy*" are those who utter the "*Blessed*". Round about those who utter the "*Blessed*" are the bright clouds. The bright clouds are surrounded on the outside by coals of burning juniper; and on the outside surrounding the coals of burning juniper there are thousand camps of fire and ten thousand hosts of flame(s). And between every several camp and every several host there is a cloud, so that they may not be burnt by the fire.

CHAPTER XXXV

The camps of angels in 'Araboth Raqia': angels performing the Qēdushsha

¹ R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) 506² thousand myriads of camps has the Holy One, blessed be He, in the height of '*Araboth Raqia*'. And each camp is (composed of) 496 thousand angels.

¹ E puts as heading: 'the Order of the Camps' 2 E: 496

"*Blessed*," i.e. the angels whose function is the performance of the responses of the *Qēdushsha*. This in the present context forms the transition to the section, beginning with the following chapter, a section which has the performance of the *Qēdushsha* in the heavens as main theme. Cf. Introduction, section 17.

thousand camps of fire and ten thousand hosts of flame(s). Referring to the angels arranged in camps (ch. xxxv. 1), hosts and armies. Cf. ch. xix. 6. The angels are made of fire, cf. note on ch. xxii. 4.

between every several camp... there is a cloud lest they be burnt by fire. For 'clouds' as protecting the angels cf. *Mass. Hek.* iii: "and clouds (are set) to protect the ministering angels from the splendour of the Throne of Glory".

Section 5. *The Celestial Qēdushsha.*

(Chh. xxxv, xxxvi, xxxviii, xl.)

Ch. xxxv. With this chapter begins a new section centering round the conception of the heavenly *Qēdushsha*, the counterpart of the *Qēdushsha* on earth. Vss. 1-4 form an introduction, treating of the numerous camps in which the song-uttering angels are arranged. The different fragments all begin with an explicit reference to the performance of the '(Thrice) Holy' ("When the time for the saying of the 'Holy' draws nigh" or "when the ministering angels utter the Song") and are contained in chh. xxxv. 5, 6, xxxvi, xxxviii, xxxix, xl.

On the conception of the celestial *Qēdushsha* see Introduction, section 17.

(1) The number of camps: 506 thousand myriads of camps has the Holy One... each camp... 496 thousand angels. For parallels cf. *Alph. R.* 'Aqiba, BH. iii. 21, and *Hilkoth ha-mMal'akim* (Add. 27199), fol. 125 a.

The passage of *Alph. R.* 'Aqiba, placing the camps in *Shechagim* (the third heaven) instead of, as here, in the '*Araboth* (the highest of the heavens)—by reason of the

(2) And every single angel, the height of his stature is as the great sea; and the appearance of their countenance as the appearance of the lightning, and their eyes as lamps of fire, and their arms and their feet like in colour to polished brass³ and the roaring voice of their words like the voice of a multitude.

(3) And they are all standing before the Throne of Glory in four rows³. And the princes of the army are standing at the head of each row.

3-3 E om.

assigning of the celestial Sanctuary to the *Shechaqim*—runs: “In *Shechaqim* 1018 camps are standing before the *Shekina* in the Sanctuary which is the *Shechaqim*, saying before Him the ‘Holy’ every day, and each camp is (composed of) 1008 myriads of ministering angels. For ‘*Shechaqim*’ is by *Gematria* 1018... From the morning until the evening they say before Him: ‘Holy, Holy, Holy’, and from the evening until the morning they say ‘Blessed be the glory of H from His place’”.

Hilkoth Mal'akim, *ib.*, presents both conceptions, that of the present chapter and that of *Alph. R.* ‘*Aqiba*, in a developed form: “(Of) the angels 906,000 myriads (the number 906 is developed from ‘506’ of vs. 1 here through the addition of a ‘ת’ to the numerical letters: ‘תתקן’ instead of ‘תקן’) are standing to the right of the Throne and as many are standing to the left of the Throne, together with a troop without number and a host without reckoning. They teach song(s) and hymn(s). And in *Shechaqim* there are 1018 camps of angels (cf. the passage in *Alph. R.* ‘*Aqiba* above) who say ‘Holy’ and ‘Blessed’ from morning until evening. Before Him there are 496,000 angels who utter the ‘Holy’ by day and the ‘Blessed’ by night. And all the angels and all the camps bathe in fiery rivers seven times and restore themselves by fire 365 times (cf. ch. xxxvi. 2).”

Vss. 1 and 4 seem to indicate that the ‘camps’ here represent all the ministering angels. But the emphasis is clearly on the song-uttering angels and in the two parallel passages just referred to as well as in ch. xl. 3 the ‘camps’ refer only to the angels as performing the *Qēdushsha*. There was, moreover, a definite tradition current, to the effect that the number of ministering angels in general was countless, infinite (basing upon Job xxv. 3: “Is there any number of his armies?”). Cf. *Hilkoth Mal'akim* above (“a troop without number etc.”) and esp. *TB. Chag.* 13 b, where it is said expressly, that the passage Dan. vii. 10, which vs. 4 here uses as scriptural support, is to be interpreted as referring to the number of one troop only, “for the troops are without reckoning”. The ‘camps’, then, are understood as the armies of angels which have the performance of the *Qēdushsha* for their special object. Apart from this, of course, the view obtains that all the higher (and lower) classes of angels utter the ‘Thrice Holy’ or the ‘Blessed’. Cf. chh. xx. 2, xxv. 5, xxvi. 8.

The numbers ‘506’ and ‘496’ are arrived at by means of *gematrical* calculations, as it is expressly stated to be the case with the number ‘1018’ of the camps of *Shechaqim* in *Alph. R.* ‘*Aqiba*, referred to above. (506 = kingdoms, 496 = kingdom. See Introduction, section 17 E.)

(2) From ‘the appearance of their countenance’ the description of the angels in this verse is in the literal terms of Dan. x. 6. The speculations concerning the song-uttering angels and the judgement are to a large extent drawn from interpretations of different passages of Daniel. Cf. vs. 4.

(3) they are all standing before the Throne of Glory in four rows. Cf. ch. xxxvi. 2. The four rows here represent the same idea as ‘the four camps of *Shekina*’, chh. xviii. 4, xxxvii. 1 (see note on ch. xviii. 4) and as “the four camps of angels” glorifying the Most High, *P. R. 'El.* iv. the princes of the army at the head of the rows (the meaning is probably “one prince at the head of each row”) are,

(4) And some of them utter the "*Holy*" and others utter the "*Blessed*", some of them run as messengers, others are standing in attendance, according as it is written (Dan. vii. 10): "Thousand thousands ministered unto him, and ten thousand times ten thousand stood before him: the judgment was set and the books were opened".

(5) And in the hour, when the time draws nigh for to say the "*Holy*", (then) first there goes forth a whirlwind from before the Holy One, blessed be He, and bursts upon the camp of *Shekina* and there arises a great commotion among them, as it is written (Jer. xxx. 23): "Behold, the whirlwind of the Lord goeth forth with fury, a continuing commotion".

(6) At that moment ⁴thousand thousands of them are changed into sparks, thousand thousands of them into firebrands, thousand thousands into flashes, thousand thousands into flames, thousand thousands into males, thousand thousands into females, thousand thousands into

4-4 *E* corr. from 'at that moment, etc.' to 'until they take upon themselves, etc.'

consequently, a parallel representation to that of 'the four great princes...over the four camps of *Shekina*', ch. xviii. 4, and identical with the "four angels at the head of the four camps of angels etc.", *P. R. 'El*, *ib.*, whose names are MIKAEL, URIEL, GABRIEL and RAPHAEL. On these grounds it is possible to point to a connection between the tradition preserved in the present chapter and 1 *En*. The four 'Presences' of 1 *En*. xl, uttering praises before 'the Lord of Glory', MIKAEL, RAPHAEL, GABRIEL and PHANUEL, are there introduced in the close company of "the thousands of thousands and ten thousand times ten thousand etc.", xl. 1, and of "those who stand before Thy glory and bless, praise and extol, saying, 'Holy, Holy, Holy', and, 'Blessed be Thou and blessed be the name of the Lord for ever and ever'", ch. xxxix. 12 f. Cf. *ib.* ch. ix. 1 and lxxi and 2 *En*. xviii. 9 ("the Grigori are standing in four orders, when singing [the Praise of the Holy One] with one voice"). Cf. *Zohar*, iii. 50 a: "four משריין". (*Vide* Introduction, section 17 A.)

(4) Some of them utter the "*Holy*" etc. some of them run as messengers etc. Cf. note above on vs. 1. Thousand thousands ministered unto him etc. Dan. vii. 10. This verse seems to have been used as an *epitome* of mystical *gnoseis*: it was the starting-point for the computation of the number of the angels, was used as support for the conception of the *Nehar di-Nur*, the fiery river(s), the ministration of the *Qēdushsha* by hosts of angels, the Celestial *Beth Din*, the Judgement and the Book(s) of judgement.

Some say the '*Holy*', some the '*Blessed*', i.e. the *Qēdushsha*, consisting of the Thrice Holy and the response '*Blessed*', of which latter there are at least two forms within the present book: (1) '*Blessed be the glory of H' from His place* (ch. i. 13), and (2) '*Blessed be the name of His glorious kingdom for ever and ever*' (ch. xxxix. 2). The *Qēdushsha* responsorium, as performed by the angels, is attested in 1 *En*. xxxix. 12 f., referred to above note on vs. 3. (Notice the form of the '*Blessed*' there.)

(5) when the time draws nigh for the recital of the Holy...there goes forth a whirlwind. The moment before the *Qēdushsha* was one of commotion and shudder through all the heavens, of a 'momentous' significance. Cf. chh. xviii. 7, xix. 6, xxxviii. 1.

(6) thousand thousands of them are changed into sparks...flames...males...females...light etc. The angels are thus represented as changeable

winds, thousand thousands into burning fires, thousand thousands into flames, thousand thousands into sparks, thousand thousands into chashmals of light⁴; until they take upon themselves the yoke of the kingdom of heaven, the high and lifted up, of the Creator ⁵of them all⁵ with fear, dread, awe and trembling, with commotion, anguish, terror and trepidation. Then they are changed again into their former shape to have the fear of their King before them alway, as they have set their hearts on saying ⁵the Song⁵ continually, as it is written (Is. vi. 3): "And one cried unto another and said (Holy, Holy, Holy, etc.)".

4-4 *E* corr. (mistaking the abbreviation 'י'דננ'—thousand thousands of them are made into—for: saying Amen) 5-5 ins. with *E*. *A*: lacuna

into various forms from their original state of angels with bodily form. This is stated *Gen. R.* xxi. 13, with reference to Ps. civ. 4: "'(who maketh his angels spirits), his ministers a flaming fire', which changes, for they change, appearing at one time as males, at another as females, now as winds (or, spirits), now as angels". This dictum (attributed to Rab?) is quoted and commented upon by Maimonides in his *More Nēbukim*, vol. 1, ch. xlix. The expression 'are made into males...made into females' is somewhat suspect in its present connection, where the changing of the angels into all sorts of fiery, lifeless substances, is apparently conceived of as a punishment ad premonitum, till they acquiesce in performing their duty, the performance of the *Qēdushsha*.

until they take upon themselves the yoke of the kingdom of heaven, the high and lifted up, of the Creator. By the recitation of the *Qēdushsha*, the angels take upon themselves the yoke of heaven. In the *Qēdushsha* they recognize the Holy One, blessed be He, as the king of the heavens—cf. the response in the *Qēdushsha* of the *Liturgy*: "H' shall reign for ever etc." Ps. cxlvi. 10. So the Israelites every day, when they recite the 'Shema' take upon themselves the yoke of the kingdom of heaven, *M. Ber.* ii. 2, and when praying in general, *TB. Ber.* 10 b. The *Qēdushsha* is in itself the religious duty of the song-uttering angels. In the performance of the *Qēdushsha* they put themselves as a harmonious unity in the heavenly kingdom, hence they are changed again into their former shape, described in vs. 2 as individual, manifested angelic beings, in which existence they remain only as long as they continue in the performance of the duty that is their only *raison d'être*. Cf. chh. xl. 3, xlvii. 1 f.

On the meaning of the expression 'take upon oneself the yoke of the kingdom of heaven' see article "Kingdom of heaven" in *JE* and Abelson, *Jewish Mysticism*, p. 84.

CHAPTER XXXVI

*The angels bathe in the fiery river
before reciting the 'Song'*

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) At the time when the ministering angels desire to say (the) Song, (then) *Nehar di-Nur* (the fiery stream) ¹ rises with many "thousand thousands and myriads of myriads" (of angels) of power and strength of fire¹ and it runs and passes under the Throne of Glory, between the camps² of the ministering angels and the troops of *'Araboth*.

(2) And all the ministering angels first go down into *Nehar di-Nur*, and they dip themselves in the fire³ and dip their tongue and their mouth seven times; and after that they go up and put on the garment of *'Machage Samal'* and cover themselves with cloaks of *chashmal* and stand in four rows over against the Throne of Glory, in all the heavens.

1-1 in acc. with the reading of *E*. 'bekamma' *A*: 'bamma' 2 so *E*. *A*: 'camp'
3 *E* ins.: 'in Nehar di-Nur'

Ch. xxxvi. The ministering angels, before singing the 'Song', i.e. in this connection presumably the *Qêdushsha*, purify their bodies, in particular their tongue and mouth, in the *Nehar di-Nur*, the fiery river, see note on ch. xxxiii. 5.

(1) *Nehar di-Nur* rises etc. The beginning of the verse is a covert interpretation of Dan. vii. 10. The fiery river is represented as bringing with it the "thousand thousands etc." of Dan. vii. 10, all of which are fire "in strength and might". of power and strength of fire. The present writer is unable to translate this into intelligible English: it means that the fiery substance of the angels is on this occasion intensely radiant and sparkling.

The camps probably stand for the song-uttering angels, the troops for the rest: 'the host without reckoning'. Cf. 1 *En*. xl. 1 and note, ch. xxxv. 1.

(2) the angels... go down into *Nehar di-Nur*. Cf. *May'an Chokma*, BH. i. 58-64: "in the fiery river the ministering angels bathe themselves and are renewed every morning". their tongue... seven times, the special organ for the recital of the Thrice Holy needs special purification. Cf. the passage from *Hilkoth Mal'akim*, quoted above, note on ch. xxxv. 1. *Machage Samal*. No reasonable translation of this term seems possible. See Jellinek, *E*, ad loc. *chashmal*. Derived from Ezek. i. 4. four rows. Cf. ch. xxxv. 3.

CHAPTER XXXVII

The four camps of Shekina and their surroundings

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) In the seven Halls there are standing four chariots of Shekina, and before each one are standing the four camps of Shekina. Between each camp a river of fire is continually flowing.

(2) Between each river there are bright clouds [surrounding them], and between each cloud there are put up pillars of brimstone. Between one pillar and another there are standing flaming wheels, surrounding them. And between one wheel and another there are flames of fire ¹round about¹. Between one flame and another there are treasuries of lightnings; behind the treasuries of lightnings are the wings of ²the stormwind². ³Behind the wings of the storm-wind are³ the chambers of the tempest; ⁴behind the chambers of the tempest there are⁴ winds, voices, thunders, sparks ⁵[upon] sparks and earthquakes [upon] earthquakes⁵.

1-1 E: 'riding' 2-2, 3-3 E om. 4-4 E om. 5-5 E: 'and behind the sparks there are earthquakes'

Ch. xxxvii. This chapter belongs to the same category as ch. xxxiv. Cf. notes, *ib*. The reason why it was placed in its present context is probably the mention in vs. 1 of 'the four camps of Shekina' since the 'camps' are understood of the song-uttering angels.

(1) seven Halls, in 'Araboth, the highest of the heavens. Cf. note on ch. xviii. 3. The camps are conceived of as filling all the Halls, radiating from the centre of the Throne of Glory. The chariots of Shekina are here four, corresponding to the four *Chayyoth* of the Divine Chariot, an amplification of the One Chariot similar to that of the fiery river into four or seven. four camps of Shekina. See note on chh. xviii. 4, xxxv. 3. E misreads 'seven', probably by false analogy to the seven Halls.

(2) The text has probably suffered a confusion. Instead of 'between...and' read throughout 'behind' as in the latter part of the verse and as in the parallels of *Midrash Kōnēn* and *Seder Rabba di Bereshith Rabba* referred to note on ch. xxxiv, Introduction. The reading 'between...and' was presumably caused by the use of this expression with reference to the rivers as flowing between the camps of ministering angels. Cf. how in ch. xxxiii it is said about the fiery rivers: "each river turns round in a bow in...'*Araboth Raqia*'". The original intent of the chapter was to picture the concentric circles of flames, treasuries of lightnings, chambers of the tempest etc. surrounding the Throne of Glory and the camps. The confusion is, even after the suggested emendation, too great as to allow any clear reconstruction of the intended picture.

CHAPTER XXXVIII

The fear that befalls all the heavens at the sound of the 'Holy,' esp. the heavenly bodies. These appeased by the Prince of the World

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) At the time, when the ministering angels utter (the Thrice) *Holy*, then all the pillars of the heavens and their sockets do tremble, and ¹the gates of the Halls of '*Araboth Raqia'*'¹ are shaken and the foundations of *Shechaqim* and the Universe (*Tebel*) are moved, and the orders² of *Ma'on* and the chambers³ of *Makon* quiver, and all the orders⁴ of *Raqia'* and the constellations and the planets are dismayed, and the globes of the sun and the moon haste away and flee out of their courses⁵ and run ⁶ 12,000 parasangs and seek to throw themselves down from heaven, (2) by reason of the roaring voice of their chant, and the noise of their praise and the sparks and lightnings that go forth from their faces; as it is written (Ps. lxxvii. 18): "The voice of thy thunder was in the heaven (the lightnings lightened the world, the earth trembled and shook)".

1-1 E: 'the gates of the Halls and 'Araboth Raqia'' 2 E: 'chambers' 3 E: 'Halls' 4 E: 'secrets' 5 so E. A corr. 6 E ins.: 'back(ward)'

Ch. xxxviii. The importance of the Celestial *Qēdushsha* is illustrated by a description of the commotion that seizes the whole Universe at the time appointed for its recital by the ministering angels.

(1) all the pillars of the heavens... tremble etc. This description is supplemented by the description of the fear of all the angelic hosts and different classes of angels at the time of the 'Song' in ch. xix. 6. A parallel in similar terms as those of the present verse and of ch. xix. 6 and of the same import is found in *Ma'yan Chokma*, BH. i. 59 seqq.: "all the heavenly hosts shake and tremble, and the Holy *Chayyoth* are struck dumb, the Holy *Seraphim* roar like lions... the *Galgallim* of the Throne... are moved, the thresholds of brilliancy quake and all the heavens are seized with terror". A similar expression in *Assumption of Moses*, x. 5: "and the circuit of the stars shall be disordered". Of the various heavens are here named: '*Araboth*', the 7th, *Shechaqim*, the 3rd, *Ma'on*, *Makon*, *Raqia'*, the 5th, 6th, 2nd resp. foundations of *Shechaqim* and... (*Tebel*), may be a hint of the connection of each of the seven earths with the corresponding heaven (elaborated in *Midrash Kōnēn* and often repeated in cosmological *Qabbala*), only that usually *Shechaqim* is represented as connected with the earth called '*Arqa*', whereas the earth called *Tebel* is combined with the *Raqia'*-heaven.

the orders of *Raqia'* and the constellations and planets... and... the sun and the moon. The heavenly bodies are situated in the *Raqia'*, the second heaven (cf. *Chag.* 12 b).

(3) Until the prince of the world calls them, saying: "Be ye quiet in your place! Fear not because of the ministering angels who sing the Song before the Holy One, blessed be He". As it is written (Job xxxviii. 7): "When the morning stars sang together and all the children of heaven shouted for joy".

CHAPTER XXXIX

The explicit names fly off from the Throne and all the various angelic hosts prostrate themselves before it at the time of the Qēdushsha

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) When the ministering angels utter the "*Holy*" then all the explicit names that are graven with a flaming style on the Throne of

(3) until the Prince of the World calls them. The Prince of the World is here the ruler or prince of the heavenly bodies, the constellations, planets, sun and moon. Ch. xxx. 2, he is the leader of the 72 princes of kingdoms and pleads the cause of the world (i.e. all the inhabitants of the world) before the Most High when seated on the judgement-throne. These two functions, leader of the planets-constellations and of the princes of kingdoms are naturally combined, when, according to the development of the conception of the princes of kingdoms, they are represented as the rulers of the planets and constellations (so even in this book, ch. xvii. 8, in its present redaction).

The Prince of the World has been identified with Metatron by one party of cabbalistic traditionists. Within the present book functions are attributed to Metatron that are essential to the Prince of the World. Metatron is indicated as the ruler over the princes of kingdoms, chh. x. 3, xlviii c 9 *et al.*, and he has authority over the planets (and constellations) acc. to ch. xlvi. 2, and over the princes of kingdoms and the rulers of the world, ch. xiv. 1, 3.

The Prince of the World was present at the Creation and in the days of Creation he uttered the words of Ps. civ. 31 ("The glory of the Lord shall endure for ever: the Lord shall rejoice in his works"). *TB. Chullin*, 60 a, hence to him refers the passage, Ps. xxxvii. 25, "I have been young and now am old": *TB. Yebam*. 13 a. Cf. further, note on ch. iii. 2.

Ch. xxxix. This chapter continues the picture of the preceding chapter (the commotion of all the heavens with the inclusion of the constellations and the planets at the sound of the Thrice Holy): the Explicit Names on the very Throne of Glory and the highest classes of angels are all moved into expressions of glorification of the Most High at the time of the *Qēdushsha*.

(1) all the explicit names that are graven with a flaming style on the Throne of Glory. The explicit names are represented as a plurality; hence we are here on the ground of mystical speculations concerning the different Divine Names consisting of various permutations of the *Tetragrammaton* and of the other names of God and expressions representing the Godhead occurring in the O.T. For the various meanings attached to the term '*Shem Mēphorash*' see *J'E* (e.g. vol. i. 622); Gaster, *The Sword of Moses*, intr.; Bousset, *R'y*. pp. 344 *et al.* The

Glory fly off like eagles, with sixteen wings. And they surround and compass the Holy One, blessed be He, on the four sides of the place of His Shekina¹.

(2) And the angels of the host, and the flaming Servants, and the mighty 'Ophannim, and the *Kerubim* of the Shekina, and the Holy *Chayyoth*, and the *Seraphim*, and the 'Er'ellim, and the *Taphsarim* ²

1 so E. A: '(the place of the) Glory of His Shekina' 2 A ins.: 'the troops of flame'

meaning that suggests itself in the present connection is that of "names that are explicit, have an individual, fixed form or appearance". Cf. ch. xlviii B 1, acc. to the reading of FGH: "The Holy One, blessed be He, has 70 names that are explicit, the rest that are not explicit are innumerable and unsearchable". The Explicit Names are here distinguished as being graven on the Throne of Glory (with a flaming style; cf. chh. xiii. 1, xxix. 1, xli. 4). Cf. the enumeration of the different categories of Names in *Alph. R.* 'Aqiba, BH. iii. 26. The Explicit Names are there in a separate class from those on the Throne, if the reading is correct: "The Holy One, blessed be He, revealed to Moses all the Names: both the Explicit Names, the Names that are graven on the royal crown on his head, the names that are graven on the Throne of Glory, the names that are graven on the ring of his hand, the names that are standing as pillars of fire round his chariots, the names that surround the Shekina like eagles of the Merkaba, and the names by which heaven and earth are sealed...". The intent of the passage is probably to denote all these names as Explicit Names.

fly off like eagles. Cf. above, 'the names that surround the Shekina like eagles'. For the names flying off, cf. TB. 'Ab. Zar. 18 a (the letters fly off from a scroll of the Tora, when burning), Pesachim, 87 b (when the tables of the testimony were broken by Moses, acc. to Ex. xxxii. 19, the letters graven on them, flew off). *Alph. R.* 'Aqiba, BH. iii. 53: "The letter Kaph went down from its place on the Fearful Crown and stood before the Throne of Glory". Similarly, ch. xlviii B 1, the Names of the Holy One are represented as going forth 'from before the Throne of Glory'. The names are thus represented as self-existent and capable of taking on the form of living beings. The object of the names flying off as eagles (angels of the form of eagles) is their participation in the responses of the Qēdushsha. This is explicitly stated with regard to the letters (the letters and the Names being vastly interchangeable terms) in the quotation from "the book of Enoch" in *Mishkan ha-'Edut* by Moses de Leon (BH. ii. p. xxxi): "the letters in the four different quarters round the Throne (cf. here: on the four sides of the place of His Shekina (fly off... and when flying off say: 'Blessed be the name of His glorious kingdom for ever and ever'".

(2) And the angels of the host, and the flaming Servants etc. The Explicit Names surrounding the Holy One are accompanied by great armies of princes of fire and mighty regiments of troops (*gēdudim*) of fire, says *Alph. R.* 'Aqiba, BH. iii. 25. For the present enumeration of various angelic classes cf. chh. vi. 2, vii, xiv. 1. xix. 6. No doubt the present verse is to be regarded as presenting a tradition of the orders of the highest angel-classes. This is indicated by the mention of the four classes of 'Merkaba-angels' ('*Ophannim*, *Kerubim*, *Chayyoth* and *Seraphim*).

angels of the host. Cf. the expression 'prince of the host' applied to the princes of the seven heavens, ch. xvii. 2 f. In each heaven there is one 'host'. The term 'host' need not necessarily refer to the whole multitude of angels, it might also mean one special class of angels. 'The angels of the host' would then, here, mean. 'the angels of the host of the highest of the heavens'. Cf. ch. xiv. 1.

the flaming Servants. This expression occurs also ch. vii. Cf. note, ib.

the mighty 'Ophannim and the Kerubim of the Shekina, the holy Chayyoth and the Seraphim. The mighty 'Ophannim or 'the 'Ophannim of Gebura': *Gebura*

and the troops ³of consuming fire³, and the fiery armies, and the flaming hosts, and the holy princes, adorned with crowns, clad in kingly majesty, wrapped in glory, girt with loftiness, ⁴fall upon their faces three times⁴, saying: "Blessed be the name of His glorious kingdom for ever and ever".

CHAPTER XL

The ministering angels rewarded with crowns, when uttering the "Holy" in its right order, and punished by consuming fire if not. New ones created in the stead of the consumed angels

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) When the ministering angels say "Holy" before the Holy One,

3-3 emendated. *AE* both omit 'fire'
times' *E*: 'fall upon their faces'

4-4 emendated. *A*: 'fall upon three

also means the Divine Majesty. The 'Ophannim, Kerubim, Chayyoth and Seraphim are the four classes of Merkaba-angels, described in the angelological section, chh. xx-xxii, xxv, xxvi. Cf. also ch. vi. 2. The 'Galgallim' or 'Wheels of the Merkaba' are missing here.

'Er'ellim and Taphsarim occur also ch. xiv. 1; cf. note, *ib*.

the troops of consuming fire. The term used is '('Esh) 'Okela', used ch. xlii. 3 as a Divine Name. the fiery armies and the flaming hosts. The attributes probably only convey the fiery substance of the angels. Cf. *Alph. R.* 'Aqiba, BH. iii. 25.

the holy princes. This might refer to the 'princes of Kingdoms', ch. xiv. 2 (mentioned after the 'Er'ellim and Taphsarim), ch. xvii. 8 ('crowned with royal crowns, clad in royal garments etc.', cf. here: 'adorned with crowns, clad in kingly majesty', in the present connection of course referring to all the enumerated angels and princes), chh. xxix and xxx (identical with the Watchers and Holy Ones, cf. note on ch. xxix, intr.).

Blessed be the name of His glorious kingdom for ever and ever. This is then the form of the response to the 'Holy, Holy, Holy...' according to the present chapter. Ch. i. 13 has the regular response: 'Blessed be the glory of H' from His place'. The present response is a glorification of God as King, of the Kingdom of Heaven, a form implied by ch. xxxv. 6.

Ch. xl. The ministering angels receive crowns as reward when uttering the 'Thrice Holy' in the proper manner. Hereby the performance of the *Qēdushsha* is indicated as a meritorious act, an observance of a religious duty. As such it is already characterized, ch. xxxv. 6 (the angels when singing the 'Holy' take upon themselves the yoke of the Kingdom of heaven). It signifies the sustainment of the whole order of the heavens by the recognition of God's sovereignty (the whole earth is sustained by the *Qēdushsha*, *TB. Soṭa*, 49 a). The reward of the ministering angels performing the *Qēdushsha* is hence exactly paralleled by the rewarding of the Israelites with crowns at the time when they said, "We will do and hear (Ex. xxiv. 7)", related in *TB. Shabb.* 88 a ("60 myriads of ministering angels put crowns on every single one of the Israelites etc.")—but for the acceptance of the

blessed be He, in the proper way, then the servants of His Throne, ¹the attendants of His Glory,¹ go forth with great mirth from under the Throne of Glory. (2) And ²they all carry in their hands, each one of them² thousand thousand and ten thousand times ten thousand crowns of stars, similar in appearance to the planet Venus, and put them on the ministering angels and the great princes who utter the "Holy". Three crowns they put on each one of them: one crown because they say "Holy", another crown, because they say "Holy, Holy", and a third crown because they say "Holy, Holy, Holy, is the Lord of Hosts".

(3) And in the moment that they do not utter the "Holy" in the right order, a consuming fire goes forth from the little finger of the Holy One, blessed be He, and falls down in the midst of their ranks

1-1 E om.

2-2 so E. A: 'every two of them carry between them'

Tora implied in those words the whole world could not have subsisted. The importance of the *Qēdushsha* in the present section always refers to the Celestial *Qēdushsha*, at any rate in the first place. The importance of the earthly *Qēdushsha* is the subject of *Sota*, 49 a, and *Hek. R.* ix *et al.*; to the latter at times the greater importance is assigned (the angels must be silent while the Israelites say the 'Holy' on earth).

(1) the servants of His Throne... go forth... from under the Throne. The servants of His Throne are the angels entrusted with the care of the treasures of the crowns which are under the Throne of Glory and hence also over the other treasures that are conceived of as having their place under the Throne. From under the Throne was brought forth the fire of deafness for the *Chayyoth* acc. to ch. xv B, and go forth the 'horns' acc. to *Hek. R.* xii. In the secret chamber under the Throne God hid Moses away from the fury of the ministering angels acc. to *Ex. R.* xxiii.

(2) they all carry in their hands... crowns... and put them on the ministering angels. The crowns are made of stars, in appearance like unto the splendour of the planet Venus. The 'planet Venus', 'the shining star', is a frequent term of comparison, cf. ch. xxvi. 6 *et al.* one crown, because they say 'Holy' etc. One would have expected 'one crown for each "Holy"' or similar. The same division of the Thrice Holy is found in the *Siddur of R. 'Amram Ga'on, Morning Prayer*, p. 4 (ed. Warsch), closely connected with the present chapter by reason of its being attributed to R. Ishmael: "*R. Ishmael said*: There are three companies of ministering angels who say the 'Holy' every day. One company says 'Holy', the other says 'Holy, Holy', and the third company says 'Holy, Holy, Holy, is the Lord of Hosts. The whole earth is full of His glory'". The same is repeated in a different version, *ib.*, *Evening Prayer*, fol. 18, and also, with slightly corrupt readings, in *Seder Rabba di Bereshith Rabba* (ed. Werthheimer, *Batte Midrashot*). *Vide* Introduction, section 17 D.

(2) And in the moment that they do not utter the Holy in the right order or in the right time a consuming fire... consumes them in one moment. The same punishment of the ministering angels that utter the song out of order is set forth in ch. xlvii. 2. The fire is here not the fiery river, the regular means of punishment, but a fire sent out for the purpose from the little finger of the Holy One. In ch. xlvii. 2 the two ideas of the fire from the Most High and the fiery river are combined: the immediate extinction of the angels is effected by the fire 'from their Creator', but their continued punishment takes place in the fiery river.

and is divided into 496³ thousand parts corresponding to the four camps of the ministering angels, and consumes them in one moment, as it is written (Ps. xcvi. 3): "A fire goeth before him and burneth up his adversaries round about".

(4) After that the Holy One, blessed be He, opens His mouth and speaks one word and creates others in their stead, new ones like them. And each one stands before His Throne of Glory, uttering the "Holy", as it is written (Lam. iii. 23): "They are new every morning; great is thy faithfulness".

3 E: '796'

The idea of the punishment by extinction in fire of the angels who utter the 'Holy' in the wrong way is echoed in *Hilkoth Mal'akim*, Add. 27199, fol. 123 a: "Every angel who begins earlier or later than his fellow-angels when singing the Song, is immediately burnt by *lashes of fire* through CHAYYIEL, the Prince who attends the *Chayyoth*" (cf. ch. xx. 2).

Rekanati quotes from *Sepher Hekaloth* (one of the names of the present book), cited BH. ii. p. xvii: "All the ministering angels... who are standing before Him... none of them begins (the Song) too early or too late: anyone who tarries with his voice after his neighbour as much as a hair's breadth is instantly pushed into fire and flames". The singing the 'Song' in the wrong order is acc. to both these passages understood of the time. Cf. ch. xlvii. 2.

is divided into 496 thousand parts corresponding to the four camps of the ministering angels etc. This is apparently a confusion of the two conceptions of the four camps of Shekina (consisting of song-uttering angels) and the 496 (or 506) thousand myriads of camps each composed of 496 thousand angels. It seems to imply that the whole multitude of camps of song-uttering angels are destroyed. They are treated as a whole, a unity. (Contrast the quoted passages, *Hilkoth Mal'akim* and Recanati.)

a fire goeth before Him and burneth up his adversaries. The angels who do not utter the Song in the right way are identified with the 'adversaries of God' of Ps. xcvi. 3; this is altogether in accordance with the view of the performance of the *Qēdushsha* as an all-important religious duty attested in the present chapter. The neglect of or unwillingness to perform the *Qēdushsha* is an act of enmity against the Kingdom of the Most High. The punishment in fire here should be compared with the changing of the angels into all kinds of lifeless fiery substances until their acquiescence in the performance of their duty, depicted ch. xxxv. 5, 6.

(4) After that the Holy One, blessed be He, opens His mouth and speaks one word and creates... new ones. Hence, according to the view of the present chapter (and section) the angels who continue their existence as individual, corporeal beings as long as they rightly perform their duty: the uttering of the *Trisagion*, are consumed by fire only as punishment for their non-observance of this duty after which new ones are created by a word of God. This view is a harmonization of the different views concerning the origin and fate of the song-uttering angels recorded TB. Chag. 14 a, Gen. R. lxxviii, Lam. R. iii. 21: (1) the angels are created out of the fiery river and thither they are sent back again after they have uttered a Song; (2) the angels are created from the 'dibbur (word)' of God.

Cf. ch. xxvii. 3 and note on ch. xlvii. 2 (the angels after being consumed in the fire, viz. as corporeal beings, subsist in soul and spirit).

They are new every morning; great is thy faithfulness: Lam. iii. 23. This was the fundamental starting point and basis of the speculations on the creation and duration of the angels. It is used, TB. Chag. 14 a, as support of view (1) above, and the review of the various traditions in Lam. R., *ib.*, is attached to this passage.

CHAPTER XLI

Metatron shows R. Ishmael the letters engraved on the Throne of Glory by which letters everything in heaven and earth has been created

R. Ishmael said: Metatron, the Angel, the Prince of the Presence, said to me:

(1) Come and behold¹ the letters by which the heaven and the earth were created,

²the letters by which were created the mountains and hills,

the letters by which were created the seas and rivers,

the letters by which were created the trees and herbs²,

the letters by which were created the planets and the constellations,

²the letters by which were created² the globe of the moon and the globe of the sun, Orion, the Pleiades and all the different luminaries of *Ragid'*.

(2) ³ the letters by which were created the Throne of Glory and the Wheels of the *Merkaba*,

1 E: 'I will show thee' Cf. the opening words of the following chapters. 2-2 E om. 3 E ins.: 'the letters by which were created the ministering angels; the letters by which were created the *Seraphim* and the *Chayyoth*'

In ch. xlv. 4 this passage is used with reference to the renewal of the planets (stars) in the time to come.

Ch. xli. This chapter marks the beginning of a new section distinguished from the rest of the book by the setting in which the revelations of the heavenly mysteries are here framed. Whereas according to the preceding chapters the various celestial facts are represented as orally transmitted to R. Ishmael by Metatron, the various wonders of heaven are acc. to this section actually shown to R. Ishmael.

The contents of the revelations thus presented in this section are greatly varied and can scarcely be comprised under one heading. Three main themes are, however, discernible. One is the physical-cosmological aspect of the heavenly mysteries; to this may be reckoned the letters engraved on the Throne of Glory (in the present chapter), the various polar opposites (ch. xlii)—in which the cosmological interest is apparent—the Curtain spread before the Holy One (ch. xlv), and the stars and planets (ch. xlv).

The second theme is that of the conditions of the souls and spirits, comprising not only the spirits and souls of the departed (righteous, wicked and intermediate chh. xliii, xlv), but also those of the unborn, and, even more, those of the punished angels (chh. xliii, xlvii).

The third theme, connected with and partly interwoven in the others is of eschatological character: chh. xlv. 7-10, xlv. 5, xlviii A. Ch. xlviii A forms the conclusion of the section.

(1) This verse is an almost literal copy of ch. xlii. 1, on which see note, *ib*.

(2) by which were created the Throne of Glory and the Wheels of the *Merkaba*. The letters are thus prior even to the Throne of Glory, the vehicle of

the letters by which were created the necessities of the worlds⁴,

(3) the letters by which were created wisdom, understanding, knowledge, prudence, meekness and righteousness by which the whole world is sustained.

(4) And I walked by his side and he took me by his hand and raised me upon his wings and showed me ⁵those letters, all of them⁵, that are graven with a flaming style on the Throne of Glory: and sparks go forth from them and cover all the chambers of 'Arabôth.

CHAPTER XLII

Instances of polar opposites kept in balance by several Divine Names and other similar wonders

R. Ishmael said: Metatron, ¹the Angel, the Prince of the Presence,¹ said to me:

(1) Come and I will show thee, where the waters are suspended in the highest, where fire is burning in the midst of hail, ²where lightnings lighten out of the midst of snowy mountains,² where thunders are roaring in the celestial heights, where a flame is burning

⁴ E: 'World' 5-5 so E. A corr. 'the 'Ophan of the letters, all of them'

Ch. xlii. 1-1 so E. A om. 2-2 E om.

God's manifestation in the heavens. The Throne of Glory (pre-existent before the creation of the world) created, cf. *Gen. R.* i. 5.

(3) the letters by which were created wisdom etc.—by which the whole world is sustained. By ten things the world was created (wisdom, knowledge, etc.), *TB. Chag.* 12 a, 'Aboth R. Natan, xxvii; upon three things the world is based, *Pirke Ab.* i; by "knowledge, wisdom, understanding and faculty of speech the whole world is sustained", *Alph. R.* 'Aqiba, BH. iii. 43. The conceptions of creative agencies and of sustaining ideal forces are here recognizable together with an initial tendency towards the speculations emerging in the ideas of the *Sephiroth*.

(4) graven with a flaming style etc. Said of the Divine Names, ch. xxxix. 1. The mystical letters are the constituents of the Divine Names. A reads: "showed me the *Ophan* (i.e. circle, circuit) of the letters". The expression "*Ophan* of the letters" occurs in *Berith Menucha*, 3 b (ed. Amsterdam, 1648).

Ch. xlii. (For this chapter cf. notes on ch. xlii and 1 *En.* lxix. 14-25.)

The central idea of the present chapter is the COUNTERBALANCE OF POLAR OPPOSITES, effected by one of the Divine Names in each case. The instances refer to the physical aspect of the highest of the heavens, where R. Ishmael is represented as shown the various wonders by Metatron. They are, however, certainly of cosmological significance, since the heavens, esp. the 'Araboth, are the realm of causes and the correspondence between the 'upper world' and the 'lower world' is a fundamental presumption of the present book in general. Hence what R. Ishmael beholds in the 'Araboth is the fountain of cosmical realities, which although they are the basis of the terrestrial world, are hidden from the eyes of man on earth.

in the midst of the burning fire and where ³voices make themselves heard³ in the midst of thunder and earthquake.

(2) Then I went ⁴by his side⁴ and he took me by his hand and lifted me up on his wings and showed me all those things. I beheld the waters suspended on high in 'Araboth Raqia' by (force of) the name YAH 'EHYE 'ASHER 'EHYE (Jah, I am that I am), ⁵and their fruits going down from heaven and⁵ watering the face of the world, as it is written (Ps. civ. 13): "(He watereth the mountains from his chambers:) the earth is satisfied with the fruit of thy work".

(3) And I saw fire and snow and hailstone that were mingled together within each other and yet were undamaged, by (force of) the name 'ESH 'OKELA (consuming fire), as it is written (Deut. iv. 24): "For the Lord, thy God, is a consuming fire".

3-3 E: '(the) voice makes itself heard'

4-4 E om.

5-5 E om.

(2) I beheld the waters suspended on high in 'Araboth Raqia'. The waters suspended on high are in all probability the 'Upper Waters', divided from the 'Lower Waters' by the Divine command, Gen. i. 6, 7. The cosmological speculations concerning these form a prominent part of *Midrash Kōnēn* and the tractate called *Ma'asē Bereshith* (e.g. in *S. Raziēl* and *Seder Rabba di Bereshith*, 9 a). The polar opposition is here not apparent, but is implied in the relation of the 'suspended waters' to the lower waters. The upper waters are referred to in a similar form in *Test. Levi*, ii. (6), 7: "I saw there (in the first heaven) a great sea hanging".

The upper waters are also conceived of as *male*, the lower as *female* (an ancient idea of cosmology), a clear polar opposition. This is attested in 1 *En.* liv. 8: "(And all the waters shall be joined with the waters): that which is above the heavens is the *masculine*, and the water which is beneath the earth is the *feminine*"; and in *Gen. R.* xiii. 14, where the fructifying, engendering function of the upper waters is connected with their nature of '*zēkārīm*, males' (with reference to Isa. xlv. 8). Of this idea the expression in the present verse, 'their fruits going down from heaven', is a trace.

by the name YAH 'EHYE 'ASHER 'EHYE. The expression '*bēshēm*, in the name...' is in this chapter to be understood literally, as referring to a Divine Name. The names are here all such as are derived from the O.T. YAH: Ex. xv. 2, xvii. 16, Isa. xxvi. 4, Ps. lxxviii. 5. 'EHYE 'ASHER 'EHYE: Ex. iii. 14. The names here in general represent the mediating, sustaining force, and this is probably conceived of as depending upon their character as expressing the creative and ever-sustaining activity of the Most High himself. Their function is hence to be understood in a similar way as that conveyed by the frequent expression "the Holy One created... and sealed with the Name...".

What significance is to be assigned to the YAH 'EHYE 'ASHER 'EHYE here is not evident. Perhaps simply the permanence, inalterability of the suspension of the waters. The important rôle played by the name 'EHYE '*asher* 'EHYE in cabbalistic speculations is well known. It is invariably repeated in the different enumerations of the Divine Names set forth in *Shi'ur Qoma* and *Hek. Zot.* *Seder R. di-Bereshith* speaks of 'טבעת איהיה אשר איהיה'. In *Zohar* this name ('EHYE '*asher* 'EHYE as distinguished from the 'EHYE alone) represents the Godhead as containing and contained in the first pair of *Sephiroth*, the Wisdom and Intelligence, which are of course polar opposites, distinguished as masculine and feminine respectively (*Zohar*, iii. 65 b).

(3) Fire and snow and hailstone... mingled together... by (force of) the name

(4) And I saw lightnings that were lightening out of ⁶mountains of snow⁶ and yet were not damaged (quenched), by (force of) the name *YAH* ⁷*ŠUR* *‘OLAMIM* (Jah, the everlasting rock), as it is written (Is. xxvi. 4): "For in Jah, *YHWH*, the everlasting rock".

(5) And I saw thunders and voices that were roaring in the midst of fiery flames and were not damaged (silenced), by (force of) the name ⁸*‘EL-SHADDAI RABBA* (the Great God Almighty) as it is written (Gen. xvii. 1): "I am God Almighty".

(6) And I beheld a flame (and) a glow (glowing flames) that were flaming and glowing in the midst of burning fire, and yet were not damaged (devoured), by (force of) the name⁸ *YAD* *‘AL KES YAH* (the hand upon the Throne of the Lord) as it is written (Ex. xvii. 16): "⁹And he said⁹: for the hand is upon the Throne of the Lord".

(7) And I beheld rivers of fire in the midst of rivers of water ¹⁰and they were not damaged (quenched) by (force of) the name *‘OSE*

6-6 *E*: 'flames of fire' 7 *E* ins.: 'YHWH' 8-8 *E* om. from 'EL-SHADDAI RABBA' vs. 5. to 'YAD 'AL KES YAH' vs. 6. 9-9 *E* om. 10 *E* adds: 'and rivers of water running in the midst of rivers of fire'

‘ESH ‘OKELA (consuming fire). Here the name seems to be chosen simply with regard to the fire, which is represented as unquenched in spite of its surroundings of snow and ice. For the idea of fire and its opposites kept in balance see vs. 7. *‘Esh ‘Okela* as attribute of God, see *Alph. R. ‘Aqiba, BH.* iii. 37. In fact *‘ESH ‘OKELA*, in later *Qabbala*, very often follows immediately on *‘EHYE ‘asher ‘EHYE* in enumerations of the Divine Names, a fact that drew the special attention of Reuchlin who comments upon it in his *De Verbo Mirifico*, chh. xvii, xviii.

(4) lightnings... out of mountains of snow... by (force of) the name *YAH ŠUR* *‘OLAMIM*. This is only another instance of the contraries of fire—ice (snow, water). The connection between instance and name seems to be, that the word *‘ŠUR*: Rock' suggests a relation to the 'mountains (of snow)'. Else this verse, Is. xxvi. 4, is the regular point of support for the statement: God created the worlds by the letters *Yod He* (of *YaH*). In that case the *‘Šur* is interpreted from the root *‘ŠUR*: to form, to create. Cf. note on ch. xiii. 1.

(5) thunders and voices... roaring in the midst of flames of fire... by force of the name *‘EL SHADDAI RABBA*. The voice of God was thought to go forth in the midst of fire. The connection of the Voice with the name *‘EL SHADDAI* is established by Ezek. x. 5: "as the voice of the Almighty God when he speaketh". Cf. 2 *En.* x. 2.

(7) And I beheld rivers of fire in the midst of rivers of water... Cf. 2 *En.* xxix. 2: "And fire is in the water and water in the fire and neither is the one quenched nor the other dried up". The juxtaposition of fire and water is a frequent cosmological simile. *TB. Pes.* 3 a, *Yer. Rosh. ha-shShana*, 58 a, *Cant. R.* to iii. 11: "the sky is made of water, the stars of fire and yet they do not damage each other". *Gen. R.* iv. 9: "The Holy One, blessed be He, took fire and water, mixed them together and out of them the heavens were created". *Gen. R.* x. 3: "The Holy One, blessed be He, took fire and snow, mixed them and so out of them the universe was created". In the last two passages the cosmology is apparent.

Emphasis is laid on the mediating function of the Divine Name, in this verse most significantly *‘OSE SHALOM*, i.e. 'maker of peace'. 'Peace' is the technical term for the mediation, the synthetical agency or Divine activity. Cf. the 'angels

SHALOM (Maker of Peace) ¹¹ ¹²as it is written (Job xxv. 2): "He maketh peace in his high places¹²". For he makes peace between the fire and the water, ¹³between the hail and the fire,¹³ between the wind and the cloud, between the earthquake and the sparks.

CHAPTER XLIII

Metatron shows R. Ishmael the abode of the unborn spirits and of the spirits of the righteous dead

R. Ishmael said: Metatron said to me:

(1) Come and I will show thee¹ where are¹ the spirits of the righteous that have been created and have returned, and the spirits of the righteous that have not yet been created.

11 *E* adds: 'BIMĒRŌMĀW (in his high places)' om.

12-12 *E* om.

13-13 *E*

Ch. xliii. 1-1 *E* om.

of peace', ch. xxxiii. 1. *Midrash 'Aseret Ma'amaroth*, BH. i. 66: "the angels are made of fire and water, and there is peace between; neither does the water extinguish the fire nor the fire lick up the water". As denoting mediation and synthesis the 'OSE SHALOM, 'maker of peace', was understood and used in *Qabbala*. Cf. e.g. the quotation from the 'Pel'ā', YR. i. 7 b: "Why is it called heaven (*Shamayim*)? Because water (*shemmayim*) is to the right and fire to the left and it is in the middle and receives from both, and to this is to be referred the 'OSE SHALOM and the (saying) 'he mixed fire and water and made out of them the heavens', and it is called 'truth' (the mediating agency, ch. xxxi. 1) and 'mercy' and receives from (i.e. stands in the middle between) the Mercy and the Fear (= the second pair of opposites in the *Sephiroic* system, also called 'Mercy and Justice', cf. ch. xxxi. 1)".

for he makes peace between the fire and the water, between the ice and the fire, between the wind and the cloud. This, referring to God, denotes that the names set forth in the present chapter represent God himself in his different aspects as sustainer and mediator between the dual forces, the *syzygies*. The Names are part of God's being and essence.

Ch. xliii. This chapter enters upon the subject of the condition of the 'spirits', one of the traditional subjects of mystical literature in general and of the Enoch-literature in particular acc. to 2 *En.* xxiii: among the secret instructions given to Enoch were those of "the souls of men, those of them which are not yet born and the places prepared for them for ever", further represented in Apocalyptic (*Ap. Bar.*, 1 *En.*).

(1) Come and I will show thee the spirits of the righteous that have been created... the spirits of the righteous that have not yet been created...

(2) lifted me near by the Throne... revealed the Throne of Glory... showed me the spirits that have been created and had returned. The spirits of the righteous dead are here represented as having their abode by the Throne of Glory. Cf. *TB. Chag.* 12 a: "the 'Arabothe Raquia', the highest of the heavens, contains the Throne of Glory and the spirits and souls of the righteous"; *ib.* 12 b: "the spirits of the righteous dead under the Throne of Glory"; *TB. Shab.* 152 b: "the spirits of the righteous are hidden under the Throne of Glory"; contrast here 'flying above'

(2) And he lifted me up to his side, took me by his hand and lifted² me up near the Throne of Glory³ by the place of the *Shekina*; and he revealed the Throne of Glory to me³, and he showed me the spirits

2 E: 'conducted'

3-3 E om.

the Throne. The idea of the spirits of the righteous dead being hidden or stored (*gēnūzoth*) under the Throne is clearly connected with the conception of "the chambers of the righteous", 4 Ezra iv. 35, 41, vii. 32, 80, 95 etc., 2 Bar. xxi. 23. xxx. 2, 1 En. xxii. 3 ff. On this conception see BOX, *Ezra-Apocalypse*, pp. 33, 34 (note on ch. iv. 35), 37 (note on ch. iv. 41), 119-21 (note on ch. vii. 32). Cf. also CHARLES, *Comm. Revel.* note on Rev. xx. 13. Vs. 1 here refers to the spirits of those not yet born as well as to those of the righteous dead. Besides, the expression 'that have returned' of the righteous dead presupposes the pre-existence of the spirits. Acc. to vs. 2, however, R. Ishmael is only shown the spirits of the righteous dead that have returned and have their place by or above the Throne of Glory, but to the unborn spirits there is no reference. There is thus no explicit statement as to the place of the pre-existent souls. As the intent of vs. 1 is to reveal the abode of both the 'returned' and the 'unborn' spirits and acc. to vs. 2 R. Ishmael for that purpose is taken to the Throne of Glory, it is possible that the unborn souls were conceived of as having their place by the Throne in common with those of the righteous dead. How far one can press the expression 'have returned' (whether as referring to a fixed place in heaven—in such a case the Throne—or to the heavens in general) is uncertain. The other possibility is that the unborn spirits are conceived of as having a different abode from that of the righteous dead, e.g. in special chambers under the Throne of Glory. On this assumption it would be necessary to conclude that a piece describing the place of the 'spirits of the righteous that have not yet been created' has fallen out. For the possibility of this place having been the traditional '*GUPH*' see below, note on vs. 3.

The place of the spirits yet unborn is acc. to 2 Bar. xxiii. 5 *et al.* 'the chambers' referred to above (which acc. to 4 Ez. iv. 35, are the abode of the righteous dead). Acc. to *TB. Chag.* 12 b, "the souls and spirits that are to be created together with the spirits of the righteous (*scil.* dead) are in '*Araboth*, the highest of the heavens". Acc. to *Ber. R.* viii. 6, the souls of the righteous "dwell with their King (in accordance with 1 Chron. iv. 23)" already before the Creation of the world: with them God took counsel before creating man. Acc. to a dictum of R. Assi (repeated *TB. Nidda*, 13 a, '*Aboda Zara*, 5 a, '*Yebamoth*, 62 a) the unborn spirits await creation in the *GUPH*, the storehouse of souls. *Alph. R.* '*Aqiba*, *BH.* iii. 26 (apparently dependent upon the same tradition as that of *Chag.*, 12 b) mentions in the '*Araboth*: "the Throne of Glory, the stores of life, the treasures of blessings, of dew... and the *treasuries* (contrast *Chag.*, *ib.*) of the spirits of the living and of the dead", the "treasuries of the spirits of the living" being a rather singular expression, probably meaning the treasures of the unborn spirits (cf. *Sifre*, 143 b). Acc. to *Tub ha-'Ares*, i. 50 a, the spirits "go out to the world from the *Libnat ha-sSappir* (one of the seven Halls of '*Araboth*)."

Hence one might conclude that the unborn spirits here referred to have their place in the proximity of the Throne of Glory, whether in special chambers or not.

The expression 'the spirits of the *righteous*, that have not yet been created' compels the question whether this implies a distinction between the righteous, wicked (and intermediate) *even before this life*. Such a distinction is met with in *Wisdom of Solomon*, viii. 19, 20 ("For I was a witty child, and had a good spirit. Yea, rather, being good, I came into a body undefiled. . ."). This idea in its strictest connotation implies that the moral character of the spirits is already determined before their embodiment—the different courses of the living on this earth being merely a consequence of their qualities as developed in their pre-terrestrial existence; it reappears in *Zohar* in contexts treating of the problems of metempsychosis.

that have been created and had returned: and they were flying above the Throne of Glory before the Holy One, blessed be He.

(3) After that I went to interpret the following verse of Scripture and I found in what is written (Isa. lvii. 16): "for the spirit clothed itself before me, and the souls I have made" that ("for the spirit was clothed before me") means the spirits ⁴that have been created in the chamber of creation of the righteous and that have returned

4-4 *E om.*

The fully righteous spirits are there termed "the spirits from the side of *Shekina*"; cf. *Zohar*, ii. 94 a b. But another interpretation of the expression 'spirits of the righteous not yet born' is "the spirits that when once having entered earthly life will turn out righteous. They are foreseen to be righteous". Their future perfection reacts upon their pre-existent state. This seems to be the underlying idea of the passage *Ber. R.* viii. 6 referred to above, and is represented in *Zohar*, ii. 96 b. (Cf. *ib.* iii. 168 a and ii. 94 a b, referred to above, *et al.*)

If chh. xliii and xliv be treated as a whole, it is evident that here the life on earth is regarded as determining the character of man, and indeed so that it is the terrestrial life that taints the previously pure souls. Treated as a whole then, these chapters convey an interpretation of the words 'spirits of the righteous not yet created' more in line with the latter of the two connotations just referred to, but rather to the effect that there are no unrighteous spirits in the pre-existent state. No other unborn spirits are referred to in these chapters. Although only available as a *demonstratio e silentio*, this fact tends to show that at least the compiler of the present section moves on the basis of the orthodox conception expressed in the prayer '*Elohe Nëshāmā*' (given in *TB. Ber.* 60 b): "O God, the spirit which thou hast set within me is *pure* etc." (BOX, *Ezra-Apocalypse*, p. 120). Cf. *Eccl. R.* xii. 7: "the spirit I have given thee is pure; if thou give it back to me in the same state it is good for thee; if not, I will burn it before thee". (Cf. ch. xliv. and *TB. Nidda*, 30 a, *Shab.* 32 b, *Baba Batra*, 16 a.) Also 4 Macc. xviii. 23 ("having received pure and immortal souls from God").

Still it is evident that the expression by itself presupposes a distinction between righteous and not righteous already in the pre-existent state, in one form or the other. Hence the impression is left, that this tradition is suppressed in the present context and the possibility remains, that a fragment describing the conditions and abodes of the unborn spirits is missing, which originally would have had its place after vs. 2.

(3) After that I went to interpret etc., *lit.* 'after that I went and studied this scriptural passage and I found according as it is written etc.' 'This scriptural passage' means the well-known scriptural passage traditionally used as support for the doctrines concerning the subject in question. The passage, Isa. lvii. 6, adduced here, is the starting point for the speculations as to the conditions of the unborn spirits both in *TB. Chag.* 12 b and *Yeb.* 62 a, '*Aboda Zara*, 5 a, *Nidda*, 13 a (see above). Acc. to the J. Targum, *ad locum*, it is also used with reference to the doctrine of resurrection. Here the way in which the passage is used for its present purpose is set forth thus: the former part of the verse, 'the spirit was clothed before me', is made to refer to the spirits that have been created, that is to say, apparently, clothed with a body, the latter part, 'the souls I have made', is interpreted as referring to the spirits that are formed by God but not yet created, invested with a body.

that have been created in the GUPH of creation of the righteous, the chamber of creative forms designed for the righteous. The GUPH (= body) is then here not the chambers where the spirits dwell until the time appointed for

before the Holy One, blessed be He; (and the words:) "and the souls I have made" refer to the spirits⁴ of the righteous that have not yet been created in the chamber (*GUPH*).

CHAPTER XLIV

*Metatron shows R. Ishmael the abode of the wicked
and the intermediate in Sheol. (vss. 1-6)*

*The Patriarchs pray for the deliverance of Israel
(vss. 7-10)*

R. Ishmael said: Metatron, ¹the Angel, the Prince of the Presence,¹ said to me:

(1) Come and I will show thee the spirits of the wicked ²and the spirits of the intermediate² where they are standing, and the spirits

4-4 *E* om.

Ch. xlv. 1-1 so *E*. *A* om.

2-2 *E* om.

their life on earth arrives, but evidently the chamber where they are conducted just at the time when they are to enter terrestrial bodies. In this chamber they are then first 'created', i.e. invested with a body, a creative form, which presumably determines the individual, animal or terrestrial body they are to join. The passage, *Zohar*, iii. 107, referred to by Abelson, *Jewish Mysticism*, p. 166, could be used as a commentary on the present verse, and one can safely assume that it belongs to the same line of traditions or development of traditions: "when the souls are about to quit their heavenly abode each soul appears before the Holy One, blessed be He, clothed with an exalted pattern (or image or form) on which are engraven the features which it will bear here below". The *GUPH* is here rather the chamber containing "the pre-existent forms or types of bodies" (Abelson's expression, *ib.* p. 165) than the abode of the spirits. The unborn spirits "have not yet been created in the *Guph*" of creation.

It should be added that there is a certain indication here of a beginning differentiation of the 'world of Creation' (*Bêr'ā*) as a form of existence different from the higher world of 'the Throne'.

Lastly the qualifying addition 'of the righteous' (the *GUPH* of creation of the righteous) raises again the question of the distinction between righteous and non-righteous in the pre-existent state. Is there also a division in the *GUPH* between the compartment for the righteous and that or those for the others? Or did the original tradition maintain the existence of several *GUPHs*? In its strict connotation the distinction between righteous and non-righteous spirits has as a necessary corollary the distinction between different bodily forms for these two classes.

Ch. xlv. The preceding chapter, in so far as it dealt with the abode of the righteous dead, is in this chapter continued by a description of the two remaining classes of spirits who have left earthly life, i.e. the intermediate and the wicked. The intermediate undergo a purgatorial process in fire in She'ol, assisted and supported in their purification by an angel, *SIMKIEL*, whereas the wholly wicked are delivered to the wrath of the angel *ZA'APHIEL* who punishes them in Gehenna with staves of fire.

(1) the spirits of the wicked and the... intermediate where they are standing,

of the intermediate, whither they go down, ³and the spirits of the wicked, where they go down³.

(2) And he said to me: The spirits of the wicked go down to She'ol by the hands of two angels of destruction: ZA'APHIEL and SIMKIEL are their names. (3) SIMKIEL is appointed over the intermediate to support them and purify them because of the great mercy of the Prince of the Place (*Māqōm*). ZA'APHIEL is appointed over the spirits

3-3 E om.

i.e. probably at or immediately after the judgement which is daily acc. to the section on the judgement, chh. xxviii. 7-xxxiii. 2. the spirits of the intermediate whither they go down and the spirits of the wicked whither they go down, i.e. acc. to the following verses, Sheol.

(2) The spirits of the wicked (supply here, in accordance with the following verse: 'and the spirits of the intermediate) go down to She'ol through two angels of destruction. They are sent down from the Throne of Glory, before which they have undergone judgement. For the angels of destruction see notes on chh. xxxi. 2 and xxxii. 1. The angels of destruction carry out the judgement on the wicked, and are appointed over the different compartments of Gehenna according to numerous descriptions of the punishments assigned for the wicked in Gehenna. (Cf. '*Descriptions of Hell*' and other translations by Gaster, *RAS's Journal* (1893), further *Masseket Chibbut ha-qQeber*, BH. i. 150, *Masseket Gehinnom*, ib., i. 147-149, *Gan 'Eden we-Gehinnom*, ib., v. 49 seqq., *Test. R. Eliezer*, *Seder Yesirat ha-wWalad*, ib., i. 151-158.) They are then usually represented as numerous and as being assigned to a leader, 'the Prince of Gehenna' (*Gedullat Moshe*, Gehenna) (cf. QEMU'EL, note on ch. xxxi. 2). Here only two angels of destruction are mentioned. The older traditions speak of two angels of destruction as executioners of the divine decrees, 'APH and CHEMA. The angels of destruction function at the judgement, acc. to chh. xxxi-xxxiii, but represent there altogether the severe execution of judgement. Here one represents the attribute of Mercy, SIMKIEL (support of God), who is appointed over the intermediate to 'support and purify them' (cf. the staff of Mercy, ch. xxxi. 2).

The idea of the '*bēnōniyyim*', the intermediate class, the large majority of those who are neither wholly righteous nor wholly wicked, belongs to "the orthodox Rabbinic theology" of Palestine. See BOX, *Ezra-Apocalypse*, p. 155. The classical passages are TB. *Rosh ha-shSHana*, 16 b, 17 a, *Tos. Sanhedrin*, xiii. 3, *Aboth R. Natan*, xli, TB. *Shab.* 33 b. In *Rosh ha-shSHana*, ib., it is the second *dictum* introduced there that is particularly apposite in this connection ("there are *three divisions* [companies] for the day of judgement: one that of the fully righteous, another that of the fully wicked, the third that of the intermediate. The fully righteous are immediately written down and sealed for eternal life, the fully wicked... for Gehenna, the intermediate go down into Gehenna, but when they scream in prayer [transl. of BOX] they are permitted to come up again" (acc. to Zech. xiii. 9: "And I will bring the third part through the fire... they shall call on my name and I will hear them...") "and of them said Hanna (1 Sam. ii. 6): the Lord killeth and maketh alive (cf. ch. xviii. 24)").

because of the great mercy of the Prince of the Place. The Place, the *Maqom*, is the Divine Majesty. The Prince of the Place is an unusual expression. It may be a synonym for 'Prince of the Presence'. A better reading would perhaps be obtained by substituting '*shel*' (of) for '*sar*' (Prince) and transl. simply: 'because of the great mercy of the Place, i.e. the Divine Majesty'.

ZA'APHIEL, 'the wrath of God'. In contrast to the supporting and helping attitude shown the intermediate from the Divine Mercy, expressed by the name

of the wicked⁴ in order to cast them down from the presence of the Holy One, blessed be He, and from the splendour of the *Shekina*⁵ to She'ol, to be punished in the fire of Gehenna⁵ with staves of burning coal.

(4) And I went by his side, and he took me by his hand and showed me all of them with his fingers.

(5) And I beheld the appearance of their faces (and, lo, it was) as the appearance of children of men, and their bodies like eagles. And not only that but (furthermore) the colour of the countenance of the intermediate was like pale grey on account of their deeds, for there are stains upon them until they have become cleaned from their iniquity in the fire.

(6) And the colour of the wicked was like the bottom of a pot on account of ⁶the wickedness of their doings⁶.

4 *E*: 'intermediate' 5-5 so *E*. *A* corr.: 'to heat them for judgement in fire to Gehenna' (confusion of two variant readings?). 6-6 *E*: 'the multitude of their wicked deeds'

SIMKIEL, "support of God", stands the attitude of merciless wrath with regard to the wicked, symbolically expressed by the name ZA'APHIEL.

to be punished in the fire of Gehenna with staves of burning coal, probably pictured similarly to the passage *BH*. ii. 51 (of the angels punishing the wicked in Gehenna): "angels stand close by and with their staves drive them back into the fire and burn them". Cf. the punishment with lashes of fire, *chh*. xvi. 5, xx. 2 (the word translated 'lashes' Rashi interprets 'staves').

(5) the appearance of their faces as the appearance of children of men etc. The spirits have bodily form and actual bodies—like eagles, i.e. winged. These bodies are of course different from those they were invested with in the *GUPH*. The spirits of the righteous, that are 'flying above the Throne' are probably pictured in bodies of similar form. For the souls or spirits as having bodily form cf. 1 *En*. xxii. 9-14 ("these hollow places have been made that the spirits of the dead might be separated... their spirits shall be set apart in this great pain... scourgings and torments of the accursed for ever"), 4 *Ex*. vii. 78 seqq. (see BOX, *Ezra-Apocalypse*, note p. 121: "it seems clear that they (the souls of the unrighteous) are already endowed with bodies suitable to their altered condition... This conception apparently characterizes also 2 *Enoch*"). Cf. also how acc. to ch. xlvii. 4 the spirits and souls of the punished angels whose 'manifested' bodies have been consumed with fire, are represented as having bodily form, 'their countenance like that of angels and their wings like those of birds'.

the colour of the countenance of the intermediate was like pale grey... (6) And the colour of the wicked was like the bottom of a pot. The sins are depicted as having tainted the spirits—originally white and pure—the intermediate being merely stained so that their original nature is still recognizable, but the wicked black 'like the bottom of a pot': their original character is totally blotted out. This simile presupposes the conception of the absolute purity of the pre-existent spirits, cf. note on ch. xliii. 1-2 (end).

like the bottom of a pot is used of the wicked also in *Masseket Gehinnom*, *BH*. i. 149, and *Pirke Mashiach*, *BH*. iii. 75 ("their faces were black like the bottom of a pot"). As to the special sins that caused such an entire corruption there is no explicit reference here. The traditions were different on this point. *TB*. *Baba Mešia'*, 58 b, mentions three sins that consign for ever to Gehenna (cf. the fate of

(7) And I saw the spirits of the Patriarchs Abraham Isaac and Jacob and the rest of the righteous whom they have brought up out of their graves and who have ascended to the Heaven (*Raḡia'*). And they were praying before the Holy One, blessed be He, saying in

the wicked as compared with that of the intermediate), and the same is repeated in the '*Treatise on Hell*' which appeared in translation by Gaster, *RAS's Journal*, 1893, p. 602: "(three sins cause those who commit them to go down to Gehenna and never return:) blaming one's neighbour in public, slandering him and adultery". *Masseket Gehinnom*, i. BH. i. 147, apparently follows another tradition as to the distinction between wicked and intermediate: there the full punishment—in the class of the wicked—is designed for those who cannot point to one single act of fulfilment of the Tora, "who have not one single statute in their hands". This corresponds with the statement, *TB. 'Aboda Zara*, 5 a: "the fully righteous are those who have fulfilled the Tora from the beginning to the end, from '*Aleph* to *Taw*'. The *bēnōniyyim* acc. to this view are those who have endeavoured to fulfil the Law but have failed to keep all the statutes. A third view identifies the *bēnōniyyim* with those who have kept the negative statutes only, the fully righteous with those who have kept all the positive statutes as well as the negative ones.

As to the length of the period of purification assigned for the intermediate it is probably here conceived of as proportionate to the degree in which the sins have tainted them: they are kept in the purgatory until 'they have become cleaned from their iniquity'. Cf. the passage *Rosh ha-shSHana* etc. above note on vs. 2 and the transl. in BOX, *Ezra Apocalypse*, p. 155, where it is pointed out that the *bēnōniyyim* were thought to go up after screaming in prayer for one hour, acc. to *Yalqut* on Zech. xiii. 9. Rashi likewise (*ad loc. Rosh ha-shSHana*) puts as an explanatory remark on the difficult word '*mešafsefīm*': "it means: they cry and weep in their agony for one hour and then (are permitted to) come up again". Cf. *Se'uddath Gan 'Eden*, BH. v. 45, OM. i. 89 b: "the wicked of Israel tormented in Gehenna are brought up from Gehenna to partake in the Feast of the Righteous".

CH. XLIV. 7-10.

Vss. 7-10 contain an apocalyptic-eschatological fragment with the motto: "*Israel's deliverance is prevented by the sins of the wicked*".

The fragment does not fit in here. The theme of the chapter, acc. to vs. 1, is the conditions of the spirits of the intermediate and the wicked after death. If it had originally belonged to the exposition of the conditions of the spirits it would have had its place in ch. xliii which treats of the spirits of the righteous. But the interest of the present fragment is not focussed on the various conditions of the spirits of the dead but on the deliverance of Israel from the oppression under the 'nations of the world', the establishment of God's Kingdom on earth and the 'wicked' to which it refers are not the spirits of the wicked but the living evil-doers within Israel who through their transgressions prevent the establishment of the heavenly kingdom. It is, moreover, probable, that this fragment represents a different outlook upon the fate of man after death from that of the preceding context (*vide* below).

The frame is that of the rest of the section: R. Ishmael beholds various wonders in heaven under the guidance of Metatron. It is in this respect closely related to the *Apocalyptic Fragment* (e.g. BH. v. 167-169): "R. Ishmael said: the Prince of the Presence said to me: sit here in my bosom and I will tell thee what shall befall Israel etc. . . .". An apocalyptic fragment of similar character with Metatron, the Prince of the Presence, as informant of R. Ishmael is contained in *Bodl. MICH.* 175, foll. 25 b, 26 a (part of the *Pirge R. Ishm.*).

(7) And I saw the spirits of the Patriarchs . . . and the rest of the righteous who they have brought up out of their graves etc. This evidently marks the beginning of a new fragment. R. Ishmael is already shown the spirits of the righteous, acc. to ch. xliii. The expression 'have been brought out of their

their prayer: "Lord of the Universe! How long wilt thou sit upon (thy) Throne like a mourner in the days of his mourning with thy right hand behind thee ⁷and not⁷ deliver thy children and reveal thy Kingdom in the world? ⁸And for how long wilt thou have no⁸ pity upon thy children who are made slaves among the nations of the world? Nor⁹ upon thy right hand that is behind thee wherewith thou didst stretch out ¹⁰the heavens and the earth and the heavens of heavens? When wilt thou have compassion?"

(8) Then the Holy One, blessed be He, answered every one of them, saying: "Since these wicked do sin so and so, and transgress with such and such transgressions against me, how could I deliver my great Right Hand in the downfall by their hands (caused by them)¹¹."

(9) In that moment Metatron called me and spake to me: "My servant! Take the books, and read their evil doings!" Forthwith I took the books and read their doings and there were to be found

7-7 E: 'when wilt thou' 8-8 E: 'When wilt thou have' 9 E: 'And' 10 E
ins.: 'and didst span' 11 E reads: '(my great Right Hand) that has fallen down
in the downfall at their hands'

graves and have ascended to *Raqia'* is also suspect in this connection: it sounds as if we were here confronted with a different conception as to the fate of men after death, according to which the Patriarchs and (some of) the righteous enjoy the privilege of bodily resurrection before the final consummation.

How long wilt thou sit... thy right hand behind thee. The *Right Hand* or the *Right Arm of the Lord* represent the actualization of the kingdom of God on earth, the deliverance of Israel. That the Right Hand is laid behind the Lord is a symbol of cessation in His activity for this purpose. The deliverance of the Right Hand, hence, becomes synonymous with the deliverance of Israel. Cf. ch. xlviii A. It was God's Right Hand that stretched out the heavens and the earth, and so it must be His Right Hand that shall bring about the final establishment of the Kingdom on earth.

(8) Since these wicked do sin... how could I deliver my great Right Hand etc. The delay in the deliverance of Israel is caused by the wicked in their own ranks. That the downfall of Israel was caused by the wicked among them is a *dictum* attributed to R. Gamaliel II. In particular the idolatry was made responsible for the delay in the establishment of God's Kingdom. The coming of Messiah is suspended for a period which exactly corresponds to the number of years that Israel has been worshipping idols, acc. to 'Echa R. Proëm. 21. Similarly, in the *Apocalyptic Fragment*, Bodl. MICH. 175, referred to above, R. Ishmael is represented as asking for the reason of the present sufferings of Israel, whereon he is informed that the deliverance is to be suspended for a time corresponding to that of their idolatry (700 years). Here evidently—see vs. 9—the 'sins' of the wicked comprise all 'transgressions of the Tora'.

'These sinners' was perhaps by the compiler thought to refer to the wicked of vss. 1-6, this being then one of the reasons why this fragment was given its present place.

(9) Take the books, and read their evil doings! On the conception of books recording the deeds of righteous or unrighteous etc. see note on ch. xviii. 24. The books here seem to be the records of the deeds of the wicked, cf. 1 En. lxxxix. 4 (book of unrighteousness), *ib.* xcvi. 7-8 ("every sin is every day recorded in heaven—all your oppression... is written down every day till the day of your

36 transgressions (written down) with regard to each wicked one¹² and besides, that they have transgressed¹² all the letters in the Tora, as it is written (Dan. ix. 11): "Yea, all Israel have transgressed thy Law". It is not written 'al torateka but 'et (ת) torateka, for they have transgressed from 'Aleph (א) to Taw (ת), 40¹³ statutes have they transgressed for each letter.

(10) Forthwith Abraham, Isaac and Jacob wept. ¹⁴ Then said to them the Holy One, blessed be He: "Abraham, my beloved, Isaac, my Elect one, Jacob, my firstborn! ¹⁵ How can I now¹⁵ deliver them from among the nations of the world?" And forthwith MIKAEL, the Prince of Israel, cried and wept with a loud voice and said (Ps. x. 1): "Why standest thou afar off, O Lord?"

12-12 so acc. to *E. A* corr.
15-15 *E*: 'I cannot now'

13 *E*: '36'

14 *E* adds: 'to themselves'

judgement"). Since Metatron here seems to have the 'books' in his charge, there must be a trace here of Metatron's function of scribe (*Chag.* 15 a).

36 transgressions (written down) with regard to each wicked one... Both readings (*A* and *E*) seem to be corrupt. The meaning seems to be: for each wicked one were recorded 36 transgressions of the Tora and in addition thereto a great many transgressions of each single letter of the Tora. from 'Aleph to Taw. Cf. *Lam. R. Proëm.* 24: "the Holy One, blessed be He, said to Abraham: 'thy children have sinned and have transgressed the whole Tora and the 22 letters of Tora, as it is written (Dan. ix. 11), all Israel have transgressed thy Law' (thus here also the passage, Dan. *ib.*, is used as point of support)". The transgressing a letter of the Tora is in *Lam. R. ib.*, understood as equivalent to the transgressing a commandment beginning with that letter, or vice versa. But the expression 'from 'Aleph to Taw' represents the entirety of a thing, in this case the Tora, any part of which is based upon one or the other of the letters. In an absolute sense it represents the entirety of things in general, and is to be compared with the expression 'Alpha and Omega', Rev. i. 8. (See CHARLES, *Comm. on Rev.* i. 20, and Riedel in *Theologische Studien und Kritiken*, 1901, pp. 297 seqq., both regarding the 'Alpha and Omega' as an imitation of the 'Aleph to Taw'.)

(10) Mikael, the Prince of Israel, cried and wept with a loud voice. This is the only passage in the present book where Mikael is explicitly referred to as the Prince of Israel. Ch. xvii. 3, Mikael is the prince of the seventh (highest) heaven. The scarce occurrence of 'Mikael' (only twice) is remarkable. His position seems to have been taken over by Metatron. *Ctr.* the frequent reference to Mikael as the prince of Israel in 1 *En.* (ix. 1, x. 11, xx. 5, xxiv. 6, xl. 9, liv. 6, lx. 4, 5, lxvii. 12, lxviii. 2-4, lxix. 14 f., lxxi. 3, 8, 9, 13).

For Mikael bewailing calamities that have befallen Israel, cf. *Pesik. R.* xlv and the parallel trait there: God answers that the deliverance is dependent upon Israel: "(the apostates of) Israel must first turn to me, even if it were only as much as the point of a needle". Cf. also *Midrash Petirath Moshe*: when Sammael is about to take away Moses' soul, Mikael "cried and wept with a loud voice".

CHAPTER XLV

*Metatron shows R. Ishmael past and future events
recorded on the Curtain of the Throne*

R. Ishmael said: Metatron said to me:

(1) Come, and I will show thee the Curtain of *MAQOM* (the Divine Majesty) which is spread before the Holy One, blessed be He, (and) whereon are graven all the generations of the world and all their doings, both what they have done and what they will do until the end of all generations.

(2) And I went, and he showed it to me pointing it out with his fingers ¹like a father who teaches his children the letters of Tora. And I saw each generation,
the rulers of each generation¹,

1-1 so *E. A.*: 'and like a father who teaches his children (he showed me) each generation'

Ch. xlv. R. Ishmael is shown the Curtain (*Pargod*) of *MAQOM* (the Place, i.e. the Divine Majesty as manifested on the Throne of Glory). This Curtain is spread before the Holy One. The Curtain of the Throne of Glory is referred to also, ch. x. 1. The Curtain separates the Throne of Glory and its innermost mysteries from the other parts of the highest heaven and from the world of angels in general, just as the curtain veiled off the Holy of Holies in the sanctuary. (Cf. *TB. Yoma*, 77 a.) The Curtain hence becomes the symbol of the last secrets of heaven and earth which are kept with the Godhead, hidden even from the angels. Occasional revelations of these secrets—the reasons of the Creator—are described either as obtained by 'hearing from behind the Curtain' or expressed by the phrase 'to know from behind the Curtain': this is one line of ideas. Or, according to another line, the secrets are represented as 'written down on the (inside of) Curtain'. As instances of the former line of conception reference may be made to the tradition concerning *GALLIŠUR-RAZIEL* (see note on ch. xviii. 16), further to *Mekilta* on Ex. xix. 9 (voices from behind the Curtain announce the answers of prayers), and *TB. Ber.* 18 b (there is heard 'from behind the Curtain, what tribulations are in store for the world'). It seems, that this tradition also contained the idea of special high angels being allowed inside or having their place inside the Curtain, in the immediate Presence of the Holy One, thus partaking of the Divine secrets: so acc. to ch. x. 1 in the reading of *BC* (cf. note, *ib.*) the case of *GALLIŠUR*, and in *Mass. Hek.* vii ("A curtain is spread before the Holy One... and the seven angels who were created first, minister before Him [i.e. inside the Curtain]"). The second conception is represented here and also *Alph. R. 'Aqiba*, *BH.* iii. 44—where it is as here called the *Pargod of MAQOM*. As a parallel in earlier Enoch-literature is to be noted especially 1 *En.* xciii. 2 and cvi. 19: "I Enoch will declare them unto you... acc. to that which appeared to me in the heavenly vision, and which I have known through the word of the holy angels and have learnt from the heavenly tablets" (the heavenly tablets correspond to the *Pargod* here).

(1-3) R. Ishmael is shown all generations and their doings, both past and coming. This implies the idea of pre-determination. In *TB. Sanh.* 38 b, one finds: "The Holy One, blessed be He, showed Adam every generation and its learned men (inter-

and the heads of each generation,
 the shepherds of each generation,
 the oppressors (drivers) of each generation,
 the keepers of each generation,
²the scourgers of each generation,²
 the overseers of each generation,
 the judges of each generation,
 the court officers of each generation,
 the teachers of each generation,
³the supporters of each generation,
 the chiefs of each generation,³
 the presidents of academies of each generation,
 the magistrates of each generation,
 the princes of each generation,
⁴the counsellors of each generation,⁴
 the nobles of each generation,
⁴and the men of might of each generation,⁴
 the elders of each generation,
 and the guides of each generation.

(3) And I saw Adam, his generation, their doings and their thoughts,⁵

Noah ⁶and his generation, their doings and their thoughts⁶,
 and the generation of the flood, their doings and their thoughts,
 Shem and his generation, their doings and their thoughts,

Nimrod and the generation of the confusion of tongues, and his generation, their doings and their thoughts,

Abraham and his generation, their doings and their thoughts,

Isaac and his generation, their doings and their thoughts,

⁷Ishmael and his generation, their doings and their thoughts,⁷

2-2 so *E.* (סורקיה) *lit.* 'flayers, hatchellers'; cf. *Zohar* i. 177 a: "סריקתא דקוסטרי"
A: 'eunuchs, officers' (?) 3-3 *E*: 'the helpers of each generation, and their
 pious men (*Chasidim*), their leaders, teachers, sages and heads of the schools'
 4-4 *E* om. 5 *E* ins.: 'Methuselah, his generation, etc.' 6-6 *E* om.
 7-7 *E* om.

preters of Scripture), every generation and its wise men, and when he came to the generation of R. 'Aqiba he (Adam) rejoiced at his (great understanding of) Tora but was grieved at his death (as a martyr)". In *Alph. R.* 'Aqiba this has the following form (*BH.* iii. 44): "Moses saw on the Curtain of MAQOM numerous hosts of scribes and hosts of (members of) Sanhedrin studying the Tora, the Prophets and the writings... and in the same hour Moses saw the fate (life) of R. Aqiba on the Curtain of Maqom how he was lecturing on the letters of Tora, expounding on each of the ornaments of each single letter 365 different significations of the Tora etc." The Curtain is here the repository of all past, present and future events, and it seems, as if the idea were rather, that the events, the 'generations,

Jacob and his generation, their doings and their thoughts,
 Joseph and his generation, their doings and their thoughts,
 the tribes and their generation, their doings and their thoughts,
 Amram and his generation, their doings and their thoughts,
 Moses and his generation, their doings and their thoughts,
 (4) Aaron ⁸ and Mirjam ⁹ their works and their doings,
¹⁰the princes and the elders, their works and doings,
 Joshua and his generation, their works and doings,
 the judges and their generation, their works and doings,¹⁰
 Eli and his generation, their works and doings,
¹¹Phinehas, their (?) works and doings,¹¹
 Elkanah and his generation, their works and their doings,
 Samuel and his generation, their works and doings,
¹²the kings of Judah with their generations, their works and their
 doings,
 the kings of Israel and their generations, their works and their
 doings,
¹³the princes of Israel, their works and their doings; the princes
 of the nations of the world, their works and their doings,
 the heads of the councils of Israel, their works and their doings;
 the heads of (the councils in) the nations of the world, their genera-
 tions, their works and their doings;
¹⁴the rulers of Israel and their generation, their works and their
 doings;
 the nobles of Israel and their generation, their works and their
 doings; the nobles of the nations of the world and their generation(s),
 their works and their doings;¹⁴
 the men of reputation in Israel, their generation, their works and
 their doings;¹⁵
 the judges of Israel, their generation, their works and their doings;
 the judges of the nations of the world and their generation, their
 works and their doings;
 the teachers of children in Israel, their generations, their works

8 *E* ins.: 'and his generation, their thoughts and their doings' 9 *E* adds:
 'and her generation' 10-10 *E* om. 11-11 *E* om. perhaps rightly 12 *E* ins.:
 'Saul etc., David, etc., Salomo, etc.' 13 *E* ins.: 'the rulers of Israel, etc., the
 nobles of Israel, etc., the nobles of the gentiles, etc., the wealthy men of Israel,
 etc., the wealthy men of the nations of the world, etc., the wise men of Israel,
 etc.' 14-14 *E* om. 15 *E* ins.: 'the men of reputation in the nations of
 the world, etc.'

their thoughts and their doings', are pourtrayed on the curtain—the images are
 imprinted on it—than that the various facts are merely recorded.

and their doings; the teachers of children in the nations of the world, their generations, their works and their doings;

the counsellors (interpreters) of Israel, their generation, their works and their doings; the counsellors (interpreters) of the nations of the world, their generation, their works and their doings;

all the prophets of Israel, their generation, their works and their doings; all the prophets of the nations of the world, their generation, their works and their doings;

(5) and all the fights and wars that the nations¹⁶ of the world wrought against the people of Israel in the time of their kingdom.

And I saw Messiah, son of Joseph, and his generation¹⁷ and their works and their doings that they will do against the nations of the world¹⁷. And I saw Messiah, son of David, and his generation, and

16 so *E*. *A* corr. from here to 'the people of Israel': '(that the nations) of Israel wrought against the people of Israel' 17-17 *E*: 'and all the deeds of the nations of the world at that time'

(5) And I saw Messiah son of Joseph etc. From here to the end of the verse there follows a short eschatological piece. R. Ishmael, through the medium of the Curtain of the Throne, sees the events of the last times. The end of the course of the present world is marked by the appearance of Messiah ben Joseph and Messiah ben David in whose times there will be wars between Israel and 'Gog and Magog'; the final consummation will then, so it seems, be brought about by the Holy One Himself.

For the conception of the two Messiahs, reference may be made to the scholarly expositions by Dalman (*Der leidende und sterbende Messias*, pp. 1-26), Buttenwieser (in *JE*. viii. 511 b, 512 a), Klausner (*Die messianischen Vorstellungen des jüdischen Volkes*, etc., pp. 86-103), Rabinsohn (*Le Messianisme dans le Talmud et les Midrachim*). Vide also Eisenmenger, *Entdecktes Judenthum*, ii. 729, Schoettgen, *Horae Hebraicae et Talmudicae*, i. 139, 267, 360-5, Wuensche, *Die Leiden des Messias*, pp. 65 seqq., Castelli, *Il Messia secondo gli Ebrei*, pp. 224-9.

It will perhaps be best to follow Klausner (and Dalman) in assuming that the origin of a double Messiah was the realization of the duplicity inherent in the traditional Messianic picture, e.g. the political and military traits as against the spiritual and ethical (esp. of Isa. xi and Zech. ix. 9). "Die Doppelnatur des Messias muss in einen Doppelmessias umgesetzt werden" (Klausner). (Cf. Dalman in a somewhat different vein: "es muss als möglich gelten, dass überhaupt ein etwa durch die hadrianischen Verfolgungen neu hervorgerufenes Interesse an dem Trost der Messias Hoffnung zu erneutem Schriftstudium trieb... Alles was in der heiligen Schrift darauf zu deuten schien, dass Edom-Rom gestürzt und Jerusalem, wenn auch nur vorläufig, an Israel zurückgegeben wird, musste dad en Forscher anziehen, und das Unbestimmteste gewann für das nach Erlösung dürstende Gemüt deutliche Umrisse und konkrete Gestalt. So erstand Messias ben Joseph, der sterbende Messias des Judentums".)

As to the designation 'ben Joseph' (son of Joseph), Klausner (*op. cit.* p. 97) holds that "when once a second Messiah has become necessary, he cannot be taken from any other tribe but that of Joseph" ("Der erste Messias ist ein Davidide, also ein Judäer. Was sollte nun der zweite Messias anders sein, als Josephite, beziehungsweise Ephraimite" [*Messiah ben Ephraim* is sometimes a variant of *Messiah ben Joseph*, vide below]). Also should be noted Klausner's remark that it "is highly

all the fights and wars, and their works and their doings that they

probable that *Bar Kochba's* death as hero in the war with the enemies of Israel, after having for a time been victorious and even reigned as a king, became the starting-point (*Vorbild*) for the conception of a Messiah who at first is victorious but in the end is overcome by the enemies of Israel". This is, most probably, the right explanation of the conception of a Messianic forerunner of the real Messiah: One had long been conscious of the duplicity in the Messianic picture; the Hadrianic persecutions and the *Bar Kochba* incident forced the attention on the Messianic ideas and hopes; the circumstances made one conscious of Israel's fate of having to go through many tribulations, temporal victories followed by severe débâcles: from this consciousness grew the picture of a forerunner-Messiah whose essential characteristic was described by the words of the *Baraita* (*TB. Sukka*, 52 a): "he will be killed".

Dalman explains the designation 'ben Joseph' from Deut. xxxiii. 17 ("His glory is like the firstling of his bullock and his horns are like the horns of unicorns: with them he shall push the people together to the ends of the earth: and they are the ten thousands of Ephraim, and they are the thousands of Manasseh"). "The 'firstling of his (Joseph's) bullock' is nearly as much the emblem of Messiah ben Joseph: *Ren. R.* lxxv. 6, *Ex. R.* to xlix. 14 acc. to *Pugeo Fidei*, *Num. R.* xiv. 2, *Midrash Tanchuma*, ed. Buber, 82 b, as the 'foal of an ass' of Zech. ix. 9 is the emblem of Messiah ben David". "Was dort (Deut. xxxiii. 17) von Joseph gesagt ist, führt den Gedanken an das spätere Königtum Ephraims, oder, wenn man das Wort zu der messianisch verstandenen Weissagung auf Juda in Gen. xlix in Parallele setzt, an einen in der Endzeit auftretenden mächtigen König Israels aus Josephs Stamm, einen Messiah ben Joseph. Die Rabbinen, welche in Deut. xxxiii. 17 wirklich einen Messias geweissagt glaubten, wurden dann in diesem Glauben durch ein Wort Jeremias bestärkt (viz. Jer. xlix. 20)".

[Schoettgen (*op. cit.*), adducing, apart from earlier sources, *Zohar* and *Zohar Chadash*, arrives at the conclusion that Messiah ben Joseph and Messiah ben David are identical, and that the former represents the human nature of Messiah, destined to suffer death. The designation 'son of Joseph' Schoettgen believes to be derived from the Christian designation of Christ, the Messiah, as 'the son of Joseph' and points out how, in the genealogy of St Matthew (i. 1), Christ is called 'the son of David', in that of St Luke, on the other hand, 'the son of Joseph'.

Wuensche, in his first discourse on the present problem (*op. cit.*), also maintained that Messiah ben Joseph and Messiah ben David really were identical. The identity he found established already in *TB. Sukka*, 52 a (where he, however, mis-translates; *vide* below and Klausner, *op. cit.* p. 91, note 2); in common with Schoettgen he further pointed to the fact that scriptural passages which receive Messianic interpretation are promiscuously referred now to Messiah ben Joseph, now to Messiah ben David—although passages interpreted as referring to the suffering Messiah are, according to Wuensche, more often applied to the former than to the latter; from the last-named fact he concluded that the figure of Messiah ben Joseph really symbolized the atoning function of Messiah.

Acc. to Friedmann (*Seder Eliyah*, Introduction, 20) the conception of Messiah ben Joseph goes back to the expectations among remnants of the tribes belonging once to the Northern Kingdom in Palestine for a Messiah from מלכות אפרים.

Bertholdt (in *Christologia Judaeorum*, 157) conjectures that the origin was from certain Messianic speculations among the Samaritans.

Castelli (*op. cit.* pp. 234-6) thinks that Messiah ben Joseph was the Messiah contrived for the ten tribes exiled in Media who was to lead them back to Palestine from their distant abode beyond the river *Sambatyon* (on the river *Sambatyon*, a definite detail of the eschatological scheme, *vide* box, *Ezra-Apocalypse*, pp. 296, 298, 300 seq.).

Hamburger (*Messianische Bibelstellen*, 111) and Levy (*Wörterb.*) think that the Messiah ben Joseph originated from the *Bar Kochba* incident. *Bar Kochba*, who

will do with Israel both for good and evil. And I saw all the fights

had been proclaimed as Messiah even by the great R. 'Aqiba (so *Yer. Ta'an*, iv. 68 d) was made to retain his Messianity by the formation of the doctrine of Messiah ben Joseph as the forerunner of the victorious Messiah ben David.

Jellinek (*BH*. iii. xlvi seqq.) expresses the view that the victory of Joseph Flavius in Galilee (thought as the region of the ten tribes or as part of the Northern Kingdom) followed by his defeat through Vespasianus influenced the 'saga' of the Messiah ben Joseph.

Buttenwieser (in *JE. loc. cit.*) says: "it is possible that the idea of Messiah ben Joseph is connected in some way with the Alexander-Saga". He points out how Messiah ben Joseph and Alexander (in the Koran) both are represented as horned.

Rabinsohn (*op. cit.*) finds the explanation of the 'son of Joseph' in Deut. xxxiii. 17. Cf. above on Dalman's theory.]

The conception of a Messiah ben Joseph goes back to Tannaitic times. The most important passages speaking of Messiah ben Joseph are found in *TB. Sukka* 52 a, dated by Levy, Hamburger, Friedmann, Dalman and Klausner as post-Hadrianic. One of the said passages is a *Baraita* (תנן רבנן) running as follows: "Messiah, the son of David, who will shortly be revealed in our days, to him says the Holy One, blessed be He: 'Beg of Me anything and I will give thee' as it is written (Ps. ii. 8): 'Ask of me, and I shall give thee the heathen for thine inheritance and the uttermost parts of the earth for thy possession'. As soon as he (i.e. Messiah ben David) saw Messiah, the son of Joseph, that he was (or: would be) killed, he says before Him: 'Lord of the Universe! I do not ask of Thee anything but Life'. He says to him: 'Life! Before thou didst say it, David, thy father, has already prophesied (this, i.e. life) concerning thee, as it is written (Ps. xxi. 4): He asked life of thee and thou gavest it him, even length of days for ever and ever'".

The other passage (according to Klausner, "eine amoräische Überlieferung einer tannaitischen Deutung") runs: "(Zech. xii. 12): 'And the land shall mourn, every family apart; the family of the house of David apart, and their wives apart; the family of the house of Nathan apart, and their wives apart'; They say: 'Must not the rule *qal wachomer* (a *minori ad majus*) be applied here: if with reference to the time to come when they are occupied with wailing and the evil inclination does not have power over them, the Scripture says "men apart and women apart" how much the more (ought this to be the law) now when they are occupied with pleasure and the evil inclination *does* have power over them?' This wailing, what does it really signify? Rabbi Dosa and our teachers are divided on this point. The one says: 'It (refers) to Messiah the son of Joseph who is (will be) killed', and the other says: 'It (refers) to the evil inclination which will be exterminated'. Surely (the right lies) with the one who says (that it refers) to Messiah the son of Joseph who will be killed, according as it is written (Zech. xii. 10): 'And they shall look upon the one whom they have pierced, and they shall mourn for him as one mourneth for his only son'".

'En Ya'aqob preserves the following version of *TB. Sukka*, 12 b: "(Zech. i. 20, Hebrew Bible, ii. 3): 'And YHWH showed me four *charashim*'. What are they (i.e. the *charashim*)? R. Chunna bar Bizna says: R. Sim'on the Chasid says: this means *Messiah ben David*, *Messiah ben Joseph*, *Elijah* and the *Priest of Righteousness*."

Targ. Yer. i to Ex. xl. 11 speaks of Messiah the son of Ephraim through whom Israel will in the end of time overcome Gog ("uthërabbē yath kiyyura wēyath bēsīsēh uthēqaddesh yathēh mē'ul Yehošū' mēšumshanakh rabba dē-Sanhedrin dē 'ammeh dē'al yēdōy 'āthida 'ar' a de-Israel le-'ithpēlaga umēšhicha bar Ephraim denafiq minneh dē'al yēdōy 'āthidin beth Israel līmēnašha le-Gog ulēsi'atheh bēšof yomayya").

Targ. Yer. to Canticles iv. 5 and vii. 4 speak of Messiah ben David and Messiah ben Joseph as deliverers of Israel like Moses and Aaron.

The earlier passages represent Messiah ben Joseph merely as the forerunner of Messiah ben David and as the Messiah "who is killed". The passage in our book

and wars that Gog and Magog will fight ¹⁸ in the days of Messiah, and all that the Holy One, blessed be He, will do with them in the time to come.

18 A ins.: 'with Israel'

goes no further: he is to appear before Messiah ben David and will be engaged in warfare. Though it is not expressly stated here that Messiah ben Joseph will be killed, this is probably presupposed.

Later passages in *Num. R.* xiv. 2, in *Pesiqtha Zut.* to *Num.* xxiv. 13, *Midrash 'Asereth Melakhim*, *Pirge Mashiach*, *BH.* iii. 70, *Pereq R. Yoshiyahu*, *BH.* vi. 115 (Messiah ben Joseph called Nehemyah ben Hushiel) appears after the victory over Rome, is killed in the struggle with the Arabs and resuscitated by Elijah in the time of Messiah ben David. *Midrash Wayyosha'*, *Nistaroth de R. Shim'on ben Yochai* (*BH.* iii. 80), *Tefillath R. Shim'on ben Yochai* (*BH.* iv. 124), *Othoth ha-mMashiach* (*BH.* ii. 58), *Sefer Zerubbabel* (*BH.* ii. 55) (*vide* Introduction, Sources and Literature, A 3 (B)) give the tradition that Messiah ben Joseph will be killed in the war with Armilos. In the *Nistaroth de R. Shim'on ben Yochai* there are three names of Messiah(s): Messiah ben Joseph, Messiah ben Ephraim and Messiah ben David. *Num. R.* xiv. 2, evidently dependent upon the tradition preserved in *TB. Sukka*, 12 b (acc. to 'En Ya'aqob, *vide* above), interprets the four *charashim* of Zech. ii. 3 as: "Elijah, the Messiah who shall rise from the children of Manasse, the Anointed for War (*meshu"ch milchama*) who will come from Ephraim and the Great Redeemer who is one of the sons of the sons of David".

Attempts at systematization of the various traditions in respect of the two Messiahs were made by Sa'adya in 'Emunoth we De'oth, viii, and Hai Gaon in *Ta'am Zegenim* (ed. Frankf. am Main, 1854, pp. 59 seq.). For these *vide* Dalman, *op. cit.* and Buttenwieser (in *JE. loc. cit.*). A display of still later, especially cabalistic, traditions on Messiah ben Joseph is given in Eisenmenger's *Entdecktes Judenthum*, ii. 729 seqq. (from *Menorath ha-Ma'or*, *Shene Luchoth ha-bBerith*, *Yalqut Chadash*, 'Emeq ha-mMelek, etc.). Passages in the *Zohar* treating of Messianic times are: *Zohar*, i. 118 a, 119 a, 134 a b, 139 a b; ii. 7 a b, 32 a, 105 b, 109 b; iii. 67 b, 124 b, 125 a b, 153 a b, 212 b; in the *Tiqqunim*, 78 a, 95 a.

Gog and Magog play the rôle of "a collective anti-Messiah" (M. Friedlander, *Der Antichrist*, pp. 171-3). The war with Gog and Magog was speculated upon already in pre-Hadrianic Tannaitic times. Klausner says (*op. cit.* pp. 90, 100), basing upon *Siphra*, *Par. Bechuqqothai*, 2, *Siphre Deut. Pisqa*. 343: "We can with some certainty maintain that the belief current in pre-Hadrianic times was that the Messias ben David, supported by the presence of the Divine Glory (the *Shekina*), would wage war against and overcome the enemies of Israel (i.e. Gog and Magog), but in the post-Hadrianic times the warfare was assigned to Messiah ben Joseph destined after a temporal victory to be conquered, and the final victory, brought about by God Himself without shedding of blood, crowns Messiah ben David". This distinction is evidently correct. It will easily be seen that our passage reflects the post-Hadrianic belief in respect of the Messianic times; but it may also be noticed that the vivid impression of the fate of the Messiah ben Joseph characteristic of the Tannaitic dicta has been somewhat blurred out; there is not the same nearness of the picture of war and the conquering and death of Messiah ben Joseph; on the other hand there are no traces of new developments and elaborations of the original conceptions found in later sources. This suggests that the present passage belongs to a time of peace not too far removed however from the time of origin of the Messiah ben Joseph conception, probably some time during the third century A.D.

and all that the Holy One... will do with them: the final consummation will be brought about by the Holy One Himself.

(6) ¹⁹And all the rest of all¹⁹ the leaders of the generations and all the works of the generations both in Israel and in the nations of the world, ²⁰both what is done and what will be done hereafter²⁰ to all generations until the end of time, (all) were graven on the Curtain of *MAQOM*. And I saw all these things with my eyes; and after I had seen it, I opened my mouth in praise of *MAQOM* (the Divine Majesty) (saying thus, Eccl. viii. 4, 5): "For the King's word hath power (and who may say unto him: What doest thou?) Whoso keepeth the commandments shall know no evil thing". And I said: (Ps. civ. 24) "O Lord, how manifold are thy works!"

CHAPTER XLVI

The place of the stars shown to R. Ishmael

R. Ishmael said: Metatron said to me:

(1) (Come and I will show thee) the space¹ of the stars ²that are standing ³in *Raqia'*³ night by night in fear⁴² of the Almighty (*MAQOM*) and (I will show thee) where they go and where they stand.

(2) I walked by his side, and he took me by his hand and pointed out all to me with his fingers. And they were standing ⁵on sparks of flames round⁵ the *Merkaba* of the Almighty (*MAQOM*). What did

19-19 *E*: 'And there were' 20-20 *E*: 'both what they have done and what they will do in time to come'

Ch. xlv. 1 *E* perhaps reads 'spirit' 2-2 emendated. *E* corr.: 'that are deep (or "high") in *Raqia'* and every night in fear (בְּאֵמֶן obviously miswritten for בְּאֵמֶתוֹ)' 3-3 emendated acc. to *E*. *A*: בְּרִיקִים, an easy corr. of בְּרִיקֵי, 'lightnings' perhaps under influence of vs. 2: 'they are standing on sparks' 4 emendated with regard taken to *E*; see 2-2. 5-5 *E*: 'in sparks of flames of (from)'

Ch. xlv. In this chapter R. Ishmael is shown the place of the stars who are standing by the 'Throne of the *Merkaba*' praising the Holy One during the time that they are not occupied by 'doing service to the world'—in *Raqia'*, the second heaven. For the stars, acc. to vs. 3, have two functions: one (during the night) of lighting the world, the other of singing hymns to their Creator.

(1) The text of the chapter is in a bad state, both acc. to the reading of *A* and acc. to that of *E*. Especially is this the case with vs. 1. Emendations have been made in the translation with the help of a comparison of the two readings. (Come and I will show thee) is omitted in both readings but is obviously to be inserted by analogy with the opening words of the surrounding chapters, since the rest of the present chapter follows the scheme and phraseology of the other chapters of the section.

(2) standing on sparks of flames round the *Merkaba* of the Almighty (*MAQOM*) ... flew off on flaming wings. The stars are depicted as standing by the *Merkaba*

Metatron do? At that moment he clapped his hands and ⁶chased them⁶ off from their place. Forthwith they flew off⁷ on flaming wings, rose and fled from the four sides of the Throne of the *Merkaba*, and (as they flew) he told me the names ⁸ of every single one. As it is written (Ps. cxlvii. 4): "He telleth the number of the stars; he giveth them all their names", teaching, that the Holy One, blessed be He, has given a name to each one of them.

(3) And they all enter in counted order under the guidance of (*lit.* through, by the hands of) RAHAṬIEL to *Raqia'* *ha-shSHamayim* to serve the world. And they go out in counted order to praise the

6-6 *E*: 'made them to fly' 7 *E* adds: 'from their place' 8 *E* adds: 'and the additional names (*kinnuyim*)'

and evidently conceived of as living beings, presumably as angels, cf. vss. 3 and 4. 'Wings' are the regular attribute of angels and angelicized beings, cf. ch. ix. 2 and 'the Names flying off *like eagles*', ch. xxxix. 1. The stars are hence probably pictured as having bodies and wings after the scheme of the description of angels. Cf. the representation of the fallen stars as having bodily form, in 1 *En.* lxxxvi. 1 seqq., lxxxviii. 1, xc. 21.

Metatron...clapped his hands and chased them off. Metatron here is represented as having authority over the stars—although their special '*mēmūnne*' (appointed one) is RAHAṬIEL. The authority over the heavenly bodies is a special distinctive mark of the Prince of the World, acc. to ch. xxxviii. 3—hence this may be regarded as a trace of the identity between Metatron and the Prince of the World, maintained by one trend of traditions: cf. note on ch. iii and intr. told me the names...has given a name to each one. Cf. 1 *En.* lxix. 21: "through that oath (i.e. *Akæe*) the stars complete their course. And He calls them by their names. And they answer Him from eternity to eternity". (Charles, 1 *En.* p. 140.)

(3) they all enter in counted order under the guidance of RAHAṬIEL. For RAHAṬIEL as the ruler of the constellations, planets or heavenly bodies in general, see ch. xvii. 6 and note, *ad loc.* to *Raqia'* *ha-shSHamayim*, i.e. the second of the seven heavens, which is the region of the heavenly bodies (*Chag.* 12 b, chh. xvii. 4, 7, xxxviii. 1). Here the stars are represented as entering the *Raqia'* in order to serve the world, i.e. to give light, etc. to serve the world. For the expression and idea cf. 4 *Ezra* vi. 46: "and didst command them (the sun...moon and order of the stars) that they should do service unto man"; and see BOX, *Ezra-Apocalypse*, p. 88, note *ad locum*, where attention is called to parallels in Clemens, *Recogn.* v. 29 and *Hom.* x. 25 ("the sun daily waits upon the world", etc.), and where also is pointed out that the underlying idea of the expression is to "emphasize the thought that the stars are man's servants because by all the rest of the world they were regarded as gods".

And they go out in counted order. 'go out' is here obviously meant as the opposite of 'enter (the *Raqia'*)'. Hence the stars are here thought to leave the second heaven after having fulfilled their function of 'serving the world'. From the *Raqia'* they are presumably pictured as proceeding to the '*Araboth*', the seventh heaven, since they are said (vs. 2) to be standing round the *Merkaba* or 'the Throne of the *Merkaba*'.

to praise the Holy One, blessed be He, with songs and hymns. In their function of praising the Most High 'with songs and hymns' the stars are clearly conceived of as angelic beings, and this is especially marked by the manner in which their fate is associated with that of the song-uttering angels (see next verse). For the conception of the stars as angels, cf. Bousset, *Rel. des Judentums*, p. 315.

Holy One, blessed be He, with songs and hymns, according as it is written (Ps. xix. 1): "The heavens declare the glory of God".

(4) But in the time to come the Holy One, blessed be He, ⁹will create them anew⁹, as it is written (Lam. iii. 23): "They are new every morning". And they open their mouth and utter a song. Which is the song that they utter? (Ps. viii. 3): "When I consider thy heavens".

9-9 *E* corr.: 'and will help them anew'

Maimonides, *More Nebukim*, vol. ii, ch. v, uses the same scriptural reference as the present verse (Ps. xix. 2) in support of his view, that "the globes are living and rational beings... and they serve their Master and praise and glorify him with great praise and mighty glorification, as it is written (Ps. xix. 2): 'the heavens declare the glory of God'". The idea of the planets and stars as living, acting and dominating gods is, of course, fundamental in Babylonian and, by influence therefrom, in Persian religion—accompanied by the conception of special rulers of the stars. In the *Pehlevi* literature the planets and stars are represented as demons or else as animated or ruled by demons. See *Bundahish*, iii. 25, xxviii. 43, 44, *Zad sparam*, ii. 10, iv. 3, 7, 10, etc. In Jewish remodelling the planet-gods naturally become planet-angels, whereas the conception of special angels as rulers of the stars, constellations etc. or of the whole of the heavenly bodies is uncommonly frequent. The 70 princes of kingdoms are sometimes identified with the planets and constellations, although more often they are represented as the rulers of them. 'The angels are the souls of the heavenly spheres' is a comparatively frequent dictum. The 'Ophannim are the angels who move the spheres, cf. note on ch. xxv. 5. The identification of the heavenly bodies with angel-princes or demons was also prompted by the astrological speculations. The archangels are identified with the seven planets or represented as rulers of the seven planets, thus preserving the old conception of the seven sidereal rulers from which the conception of the seven archangels is supposed to have originated. (See YR. i. 16 a.)

(6) But in the time to come the Holy One, blessed be He, will create them anew... and they open their mouth and utter a song. The creating the stars and planets anew is here explicitly connected with their character of song-uttering angelic beings. It is, moreover, supported by the scriptural reference which traditionally was used as basis for the speculations concerning the song-uttering angels, who also are said to 'be created anew': 'They are new every morning, great is thy faithfulness', Lam. iii. 23. See ch. xl. 4, *Chag.* 14 a, *Lam. R.* iii. 21, *Gen. R.* lxxviii. 1. The creation anew in the case of the angels is depicted as going on continually every day, whereas that of the stars is designed for the 'time to come'. The future world is sometimes represented as referred to in the said passage (Lam. iii. 23), cf. *Gen. R. ib.* and *Alph. R. 'Aqiba*.

NOTE. It is significant that there seems to be no remnant in 3 *En.* of the Gnostic idea of the planets and constellations as evil agencies, as enemies of the spirit and the spiritual world. Contrast e.g. the 'Seven Great Princes' and the 'Seventy-two Princes of Kingdoms' of 3 *En.* xvii. with the 'Seven' in *Mandaitic*. Vide also 1 *En.* xix. 13-16, xxi. 3-6. There are, however, indications that this idea was known at the time of our book. Thus the inimical rôle of the planets is in our book replaced by that of 'Uzza', 'Azza' and 'Azrael' (chh. iv, v), and the opposing angels in general. Possibly the present chapter is intentionally directed against the Gnostic (Parsic-Iranian) idea in question. (Cf. also Zimmern in Schrader, *Die Keilinschriften und das Alte Testament*, 8th ed., p. 459, and Reitzenstein, *Das iranische Erlösungsmysterium*, pp. 59 seq.)

CHAPTER XLVII

*Metatron shows R. Ishmael the spirits
of the punished angels*

R. Ishmael said: Metatron said to me:

(1) Come and I will show thee the souls ¹of the angels¹ and the spirits of ²the ministering servants² whose bodies ³have been burnt in the fire of *MAQOM* (the Almighty) that goes forth from his little finger. And they have been made into fiery coals in the midst of the fiery river (*Nehar di-Nur*). But their spirits and their souls are standing behind the *Shekina*.

(2) Whenever the ministering angels utter a song at a wrong time

1-1 *E* om. 2-2 so *E. A* om., but 3 *A* has a lacuna which represents 2-2 and is wrongly put there instead of before its antecedent word.

Ch. xlvii. As a sequel to the exposition in chh. xliii, xlv—the spirits of the righteous, the wicked and those not yet born—the spirits and souls of the song-uttering angels who have been burnt by the fire from their Creator (cf. ch. xl. 3) are here made the subject of treatment in the general scheme of the section: they are shown to R. Ishmael by Metatron who superadds divers explanations and informations.

The angels in question are those who have uttered a song in a wrong time or improper way, and therefore, as stated in ch. xl. 3, have been consumed by fire. The object of this chapter is apparently to show that this destruction by fire refers only to the bodies of the angels, whereas their spirits and souls 'return to their Creator and stand behind the *Shekina*'. (On the *real* object, *vide* Introd. sect. 15.)

Thus the nature and fate of the song-uttering angels who have failed in their duty are pictured in analogy with those of failing men. Yet there are a few differences between the representations of chh. xliii, xlv and the present chapter. Whereas in chh. xliii, xlv only the term 'spirit' (*něshāmā*) is used, the present chapter uses both 'soul' (*něshāmā*) and 'spirit' (*rūch*)—although practically synonymously. And whereas acc. to ch. xlv the punishment by fire is for the 'spirits', it is here the bodies only that are represented as destroyed in fire, the spirits (and souls) on the other hand are said to return to 'their Creator', i.e. to their abode behind the *Shekina*, thus rather reflecting the picture of the spirits of the righteous above the Throne in ch. xliii.

(1) the souls of the angels and the spirits of the ministering servants. The terms 'soul' and 'spirit' are here evidently synonymous. whose bodies have been burnt in the fire of *MAQOM*. . . made into fiery coals in the midst of the fiery river. The two traditions of the fire from God's little finger (ch. xl. 3) and the *Nehar di-Nur* (see note on ch. xxxiii. 5) as means of punishment of the angels, are here harmonized, see further vs. 2. but their spirits and their souls are standing behind the *Shekina*. Even here the two terms 'spirit' and 'soul' are best understood as being synonymous. The juxtaposition of 'spirit' and 'soul' is a mere repetition of that in the beginning of the verse.

(2) Whenever the ministering angels utter a song at a wrong time. . . they

or as not appointed ⁴ to be sung^{4 5} they are burnt ⁶ and consumed⁶ by the fire of their Creator and by a flame from their Maker,

A:

in the places (chambers) of the whirlwind, for it blows upon them and drives them

E:

in their place (= on the spot); and a whirlwind blows upon them and throws them down

into the *Nehar di-Nur*; and there they are made into numerous mountains⁷ of burning coal. But their spirit and their soul return⁸ to their Creator, and all are standing behind their Master.

4-4 E: 'and as soon as it has been sung'

5 A ins.: 'הַרוּחַן' (representing a

corr. reading 'רוּחַן', 'their spirit(s)')

6-6 E om.

7 E: 'mountains of

mountains' A has a lacuna: הַרִים...הַרִים, a sign of uncertainty in the text.

8 E: 'returns'

are burnt... by the fire of their Creator. Cf. on ch. xl. 3. and drives them into the *Nehar di-Nur*. This is to be understood as an harmonization between the view, acc. to which the song-uttering angels, when uttering the Song untimely or improperly, are consumed by a fiery stream from the little finger of the Holy One, and that, acc. to which the *Nehar di-Nur* is the place and medium of extinction of the angels. The latter view includes that represented in *Lam. R.* iii. 21, *Gen. R.* lxxviii. 1, which maintains that new angels are created continually to sing the song and then disappear—whither? answer: into the *Nehar di-Nur* from which they were created. there they are made into numerous mountains of burning coal. This should be compared with the statement of ch. xxxv. 5 seq.: the angels, until they acquiesce in performing the *Qēdushsha*, are changed into all sorts of lifeless, fiery substances,—by a 'whirlwind from before the Holy One' (cf. here). Cf. also 1 *En.* xxi. 3: "I saw seven stars of the heaven bound together in it (the place of punishment), like great mountains and burning with fire".

their spirit and their soul return to their Creator... standing behind their Master. This recalls ch. xliii, where the spirits of the righteous who have been created are said to 'return'. It implies that the spirits of the song-uttering angels like those of men are pre-existent before being manifested with bodies for the purpose of performing the *Qēdushsha* or singing hymns and songs. But in contrast with the case of men the punishment of the failing angels is assigned not to their spirits but to their bodies alone. That the permanent abode of the spirits of the angels, not only after the severance from their bodies but even in their pre-existent state, is the place 'behind the *Shekina*' may be hinted at in vs. 3: R. Ishmael sees 'all the souls of the angels and the spirits of the ministering servants' standing behind the *Shekina*. Such a view may have developed from a wish to harmonize the different traditions concerning the creation or origin of the angels, one maintaining their pre-existence or creation on the second or fifth day of Creation, the other their continual or successive creation daily. The first view would then be made to apply to the creation of the spirits and souls, the second to their bodily manifestation. In fact the wish to harmonization in this case is sometimes attested in cabbalistic commentaries, cf. the statement: 'the angels who are created daily, sing a song, and then perish, are those who were created on the fifth day; those who were created on the second day do not perish'. On the other hand the view that the angels continue to exist in spirit after their destruction in fire is explicitly refuted in *Hilkoth Mal'akim* (*Add.* 27199, fol. 123 a): "for the angels who have been burnt, there is no kind of continued life (or resurrection). It is not as with men, whose bodies die, their souls however are living on high and their spirits return to God—

(3) And I went ⁹by his side⁹ and he took me by his hand; and he showed me all the souls of the angels and the spirits of the ministering servants who were standing behind the *Shekina* ¹⁰upon wings¹¹ of the whirlwind¹⁰ and walls of fire surrounding them.

(4) At that moment Metatron opened to me the gates of the walls within which they were standing behind the *Shekina*. And I lifted up my eyes and saw them, and behold, the likeness of every one was as (that of) angels and their wings like birds' (wings), made out of flames, the work of burning fire. In that moment I opened my mouth in praise of *MAQOM* and said (Ps. xcii. 5): "How great are thy works, O Lord¹²".

9-9 ins. with *E*. 10-10 *E*: 'forthwith a whirlwind passed by' 11 emendated (cf. chs. xxxiv. 1, xxxvii. 2): כְּרִי instead of כָּנָף. 12 Emend. *E* quotes Ps. cxi. 2: 'the works of the Lord (are great)' *A* confuses Ps. xcii. 5 with cxi. 2.

for them there is continued life. Not so with the angels: they return to the *Nehar di-Nur*".

(3) who were standing behind the *Shekina* upon wings of the whirlwind and walls of fire surrounding them. This is of course not indicative of any idea of punishment being assigned to the spirits of the song-uttering angels. Cf. how acc. to ch. xviii. 25 the two high angels SOPHERIEL H' MECHAYYE and SOPHERIEL H' MEMITH are said to be standing on the wheels of the stormwind. The *Kerubim* acc. to ch. xxii. 13 are surrounded by 'columns of fire on their four sides and columns of firebrands beside them'. Acc. to ch. xxxiii. 3 'clouds of fire and clouds of flame compass the angels to the right and to the left'. Cf. also the Enoch-Metatron piece, ch. xv. 2.

the likeness of every one was as angels and their wings like birds' (wings). Although separated from their bodies of manifested existence, the spirits and souls of the angels have bodily form; cf. chh. xliii. 2 and xlv. 5 and note on the latter.

NOTE. The juxtaposition רוחות ונשמות occurs in *TB. Chag.* 12 ב, רוחות ונשמות שעתיד להבראות, but immediately preceding: נשמתן של צדיקים. Is this passage dependent upon our book, chh. xliii and xlvii? Also in *Mandaic* the juxtaposition of 'spirit' and 'soul' in a similar vein is quite frequent. On the spirit (or perhaps better 'soul') as the non-physical body of the soul (spirit) in *Mandaic* vide Reitzenstein, *Das iranische Erlösungsmysterium*, p. 35. Cf. *Introd.* section on 'the conception of spirit and soul'.

CHAPTER XLVIII (A)

Metatron shows R. Ishmael the Right Hand of the Most High, now inactive behind Him, but in the future destined to work the deliverance of Israel

R. Ishmael said: Metatron said to me:

(1) Come, and I will show thee the Right Hand of *MAQOM*, laid behind (Him) because of the destruction of the Holy Temple; from which all kinds of splendour and light ¹shine forth¹ and by which the 955 heavens were created; and whom not even the *Seraphim* and

1-1 ins. with *E. A* has a lacuna.

Ch. xlviii (A). Ch. xlviii (A) is an apocalyptic eschatological fragment, closely connected with that contained in ch. xlv. 7-10. Like the latter it uses the symbolical expression of the Right Hand of *MAQOM* as representing Israel and the Kingdom of Heaven on earth. The inactivity of God's Right Hand—its being laid behind him—is the symbol of Israel's oppression and sufferings among the nations of the world and the temporary suspension of the realization of the Kingdom of Heaven on earth. The deliverance of God's Right Hand is the deliverance of Israel and the establishment of the Heavenly Kingdom. Besides, God's Right Hand also represents God's activity for bringing about the deliverance, and is the instrument of the realization of the Kingdom.

Vss. 1-4 are in the frame of the present section: R. Ishmael is represented as shown the Right Hand of *Maqom* and sees the five streams of tears that go forth from its five fingers: it is bewailing the downfall of Israel. Vss. 5-10 on the contrary cannot in a strict sense be joined into that frame: without any transition we are there presented with a picture entirely eschatological and treating of the end of times that will see the final redemption: God himself will deliver His right Hand and by it work salvation for Israel and set up His Kingdom, the establishment of which will be marked by the appearance of Messiah and the banquet for the righteous in the restored earthly Jerusalem.

The fragment is distinguished by a more frequent use of scriptural quotations than the other chapters of the section and of the present book in general (with the exception of chh. xxiii and xxiv).

(1) the Right Hand of *MAQOM*, laid behind (Him) because of the destruction of the Holy Temple. The inactivity of God's Right Hand is here connected with the destruction of the Holy Temple. The cause of its continued inactivity is acc. to ch. xlv. 7-10 the sins of the wicked, here it is hinted that the dearth of saints and righteous in Israel accounts for its present downfall.

The destruction of the Holy Temple, the sign of the downfall of Israel, also implied the total suspension or cessation of the activity for the realization of the Kingdom on earth (the cessation of the activity of the Divine Right Hand), and this again was caused by the sins of Israel. The real catastrophe in the destruction of the Temple was the removal of the *Shekina* from earth, the presence of the *Shekina* in the Temple having made it the representative of God's Kingdom on earth. See *Lam. R. Proem.* 24. (God removes his *Shekina* from the Temple on account of Israel's sin, and this is the cause of the destruction of the Temple. 'I have no longer an abode on earth').

by which the 955 heavens were created. Cf. ch. xlv. 7: 'thy right hand that is behind thee, wherewith thou didst stretch out the heavens and the earth and the

the 'Ophanim are permitted (to behold), until the day of salvation shall arrive.

(2) And I went by his side and he took me by his hand and showed me (the Right Hand of *MAQOM*), with² all manner of praise, rejoicing and song: and no mouth can tell its praise, and no eye can behold it, because of its greatness³, dignity, majesty, glory and beauty.

(3) ⁴And not only that⁴, but all the souls of the righteous who are counted worthy to^{4a} behold the joy of Jerusalem, they are standing by it, praising and praying before it three times every day, saying

2 E: 'and'

3 A: 'great greatness'

4-4 E om.

4a lit. 'and'

heavens of heavens'. The 955 heavens are, acc. to *Masseket Hek.* iii, above the seven heavens, constituting the Divine World from which the Holy One goes down when manifesting himself in the 'Araboṭh on the Throne of Glory: "in the hour when the Holy One, blessed be He, descends from the 955 heavens and seats himself in the 'Araboṭh upon the Throne of Glory . . .". *Y. Ch.* s.v. *Mal'atim*, no. 98, derives the number 955 by gematria from the letters of *haššāmaim* (= 'the heavens', the final *mēm* counted as 600). Metatron alone of all the heavenly household can ascend into 900 of these heavens, but the remaining 55 heavens are the exclusive abode of the Holy One. Cf. *Lam. R.* Proēm. 24. In *Seder Gan 'Eden*, BH. iii. 139, the many heavens above the seven heavens are also connected with the 18,000 worlds, and both are conceived of as the impenetrable 'Jenseits' into which no one from the manifested universe, whether from heavens or earth can enter. "A multitude of heavens above heavens did the Holy One, blessed be He, create—and the(se) highest heavens have no measure and no place (but they are the place of the worlds, cf. the similar saying about God) . . . and no eye has seen these higher heavens except . . . God alone . . . and the 18,000 worlds (above the many thousands of worlds that are attached to and comprised in the seven heavens) have not been entered by any one save the Holy One, blessed be He, alone, as it is written (quoting Ps. lxxviii. 18, cf. note ch. xxiv. 17) . . . for there is none who knows them save H' . . . alone".

whom not even the Seraphim and the 'Ophanim are permitted to behold. The *Seraphim* and the 'Ophanim are apparently represented as the two highest classes of *Merkaba*-angels, in agreement with the angelological section (chh. xxv, xxvi).

(3) all the spirits of the righteous who are worthy and (i.e. to) behold the joy of Jerusalem, are standing by it. The spirits of the righteous have their abode in the Presence of the Holy One, as acc. to ch. xliii. The 'joy of Jerusalem' may refer either to the earthly or to the heavenly Jerusalem. The centre of the Messianic Kingdom in the end of times is acc. to vs. 10 the earthly Jerusalem. But the wording rather supports the interpretation of the expression 'the joy of Jerusalem' as referring to the heavenly Jerusalem: the spirits of the righteous are counted worthy and (are *novo*) beholding the joy of Jerusalem. For the conception of the heavenly City, and its different shades (the pre-existent Jerusalem, preserved with God in heaven; the heavenly city which is to descend on earth in the future age; "the heavenly counterpart of the earthly city, the eternal reality of which the literal city is but a shadow") in Apocalyptic, cf. 2 *En.* lv. 2, 4 *Ez.* viii. 52 (x. 26 seq., 54, vii. 26, xiii. 36), 2 *Bar.* iv. 2-6, Rev. xxi. 2, 9-xxii. 8 (Hebr. xi. 10-16, xii. 22, xiii. 14, 1 *En.* xc. 28, 29) and for a full discussion see BOX, *Ezra-Apocalypse*, pp. 198 seq. (further references given there). CHARLES, *Commentary on Rev.*, ch. xxi. 2, 10, BOUSSET, *Die Offenbarung Johannis*, 5 Aufl., 1906, pp. 453 seqq. The heavenly Jerusalem is, acc. to *TB. Chag.* 12 b, contained in *Zebul* (the fourth heaven), acc. to *Alph. R.* 'Aqiba, BH. iii. 21, in *Sheḥaqim* (the third heaven). Here it is perhaps

(Is. li. 9): "Awake, awake, put on strength, O arm of the Lord" according as it is written (Is. lxiii. 12): "He caused his glorious arm to go at the right hand of Moses".

(4) In that moment the Right Hand of *MAQOM* was weeping. And there went forth from its five fingers five rivers of tears and fell down into the great sea and shook the whole world, according as it is written (Is. xxiv. 19, 20): "The earth is utterly broken (1), the earth is clean dissolved (2), the earth is moved exceedingly (3), the earth shall stagger like a drunken man (4) and shall be moved to and fro like a hut (5)", ⁵ five times corresponding to the fingers of his Great Right Hand.

(5) But when the Holy One, blessed be He, sees, that there is no righteous man in the generation, and no pious man (*Chasid*) on earth, and no justice in the hands of men; and (that there is) no man like unto Moses, and no intercessor as Samuel who could pray before *MAQOM* for the salvation ⁶and for the deliverance, and for His Kingdom, that it be revealed in the whole world; and for His great Right Hand⁶ that He put it before Himself again to work great⁷ salvation by it for Israel,

5 E ins.: 'behold'

6-6 E om.

7 E om.

regarded as having its place in the highest heaven by the Throne, since there is probably the permanent abode of the spirits of the righteous.

(4) the Right Hand of *MAQOM* was weeping. Cf. *Ber.* 3 a: the Voice goes forth three times every day (night) in the ruins of the Temple, bewailing its destruction and the dispersion of Israel among the idolatrous nations, and *Lam. R. Proëm.* 24: God weeping on account of the destruction of the Sanctuary.

five rivers of tears...shook the earth...five times. The number 'five' is deduced from the passage *Isa.* xxiv. 19 seq. from the five repetitions in that passage of expressions conveying the same thing: the earth being shaken.

(5) This and the following verses contain an eschatological piece treating of the final consummation by God himself in the end of times. No effort is made by the writer to reconcile it with the frame of the preceding acc. to which *R. Ishmael* is standing by *Metatron's* side beholding the Right Hand of God.

when the Holy One, blessed be He, sees, that there is no righteous man in the generation, etc. The deliverance of Israel and the establishment of the Kingdom on earth was to have been brought about as a consequence of the intercessions and prayers of the righteous and pious among the Israelites, see vs. 8. As the ideal examples of intercessors in the past the writer points to Moses and Samuel, cf. vs. 6. The identity as final goals of the deliverance of Israel, the revelation of the Heavenly Kingdom on earth and the reinstating of God's Right Hand in its right position and activity is here expressed: who could pray...for the deliverance, for His Kingdom, that it be revealed in the whole world; and for His great Right Hand, that He put it before Himself again. '*Again*', i.e. 'as in the ancient days, in the generations of old' (*Is.* li. 9) when it wrought salvation for Israel by the Red Sea (*Is.* li. 10) or when it stretched forth the heavens and laid the foundations of the earth (*ch.* xlv. 7 and *Is.* li. 13).

(6) then forthwith will the Holy One, blessed be He, remember His own justice, ⁸favour, mercy⁸ and grace: and He will deliver His great Arm by himself, and His righteousness will support Him. According as it is written (Is. lix. 16): "And he saw, that there was no man"—(that is:) like unto Moses who prayed countless times for Israel in the desert and averted the (Divine) decrees from them—"and he wondered, that there was no intercessor"—like unto Samuel who intreated the Holy One, blessed be He, and called ^{8a}unto Him^{8a}, and he answered him and fulfilled his desire, even if it was not fit (in accordance with the Divine plan), according as it is written (1 Sam. xii. 17): "Is it not wheat-harvest to-day? I will call unto the Lord".

(7) And not only that, but He joined fellowship with Moses ⁹in every place⁹, as it is written (Ps. xcix. 6): "Moses and Aaron among His priests."¹⁰ ¹¹And again it is written¹¹ (Jer. xv. 1): "Though

8-8 E om. 8a-8a E om. 9-9 E om. 10 E adds: 'and Samuel among them that call upon His name' 11-11 E: 'and He says'

(6) then forthwith will the Holy One, blessed be He, remember His own justice, favour, mercy and grace: and He will deliver.... The final consummation brought about by God Himself is the burden of the whole fragment. The thought here is, that when the expectations for prayers and intercessions from the righteous in Israel are shown to be in vain, then God will support His work for the deliverance of Israel, i.e. the establishment of His Kingdom, by His own righteousness, merits and mercies: on their ground the establishment of the Kingdom by God Himself and alone will be justified—in spite of the lack of merits on the part of Israel.

Moses and Samuel. The interceding power of Moses with the Most High is a frequent theme in Rabbinic; it is especially attached to the narrative of the golden calf of Ex. xxxii (*TB. Ber.* 32 a, *Meg.* 24 a, *Ex. R.* xlvii. 14, *Num. R.* ii. 14, *Deut. R.* i. 2). Cf. also *Midrash Petirath Moshe*, *BH.* i. 121 (Moses says: Rather sooner let Moses and a thousand like him perish than that one of the people of Israel should perish!" *ib. BH.* i. 129: "Numerous times did Israel provoke me to anger, but he (Moses) prayed for them and placated me"). Cf. further *TB. Ber.* 7 a, *Yoma*, 36 b, *Baba Bathra*, 8 a.

The verse, Is. lix. 6, 'And he saw that there was no man' etc. is also in '*Othioth ha-mMashiach*', *BH.* ii. 60, used of the end of times, preceding the appearance of Messiah ben Joseph. and His righteousness will support Him. This re-echoes the latter part of the quoted passage (Is. lix. 6): 'his righteousness, it sustained him'.

Samuel... fulfilled his desire, even if it was not fit. The scriptural reference, 1 Sam. xii. 17, is to support the statement that God granted Samuel his requests, even when their fulfilment might not be in accordance with His own plan. To understand this the following part of the passage must be supplemented: "... I will call unto the Lord and he shall send thunder and rain, that ye may perceive and see that your wickedness is great... so Samuel called unto the Lord, and the Lord sent thunder and rain". The underlying idea is that God on this occasion interrupted the pre-determined course of events (implying a weather not destructive for the wheat-harvest) in favour of Samuel (sending thunder and rain).

(7) He joined fellowship with Moses, '*nizdawweg*': associated Himself with, revealed Himself face to face to.

Moses and Samuel stood before me" (Is. lxiii. 5): "Mine own arm brought salvation unto me".

(8) ¹²Said the Holy One, blessed be He¹² in that hour: "How long shall I wait for ¹³the children of men¹³ to work salvation according to their righteousness ¹⁴for my arm¹⁴? For my own sake and for the sake of my merit and righteousness will I deliver my arm and ¹⁵by it¹⁵ redeem my children from among the nations of the world. As it is written (Is. xlviii. 11): "For my own sake will I do it. For how should my name be profaned".

(9) In that moment will the Holy One, blessed be He, reveal His Great Arm and show it to the nations of the world: for its length is as the length of the world ¹⁶ and its breadth is as the width of the world. And the appearance of its splendour is like unto the splendour of the sunshine in its might, in the summer solstice.

(10) Forthwith Israel will be saved from among ¹⁷the nations of the world¹⁷. And Messiah will appear unto them and He

12-12 E: 'The Holy One, blessed be He, will say (in that hour)' 13-13 E: 'my children' 14-14 so E. A: 'as my arm' 15-15 E om. 16 E adds: 'from one end of the world to the other' 17-17 E: 'them'

(8) How long shall I wait for the children of men (E: my children) to work salvation according to their righteousness. The salvation was ideally to be brought about by the righteousness and merits of Israel (in particular by their proclaiming His sovereignty every day in their prayers), but in the present lack of righteousness in Israel God will depend only on His own merit and righteousness.

The expression, 'how long shall I wait for my children to work salvation', shows that 'the righteous and pious man' (vs. 5) of whose total absence from within Israel the writer is conscious does not refer to a desired leader—in spite of the fact that Moses and Samuel are chosen as examples of righteous intercessors—but to a whole class of saintly men whose prayers and intercessions would have had the effect of drawing the *Shekina* and with it the Kingdom of Heaven down to earth again.

The symbolical expression, 'the Right Hand' of the Holy One, is in vss. 6-10 changed into that of 'God's Arm'. To the writer these two terms are apparently synonymous, since already, vs. 3, the 'arm of the Lord' in Is. li. 9 and 'His glorious arm' in Is. lxiii. 12, are made to refer to 'the Great Right Hand' of God. The variance of expressions is merely a reflection of the phraseology of the scriptural passages referred to in the fragment.

(9) In that moment will the Holy One, blessed be He, reveal His Great Arm and show it to the nations of the world. The scriptural basis for this statement is given at the end of the following verse (Is. lii. 10): "The Lord hath made bare his holy arm in the eyes of all the nations". The revelation of the Arm is the revelation of the Kingdom but at the same time the Arm is the instrument for the realization of the Kingdom on earth.

its length is as the length of the world etc. Cf. ch. xxxii: God's sword 'like a lightning from one end of the world to the other'.

(10) Forthwith Israel will be saved from among the nations of the world—i.e. Israel's dominion will be established.

And Messiah will appear unto them and He will bring them up to Jerusalem. In contrast with ch. xlv. 5 this fragment apparently knows only one Messiah, the

will bring them up to Jerusalem with great joy. And not only that but

A:

they will eat and drink for they will glorify the Kingdom of Messiah, of the house of David, in the four quarters of the world. And the nations of the world will not prevail against them,

E:

Israel will come from the four quarters of the world and eat with Messiah. But the nations of the world shall not eat with them,

Messiah of the house of David; his role is to lead the dispersed Israelites up to Jerusalem. No Messianic wars bringing about the victory of Israel and the Kingdom are mentioned (contrast ch. xlv *ib.*)—on the contrary the actual consummation is to be effected by God Himself, through the aid of His Arm. Hence Messiah's role here is essentially passive: 'he will appear, be revealed to them'. Cf. 1 *En.* xx. 37, 38, lxii. 6, 7, 4 *Ez.* vii. 28 ("my Son, the Messiah shall be revealed, together with those who are with him"), *ib.* xiii. 32 ("then shall my Son be revealed"), 2 *Bar.* xxix. 3 ("it shall come to pass... that the Messiah shall begin to be revealed"), *Mysteries R. Shimeon B. Yochai, BH.* iii. 80 ("after that the Holy One, Blessed be He, will reveal to them Messiah, the son of David... Messiah will spring forth"), *TB. Sukka*, 52 b. In ch. xlv. 5 and 2 *Bar.* xl, on the other hand, the role of Messiah is decidedly active.

they will eat and drink (*A*)—Israel will come... and eat with Messiah (*E*). The Kingdom of Heaven as a feast is a well-known picture in the Gospels and Rev.: Matt. viii. 11, xxvi. 29, Luke xiv. 15–24, xxii. 16, 18, 30, Rev. ii. 7, iii. 20, xix. 9. For the banquet prepared for the righteous (with Messiah in the time to come) cf. 1 *En.* lxii. 14 ("And with that Son of man shall they [the elect] eat and lie down and rise up for ever and ever"), 2 *En.* xlii. 5 ("At the last coming they will lead forth Adam with our forefathers, and conduct them there that they may rejoice as a man calls those whom he loves to feast with him"), 2 *Bar.* xxix. 3, 4 ("Messiah shall then begin to be revealed... And *Behemoth* and *Leviathan* shall be for food for all that are left"), *Pirqe Aboth*, iii. 20 ("Everything is prepared for the banquet"), *Pesikta*, 118 b ("Behemoth and Leviathan are reserved for the feast of the righteous in the time to come"), *Pirqe Mashiach, BH.* iii. 76 ("Then [in the Messianic time] will the Holy One, blessed be He, make a feast for the righteous on Behemoth, Leviathan and the wild beasts of the field [Ps. i. 11, lxxx. 13]"), *Mysteries R. Shimeon ben Yochai, BH.* iii. 80 ("And Jerusalem will come down built and completed from heaven and Israel will dwell therein in safety for thousand years and will [sit and] eat Behemoth and Leviathan and... the wild beasts of the field [*ziz-ha-sSade*, cf. above, perhaps treated as a technical term]"). Cf. Bousset, *Rel. des Judentums*, 2nd ed., p. 327, *BOX, Ezra-Apocalypse*, p. 208.

To this conception is correlated that of the righteous in the future enjoying the (fruits of) the Tree of Life and spices of the Garden of Eden. Cf. ch. xxiii. 18, 1 *En.* xxv. 5, 2 *En.* ix, *Test. Levi*, 18, *Sibyll.* ii. 318, iii. 46, *Num. R.* xiii. 3.

(*E*) But the nations of the world shall not eat with them. Cf. and contrast St Matthew viii. 11, 12: "many shall come from the east and the west and shall sit down with Abraham, Isaac and Jacob in the kingdom of heaven. But the children of the kingdom shall be cast out into outer darkness". Cf. and contrast also Rev. xxi. 8 and especially xxi. 24, 27: "and the nations of the world shall walk in the light of it (the glory of God in Jerusalem) and the kings of the earth do bring their glory and honour into it... and there shall in no wise enter into it any thing that defileth..."

Jerusalem is here obviously the earthly City: the nations of the world are outside its precincts, even desiring to conquer it: (*A*) 'the nations of the world will not

as it is written (Is. lii. 10): "The Lord hath made bare his holy arm in the eyes of all the nations; and all the ends of the earth shall see the salvation of our God". And again (Deut. xxxii. 12): "The Lord alone did lead him, and there was no strange god with him". (Zech. xiv. 9): "And the Lord shall be king over all the earth".

CHAPTER XLVIII (*cont.*) (B)

The Divine Names that go forth from the Throne of Glory, crowned and escorted by numerous angelic hosts through the heavens and back again to the Throne—the angels sing the 'Holy' and the 'Blessed'

AEFGH: K:

(1) ¹ These These are the seventy-two names written on the heart

1 FGH begin: 'The Holy One, blessed be He, has seventy names that are explicit, and the rest that are not explicit are innumerable and unsearchable. And these they are. (*The names are missing.*) These are the names etc.

prevail against them. There is no idea of a new earth nor even of the heavenly Jerusalem coming down (although this is not actually refuted). Contrast the passage in *Mysteries R. Shimeon ben Yochai, BH.* iii. 80, cited above, and Rev. xxi. The tradition embodied in the present fragment thus bears marks of being rather old (or at least archaistic).

(A) *the Kingdom of Messiah, of the house of David.* There is no hint that the kingdom of Messiah here is conceived of as temporary. On the contrary it is from the context to be identified with the Kingdom of Heaven, the Kingdom of God, see the reference to Zech. xiv. 9: "And *H'* shall be king over all the earth". The Kingdom of Messiah as identical with the Kingdom of Heaven represents the final consummation, in approximately the same sense as that of the prophetic eschatologies from which passages are drawn as scriptural support.

Ch. xlviii cont. (B, C and D). The additional fragments now following, in the translation marked 'ch. xlviii B, C and D' resp. entirely break off the continuity with the preceding. Not only is the frame of the present section and of all the rest of the book altogether abandoned, but there is also no connection whatsoever with the immediately preceding part of the chapter. B, treating of the Divine Names, is introduced without reference to any spokesman (in the preceding parts: R. Ishmael-Metatron). C, a short Enoch-Metatron piece is laid in the mouth of 'the Holy One, blessed be He'. D, dealing with the 70 names of Metatron and the revelation of the treasures of wisdom to Moses, is partly attributed to Metatron (vss. 6, 7), partly in general narrative form.

Neither E nor A can be made responsible for putting these additional fragments in their present place. In A they follow immediately on the preceding without the slightest break in the text; hence it is safe to conclude that they were already extant as concluding parts of the book in the ms. that A copied. Since A is in no way directly dependent on E, nor *vice versa*, both must be traced back to a common source in which the said fragments had been embodied.

The same fragments, however, recur in printed editions of the well-known *Alph. R. 'Aqiba* (rec. A), letter 'Aleph (although missing in some editions). And the ms.

A EFGH: K:

are the names of the Holy One, blessed be He: ŠŠ, ŠeDeQ {righteousness}, ŠaHI'eL ŠUR {Is. xxxvi. 4}, ŠBI, ŠaDdIQ

in the text-critical notes referred to as *m-š* (*Lm*), explicitly states its indebtedness for its recension of C 3-10, 12 and D (abridged) to *Alph. R. 'Aqiba*.

A common feature of *A* and *E* on one hand and the editions of *Alph. R. 'Aqiba* on the other is, that in the fragment *B* the actual Divine Names, there referred to, are missing—and were apparently missing already in the MSS. on which the said printed editions of 'Othiyyot R. 'Aqiba were based (since they contain no express statement as to their being omitted in print, as in the case of the names of Metatron, fragment D, see text-notes, *ib.*).

In *Bodl. MICH. Add. 61*, fol. 13 a, however, following on a recension of the so-called *Sepher ha-qQoma* and *Seder Ma'ase Bereshith* (fol. 12 b) there occurs a fragment which no doubt is closely related to the present fragments—ch. xlviii b, c—although it represents only an abridged version. This fragment is embodied in text and translation in a separate column and is marked 'K' and כּ resp. The distinguishing feature of *K* is that it gives the Divine Names and thus supplements the other sources.

Cf. further note on ch. xlviii c beginning and introduction.

(1) (*K*): These are the 72 names... *FGH* count 70 'names that are explicit', and besides them innumerable names 'that are not explicit'. Ch. xlviii c 9, d 5, also refer to the '70 names of the Holy One'. The tension between the two tendencies of giving the precedence as holy or mystical number to 70 or 72 resp. is noticeable in the case of the Divine Names as well as of the Princes of Kingdoms (cf. note on ch. xvii. 3). In *Add. 27180*, foll. 39 b-61 a the Divine Names are given as 72, likewise in *S. ha-Chesheq*, where the (72) names are enumerated (*Add. 27120*, fol. 17 b). Cf. also the conception of the 72-lettered name.

that are written on the heart of the Holy One... The specific place of the Divine Names is in different sources differently designed. The names are sometimes represented as written on the Fearful Crown, sometimes on the Throne, sometimes on the forehead of the Most High. Cf. the quotation from *Alph. R. 'Aqiba* in note on ch. xxxix. 1. Here the Names are represented as written on the heart of the Most High. In the *Shi'ur Qoma* or *Sepher ha-qQoma*, treating of the various members of the Godhead, it is said: "on the heart of the King of Kings there are written 70 names" (*Bodl. MICH. 175*, fol. 18 b; *Bodl. OPP. 467*, fol. 59 a b, in the second recension, the *R. Ishmael version*; *Bodl. OPP. 563*, fol. 92 b, also in the *R. Ishmael-recension*).

The names enumerated here are on the whole identical with those of the *Shi'ur Qoma* passage just referred to. The resemblance between *K* (ch. xlviii b) and that passage is as striking as to prompt the conclusion that one is dependent on the other. Hence the *Shi'ur-Qoma* passage in its different readings may be used as a text-critical aid to the present fragment.

The enumeration of Divine Names given here presents the following different categories: (1) firstly, the various synonyms of the Divine Name, originally drawn from the O.T., may be singled out from the rest. They comprise the category of Divine Names known as 'the Ten Names'. They are here ŠUR, ŠADDIQ, ŠEBAOTH, ŠADDAY, 'ELOHIM, YHWH, YAH, CHAY, ROKEB 'ARABOTH... The omission of the important name 'EHYE 'asher 'EHYE is, however, remarkable. In the *Shi'ur-Qoma* passage this name occurs after ŠEBAOTH in all the readings. It is probable that it was originally included also in the present fragment. The addition of this name, moreover, gives the number 72 as the number of names, agreeing with the specification in the opening of the fragment. For the name 'EHYE 'asher 'EHYE cf. ch. xlii. 2. (2) Another category is that of various permutations of the four letters constituting the Tetragrammaton and the 'EHYE', i.e. 'Aleph, Yod, He, Waw. (3) A third category comprises the permutations of other letters, derived from O.T. names or passages

AEFGH: K:

for MeLeK Ha'OLaM {the King of the Universe},

or from the different systems of substitutions of letters. Lastly a couple of names consist simply of a name of a letter of the alphabet: *Yod*, *'Aleph* and *He*.

completed for *Mélek ha-'Olam*. The right interpretation of this is doubtful to decide. It seems that there was a tradition, according to which the explanation of the Divine Names or the series of the Divine Names was permissible as far as to the name *MELEK ha-'OLAM* (the King of the Universe). After that name it was not permissible to give explanations or discourses on the basis of the Names. Hence there arose the technical expression "*ad Melek ha-'Olam*". Cf. e.g. *Bodl. opp.* 658, fol. 101 b. The real meaning of the expression in question here is thus probably (instead of 'completed for etc.'): here the series is completed with regard to the rule 'up to the name *MELEK ha-'OLAM* but not further'.

Holy, Holy, Holy... Blessed be the Name etc... Blessed be He who gives power to the faint etc. The names are inclosed in the responses of the *Qēdushsha* and in other glorifications. This is also the case with the names in the *Shi'ur-Qoma* fragment which in all readings ends with the response 'Blessed'. The letters representing the responses 'Holy' (QQQ) and 'Blessed' (BShKMLW) are to be regarded as together forming actual Divine Names, acc. to the *Notarikon*-system. Some of the other names are perhaps also derived from the responses, e.g. BBB, KKK, KKL. As Divine Names—and not as private additions of praise by the writer—are also to be considered the *Notarikon*-complexes at the end of the enumeration. As a support for these statements may be adduced the following commenting remark on *Sépher ha-Qoma* in *Bodl. opp.* 658, fol. 102 b: "the Names written in this book (*Sépher ha-qQoma*, thus including the parallel to our passage) are derived from scriptural verses and some of them are deduced from the '*Blessed be the name of His glorious kingdom for ever and ever*'. For the early connection of the Divine Names with the *Notarikon*-system cf. the so-called *Prayer of R. Nehunya ben ha-qQana* embodied in the liturgy, the *Notarikon* of which forms the 42-lettered Name (known as אֵלֹהִים בְּכָל הַדְּלֵת יְמִינָהּ תַּתִּיר צִרְיֹה: וְנוֹ: אֲבֵן יְתִין קִרְעֵ שֶׁמֶן

(A) the names of the Holy One... that go forth... from the Throne of Glory. This echoes the idea represented in ch. xxxix. 1: 'the explicit names that are written with a flaming style on the Throne of Glory... fly off like eagles on sixteen wings'. See note *ad loc.* and cf. vs. 2 here: 'when they bring them back to their place, the Throne'. It is not actually stated here (as in ch. xxxix. 1) that the Names are written on the Throne, only that their place is before or by the Throne, and this in reality accords with the expression of *K* (and *Shi'ur Qoma*): 'written on the heart of the King of Kings, the Holy One', the 'heart' being in

AEFGH:

FG:

with honour ⁷ and pillars⁸ of fire ⁹ and cloud(s)⁹, and pillars of flame,¹⁰ and with lightnings¹⁰ of radiance and with the likeness of (the) chashmal.

with trembling and dread, with awe and shivering, with honour and majesty and fear, with terror, with greatness and dignity, with glory and strength, with understanding and knowledge and with a pillar of fire and a pillar of flame and lightning—and their light is as lightnings of light—and with the likeness of the chashmal.

1 here follows a short fragment of C, see *ib.* 2 E ins.: 'with numerous crowns of righteousness' 3 FG ins.: 'with numerous crowns of flashes' 4-4 E om.
5 EFG ins.: 'myriads of camps of *Shekina* and thousand myriads of' 6 EFG: 'hosts' 7 E adds: 'with glory and strength and with great joy and rejoicing' 8 so E. A: 'pillar' 9-9 E om. 10-10 E: 'and they send forth as it were lightnings'

Shi'ur Qoma, the symbolical expression for the centre of the Throne. The Names are probably here as in ch. xxxix. 1 conceived of as self-existent beings. This is confirmed by the fact that they are depicted as crowned 'with flaming crowns, crowns of chashmal, crowns of lightnings etc.' and as escorted like 'kings' or 'mighty and honoured princes' (vs. 2) by hosts of angels. As self-existent heavenly beings the Names are naturally pictured in the form of angels: crowned (cf. note on ch. xviii. 1, xvi. 2, xl) and winged (acc. to ch. xxxix. 1). Cf. vs. 2. For the conception of the Names as crowned cf. *Alph. R.* 'Aqiba, *BH.* iii. 24, where the letters of the Divine Name ('EHYE YHWH) are depicted as crowned: "and all of them (the letters) are crowned with crowns of brilliant flashes"; *ib. BH.* iii. 36: "At the hour when the Holy One, blessed be He, enters the *Merkaba*. . . then the letters on the *Merkaba* come to meet him with songs. . . and the Holy One, blessed be He, embraces them, kisses them and wreathes two crowns on each one of them: a crown of kingship and a crown of glory". Notice the hypostasized character of the letters (of the Divine Names) in the last quotation.

crowns of chashmal. . . with the likeness of chashmal. The *chashmal*, derived from Ezek. i. 4, is regarded as a celestial matter or substance. Cf. ch. xxxvi. 2 and note on ch. xxxiv. 1 (esp. the quotation from *Midrash Kōnēn, ib.*). From the same word is also derived the angelic class *Chashmallim* (cf. chh. vii and xlviii c 4).

thousand hundreds of power, i.e. angels. For this expression denoting angels cf. ch. xxxvi. 1 ('the *Nehar di-Nur* rises with many thousand thousands and myriads of myriads of power'). EFG in fact read 'hosts' instead of 'hundreds'.

(2) *And they give* ¹¹*glory unto them and they answer* ¹¹*and cry before them: Holy, Holy, Holy.* ¹² *And they roll (convoy)* ¹³*them through every heaven as mighty and honoured princes. And when they bring them all back to* ¹⁴*the place of* ¹⁴*the Throne of Glory, then all the Chayyoth by the Merkaba open their mouth in praise of His glorious name, saying: "Blessed be the name of His glorious kingdom for ever and ever".* ¹⁵

A:* 'their place' ¹⁵ *E* adds: 'And those names of the Holy One, blessed be He, that are not explicit, are innumerable and unsearchable. And these they are (!): *ADIRIRON*, Holy, Holy, Holy—I have written it in another place—*KPhTBIB*, that is *YaH*, the great name. They are written in another place'

Ch. xlviii (c). 1 *E:* 'thousand thousands'

(2) *And they give glory unto them and they answer and cry before them: Holy, Holy, Holy...* (and the Chayyoth say:) Blessed etc. The 'going forth' of the Names from the Throne of Glory is thus here, as in ch. xxxix. 1, connected with the heavenly performance of the responses of the *Qēdushsha*. Cf. vs. 1 (*K*). In ch. xxxix the performance of the *Qēdushsha* is treated as the central event to which the 'flying off' of the Divine Names was an accessory, here the representation is rather the reverse: the central interest is attached to the Names, the *Qēdushsha*-responses are even represented as addressed to the Names (just as the Divine Names are the objects of prayers and glorifications from the side of man).

they roll them. The 'rolling' is perhaps to be understood as referring to the names as angels mounted on wheels, cf. chh. xviii. 25, xxii. 7.

Ch. xlviii (c). This fragment is a version of the Enoch-Metatron tradition and exhibits traits very much resembling those of the Enoch-Metatron piece contained in chh. iii-xv of the present book. In fact, vss. 1-9 present the same details as those of chh. iii-xv, although in an epitomized form, vss. 10-12 add statements about Metatron's functions as establisher of the Divine decrees and as teacher of the prematurely dead children.

Both in *A*, *E* and the editions of *Alph. R.* '*Aqiba* the present fragment appears as a sequel to the fragment treating of the Divine Names (ch. xlviii B), and likewise in *K*. In the present context of *AE* as well as of edd. *Alph. R.* '*Aqiba* there seems to be no internal connection between the two. In *AE* the fragment, ch. xlviii B, in its present form gives the impression of being quite out of place. Its only appropriate place would have been by ch. xxxix (also treating of the Divine Names). And also in *Alph. R.* '*Aqiba*—although of a much looser structure than the present book—the reason for placing the fragment B in the context in which it is now introduced is not very apparent. The insertion of the fragment C, on the other hand,

AEFGH:

strong, I took him, I appointed him: (namely) Me-

K:

took him and I appointed him"—that is Enoch, the

is justifiable both as regards the present book and as regards the *Alph. R. 'Aqiba*: in the present book in view of its dealing with Enoch-Metatron, in *Alph. R. 'Aqiba*, letter '*Aleph*', on account of its beginning with '*Aleph*', representing the *Notarikon* (or mnemotechnical formula) for the three opening words אֶבְרַתִּי ('I made him strong'), לָקַחְתִּי ('I took him'), פָּקַדְתִּי ('I appointed him'), אֵלֶּף = אֱלֹהִים. The close connection that seems to prevail between the two fragments is hence neither to be explained by the assumption that they originally belong to *Alph. R. 'Aqiba* (and when borrowed by other writings having been regarded as a unit) nor by the same assumption applied to the present book.

The explanation is presumably to be found in *K*, the only version that preserves the enumeration of the Divine Names in fragment B, an enumeration which must be presupposed as the original part of the fragment. In this enumeration of the Divine Names we find the word '*Aleph*' as one of the Names (the 55th from the beginning). The '*Aleph*' as representing the sentence 'I seized him, I took him, I appointed him (*K*)' is now the starting-point and basis of the exposition of the fragment, ch. xlviii c. Hence it is possible to conjecture that the present fragment in reality is framed as a '*midrash*' (in the proper sense) on the Divine Name '*Aleph*'. On such a hypothesis the close connection between B and C would be easier to understand. Both B and C may have originated in the circles attaching great importance to the conception of Metatron, God's representative—whose names are based upon the names of his Creator (cf. vs. 9, chh. iii. 2, iv. 1, x. 3 seq., xii. 5). Among the Divine Names the '*Aleph*' was chosen here as symbolizing the relation between the Holy One and His vice-regent, Metatron. '*Aleph*' is represented as the symbol of God's sovereignty in *Alph. R. 'Aqiba*, in passages preceding the version of B and C. '*Aleph*' as the name or one of the names of the Godhead is also vindicated by the *Shi'ur Qoma* passage (cf. above on ch. xlviii B). '*Aleph, Beth*, etc., as symbolical for the Godhead, expressing different aspects of the Divinity, are dwelt upon in *TB. Shabbat*, 104 a. ('*Aleph-Beth* is explained as referring to the instruction in 'Intelligence', or the Tora.) As symbolical of Metatron the '*Aleph*' (and *Beth*) is expressly designed in *Hek. R., BH.* iii. 104; Metatron's name is there "*'Aleph, Beth*", *BB, GG, DD, HH, WW, ZZ, HH, Metatron* etc. (cf. ch. xlviii D)". The name '*Alpha*' seems also to have been ascribed to *Sandalphon* acc. to *Hek. Zot. (Bodl. MICH. 9, fol. 67 a)*—that angel occupying a position similar to or identical with Metatron's position (*scil.* in *Hek. Zot.*).

(1) I made him strong... in the generation of the first Adam. The word '*ibbartiv*', here translated 'I made him strong', is of a doubtful interpretation. With reference to the expression 'in the generation of the first Adam' it is probable that the word was to express some activity from God's part in regard to Metatron. But Metatron is evidently from the beginning of the fragment identified with Enoch. Hence the meaning seems to be to allude to God's special care for Enoch during his life on earth, among the men of the generation of Adam. *K* has the easier reading 'I seized him', which of course is a mere synonym for 'I took him', and like the latter expression is made to refer to Enoch's removal to heaven.

For the details of the present exposition cf. on the parallel passages of the Enoch-Metatron section, chh. iii-xv. when I beheld the generation of the flood: ch. iv. 3. I removed my *Shekina* etc.: ch. v. 13, 14.

For vs. 2 cf. chh. vi. 1, 3, iv. 3.

For vs. 3 cf. chh. x. 6, viii. 1.

For vs. 4 cf. ch. x. 3 seq. I appointed him over the Chayyoth, the 'Ophanim etc. Cf. the angelic classes enumerated, ch. vii. Metatron is here represented distinctly as the Prince of the *Merkaba*-angels. (Contrast the angelological section, chh. xix seqq.)

AEFGH:

taṭron, ²my servant² who is one (unique) among all the children of heaven. I made him strong in the generation of the first Adam. But when I beheld the men of the generation of the flood, that they were corrupt, then I went and removed my *Shekina* from among them. And I ³lifted it up³ on high with the sound of a trumpet and with a shout, as it is written (Ps. xlvii. 6): "God is gone up with a shout, the Lord with the sound of a trumpet".

(2) "And I took him": (that is) Enoch, the son of Jared, from among them. And I lifted him up with the sound of a trumpet and with a *teru'a* (shout) to the high heavens, to be my witness together with the *Chayyoth* by the *Merkaba* in the world to come.

K:

son of Jared, whose name is Metatron (2) and I took him from among the children of men (5) and made him a Throne over against my Throne. Which is the size of that Throne? Seventy thousand parasangs (all) of fire. (9) I committed unto him 70 angels corresponding to the nations (of the world) and I gave into his charge all the household above and below. (7) And I committed to him Wisdom and Intelligence more than (to) all the angels. And I called his name "the LESSER YAH", whose name is by Gematria 71. And I arranged for him all the works of Creation. And I made his power to transcend (*lit.* I made for him power more than) all the ministering angels. (*Ends K.*)

AEFGH:

(3) I appointed him over all the treasures and stores that I have in every heaven. And I committed into his hand the keys of every several one.

Lm (begins here):

(3) He committed unto Metatron—that is Enoch, the son of Jared—all treasures. And I appointed him over all the stores that I have in every heaven. And I committed into his hands the keys of each heavenly store.

2-2 so *FG*. *A*: 'the Servant'

3-3 *FG*: 'ascended'

AEFGH:

(4) I made (of) him the prince over all the princes and a minister of the Throne of Glory (and) the Halls⁴ of 'Araboth: to open their doors to me⁵, and (of) the Throne of Glory, to exalt and arrange it; (and I appointed him over) the Holy *Chayyoth*⁶ to wreath crowns upon their heads⁶; the majestic 'Ophannim, to crown them with strength and glory; the honoured *Kerubim*, to clothe them in majesty⁷; over the radiant sparks, ⁸to make them to shine⁸ with splendour and brilliance; over the flaming *Seraphim*, to cover them with highness; the *Chashmallim* of light, ⁹to make them radiant with light⁹ and to prepare the seat for me every morning

Lm:

(4) I made (of) him the prince over all the princes, and I made (of) him a minister of my Throne of Glory, to provide for and arrange the Holy *Chayyoth*, to wreath crowns for them (to crown them with crowns), to clothe them with honour and majesty to prepare for them a seat

A:

the honoured 'Ophannim...on the glorious Kerubim...the holy Chayyoth...the spark(s)''.

(I committed unto him) the secrets celestial and the secrets terrestrial (K:) I committed to him Wisdom and Intelligence. Cf. chh. x. 5, xi. 1, 2.

(5) I made him higher than all. Cf. ch. ix. 1. The measure here ascribed to Metatron, 70,000 parasangs, is unique to this fragment. As compared with the statement of ch. ix. 1 and the measures of the Throne of Glory acc. to ch. xxiii c the size here assigned to Metatron is remarkably small. Was the original reading perhaps 'surpasses all the others that are high of stature, with 70,000 parasangs'? The *Shi'ur Qoma* counts in thousands of myriads of parasangs in its description of the measures of the Throne (with the special units of measure prevailing in heaven) and *TB. Chag.* 13 a, in journeying distances of 500 years (the size of the world), cf. with that ch. ix. 1.

I made his Throne great by...my Throne of Glory. Cf. ch. x. 1.

(6) I transformed his flesh into fire etc. Cf. ch. xv.

AFGH:

(7) I made honour and majesty his clothing. Cf. ch. xii. 1, 2.
a royal crown...his diadem. Cf. ch. xii. 3. The measure of the crown, 500 by 500 parasangs, is an exclusive feature of the present fragment. In *Add.* 27199, fol. 114 a, the statement about Metatron's royal crown 'of 500 by 500 parasangs' is quoted from 'Ma'ase Merkaba.'

I called him the LESSER YHWH. Cf. ch. xii. 4. ...the Knower of Secrets, 'Wise in Secrets' is part of the name of Metatron acc. to *Hek. R. BH.* iii. 104. K. by Gematria 71: the numerical value of מְדַבֵּר is 71.

(8) I set up his throne at the door of my Hall. Cf. ch. x. 2. that he may sit and judge the heavenly household. Cf. ch. x. 4, 5, xvi. 1, 2.

And I placed every prince before him... Cf. ch. x. 4, 5, xvi. 1, 2.

(9) Seventy names did I take from my names. Cf. chh. iii. 2, iv. 1 and xlviii D 5 (contr. xlviii D 1).

Seventy princes gave I into his hand, to command...in every language.

AFGHLm:

unto them ^{18b} my precepts and my words^{18b} in every language:

AFGH:

to abase ^{19a} by his¹⁹ word the proud to the ground, and to exalt^{19a} by the utterance of his¹⁹ lips the humble to the height; to smite kings by his speech, ²⁰ to turn kings away from their paths²¹, to set up (the) rulers over their dominion as it is written (Dan. ii. 21): "and he changeth the times and the seasons, ²²" and to give wisdom unto all ²³ the wise²³ of the world and understanding (and) knowledge to all who understand²⁴ knowledge, as it is written (Dan. ii. 21): "²⁵ and knowledge to them that know understanding", to reveal to them the secrets of my words and to teach the decree of my righteous judgement, (10) as it is written (Is. lv. 11):

Lm:

and to abase the proud to the ground
and to exalt the humble to the height
and to smite kings
and to bring rulers low
and to set up kings and rulers

and he changeth the times and the seasons
he removeth kings and setteth up kings
he giveth wisdom unto the wise
and knowledge to them that know understanding

and I appointed him to reveal secrets and to teach judgement and justice,

18b-18b *Lm* omits 19 *FG*: 'my' 19a-19a ins. with *FG*. *A* om. 20 *FG* ins.: 'to subdue rulers and presumptuous ones by his word' 21 *G*: 'kingdoms' 22 *FG* cont. (*MT*): 'he removeth kings and setteth up kings' 23-23 *FG*: 'kings' 24 *FG*: 'are intent upon' 25 *FG* ins. (*MT*): 'he giveth wisdom unto the wise'

the 'Princes of Kingdoms' are meant. Metatron is here definitely designated as the ruler over the princes of kingdoms, cf. chh. x. 3, xvi. 2.

to abase by his word etc. As chief of the princes of Kingdoms Metatron has general executive and governing power over the world. Through vs. 9 he is essentially defined as a 'Prince of the World'. Cf. on chh. xxx. 1 and iii. 2.

I appointed him to reveal secrets and to teach judgement and justice. Expresses the tradition of Metatron's character as communicator of the heavenly secrets to man (cf. ch. xlviii D 7), the role in which he appears in the frame of the present book.

AFGHLm:

“so shall my word be that goeth forth out of my mouth; it shall not return unto me void ²⁶but shall accomplish (that which I please) ²⁶”. ‘E‘ešeh’ (I shall accomplish) is not written here, but ‘āśāh’ (he shall accomplish) ²⁷, meaning, that whatever word and whatever utterance goes forth from ^{27a}before the Holy One, blessed be He ^{27a}, Metatron stands and carries it out. ^{27b} And he establishes the decrees of the Holy One, blessed be He. (Here the Lm version of fragment c ends.)

[(11) ²⁸“ And he shall make to prosper ²⁸ that which I sent”. ‘Ašliāh ²⁹ (I will make to prosper) is not written here, but wəhisliāh (and he shall make to prosper), teaching, that whatever decree goes forth from before the Holy One, blessed be He, concerning a man, as soon as he make repentance, they do not ³⁰execute it (upon him) but upon another, wicked man ³⁰ ^{30a}, as it is written (Prov. xi. 8): “The righteous is delivered out of trouble, and the wicked cometh in his stead”].

(12) And not only that but Metatron sits three hours every day in the high heavens, and he gathers all ³¹the souls of ³¹ those dead who died in their mother’s womb, and the sucklings who died on their mother’s breasts, and of the scholars who died over the five ³² books of the Law. And he brings them under the Throne of Glory and places them in companies, divisions and classes round ³³the Presence ³³: and he teaches them the

26–26 A repeats dittographically 27 so FGLm (= MT) A: ‘ma‘aseh’
 27a–27a Lm: ‘the mouth of the Divine Majesty (Gebura)’ 27b Lm inserts ‘by
 himself’ 28–28 ins. with FG. A om. 29 FG: ‘mašliach’ 30–30 FG:
 ‘send him into punishment, but send them (the decrees) upon another, wicked
 man’ 30a FG ins. ‘instead’ 31–31 so FG. A om. 32 FG om.
 33–33 FG ‘himself’

(10) Metatron stands and carries it out... the decrees. Metatron standing and executing the Divine decrees represents another trend of traditions than those contained in the statement ‘Metatron sits and judges the heavenly household’. But both seem to have been connected already at an early time. So in a pregnant (and contradictory) form in *Rev. of Moses* (Gaster, *RAS’s Journal*, 1893): “Metatron, the angel of the Presence, stands at the door of the Palace (Hall) of God. And he sits and judges all the heavenly hosts before his Master. And God pronounces judgement and he executes it”. Cf. further on ch. xvi. 5.

(11) they do not execute it etc. This verse has no reference to Metatron, and it would seem that it does not belong to the Enoch-Metatron piece. It is a midrashic exposition on the continuation of Is. lv. 11, the scriptural passage used as support for the view on Metatron as executor of the decrees. It is omitted by Lm and may be regarded as additional.

(12) Metatron sits three hours every day... and teaches the prematurely dead. This is a well-known tradition with regard to Metatron, recurring in TB: ‘Aboda Zara, 3 b (in a slightly different form), Metatron sharing the function with God himself, and frequently in later writings, cf. e.g. YR. i. 31 b (quoting ‘Or haChayim).

Law, and (the books) of Wisdom, and Haggada³⁴ and Tradition³⁴ and finishes (completes)³⁵ their instruction (education) [for them]³⁵. As it is written (Is. xxxviii. 9): "Whom will he teach knowledge? and whom will he make to understand tradition³⁴? them that are weaned from the milk and drawn from the breasts".

CHAPTER XLVIII (D)

The names of Metatron. The treasures of Wisdom opened to Moses on mount Sinai. The angels protest against Metatron for revealing the secrets to Moses and are answered and rebuked by God. The chain of tradition and the power of the transmitted mysteries to heal diseases

(1) *Seventy names has Metatron which the Holy One, blessed be He, took from his own name and put upon him. And these they are:*

¹*YeHOEL YaH*, ²*YeHOEL*, ³*YOPHIEL* and ⁴*Yophphiel*, and ⁵*APHPHIEL* and ⁶*MaRGeZIEL*, ⁷*GIPpUYEL*, ⁸*Pa'aZIEL*, ⁹*A'aH*,

34 so FG. A plural

35-35 FG: 'for them the book of the Law'

Ch. xlviii (D). 1-1 In the printed editions FGH the names are left out except no. 105 'sagnezagiel' Lm: '(omission of names marked by a lacuna). Na'ar (= Youth, cf. chh. iii. 2, ix. 1). Ne'eman [= Faithful; again a lacuna] the LESSER YHWH [again lacuna] and he is called (NEGANZEGael)'

Ch. xlviii (D). This last fragment of the present chapter consists of mixed pieces of traditions only loosely bound together. The first, vs. 1, treats of the names of Metatron. Seventy names has Metatron. The number is given as 70 in accordance with chh. iii. 2, iv. 1, xlviii c 9. They are as in the passages mentioned, represented as a reflection of or based upon the Divine Name(s). The enumeration contains a larger number of names than the indicated 70. It evidently is a list of all the names that were known by the writer to be applied to Metatron. So also other enumerations, e.g. *S. ha-Chesheq*, ed. Epstein, and the commentary on Metatron's names, *Bodl. MICH.* 256, foll. 29 a-44 a, exceed the number 70.

As to the character of the names here enumerated the majority are angelic names of the usual pattern. Nos. 83 and 85-86 (= *Zehanpuryu*) occur as names of angels in ch. xviii. 8, 21 of the present book. Cf. also no. 82 with *Zaksakiel*, ch. xviii. 17, and no. 73 with *Simkiel*, ch. xlv. 2, 3. In Schwab, *VA.*, the following names of the present enumeration recur as names of individual angels attested in other writings, viz. nos. 1, 3 and 4 (companion of Metatron, *Zohar*, i. 149 a, Prince of the Law, *ib.* iii. 197 b), 5 (Prince of Understanding, *S. Raziel*, 45 a), 6 (Prince of the Presence, *Hek. R.* xvii. xxvi, cf. xxx), 19 (in a variant form), 20, 21, 22 (in many variants), 24, 25, 48, 49, 51, 54, 60, 63, 83, 84, 85-86, 96, 104 (1 *En.* vi. 7).

These names which probably are understood as representing different aspects and functions of Metatron perhaps indicate that Metatron was to be conceived of as combining all the different functions assigned to the special angels of the resp. names. Cf. YR. i. 56 b, referred to below.

Another group among the names enumerated consists of variants of the name

10PeRIEL, 11TaTRIEL, 12TaBKIEL, 13'W, 14YHWH, 15DH
 16WHYH, 17'eBeD, 18DiBbURIEL, 19'aPh'aPIEL, 20SPPIEL,

 76ŠaBKaŠBeYaH, 77QeLILQaLYaH, 78KIH HH, 79HHYH, 80WH,
 81WHYH, 82ZaKkIKYaH, 83TUTRISYaH, 84SURYaH, 85ZeH,
 86PeNIRHYaH, 87Z'Zi'H, 88GaL RaZaYYa, 89MaMLIKYaH,
 90'TTYaH, 91'eMeQ, 92QaMYaH, 93MeKaPpeRYaH, 94PeRISHYaH,

Metatron, e.g. nos. 23 (Metatron), 30, 31, 46, 47. This category of names forms part also of other enumerations of Metatron's names.

A few names are permutations of the letters of the *Tetragrammaton* and 'EHYE, after the pattern of the enumerations of Divine Names: nos. 13 = 16, (53), 80, 81. Cf. note on ch. xlviii B 1.

Lastly mention may be made of the specific appellations of Metatron: no. 17 'Ebed (= Servant) and no. 102 the Lesser YHWH. 'Ebed, 'servant', is expressly attached to Metatron in the Enoch-Metatron sections, chh. x. 3, xlviii c 1, the Lesser YHWH in chh. xii. 5, xlviii c 7. On the other hand it is noteworthy that the name 'Na'ar' which is given a prominent place in chh. iii and iv, is not included in the present enumeration, nor in those of YR. i. 60 b, S. Chesheq, Bodl. MICH. 256, foll. 29 a-44 a. It seems, however, to have been extant in the recension of which *Lm* is an abridgement. Besides, acc. to traditions appearing in *Zohar* (e.g. i. 223 b) and elsewhere, cf. YR. i. 56 a (from 'Pardes'), Na'ar is represented as equivalent with 'Ebed': "Metatron is called 'Na'ar' (= παῖς, Servant) because he does the service of a na'ar, he ministers before the *Shekina* and he distributes maintenance to all the companies of angels". (Metatron as 'na'ar' is also identified with Abraham's servant Elieser—through combination with Ps. xxxvii. 25 also called *Zaqen* and *Saba de-Beta*, the Eldest of his house: *Zohar*, i. 149 a et al.)

Among the other names may be of special interest: *Pisqon* (no. 48), occurring *Sanh.* 44 b, and by Rashi referred to Gabriel. It evidently denotes Metatron's office of deciding, passing judgement, cf. ch. xlviii c 8, 10, x. 5. This name also occurs in the form 'Ru'ach Pisqonith, the deciding spirit' (*Bodl.* MICH. 256, name no. 25); cf. *Pesiqtha* 27 b. *Senegron* (no. 22), i.e. 'defensor', whereby Metatron is indicated as occupying the same position as in Rabbinic is usually assigned to Mikael: defending Israel against the accusations of Satan, *Sammael*, or the representatives of the heathen nations, cf. on ch. xxx. *Gal Razayya* (no. 88) cf. *Razrazyah* (no. 68), i.e. 'Revealer of secrets' or 'knower of secrets.' Cf. ch. xlviii c 7, ch. xi. He is the mediator transmitting the celestial secrets to man. The name 'Galli-Razayya' is the sixty-seventh of the names enumerated, *Bodl.* MICH. *ib.* Related to this name is no. 91 ('depths *scil.* of secrets'). Noteworthy is

95*SePhaM*, 96*GBIR*, 97*GiBbORYaH*, 98*GOR*, 99*GORYaH*, 100*ZIW*, 101'*OKBaR*, the 102*LESSER YHWH*, after the name of his Master, (Ex. xxxiii. 21) "for my name is in him", 103*RaBIBIEL*, 104*TUMIEL*,¹ 105*Segansakkiel*², the Prince of Wisdom.

2 FG: 'Sagnezagiel' Lm: 'Neganzegael'

Mekapperyah (no. 93) which would seem to assign to *Metatron* an atoning function. *Yehoel* (no. 1) is as well in earlier as in later literature the name of the high angel of the 'Presence' (cf. BOX, *Ap. Abr.* x, xii). His name is composed of the letters of the Divine Name, hence the '*shemi begirbo*' ('my name is in him') could appropriately be applied to him. Cf. *Ap. Moses*, and in a later attestation e.g. *Add.* 26922, foll. 41 b seqq. (*Yehoel* on a level with *Metatron* as the Prince of the Presence). Lastly the *Tetragrammaton* itself appears as one of the names: no. 14.

For enumerations of the names of *Metatron* cf. *inter al.*: (1) *Hek. R.* xxvi. BH. iii. 104 (the centre of this enumeration are the 'eight names': *Margeziel*, *Giyothiel*, etc., *Yehoel*... *Sagnesagiel*): "In the camps of the holy angels they call him: 'Metatron, the 'Ebed YHWH' (!), the long-suffering and the merciful or: YHWH, wise in secrets etc." (2) *Hek. Zof. Bodl. MICH.* 9, fol. 69 b, containing nos. 6, 46, 84 here, and 'Uzyah, Menunyah, Sasnegaryah, 'Atmon, Sigron, etc. (3) *Hek. Zof. Bodl. MICH.* 9, fol. 70 a: "... the prince of the Host on high, the 'Ebed YHWH, God of Israel, blessed be He, longsuffering etc."; cf. *Hek. R.* above. The Divine Attributes (from Ex. xxxiv. 6-7, cf. 4 Ez. vii. 132 seqq.) seem to have been ascribed to *Metatron*, and the name 'Ebed' to have been referred to the 'Ebed YHWH' picture of Deutero-Isaiah. (4) *Shi'ur Qoma*, e.g. *Bodl. OPP.* 467, fol. 59 a, *Bodl. OPP.* 563, fol. 92 b: "Metatron, Ru^ah Pisqonith (cf. above), I^amon, Hegron, Sigron, Ma^aton, Mi^aton Ne^ati^a, Ne^ati^aph". (5) *YR.* i. 56 b from *Tiqqunim*. This passage makes an attempt at explaining the meaning of the names. *Metatron*, it says, is called by the resp. names acc. to the various functions he is performing. He is called 'Otmon' (from 'atam = stop, shut') when he seals the guilty in Israel, 'Sigron' ('sagar = shut') when he shuts the doors of prayers (i.e. the doors through which man's prayers are let into heaven), 'Pith^ahon' at the time when he opens for the prayers, 'Pisqon' (cf. above) at the time when he decides Halakoth in *Raqia'*, in the (celestial) *Beth Din*... And this angel is called by 60 myriads of names of angels (cf. above). He is called 'Chasdiel' when he does kindness to the world, 'Gabriel' at the time when 'gebura' is in the world, 'Sithriel' when he hides the children of the world under his wings from the angels of destruction. He is also called *Sidqiel*, *Raphael* and *Malikiel*. (6) *YR.* i. 60 b, from a 'midrash', with reference to *Alph. R.* 'Aqiba, hence possibly a fragment of a recension of the present verse. In fact, the following names of the present verse occur there: nos. 1, 3, 4, 5, 6, 11, 27, 28, 17, 30, 49 (variant), 21 (and variant), 22, 48 (as *Pisqonith*), 25. Of the remaining twenty names of that passage five recur in *S. ha-Chesheq* and the related commentary on *Metatron's* names, *Bodl. MICH.* 256 and a couple of the rest in the *Hek. R.* and *Hek. Zof.* passages referred to above. (7) *S. ha-Chesheq* (*Add.* 27120, foll. 1 seqq.). The following names of the present verse occur there: nos. 11, 17, 21, 25, 30, 41, 49, 51, 54, 58-59, 60, 61, 64, 75, 77, 90, 94, 95. (8) *Bodl. MICH.* 256, foll. 29 a-44 a, a treatise called *Shemoth shel Metatron*: 'The Names of Metatron', presenting 77 different names with commentary. The names and order of names are on the whole identical with or resembling those of *S. ha-Chesheq*. It may be noted that the 'Yephiphayah' of vs. 4 of the present fragment (the Prince of the Law who transmits the treasures of Wisdom-Tora to Moses) is included in this enumeration as a name of *Metatron*. *Sigron*, *I^amon*, 'Ebed, *Senegron*, *Galli-Razayya* also occur. The comments on the names consist in explanations by means of *Gematria*. The names are here also represented as signifying different functions of his. The name *Metatron* e.g. is by *gematria* 'Shaddai', for he said to God's world: it is enough ('שָׁפָא'); and *Metatron* carries the world upon the great crown, and he is

(2) *And why is he called by the name Sagnesakiel? Because ³all the treasures of wisdom are committed³ in his hand.*

(3) *And all of them were opened to Moses on Sinai, ⁴so that he learnt them during the forty days, while he was standing (remaining) ⁵ ⁴: the Torah in the seventy aspects of the seventy tongues, ⁶the Prophets in the seventy aspects of the seventy tongues, the Writings in the seventy aspects of the seventy tongues⁶, ⁷the Halakas in the seventy aspects of the seventy tongues, the Traditions in the seventy aspects of the seventy tongues, the Haggadas in the seventy aspects of the seventy tongues and the Toseftas in the seventy aspects of the seventy tongues⁷.*

(4) *But as soon as the forty days were ended, he forgot all of them in one ⁸ moment. Then the Holy One, blessed be He, called Yephphayah, the Prince of the Law, and ⁹(through him) they were given to Moses as a gift⁹. As it is written (Deut. x. 4): "and the Lord gave them unto me". And after that it remained with him. ¹⁰And whence do we know, that it remained (in his memory)?¹⁰ Because it is written (Mal. iv. 4): "Remember ye the Law of Moses my servant¹¹ ¹²which I commanded unto him in Horeb for all Israel, even my statutes and judgements¹²". 'The Law of Moses': that is the Tora, the Prophets and the Writings, 'statutes': that is the Halakas and Traditions, 'judgements'; that is*

3-3 G: 'all wisdom is committed' F: 'the wisdoms are all committed' 4-4 Lm: 'for they taught him them in forty days while Metatron was standing' 5 FG ins.: 'on the mount of the Torah' 6-6 ins. with FGLm. 7-7 Lm om. 8 Lm ins.: 'short' 9-9 FG: 'he gave them to Moses as a gift' Lm: 'he gave him all of them as before (i.e. he had forgotten them) as a gift' 10-10 Lm om. 11 here Lm ends 12-12 so ins. with FG, for the sake of the following context.

suspended from the finger of the Holy One, blessed be He; it is by gematria 'Shu^ah' (from 'shi^ah = prayer') for he is appointed to receive the prayers. The name *Tītrasyah* is by gematria 'Gash' ('come near', numerical value 303), for he comes nearer to the Throne than any other angel. It is by gematria 'ha-Rahmān' ('the Merciful'), for when the Holy One is wroth with his children, Metatron prays before him and turns him from the attribute of justice to the attribute of mercy (cf. ch. xxxi, Ber. 7 a) and so on.

(2) Sagnesakiel. On this name confer note on ch. xviii. 11. Because all the treasures of wisdom are committed in his hand. Cf. chh. x. 5, 6, viii. 1, xi, xlviii c 7.

(3) all of them were opened to Moses on Sinai. . . . The treasures of wisdom contain the heavenly Tora which was revealed to Moses. The narrative contained in vs. 3 and occurs in variant forms in *Ex. R.* xlvii, *Num. R.* xviii *et al.* It is also in a similar form extant in *Rev. Moses* (Pes. R. xx), *BH.* i. 60 seqq. and in this recension it recurs in *YR.* ii. 67 b, quoted from *Pirke Hekaloth*. Acc. to *Lm* and *vss.* 7 seqq. it seems that Metatron was the transmitter of the Tora to Moses. This would account for the insertion of the fragment here.

(4) he forgot all of them etc. 'when he began to go down and saw all. . . the angels of fear, of trembling, of awe and dread, then trembling seized him and he forgot all of them in one moment', acc. to *Rev. Moses*, *YR.* ii. 67 b.

the Haggadas and the Toseftas. And all of them were given¹³ to Moses¹⁴ on high¹⁴ on Sinai.

(5) These seventy names (are) a reflection of the Explicit Name(s) on the Merkaba which are¹⁵ graven upon the Throne of Glory. For the Holy One, blessed be He, took from His Explicit Name(s) and put upon the name of Metatron: Seventy Names of His by which¹⁶ the ministering angels¹⁶ call the King of the kings of kings,¹⁷ blessed be He, in the high heavens, and twenty-two letters¹⁸ that are on the ring upon his finger with which are sealed¹⁹ the destinies of the princes of kingdoms on high²⁰ in greatness and power and with which are sealed the lots of the Angel of Death, and the destinies of every nation and tongue²¹.

(6) Said²² Metatron, the Angel, the Prince of the Presence; the Angel, the Prince of the Wisdom; the Angel, the Prince of the Understanding;²³ the Angel, the Prince of the Kings; the Angel, the Prince of the Rulers;

(5) These seventy names are a reflection.... Cf. on chh. xlviii c 9 and iii. 2. The seventy names are here referred to the Most High as King of the kings of kings, probably indicating the aspect of rulership over the world, the seventy nations. When ascribed to Metatron they signify, as may be assumed, Metatron's character of representative ruler of the world, esp. over the princes of kingdoms; cf. the statement following: '(put upon Metatron's name... the twenty-two letters ... with which are sealed the destinies of the princes of kingdoms... and the destinies of every nation and tongue. Cf. also on chh. iii. 2, x. 3, xvi. 2, xlviii c 9 and vs. 6 here: Metatron... the Prince of the... princes, the exalted, great and honoured ones, in heaven and on earth.

the Explicit Name(s)... which are graven on the Throne of Glory. Cf. chh. xxxix. 1, xlviii B 1, xiii. 1, xli. 4.

and twenty-two letters.... The twenty-two letters are presumably conceived of as contained in the Divine Names that were 'put upon Metatron'. The holy letters constitute the Names, hence Names and letters are terms interchanged. with which are sealed. The creations and decrees of the Holy One are often represented as established by, sustained by or sealed with a Divine Name or a letter. Cf. *Alph. R. 'Aqiba, BH. iii. 24*: "All the Explicit Names are written with He etc. And heaven and earth are sealed with it (them) and this world and the world to come and the days of Messiah. And how many are the letters by which heaven and earth are sealed? They are 12... namely the letters of the Name 'Ehye' asher 'Ehye' (Aleph, He, Yod, He, etc.)". on the ring upon his finger. Cf. *ib. 25*: "they are sealed with the ring: 'EHYE' asher 'EHYE". the destinies of the... Angel of Death and the destinies of every nation and tongue. 'The lots, פְּתֵי, of the angel of death' presumably means 'the records of the ultimate fate of individuals and nations, kept with the angels of Death'; cf. *Alph. R. 'Aqiba, rec. B, BH. iii. 63*: "the Pittage, the records of destinies of every nation are kept with thee (the angel of Gehenna, *Negarsanael*.) but the Pittage of thine do not include the people of Israel".

²⁴the angel, the Prince of the Glory²⁴; the angel, the Prince ²⁵of the high ones, and of the princes²⁵, the exalted, great and honoured ones, in heaven and on earth:

(7) "H, the God of Israel, is my witness in this thing, (that) when I revealed this secret to Moses, then all the hosts in every heaven on high raged against me and said to me: (8) Why dost thou reveal this secret to ²⁶a son of man²⁶, born of woman, tainted²⁷ and unclean, ²⁸ ²⁹a man of a putrefying drop²⁹, the secret by which were created heaven and earth, the sea and the dry land, the mountains and hills, the rivers and springs, Gehenna of fire and hail, the Garden of Eden and the Tree of Life; and by which were formed Adam ³⁰and Eve³⁰, and the cattle, and the wild beasts, and the fowl of the air, and the fish of the sea, ³¹and Behemoth³¹ and Leviathan, and the creeping things, the worms,

(7) when I revealed this secret to Moses... the secret by which were created heaven and earth... Gehenna... the Garden of Eden... the Tora and Wisdom and Knowledge etc. all the hosts of every heaven raged against me. With this may be compared the fragment, containing protesting words of the angels, preserved in *Hek. R.* xxix: "This Secret may not go out from the house of thy treasures and the mystery of subtle understanding from thy treasures. Do not make flesh and blood equal to us".

Another parallel is found in *Hek. Zof. MICH.* 9, fol. 68 b: "Thou didst reveal secrets and secrets of secrets, mysteries and mysteries of mysteries to Moses, and Moses to Joshua etc. (cf. below)... and Israel made out of them the Tora and the Talmud...". So also here the Tora, Wisdom and Knowledge are said to be formed through the 'Secret'.

The 'secret' is hence the Wisdom or totality of Gnosis on which the written and oral Tora is based, and by which the whole manifested world is created. If brought into connection with vs. 2, 3 the 'secret' of the present verse refers to the contents of 'the treasures of wisdom' that were all opened to Moses on Sinai. What the inner essence of the secret is conceived to be is not immediately apparent here. The chain of tradition set forth in vs. 10 suggests that it was thought to be contained in the mystical knowledge or traditions of the secluded circles of 'the men of faith'. In the present connection it would seem that the ultimate constituent parts or elements of the secret is the 'Letters and Names'. By the letters heaven and earth are created, acc. to chh. xiii, xli, and wisdom, understanding etc. 'by which the whole world is established' (ch. xli. 3, cf. here). The Tora itself, either celestial or as transmitted to Israel, is constituted by the letters in the mystical sense. God's conferring His Names and 'Letters' on Metatron symbolize Metatron's initiation in the celestial gnoseis; thereby he is the Prince of Wisdom, the guardian of the 'treasures of Wisdom' (vs. 2). This view is supported by the following passage in *Alph. R. 'Aqiba, BH.* iii. 26: "God revealed to Moses on Sinai all the (Divine) Names, both the names that are explicit, the names that are graven upon the Crown of Kingship, the names graven upon the Throne of Glory, the Names graven upon the Ring on his hand, the names that are standing like fiery pillars round his chariots, the names that surround the *Shekina* as eagles of the *Merkaba*, and the Names, by which are sealed heaven and earth, the sea and the

the dragons of the sea, and the creeping things of the deserts; and the Tora and Wisdom and Knowledge and Thought and the Gnosis of things above and the fear of heaven. Why dost thou reveal this to flesh and blood?

dry land... the orders of the world and the orders of Creation... *Zebul*, 'Araboth, and the Throne of Glory, the treasures of life and the treasures of blessings...' (Graetz: "the secret=*Shi'ur Qoma*!" see Introd.). (10) And Metatron brought them out... to heal all diseases etc. The verse may be additional here, since it assigns to the 'mysteries' primarily a practical, magical import, whereas the practical interest in the mysteries is nowhere represented in the rest of the chapter nor the whole of the present book. Besides it is not a direct continuation of vs. 9: it refers to the transmitted lore as 'them', in the plural, vs. 9, speaking only of 'it', the 'secret'. The transmitted secrets are included in the revelations of oral Tora from the treasures on high to Moses, as in vss. 3 and 4. committed them to Moses, and Moses to Joshua. The chain of tradition is modelled on the characteristic pattern, attested in *Pirqe Aboth*, i. 1 (Moses received the Tora from Sinai, and transmitted it to Joshua and Joshua to the elders etc.). A close parallel to the present passage is found in *Hek. Zof. Bodl. MICH.* 9, fol. 68 b, already referred to above, "...revealed... the secrets... to Moses, and Moses to Joshua and Joshua to the elders, the elders to the prophets, the prophets to the *chasidim*, the *chasidim* to those who feared the Name, and these to the men of the Great Synagogue, and the men of the Great Synagogue to all Israel, and Israel made out of them the Tora". For chains of secret tradition cf. also 2 *En.* xxxiii. 10, *TB. Chag.* 14 b, *Yer. Chag.* 77 b, *Zohar*, i. 55 b, 58 b. to R. Abbahu and R. Abbahu to R. Zera.

men of faith ³⁸ (committed them) to give warning and to heal by them all diseases that rage in the world, as it is written (Ex. xv. 26): "If thou wilt diligently hearken to the voice of the Lord, thy God, and wilt do that which is right in his eyes, and wilt give ear to his commandments, and keep all his statutes, I will put none of the diseases upon thee, which I have put upon the Egyptians: for I am the Lord, that healeth thee". (Ended and finished. Praise be unto the Creator of the World.)

38 FG ins.: 'to the masters of faith'

R. Abbahu, Palestinian Amora, head of the Academy at Caesarea, second generation; R. Zera, the pupil of R. Abbahu, migrated from Babylon to Palestine. The sponsor of the present fragment apparently regards the 'secrets' as belonging to the Palestinian teachings. the men of faith presumably is the technical term for the select few by which the 'secrets' were supposed to be guarded before they received the publicity of the writer's time. They are referred to as a definite class among those who are to be inhabitants of the future world in *Alph. R. 'Aqiba*, BH. iii. 29. As receivers and guardians of the secrets 'the men of faith' appear also in *Zohar*, e.g. i. 37 b (בני מןותא). Cf. the frequent Mandaitic expression בהירא זירקא (Lidzbarski: "Männer von erprobter Gerechtigkeit") and in this connection especially Lidzb., *Mand. Lit.* 269³⁻⁶ (also 268⁹—269²): "*Hibil* blessed thee (i.e. the banner *shishlamel*) and committed (or gave) thee to the hidden Adam. Adam blessed thee with great blessing and gave thee to the *Bēhirē Zidqa* (men of proved faith, righteousness) to enlighten their appearance and cause it to shine exceedingly." Vide *Introd.* section 7. to heal...all diseases...as it is written (Ex. xv. 26) etc. The use of magical devices for purposes of healing was brought in connection with the passage Ex. xv. 26 already at an early time: the verse itself was used as a magical formula acc. to the denouncement of those 'who recite Ex. xv. 26 with a view to healing' attributed to R. Aqiba (recorded in *Ab. R. Nathan*, xxxix). Naturally the verse was also used to supply efficacious names (through permutations of the letters, acrostics etc.) for the same practical purpose. Cf. *Tos. Sabb.* 7, *Ab. Zara*, 67 b, *Mishna Sanhedrin*, xi. 1, *Tos it.* xii. 10, *Gem it.* 101 a; *TB. Sheb.* 15 b. For the 'secrets' committed to Moses containing 'רבר'י רפואה' cf. especially the *Ma'yan Chokma* (end), *Arze Lebanon*, 46 b seq.

A Short Course in Scrying

Benjamin Rowe
copyright 1997, 1998

Introduction

This paper was written in response to requests by participants of the “enochian-1” and “Praxis” internet discussion groups; it first appeared as a series of posts on those groups in early 1997. The current version has been slightly rewritten to enhance the clarity of the presentation, and to include a small amount of additional material.

The techniques described herein are adaptations of techniques I learned from two sources. The first of these is Mr. Brian D., who taught me the basic method many years ago. The second is Mr. Paul Solomon and his group, the Fellowship of the Inner Light, who had transformed that method into the foundation of their system of spiritual work.

Special thanks also to the “secret chiefs” of the Fellowship, for their direct and effective contribution to my work at a critical point. Some debts can never be repaid; the best that can be done is to pass on what was given.

Chapter 1.

Preliminary Considerations

To begin, the reader should understand that scrying is as much a learned skill as is reading or ice-skating. Persistent practice is necessary to teach the nervous system how to do it, even where the person has some innate talent. And as with other learned skills, there is a learning curve. At first there will be a long period when you don't seem to be making any significant progress. Then things will suddenly fall together and your practice will improve markedly in a short period, before leveling off again at something close to your highest level of skill.

It is best to expect a learning period of several months; don't expect quick results. It is likely that you will have occasional sessions where things work much better than usual. Don't be too encouraged by these, as it is likely that you will fall back to a lower level in the next session. When an improvement lasts for a week or more, you are justified in judging it a genuine advance.

Before getting to skrying techniques as such, I want to discuss the various kinds of distractions that can cause trouble for beginners, and suggest some solutions. Distractions can be generally classified in three types:

- Physical distractions. E.g., itches, muscle aches and twitches, etc.
- External distractions. House and street noises, other residents of your home, etc.
- Mental distractions. The internal "chatter" that we are all prone to.

Four of the traditional practices of yoga are intended to reduce and eliminate such distractions. Asana and (to a small extent) pranayama deal with physical distractions; pratyahara with external distractions, and dharana with mental distractions. These high-discipline practices are more than most people will need for our current purposes; perfection isn't necessary, just something "good enough". But those who find they do need more than the simple techniques described here may wish to look into them.

One tradition of asana practice seeks to eliminate physical distractions by training the body to remain in a single posture for long periods of time. The muscles are trained to maintain a state of tension such that the body remains locked into the chosen posture. The lack of movement reduces the intensity of the body's sensory signals to the brain. That is to say, repetitive, unchanging signals are completely processed at the pre-conscious level and are never brought to the attention of the conscious mind. Unfortunately, the traditional practice usually produces extreme pain for a long period before the muscles are trained to a given posture.

The same effect can be produced without the painful intermediate stage by achieving a state of profound physical relaxation. The nervous system doesn't care

why it is getting repetitive signals from the body, but only that it is so. Lack of movement engendered by relaxation is just as good at producing such signals as is lack of movement produced by muscle locking.

The practitioner should begin by choosing a comfortable posture that can be maintained without muscular tension. A sitting posture is recommended over a supine position, since relaxing while lying down easily leads to sleep. I preferred to sit cross-legged on a bed, with my back supported by a pillow against the wall. A high-backed easy chair is as good. All that matters is that you can be perfectly relaxed in the position without falling over.

A certain type of breathing can help promote relaxation. Take a deep gulp of air through your mouth, breathing from the belly; don't strain to take in the maximum. Hold it as long as is comfortable, and then release it, allowing the weight of your ribs and the natural tension of your diaphragm to push the air out of your lungs without forcing it. Relax for a moment at the end of the breath. Repeat for one minute, or until you start to feel dizzy. You will find that as you release the breath, all your muscles have a tendency to loosen. (This type of breathing is, perhaps not coincidentally, identical to the way one tokes a joint of marijuana.)

Once you are comfortable and have done the breathing, begin to work at relaxing each muscle in your body individually. Start with the scalp and face, and work your way down the body, working outwards from the spine at each level. Complete relaxation of any muscle will be accompanied by a pleasant "melting" sensation; try to make your whole body feel as if it has melted into a puddle of warm pudding.

By the time you have reached your feet, you will probably find that your face and scalp muscles have tensed up again, just from your concentration on the task. Start again at the top and work your way down, repeating as often as needed to get to a state of complete relaxation. When the physical relaxation is complete, try to extend it to the inside of your head as well, letting your awareness float in a warm internal glow.

While this exercise is simple and easily mastered, it is very important. Most of the other forms of distraction that practitioners encounter are accompanied by tension reactions in some part of the body. An extreme example is the "startle" reaction, in which some small noise triggers a state of high alert in your body; your heart suddenly jumps and increases its rate of beating, and every muscle in the body suddenly tenses. The parts of the mind responsible for these reactions and distractions are often not directly accessible to consciousness; but since body and mind influence each other, you can begin to subvert and eliminate the reactions by eliminating their physical manifestations.

The other aspect of controlling distractions is to understand the nature of the human mind. Each of us is not a single being, but a multitude. Our minds are composed of many "sub-minds", each with its own special functions. Some of these

(the visual sub-minds, for instance) are so intimately connected with our consciousness that we never notice their functioning unless something goes seriously wrong. Others act with greater independence. But while they are not accessible in the same way that, e.g., the language forming parts of the mind are, there is communication back and forth between them, and between them and the conscious mind.

The conscious self, the part of the mind that calls itself "I", is supposed to function as a mediator, arbiter, synthesizer and director between these other aspects of our being. Its function is to take the results of their work, compare and evaluate them, make use of them to act in the world, and direct their future work on the basis of the results obtained. When there are conflicts between different sub-minds, the conscious self is supposed to "keep the peace" by balancing their respective needs and viewpoints.

Unfortunately, human evolution is not yet at the point where the consciousness automatically functions in the best way possible. The capability for it to do so is there, but it requires training and experience to develop its proper relationship to the other sub-minds. Lacking that training, we too often end up acting as censors and tyrants rather than mediators, suppressing troublesome messages from these parts rather than dealing with them. And as often as they are suppressed, they leak up through some other channel, producing distractions and what Crowley called "breaks" in one's practice.

The key to permanently relieving both physical and mental distractions is to deal with them in the right way, immediately, as you become aware that they are occurring. You have to re-condition yourself into the desired response while the distracting sensations or thoughts are still present in your mind, and the physical tensions are still in your body. The sub-minds aren't particularly time-conscious; they understand what is happening "now" much better than events in the past or future.

Once you have achieved a state of physical relaxation, try just sitting in the relaxed state, with your mind not focused on any particular thing and with no intention of doing anything else for a while. It is a sure bet that after a few minutes, some part of your mind will take the opportunity to bring its own concerns to the surface, and you will start talking to yourself mentally about whatever it is concerned with.

As soon as you realize you are following some line of thought, stop and assess your body's state. Do the relaxation exercises until you are back in a completely relaxed condition. Then imagine that you are extending that relaxation to the part of your mind that brought up the thoughts you were thinking. Imagine that part enveloped and permeated by a warm, melting glow, while simultaneously you talk to it, telling it: "Relax, be still, there is nothing you need to do right now." Successful relaxation of a sub-mind through this procedure will produce a sensation of a sudden, mildly pleasurable energy-release in some part of your brain, sometimes accompanied by a sensation of "clearness".

It is likely that by the time you get one sub-mind quieted -- or even while you are still working on it -- another part will pop up with a different thought-train. Keep working on the first instance and ignore the new one. Don't be concerned if you don't get to everything that comes along during this practice; the things you miss are certain to show up again at a later time. Do one thing at a time and don't jump around. If you forget what you are doing somewhere in the middle of things, just start over with the relaxation exercises, and unfocusing your attention.

This same technique can be applied to external disturbances. The only difference is that when telling the disturbed sub-mind to relax, you tell it that the noise or other distraction is unimportant and not worth attention.

The Fellowship of the Inner Light teaches a slight variation on this method, which some people may prefer. They use a particular biblical (?) phrase when speaking to the sub-minds; it is almost a mantra in their version of this practice. The phrase is: "Be still, and know that I Am god." The intent of this usage is to assert the conscious self's rightful place as director and decision-maker, while at the same time acknowledging the existence of the sub-minds as quasi-separate entities.

And rather than just sitting with one's attention unfocused, they prefer that the practitioner use a mantra: "Eheieh", meaning "I am", the highest name of God in the Hebrew cabala. The mantra should be spoken internally, in a relaxed and casual manner; i.e., whenever the practitioner happens to think of it, rather than in steady repetition. I personally find that the use of a mantra tends to produce tensions rather than alleviate them, but this may not be the case for others.

Continued use of this simple practice will, over time, result in a profound reduction in the amount of verbal "noise" your mind produces, and make it substantially easier to concentrate on the visual images of the "magickal space" techniques to be described in the next section. You don't have to be proficient at this before going on to create a magickal space; the two efforts can be done in parallel, with each reinforcing the other.

Chapter 2.

Creating a magickal space

The foundation of all magickal work is the imagination. The part of the mind that creates images serves as a meeting ground between the conscious mind, the unconscious parts of our being, and the magickal universe at large. Visual symbols are the primary means by which meaning is communicated in the magickal worlds. The more flexible you make your imagination, the more effective your magickal work can be.

The best exercise I know of for developing the imagination is called "creating a refuge" or "creating a magickal space". I first learned the technique from a Vietnam War veteran. He said that the U.S. Army Special Forces taught it as a means of maintaining a sense of privacy, personal integrity, and personal space under conditions -- as in Viet Cong POW camps -- where these things would be deliberately denied to him by his enemies. When I encountered the Fellowship of the Inner Light a few years later, I found that they were teaching essentially the same technique for purposes of self-mastery and spiritual development.

Once you become practiced in the method it requires no special physical place; it is completely "portable" and can be done anywhere you can sit and relax for a moment. I have used it effectively in many "un-magickal" environments; e.g., a crowded government office, a busy commercial hotel, and in the middle of the Las Vegas COMDEX show.

The basic idea is very simple. You make up an imaginary world that you would enjoy being in, and then you imagine yourself walking around in this world. Not much different, in principle, than what people do in any ordinary daydream. But here the idea is to work for consistency, so that it appears the same every time you enter it, and to continually add details to it. With practice and familiarity this imaginary world will begin to take on a sense of being a "real" place, not real in the same way as the physical world, but having permanence and a separate existence nonetheless.

For purposes of illustration, I am going to describe one of my own magickal spaces, one that I no longer use. It is important to understand that at every step, the images you use should be those that feel right to *you*; this is to be your own private space and its contents should always come out of yourself and be meaningful to you. Your space may resemble mine in some aspects; if so, that is all right. More likely it will not, and that too is perfectly appropriate.

The steps described here should be done sequentially, but you do not have to be perfect at any step before going on to the next. Right from the beginning, you can work on several steps in a single session. However, in any given session most of your attention should be given to the earliest steps in whatever group you are

working on. As each step becomes more familiar it will take less practice to reach a satisfactory level and you can naturally give more attention to the next.

Establish the boundaries

Until your magickal space is well established, you should begin every session by affirming its invulnerability. Imagine that your space is invisible to any being but yourself, and is impenetrable by any force or person without your express, conscious permission. Think up an image of your space's boundaries that reflects these ideas. I imagine my magickal spaces as "pocket universes" that, seen from the outside, are so tiny as to be lost in the immensity of our own universe; seen from inside, they are as big as I want or need them to be. Other people I know of imagine theirs as surrounded by an adamantine shell, or by a science-fiction force field that "bends" all forces so that they bypass it.

Once you have the boundary of your space established, imagine yourself inside it. As you enter into it, feel all the pressures and demands of your daily life being locked out behind you, unable to follow you in. Imagine that they became completely disconnected from you at the moment you entered your space. They are not trying to force their way in; they can not even sense your space or yourself inside it and are drifting away without finding anything to attach to. Feel yourself to be totally safe, totally free of any connection to the mundane world.

This matter of feeling safe is very important. As in the relaxation exercises, the feelings you generate are the way you tell the unconscious parts of yourself, the "sub-minds", what to believe and how to act. As far as they are concerned, what you feel is what is real; tell them something often enough, and they will begin to cooperate in making it so, to an extent you could not manage with your conscious resources. If you feel safe and free from pressure in your magickal space, then in a short time you will actually *be* safe and free there.

Create the landscape.

Once you have established a secure space, take some time to think about the general layout of your world. Decide on the major features of the landscape, what sorts of buildings or other structures you want. Make a mental map of the areas in your world that you will want to visit most often. Once you decide on these major features, they should not change.

A few ground rules for inventing your world:

- You should keep the contents of your world absolutely private. Do not speak of them to anyone, and do not write them down anywhere. This first world is going to be your secret refuge and workplace, and much of its protection comes from no one knowing what it is like. Once you have

the technique down, you can build other magickal spaces for public purposes.

- Make your world much bigger than you could maintain by conscious use of your imagination. Create as many detailed areas as you want, but surround these with large regions whose landscape is only known in a general way, and whose specific content is unknown. These allow room for expansion, and for the "surprise me" exercises later on in this paper.
- Make the world a place where you feel comfortable and safe, so that it reinforces the impressions established in the previous step, and make it a place where you can have fun.
- You can populate your world if you wish, but DO NOT, under any circumstances, use images of living people in your world. For some time, all of the contents of your world will be a reflection of yourself in one way or another. There is a possibility that images of people will be "taken over" by some unconscious part of your mind as a vehicle of expression. If you use images of real people, the behavior of the image may carry over into your relationships with the real person, with ill effect.

Begin to build your world by picking one location within your "map" of it, and imagine yourself standing at that spot. Fix the relationships between various landmarks in your mind, and see them surrounding you at the proper angles and distances. Fill in the details to the degree that you would actually be able to see if you were standing at a similar spot in the real world.

For example, one of my magickal spaces has a landscape of hills and ravines covered by a thick forest like pre-colonial America. The central area contains a rather utilitarian castle on a low bluff overlooking a large river meadow. A small tame river meanders along one edge of the meadow. Various outbuildings and special-purpose areas are dispersed in clearings in the nearby forest.

I began to build this world by imagining myself standing in the meadow, looking north. I can see the green grasses, small colorful wildflowers, and an occasional cowpie nearby. Animal paths wander about, and a more direct human-made path goes from the bluff to the river. The bluff appears to be made of flaky granite, and the castle is right on the brink of it; a couple of winters' worth of erosion to the bluff might undermine the nearest wall. I can only see all of one castle wall from this position, and part of another; I can just barely see the top of a tower above the wall. All of the walls are made of dressed gray stone without mortar. Below the castle a tunnel or gate is cut into the bluff at the meadow level.

Turning to the east, I see that the bluff gradually reduces in height towards the south, coming down to the meadow somewhat south of my current position. I can see the end of a dirt road where it curves off the bluff and into the meadow. More forest rising behind the road implies that the ground beyond is higher. I know from my "map" that there is an area of grassland a mile or two in that direction.

Looking south I see that the river continues in that direction, and passes through a cut in the hills several miles away. Sunlight glares off the entire length of the river in that direction; a haze prevents me from seeing anything beyond the gap.

Looking west, I see that the river is fairly shallow at this point; small ripples cover its surface as if it were flowing over a gravel bar. The forest beyond it is edged with undergrowth, mostly honeysuckle bushes, which has been tramped down in places as if by animals coming for water. Paths leading into the forest quickly disappear into the shadows of the trees.

You do not need to fill in all the details of the scene consciously; in fact, it is better to encourage your imagination fill in many of the details by itself. Give it the general outline and let it show you what you should see in such a location. E.g., instead of trying to imagine each blade of grass and wildflower in the meadow, I would let my unconscious do so. If I liked what it did, I would send it a feeling of approval; if I didn't like it, I would tell it to try again, and turn away for a moment to let it change things.

Once you have the view from a particular location fixed fairly well, move to other nearby locations -- twenty to thirty yards away, for outdoor locations -- and imagine what things would look like from this new position. What does the changed perspective reveal that was hidden before? What was unseen from the previous location that can be seen now? (Note that perspective in magickal space is never quite the same as it is in the physical world, though the difference is hard to quantify; you will not be able to make things appear in precisely the way you see natural objects.)

Keep moving to new locations and build up an image of the scene as it would be seen at each one, until you have a good sense of the place as an actual "space". In the example space, I spent some time going to various positions in the meadow, noting that less of the castle was visible close to the bluff, more of it from farther away; noting the colored gravel in the riverbed, and how it made a ford across the river, etc. Then I went up to the castle and looked outward from positions on every side of it, seeing the wider landscape, filling in the positions of various known places in the forest, deciding how far the grasslands extended behind the castle, and so on. Do this for your own space.

When you have established the perspective from several locations, try moving smoothly between them, with the parallax of the surroundings changing continuously, as it does when you move about in the physical world.

At first you will find that your perspective on your world has a tendency to withdraw from the scene; your imagination will try to view it as if seen through a window, or on a movie screen, or like a tableau in a museum. Whenever you notice this has happened, firmly place your viewpoint back inside the scene, and fix it there by turning and looking at what is in every direction around you.

Also at first, your world will tend to be still and tableau-like, a frozen image. Once you have the appearance of things fairly well established, try bringing some action into the scenes. Let grass and tree limbs be blown by breezes, and hear the sounds the wind makes. Watch water move and hear the sounds it makes. Add some living creatures to the landscape and let them move around in ways appropriate to their natures.

It is also important that you stay relaxed throughout the exercise; doing this work should be like a relaxing daydream, not requiring fixed concentration and alertness. Do the relaxation exercise before starting each session, and do it again if you find yourself getting tense at any time during the session. Let your mind do as much of the work as it can without conscious decisions on your part, and encourage it to do more.

You should spend at least several weeks on this exercise, and as much more as you want. Take your time, relax, and give as much work as you need to filling in the details in all the important locations in your world. Indoor locations should be given as much time as the general landscape. The more thoroughly you do the work in these early stages, the more effective your scrying will be later.

Establish a body in the magickal space

The final step in the basic process of creating a magickal space is to create a body for yourself within that space. Up to this point in the exercises, you have been pretty much a naked viewpoint, seeing the world but not interacting with it to any great extent. Now you need to build up an image of your body within the space, and learn to use it. To do this, you need to develop a conscious awareness of the sensory surface of your body and of its kinesthetics, and duplicate these in an "astral" body. Judging from accounts by students at the Fellowship of the Inner Light, this part of the work gives people the most difficulty, and people will have widely varying degrees of success in it.

Before entering your magickal space, stand up and relax, preferably without any clothes or jewelry. Close your eyes and put your attention onto your skin. Even without anything touching you, you should be able to feel a sense of activity or sensitivity in your skin, a "readiness to feel". Note the way your body's shape is outlined by the skin sensations.

Next, plan out some series of movements that will move every part of your body in turn, through most of its range of movement. Tai Chi or Yoga exercises are good for this if you know them. Still keeping your eyes closed, go through the movements and note how each part of your body feels in different positions, and note what your kinesthetic sense tells you about the positioning of your limbs as you move.

Finally, do the same sequence again with your eyes open. This time pay attention to the way what you see of your body changes as you go through the

movements. Pay particular attention to your hands and arms. Try to consciously associate the image of your body with the sensations you get as you move.

Each of these three steps focuses on one of the major aspects of your body image: your sense of the body's boundaries, its internal sensations, and its appearance to your eyes as you interact with your surroundings. Under normal conditions, these sensations are usually unconscious, and are always secondary to whatever activity you are engaged in. You need to be aware of them consciously in order to build yourself a second body inside your magickal space. If you wish, you can do these exercises separately from your practice in your space, until you are ready to make your magickal body.

Once you are ready, sit down and go through the relaxation exercises, and enter your magickal space. Once there try to feel as if you have a body in the magickal space that feels exactly like your physical body, but is completely separate from the physical. Go through the three steps in your imagination, and try to duplicate all the sensations you had while doing them physically. By doing this you will, over time, gradually build up a perception of your "astral body" as a distinct entity, within and a part of your magickal space.

After finishing this exercise in each session in your magickal space, spend some time just moving around your world, touching and manipulating things as if they were physical objects. Things you touch should give sensations appropriate to their nature; bricks and stone should feel hard and rough; metals should feel cool, with textures appropriate to their shape; wood should feel warm and grainy, etc.

If you have rituals that you do on a daily basis (and haven't already started doing them in your magickal space) create a dedicated place in your magickal space for ritual work and begin doing them there as part of this practice. The regular, repetitive movements of ritual work will serve to reinforce your body image, and doing the rituals will begin to turn your space from a mere refuge into something useful for your magickal work. In particular, I would recommend practicing the Golden Dawn's pentagram and hexagram rituals; these will be important later, as a means of testing the visions you obtain when you start scrying.

Potential Problems

The most common problem people encounter in this part of the work is maintaining a consistent shape for their body. They find that even after long practice their head and arms will remain reasonably well defined, but the rest of their imaginary body has a tendency to blur into amorphousness. This is a reflection of the relative density of nerves in the physical body. Eighty percent of our sensory and kinesthetic nerves are in the head and hands; half of the remainder are in the upper chest, shoulders and arms. Our perception of the rest of the body is substantially more vague, and depends as much on sight as on direct sensory connections. When one tries to build an astral body, the mind tends to give each part of it a size proportional to the relative nerve densities.

This is really not so bad. You don't need legs in the magickal space, since you are moving yourself around by your volition rather than by pushing yourself with muscles. You *do* need arms and hands to do the gestures of magickal rituals, and lips and jaws to speak the words. If you find that after some practice you can't maintain a full body image, don't worry about it; just get by with what you do have, and imagine the rest of your body concealed by a robe or other loose garment.

The second problem people have is that their physical body twitches or moves when they try to move their magickal body. They unconsciously tense up the physical body, trying to "lock" it so that it won't follow along with the magickal body. This is a matter of lifelong habit, of associating the sensations of movement with the volitional act of moving your muscles. One has to disassociate the sensations from the volition, and another simple exercise will help.

In your magickal space, imagine you are standing with your arms held out in front of you, palms facing downwards. Now imagine that you are turning them so that the palms face upwards, but that you are turning them *entirely with your eyes*. That is, you see them turning over, and feel the sensations of the changed position, but you don't involve the part of your mind that moves the muscles. You should see your arms move without willing them to move. (In fact, you are directing your will through your visual centers instead of your muscles, but it should not seem like you are willing it, at first.)

The first few times you do this, your physical arms are almost certain to tense up into rigidity. When you notice this happening, stop and do the relaxation exercises until your body is loose again, and then go back to trying to move your magickal hands again.

Once you succeed in turning your astral hands over without tensing your physical hands, you should try moving the fingers individually. Curl each one over onto the palm, and straighten it out again. Again, do the relaxation exercise whenever your physical body tenses up. When you succeed in moving the individual fingers without tensing up, try various coordinated movements: clenching your fists, grasping objects, karate chops, Vulcan greeting-gestures, and so on.

The hands are the hardest part of the magickal body to separate from the physical, because major portions of our nervous systems go into controlling their movement. Once you have managed to dissociate movement of your magickal and physical hands, the rest of your body will be very easy, and can be done with similar exercises, if necessary.

Chapter 3.

Putting your magickal space to work

Concerning symbols

By the time you have worked the exercises in the previous sections for a few months, you will have established a solid foundation for all your future magickal work. Practically every magickal and meditation technique you will ever encounter is a variation or extension of the skills you have learned in building your magickal space.

Every person will have a different level of peak performance with these techniques. Only a rare few are able to enter wholly into the magickal space, and become entirely unconscious of their physical body; for these people, the end result of this work is indistinguishable from the classical descriptions of astral projection. Most people will find that a certain portion of their awareness remains "outside", and that the intensity of the sensations they have never attains the brightness and clarity of normal perception. I fall at the low end of this latter category myself; in my visions, colors are more implied than they are perceived directly, and most of the time I need to focus intently to perceive fine details.

Being able to put all of your awareness into the magickal space is not necessarily an advantage. What matters more is that you make the best use of the level of skill you do have. It is the meaning you can extract from your experiences, the insights you gain into yourself and the world, and the uses to which you can put them, that count the most. Bright and glorious visions are nothing, if they have no useful content or if your awareness and understanding are not (gradually but permanently) expanded thereby.

Having established the basics, in the following sections we are going to look at various exercises, all of which are forms of "scrying". Before going into the details, we need to consider -- in a general way -- the nature of the things that a person experiences while scrying.

Dreams, it is often said, are the realm of symbols; the same is true of scrying. But while the symbols of dreams are usually expressions of processes happening below the conscious level of awareness, the symbols seen in scrying are often (in an ideal world, always) the expression of processes and events occurring *above* the level at which consciousness resides. They are the lowest and most readily apprehended aspect of processes that the consciousness can not yet completely encompass. In a sense, the symbols you see are no more than anchor points; a convenient means by which your awareness is given a connection to something coming from outside its current scope.

The form of the symbol does not necessarily bear any direct relation to the nature of that to which you are being connected. Some symbols -- such as the Greek gods or the cabalist's Tree of Life -- have forms that directly reflect some aspect of the inner reality. Others have connections that are largely a matter of convention; they relate to particular aspects of the inner reality only because we habitually use them in such a way. The cabalistic color attributes are in this category. And others yet are seized upon to serve the needs of the moment, and have no particular meaning outside the context of the vision in which they occur.

But in all these cases, when a symbol is seen in a vision it has a direct connection to some magickal power, archetype, thought-form or entity. In order to get the greatest benefit out of your scrying, you must continually attempt to sense *beyond* the visible or verbal symbol, extending your awareness along the path it provides to apprehend that which it embodies.

Accomplishing this is a delicate task. The relaxation exercises described previously again become important, this time the portion of them dealing with quieting the mind. This is important in two ways: first, because the mind's internal chatter will tend to overshadow and conceal that which is being communicated through the symbol, and second, because active parts of the mind will attempt to twist the meaning of the symbol to fit with their own preconceptions.

This is especially the case where the practitioner has personal desires that relate to the information being conveyed, or where the person's self-image feels threatened. If your conception of yourself is dependent on a particular world-view and the information does not accord with that view, it will be almost impossible for you to see it clearly.

To reduce the possibility of this happening, you should also work consciously to develop a mental state of unattachment towards the content of your visions, a deliberate disregard for any personal significance they contain, and a deliberate refusal to evaluate the contents for truth or falsity. Critical evaluation of the results of a scrying session is definitely necessary, but the time for that evaluation is *after* the session is completed. While the work is proceeding, you should seek to be in a perfect state of suspended judgment; neither believing nor disbelieving anything that you see or sense, simply seeking to receive the symbols and their attached meanings precisely as they present themselves.

When using scrying techniques in magickal work, you are always trying to penetrate unknown "territory". Any work that can result in a spiritual advance will be, by definition, at least partly outside the scope of your current perspective and understanding. Like anything truly new, it takes the mind a while to adjust and be able to see it clearly. Further, the meanings behind any symbol can have many different levels; it may take a long time for these to "soak in" to your awareness, and the final significance may be very different from the first, superficial appearances. In my own work, it has sometimes taken up to a year and a half, with repeated exposures, before I fully comprehended what I was being shown. Thus, no

evaluation you make should ever be so definite that you cannot change it or add to it; all meanings should be tentative until they have been repeatedly reinforced by additional experiences.

I cannot give any assurance as to the manner in which the meanings attached to a symbol will appear to a particular person. I do not have enough information from other people to characterize any particular way as "typical". In my own case, they come in two or three ways, depending on the amount of power I have managed to invoke and how high above my normal level of consciousness I have managed to raise my awareness.

Usually, they appear as groups of thoughts or associations that appear simultaneously in my mind with the words spoken by some entity, providing a detailed context for the words; it is as if the thoughts out of which the entity produced the words were being transmitted along with the words. If I am looking at a visual symbol rather than hearing words, then they appear as sudden detailed "realizations" of what the symbol is intended to represent, which appear instantly in my awareness.

Less frequently, the hidden meaning of symbols appears as an entire story line. A long series of events appear in the mind as if some part of myself had been taken away, taken on a long tour through magickal spaces, and was then returned to the exact moment in time from which it had left. The complete tour is instantly "remembered" as it happened, even though for my conscious awareness, no time at all has passed.

In the rarest case, the meaning appears to my awareness as a tightly bound packet of mystical energy, which sits in my mind and gradually "unravels" itself into words, images, and meanings over a period ranging from minutes to weeks. These "packets" seem to be some magickal equivalent of books. Their content usually does not seem to be directed at the particular person receiving them, but rather at some general audience; and the content is often radically different from the perspectives and ideas the seer would normally be interested in.

You should not take these as being the only ways in which the meanings behind symbols can present themselves to you; you may find that some other means is more typical for you. But if you do happen to receive information in any of these ways, you can feel confident that you have had some success in this matter.

The Magickal Mystery Tour

The first scrying technique is very simple, and can be very entertaining. The results you get with this method can range from silly to sublime, from inconsequential to important, depending on the conditions of the moment. This method lets you acquire a feel for the ways in which your unconscious mind symbolizes things, and gives you some practice in doing so in a non-critical situation.

Enter your magickal space and re-affirm your safety there, using the method previously described. Then go to some familiar outdoor location in your space, and look around to establish your bearings and the relative positions of the other familiar regions.

Having done this, imagine that these familiar territories are surrounded by vast areas about which you know nothing as yet, in which anything at all might be happening at any given moment. Decide that you are going to take a walk and look around some part of those areas. Then look around you again, pick a direction, and start walking. As you move out of your familiar areas, don't try to imagine that you will find any particular features in the landscape, and don't try to look for any particular thing. Let the your imagination fill in the features of the areas you pass through without interference.

Move around in the wilderness until you find some interesting item. It might be an interesting natural feature, an object, a building, a person or animal. Examine the object or explore the building, remembering that everything unusual has some sort of meaning in a magickal space. If nothing clear comes to you, move along in the direction you were going. Sometimes it happens that several locations in sequence tell a story that isn't clear until you have been to all of them; other times, the first locations you come to are simply not very important.

Talk to a person or animal as if they existed independently of yourself; treat them with the respect and politeness you would give to any stranger you encounter in an isolated place. Try to maintain a friendly and unthreatening attitude no matter what the being does, and remember that since all this is taking place in your private world, you are perfectly safe. Don't try to script their actions, just let them speak and act spontaneously. Asking a being you meet to tell you about itself and what it is doing will nearly always get a positive response.

If the being does not acknowledge your presence, or does not respond to your queries, then watch what they are doing for a time, until you don't see any point in continuing to do so. Then move on to another location. If they do respond, then when you have run out of questions ask them if there is anything else interesting to see in the neighborhood, and follow any directions they might give you.

Usually such explorations will tell you something about yourself, your life-situation, or the current conditions surrounding your magickal work. It will all be in symbolic form, of course; the obvious meaning of the events won't always be their deepest significance. But once you understand the symbolism, the results usually turn out to be something useful or interesting, though not always important.

This method is particularly good for those times when you know something important is going on in the magickal side of your life, but you can't tell what it is. It is also very good for any situation where you aren't certain what questions you should be asking. To use the method in such a way, hold the idea that you need information or answers in your mind while you are picking the direction for your

tour, and try to sense the direction in which the answers lie; there will always be such a direction. Then go in that direction and continue finding interesting things until you feel like you have received all of the answer; this will usually manifest as a sense of relief or a reduction in some vaguely-sensed pressure. Then consider the things you have seen in relation to your current situation; the meanings they contain will usually provide essential clues you need.

The Magick Mirror

The next method is very close to a "classical" scrying method, save that the appurtenances are astral rather than physical. The method is capable of endless variations, of which only a few will be described.

Pick a convenient location within your magickal space. If you intend to scry in conjunction with invocations of magickal forces, a consecrated temple or magickal workroom would be the best place; otherwise, any place where you feel most comfortable and secure.

In that place, imagine a frame, as for a large mirror. This should be at least your own height, and of a width such that all of it can be in your field of vision at the same time. Now imagine that this frame contains a sheet of glass. But rather than being a silvered mirror the glass appears to contain a deep, transparent blackness; as if behind the glass were a void of indefinite extent.

You can get an idea of the correct appearance -- and construct a physical magick mirror at the same time -- by taking a piece of half-silvered or quarter-silvered glass (from a scientific supply house) and laying it on a piece of good-quality black velvet. Look into this under very low illumination and it will seem to have an indefinite depth; that is, it will seem to have depth, but you will be unable to tell exactly how deep it is.

You should at the same time imagine, and *feel* a total confidence, that the answer to anything you look for will appear to you in this mirror. Don't get bogged down in how the mirror does this, simply generate an emotional confidence that it works.

The basic use of this mirror is fairly simple. You hold the thought of what you want to know about in your mind, and then you imagine that the mirror is "tuning in" to that thought, using the thought to make a connection to some place where the answer can be found. Once you feel that the mirror is tuned, release the thought and wait in mental silence for images to arise out of the darkness of the mirror. And as with the "mystery tour" technique, the images will be accompanied by meanings that you will be able to "hear" or sense in your mind.

There are several variations on the basic method for different purposes. Once you get accustomed to the basic method, you can make use of those described or invent your own. As you come to be familiar with the method, your own intuition

will become a better guide to its use than any "official" technique; do not be afraid to experiment.

For psychometry, hold an object in your (physical) hand, and imagine that there is a link between it and the mirror. Then look to the mirror to reflect the "impressions" contained in the object. If it is an object that is connected by use to some person, you must specify that it is impressions of the person that you want, not impressions of the object itself; otherwise you may get some odd results. For example, I once tried to psychometrize a flint knife-blade, and got a geological history of the stratum from which the flint had come. Its connections to its rocky origins were stronger than its connections to the persons who had made and used it, and these came across most intensely.

You can also "psychometrize" a person -- give them a "life reading" or answer specific questions -- by holding their hands and looking to your magickal mirror to reflect impressions you get from their spirit. This is more difficult, takes more practice, and works best when you have no personal relationship with the person in question. It should never be done with people with whom you have an emotional entanglement of any sort.

To get basic ideas and meanings related to visual symbols, imagine the symbol drawn on the face of the mirror in glowing lines. Then imagine that you are pushing the symbol into the mirror, so that it recedes in the distance and eventually vanishes from sight. Sending the symbol into the mirror "tunes it in"; wait in mental silence for images to arise, and these will bear in some way on the symbol.

Magickal invocations can be used to enhance the power of the mirror. As an example, you might want to explore the nature of the element of Fire. You could begin by performing the Lesser Pentagram ritual to banish extraneous influences, directing that the banishing include the mirror. Then you could use the Greater Pentagram ritual to invoke the element of Fire. When you have a strong sense of the element's force being present, direct that force into the mirror. Simultaneously imagine that the force is not only tuning the mirror to the element, but is also charging it up and clearing the channels so that the mirror works with its best effect. Or alternately, you could request that the archangel or angel of the element appear to you in the mirror and answer your questions.

With any of these methods, the images you get will at first be vague and static. But with practice the images will sharpen, expand and become active, presenting whole landscapes and long story lines that dramatically present the answers you are seeking. The mirror will seem to become a window opening on the part of the astral plane that relates to your search.

Once you achieve this, the mirror can be used as a "gate", an opening through which you can travel directly to the plane being viewed, to experience events there first-hand. From the standpoint of initiatory magick this is the preferred mode of operation, since it immerses your awareness in the power you are exploring.

Immersion increases the potential for real and lasting changes in awareness and enhances your power to achieve insights and realizations from the invoked power.

To convert the mirror to a gate, imagine that the image in the mirror becomes three-dimensional, as if you were actually looking through a window at a real place instead of just seeing a picture of it. Then imagine that the glass of the mirror dissolves and vanishes while the image in the mirror remains in place. Or if it is easier for your mind, imagine that the glass is in fact a hinged window in a frame, and open the window.

You will usually find that unless your being is totally in tune with the force you have invoked, you will have some difficulty passing through the frame and into the world on the other side. The Golden Dawn's "Sign of the Enterer" will help to overcome the resistance. Stand just short of arm's length from the gate; raise your arms directly above your head, and then bring them down and forward with the fingers straight, while at the same time taking a step forward. Alternately, pull your hands back so that they are close to your body at shoulder level, and then extend your arms sharply forward while taking the step. Imagine that these gestures are punching a hole in whatever is resisting your entry, and that the momentum of your forward movement is carrying you through the gate and into the world beyond. If you still feel resistance once you are through the gate, repeat the gestures again.

Once you are through the gate, look around and make note of everything you see. Start with the major features of the landscape, then focus in on the details. If you have invoked the power correctly, you should see objects and events that reflect parts of the power's nature.

It is good practice to test the world you enter, and any beings you encounter, to ensure that they are in fact related to the power you invoked, and are of a good nature. The means of testing will be discussed in detail in the next chapter.

If you find that you have difficulty turning the mirror into a gate, or that the mirror won't give you images of complete landscapes and story lines, a variation on the magickal practice of pathworking will help. The practice as described below is halfway between scrying a simple symbol and doing a freeform exploration of an invoked force, and will thus assist in the transition between them.

Pathworking

The term "pathworking" is used for several different practices, ranging from simple meditations through programmed visualizations to visions and astral travel. What they all have in common is the use of symbols traditionally associated with the "paths" of the Tree of Life, e.g., the Tarot trumps. These symbols have been in use for long enough that stable regions reflecting their power have been established in the inner planes. By using the symbols in these practices the person connects to those regions and can learn something of the realities behind the symbols.

Preliminary Steps

1. Pick a visual symbol for the path you want to explore. Tarot cards are good starting points. The cartoon-like images of the Rider or Wang decks are preferable to detailed images like Crowley's deck; the bright, flat colors of these cards encourage your imagination to fill in the blanks. We'll use the Rider deck's "Fool" card as an example.

2. Review what you know about the correspondences of the card. Read what your available sources have to say about the card. Then go on to some unconnected activity for a while and let your unconscious absorb the information; let it make its own connections and conclusions without any effort by your conscious self.

Using the example card, what comes immediately to my mind: The Fool is generally attributed to the element of Air and the path of Aleph. In the Golden Dawn version of the Tree, the path of Aleph connects Kether with Chokmah. In Achad's version of the Tree, it connects Malkuth with Yesod. The Fool is a primal form of Air, more cosmic and less "earthy" than the Tarot suit of Swords. In the cabala, it represents both the "mind" or "intellect" aspect of being and the Yetziratic, "formative", or "Son" aspect of the IHVH sequence. In the Enochian elemental sequence it represents the creative Ideal manifested by the divine, which is the basis for further development and full manifestation through the other elements. In the structure of the planet Earth, it is the atmosphere which lies between the spirit-aspect of the planet's magnetosphere and the water-aspect of the oceans. And so on.

3. Study the card and note the details, and also note any connections that come to mind. Consider the figure in the card; what does his/her posture, gestures, expression, etc. say about his attitude and emotional state? Where does his attention seem focused? Try to get some idea of the type of personality being expressed.

Ex: The cliff on which the Fools stands seems to be colored using three of the Malkuth colors: black, olive, and russet. The Fool's boots are citrine, completing the foursome. The mountains in the background are in a Yesodic violet, with snowy tops reflecting the light of the Sun, which is colored in Kether's white. The sky, dominant in the picture, is an Airy yellow, slightly darker than the citrine of his boots.

The Fool's outer garment is green with ivy patterns, reminding me of the Green Man of Celtic mythology and Malkuth again. The lining is red, reminiscent of both Fire and the sexual energy of Mars. There are wheels embroidered on the garment, which brings to mind another card, The Wheel of Fortune, attributed to Jupiter, who is Lord of the Air. There are also Fleur-de-Lys on the garment, which are either Lilies (Malkuth, according to Crowley) or Irises (Yesodic by color and shape).

His inner garment is white, again suggesting Kether. A feather is mounted at the front of his hat, and its shape suggests the Uraeus serpent of Egyptian costume,

or the feather of Maat. He carries a rose in his left hand and a staff with a bag at the end (rather phallic) in his right.

The Fool's head is bent back, his eyes focused on something in the distance that only he can see. His posture is somewhat pretentiously "sensitive", the sort that you would see the French Sun-King use in one of his dances. Overall he reminds me of a Galliard poet of the 13th century, a noble's over-educated younger son, wandering and pretending to be a minstrel while eschewing mundane tasks. He is about to walk over a cliff. The dog at his heels seems either playful or trying to call his attention to his immediate danger.

You don't have to go into such detail as in the example; if you are just starting out in magick, you probably won't have the resources to do it. The important thing is to note the details, and try and interpret the figure's expression and posture, and the acts in which he seems to be engaged.

These first three steps are preparatory, and should be done before beginning the main part of the practices. Once you have done them, let the information float in your unconscious for a few hours or a day while you do other things. The idea is to gently focus the unconscious on the subject matter, and to let it absorb the information and ideas without your conscious interference. This makes it more willing to participate in the practices, and enhances its ability to make connections with the magickal region behind the card.

Main Practice

4. Sit down and do the relaxation exercises, as described in the earlier section.

5. Place the card in front of you so that you can look at it without straining your eyes or changing your relaxed position. Look at the card without deliberately focusing on any one point; let your eyes move from point to point within the picture in their normal scanning motion.

6. Now enter your magickal space and get your awareness firmly established there. Go to the place where your magick mirror is located and stand where you can view it head-on. Imagine the image from the Tarot card in the mirror, so that it completely fills the frame. Then look at the landscape in the picture; think of what it would look like if it were real and not just a cartoon image. Try to see the image as a three-dimensional world behind the glass of the mirror. Think about the parts of the landscape that are hidden beyond the window frame and fill them in. Keep the colors more or less the same, but fill in the details; build up a picture as if that world were a real place that you can see. Feel free to incorporate details of real places you have seen in your life. (But DON'T use real people as models for the figures.)

Ex: The mountains in the Fool card remind me of the Swiss Alps, violet-tinted rock with permanent snow-cover at their summits. I fill in the picture with the appropriate details of ravines, rockslides, etc. The cliff on which the fool stands

looks to me as if it is some sort of moss-covered granite, and the sharpness of the drop suggests that a glacier carved it out. The same glacier would have carved a deep, rounded valley below, and I imagine it being there, with fields of grass and copses of pine and fir trees, perhaps with the rooftops of a village small in the distance.

The Fool is walking towards the window, so there must be a trail down into the valley hidden behind the outcrop. I imagine a trail following a curve upwards around the end of the valley to end at the outcrop. I imagine this outcrop is on the side of a mountain the summit of which is somewhere to the right of the visible area.

7. Next, imagine that you have jumped through the window frame and are standing in the world you have been looking at, but at some moment in time just before the living figures of the card appeared on the scene. Don't try to move through the mirror, just make an instant transition to the place you just imagined. If you have to, build the landscape up again from scratch, but with you inside it.

Turn around and look at the surroundings from your new viewpoint; get a 360-degree view, and fill in the parts of the landscape that were behind your original view through the window. (The window, incidentally, should not be visible.) Imagine what your other senses would tell you if you were in a similar physical location, and add those in to your impressions of this place.

Ex: Looking back towards the window's position I note that the mountains get lower in that direction, and gradually fall off into rolling farmlands in the far distance. A large lake (like Lake Lucern or Geneva) can be seen just at the edge of visibility. I can see the mountain on whose side I stand, and can see directly the path I had previously imagined behind the outcrop. This path comes up to my current position, then curves around the mountain and up to a pass in the middle distance. Looking down into the valley below, I see that there are light clouds between the village and myself, giving the impression that I am in a world above the normal world. I can feel and hear the wind blowing around me, and there are faint scents of pine, grass, and flinty rock in the air, as well as an ozone-tinge of freshness. Faint sounds of human activity come from the village.

8. Spend some time getting the scene and your viewpoint firmly in your imagination. Don't worry if details change or shift, and don't expend any effort trying to change them back. Just get the major outlines and positions firm and let the small details change as they will. Think of how places look in your regular daydreams; often there is very little detail, and what detail is there is more often implied than actually seen. As you continue the practice over weeks or months, your unconscious will gradually learn to fill them in and keep them steady without conscious effort.

9. The next step is in some ways the most difficult, and in some ways the easiest. We have all had daydreams in which we invented face-saving dialogs for some embarrassing past occurrence in our life. In others, we imagined the events and interactions we would like to see happen in some future meeting, or some situation

we would like to be in but cannot attain in the mundane world. What you do in this step is basically the same. The only difference is that you shouldn't have any particular desire to control what the other characters say, but instead want to see what they say of themselves.

What you want to do is imagine a scenario by which the Tarot card's person arrives at the location where you are standing, and begins to converse with you. Using our example, you could think that you hear someone singing in the distance behind you. You turn and look down the trail, and see the fool climbing it, followed by his dog. He sings a cheery tune as he walks. As he comes close enough to hear you, you call out and wave to him; he looks up and waves back. He comes closer and steps onto the escarpment where you stand. He smiles and walks to the edge of the cliff, looking outwards. He stretches his arms and takes a deep breath of the fresh mountain air, and for a moment he is posed in exactly the way he is shown on the Tarot card. Then he turns to you and asks, "Where away, traveller?"

The idea behind this is to give your unconscious mind a credible reason for believing you to be in a situation where you can talk to the card's character. The part of your unconscious that touches the imagination doesn't believe in hypothetical situations; to it, things are either real or they aren't, but anything that is reasonably consistent will be accepted as real. This part of your unconscious mind plays the character's part while your conscious mind plays yourself. This same part reaches out into other parts of your minds and into the magickal realms and pulls in information to use in building its characterization.

9. Now that the character is present, you can ask him questions about himself, the various symbols of his clothing and appurtenances, and about the environment in which you find yourselves. Always act as if the character were a real person, independent of yourself. Treat him with the respect of equals; never act superior to him, and never, ever threaten. If he doesn't want to answer a particular question, don't press. Answer any questions he poses honestly, to the best of your ability. But at the same time don't allow yourself to be threatened or cowed; demand that your interactions be on a basis of equality and nothing else.

Another thing to remember is that in this phase of the exercise there are no wrong results, only results you don't understand. If something seems out of place with the nature of the card, don't reject it. Simply admit that you don't understand and file it away for later consideration. Generally you should follow along with whatever happens; there is no way you can be hurt, so there is no reason not to do so.

10. When you start to tire, or the character indicates he has had enough, it is time to end the exercise. Say goodbye to the character, turn and walk away until he is out of sight. Then "jump" back through your magick mirror and turn around; see the point you just jumped from through the mirror, even if this is not the same point that was there at the start. Then imagine closing the mirror so that it only shows its usual deep blackness.

After leaving your magickal space again, spend a few moments focusing your attention on various objects in your physical environment. Get up and walk around, stretch yourself, get a drink or go to the bathroom, or some other mundane task. Then sit down again and write down what happened during the exercise, in as much detail as you can. Record what was said, any ideas that happened to pop into your mind, and any changes in the scenery or movements into other scenes.

It sometimes happens that unexpected things occur during this exercise. For instance, the character might come up behind you and say hello while you are still working on the landscape. Usually it's best to go along with these happenings rather than insist on following the various stages in order.

Once the character appears, then the rule is to allow whatever wants to happen, as in the "mystery tour" exercise. You should not worry much about keeping the environs steady. The character might change the landscape to make a point, or introduce creatures or objects. Other things might appear and disappear spontaneously. You sometimes find yourself and the character transported to an entirely different scene. All these things are acceptable, and should be taken in a spirit of non-judgmental interest. Remember that the logic of visions is the logic of dreams, where such events are not at all unusual.

After you have worked with this method for a week or two using various Tarot images, try again to invoke a force using a ceremony and getting a response through your mirror. The practice of creating landscapes in the mirror should have overcome any difficulty in that regard. If you still have trouble, try combining the invocation with an appropriate Tarot image.

Chapter 4.

Testing your visions

It is usually a good idea to apply tests to the images you get in scrying, and to the various beings you might encounter. The ultimate test is, of course, a critical appraisal of the quality, consistency, and value of the results you get from your work; but that test can only be applied after the work is done. Other methods allow you to get some sense of whether there is something wrong at an early point in the session. You can then take appropriate efforts to correct the problem, or if necessary end the session and save your energy for another time.

The most reliable testing method makes use of the symbols in the Golden Dawn's Greater Pentagram and Greater Hexagram rituals. But the effectiveness of the method requires that you have some experience in performing those rituals, and in getting a good response from them. If you are not already experienced in their use, you should practice using them in your magickal space for a while before implementing this testing procedure.

A limitation of this method is that it only works where the powers being scryed are among the traditional, conventional powers used in magick. That is, the powers are elemental, planetary, or zodiacal in nature. Where the nature of a power is unknown, or it is of an inherently mixed nature, other methods must be applied.

After attaining a steady image of some magickal region in your mirror, you draw the invoking pentagram or hexagram appropriate to the power you invoked, using white lines in the air in front of you. Vibrate the god-names of the power a couple of times, then cast the symbol into the mirror. If the mirror is correctly "tuned" to the power, the pentagram or hexagram will be absorbed and will either have no effect, or will cause the image to become sharper and brighter. If the image becomes darker, becomes distorted, or breaks up entirely, then you know that something is wrong; you should banish and start over.

Similarly, if you have used the mirror as a gate and entered into some region, you should cast the appropriate symbol against any object that appears prominent in the area, and always against any being who appears to serve as your guide. In either of these cases, the being or object should show no effect, or should grow brighter, larger, or more solid as a result of the contact. A false or deceptive being will shrink, or its appearance will become distorted, or it will disappear.

No magickal being worth speaking to will ever object to being tested in this way. There is no reason that it should, since by doing the test you are, effectively, blessing it. If a being attempts to convince you to not do the tests, that in itself is a sign that something is wrong.

Note that you should always use the *invoking* pentagram or hexagram for tests, never the banishing versions. Using a banishing figure is the same as commanding the forces you invoked to disperse again, nullifying your efforts.

Two secondary types of testing seem to depend in some way on the magician having an *intent* that they will work correctly; there is no obvious reason why they should work, but they usually do, just the same. The first of these is the use of the G.D. grade signs; the second is the use of the Hebrew letters of the planets.

The idea behind the use of the Grade Signs in scrying is the same as their use in Masonic rituals and greetings. By displaying a sign to a spirit you encounter, you claim a right to the "secrets" of that grade and its corresponding element. The spirit should answer back by repeating the sign, thus showing that it is also qualified to deal with the secrets of that grade. (Illustrations of the Grade Signs can be found in Crowley's *Liber O*, and in Regardie's *The Golden Dawn*.)

If a spirit can perform the appropriate sign for the invoked element, this indicates that your vision is on-track. If the spirit cannot perform it, performs it improperly, or its form becomes distorted, this is an indication that something is wrong. However, it is not necessarily proof that you are dealing with a deceiving spirit, particularly if the same spirit has already passed the pentagram/hexagram test. Rather, it is more likely that there is insufficient magickal power present for your communication to be clear. The best course is to vibrate the divine names for the power you are invoking several times, and then repeat the signs again. Only if the spirit is still unable to perform the signs correctly should you end the session.

The exchanging of signs also contains an implicit agreement between you and the spirit being tested. That is, by doing this you are agreeing to deal with the spirit on a basis of equality and brotherhood, neither dominating that spirit nor being subject to it. You are also acknowledging that both of you are "members of the same fraternity", operating within the general community of workers seeking to align themselves with "god" (or with divinity in whatever form you conceive of it). You should never try to exchange signs with a being you know is not within that community, or with which you must maintain a position of dominance -- e.g., a demon or a true "elemental". Conversely, you should never try to dominate a spirit with whom you have exchanged signs; assume instead that it will assist you willingly and without coercion, and treat it with the same respect that you would wish it to give you.

It sometimes happens that in answering your sign, the spirit will add other signs after repeating the one you used. This is an indication that the spirit is of a mixed elemental nature, or is intrinsically of a higher "grade" than that at which you are working. As an example of the first case, if you were invoking an angel from one of the Lesser Angles of the Enochian Tablet of Earth, you would perform the sign of Set. The angel would be expected to respond with the same sign, but if it were an angel of the Lesser Angle of Fire, it might add the sign of Fire (the goddess Thoum-

aesch-Neith) as well. As an example of the latter case, a Senior from the Earth Tablet might add the LVX signs after the sign of Set.

The LVX signs are a special case. Their use indicates that the spirit is aligned with the divinity, is of a "good" character; but does not test for any particular elemental or planetary nature. They should be used in conjunction with the appropriate hexagrams for testing spirits related to the planets or zodiac, or in any case where the benevolence of the spirit is in doubt. All of the Enochian angels will be able to perform these signs, as will any Hebrew-system archangel.

There are no Grade Signs specifically associated with the planets in the Golden Dawn system; one must make do with the LVX signs, and these are usually sufficient. However, those who wish to assemble a set of elegant and effective planetary gestures for testing spirits should consult *Planetary Magick* by Melitta Denning and Osborn Phillips.

The final form of testing is, in my opinion, the least reliable. I do not use it myself, preferring to trust my own judgment. But I note it for those who might wish to experiment with it.

The Golden Dawn adepts acknowledged that in this sort of work there is always a danger that the visions one sees will not be a true reflection of the forces invoked, but may rather be constructions or projections of the seer's own mind and emotions. They classified these projections according to an association with the planets:

Type	Planet	Hebrew letter	Tarot Trump
Memory	Saturn (as Time)	ⴊ Tav	The World
Construction	Jupiter	ⴋ Kaph	Wheel of Fortune
Anger	Mars	ⴌ Peh	Tower
Vanity or ego	Sun	ⴍ Resh	The Sun
Pleasure	Venus	ⴎ Daleth	The Empress
Imagination	Mercury	ⴏ Beth	The Magician
Wandering thoughts	Luna	ⴐ Gimel	The Priestess

The theory is that if you suspect that one of these factors may be influencing your vision, you can project an image of the corresponding Hebrew letter or Tarot Trump into the scene. It will cause the scene to darken, diminish, or disappear if the scene is in fact the sort of projection you suspect it to be.

My personal feeling is that introducing extraneous powers into a vision in this way will cause more problems than they will solve. As well, it seems to me that invocation of a force related to a type of projection would tend to enhance the projection rather than eliminating it. However, this may not be the case for you; try it if you wish and see if it works.

Chapter 5. Scrying with the Enochian Magick

There are several considerations for Enochian magick work that do not apply to scrying using other systems. The first of these is the unquestionable power of the Calls and the divine and angelic names. As Crowley once said, other systems require effort; Enochian magick requires caution. While the power built up in any one session is almost never of an unmanageable level, some effects of the magick tend to accumulate across sessions; it is easy for an overeager beginner to get in deeper than he expects. Added to this, the powers invoked through the Calls seem to enter into the magician's field of awareness along some spiritual dimension that is outside those that we consider "normal". It seems to operate through some sort of meta-space with qualities different from those that compose the magickal worlds to which we are accustomed.

The consequence of these factors is that any work with the magick places a certain amount of stress on the magician's mind and body, and over-use can lead to various stress-related forms of illness. Anyone working regularly with the magick should keep an eye out for signs of this stress in himself. The typical symptoms are similar to those that come from abusing methedrine or "speed": nervous exhaustion, severely lowered immune response, inability to concentrate, hypersensitivity, hyper-reactivity, reduced judgment, flights of ideas, and paranoia.

One time in my own career, the stress of overusing this magick combined with an equally stressful mundane occupation to give me the worst of both the physical and mental consequences. On the physical side, I contracted mononucleosis, effectively stopping all my magickal work for six months or so. On the mental side, the changed viewpoint and loss of judgment caused me to make seditious remarks to a class of Federal employees I was training, resulting in the loss of my livelihood.

So caution is well justified. But with a few easy, obvious precautions, these problems can be avoided.

- Avoid using the magick at times when other parts of your life are unusually stressful. Try to arrange your affairs so as to reduce the social and economic pressures to the minimum level compatible with your needs.
- Get regular exercise; a healthy body handles stress better.
- Don't use recreational drugs while working with the magick. Aside from being illegal (jail is a poor place for magickal work), all of them add to the stress on your body. Most stimulants and sedatives also reduce your magickal sensitivity and ability to focus in your magickal space. Hallucinogens make you too sensitive, and reduce your level of control.
- Learn to pace yourself. When first starting out, allow a day or two between Enochian invocations to absorb the results and "cool off". Later, when you

get to the point where you need to accumulate power over several day's worth of invocations, allow at least as many days off after the series as you spent in working. Take longer vacations from the work every few months to keep yourself grounded.

The importance of pacing yourself cannot be overemphasized. When you begin getting significant results from your Enochian work, it is very tempting to keep going; the anticipation of even more amazing results drives you on. But the extra-dimensional or meta-dimensional character of these forces allows them to influence all levels of your being simultaneously, including many levels of which you are not consciously aware. The cumulative effects of this influence can cascade into a dangerous level of stress before you become aware of it. Regular intervals of rest and relaxation, and of immersion in the everyday world, are the only sure way to avoid the problems.

Another difficulty, which bears more directly on scrying, is that the Calls allow you to invoke a force without having any knowledge of its nature. In normal methods of invocation, one begins with a symbol or set of symbols, and seeks by their use to bring about the manifestation of the corresponding powers. The symbols you use define the power to be invoked. In contrast, the Calls produce a manifestation of power regardless of whether you comprehend their symbolic content.

Adding to the confusion is the fact that, from a perspective accustomed to the traditional magickal powers (i.e., the elements, planets, and zodiac) the nature of the invoked powers seems to change depending on the depth of one's penetration into their realms. Or from another angle, the Calls and Names open up different realms, depending on the level of initiation at which you are operating. On the most superficial level, they appear more or less "elemental" in nature, with an overlay related to the functions of the angels' specific offices. But at "deeper" or "higher" levels, this elemental aspect fades, to be replaced by a succession of increasingly complex and inclusive expressions that may bear little or no relation to the most superficial appearance.

Unless the magician supplies an explicit set of symbols to which the invoked powers can be anchored, the powers will tend to remain in an indeterminate state; a sort of "fuzzy cloud" of energy which contains all the power's potential expressions, but which manifests none of them explicitly. A visual symbol used as an anchor causes this indeterminacy to "collapse" into that aspect of the power which is most nearly similar to the symbol's innate associations. The congruency between the symbol and the invoked power does not have to be very great. It is sufficient that some small aspect of the symbol's associations be similar to the power's; the major associations of the symbol can be entirely inappropriate, and this collapse will still occur.

So the symbol the scryer uses will determine, in part, the initial manifestation of an invoked Enochian power; the scryer's expectations or preconceptions of the

power's nature will also be partially determining. This accounts for the documented fact that different magicians have produced widely varying -- sometimes even contradictory -- results using the system. However, it is my observation that with repeated invocations and scryings, the true nature of the invoked power will break through these initial, superficial expressions. The longer you work with a particular Enochian power, the more closely your results will accord with that nature, and the deeper you will penetrate into the realms to which the power connects.

Since penetration past the sometimes-deceiving surface manifestations takes time, orderly, methodical work habits are necessary to get the most value of your Enochian work. The fact that invocations have a cumulative effect can be used to advantage if you plan out your course ahead of time, and stick to it. The following suggestions will all enhance the effectiveness of your Enochian scryings:

- For every angel or other power that you invoke, do several scrying sessions. Allow time for a connection to be built up between you and the angel, and for your mind to become accustomed to its power.
- Work for an extended period solely with powers from a single Tablet. Or if you are working with the Aethyrs or the 91 Parts of the Earth, pick a set of contiguous Aethyrs or Parts and do them sequentially.
- If you are invoking single squares of some angelic or divine name, plan to do all the squares of that name in sequence.
- Plan out a series of invocations to investigate all the angels of a given rank within one of the Tablets, in some logical sequence. Complete the series before working with any other rank or Tablet. Alternately, plan out a series to investigate all the powers within a given Lesser Angle, in order of rank.

A Magickal Space for Enochian Scrying

Since the Enochian powers are so sensitive to the visual symbols in a magickal space, the general-purpose magickal space developed in the preceding sections of this paper is likely to be inappropriate for Enochian work. The profusion of objects with which you have populated the landscape would all tend to anchor the forces in unexpected or undesired forms. A space with a more neutral visual appearance needs to be used.

A woman I once met made a habit of surveying people about the appearance of their magickal spaces. Amusingly, nearly all the Enochian magicians she knew (most of whom did not know the others) had chosen to build essentially identical spaces for their work. This space might thus be considered an archetypal Enochian workplace. It consists of a broad, gray plain, surrounded at the horizon by low hills; both plain and hills are illuminated in a flat, sourceless light of relatively low intensity. Overhead, there is a night-sky filled with stars. The plain is large enough that the magician always has an unused area available in which to perform a new series of invocations.

The remaining few magicians in her survey had chosen to go even further in the direction of minimalism than this Michael Moorcock landscape. Their workspaces consisted solely of a clear space within a gray mist, with a featureless gray floor underneath, created *ab initio* for every invocation.

My feeling is that the plain has a slight advantage as a workspace. It allows for the establishment of long-term or permanent structures, useful for advanced works in which the invocations must be done in section, or for building a temple appropriate to a range of Enochian works.

Scrying Techniques for Enochian Magick

Both the "magick mirror" technique and its extension as a "gate" work as well with Enochian powers as they will with other, more conventional magickal powers. I would recommend that you create a new mirror in your Enochian workplace for every series of invocations that you do, and destroy it after completing the series. Since the Enochian powers tend to accumulate over time, this prevents residual forces from previous works from interfering with a new work.

However, as mentioned above, it is often necessary to provide a firm visual anchor for Enochian powers; you may find that the mirror technique is insufficiently exact, and only gives you confused or contradictory results. If that is the case, one of the following methods will be more effective.

The Golden Dawn devised a technique for using visualizations of truncated pyramids as the starting point for explorations of individual squares from the Tablets. This practical method has been proven by use to be very effective, precisely because it provides a well-defined symbolic "anchor" for the Enochian powers. I recommend this technique for beginners, both for this reason and because it tends to focus the powers into their most "earthly", most readily comprehensible form.

The basic technique is to build a truncated pyramid in your magickal space. The flat top has an area one-ninth the area of its base. The relative sizes of the top and bottom means the sides are tilted inwards at an angle of forty-five degrees. The letter of the square is visualized on the flat top. The sides of the pyramid are colored and labeled with symbols and images according to a complex system of attributes.

(The G.D. system of attributes is described in detail in Book Four of Regardie's *The Golden Dawn*; my own alternate system (which I believe to be a substantial improvement over the G.D. system) is described in the papers titled "Godzilla Meets E.T.". The pyramid method works very well with either system.)

The pyramid is visualized as being large enough to stand on the top. Having vibrated the appropriate Calls for the name in which the square lies, the magician then stands on top of the pyramid in his astral body, and vibrates the hierarchy of names. As he vibrates each name, the magician imagines the power of that name gathering around the pyramid.

When the last name is vibrated, the magician imagines that each side of the pyramid is gathering in the attracted energy, each taking the type appropriate to its attributes and symbols. This energy is seen moving upwards, being focused as it goes by the narrowing of the sides. The flows of energy from the sides reach the top simultaneously, run into each other, and form a beam of light shining up and outwards into the astral worlds, forming a path to a region of magickal space governed by the square. The magician then follows this beam in his astral body until a landscape or other scene forms around him. This scene should symbolize various aspects of the square invoked. From that point, the techniques describe earlier can be used to explore the region.

I prefer a variation of this method, in which the magician stands inside the pyramid. When the energies traveling up the sides reach the top, they come together on the letter and then shine *downwards* into the pyramid, illuminating the interior. The angel governing the square is invoked to visible appearance within the pyramid and is tested there. After testing, the angel conducts the magician to various scenes that illustrate the square's nature.

Since a session using this technique only explores the power of one letter of an angel's name, you only get a partial view of the angel's nature. To fully understand an angel, all the letters of its name should be explored in sequence.

When you wish to invoke all of an angel's powers at once rather than a single letter, it is more convenient to make your anchoring image something like a magickal circle, or a talisman sufficiently large that you can stand on it. A example design for such a circle would have the divine names superior to the given angel written around the rim of the circle. The name of the angel being invoked would be written within the circle, oriented so that it appears upright when you are facing in the direction in which you want the angel to appear. If the angel is associated with a particular magickal formula (e.g., Kerubic angels and the INRI formula) symbols appropriate to that formula might also be drawn within the circle.

Note that the intent of this figure is much closer in function to a talisman than to the traditional idea of a magickal circle. It is not intended to block off its interior from the exterior areas; you should feel free to move in and out of it at will. Nor is it intended to "contain" the invoked force. Rather, the idea is that the charged figure will serve to attract the attention of the appropriate being -- like putting a big illuminated sign saying "Land Here!" next to a runway. It also serves to condition the surrounding magickal space so that it reflects the nature of the invoked powers.

Vibrate the appropriate Calls several times; then enter the magickal space and create the circle. Vibrate the divine and angelic names, and as you feel the invoked power arrive, direct it into the lines and letters in the circle so that they glow and re-radiate the power to the surrounding environment. Keep vibrating the names until the intensity of invoked power seems to level off, then vibrate only the name of the being you wish to contact, asking it to appear before you. Vibrate the angel's name until it does appear; then apply the tests, and ask the angel what you will.

Calling the angel to the circle is my personal preference; I would rather have the guide take me to the place I want to go than go there first and find a guide afterwards. The reverse may be more comfortable for you. If that is the case, you can vary the above method by concentrating the invoked force in the circle instead of allowing it to radiate. Then imagine that the force is creating a "gate" to the power's magickal space; imagine the center of the circle opening up as the magick mirror did in the earlier exercises, so that you can step directly through it into that space. Or you can imagine that the powers form a beam of light shooting up from the circle, which you can ride to the powers' space.

Origins of the Magick: The Dee Diaries

The systems of magick now known as Enochian magick derive from the work of the Elizabethan scholar Dr. John Dee and seer Edward Kelly. Dee had a passion for discovering lost knowledge and spiritual truths; in particular he wanted to recover the wisdom he believed to be in the lost books of earlier times. Among these was the then-fabled Book of Enoch, which he apparently conceived as being a book describing the magick system used by that patriarch. Having come to the conclusion that worldly efforts would not lead to the wisdom he desired, he decided to apply himself to contacting divine sources. During the years from 1581 to 1585, Dee performed a long series of magickal operations to that intent. Kelly joined him in March of 1582, and was his sole assistant during the remainder of the work.

The method employed for these works was fairly standard for the time. Dee would act as the orator, directing fervent prayers to God and the archangels for 15 minutes to an hour. Then a scrying stone would be placed on a prepared table, and the angels were called to manifest a visible appearance therein. Kelly would watch the stone and report everything he saw and heard; Dee would sit at another table nearby and record everything that occurred.

Dee made multiple copies of these records. A portion of them, concerning the Angelic Calls, Tablets and *Liber Scientiae*, were acquired with Dee's library by Robert Cotton. This part was published in Casaubon's *A True and Faithful Relation*. The earlier portions concerning the Heptarchy and *Liber Loagaeth* came to light by a more roundabout means.

In the later years of his life, Dee apparently decided to conceal his magickal records in a hidden compartment of a large cedar chest he possessed. After his death the chest was purchased from his estate and passed through several owners. The hidden documents were not discovered until around 1662, and found their way into the hands of Elias Ashmole in 1672. Mr. Ashmole's collection passed eventually to the British Library.

According to Ashmole, about half of the hidden records were mistakenly destroyed by the discoverer's maid before efforts were made to preserve the rest. Despite this, the records for the 1581-1585 operations appear almost entirely intact.

The record of these operations is very detailed; so much so that it takes careful study to separate the spiritual "wheat" from the chaff. Much of the communication was important within the context of the operations, but has no direct bearing on the systems of magick being presented. Of the rest, there are long periods of communications that, in retrospect, seem to have no purpose but to hold the magicians' attention on continuing the operations. During these periods the angels would present colorful visions, portentous prophecies, and angelic gossip, but very little in the way of solid information. Additionally, the reader must deal with side-excursions into apocalyptic religion, Elizabethan politics,

Dee and Kelly's personal problems, and various irrelevant queries that Dee insisted on inserting into the work.

Chronologically, Dee and Kelly's work divides into three highly productive periods separated by months in which nothing of particular value was received. The material received in each period generally stands on its own, and is only loosely related to that in the other periods. In the strictest interpretation, only the material from the third period qualifies as "Enochian", but the term is often applied to all of the work.

Period one: The Heptarchia Mystica

The first system of magick given to Dee was the *Heptarchia Mystica*. This is a self-contained and moderately complex planetary angel magick, similar in style (but not in content) to various "Solomonic" grimoires of the day. The full record of its presentation can be found in Dee's *Mysteriorum Libri Quinti*; a working grimoire, composed of Dee's extracts from that record, is known as *De Heptarchia Mystica*.

The presentation of this magick was remarkably sequential and orderly, compared to later parts of the work. The necessary physical equipment was described in detail, followed by an angelic hierarchy of 49 "Good Angels", and further information concerning the Kings and Princes of the hierarchy, and their ministers. The major part of the information was given during 1582; significant corrections to the design of the equipment were given in the spring of the following year, after an hiatus in the work and the presentation of *Liber Loagaeth*.

Equipment: Ring, Lamen, and Holy Table

The angels claimed that the ring they designed for Dee was the same one that Solomon used to control demons. It had a plain band, to which was attached a rectangular plate. The letters PELE (Latin for "he will work wonders") were inscribed in the four corners. In the center was a circle with a horizontal line through it, with the letter "V" above and the letter "L" below.

Two different lamens were given to Dee. The first of these bears a generic resemblance to various goetic sigils, being an assortment of free-form lines and oddly placed letters. The being giving it instructed that it was to be made in gold and worn in all times and places for purpose of protection.

The following year, Dee and Kelly were told that this was a false lamen given by an "illuding spirit". They were given a 12-by-7 table formed from the names of the Heptarchic Kings and Princes; the new lamen consisted entirely of letters taken from this table and arranged in rectilinear patterns. (See Appendix E.) Unlike the first lamen, the purpose of the second was solely to "dignify" the magician, to show his worthiness to perform the Heptarchic magick.

"True" Heptarchic Lamen in English and Angelic Versions

The Holy Table or Table of Covenant was the centerpiece of the Heptarchic magick. Its purpose was to be an "instrument of conciliation"; that is, the means by which the powers it symbolizes are brought into harmony with the magician. As with the lamen, the initial version of the table was later said to be incorrect, and a new design provided.

The table was to be two cubits square (roughly 34 to 44 inches) and two cubits high. The legs ended in or rested upon hollow containers, under which small copies of the Sigil of Ameth were placed. It had a one-inch border, in which certain letters were drawn, 21 to a side. Inside the border a Star of David was drawn, and in the center of the star a 6-inch square divided into a 3-by-4 grid, containing more letters. On top of the table were placed seven planetary talismans, called the "Ensigns of Creation". In the center, a large version of the Sigil of Ameth. When in use, the table, Sigil, and talismans were to be covered with a red silk cloth. The scrying-stone was then placed on top of the cloth, directly over the Sigil.

The letters around the edge of the table, and in the central grid, are taken from the same 12-by-7 table (Appendix E) used to form the lamen. They are intended to "dignify" the table -- to consecrate it to the Heptarchic work -- in the same way the lamen dignifies the magician. There is no indication in the record that they were intended to be words conveying meaning, as Gerald Schueler has alleged.

Many magicians have assumed that the Holy Table is also necessary to operations involving the Calls and Tablets given to Dee and Kelly in 1584. It is true that they made use of the table for operations that obtained that material. However, the table is clearly designed specifically for use with the Heptarchic powers; it seems unlikely that it would be suitable for the quasi-elemental nature of the Tablet powers.

**The Holy Table of Practice, or Table of Covenant
Reconstructed according to the Angels' directions.**

Equipment: The Sigil of Ameth

The Sigil of Ameth or *Sigillum Dei* is a large wax disk, on which are inscribed various names of God and angels, within a design of heptagons and heptagrams. This sigil was to be placed in the center of the Holy Table, underneath the scrying-stone. Smaller versions were to be placed underneath the cup-like ends of the table's legs, apparently to insulate the table from earthly influences.

The Sigil is the only part of Dee's work that has a direct correspondence in earlier magickal systems; versions appear in *Liber Juratis* and in *Eodipus Aegypticus*, among other volumes. Dee was initially instructed to copy the sigil from a book in his library, but found conflicting versions and could not decide between them. When he questioned the angels, they proceeded to give him the design for a new, more detailed version. The resultant sigil is substantially different from those earlier versions, sharing only the overall geometric design with them.

While most of the names on the Sigil are not immediately recognizable, nearly all of them are derived from two sets of familiar angelic names. The first set are the angels Agrippa lists as the "seven which stand in the presence of God". The god-names in the outermost heptagon are formed by transposition of the letters of these names, following an elaborate but consistent method. The second set are the planetary Archangels, whose names are shown at the center of the Sigil. These are used to form the four groups of seven angelic names within the heptagram, called the "Sons of Light", "Daughters of Light", "Sons of the Sons", and "Daughters of the Daughters". Additionally, they are used to form the god-names written in the space between the heptagon and the heptagram. It is interesting to note that the derived names were given first, and only afterwards was the means of derivation shown. (For a picture of the Sigil, and details on the formation of its divine and angelic names, see [Appendix A: The Sigil of Ameth and its Holy Names](#).)

Equipment: The Ensigns of Creation

Immediately following the presentation of the Sigil of Ameth, the angels provided seven complex talismans called the "Ensigns of Creation". These were to be engraved on plates of purified tin, and arrayed on the surface of the holy table; either in a continuous ring around the Sigil of Ameth, or in a row directly in front of the magician. As an alternative to the plates, the angels allowed that they could be painted directly on the table. During the Spring, 1583 corrections, the angels specified that the letters on the ensigns were to be converted into the angelic alphabet, but this was apparently never done.

As with the table itself, the ensigns were intended as instruments of conciliation between the magician and the Heptarchic powers. Each ensign was associated with a specific Heptarchic King, and therefor with a specific planet and day of the week. Full-size illustrations of the Ensigns can be found in [Appendix B: The Seven Ensigns of Creation](#). The versions shown in the appendix were prepared from scans of the diaries, unaltered but cleaned up to remove the dirt and smudging from four centuries of aging.

Two later versions of the Ensigns have circulated in modern publications. The first of these was created by the pseudonymous "Dr. Rudd", a century or more after Dee's time. Rudd's version shows the names of various traditional demons written on the Ensigns. Rudd's notion was that the letters stood for the names of these demons, and the number of times the letter appeared signified the number of times the demon was to be invoked.

A version of the Ensigns was published in Pat Zalewski's *Golden Dawn Enochian Magick* which shows all the lowercase letter "B"s in the Ensigns as numeral sixes. This version seems to be a fairly recent invention, first appearing in print in the 1960's. But as can be seen from the illustrations in the appendix, the sixes and "b"s on the Ensigns are drawn in a consistently distinct manner.

Neither of these later versions has any justification in the diaries. If there is a logic behind the symbols on the Ensigns, it is not explained anywhere in the record.

The Heptarchic Hierarchy: The 49 Good Angels

The 49 Good Angels are the first "worldly" angelic powers presented in this system. Those listed on the Sigil of Ameth are apparently in some way above the worlds in which men live, as are the Ensigns. Having presented the Ensigns, the archangel Michael introduces the 49 angels by saying: *"Now you touch the world, and the doings upon the earth. Now we show you the lower world: The Governors that work and rule under God."*

Dee and Kelly were presented with seven 7-by-7 tables. Each square of each table contained a letter and a number from 1 to 49. (See Appendix C.) By gathering the letters with the same number in a certain sequence, the names of the angels were produced. The list of names, divided into groups of seven, were called the Tabula Collecta. Dee arranged these names into a circular table called the Tabula Bonorum, dividing the angels into groups of seven, with a King and a Prince heading each group.

The Tabula Bonorum

Each of the original seven tables was associated with power over a particular aspect of existence; it follows that each angel's name controls some part of each of those aspects. The powers ascribed to each table or letter are:

- Wit and wisdom
- The exaltation and government of Princes
- Prevailing in counsel, and over the nobility
- The gain and trade of merchandise. (Later changed to Water by Dee, for no clear reason.)
- The qualities of Earth, and of Water
- Knowledge of the Air and those that move in it
- The government of fire.

From this list of powers it would seem that, along at least one dimension, the Heptarchic magick is not entirely planetary in nature. The powers would fit more with the conception of a fourfold elemental world ruled by a threefold manifest spirit, as in the lowest seven sephiroth of the cabala.

Dee retroactively assigned a planetary attribute to each group of seven angels, based on the connections between the Kings and the days of the week. Later students have interpolated a system of dual attributes, based on the fact that the Prince of a given day is in a different group from the day's King.

The Kings, Princes, and their ministers

Following the presentation of the 49 angels, there is a gap in the record of about six months; apparently no operations were performed in this period. Ashmole speculates that Dee and Kelly had a disagreement over continuing the work. This seems a reasonable assumption. The pre-hiatus record ends with Kelly expressing dislike and disbelief of the spirits for suggesting he take actions not in accord with his nature. The post-hiatus record begins with the note: "After reconciliation with Kelly".

The material in this section is more confused than in those previous. The speech of the angels is more elaborate and bombastic, the visual aspect characterized by a quality of kitsch. Perhaps Kelly's continuing hostility to the angels is responsible for the change.

The powers of the Princes are presented first, followed by their sigils. Next the Heptarchic Kings appear in succession. They describe their powers, and each presents their 42 ministers. The ministers in turn present their names, in two forms: a table of six rows and seven columns, each containing a letter; and a talisman with their names written about the circumference.

The powers ascribed to the Kings appear to be more in keeping with a planetary nature than those assigned to the individual letters of their names. However, there are some instances where the powers seem inappropriate to the assigned planet, and others where the power of the Prince does not accord with that of the King.

Planet	King	King's power	Prince	Prince's power
Sun	Bobogel	Wisdom, Science	Bornogo	metals, altering nature
Mars	Babalel	Waters, battle	Befafes	seas
Jupiter	Bynepor	life of all things	Butmono	earth
Mercury	Bnaspol	earth and its contents	Blisdon	life
Saturn	Bnapsen	casting out wicked spirits	Brorges	fire
Venus	Baligon	powers of Air	Bagenol	not shown
Moon	Blumaza	not mentioned	Bralges	Air, invisible spirits

The 42 ministers assigned to each King are divided into six groups whose seven members have names formed from the same letters. Each group rules a four-hour section of the day, beginning at midnight. The first group is typically represented as expressing a purer form of the King's power than the remaining five groups.

As was the case with the lamen and holy table, the names of the ministers are derived from the table of the 49 angels. For the ministers, a different method was used to extract the names for each King's set. Also as previously, the names were given to the magicians before the method of extraction was explained. (For additional details, see Appendix D.)

A Missing Piece

Several places in the record reference is made to a "Great Globe", apparently a diagram of some sort, which is not among the papers that have been located to date. From context, it seems that it might be an additional variation on the Tabulum Bonorum, or the 7 tables from which the Bonorum was made. As Dee describes it: "...there are capital letters under the King's names and characters: and also there are other letters with numbers: ... and moreover of these letters, some are aversed and some eversed." Apparently Kelly received this diagram at some time when Dee was not present; Dee refers to it several times as having been "brought to" him by Kelly. The angels affirmed nonetheless that it was important to the use of the magick.

This table was to be used in the creation of talismans for invocations of Heptarchic angels. An example of such a talisman shows the sigil of one of the Sons of Light in its center, with the Name of an Heptarchic King in a circle around it. An outer circle of reversed and normal letters from this missing diagram forms the circumference of the talisman.

Method of Use

In the spring, 1583 sessions, the angels indicated that a session was planned in which detailed instructions would be given for the use of the Heptarchic magick. If this session took place, it is not in the surviving records; but some idea of the general technique can be gathered from comments in other parts of the record.

The magician would be seated at the holy table, wearing the ring and lamen. The Ensign of the King being invoked is placed on the table before him. He would hold a talisman of the appropriate Heptarchic King in one hand, with a talisman of the King's minister's names placed under his feet. The magician would then call upon the King by petition and prayer, followed by petitions to his Prince, and invocations of the six major ministers. They would appear in the shewstone, whereupon the magician would charge them to perform the task he desired.

Period two: Liber Loagaeth and the Angelic Alphabet

Liber Loagaeth is the most mysterious part of Dee and Kelly's work. It is also known variously as the *Book of Enoch* and as *Liber Mysteriorum Sextus et Sanctus*. No one as yet has made serious attempts to use it, or to understand its nature beyond what is recorded in the diaries. According to the angels, "loagaeth" means "speech from God"; this book is supposed to be, literally, the words by which God created all things. It is supposedly the language in which the "true names" of all things are known, giving power over them.

As described in Liber Mysteriorum Quintis, the book was to consist of 48 "leaves", each of which contains a 49-by-49 grid. The book as actually presented to Kelly is somewhat different. It contains 49 "Calls" in an unknown language, 95 tables of squares filled with letters and numbers, two similar tables unfilled, and four tables drawn twice as large as the others. Two "leaves" are recorded in Liber Mysteriorum Quintis; these are not included in the final book, and apparently serve as an introduction or prologue to the work.

On the surface, the "Calls" of Liber Loagaeth do not appear to be a language as humans understand the term. There are no translations by which this might be judged in detail, but the text lacks the repetitiveness and consistent word-placement that is characteristic of the 48 Enochian Calls given in the next year. There is no apparent grammar to the text. Donald Laycock remarks that the language is highly alliterative and repetitively rhyming, while Robert Turner calls it "glossolalic". The angels said that each element of each table could be understood in 49 different ways, so that there were that many "languages" in it, all of them being spoken at once.

The purpose of Loagaeth was said to be the ushering in of a new age on Earth, the last age before the end of all things. Instructions for using it to that effect were never given; the angels continually put it off, saying that only God could decide when the time was right.

During the presentation of the two leaves in Liber Mysteriorum Quintis, an angel in the scrying stone would point to the letters successively, and Kelly would read out the names of the angelic characters. Dee transcribed a version using the Roman alphabet, apparently with the intention of redrawing it in angelic characters at a later date.

The record indicates that at the start of each session a light would fly out of the scrying stone and into Kelly's head; this light was seen by both of them. Once the light entered Kelly, his consciousness was transformed so that he could comprehend the text as he read it. He was firmly ordered not to provide a translation, with the explanation that God would select the time for it to be revealed. He nevertheless provided translations of a few of the words, but insufficient to gather the meaning of the text as a whole.

A Specimen of the Tables or Book of ENOCH. Ἐνὸχ βιβλίον Pagesgem Ἰνὴρ ἄγγεῶν Bacar Laffos

When the light was withdrawn from Kelly's head, he would immediately cease to understand the text, and was no longer able to see it in the stone. On a few occasions, the light continued in him for a short time after the end of the session, and at these times Dee notes that Kelly said many marvelous (and unrecorded) things about the nature of the texts. But the instant the light withdrew, Kelly could no longer understand it, or recall what he had said even moments before. The record says that the 23rd line of the first leaf was a preface to the creation and distinction of angels, and the 24th line an invitation pleasant to good angels. Nothing else is recorded of the purpose of the book.

It soon became apparent that the method used was too slow. The angels were under some time constraint in presenting the book, and arranged that Kelly would be able to see the book at any time. He was to directly record what he saw rather than reading it to Dee. During this latter part of the work, Kelly apparently did not have the deep understanding of the book's meaning, but only a visual apperception of its letters.

The first leaf shown to Dee and Kelly contained the "angelic" alphabet displayed above the grid. The two were given the names and English equivalents of the letters, and told to memorize them before continuing. When Dee did not do so, and complained of the other demands on his time, the angels strongly rebuked him. The text of the leaves was drawn in the characters of this alphabet, and at the angels' instruction they were also applied to the lamen and holy table of the Heptarchic magick.

The Angelic Alphabet

Two versions of the alphabet were given. The first, suitable for being written quickly with a quill pen, was given with *Liber Loagaeth*. A more formal version (shown in the table above) was given later. For this later version, the angels projected an image of the letter in yellow onto a blank sheet of paper; Kelly then traced over the projection with black ink to produce a permanent record.

The angels indicated that the letters served like Hebrew, as the basis of a cabala or system of magickal symbolism and numerology. They also indicated that the letters were divided into three groups of seven. But beyond that nothing was ever given concerning their properties.

Several people have alleged that the angelic alphabet was copied from some earlier book. Laycock examined all of the possibilities, and while he recognized certain stylistic similarities with previous magickal alphabets, he concluded that none of them was sufficiently like it to count as an earlier version.

Period three: Enochiana

The third section of the work is the only portion that is properly called Enochian. This name was not actually used by Dee and Kelly; they called the system "angelic". The "Enochian" label derives from the origin-myth the angels supplied for this portion of the magick.

According to the myth, this magick was given to the patriarch Enoch by God, and was the means whereby Enoch worked his miracles. The magick was preserved past the time of Enoch's ascension, but in later generations unworthy people began to make use of it. God caused the books to be lost, and sent wicked spirits to spread false magickal systems among the people. (Amusingly, these false systems are based on the use of sigils or "characters", like most of the other magickal systems of Dee's time, or like modern "Chaos" magick.) Dee's prolonged and fervent prayers finally caused God to relent, and reveal the magick again.

It is uncertain exactly when the label was first applied to the system. Common modern usage apparently stems from its use by the Golden Dawn.

The angels were under a time constraint in delivering the Angelic magick. The work was begun on April 10, 1584, and had to be completed before August of that year. Throughout the work, there was constant interference from "evil" spirits, seeking to convince Dee and Kelly (mostly Kelly) to abandon it. Kelly also fell back into his old habits of demon-magick, prompting tension between him and the angels until he foreswore it.

Unlike the Heptarchia and *Liber Loagaeth*, the pieces of the Enochian system were presented in a seemingly haphazard way. However, the sequence of presentation serves to confirm that the angels were working from knowledge not available to Dee and Kelly. In chronological order, the sections given were:

- The Tablet of God, sometimes called the Tablet of Nalvage.
- The first four Calls, delivered backwards a letter at a time, and their translations.
- The fifth through eighteenth Calls, delivered forwards, without translations.
- The names of the 91 Parts of the Earth in *Liber Scientiae*, with the number of their indwelling ministers and the number of the Zodiacal King ruling each.
- The relation of the Parts to regions of the Earth.
- The four Elemental Tablets or Tables of Enoch.
- The translations of the Calls previously given, and the specification of the correct ordering of the Calls.
- The Call of the 30 Ayres or Aethyrs
- The names of the Aethyrs.

The translations of the fifth through eighteenth Calls were not given until six weeks after the angelic versions. The consistency of these translations -- that is, the same words

given the same meaning in different Calls -- at least serves to establish that the meanings were not invented on the spot.

The names of the Parts are derived from the Elemental Tablets, and their sigils are to be found by connecting the letters of their names on the Tablets. The sigils were shown drawn on the Tablet's grid before the letters for the Tablet were given. The sequence in which the names, sigils, and Tablets were given reflects the confirmation method used for the Heptarchic magick.

The work was completed on July 13th, 1584, with the delivery of the final portion of the Call of the Aethyrs, and the names of the Aethyrs. After that, it is as if a light went out in both Dee and Kelly; having reached some pinnacle of achievement, they fell back, exhausted, into a more prosaic realm. Indeed, from the record it seems almost as if the events of the previous three years had never occurred. Other concerns occupy all of their attention; their visionary work is unconnected with what came before, and has a half-hearted quality. There is no indication that they ever did any more with the Angelic magick.

The angels who were central to the delivery of the magick are never seen again. The magick itself only figures into the records on three more occasions: when the records are destroyed, when they are miraculously restored, and when Kelly receives the "Tabula Recensa".

The Tablet of God

The first piece of the angelic magick presented was a small table. It was unnamed in the record, but on the basis of its content, it would be appropriate to call it the "Tablet of God". No specific use for this table is given, but its size and described nature suggests that it might be a lamen to be used with the magick that follows it.

			h	c	r	u

		i	a	b	r	d	i		
			l	a	n	g			

The Tablet of God

The table consists of an 6-by-6 inner portion, surrounded by four names of four letters each written in a counterclockwise direction. Each corner of the inner portion contains the letters "IAD", an angelic word for God. The inner portion is divided into four 3-by-3 tables, called "continents" by the angel Nalvage; each of these contains three angelic words, written diagonally, which describe the nature of that section in a motto. Reading the lines of the section horizontally gives the names of three groups of angels.

Continent	Name	Motto	Choirs of Angels
Upper left	Highest Life	"I am the joy of God."	1. Joy 2. Presence 3. Praising
Lower left	Life, or Second Life	The moving power of God, or God's power in motion.	1. Power 2. Motion 3. Ministering
Upper right	Life not now dignified, which will be dignified	The result of God's action	1. Action 2. Events 3. Establishing
Lower right	Life which is also Death	The discord and lamentation of God	1. Lamentation 2. Discord 3. Confusing

Zalewski switches the choirs for the lower left and upper right continents. The "mottoes" for these two continents suggest a connection with the original positions of the elemental Tablets within the Great Table (described below). The Tablet of Fire was at lower left, which fits with "power-in-motion". Earth was at upper right, and Earth is traditionally the realm where final results or events occur. The connection in the other two continents is somewhat more abstract; Air at upper left is the element closest to heaven in the structure of the world; Water at lower right is traditionally connected with death and sorrow through the watery signs of Scorpio and Pisces.

The four names surrounding this inner portion are connected with the Son aspect of divinity. These names have the same meanings as the third choirs of the continents, but the spellings are unrelated. With the four "I"s in the corners of the continents, they form a ring around the outside of the table.

Nalvage says of this Table:

- "1. Its substance is attributed to God the Father.
- "2. The first circular mover, the circumference, God the Son, the finger of the Father, and the mover of all things.
- "3. The order and knitting together of the parts in their due and perfect proportion, God the Holy Ghost. Lo, in the beginning and end of all things."

"Substance" is used here in the philosophical senses of "essence" and "something considered as a continuous whole". The unbroken continuity of God the Father is expressed in the duality of the Son (the outer ring of the Table) and the Holy Ghost (the inner continents). The arrangement of the continents reflects (or is reflected in) the positions of the elemental tablets in the Great Table, in the same way that Binah "contains" the lower sephiroth in the cabala. Thus this table may represent the unmanifest Supernal Triad from which the manifest elements of the angelic magick have emanated.

The 48 Calls

The Calls are a series of invocations in an unknown language, which is called "Angelic" in Dee's records. Angelic has the appearance of a true language, though the existing samples are insufficient to deduce a full grammar. The language is similar to English in its positioning of subjects, verbs, and objects. It is unlike English in its lack of separate articles, possessives, and prepositions. As a general rule, the words of the language do not appear related to those of any known language, although there are occasional striking (if superficial) resemblances. E.g., Angelic "christeos", meaning "let there be" versus Greek "christos", Angelic "babalon" meaning "wicked" or "harlot" versus "Babylon".

Nineteen Calls were given to Dee and Kelly. The final Call has thirty variations, making the total of 48 Calls. The purpose of the Calls is sufficiently described by Nalvage:

"This self-same art is it, which is delivered unto you as an infallible doctrine, containing in it the waters which run through many Gates: even above the Gate of Innocency, wherein you are taught to find out the dignity and corruption of nature: also made partakers in the Secret Judgements of the Almighty to be made manifest, and to be put into execution.

"I am therefore to instruct and inform you, according to your doctrine delivered, which is contained in 49 Tables. In 49 voices, or callings: which are the Natural Keys to open those, not 49 but 48 (for One is not to be opened) Gates of Understanding; whereby you shall have knowledge to move every Gate, and to call out as many as you please, or shall be thought necessary, which can very well, righteously, and wisely open unto you the secrets of their Cities, and make you understand perfectly [that] contained in the Tables."

Colin Low has suggested that the above-mentioned Gates are connected with the "Gates of Understanding" found in some Yetziratic texts, and with the fifty Gates mentioned in Thelema's Liber AL vel Legis.

It is certain that there is some sort of relationship between the Calls and the Elemental Tablets, but the exact nature of the connection is a matter of speculation.

The 19th Call, titled the "Call of the Aethyrs", is explicitly associated with the 30 Aethyrs of *Liber Scientiae*; its wording clearly makes it an invocation for the 91 "Parts of the Earth" in that book. Following the quote above, the remaining Calls are assumed to connect with the hierarchies of the elemental Tablets, but the wording of the Calls is too poetic and ambiguous for specific associations to be made with certainty. While confirming the correct sequence of these Calls, the angel Ilemese stated that each Call has its proper Table, but does not state what these tables are.

Experiments by several magicians seem to establish that the First and Second Calls in some way define the poles within which the remaining Calls work. The First Call usually produces a generic manifestation of Spirit, a general pull towards higher levels. The record implies in a vague way that it is to be used when invoking the Elemental Kings and their ministers, the Seniors; possibly in combination with other Calls. The Second Call is stranger. It does not appear to define a "material" pole as such; rather, it defines a framework or overall form into which the powers of the system can be poured and contained.

The usual assumption by later magicians (not universally accepted) has been that the remaining Calls refer to the "Lesser Angles" within the Tablets. The Golden Dawn's method of associating these Calls with the Tablets and Lesser Angles has become the accepted standard. Donald Tyson has recently come up with an alternative method that has received some attention.

An alternative view of the Calls states that they are parallel to, but separate from the Tablets. That is, they should be used by themselves, without the divine names from the Tablets. There is certainly evidence in the text of the Calls that they represent a continuing "story" of a creative process, beginning with God in the First Call, and ending with the establishment of God's power "in the center of the Earth" in the Eighteenth Call.

Another alternative has been suggested in which the Calls are actually connected with the 49 "leaves" of *Liber Loagaeth*. This view argues that the Great Table cannot be subdivided in any way that produces 48 or 49 tablets or smaller tables, while *Loagaeth* is more clearly connected with those numbers. However, the definite connection between the 19th Call and the Aethyrs and Parts is a strong argument against this position.

(For the complete text of the Calls in Angelic and English, see [The Enochian Calls](#) published separately.)

The Tabula Recensa, 1587

The Great Table

The Great Table is a large grid of letters, 25 squares wide and 27 high. Two major versions of the Table exist. The first was produced during the work in 1584. Three years later, Kelly (working alone) received a revised Table now called the "Tabula Recensa".

The Table is a magickal "map" of the world, including all levels of existence that are not part of the transcendental, divine realm. It is divided internally according to an orderly system to produce a hierarchy of divine and angelic names ruling various aspects of existence. A separate method of division, in which it is separated into 91 dissimilar regions, produces the sigils of the "Parts of the Earth" shown in Liber Scientiae.

The first division in the Great Table splits it into four Elemental Tablets, 12 squares wide and 13 squares high. These Tablets are separated by a cross with arms one square wide, called the Cross of Union, or Black Cross (so called only because it was shaded in black ink in Dee's version). The four tablets are associated with the four traditional elements, following the same positions as the "continents" in the Tablet of God. (The Tabula Recensa changes the positions of the Tablets within the Table.)

Each Tablet has an internal division into four "Lesser Angles", separated by a "Great Cross". The Great Cross has a vertical arm two units wide, and a horizontal arm one unit high. The horizontal is called the "Line of the Holy Ghost" and contains the three highest names of God within the Tablet, formed by dividing its twelve letters into groups of three, four, and five letters. The vertical arm considered as a whole is said to represent God the Father. When considered as two columns, it represents God as Father and Son.

The eight central letters of the Great Cross are taken in a clockwise inward spiral to form the two names of the Elemental King who rules the Tablet. Each of these names uses only one of the two most central letters. Dee was told that one of these names was for beneficent works, the other for works with harmful intent. When the letters of the Great Cross are read outwards from the center along each arm, they form the seven-letter names of six "Seniors".

The Great Cross is associated with levels of manifest divinity, the mathematical or planetary regions that lie above the Earth but inside the transcendental divine realm in medieval cosmology. Cabalistically they connect with the second triad of sephiroth in the Tree of Life, and with the human soul that originates there. The King and Seniors are generally considered to be planetary in nature; the power of the Seniors was said to be "knowledge of all human affairs".

The Lesser Angles are grids five columns wide and six rows high. The central column forms a god-name of six letters; the second row from the top forms a god-name of five letters. The four rows below (ignoring the central column) form four angelic names ruled by these god-names. Today they are usually referred to by the Golden Dawn label, as "Servient" angels.

The four squares of the top row (again ignoring the central column) form four angelic names which are not ruled by the god-names from the calvary cross. Instead, a different god-name is formed by adding a letter from the Cross of Union to the first angel's name. These four angels are specifically associated with the letters INRI, written above the cross of Jesus' crucifixion. The Golden Dawn labeled them "Kerubic" angels, after the four elemental Kerubs of the Tarot cards.

The angels of the Lesser Angles are assigned governance over specific areas of knowledge, e.g., medicine, precious stones, mechanical arts, etc. These powers can be easily associated with one of the four elements; the result is that the positioning of the elements in the Tablet of God is reflected downwards in the positions of the Tablets in the Great Table, and in the positions of the Lesser Angles within each Tablet.

Type of Angel	Lesser Angles	Power
Servient	Upper left (Air)	Medicine
"	Upper right (Earth)	Metals and Stones
"	Lower left (Fire)	Transformation
"	Lower right (Water)	Living creatures
Kerubic	Upper left	Mixing of natures
"	Upper right	Changing of place
"	Lower left	Mechanical arts
"	Lower right	Understanding secrets

These various powers must be considered to be representative rather than inclusive. According to the angels the Great Table is in some way connected to every type of event that takes place within the Earth; therefore these angels must have much wider areas of responsibility than is suggested by the listed powers.

Liber Scientiae

Liber Scientiae, Auxilii, et Victoriae Terrestris, the "Book of Knowledge, Help, and Earthly Victory", is the third major portion of the Enochian magick. The details were given during the 1584 work, and were compiled into a book by Dee in May of the following year. In introducing this part of the work, the angel Nalvage said:

"There are 30 Calls yet to come. Those 30 are the Calls of Ninety-one Princes and Spiritual Governors, unto whom the Earth is delivered as a portion. These bring in and dispose Kings and all the governments upon the Earth, and vary the natures of things with the variation of every moment; Unto whom the providence of Eternal Judgement is already opened. These are generally governed by the 12 angels of the 12 Tribes, which are also governed by the 7 who stand before the presence of God. ..."

A following paragraph in Latin clarifies that it is the Angels of the Tribes who are the governors, and that the 91 are actually regions or territories of the magickal realm

corresponding to various earthly territories. Each Angel rules a varying number of these regions.

The 91 Parts of the Earth on the Great Table

In addition to its regular hierarchies, the Great Table contains the names and sigils of the 91 "Parts of the Earth as imposed by God" of Liber Scientiae. Where the angelic hierarchies described previously are derived from the Tablets by following uniform divisions, the names of the Parts are derived in such a way that each covers a uniquely-shaped area. The natures of the Parts are equally heterogeneous; none of them is like any other in scope, quality, or power.

From the angels' descriptions, it could be said that the regular Tablet hierarchies and the 91 Parts represent complementary views of the world that they both cover. The regular Tablet names represent the ordering of the world according to the ideal plan of God; the way in which the world connects with divine archetypes and patterns. The Parts, on the other hand, represent the transformation of the divine plan into the endlessly changing, endlessly dissimilar events of manifest existence.

In sequence, the angels gave Dee and Kelly first the number of "ministers" dwelling in each Part, the number of the Aethyr in which it was contained, and the number of the Tribal Angel King ruling the Part. Next the names of the Parts were given, and their mundane equivalents, followed by their sigils on the Great Table. After the letters and regular hierarchies of the Table were filled in, the angels presented the Call of the Aethyrs and the names of the Aethyrs. The origin of the Angel King names is obscure; they are not shown in the published portion of the diaries, but are in place in the final, book version of *Liber Scientiae*.

The sigils of the Parts are found by drawing lines between the squares of the Part's area in the Great Table, in the sequence of the letters in its name. In the presentation to Dee and Kelly, the sigils were presented before the Tablets were filled in with letters, so that when the letters were added they could check back against the names of the Parts as previously given. The correlation between the two sets was remarkably high; only a few of the names had different spellings in the Tablets. None of them were completely dissimilar.

It should be noted that there is one Part whose sigil is shown in the Great Table, but which is not listed in *Liber Scientiae*. If all the names in the book are valid, there are actually 92 Parts, not 91. Some magicians have speculated that this extra Part should replace the sixty-fifth Part, whose name is formed using the two leftover, non-contiguous squares in each Tablet.

Originally, the angels tried to give Dee and Kelly the mundane equivalents of the Parts by displaying their regions on a globe of the world. Dee cut this method off before it started, complaining that they ought to give him the regions in longitude and latitude, or by reference to the maps in his possession. There is no obvious reason why Dee became stubborn on this point; certainly he was aware that his maps didn't cover the entire world.

The angels rebuked Dee, saying that they didn't see the world in terms of arbitrary mathematical designations, nor in the conic projections of Dee's maps. But rather than return to their intended method, they chose to associate the Parts with the regions of the world listed by Ptolemy.

Robin Cousins has gone to great effort to identify the modern regions represented by the Ptolemaic names. His descriptions and maps can be found as appendices in Turner's *Elizabethan Magick*. It is apparent from Mr. Cousins' maps that there is a great deal of overlap in these regions. For example, the region of Parva Asia or Anatolia overlaps, in whole or part, no less than nine other regions. Several Parts connect with single cities rather than regions, and others are described simply as "in the north" or "in the far south".

One might suspect that the angels, balked in their intent, simply latched onto the first available method that would satisfy Dee, regardless of its correctness. After receiving the whole list, Dee began to see the difficulties in the scheme and questioned the angels. The response was less than satisfactory to him, in the end boiling down to a statement that when he called the Parts, they would show him the regions they rule. It is implied that thirty of the Parts relate to the New World. Mr. Cousins originally said he believed

that these thirty were in addition to the existing 91 Parts, making 121 Parts in all. However, he now believes that the thirty meant that additional territories were covered by the existing 91 Parts, in the way that the angels added Poland and Moscow to the territory ruled by the same Part as Sarmatia. My own reading is also that these thirty are among the given Parts, since any additions would either overlap existing ones, or require slightly less than another full Tablet as a region they would map.

The thirty Aethyrs are barely mentioned in Dee's diaries; they are certainly not given the importance that they have acquired in the minds of some modern magicians. Their function seems to be merely that of containers to hold the 91 Parts. There is no indication that they have any function separate from the Parts.

Usage

While the Enochian materials given to Dee and Kelly form a solid core for a magickal system, they are lacking in the supporting infrastructure necessary to make them a complete and useable system. Only the barest indications are given as to the nature of the various angels, the relationship of the system's structure and powers to those of other systems such as the cabala, or the mythic underpinnings for using it as an initiatory system.

The instructions for using the Enochian magick are equally spare, a few sentences in length:

"Four days (after your book is made, that is to say, written) must you only call upon those names of God, [i.e., in the Tablets] or on the God of Hosts, in those names:

"And 14 days after you shall (in this, or in some convenient place) call the Angels [of the Tablets] by petition, and by the name of God unto which they are obedient.

"The 15th day you shall clothe yourselves, in vestures made of linen, white: and so have the apparition, use, and practice of the Creatures. For, it is not a labour of years, nor many days."

The "book" mentioned is a book of supplications or prayers to god and the angels, to be devised by the magician, written neatly, and bound together. The book is only to be used for this one operation, and then destroyed. The Calls are not mentioned at all.

Apparently the magician is intended to use a "bootstrap" method of learning the magick, similar to that used in the Abramelin magick. He invokes the angels, and the angels themselves show him the best way to use it. And as in the Abramelin work, the angels emphasize that it is the fervency of the magician's prayers that will produce effective contact, not the form of the prayers.

History of Use

Given the bare-bones nature of the original Enochian material, magicians have to improvise extensively to make it into an effective general-purpose magickal system. The history of the system's use is a history of innovation. Every magician or group that has used it extensively has added their own distinct character to it, taking it in a direction at least slightly different from anyone else. It has evolved as the viewpoints of its users have evolved, and seems perfectly capable of adapting to many viewpoints without stress.

The one point on which all these users agree is that the Calls and the Tablet names are tools of remarkable potency, possibly unmatched by any other magickal system now known. Even a completely inexperienced user, with a small effort, is virtually guaranteed to get some sort of response.

Beyond this, it is difficult to gather a coherent picture of the magick. While the angels have distinct natures, they present themselves to each magician in a manner that is consonant with his own nature and "true will", and which is -- to a lesser extent -- in accord with his expectations and conscious intent. The problem of their conformity to expectations can be overcome with practice. The former limitation seems to be absolute; they will not interfere with the true will of the magician. But within that limit they will do everything they can to take the magician as far and as high as he can go.

For a variety of reasons, only a few records of Enochian workings have been preserved. Most such records have been saved because the people who performed the work were interesting to scholars for other reasons; as an obscure branch of an obscure subject, it has not rated a great deal of attention from scholars and publishers. Given this lack of information, and the limitations mentioned above, the available records have to be considered to be spotlights illuminating areas within a vast field, most of which still remains dark and unknown.

Dee & Kelly

As far as is shown in the surviving records, neither Dee nor Kelly ever made significant use of the Angelic magick. During the three years following the receipt of the magick, they apparently ignored it entirely. If they did anything with it beyond that period, the record has been lost.

Elias Ashmole

Sloane Manuscripts 3624-3628 contain the record of extensive spirit actions with the Enochian magick, begun in the 1670's and continuing for over seventeen years. Three magicians and a sryer invoked practically every angel and entity connected with the Enochian system. Some scholars believe that Elias Ashmole and William Lilly are two of the magicians involved. However, Clay Holden believes that this is not the case, based on the handwriting; the record is in a crabbed and almost unreadable hand very unlike Ashmole's elegant script.

From Clay Holden:

Ashmole appears to have been largely content to make planetary talismans to banish rats from his house, as near as I can determine from his diaries. I would dearly love to find some solid evidence to the contrary, but fear that my assumption that Ashmole was one of the hands behind these Spirit Diaries was wishful thinking.

The diaries are massive, and have not been examined closely at this time, but preliminary indications are that they do not contain any results of special significance.

Golden Dawn

The original Golden Dawn magickal society operated from the 1880's into the 1900's, when it split into various groups. Descendent organizations (of varying degrees of legitimacy) continue to operate up to the present, using much of the material developed by the founders. People using the Golden Dawn system probably constitute the largest group of Enochian magicians over this century; despite certain theoretical problems, it has proven in practice to be an effective means of accessing the angelic forces.

The Golden Dawn adepts made substantial additions to the original Enochian materials, basing them in part upon a late 18th-century manuscript titled *A Treatise on Angel Magic*. Their system for relating the Calls to the Tablets has become the standard model. Most significant is their elaborate system of attributes for the squares of the Elemental Tablets, which seeks to unite Enochian magick with cabalistic and Rosicrucian lore to give a complete symbolic representation of the magickal universe.

In this system, each division and rank in the Tablets is connected with specific types of magickal forces -- elemental, planetary, zodiacal, or sephirotic. For example, the 36 squares of the Great Cross are associated with the 36 decanates of the zodiac; the ten squares of the calvary crosses in the Lesser Angles are connected with the sephiroth of the Tree of Life.

The individual letters of the names in a given rank represent sub-forces or special manifestations of the represented type, distinguished by the addition of lesser attributes. A given square can have up to four attributes, depending on its type and its position in a given Tablet and Lesser Angle. Additionally, each letter of the angelic alphabet is given a separate attribute to one of the figures used in geomantic divination. Diagrams showing the complete listing of attributes for all the squares can be found in Aleister Crowley's *Liber LXXXIX vel Chanokh*.

Golden Dawn magicians explore the squares astrally, using a technique involving the visualization of a truncated pyramid. Each side of the visualized pyramid is colored and emblazoned with the symbols of the square's attributes. The magician recites the appropriate Calls and vibrates relevant divine and angelic names, and concentrates the invoked power in the pyramid. The power is then seen rising up the sides of the pyramid and shooting out into magickal space in the form of a beam of light. The magician enters

this beam and rises with it through the planes until he comes to a landscape or space that expresses the invoked power. This technique has proven to be highly effective in practice.

At least one Golden Dawn offshoot has applied the pyramid method to the angels of the Heptarchia.

Aleister Crowley

Aleister Crowley's work with the Enochian magick generally follows the Golden Dawn system. He is known primarily for his explorations of the 30 Aethyrs, published in *The Vision and the Voice*. This work established the idea that the Aethyrs might represent a means of initiation, and set a standard for methodical exploration that few have equaled. It also fixed Crowley's peculiar perspective on the process of transcendence in the minds of many students of the occult.

Crowley envisioned the Aethyrs as being connected with the sephiroth of the Tree of Life in groups of three. He also mentions that each Aethyr "folds up" into the next higher Aethyr in some way, so that as one progresses through the Aethyrs from the last to the first, one is also withdrawing one's being from the lower, already-experienced levels. (This is parallel to the technique he describes in Liber Yod, in which the magician achieves union with the godhead by progressively banishing all other levels and powers.)

Under this conception, the Aethyr ZAX, whose Parts have names formed from the Cross of Union, is the highest of the three attributed to Chesed. It is thus the last Aethyr one encounters before moving into the Supernal Triad and achieving transcendence. Crowley envisioned this movement as the crossing of an "Abyss" or gap, during which the magician encounters an Enochian devil named Choronzon dwelling therein.

Crowley's other contribution to Enochian magick was the adaptation of the Golden Dawn pyramid system for use with O.T.O.-style sex magick. In this technique, physical representations of the pyramids are made for the name of an angel, but inverted to form square "cups". These serve as talismans, which are charged using the end-product of the sex magick operation.

Aurum Solis

The published documents of the Aurum Solis magickal order show a unique method of using *Liber Scientiae*. Their research has focused on discovering the nature and uses of the numbered-but-unnamed "ministers" residing in each of the 91 Parts.

They used the second Angelic Call along with the Call of the Aethyrs, in order to cause the invoked forces to manifest at the "material" pole of their range; this brings the ministers, who are the lowest members of a Part's hierarchy, into the greatest state of activity. For each group of ministers they have compiled a name, an image of their appearance, and a list of their powers and the aspects of existence on which they can act. Given the large number of Parts, they have a virtual encyclopedia of useful magickal

effects. Since they have not published any magickal records using their methods, there is no way to determine how well their system works in practice.

In contrast, their use of the regular Tablet hierarchies appears to be fairly conventional, in line with the Golden Dawn methods, but not using the G.D.'s elaborate system of attributes.

The Church of Satan and the Temple of Set

Quoting Israel Regardie, from his introduction to Aleister Crowley's *The Vision and the Voice*:

One advisor ... had suggested the discontinuation of the whole project. His motive was that a California group sensationally engaged in the practice of Satanism had appropriated and published the Enochian rituals or Calls in a so-called Satanic Bible. Because of this, it was felt that there were now undesirable contacts associated with the rituals that could only lead to chaos and confusion.

The author of this debased volume had made enough changes in the various Calls to rule out any likelihood of confusion with those presented here in their original form. Wherever the word God is used, the author had substituted the name of Satan or one of the equivalent terms in its stead. The same holds true for several other pieces of similar stupidity.

As a primarily religious organization, the CoS used the Calls (as a former member put it) as "tools for psychodramatic ritual"; i.e., as something mysterious to add glamor to their services. There is no indication that the founder ever took the Calls seriously as a tool, or that they were ever used systematically by the CoS for explicitly magickal purposes.

The Church of Satan's schismatic offshoot, the Temple of Set, has abandoned the CoS versions of the Calls. Rather than rewrite the angelic language of the Calls, Michael Aquino (founder of the Temple of Set) has substantially revised the *translations* of the Calls to conform to his own philosophy and myth-system. The Calls and Mr. Aquino's "translations" are presented as the "Word of Set" in the ToS manual *The Crystal Tablet of Set*.

In some instances, Aquino's version departs substantially from the original translations; in others, the differences are small enough that one might call them justifiable poetic license. But the overall sense conveyed is dramatically different from the original. Quoting Mr. Aquino:

An "Enochian purist" might question the translation provided by the Word of Set in that it is not the English version recorded by John Dee in his diaries. My answer is simply that I approached the Keys not as a historian seeking to reprint what Dee did, but as a magician seeking to operate the same "magical machinery" that Dee did -- and to operate it with greater care and precision than he did. Hence

it is not a case of my "corrupting Dee", but rather of my uncorrupting something which predated Dee's own existence, and which was, after all, not of his [or Kelley's] authorship.

Mr. Aquino does not provide any explanation of how the "Word of Set" came to be delivered by angels espousing an emphatically Christian world-view.

Order of the Cubic Stone

From Robin Cousins:

The British graded occult group based in Wolverhampton, the Order of the Cubic Stone, (flourished 1965-91, now dormant) taught the Enochian system, strictly according to John Dee. The Golden Dawn system of Enochia was regarded as inaccurate and members were not encouraged to use its correspondences. Because membership was country-wide, most work was done individually or in small local groups (ie, if odd members lived near one another), but virtually no record of this work was held centrally. A few remaining members still practice today, but there is no overall coordination.

Benjamin Rowe

Benjamin Rowe is an active magician working exclusively with Enochian magick, known for methodical, thorough workings, and for developing unusual, non-traditional techniques and viewpoints. He has made an effort to expose his work to public scrutiny and criticism, believing that the state of the art can only be advanced through open communications. He is currently (1997) involved in a long-term project exploring all of the 91 Parts of *Liber Scientiae* in sequence.

The most noted of Rowe's technical innovations is a method by which an elemental Tablet can be transformed into a three-dimensional astral structure, an "Enochian Temple". Properly constructed, the temple acts to produce intense concentrations of the powers of the entire Tablet in a balanced form. The power creates a "gate" which can be used to explore symbols of any magickal system, to produce permanent changes in the consciousness of the magician, or to break through into extraterrestrial magickal realms. He believes other uses are possible, but has not yet explored them.

Examining the Golden Dawn system of correspondences for the Tablets, Rowe realized that their system was effectively upside down. That is, the highest ranks of the Tablets had attributes to magickal powers universally considered minor, while the major magickal powers were attributed to the lowest ranks of the Tablets. The whole seemed based on coincidences of number rather than experience. He spent several years determining the nature of the various ranks through experiment, and devised and experimentally tested a new system of correspondences that corrects the defects of the G.D. system and, he believes, accurately reflects the actual nature of the Enochian powers.

Miscellaneous Issues

Relation of Enochian to the Necronomicon

Since the Necronomicon is a literary device created by H.P. Lovecraft, any connection between the Enochian magick and the Necronomicon must also be fictional. In one of his stories, Lovecraft stated that John Dee was at one time in possession of a Latin translation of the book, which he translated into English. In their spoof Necronomicon, authors Langford, Turner, and Wilson suggested that *Liber Loagaeth* was actually a cipher version of the Evil Book, which they had managed to decode. Neither of these ideas is supported by the records.

Colin Low has perpetuated and embellished these fictional excursions in his "Necronomicon Anti-FAQ" and other writings. Some modern readers, lacking a sense of humor and irony, have taken his work seriously; as a consequence, the myth of Dee's connection with the book has taken on an air of Utter Authority among certain gullible portions of the magickal community.

Relation of Enochian to the biblical Book of Enoch

The various pseudepigraphic "Books of Enoch" were unknown in Europe at the time the magick was revealed to Dee and Kelly. Dee's work was aimed at discovering what he believed to be the contents of these books; he had no direct knowledge of their nature. The Enochian magick and the angels' origin-myth for it bear no direct relation to the actual contents of the books now known by the name.

Enochian magick and the apocalypse

There are two major threads of thought in Christian millennialism. One thread, called postmillennialism, is largely Utopian in nature. It sees the millennium as the beginning of a period of gradual perfection of conditions on Earth; the basic principle is that the world must be brought to perfection and the City of God built on Earth before the Christ will return, and it is only after the Christ returns that the world will end. Two decades after Dee, this form of millennialism was the driving force behind the religious groups spearheading the English colonization of America. Dee's own thought contains many post-mil ideals; in seeking out the Enochian magick, one of his goals was to gain a means of bringing earthly governments and societies into line with the design of God, thereby bringing the return of Christ closer.

The other thread, called premillennialism, is the more catastrophic variety. In this version, the typical scenario is that the Christ returns, and then the current "evil" societies of mankind will be destroyed in worldwide disasters, while the elect are preserved from harm. After the world is destroyed, the Christ joins with the faithful in a City built by God to rule over the Earth for a thousand years.

While there is a strong millennialist flavor to the angels' pronouncements, they are almost uniformly of the postmillennialist variety. The angels divided the world into four ages. The first of these began with the creation and ended with the Flood; the second ended with the first appearance of the Christ. The revelation of Liber Loagaeth ended the third age and ushered in the final age, in which the world would be brought to perfection prior to the return of the Christ.

The Calls and Tablets were in turn intended to be one means by which this perfection could be brought about. One particular passage establishes this clearly.

On February 11, 1584, Dee & company had arrived at the Polish manor of Albert Laskie, and had time to settle for a few days and do some magickal work. This day was the first operation of a new series of works after the hiatus. And during the work, the spirit Nalvage appeared for the first time to introduce himself and state his purpose.

The session begins with a colloquy in Latin between an evil spirit that settles by Kelly's left shoulder, and a good spirit that settles by his right shoulder. After some discussion the dexter spirit banishes the sinister. He spends a couple of paragraphs praising the Doctrine to be revealed, then says:

Nalvage:

"These [are] latter days, and the end of harvest must have also Labourers: For no Age passeth away, but through the hands of God, who maketh the end of his doings known to the World: To the end, [that] the World may consent unto him in Glory. So that this Doctrine, is the mysteries of the word of God, sealed from the beginning, now delivered unto man, for that Reformation which must be in one Unity established unto the end. [emphasized in original] The very part of that Circle, which comprehendeth the Mysteries of the Highest, in his Prophets, Apostles, and Ministers yet to come, which are alive and shall bear witness of eternal comfort.

"The fruit of our doctrine is, that God should be praised. For of ourselves we seek no glory: But we serve you to your comfort, teaching you the will of God, in the self same Christ, that was crucified; sold and died in the Patriarchs, and published to the World by his Disciples, and is now taught to you, in the remission of sins... greatest in the world, for the end of all things. The very key and entrance into the secret mysteries of God, (in respect to his determination on earth) bringing with it reward in the end of eternal glory, which is the greatest Treasure."

[paragraphs omitted]

Nalvage:

"These things are your parts, and portions sealed, as well by your own knowledge, as the fruit of your intercession, The Knowledge of Gods Creatures.

"Unto me are delivered five parts [i.e., months] of time: Wherein I will open, teach, and uncover the secrets of that speech, that holy mysterie. To the intent the CABALA of NATURE, in voyce, substance of bodie, and measure in all parts may be known. For there is nothing secret, but it shall be revealed, and the Son of GOD shall be known in POWER, and establish a Kingdom with righteousness in the earth, and then cometh the end.

"For the earth must come under subjection, and must be made pure. That death may be swallowed in his own Kingdom, and the enemy of righteousness find no habitation. The word of God endureth forever. His promises are just. His spirit is truth. His judgements inscrutable. Himself universal. He it is of whom you labour. The promises of God in this earthly noble man shall be fulfilled. Salomon used the places of honor, and was exalted."

While not so clear as later speech from this source, nonetheless some things are apparent. Nalvage is a postmillennialist. That is, he holds that the world must be brought to a state of perfection and holiness *before* the Christ can return; the City of God must be established by man, and then the end comes. The Calls and Tablets (which he begins to deliver two months later) are the tool by which this perfection of the Earth and mankind can be brought about.

Appendix A: The Sigil of Ameth and its Holy Names

The outer ring of the Sigil contains 40 pairs of letters and numbers. These were presented in sequence to Dee and Kelly; in most cases, the presentation of the letter was preceded by a Latin phrase beginning with that letter. All the letters together were accounted as the greatest name of God.

The numbers sum to 440; the Archangel Michael completed the presentation of the outer ring by displaying a number "1", surrounded by many concentric circles. Adding this 1 brings the total of the numbers presented to 441, which is the numeration of the word "Ameth", Aleph-Mem-Tav, according to Hebrew gematria.

Seven of the letters are capitalized, indicating the first letters of certain concealed angelic names. To find the names of these angels, Dee was instructed to use the numbers connected with each letter. Where the number was above the letter, he was to count that

many letters clockwise to find the next letter of the name; where the number was below the letter, he was to count counterclockwise. Each name ended when he reached one of the six letters without a number.

Thus, seven names were produced:

Thaaoth
 Galaas
 Gethog
 Horlon (the second "o" is actually a lowercase omega)
 Innon
 Aaoth
 Galethog

Dee was instructed to strike out the first "a" of the double a's in the first two names, to produce the names "Thaoth" and "Galas". When this is done, the seven names comprise forty letters, the same as the number of letters in the outer ring of the Sigil.

Of these seven names the angel Uriel said: *"every letter containing an Angel of Brightness: comprehending the 7 inward powers of God, known to none but himself: a sufficient BOND to urge all creatures to life or death, or anything else contained in this world."*

No mention is made of the remaining letters in the outer ring, not used to form these names.

Only the last of these names appears overtly in the sigil, in the arcs immediately inside the outer ring. To each letter of "Galethog", a cross was appended to produce a set of sigil-like images:

These sigils were placed, one to each arc, counterclockwise around the Sigil of Ameth. Of these sigils Uriel said: *"Those seven letters are the 7 Seats of the One and everlasting GOD. His 7 secret Angels proceeding from every letter and cross so formed: referring in substance [i.e., in essence] to the FATHER: in form, to the SON: and inwardly to the HOLY GHOST."*

The letters in the outermost heptagon, just inside the arcs, are derived from the names of the "Seven Angels who stand before the presence of God" listed in Agrippa's Three Books of Occult Philosophy. The names of these angels are written vertically in a seven-by-seven grid; in the final square is placed a cross, representing the Earth, thus:

Z	l	l	R	H	i	a
a	Z	C	a	a	c	b
p	a	u	p	n	h	r
h	d	m	h	i	a	l
k	k	a	a	e	e	e
i	i	e	e	l	l	l
e	e	l	l	M	G	✠

The heptagon is filled by reading the rows horizontally from left to right, applying one row to each segment of the heptagon, going clockwise. Following their usual procedure, the angels presented the letters of the rows first, and only afterwards showed how these rows formed the names of the Angels.

The remaining divine and angelic names in the Sigil are all derived, by various means, from the names of the traditional planetary archangels, which are written within and around the pentagram at the center of the Sigil. As with the above table, the derivation was only demonstrated after the names were presented; this served to demonstrate that the angels were working from knowledge not available to Dee and Kelly, and were therefore more than figments of the magicians' imaginations.

The names of the planetary archangels were formed into a 7-by-7 tablet, by writing them diagonally from the upper left corner in standard cabalistic order beginning with the archangel of Saturn. The final "L" of each name was replaced in the tablet by numbers, usually appended to the preceding letter:

S	A	A	I ²¹ _{8.}	E	M	E ⁸
B	T	Z	K	A	S	E ³⁰
H	E	I	D	E	N	E
D	E	I	M	O	30	A
I ²⁶	M	E	G	C	B	E
I	L	A	O	I ²¹ _{8.}	V	N
I	H	R	L	A	A	21 8.

The seven names between the outer heptagon and the heptagram are "Names of God, not known to the Angels; neither can [they] be spoken nor read of man." They are derived from this tablet by reading the rows from left to right, and are placed in clockwise sequence around the Sigil. In the Angels' view, the derivation shown here is the reverse of the truth. Rather than the planetary angels producing these god-names, "these Names, bring forth 7 angels: the 7 Angels and Governors in the heavens next to us". Thus the Sigil, from its outer ring to its center, represents a descent of power from God into the world.

Between these God-names and the Planetary Archangels in the Sigil stand four additional ranks of beings. Even though they are outside the Archangels (and therefore presumably superior to them) it seems that they are in some way the "children" of the Archangels:

"Every letter of the Angels' names, bringeth forth 7 daughters. Every daughter bringeth forth her daughter, which is 7. Every daughter-her-daughter bringeth forth a son. Every son in himself, is 7. Every son has his son, and his son is 7."

The names in these groups are derived from the tablet by taking the letters diagonally as shown in the diagrams below.

Appendix C

The Seven Tables from which the names of the 49 "Good Angels" are derived.

The arrangement of the Seven Tables.

Note that each angel's name forms an outward spiral in this arrangement. The circle surrounding the tables was described as "very bright, with nothing in it."

Thirty letters in the second and third tables below are missing in the originals, due to damage. The versions shown are reconstructed from information contained elsewhere in the records, and probably are not identical to the originals in all respects.

1 B	2 B	3 B	4 B	5 B	6 B	7 B
8 B	9 B	10 B	11 B	12 B	13 B	14 B

Patterns for the Formation of Each King’s “Ministers of the Hours”

The Ministers’ names for five of the Heptarchic Kings are formed by selecting certain letters out of six of the seven sectors of the Tabula Bonorum, beginning with the sector ruled by King Bobogel and going clockwise around the table. No names are formed from the first sector, ruled by King Baligon (aka Carmara). The green lines in the illustration above show how the first Minister for each of these Kings is formed; the same lines are applied to the next five sectors to form the names of the King’s other Ministers.

In the cases of Kings Baligon and Bnapsen different methods are used. For Baligon, the names of the seven Kings are listed in their order on the Tabula Bonorum. Ignoring the initial “B”s of their names, lines are drawn down the columns to produce the names of the Ministers. This is identical to the method used to get the letters on the border of the Holy Table of Practice, so the Ministers’ names also appear in that border.

In Bnapsen's case, only a portion of the ministers' names derives from the Tabula Bonorum. The names of the Kings are listed in sequence beginning with Bobogel; the name of the 49th and last angel, Bamnode, is substituted for Baligon. Then diagonals are drawn as shown in the illustration to obtain the partial names. Letters from some unspecified source (possibly just random letters) are used to fill out the names to a length of seven letters each.

Since Bnapsen is given power over "wicked spirits", I speculate that the letters that are not from the Tabula Bonorum introduce an element of chaos that permits the holy King to make contact with the unholy beings he controls.

Appendix E

The Twelve by Seven Table in its Two Forms

o	g	o	n	r	o	l	e	g	o	b	o
s	e	f	a	f	e	l	e	l	a	b	a
o	n	o	m	t	u	r	o	p	e	n	y
n	o	d	s	i	l	l	o	p	s	a	n
s	e	g	r	o	r	n	e	s	p	a	n
s	e	g	l	a	r	a	z	a	m	u	l
l	o	n	e	g	a	n	o	g	i	l	a

First Form

The table is formed from the names of the Heptarchic Kings and Princes, without their initial letter "B"s. Each row contains the King and Prince of a particular day, beginning with Sunday and following in sequence around the Tabula Bonorum. The names are written from right to left.

The central squares outlined in red are called "The Heart". The squares surrounding the Heart are called "The Flesh". The two columns on each end are called "The Skin".

The Heptarchic Lamén is formed from this Tablet by transposition of the letters. Letters from the Flesh are placed in the outer square of the Lamén. Letters from the Heart are placed in the corners of the inner square. Letters from the Skin fill the central diamond.

a	l	i	g	o	n	o	r	n	o	g	o
o	b	o	g	e	l	e	f	a	f	e	s
a	b	a	l	e	l	u	t	m	o	n	o
y	n	e	p	o	r	l	i	s	d	o	n
n	a	s	p	o	l	r	o	r	g	e	s
n	a	p	s	e	n	r	a	l	g	e	s
l	u	m	a	z	a	a	g	e	n	o	l

Second Form

A second version of this table uses the same names, but writes them from left to right. The names of the Kings and Princes are written in the *numerical* sequence in which they appear in the Tabulum Bonorum, rather than grouping them by the day they rule.

This version of the Table is used to form the letters found on the Holy Table of Practice. The "Heart" is extracted and rotated ninety degrees counterclockwise, to form the 3-by-4 tablet in the center of the Holy Table. The letters around the edge of the Holy Table are found by reading the letters down the columns of this table from the right side to the left. The letters are applied to the Holy Table, 21 to a side, beginning at the upper right corner and going counter clockwise.

The six columns on the lefthand side of this version also form the names of the "Ministers of the Hours" for King Baligon / Carmara.

Bibliography

Dee Manuscripts

Sloane ms. 3191. Dee's book of ceremonial magick, consisting of extracts and compilations from the angelic conversations. Contains three books: 49 *Claves Angelicae Anno 1584 Cracoviae*, *Liber Scientiae Auxillii et Victoriae Terrestris*, and *De Heptarchia Mystica*.

Sloane ms. 3188. *Mysteriorum Libri Quinti*. Contains the records of scrying sessions for the period from December 1581 to May, 1583, divided into five books. These diaries are the raw information given to Dee and Kelly concerning the Heptarchic magick, and the beginnings of *Liber Loagaeth*.

Sloane ms. 3189. *Liber Mysteriorum Sextus et Sanctus*. Contains the bulk of *Liber Loagaeth*, consisting of 49 double-sided tables of letters and numbers.

Cotton Appendix XLVI, Parts 1 & 2. Contains thirteen "books", covering the actions from May, 1583 to September 1585, plus additional material from later periods. These records are the raw information given on the Angelic Calls, the Great Table, and *Liber Scientiae*.

Other manuscripts sometimes cited are copies or extracts from the above manuscripts.

Published versions of the Dee Diaries

Casaubon, Meric., D.D., *A True and Faithful Relation of What Passed for Many Years Between Dr. John Dee and some Spirits*, Magickal Childe, 1992, New York, NY. A facsimile of the original 1659 edition, produced by Clay Holden. Contains most of the material from Cotton Appendix XLVI, with a long introduction by Casaubon that seeks to prove that Dee and Kelly contacted evil spirits. Early English typescript and speech conventions make this work difficult to read at times. Also contains a "lost" section of the diaries, found by Clay Holden.

Peterson, Joseph, ed., *Mysteriorum Libri Quinti*, Magnum Opus Hermetic Sourceworks number 20. 1985, Magnum Opus Hermetic Sourceworks, Felindenys, Wales. An edition of Sloane ms. 3188 in modern typescript, with annotations by Elias Ashmole and the editor.

James, Geoffrey, *The Enochian Evocation of Dr. John Dee*, Heptangle Books, 1989, Gillette, NJ. [Reprinted by Llewellyn, 1994 as *The Enochian Magick of Dr. John Dee*] Largely a version of Sloane ms. 3191 in modern typescript. James' translations of the Latin have come under criticism, as has his editing of some passages in English.

Turner, Robert (ed.): *The Heptarchia Mystica of John Dee*, Magnum Opus Hermetic Sourceworks 17: Edinburgh 1983, 81 p. Collation of two MS copies in: Sloane 3191 and Additional MS. 36,674.

Turner, Robert (ed.): *The Heptarchia Mystica of John Dee*, with a contributory article by Robin E. Cousins; Latin translations by Christopher Upton; illustrated by Charles H. Cattell; Wellingborough, Northamptonshire: Aquarian Press 1986, ISBN: 0-85030-470-9 (pbk). 2nd enlarged edition of: Magnum Opus Hermetic Sourceworks No. 17. The standard Heptarchic source in English, with essential commentary on the Sigillum dei Aemeth and the Holy Table.

Turner, Robert. *Elizabethan Magic: The Art and the Magus*, foreword by Colin Wilson; with contributory material by Patricia Shore Turner and Robin E. Cousins; illustrated by Charles H. Cattell and Jane O'Reilly; translations from the Latin by Christopher Upton, Shaftesbury: Element Books, 1989, ill., maps, bibliography. An excellent distillation of the essentials from Dee's original Enochian material and other magical documents of the same period. Robin Cousins' material on the geographic locations governed by the Parts of *Liber Scientiae* is a unique resource.

The Golden Dawn system of Enochian Magick

Regardie, Israel, *The Golden Dawn*, Llewellyn Publications, 1971, St. Paul, MN. Reprinted at regular intervals. Contains detailed descriptions of the Golden Dawn's elaborate system of Enochian Magick.

Zalewski, Pat. *Golden Dawn Enochian Magic*, Llewellyn Publications 1990, St. Paul, MN. Contains additional material concerning the Golden Dawn system, including the extension of the G.D. "pyramid" method to cover the angels of the Heptarchy.

Zalewski, Chris. *Enochian Chess*, Llewellyn, 1992, St. Paul, MN. The Golden Dawn method of divination derived from the Enochian material.

Hyatt, Christopher S., Ph.D. *The Enochian World of Aleister Crowley (Enochian Sex Magic)* Falcon Press, 1993 ISBN: 0-56184-029-7 Another description of the Golden Dawn system, with additions and extensions from the works of Aleister Crowley.

Other material related to Enochian and Heptarchic Magick

Crowley, Aleister. *Liber LXXXIX vel Chanoek*, published in various compilations of his short works. Crowley's brief description of the Golden Dawn system of Enochian magick. He leaves out many essentials.

Crowley, Aleister. *The Vision and the Voice*, Sangreal Foundation, 1972, Dallas, TX., and other editions. The magickal record of Crowley's explorations of the thirty Aethyrs of *Liber Scientiae*. With an introduction by Israel Regardie and extensive footnotes by Crowley.

Denning, Melita, and Phillips, Osborne. *Mysteria Magica*, Llewellyn Publications, 1992, St. Paul, MN. Volume V. Describes the Aurum Solis system for using the ministers of the 91 Parts of Liber Scientiae.

James, Geoffrey. *Enochian Evocation: The True Calls*, Gnostica Magazine, Sept. 1978, Llewellyn Publications, St. Paul, MN.

Laycock, Donald C., *The Complete Enochian Dictionary*, Askin Publishers, 1978, London, England, UK. [Reprinted by Weiser 1994] Recently reprinted in paperback.

MacLean, Adam. *A Treatise on Angel Magick*, Phanes 1990. The Golden Dawn relied almost exclusively on an eclectic mish-mash that was compiled almost two centuries after Dee's death called *A Treatise on Angel Magick*. It was this resource that cleared up Israel Regardie's confusion as to why Aleister Crowley (who used the keys as a means of pathworking) made certain numerological associations in his account of the experience. Transcript, in toto, of Harley 6482.

MacLean, Adam. *Angelic Magic*, part of his *Magnum Opus Hermetic Sourceworks Series*, a limited publication in England, contains a copy of Rudd's MSS. (8/95 rmcg): Same as "Treatise on ..." above. *Magnum Opus Hermetic Sourceworks* #15.

Rowe, Benjamin. *Enochian Temples*, Black Moon Publishing, Cincinnati, OH, 1988. A small chapbook describing Rowe's method for creating a three-dimensional astral temple from the Elemental Tablets. Related materials available in manuscript form, or via the Web.

Vinci, Leo. *Gmicalzoma! An Enochian Dictionary*, Regency Press, London & New York, 1976. Another exhaustive dictionary of Angelic words.

Hall of Shame

Schueler, Gerald. *Enochian Magick, Advanced Guide to Enochian Magick, Enochian Yoga, Enochian Tarot, Enochian Physics*, etc. All published by Llewellyn Publications, St. Paul, MN.

Schueler's first two "Enochian" works are hasty and unscholarly assemblages of material from the Golden Dawn (mostly via Aleister Crowley's inadequate presentation in *Liber LXXXIX vel Chanoek* and from his *The Vision and the Voice*), coupled with the products of Schueler's prolific imagination. Robert Turner called the existence of these volumes "lamentable", and I agree without reservation. These two books consist almost entirely of errors, misconceptions, fabrications, and flummery; readers will be far better off going to Schueler's sources than trying to extract anything useful from them.

His later books are almost entirely the products of his own imagination, and so at least have the advantage of coming from a single source. Readers have had widely varying opinions as to their usefulness. His *Enochian Tarot* is worth purchasing for the artwork by Sallie Ann Glassman, regardless of one's opinion of its design. *Enochian Physics* is distinguished by having the lowest information content of any book its size published in this century. In the chapters that are not adaptations from Aleister Crowley, the information content approaches zero.

Tyson, Donald. *Tetragrammaton: The Secret to Evoking the Angelic Powers and the Key to the Apocalypse*. 1995, Llewellyn Publications, St. Paul, MN.

Tyson combines the Enochian material with Fundamentalist millennialism and Lovecraftian horror fiction, to paint a picture of the Angelic Calls as the means by which the apocalypse will be brought about. In the process, he twists facts to suit his thesis, selectively interprets the Calls, and blithely dismisses contrary portions of the record as "not what was intended". Much of his "analysis" of the Calls is in the style perfected by Kenneth Grant. That is, grab any association that seems to support your idea, taking it out of context as necessary, and disregarding such minor things as anachronisms, logical non sequiturs, etc.

“Enochian Entities - Book B” – By SaToGa

“Enochian Entities – Practice & Theory – By SaToGa”

Volume #1 Released: January 1, 2011

The Above ‘Chapter-Break Image’ is the
WatchTower Seal ‘Colors’ – *Original Version*

***"Enochian Magick is like Quantum Mechanics-
The 'Observer' affects the Outcome" -SaToGa***

"Urim & Thummim"

I invented an 'electro-magnetic pendulum'. [Figure 4]

It sits in my temple, alone, *grounded*, shielded, and off to the corner.

It is composed of a dry cell battery, a stand which hangs a metallic ring, within a loop of wire. If the slightest electromagnetic 'sensation' comes within a few feet of this sensitive, *but ugly looking contraption*, the wire holding the swinging ring will make a *circuit connection* with a buzzer.

This is my alarm, *alerting me* that an EMI &/or PSI field has '*breached the area*' & entered the Temple space...and wants "*something*".

These Enochian Entities [EE] have been *affectionately dubbed* by us as 'Electrical Entities', as *Volume #1 of this book- gave insight into our electrical disturbances (Electro Magnetic Interference) caused by them. Since, I have procured a *simple Faraday cage* to keep my computer hard drive from constantly getting erased. [It doesn't work too good] *Inventions of necessity, with wired coils disseminating 'currents' out of home, and grounded into the outside lawn.*

- **"Enochian Entities – Practice & Theory – By SaToGa"**
Volume #1

The electronic gizmo shrieked in my temple space, recently, right around the time I usually do my rituals.

That evening, I opted to be absent from any ritual, and rented a DVD instead. I like to think perhaps EE *misses* me, and like children, ring the doorbell and ask if their friend can come out to play. There is no likelihood of any EMI pulses to *play* in the temple space, so if the buzzer sounds, the chance it was done by some type of PSI condition is more than coincidental.

Electro-Magnetic Pendulum Schematic
 [Photograph of a Page From My Grimoire]

The DVD remained in the box, and I sat in the temple, a little groggy.

I then performed a simple EE oratory, and waited for a response within the shewstone.

--Nothing.

I thought nothing of it, because when I put some concentrated thought into EE, They usually manifest in some sort of weird Synergy.

...I really just wanted to relax that night.

The next night, I did perform a ritual. I knew *They* wanted to 'talk'. I broke out the heavy armor and evoked a heavy duty EE Hierarchy.

I evoked all the 3/4/5 God names, Kings and Seniors of the 4 Watchtowers.

I will paraphrase the following vision.

The EE *again*, seem to be working under some type of time restraint.
This happened during John Dee's time too. In Volume 1, there is a
ritual I performed, called:

**“WINTER SOLSTICE, LUNAR ECLIPSE OVERLAP
FIRST TIME IN 456 YEARS”**

HOME NEWS OPINION BU
Solstice- JOBS CARS HOME
BY REBECCA LINDELL, POSTME
2010 COMMENTS (60)
STORY PHOTOS (1)

This year's winter solstice — an event that will occur next Tuesday — will coincide with a full lunar eclipse in a union that hasn't been seen in 456 years. File photo.
Photograph by: Bruce Edwards, The Journal, file, CanWest News Service

That 3 digit grouping of numbers, 456, appear in the Enochian Keys/Calls. This Lunar eclipse happed 456 years ago, during the Dee/Kelley era.

[John Dee was offered a readership in mathematics at Oxford in 1554] (*See Appendix For More 1554 References*)

The EE time limitation seems to be overlapping again. The EE are Lunar Sabbath *oriented* [see explanation later on in this Volume], so an Eclipse that is Lunar [combined with the Solstice] is significant. Since I performed the above said ritual, my relationship with EE has

increased many times over. Gabriel's dialogue of the hidden doctrine in TFR makes me think *this generation is ripe for Enochian enfoldment*. Uriel's announcement as the final era, coupled with the appearance of Liber Loagaeth...

"The final age before the end all things".

I am not an apocalyptic junkie. I like the world. I really do not want God's mighty foot crushing it. I always understood the dual nature of visions, and seek the other "*EE Crease of Energy*" [Volume #1].

However, despite what I enjoy, EE have been coming on pretty adamant of what is to transpire.

Apocalyptic Overtones

Jan 7, 2011

<http://groups.yahoo.com/group/enochianmagic/message/98>

Recently... some of the EE contact, [especially with the Seniors] have been alluding to:

-Apocalyptic Scenarios

-Ice Age

-Pole Shift [*more than a strong hint*]

-Time Line Convergences

There are always multiple ways to discern vision symbolism.

I am just '*putting this out there*', so "*interpret*" according to your own personal beliefs.

Back to my paraphrased EE 'big-guns' rite...
The EE told me I was a "*Slacker*". They told Dee the same thing.
[I feel kind of honored!]

EE also said I am a nuisance by interjecting a lot of pointless questions that have no relationship to what *They* are presenting.
I do not like to add my cup of opinion to the Enochian Horror stories,
but EE do show They have an "*Agenda*"...What I ask is unimportant unless it pertains to *Their Materials*.

EE's main mission is to enlighten and evolve- Humanity.

They have become reluctantly uncomfortable, by narrowing it down [out of necessity] to *just* the select wizards who will listen and record it for mass distribution.

I am an Enochian scribe.

I work rituals, and record what *They* tell me to. I then upload it to the internet so others can receive it... free of charge.

Back on track...

Because obviously, I am a '*slacker*', the EE are going to speed things up, *Themselves*. Similar to the "Light that flew into Kelley's head" when he was scrying and filling up parchment with EE Materials, I too "*will be privy of a sort*".

EE told me to record this:

" As [... *Voice recorder Inaudible Here...*] 'Urim & Thummim' to reveal what was meant to keep as secret, so too shall thou bear witness to our *light stones*. So shall you appear as our priest for this time and time again, as did the High Priest, and as **Joseph Smith of old...*"

http://en.wikipedia.org/wiki/Urim_and_Thummim

**Book of Mormon, Gold Plates & Maroni*
[Was Maroni an Enochian Entity? Personally I do not *think* so...]

I am going to splice an article here, as I feel it is relevant:

“Paranoid Email + Root Cause of *Enochian Sensationalism*”

<http://groups.yahoo.com/group/enochianmagic/message/91>

I have been corresponding with this certain individual for a few weeks now.

*[Not sure if it is male or female-, not sure if it matters, either way.
Hysterical and emotional break down can be sexless]*

Today I received a reply to one of our several running conversations.
This day's email seemed ripe with paranoia.

The classic '*Enochian Horror Stories*' I warned about in my previous discussions.

This is not in anyway a '*slam*' against this person, but I am just using this as an example on why Enochian seems to attract a lot of negative sensationalism.

**I will leave all personal details out to retain their Anonymity.
However, I kept the grammar and spelling errors intact.
Comparing their previous emails to this one is evident this person was in a highly charged 'manic' condition**

Hi again SaToGa!

I remember in one our conversations you mentioned you moved from New York City to Arkansas because the enochian angels got you the wife hook up lol. I came across something on the news check this out. it all runs thru out the same time you started listing your enuchian threads;

- **"ARKANSAS HAS HAD OVER 500 MEASURABLE EARTHQUAKES SINCE 10/10/10"**

Arkansas (CNN) ""Things are still shaking in Arkansas.""

*More than 500 measurable earthquakes have been reported in central Arkansas since September 20, ranging in magnitude from a barely noticeable 1.8 to a very noticeable 4.0 (recorded on October 11), according to the U.S. Geological Survey.
Geologists can't say whether they'll stop anytime soon.*

*I am not trying to say your magick is causing this, but you have to be careful
with karma!*

*yesterday I was reading the news and came across a FREAK WINTER
TORNADOE touched down in your area and killed 3 people!
WINTER TORNADOES??*

- **"Deadly Arkansas tornado had winds up to 140 mph at peak, tracked for 21 miles"**

<http://www.kfor.com/news/sns-ap-ar--tornadoes-ark,0,7502181.story>

*NOW THIS MOURNING I SEEN THIS HEADLINE BECAUSE NOW I HAVE
BOOKMARKED ALL THE
YOUR ARKANSAS NEWS CHANNELS ONLINE!!!!!!!!!!!!!!*

- **"1,000 Birds Fall From the Sky in Arkansas"**

<http://www.todaysthv.com/news/local/story.aspx?storyid=136195&catid=2>

""Saturday night, ringing in the New Year took on a whole different meaning for the citizens of Beebe. Around 11:30 p.m., enforcement officers with Arkansas Game and Fish Commission began getting reports of dead black birds falling from the sky in the city limits of Beebe.""

Arkansas Game and Fish Press Release:

BEEBE, Ark.-- Saturday night, ringing in the New Year took on a whole different meaning for the citizens of Beebe. Around 11:30 p.m., enforcement officers with Arkansas Game and Fish Commission began getting reports of dead black birds falling from the sky in the city limits of Beebe.

Officers estimated that over 1,000 birds had fallen out of the sky over the city before midnight. Most of the birds were dead, but some were still alive when officers arrived.

The blackbirds fell over a one-mile area in the city.

AGFC wildlife officer Robby King responded to the reports and found hundreds of birds.

"Shortly after I arrived there were still birds falling from the sky,"

King said. King collected about 65 dead birds that will be sent to the Arkansas Livestock and Poultry Commission lab and the National Wildlife Health Center lab in Madison, Wis.

UPDATED:

BEEBE, Ark. — The carcasses of some of the nearly 5,000 red-winged blackbirds that inexplicably fell on an Arkansas town on New Year's Eve night will be sent for testing to determine the cause of death

http://www.msnbc.msn.com/id/40885546/ns/us_news-weird_news/

Necropsies performed Monday on the birds in Arkansas showed the birds suffered internal injuries that formed blood clots leading to their deaths, The Associated Press reported.

The AGFC has flown over the area to gauge the scope of the event. There were no other birds found outside of the initial area.

AGFC ornithologist Karen Rowe said that strange events similar to this one have occurred a number of times across the globe. "Test results usually were inconclusive, but the birds showed physical trauma and that the flock could have been hit by lightning or high-altitude hail," Rowe said.

**THE ORNITHOLOGIST IS NAMED ROWE! LIKE YOUR FRIEND BEN ROWE!
ON YOUR NEW YEARS EVE RITUAL YOU POSTED THE TIME AS BEING 11:30PM
WHICH IS WHEN THE 1000 BLACK _BLACK!!_ BIRDS FELL FROM THE SKY THAT
WERE HIT WITH SOMETHING!
SOMETHING AS WITH ELECTRO MAGICK ENERGY!!!!**

And then, this...

- **"State commission says dead fish now cover 20-mile section of Arkansas River"**

By Associated Press

6:20 p.m. CST, January 1, 2011

<http://www.5newsonline.com/news/sns-ap-ar--deadfish,0,2318825.story?track=rss>

http://www.msnbc.msn.com/id/40887450/ns/us_news-weird_news/
http://arkansasmatters.com/fulltext/?nxd_id=380286

OZARK, Ark. (AP) — An Arkansas Game and Fish Commission spokesman says dead drum fish now cover a 20-mile section of the Arkansas River near Ozark.

Seven teams from the state agency visited the affected portion of the river Friday. Commission spokesman Keith Stephens says an official estimate of how many fish have died is expected on Monday, but he tells the Arkansas Democrat-Gazette that the number is likely in the hundreds of thousands.

*SATOGA GOD IS TRYING TO SHOW YOU WITH ALL THE SYNCHRONISITES THAT
YOUR ENOCHIAN MAGICK IS CAUSING ALL THIS INJURYS AND DEATHS!
I NO LONGER WANT TO CORRESPOND WITH YOU BECAUSE I FEEL THAT I AM
ONEOF MANY ENABLERS AND I DO NOT WANT TO ATTRACT NEGATIVE KARMA
ON ME AND MY FAMILY!*

[Edit: Personal details Omitted from this individual's EMail]

I am sure this individual is trying to help me.

If the pen-pal relationship didn't sour, I was going to [jokingly!] mention maybe the EE apocalyptic intent was to send me to Arkansas because of the vast amount of Crystal Mines, to which Arkansas is well known for.

With all that piezoelectric oscillation banging into the Aethyrs... that would significantly strengthen my apocalyptic hammer!

Maybe, 'praying for my doomed soul' was this person's initial intent since the beginning of our conversations...

Perhaps this person's own innate paranoia got the best of him/her.

Maybe this person's emotions were 'tweaked'- due to the Holiday season and just needed *a release*.

I will never know as all communication was halted on their end...

Of course I will comply and respect their wish.

P.S. He/she said... she/he would pray for me.

→ I would less likely blame me, and look towards a more scientific, rational explanation...like HAARP, the BP Fiasco, *Chemtrails* or even, maybe... the LHC.
[Large Hadron Collider]

I had a *brief vision* of this last year-

As I described in:

“Enochian Entities – Practice & Theory – By SaToGa”
Volume #1:
“EE somnambulism: ZAX Dream”

However, My Own Opinion- is based on legitimate science.

- I would go with either an Arkansan ‘Caldera Volcano’ or the *New Madrid Fault Lines* getting ready to blow.

I think the 'apocalyptic scenarios' EE enjoy. serve two-fold:

1) Entice DEE to stop 'slacking', because there is a set time frame the EE are working within.

2) The apocalyptic scenarios- I see more as "the death of the ego".

Enochian Magick should leave the mage 'evolutionary exalted'.

When Fundamental Religious Doctrines such as "antichrist" and "Armageddon" rear their head/tail, I believe the exegesis [from a neutrally spiritual/non-religious approach] 'should' dictate it.

I also noticed EE enjoy using symbolism from the Pseudepigrapha writings, and Nag Hammadi Scrolls.

But...there is definitely an ‘ominous feel to the Earth’s energy matrix’.

People are generally in anticipation of '*something big is about to go down*'....

Maybe it is the mainstream media, that is always trying to instill fear into the hearts of it's viewers (?)

Again... I personally despise all the 'EE bad rap' stories and the negative attention it gets, and I do my best to rid it when I can.

**When the EE Materials are understood and worked
by *Sanctioned**, experienced mages...
They bring powerful, quick results as the prime diversionary
backdrop
[all the while keeping the mage, active]
-as EE *evolutionary forces* tweaks the magickians energy fields**

[*See Volume #1 about "EE Sanctioning"]

Back to the 'Urim & Thummim'...

Originally when this was told to me, I really did not *grok* what *They* meant.

It started unfolding after so many years of doing Magick, in general-[almost 40 years!]...then exclusively working only "Enochian Magick".

*Being bestowed an
"Enochian-esque Urim & Thummim",
after so many years,
allowed me to feel- I really was 'getting somewhere'...*

Basically what it entailed, was this:

Besides my usual EE Ritualistic 'contact', there would be a
'*ceremony-less*' contact time as well.

I enter my Temple, adorn myself with Lamen and Ring.

Then I sit full lotus, recite the 1st and 2nd EE Key, meditate briefly until I reach *Alpha level*.

I relax [in the Temple recliner!] in that state, grab my notebook and voice recorder and establish “*Channeling Contact*” with the EE...

→ Most of the time: Dee and Kelley would perform an Oratory Prayer & the EE Communication began. Sometimes, Dee/Kelley did Nothing at all, and “*Some-Thing*” would instantly appear. Spiritualists would tell you what Dee/Kelley did was Not Magick, but rather, just a generic Séance. ‘*Just Pray and Summon*’

...This will manifest differently as a wide array of variables enter the equation. One such variable is contingent on what EE Ritual I performed, prior. Sometimes the EE channeling session will be an addendum to that ritual. It all depends.

During these sessions, I am more aware of understanding the EE Materials. My memory is better, almost as if I am downloading information from vast EE archives. My mind ‘cross indexes’ in visual depth, and my clairvoyant abilities are also tweaked.

NOTE: Unless I specifically state “Ritual”, the information will be understood as originating in an EE induced trance state.

Photograph of a Visual Page From My EE Grimoire.

Armed with my Voice Recorder, I also *scribble* pictures [in the dark] from the visions I encounter.

Sometimes, these '*notoriously quick*' EE Imagery Flashes can get forgotten.

"Temple Tools"

EE has repeatedly told me all the Enochian Materials are to be
"Knitted Together"

[See Volume #1 also]

In My Own EE Temple, I incorporate the following:

Holy Table

[Holy Table of Covenant]

After the altar is all set up, I use as was suggested, Red Silk covering... This conducts Energy [bioelectric energy]

Sigil Dei Ameth

This Sigil acts like a '*combination lock*' when deciphering the names of the beings that grace the outside circumference.

[Other EE Material Items had 'removable parts'- *insides* that were *manually manipulated* and turned 90 degrees!]

Sigil Dei Ameth's Bee's Wax composition is organic, & will not impede *bioelectric* energy

7 Ensigns of Creation

[with Enochian Letters]

I also use the appropriate Ensign when I call the [Heptarchial Mystica] King, Prince and 42 Ministers.

**Like an ascending/descending spiral staircase...the Ten above items spiral energy upwards, into dimensions that transcend our three dimensions.
They radiate within the shewstone... that lays upon all of it.**

Liber Loagaeth and other Enochian Materials are sometimes used to *breach* our normal 3D '*laws*'.

The EE Materials were for an Era when Magickians would Grok "Quantum Physics"

[Liber Loagaeth will be discussed later in this Volume].

“EE provided Dee with what he Wanted”

Premise: “EE provided Dee with what he Wanted”

The Heptarchial Entities [They are *still*- EE] – Kings, Princes- show many of them are keen for fighting wars in the waters.

This was something very appealing to Dee.

Also the 91 Governors and parts of the Earth seem to be *personally* directed to Dee, as he was a navigator, explorer, map maker, history student extraordinaire, etc.,

Example: the attributes of the Mercurial King shows skill in warfare of the waters.

Compare traditional Mercurial correspondences with King Bnaspol. The abilities these Kings and Princes exhibited were more aligned with the needs, wants, desires and interests that Dee held dear.

Spanish Armada ring a bell?

The 91 parts, [*which have ‘magickal counterparts’*], were ‘peppered with the flavor’ Dee hungered for...

Political dominion for his Queen.

For each individual magus, all these attributes differ.

If you require a certain task to be performed, no matter the task- you will have it fulfilled by one of these EE.

I have worked with the same King [Bataiva/h] over and over, and He stretched into other WatchTower “*areas*” ...

Though He is *of* Fire, He performed Water, Air and Earth “tasks”.

This is why ‘Neo-Enochian’ practitioners get results...

*"Enochian Magick is like a Quantum Machine-
The 'Observer' affects the Outcome."*

Back to: **Temple Tools**

5 Wands [Optional]

-used exclusively for EE ritual.

One for each element.

[Consecrated]

I originally made these by exposing them to their own *native* element.

Example- Fire wand was put in oven until it turned a golden brown.

When EE came onto the scene- They have such a varied and wide element base, *Their's* 'over-lapped' what ever element exposure I previously employed.

Lamen

The second one. The first one made was of demonic interference but can be used for other magicks, such as Solomon's

Ring

I was told by EE to wear mine on my left, marriage band finger
[Volume#1]

I also have the **4 WatchTowers** up, as well as the **Tablet of Union**.

Some mages feel these are necessary to balance the energies.

I do not feel that way.

The watchtowers are only a small group of EE Materials, but were of prime importance to older magickal orders because they did not have/incorporate all the EE Materials.

“What more could you want?”

“The Holy Table, for example- is called "The Table of Covenant".

"Covenant" tells me there is much more to discover.

The Lamen, Ring, Ensigns- there is much information "hiding in plain sight". The Six Round Tables of the Kings, for one- is something I personally would like to know more about.

All these questions is what I want to learn more about.

As far as I know, a unified system is lacking these answers.

If I ever discover anything good, I promise to share..."

➔ No matter how many reference books about the Enochian Materials are circulated [mine included!]- the serious student must go directly to the actual Dee/Kelley Diaries.

“...If I ever discover anything good, I promise to share...”

“A Time to Share”

“But in the same instant when Adam was expelled, the Lord gave unto the world Her time, and placed over Her Angelic keepers, Watchers & Princes”

-Geoffrey James, “Enochian Magick of Dr. John Dee” Page #1-2

“As an instrument of the thrashing... This Doctrine is a Flayle”
TFR page #161

“Therefore you may do anything” –Mapsama TFR page #145

“Quinta Essentia Enochianas”

→ **“Enochian Magick” contains 5 Parts- Quintessence**

1) “Liber Loagaeth” Gebofal
– 49 Gold Leaves

—
[Joseph Smith received Gold Plates From an Angel named
“Maroni”- see this Volume]

2) 49 Keys [“Calls”]
- but only have 48

3) WatchTower Tablet
-Original & Revised
(See Volume #1 regarding the “Tabula Recensa”)

4) “Heptarchial Mystica”
-A Complete Planetary ‘Magick’ System

5) “Liber Scientiae Auxilli et Victoriae Terrestris”
– The 91 Parts

Liber Loagaeth had the input of 7 Entities,... lending Their voices,
either directly or indirectly, in regard to this Book.

This Book WAS that Important!

In the “ZAX Vision”, the EE *explained* it as:

This is the Analogy of Correlation

(This Volume: “ZAX Vision: Get Thee Behind Me- Satan!”)

“Think of the 18 Calls as The Keys that Open the Tumblers
of the Loagaeth cities.

The WatchTowers contain It’s occupants, &
the Governors of the 30 Aethyrs” [the 19th Key]

The Holy Table- *is as the* -Loagaeth & 30 Aethyrs.

The 7 Ensigs- *is as the* -Heptarchial Mystica

Sigillum Dei Aemeth- *is as the* -WatchTowers

Microcosm- *is as the* –Macrocosm

The EE Infrastructure: “Knitting Together”

30 Aethyrs are “of” the Cities of Loagaeth

Liber Loagaeth are 49 gold sheets with a differing front and
back.

In other words, this signifies “Thickness or Volume” and that
each “page” is 3D- *maybe, even...* “Multi-Dimensional”

The 19th Call is a Trumpet that Calls the 91 Governors

The 91 parts are ‘etheric counterparts’ “of” the 30 Aethyrs

Heptarchial Mystica is the 'Cosmology' and 'Calendar' system of the EE MultiVerse(s)

Previously, I wrote:

"Dee's diaries are vague in establishing a direct link between the Enochian Keys/Calls and the Watchtower tablets."

The WatchTowers contain the 'Census' [inhabitants] of the 30 Aethyrs, 91 Parts and Loagaeth.

Think of the WatchTower as a telephone directory.
Find the occupant and dial it in!

The 18 Calls/Keys [including the 19th] are directly related to Loagaeth.

If Loagaeth was a Nation, the 18 Calls is it's Declaration of Independence. ['Directives']

Liber Loagaeth relays 3 types of Knowledge.

Triple-fold is a common theme in The Enochian Materials.

The 2nd EE 'Lamen' contains 3 "parts"

- The Flesh
- The Skin
- The Heart

The First Item received- 'The Tablet of God' [in this Volume] is also 'of' 3 Parts, and appears to be divided into 4 parts- like a "*prototype*" of the soon to come -WatchTower Tablet.

The Lamen- *is as the* -Tablet of God

The EE “*Solomonic-style*” Ring, by being worn- shows you have power in your hand to control.

The Lamén, [like the breastplate of the Old Testament Priests] signifies- within your aura- you are composed of the same fabric as the EE “*Theocracy*”.

The EE were very interested in the World’s Kingdoms.

We see this as an interest because the EE Hierarchy is composed of a “Theocracy”- like the 12 Tribes of Israel.

EE has Kings, Seniors, Princes, Ministers and of course,
God(s)...and a God of Justice
(Scales of Balance)

The purpose of Loagaeth:
Circulating it’s Energy Matrix/Theocratic Kingdom ..then-
“The End of the World”.

Again...

“But in the same instant when Adam was expelled, the Lord gave unto the world Her time, and placed over Her Angelic keepers, Watchers & Princes”

“As an instrument of the thrashing... This Doctrine is a Flayle”

“Therefore you may do anything” –Mapsama

As the Grid Pattern was very special to John Dee [see his Book of Soyga]...*the diagrams consisting of boxed squares proved nothing unusual in Dee’s current Understanding...*

The Vertical and Horizontal Lines form Latitude and Longitude Lines, aligning the Zodiac, Celestial/Cosmological Spheres, Planets and Elements.

I believe some of the familiar number sequences in the 18
Keys refer to this: “456”, “9996”, “3663”, etc.,

**Some of the context from these Keys make these
numerical sequences appear as “Zones” or “Districts”...**

Gnosticism plays an important function in the Enochian Materials.

Galvah is Sophia, trapped in flesh, yearning to reach Her destination.
Unwrapping the imprisoning skins of the fallen Adam.

Mondays were the EE Sabbath,
and the EE calendar demonstrates this.
[Spoken of in this Volume]

The EE Hierarchy is a Balance of Male AND Female

Again... The EE enjoy making usage of
Gnosticism, Pseudepigrapha, Nag Hammadi Scroll imagery.

It is my belief- the EE 'God of Justice' differs from the Old Testament
Demiurge- 'Ialdabaoth'. ['Gnostic *speaking...*']

The EE are rebels against *Entropy*... seeking to overthrow the
shackles of flesh, to which,
Humanity- were *imprisoned* by...

The unmade/uncreated Universes, still slumber... awaiting
attention/LUX.

The Savior, who appears as the First Leaf [received last] of Loagaeth,
resurrects 'black matter'.

He *awakens* from the dead ... [sleeping] "*inertia*". ..Similar to the
Cthulhu cult

What rests, comes alive - when the redeemer [of EE Christian
symbolism] ...saves the slumbering masses of Un-Creation.

The First Leaf of Loagaeth was presented last, detailing the Christos.

It was presented by Galvah, who again-
is the personification of Sophia [Imprisoned Flesh]

Thus, we are all creators *in* Loagaeth.

New Year Rite

12-31-10 to 1-1-11

Performed 11:30Am- 12:23 AM

The Enochian Sphere [*similar to the descending crown sphere of the 'Middle Pillar' exercise*] above my head seems to have changed.

It now appeared 'artificial', as if it was hollow and metallic.

The usual globe of power above my crown chakra has now shifted location and is wrapped around me.

The globular sphere as a coat of many lights might return to it's original crown setting next time. (?)

I open the East Fire WatchTower Hierarchy:

- 3 God Names, the King and 6 Seniors-

I Vibrate Keys, #1, #2 ...
& #17 Fire of Air

In this Volume: Appendix

"Proper Key Index" – [Which Enochian Call Is Used?]

I call King Bataiva once more, this time- within *the* flaming red Heptagram, superimposed "*through the Heptagon*" with the appropriate WatchTower Seal.

I wait until I can feel it "hum".

This transpires:

I see what appears as a *playing card* King- His profile.

Blond hair, 'page style' haircut.

He wears a red *shiny* material 'royalty' coat with white fur hems, embroidered with green and red diamond shaped stones.

He says I have done well, and I ask for his blessing. He says

"Blessing will not come now, but will come later".

I 'see' an explosion coming from a round *doughnut shaped* rock.

Billowing black smoke, then comes fire...as the rock appears to be
that of a black rubber tire/wheel.

I hear another '*bomb*' blast ...*mingled with a 'trumpet' blast*
and then hear:

"The *voice of the seven thunders* ... echo to the minds that know me.
I maketh thee a great seere, to learning the ways... the magick of the
old ones. Understanding and know the modern ways of the cycle of
things passed. Awaiting eagerly with angst, and awaiting the wraith of
god and power, glory with all things, linked as one circle..."

•

As I wrote in "**Enochian Entities – Practice & Theory – BY
SaToGa**" **Volume #1**:

... I oftentimes hear the voices of the Kings as Binaural.
For some reason, the language takes on the old archaic 'Olde
English'... '*Thee*', '*Thou*', *etc.*
It personally turns me off [does not make it sound anymore *holier*, in
my opinion] and transcribing the ritual notes with this can be nerve
wrenching.

•

[I see a thick heavy chain with links being pulled taut]

"...[inaudible] ...no beginning and no end.
A lock, deep in the hearts and minds of those that know us.
Do not share thy glory with anyone.
We are angels [i.e., messengers] of old,
not the ones you are familiar with.
These are the un-named 7...*Untouchables* – who knoweth not and
who descended not...
who keepeth away the '*privy*' [?] of men ...thou understanding this is
unique, more of a feel than of a touch".

I ask a personal question about putting more notes together for volume 2.

the 6 seniors come together- amidst red ambient smoke-
I see a round table with only 2 chairs- but they all sit down at once
[even though there are still only 2 chairs]

The Table looks like red glossy mahogany wood, and what appears
as an exaggerated huge gavel is now present.
'Two Seniors who share one arm' sit at the head of the table and grab
the hammer, holding it above their heads, sideways.

The hammer sideways, looks like the 'T' of *this* East WatchTower.

The hammer is on fire.

They throw it at me and it opens up an 'aire' that spirals and sparkles
multi-colored sparkles of light.
*[my physical body jumps and I literally duck, thinking my face will
meet this ballistic huge hammer]*

I go inside a long black tunnel and I hear "knitting together - knitting
together"...
[I see Betsy Ross sewing the American Flag]

I see the 'B' and 'C' on the flag King Carmara introduced to Dee.

The prior 'armless female head and bust' originally on King
Carmara's flag changed form and the woman [*now*] grows arms and
legs and she faces me and says "It is now time to walk!"

See: **"Enochian Entities – Practice & Theory – BY SaToGa"**
Volume #1-
Chapter: "C/B Cycle"

I see the B and C superimpose over each other to form an Enochian
Letter.

[it flashed in and out so quickly but I believe it to be the letter "N"]

[The EE are well known to give very quick imagery flash]

The flag opens wider [stretches] and a cross on it grows as the C/B gets smaller until it fades out of view...

The *Original Great WatchTower Table* appears on this flag and blows hard in the winds.

I hear "This is now the union of the systems" and "Make it one now!"

I see what appears to be a funnel, [wide open mouth] turning to me now, as a dark tunnel, [folding in and out] of itself with 30 separate ridges..."Spiral these Aethyrs as one giant snake".

Each one overlaps over another one. The border lines dissolve and it appears as a '*wall-less labyrinth*'..."The maze is only one, but to the uninitiated it appears as 30".

They [?] say "Open the book, and judegeth not, but learn"

I see an eagle that turns into a vulture as it flies by.

I am told by King Bataiva "This is for eating the corpses of the Union and the wounds of the union lay bare the siege" and "The time of the great disaster that shall befall all mankind... and the greatest gift that was lost, was the purity of their hearts [*pause*]...and of their [*louder*] minds".

I see someone sliding down two banister rails, skipping steps down a winding staircase.

It appears again as King Bataiva.

He walks towards me, trailing behind him the train of his royal robes.

He opens up his robe and I see within his *heart*- 3 daggers embedded within.

He pulls out the middle dagger and suspends it above his head.

Lightening hits it and His hair '*sprays upwards*' like *igniting a power static discharge*.

Everything lights up and He is standing in front of the *Original Great WatchTower Table*

He simultaneously pulls the remaining two swords out and holds His arms out horizontally, [*like a crucifix*] ...still holding them.

He approaches me, and stands chest to chest with me.

He wraps His arms around me and *crosses* his arms.
The two swords *form* an 'X' behind me.

The sword suspended over His head, drops behind him- point down- the sword hilt forms a 'T'- *the sword hangs stationary, the length of my body...*

"2 swords crossed behind ... one sword to your front...- encompassed in steel, your protection to walk through the fires..., of the path that leads ...and... the path thy... takes"

I see fire and hear explosions...

He says "Write this down"

"Thy cutteth with 6 swords but only beareth 3...[long pause]
...go now...and make learning"

-and write

"For the last day approacheth, but thou shalt make known all the secrets to those men who gather"

I see an hourglass, turning upside down
The sand particles are drops of fire

He says "Time is running, so begin!"

[The trance is heavy]

I ask why the substitution of the globe at the beginning of this rite-
and he tells me [*paraphrased*]
“To establish a better connection”

I hear *whistling* on my left- and I am told:

“Some flesh are conduits, who scatter their bones and bring ‘*the field*’
to open, upon the 4 sections of Tex”.

As I cycle back to Beta...

I ‘*hear*’ a voice, faint, within my mind, as if *my subconscious is*
thinking aloud-

[...or am I still in contact?]

“This is the start of a new era, ***“B”** Year of **Eno Domini**”

[This will be researched more thoroughly]

“Enochian Entities – Practice & Theory – BY SaToGa”

Volume #1-

Chapter: *“B=2”****

This Ritual Structure can be used by the Reader:

The Calls, Heptarchial Mystica & WatchTower Hierarchy

“Partial Solar Eclipse/ Quadrantid Meteor Ritual”

The Quadrantid meteor shower peaks on Jan. 3-4 to kick off the 2011 sky watching season. January also includes partial solar eclipse and several planet sightings for amateur astronomers. Credit: NASA/JPL

[21:00 UT (3:00 pm EST) on January 3 and 06:00 UT (01:00 am EST) on January 4]

A partial solar eclipse will occur on January 4, 2011. A solar eclipse occurs when the Moon passes between Earth and the Sun, thereby totally or partially obscuring Earth's view of the Sun. A partial solar eclipse occurs in the polar regions of the Earth when the center of the moon's shadow misses the earth.

[06:40:11 Universal Time (UT)]

Ritual

1/4/11 –Tuesday

**“Enochian Entities Practice & Theory – BY SaToGa” Volume #1:
“GBR.Heptagram”**

1st & 2nd Key Vibrated

Call: Prince Befafes -Sol

[seal on right side of altar]

In the Prince's Name...

Call: King Babalel –Mars

[seal held in mage's left hand]

Call: 42 Ministers of the Prince

[seal under the mage's feet]

[Optional]

Son of Light: Dmal

& Son of the Son of Light: Liba

This Working makes use of the

Northern Sub-Quadrant of the East Watch Tower

-Teaches Arts & Crafts-

Mechanical & Hand Crafts

**My Intention: My Projected Analysis of What Knowledge might
be "Initiated" during *This Rite***

Water of Fire/"Arts & Crafts"

If I took "*Etheric Water*" and 'pressure heated' it with "*Etheric Fire*", I
would have 'Clear Quartz Crystal' –

[*'Understand'* what I am saying here...]

Also:

"Liquid Fire" – Kundalini

Water/Emotion Fire/Anger

[Adrenaline – Testosterone]

Quad[4]rantid Eclipse: *Water/Moon Fire/Sol*

Meteor Shower: “Hand-Crafted by *the* Gods, in a Mechanical Orbit”

Call #11:

[Water of Fire]

See My Article on “Which Enochian Key is Used”

Call: ORO IBAH AOZPI

Call: King BataivH

[7 letters - as the Seniors]

[This particular Working: ‘Severity’- minus the “A”, add the “H”]

Call: Dispositor’s God Name: [‘ArchAngel’]

HCNBR

Call: 4 Dispositors: [‘Kerubs’]

CNBR

NBRC

BRCN

RCNB

RITUAL NOTES TRANSCRIBED:

I slipped into a deep trance.

By not calling the Seniors, and adding the “ArchAngel & 4 Kerubs”,
the Rite took on a totally different “*Energy and Setting*”..

These notes will reflect the changes in information I received, if
compared to my previous articles.

The King Name was chosen for Severity

[My previous Articles featured: King Bataiva (mercy)... now- Bataivh]

The change of King working- 'Severity' from 'Mercy', eliminating the 6 Seniors, using Key #11, and invoking the Archangel & 4 Kerubs during a '*partial solar eclipse*' and '*meteor shower*' brought highly charged '*apocalyptic overtones*'.

What transpires was extremely surprising, if you compare what is to follow with 'what I was expecting' in the beginning of this article...

[...As soon as the 11th Key was recited and the Archangel appeared- the whole temple began to display mild *poltergeist* 'crackling of walls']

...Immediately, my scrying produced visions...I see a blue sky, over cast by white billowy clouds...the clouds and sky grow dark, and the clouds speed by my sight quickly, as if a magnificent storm is about to ensue. I ask for knowledge and initiation as I can sense something watching me from a distance...

I see a darkened desert with tumbleweeds blowing across. One of the tumbleweeds become like fire, and out of the rolling grows one mammoth entity with a huge wingspan. The wings attached lower than one would suspect, almost on the Latissimus Dorsi muscle group.

[I confirm this Entity to be: HCNBR]

On His forehead was a triangle, encasing an eyeball. Light was beaming from it, like a spiral funnel cloud. His demeanor was different from what I have been used to in my Enochian Work.

In the distance, there were two thrones.

All I could see of each occupant of said thrones, were Kingly 'head ornamentation'.

I understood Them to be the two Kings evoked previously in this Rite.

In my previous Article: "**New Year Rite**"

...I was told to *"join the union"*- signifying [in vision], making 'One' of the WatchTowers and Heptarchial Mystica "systems"

The beaming LUX of the 'Archangel'*

[Note: *Archangel and Kerub are terms '*manufactured*' by Magick Lodges, and have become popular. I personally do not agree with calling these Entities "*Angels*", but to not confuse the reader, "Kerub" will be transcribed]

I see the profile of the Archangel, and He peers upward and the clouds darken which bring lightening and deafening thunder. The booming echoes literally distort my equilibrium, as if wearing headphones with the volume turned up to maximum.

"Hark"...Entity rises and in His navel is a red stone, with light emanating from it.
He looks at me and roars with the mouth of a lion. The energy spirals through me, and from my back, I feel wings sprouting.
I soar upwards, higher than He, and I am surrounded by 4 winged Entities [the Kerubs, previously called]

They are 'Mother' "angels" I am "secretly" told...
These are female, and surround me at the 'cardinal directions'.
They spin around and lines are formed to create patterns. This creates a pyramid and inverted pyramid = "a diamond shape".
This pulses..."this is the Art of Hearts"- They sing.

I see an aluminum pyramid and a round window portal.
I am told this is "Signs"
This metallic pyramid turns into a Nuclear Missile War Head.

*"We provide the Arts which create the biggest weapons man has.
We provide the rationale and common sense of 'not to use it'.
We provoke to make you use it.
We open the books and say 'learn not to use it'.
Man's inherent ways, will decide that destiny.
In a smaller scale man within himself is god.
Within are bubbling fountains of light that sprinkle forth the waters of
life and godhood.
This is truly the bigger picture, for bombs are the meager one."*

I see white ceramic fountains of water that turn blood red.

I feel knowledge moving within me like light.
The temple walls are crackling loud.
The 4 EE I have seen before, return.
I see a flat spinning disc like a flying saucer.

“We are propelling it.
We are the inertia and We are the propellant force.
And We are the guidance.
When you combine what you have just seen,... the waves of the light
of the waters within you as fountains...that is the inertia that drives
these mechanized creatures. It is a dual system, one must learn one
to learn to operate the second one.
The nuclear warheads are the same crafts, but without the waters
and power of within. It is only externalized knowledge. Man rather
have this, ...[pause] it is easier and without study.
And these tectonic plates, they move walls and they buckle. It is
nature’s nuclear weapon.
Under the flooring where you sit, shall someday be split in half.
We shall guide you...and tell you when to leave”

[personal conversation ensues]

I ask what does the Black Cross of the WatchTowers mean:

“These are ‘passed third dimensional’.... [but...] They open at each
quarter”.

“There are two horizontal axes” [plural of axis]
(Each at the cardinal points) “...and one vertical axis”
[I am shown]
[“North South, West East- Up Down”]

“When the lines of light form, this appears as a double helix. The
pyramid [I am shown Giza] is one half of the helix. The Earth’s core
spins and is the inverted pyramid of resonance.

The energy of radiance opposes itself.
An alignment with “A” [not “The”] universe is created.
It is as a gyroscope that connects Earth to it’s skies.

These are innate and with lines and meridians of power”.

“Across the goddess [Earth] you see meteors which are winged messengers who bring plagues and destruction. What you see is only the beginning of what it is to come.

The penumbra hides the light which is as a shadow that walks and hides the wisdom. The umbrella cloaks the knowledge. The light is hidden by it's darkness. These both are harbingers. We are the sentinels to come. The trumpets are vials and the vials are of plagues”.

“The first of the 49 leaves shall be rendered true...

[wording inaudible, sounds like “Madimi”]

[“...”]

and the silence of one of 49 keys, shall be revealed unto you” [“...”]
(Was spoken as a deliberate rhyming poem)

Understand there are hidden references in this, which I have not added

'Galvah'- gave Dee the forty ninth silver leaf of the book & the name "Loagaeth".

I didn't want to add confusion here.

"Madimi" [actually another EE name similar to it] is spoken of in the conversation, but I kept that part to myself.

[personal conversation- I omit this deliberately by my own choice]

“Conduits of energy open the next chapter.

We are inside looking out. For those who see us as needing man are in their own foolishness for We have God. We seek acknowledgement of man in his haughtiness now, as We searched for righteousness in man during the time of Sodom. Not approval, but admittance that man has sealed their own final destiny, by their mouth, and not our.

We have the key”. [inaudible: God has the key (?)]
As in Sodom We oblige those who freely work with Us.
How many can seek truth?

This is what we seek.
In their own frailty and their own destruction is what they seek.
We seek that man now acknowledge his own *doom**.
[*boom, bomb, doom – inaudible]
There is no external taunt nor any external tease.
There is no outside force that makes evil, for within man has every
force containing evil ever created and manifested”.

“Bide Bide Bide” and I hear the word “Time” echoing in the back.

“Come now walk with us and rest easy son of men”

I see the ‘wheel of fortune’, spinning.

I see a giant bird with long blue feathers...but now it looks like a
phoenix. His eyes are 2 diamonds on fire. It turns its head and opens
its beak wide.

A fly comes out of its mouth.

The fly is holding a scroll and some sort of writing instrument.

“Fly to the heavens as the maggots of the field are awakening now!
Now it is your turn to write!”.

The fly opens the scroll and it says:
“It Is Finished”

The first EE [Archangel] at the beginning of this Ritual appears and
says “It is time to descend.”
I am back in my temple. I look into the larger scrying black shewstone
and I hear: “It is time, and time and time again after time”

He tells me to write this all down and record it just like They say it.

Except for three mild audio distortions, the voice recorder actually
performed almost 100% perfect this time.

This shows me They can control what gets destroyed...or not.
... He says “.” [period]

My Temple Arrangement

1. Holy Table
2. Sigil Dei Ameth
3. 7 Ensigns *with Enochian Letters* [*]
4. Scrying Stone
5. Lamén
6. Ring
7. Red Silk Covering
8. Table – 4 Legs set upon the 4 *Encased* Sigil Dei Ameth
9. Voice Recorder

[*] Note: The 7 Ensigns MUST be made with Enochian Letters.
Many Enochian students are not aware of this.

This was discussed in length, in a thread I started, entitled:

“C/B Cycle”

<http://groups.yahoo.com/group/enochian/message/7333>

Figure #616

Figure #616 is a page from my own Grimoire, as is Figure #333.

'ZAX Vision':
"Get Thee Behind Me- Satan!"

ZAX is 'everything they say'. [who ever "*they*" are]
For the sake of sparing redundancy and sounding cliché, ZAX really
was, for me, all about meeting the proverbial '*man in the mirror*'.

The 3 parts, from *my personal* perspective*:

An amusement park's 'House of Mirrors'; viewing myself in various
octaves of introspection.

Mountains too high to reach the pinnacle, but alas... that last bit of
digging down deep, to succeed.
Visiting an astral theatre, & Me,... being the featured film.

Intense.

Much of it was personal, so it would be pretty boring for the reader to
drudge through it all- besides, it's personal!

I did get to ask questions-
and they were promptly answered in '*ZAX-Speak*'.
[I went there with questions, and just 'left', with answers]

The inhabitants were holy, white shrouded, think "This is holy ground"
sort of sacred.

A cross between Mount Sinai and your parent's bedroom:
off limits, and sacrosanct.

I witnessed the 'House of the Holies', the "Veil" that the mage 'parts',
and *King Solomon's Temple*.

These was all etheric doppelgangers, heavy duty symbolism-
as a '*Nile reflection*' of Amenti and Abydos.

Choronzon took the role as Psycho-pomp...
& Then, appearing in a
phantasmagoric kaleidoscope of faces from the gallery.

He said His greatest illusion, was... Me.

I was impressed by the archetype He conjured in Figure #333.

Liber Loagaeth, `Choronzon volunteered- [to lure me right in] was the infamous "Necronomicon".

He went into great detail about how Satan does not manufacture dinosaur bones to fool Christian Archeologists, but rather, lays foundation in the dreams of nightmarish merchants.

He took me on a small boat and played the Ferryman in a mock version of the Crossing of the River of Styx.

He pointed to Saturn and taught me [His rendition] about the concept of "Time" and said Chronos was a storm god like Set [Sutekh].

He continued to explain how the Gnostic Seth was in actuality, this divine storm bringer...

Liber Loagaeth was explained to me [*earlier*] by *The* 3 individuals who "appeared to Abraham [prior],...then 2 of *The* 3 destroying Sodom and Gomorrah and *other cities*"

Also Melchizedek 'passed by' and a small crowd said "He is the Logos, the King of Jerusalem"

This ...all of it, was heavy symbolism about Liber Loagaeth, and the Covenant [Holy Table].

My advice, to future wayfarers, is do not journey the 30 Aethyrs out of order. At least, do a few before 'travailing the notorious' ZAX.

[*In Volume #1 I spoke briefly about why each vision is unique to the individual sayer:

Like dreams, there is no universal 'look it up Lexicon']

Matthew 16:23 But he turned, and said unto Peter, "Get thee behind me, Satan: thou art an offence unto me: for thou savourest not the things that be of God, but those that be of men". [King James Bible]

Figure #333

Figure #333 is a page from my own Grimoire, as is Figure #616.

Original Table

The WatchTower Table:

Dee's 'Order of the Planets'

1. Venus
2. Sun/Sol
3. Mars
4. Jupiter
5. Mercury
6. Saturn
7. Moon/Luna -7th Day – Rest EE “Sabbath Day”

Figure 11

**Follows the Cosmological Order of the Zodiac.
But- incorporates the Pattern of Zodiacal Triplicities.
-Moves ClockWise/Deosil [Figure 11]**

List Compiled From Volume #1 “Enochian Alphabet [III]”

Aries FIRE - {1.EAST} WatchTower
Taurus EARTH - {2.SOUTH} WatchTower
Gemini AIR - {3.WEST} WatchTower
Correct Color Is White- Blue Is Substituted For Obvious Reasons
Cancer WATER - {4.NORTH} WatchTower

Leo FIRE - [EAST] / SOUTH {5.EAST}
Virgo EARTH - [SOUTH] / {6.SOUTH} WEST
Libra AIR - [WEST] / NORTH {7.WEST}
Scorpio WATER - [NORTH] / {8.NORTH} EAST

Sagittarius FIRE - [EAST] / NORTH {9.EAST}
Capricorn EARTH - [SOUTH] / {10.SOUTH} EAST
Aquarius AIR - [WEST] / SOUTH {11.WEST}
Pisces WATER - [NORTH] / {12.NORTH} WEST

Revelation Chapter 21:

- 12- And had a wall great and high, and had twelve gates, and at the gates twelve angels, and names written thereon, which are the names of the twelve tribes of the children of Israel:
- 13- On the east three gates; on the north three gates; on the south three gates; and on the west three gates.
- 14- And the wall of the city had twelve foundations, and in them the names of the twelve apostles of the Lamb.

As far as I know, this was the first time the Enochian WatchTower system has been properly correlated to make it Magickally accessible.

It would have made studying and magick a lot easier for me if I had understood this at the beginning of my studies...

Now I share my “secrets” with you!

By using My System, if a work consisted of:

“FIRE” Ritual:

- East Tablet is used.
- *We now understand* the Fire Tablet ‘corresponds’ with:
Aries, Leo & Sagittarius.
[The mage can now assign 2 Seniors to each]
- Liber Scientiae- reference the Directions of each Zodiacal King

Figure 11A

Forming a Pyramid Astral Temple.

The base of the Pyramid- where the Mage is, attracts & channels the energy matrix.

A truncated pyramid design is not necessary if it is too taxing for the beginner's visualization skills

What Happened in 1554? [Reference]

I consider the *items having a Political “ButterFly” affect on History during John Dee’s time period.

The World Power ‘Chess Board Pawns’ were moved all around.

Important Historical happenings, that seem to be currently *‘re-manifesting’- In a 456 year cycle ...*

*1554 Jan 9, Gregory XV, Roman Catholic Pope was born.

*1554 Feb 12, Lady Jane Grey- who had claimed the throne of England for nine days, the Queen of England for thirteen days, was beheaded on Tower Hill along with her husband, Guildford Dudley, after being condemned for high treason.

1554 Feb 21, Hieronymus Bock, German doctor (founder of modern botany), died.

*1554 Feb 23, Henry Grey, Duke of Suffolk and Lady Jane Grey's father, was executed.

1554 Mar 3, Johan Frederik de Greatmoedige (50), ruler of Saxon (1532-47), died.

1554 Mar 12, Richard Hooker, English theologian, was born. He authored "Laws of Ecclesiastical Polity."

*1554 Jul 24, Queen Mary of England married Philip II, king of Spain and the Catholic son of Emp. Charles V.

1554 Oct, Mongol fighters battled Chinese defenders at the Jinshanling wall. After 3 days of fighting the Chinese overwhelmed the Mongols.

*1554 Nov 30, Sir Philip Sidney (d.1586), English poet, statesman and soldier was born.

*1554 Nov 30, England reconciled with Pope Julius III.

1554 Benvenuto Cellini completed his masterpiece, the bronze Perseus.

1554 Palladio wrote "L'Antichita," a guidebook to Roman antiquities.

1554 Jorg Wickram, German writer, wrote the first German romance novel: "Der Goldfaden."

1554 Palestrina composed his first book of Masses.

*1554 John Knox fled to Geneva where he met Jean Calvin.

*1554 Henry II of France invaded the Netherlands.

*1554 Dragut, leader of the Mediterranean pirates, recaptured Mehedia, Tunisia, from the Spaniards.

1554 At London's Guildhall Sir Nicholas Throckmorton was tried and found not guilty. The verdict was deemed unsatisfactory and the whole jury was carted off to prison and released after paying heavy fines.

1554 Fernelius, French physician, codified the medicine of the Renaissance.

1554 Flemish hop growers emigrated to England.

*1554 Sao Paulo in Brazil *was founded by the Jesuits* with a mission school.

*1554-1562 Pierre Eskrich (aka Pierre DuVase), a French illustrator, produced a collection of 218 bird paintings. He had fled Lyon to Geneva to escape the Edict of Chateaubriand (1551), *a crackdown on Protestantism* in France.

Figure 111
Original Table

“Proper Key Index” – [Which Enochian Call Is Used?]

**KEY: Each Circle is a Clockwise/Deosil Cycle
‘entering & exiting’ each WatchTower.**

- 1.) **Fire-** Red
- 2.) **Earth-** Black
- 3.) **Air-** White
- 4.) **Water-** Green

Structure of Enochian Keys pertaining to the WatchTowers

- 1- Horizontal Black Cross Axis
- 2- Vertical Black Cross Axis

I use the Above Two in Every EE Working

Notice the patterns here.

You see patterns like these in the Heptarchial Mystica System.

Example: The 42 Prince names- first letter moves to back, and so on.

Nouembris 15.

Post reconciliationem Kellianam.
Miserere nostri Deus

Converted on Adobe Acrobat
today December 18, 2003
by Frater Alastor.

Thursday. Nouembris 15.

At the first, Uriel pluckt a thing from under the Covenant Table: and it grew Rownd, Bigger & bigger, (of fyrie Cullour) bigger then all the world: and he sayd to me Δ:

Δ:

Uriel: Ultima est haec aetas vestram, quae tibi revelata erit.³

Then cam swarming into the stone, Thowsand yea Innumerable people, Uriel sayd,

Est in mundo, et incipiet cum illo alter Mundus.⁴ and he bad,

Note the forme of the thing seen. Note the cullour. The forme of the thing seen was a Globe Transparent fyre within which the people seemed to stand, Towers and Castells. &c. did appere therein, likewise. This Globe did king CARMARA seeme to go uppon, & to measure it: and there appeared very riche chayre to be set: allmost at the top of the Convexitie of the sayd Globe. wherein he sat down.

Michael: The Mysteries of God haue a tyme: and Behold, Thow art provyded for that tyme.

All those before spoken of are Subject to thy Call....

Of friendship, at any tyme, thow mayst see them: and know what thow wilt.

Every one (to be short) shall at all times and seasons shew thee direction in any thing....

One thing I answer thee, for all offycis. Thow hast in subjection all officis. Use them when it pleas thee, as thy Instruction hath byn.

King CARMARA⁵. This king, (being called first by Uriel,) appeared, as a Man, very well proportioned: clad in a long purple Robe: and with a Triple Crowne of Gold on his hed. At his first coming he had 7 (like men) wayting on him: which afterwarde declared them selues to be the 7 Princis Heptarchicall. Uric! deliuered unto this king (at his first appearing) a rod or straight little rownd Staff of Gold: diuided into three equal! distinctions, whereof, two were dark or blak: and the third bright red. This red he kept still in his hand.

King BOBOGEL appeared in a blak veluet coat, and his hose close, rownd hose with veluet upperstocks: ouerlayde with gold lace: On his bed a veluet hatcap, with a blak feather in it: with a Cape hanging on one of his sholders, his purse hanging abowt his neck and so put under his gyrdell at which hong a gylt rapier, his berd was long: he had pantofells and pynsons. And he sayd, I weare these Robes, not in respect of my self, but of my government, etc.

Prince BORNOGO appeared in a red Robe, with a Gold Cerciet on his hed: he shewed his Scale, and sayde, This it is.

King BABALEL...

Prince BEFAFES appeared in a long red robe, with a cerciet of Gold on his bed. He had a golden girdle: and on it written BEFAFES. He opened his bosom, & appeared leane: and seamed to haue feathers under his Robes. His Seale, or Character, is this:

King BYNEPOR...

Prince BUTMONO appeared in a red Robe, with a golden Cerciet on his hed:

His Seal is this:

King BNASPOL...

Prince BLISDON appeared in a Robe of many Cullours: and on his hed a Cerciet of

Gold. His Character, or seale:

King BNAPSEN...

Prince BRORGES appeared in~ his red apparayle: & he opened his Cloathes and there did issue, mighty & most terrible or grisely flames of fyre out of his sides: whych no mortal! eyr could abyde to loke uppon any long while. His Seale, or Character is this:

King BALIGON...

King BLVMAZA...

Prince BRALGES appeared in a red Robe with a Cerciet on his hed. This is the Scale of his gouernment:

One⁶ (of the 7 which was by him) he who stode before him, with his face from ward him, now turned his face to him ward.⁷

Regnat potestas tua in filijs. Ecce signum Operis.⁸

Δ: There appeared these two letters, euersed and aversed, in a white flag and a woman standing by, whose armes did not appere.

Note. My name is Carmara.⁹

Δ: On the other side of the flag appeared the armes of England. The flag semed old.

⁶ Note. For, of Hagonel we never had any thing before.

Adhuc duo, et tempus non est.¹⁰ (Δ : Sayd the man¹¹ which stode before Carmara,) and lifted up his hand and avaunced his body: and the other 6 gaue him place. He spred his armes abroad: and so turned rownd toward all the multitude (appering within the Globe:) as if he wold require audience. He sayd than thus,

The Sonnes of men,¹² and theyr sonnes, ar subjected unto my corn-maudent.¹³ This is a mystery. I haue spoken of it. Note it throwghly. They ar my seruants. By them thou shalt work mervayles. I gouern for a tyme:¹⁴ My tym&-⁵ is yet to come. The Operation of the Earth is subject to my powre:¹⁶ And I am the first of the twelve. My seale is called Barees: and here **it** is.

(Δ : This he held in the palm of his hand: as thowgh **it** had byn a ring, hanging also over his myddle fingers). With a great voyce he sayd, Come ô ye people of the erth:¹⁸

¹³ Filij & Filij Filiorum, supra libro 2°. -A.
C.~. ~-rA

1. (Δ: Then there cam a great Number of onely Kings, from amongst the rest of the multitude

within the Globe: They kneele down; and some kyssed his scale and some did stand frowning at it. Those kings that kyssed it, had, eche of them, a sword in one hand, and a payre of Ballance in the other: the

balances being euen, and counterpeysed.¹⁹ But the other had aliso ballances, which hong uneven, the one scale lower then the other. The euen balanced kings were of glad cheare:²⁰ but the other wer of a sowre and hevy cowntyance.

It is, and shalbe so: And the workmanship of this, is to this ende.

2. Then cam noble men: (Δ: and he held up his hand,) and they parted them selues into two Cumpanyes: and ouer the heds of them, appered these two wordes. Vera,²¹ over one Cumpany:and Impura²² over the other.

Vera	Impura
.....	
.....&c	&c

Verus cum veris, et Impurus cum Impuris.²³

3. Come ô ye Princes of Nature. Δ: Then cam in Anncient and graue Cowtenanced men in blak gownes: of all manner of sortes.²⁴ Diuerse of them had bokes: and some had stiks like measures:²⁵ and they parted into two Cumpanies. Eyther cumpany had his principall. One of these Cumpanies fell at debate among them selues. The other Cumpany stode still. There appeared before eche of these Cumpanyes a great boke. Uppon the bokes was written; on the one, Lucem; and on the other, Mundi tenebras.²⁶ The Forman spred his hands ouer them, and they all fell down:and the boke with Lucem²⁷ on it waxed bright: and they which attended on that boke (Lucem) departed.

Gather, by these few spriggs the Cumpas of the whole field.

Δ: I demaunded of him, what his name was: and he answered,²⁸

I am Primus et Quartus²⁹ Hagonel.

Δ:

This Pri Quar shewed his³⁰ seal  to the Multitudes and they beheld it, and of them some flourish, som stand, and some fall.

1.

Δ: [Then he sayd,] The first were the Kings of the earth; which tell the priks of the last,  take place, are, and shall be. In this

²⁶ A He hath recyted the offices of two Kings, as of Blumaza and Bobogel. And then he sayeth, Gather by these few spriggs &c: Which Bobogel is over the Nobility and Wisdome, of Metalls, & all Nature. -A.

thow mayst lern science. Note a mysterie. Take a place. is as much, as,
Ende with place.

Δ: Then he threw down a great many of them before him. Here is his
name, (pointing to  Carmara³¹] on the upper part of the Globe.)
Not withstanding I am his Minister .
There are kings fals and unjust, whose powre as I haue subuerted and
destroyed. so shalt thow. Thow seest the weapons.³² The Secret is not
great.

Δ: I know not what the weapons are. Pri. Quar. sayd, Write, and I will tell
thee. Δ: The three, of eche side did syt down while Pri Quar did thus
speake.

I am the first of the fowrth Hagonel.

Δ: I had thougth that ye sayd before, you had byn the first and the
Fowrth of Hagonel.

Pri Quar. I am HAGONEL, and govern HAGONEL. There is Hagonel the
first, Hagonel the second, and Hagonel the third, I am the first that
gouern the three. Therefore I am the first and last of the fowre.³³

Δ: In the meane space of the former multitude some were falin deade, of
some theyr mowthes drawn awry: of some theyr legs broken &c. And
then, pointing to  (Δ: Carmara) he sayd,

In his name, with my name, by my character and the ~ of my Ministers,
are these things brought to pass.³⁴ These that lye here, are lyers,
witches, enchanter, Deceyvers, Blasphemers: and finally all they that
use NATVRE, with abuse: and dishonor him which rayneth for euer.

2.The second assembly were the Gouverners of the Earth, whose glory yf

they be good, the weapons which we haue towght thee, will augment:
and Consequently, if they be euill, pervert.

3. The third assembly are those which taste of Gods mysteries, and drink
of the iuyce of Nature, whose myndes are diuided, some with eyes
looking toward heaven, the rest to the center of the Earth. Ubi non
Gloria, nec bonitas nec bonum est.³⁵ j~j~ wrowght, I say, it is wrowght
(for thy understanding) by the seuen of the seuen which wer the sonnes
of sempiternitie.³⁶ whose names thow hast written³⁷ and recorded to
Gods Glory.³⁸

Δ: Then he held up his hands, and seemed to speak but
was not herd (of EK³⁹) as he told me: and theruppon Pri Quar
sayd, Neyther shalt thow heare, for it is Vox hominibus non
digna. fflj autem cum filiis suis laudauerunt Deum. Benedictus
est qui fii ius est unicus, et Gloria mundi.⁴⁰

EK saw like a black cloth⁴¹ come-in and cover all the forepart of the
stone, so that nothing appeared in the stone. Then was hard a voyce
saying, Loke for us no more at this tyme: This⁴² shalbe a token, (from this
tyme forth) to leaue.⁴³

Δ: Laus Ct Honor sit Deo Immortali et Omnipotenti nunc et semp.
Amen.⁴⁴

1582 Die♀meridie: hora 5. Nouemb. 16.

Δ: He with the triple Crown on his hed, in the long purple robe, had now
onely that part of the rod in his hand, which was clere red: the other two
parts being vanished away. He shoke his rod, and the Globe under him
did quake. Then he sayde, Ilk enim est Deus, Venite.⁴⁵ ~: All the 7 did
bow at his speache. He holdeth up the flag, with the picture of a woman

paynted on it, with the

(as before was noted) on the right side of her.

And on the other side of the flag, were the Armes of England. He florished with the flag very much, and went as though he did marche, in warlike manner uppon the upper and utterparte of the Globe. He pointed up to the Flag and sayde, There is two to come, there is no more.⁴⁶ All the people in the Globe seemed to be glad and reioyce. Now he setteth down the Flag, and sayd, Come, Come, Come; And the 7 cam all before him. They hold up all together, Heptagonum stellare, seeming to be Copper.⁴⁷

1: The first Holder,⁴⁸ sayd, Me nosti:⁴⁹ and so pulled his hand of from the Heptagonum.

⁴⁶ Δ: So he sayd in latin, in the forpart of the leaf before.

2: The second of the .7. taketh his hand of and doth reverence and sayd, I am he which haue powre to alter the Incorruption of NATVRE. With my scale, I scale her and she is become perfect. I prevayle in Metalls: in the knowledge of them: I haue byn in Powre with many, but Actually with few. I am of the first of the⁵⁰ twelue the Second of the Seuen. Wilt thou know my name?

Δ: Full gladly.

I am BORNOGO: this is my Seale: This is my true Character. What thow desyrest in me shalbe fulifihled. Glory to God. Δ: He kneled down, and held up his hands toward the Heptagonum.

3: The next (or third) sayd, I am the Prince of the Seas: My powre is uppon the waters. I drowned Pharao: and haue destroyed the wicked. I gaue life unto the seas: and by me the Waters move. My name was known to Moyses. I hued in Israel: Beholde the tyme of Gods visitation. I haue measured, and it is '8'.s/ This is a mysterie. God be mercifull to his people. Behold, Behold Lo, behold, my mighty powr consisteth in this. Lern wisdome by my words. This is wrowght for thy erudition, what I enstruct thee from God: Loke unto thy charge trudy. Thow art yet deade:

Thow shalt be reuiued. But oh, bless God trudy: The blessing that God giueth me, I will bestow uppon thee by permission.

O, how mighty is our god which walked on the waters; which sealed me with his name, whose Glory is without ende. Thow hast written me, but yet dost not Know me. Use me in the name of God. I shall at the tyme appointed be ready. I will manifest the works of the seas, and the miracles of the depe shalbe knowne. I was Glorified in God. I Skurged the world. Oh oh oh, how they do repent. Misery is theyr ende, and Calamit theyr meat. Behold my name is print for euer: behold it. He opened his bosom and seamed leane: and seemed to hai feathers⁵² under his robes. He had a golden gyrdel: and on:written BEFAFES. Than he sayd, Blessed be thow ○ God, Go God, for euer. I haue said.

Δ: He toke his hand of from the Heptagonum.

Δ: The blak Cloth was drawn: which is now appointed to be our token from them, that we must leave of for that instant.

Δ: Deo soli, omnis honor, et Gloria.⁵³ Amen.

Friday. After drinking at night, circiter horam 8 a.

Δ: On the left side of H (sitting in the Chayre) appeared yet three, holding up the Heptagonum, on one on the other side below. He sat with his face from EK toward me. I stode and my face sowthward. EK he sat at the same table, with his face Northward.

4: The Fowrth⁵⁴ (holding below) Cryed: Earth, Earth, Earth.

EK: He speaketh Hollow, so that I understand nothing. Δ:

Than he answered, They are the wordes of my Creation, which

you are not worthy to understand. My Powre is in Erth:⁵⁵ and I kepe the bodies of the Dead.⁵⁶ Theyr numbers are in my bokes. I haue the key of Dissolution. Behold, Behold, All things, y~, **All things**, haue theyr workmanship with me. For I am the ende of working. EK: He falleth down prostrate, and speaketh, I know not what, Δ: Than he sayd, I haue the light of his anger,⁵⁷ and I will destroy it. O, O, Behold, It is a light left within the bottomles pit. It is the ende and the Last. O blessed shall thy name be, Blessed shall thy name be for euer. Behold this is my seale:

Behold, the bowels of the earth are at my opening. Δ: Than I requested him to help me with some portion of Threisor hid,⁵⁸ to pay my detts withall and to buy things necessarie &c. He answered, O wordling thow shalt be satisfyed with welth of this world. Behold Behold Lo, lo Behold, vehemently I say Behold. I haue, horded Threisor, for the sonne of perdition,⁵⁹ the first Instrument of his destruction. But, lo these Cauerns. Δ: He shewed to EK the Cavernes of the earth, and secret places therof and afterward sayd: Mark ihj~, All spirits, inhabiting within the earth, where, their habitation is, of force, not of will, (except the myddest of my self, which I know not), are subject to the powre hereof. Δ: Pointing to his Scale.⁶⁰ With this you shall govern,

⁵⁶ The Dead mens bodyes.

~ The Light of his anger. 

⁵⁸ Threasure hid requested.

~ Antichrist

⁶⁰ How can the middest of a spirituall creature be imagined? My dowl to ax. He meant

the middest or center of the Earth. The middest of his Charge. 

with this you shall unlok. With this (in his name who rayneth) you shall discouer her entrayles. How say you now? Can you do it? Ar not your Magiciens acquaynted with me? Yt greueth me to regester the bones of the Wycked. Prayse him Butmono, Prayse him Butmono, prayse him. Δ: Is that your name, I pray you tell me. He answered, yea it is my name. It is the ende⁶¹ of all things. EK: Now he sitteth down.

5. Δ: Now the Fifth turned his face toward EK (Who ~K] sat before me, and opposite unto me) and stepped furth and sayd: I am life and breath in Liuing Creatures.⁶² All things hue by me, the Image of One excepted.⁶³ Behold the face of the Earth.

EK:

There appeareth all Kindes of brute beastes, fowles, Dragons, and other. Δ: He Clapt his hands to gither and they all, vanished away at ones: they cam agayn: and went then away and retorned no more. But the people within the Globe remayned still as from the begynning: he sayd while the beastes were yet in sight, Lo, all these, do I endue with life: my seale is theyr Glory. Of God I am Sanctified: I reioyse: (1) the Liuing. (2) The ende, and (3) begynning of these things.⁶⁴ are known unto me: and by sufferance I do dispose them untill my Violl be run. EK: He taketh owt of his bosom a little vyol glass: and there seameth to be fiue or six sponefulls of oyle in it. Δ: He answered and sayde, That it is: and it is a mysterie. Δ: I spake somewhat of this oyle, and he answered me, and sayd, Thow sayst true. In token of God his Powre and Glory, write down BLISDON.

61 A A great dowl. ...me yet, the diuersity of the 4th and fifth officers, and officis as they are here, and in the Repetition ensuing.

62 Δ: in Animantibus bratij. ("in living creatures." -Ed.) Sloane 3677 misreads - animantibus oratis."

63 (A man.)

64 Virtus officij sui -A

EK: He taketh his hand of from the Heptagonum.

6. The sixth pulleth open his Clothes and red apparell, and there yssueth mighty fyre oute of his sides.

: Note, the cote of the first of these seuen is shorter⁶⁵ then any of his fellows coats are.] The sight of the fyre is very owgly, grisely, terrible, and skarsly of mans eye can be beholden. At length he pluckt his coates to gither, and sayd to EK, O I wold shew thee, but flesh and blud cannot see. Write shortly, (it is enowgh) Noui Januam Mortis.⁶⁶

Δ: Than sayd he to me in an earnest muse, O, Muse not, My words ar dark; but with those that see, light enowgh. Et per cussit Gloria Dci, Impiorum parietes. Dixi.⁶⁷

Δ: In mervaylous raging fyre, this worde BRORGES⁶⁸ did appeare, tossed to and fro in the furious flames thereof, so abundantly streaming out, as yf all the world had byn on fyre, so that EK, could not endure (without great annoyance to his ey sight) to behold the same. And finally he sayd, Mysteria in animis vestris imprimite.⁶⁹ And so the fyre vanished away.

7. EK: The stone semeth all Blew: and onely One now beholdeth the Heptagonum: all the rest being set down: who semed now to extend theyr hands one toward an other, as though they played, now being rid of theyr work. Now the last putteth his hand to the Heptagonon and turned his face to EK hauing his face (all the while before) turned toward D. He sayd, The Creatures liuing in my Dominion,⁷⁰ ar subject to my powre. Behold I am BRALGES.⁷¹ The powres under my subiection are Invisible. Lo what... are. EK: All the world semed to be in brightnes or w... fire: and therm appered Diuerse little things like little smokes without any forme.⁷² He sayd, This is the scale⁷³ of my Gouernment. Behold I am come, I will teache the names without Numbers. The Creatures subiect unto me shalbe known unto yQU.

¶ Beware of wauering. Blot out suspition⁷⁴ of us for we are Gods Creatures, that haue rayned, do rayne & shall raigne for euer. All our

Mysteries shalbe known unto you.⁷⁵

EK: All the 7 vanished away, onely H remayning who sayd (being stand up, and leaning uppon his Chayre, and turned to EK), Behold, these things, and theyr mysteries shalbe known unto you, reseruing the Secrets⁷⁶ of him which raigneth for euer: ~K: The voyce of a multitude, answered singing,] Whose name is Great for euer. H Open your eyes, and you shall see from the Highest to the lowest.⁷⁷ The Peace of God be uppon you.

Δ: Amen. EK: The blak Cloth was drawn before all the things con-
tained in the stone: which was the Token of Ceasing for that tyme:

⁷¹ But Baligon, als Carmara, in the ende of the boke sayeth it to be his office. Consider well. Prince Bralges hath Blumaza his king.

⁷² The powres under his Subiection are Invisible. They appeared like little white smokes without any forme. All the world semed to be in brightnese. -HM

~ The seale.

~ Exchue Wauering or suspition.

~ All Mysteries shalbe known to us. -A. The last of 7 Princes of the boke spoke hereof his words. -(HM)

⁷⁶ Secreta Dei, non sunt hominibus reuelanda. -A. ("Secrets of God are not to be revealed to men." -Ed.)

~ Δ: Note Highest and Lowest to be understode perhaps in Tabula Collecta.

Sanctus sanctus sanctus Dominus Deus noster.⁷⁸

*Anno 1582: Saterdag. Die 17. Nouemb: A meridie hora circiter 1 a.*⁷⁹

Δ: The Cloth remayned drawn, a prety while after we had done our prayers to God, and so was all the things in the stone kept from sight.

Δ: The Man with the Crowne,⁸⁰ (he onely) appeared first, and the transparent Globe with the people of the world in it, as before. The Diaphanitie, or (as it wer) the Shell of the forsaid Globe,

was very glystring bright. The ~~man~~^{man} shaked his hand toward me and the bak of the

Chayre was toward EK. On the globe appered a trace like a seame, of two things ioyned to gither, or rather a very narrow path: which began below on the Convex superficies of this globe and went upward to the verticall point or (as it wer) the zenith prik of it: but from the lower part of the same to the place where the chayre stode, it seamed broder, and more worn, than from the chayre up to the vertex or top prik: for that part (which semed to be about the eighth part of the whole) did appere very smalle, and unworne, or unoccupied.

Δ: He turning his face toward EK, spake thus, I haue declared things past and present. And now I speak of things to come. The Whole shalbe manifest. Nam ipse unus et Indiuisibihis est. Gloria Gloria Gloria Creatori nostro.⁸² Two partes⁸³ are yet to come, the rest are finished allready. Δ: He shewed the rownd Table⁸⁴ with letters and numbers which master Kelly sent me: and than he toke it away agayn. Then he sayd,

⁸⁰ Carmara al: Baligon

⁸³ A forte, of this work.

⁸⁴ The rownd Table.

Venite gradatim repetamus.⁸⁵ opera Dei.⁸⁶

Δ: The first of the .7. which had yesterday appeared, did now appere with the short robe,⁸⁷ as he did before. Than H sayd smylingly (being turned to EK),

Hæc sunt documenta_tua.⁸⁸ quæ nondum intelligis.⁸⁹

Δ: Than the man with the short robe, the Forman of the 7 (yesterday appearing) sayd,⁹⁰

Unus est Deus, et Unum est opus nostrum.⁹¹

Δ: Then cam very many uppon the Globe his convex superficies and they sayd,

Parati sumus seruire Deo nostro.⁹²

⁸⁷ Short Coat.

⁸⁸ Δ: I think he ment by the rownd table shewed, which Mr. K. had sent me &c, bycause the names cam out of that Table.

Δ: Eche of these had somewhat in theyr hands. Som had crownes, some garments &c.⁹³

The number of them was: 42: and stode in this order:

and sayd embracing (as it wer) the whole nûmber of this Cumpany,⁹⁴

Et nomen meum, numerus est totus

Nec est crimen in numero nostro

Moyses nos nominavit.

Potestas istorum, quàm istarum, quamvis non una,
tamen in uno sunt.⁹⁵

Δ: I sayd that I thought there wanted at the begynning of this sentence, this word Tam.⁹⁶ He answered, it might be understode by his pointing to them there standing, and sayd farder in respect of this my dowl, Quatenus est hæc vanitas vestrorum? Tu nosti numeros esse in Deo, in Mundo, et in minori mundo. In Deo, id est Nobiscum. In Mundo, quantum apud vos: In minori Mundo, quantum in vobis.

(Combinatur animus tuus cogitatione.) Disseritur apud Phōs., idque maximè) de NATVRA, quæ non vobiscum, sed nobiscum (ah, ah, ah)

~ Vide libro 3°.

~ Hagonel seamed to embrace the Cumpany. -A (HM).

~ Δ: I dowl it shold be short coat holding or embracing all the Table with his hands, and not H. Note Istorum . Istarum, as if it were filias et filiare &c. (Et nomen ..

et in nostra potestate est. Videbis Deum. Vidisti opera nostra, Opera (inquam) manuum suarum: Digito Dei mouebimur. A Deo venit. Homo, et cum hominibus fuit: est enim cum illis. Illius namque potes~ urn, virtutem, et ~ dat,⁹⁷ non nobis solum modo. sed operibus nostris.

Inhumata tibi anima tua, quid quærit?⁹⁸

Δ: I understand you now: He answered Ab humo, homine: Ab homine dictum est.⁹⁹ I axed thee, what thow desyrest.

Δ: Wisdom, and Veritie, I answered: II then, he answered, H: Thow shalt. Δ: There cam in a smyling fellow: and they pluckt him, and towsed him. He cryed he wold tell Newes: and they answered, that there was none for him to tell: and he skaped¹⁰⁰ from them, or they let him slyp, with all his clothes torn of: and he semed to crepe or get away under the globe, and (as it wer) to get behinde the Diaphanous Globe.

Δ: These 42 had all of them somewhat in theyr hands: as eyther whole Crownes, or 3/4 of Crownes, or robes &c. Si~f them semed more glorious than the rest, and theyr Coates longer: and had cerclets (abowt theyr hed) of Gold: and these had perfect Crowns in theyr hands. The second six had thre quarters of Crownes, the Third six, haue clothes¹⁰¹ in theyr hands.¹⁰² All the rest semed to haue balls of gold: which they toss from one to an other: but at the catching they semed empty wynde balls: for they gripe them, closing theyr hand, as yf they wer not solid, but empty, like a bladder.¹⁰³

Δ: The first six sayd, Our names cannot be expressed: neyther can the names of these that follow.

Δ: The first six made cursy to the man with the short robe: the second six made cursy to the first, and the Third to the second, and they all, and the short robed man, made cursy to H.

Our workmanship is all one. Δ: Sayd the short robed man.¹⁰⁴

H: The whole day is diuided into 6 partes:¹⁰⁵ Euery part occupyeth a ~ of them here. (Δ: Pointing to the 42 standing there.) Therefore yf thow wilt work with Kings (thow knowest my meaning), finally what so euer thow wilt do in theyr estate, Cast thyne eye unto the first place. In all good causes thow shalt work by six in generall. The rest are for

Depriuation: I meane the next six. The residue all do serue to the entents and purposes apperteyning unto Kings. But bycause thow shalt not be ignorant, what they are, in name, they shall shew forth theyr Tables.

Δ: Than they, spedily (eche of them uppon the place of theyr stand-jag) made a square table: and euery table had but one Letter. The first of the first six did go away, and in his table appeared an 0, &c, and so of the second six, orderly theyr letters appeared in theyr tables: But the Third six, they cowered down uppon theyr letters, and were loath to

102 Note this reckening by six and six.

104 So he sayd pagina praecedente, unum est opus nostrum. -A. page (he said),
'Our workm~

105 The diuision of the Daye.

shew them: but at length, did &c: and at the last of euery row, they all cam together &c.

O	F ^E	S	N	G	L	E	4howres
A	V	Z	N	I	L	N	4howres
Y	L	L	M	A	F	S	4howres
N	R	S	O	G	O	O	4howres
N	R	R	C	P	R	N	4howres
L	A	B	D	G	R	E	4howres

H: Remember how they stode, when they wer secondly disposed unto thee: They stode first in six rows: and next they wer turned into 7~106 I speak of the greater number and not of the less. In speaking of

the greater, I haue comprehended the lesser.¹⁰⁷

Δ: They went euer away toward the¹⁰⁸ hand.

The third row went of lamenting: being commaunded by the Short robed man. All parted in fire, falling into the Globe. The fifth row did synk into the Globe, euery one in a sundry fyre by him self. The sixth fell with smoke down into the Globe.

EK: Now remayneth onely the man with the Crown H : he made shew with his hands, beckning toward E.K., and sayd, I haue told thee, that theyr workmanship. is to gither. Theyr names are uppon these tables. The first letter, is the Second letter, of the fir~t¹⁰⁹ name of the Table.¹¹⁰

106 In sexto et 7° sunt omnia, fol. 10. -A.

107 Note. K. Cat There are but 6 Names that are in Subiection unto the Prince: The first 7 next him: are those which held the fayr & bewtifull Crownes. The first 7 are called by those names that thow seest: O E S &c. Note. This diversity of Reckening by 6, and by 7, I can not yet well reconcyle. -A (HM).

108 There is a blank space in the manuscript. -Ed.

109 Δ: How can Bobogel be accountd the first name?

110 Δ: Now he meaneth at Bobogel in that table collected from  made before.

Thow hast 49 names in those Tables. Those names thow hast in former Tables by thee written: in that of 7 tymes 7. Confer it with I rownd Table.¹¹¹

The first letter¹¹² from the point of his¹¹³ sword, is B. That B sigifieth the number of the Bees, begynning the 49 names, environing the Circle. In the former Tables thow shalt fynde B.1. B.2. B.3. B.4. &c a so to B.49. Those Bees begynne the names of all the powres that have governed, do gouern. and shall gouern.

The next letter hath his circle and numbers going rownd about which thow shalt fynde in the former Tables. The letter standeth in myddest of euery square, of euery Circle: though some be Inne upside down: Which onely signifyeth that they are Spirits of Destruction. wrath and Indignation in Gods Judgment. There are 4 numbers: that, on the right hand, over the letter, is the number pertaining to that letter.

O in the Circumference is the ninth letter¹¹⁴
Gather the former Tables to gither, which thow hast made before, conteyning 49, depending onely on B. Where thow shalt fynde BOBOGEL, a name consisting on 7 letters, and so the rest. Reade my instructions as concerning those Tables, and thow shalt fynde the truth of them. I haue sayd.¹¹⁵

111 Note. The Tablet  to be conferred with the rownd .

112 In margin: Sent to me by E.K.

113 A sword in the mans hand within the Circle.

114 O in this Table OFS &c, is of the eighth name, the second letter, but the ninth here in respect of the circle of numbers.

115 Note who sayeth this. Δ: Note the like phrase: fol. 2. of Hagonel who sayd he had spoken of it, whereas we had receyved nothing of him before.

Mighty is thy name, O God of Hostes:
Blessed is thy name, O Lord, for euer.
Δ: Amen.

After 7 of the klok at night. die ̄ .116

H: Lo, here I byd them do, and they do. I haue appointed them, and they are contented. My Charge is not of my self, neyther do I speak darkly, obscurely or without a truth, in affirming that I towght thee those Tables: For they are from him, which made and created all things:

I am from them~⁷ in powre and message, under whome I here rule¹¹⁸ and shall do, tyll the ende¹¹⁹ of all things be:¹²⁰ O, Great and bowntifull in his liberall mercy: The mercy of him, whome we prayse and laude and sing unto, with Joy for euer. Behold thou desyrest, and ~ ~yk with desire.¹²¹ I am the disposer though not the Composer of Gods medicines. Thou desirest to be cumforted and strengthened in thy labors. I mynister unto thee The strength of God.

What I say, is not of my self, neyther that which is sayd to me, is of them selues, but it is sayd of him which Liueth for euer.

These Mysteries hath God lastly, and of his great mercyes, graunted unto thee.¹²² I haue answered thy dowting mynde.

Thou shalt be glutton. yea filled, yea thou shalt swell and be puffed

Vide quæso.¹³⁰ Δ: He pointed down to the people, in the Globe, all being sore and diseased of some sore, ulcer, botch, &c.

123 A I understode not this to be so: tyll he called to my remembrance and made me turne my bokes to that Parcell which he called the Prologe declared by Annael: which Saul skryed: &c.

124 Δ: = hardest, for me, in respect of my Imperfections.

126 Those –as he seemed to Embrace them. fo. S.

127 The Prince and his first 7.

128 =data.

H: All the residue of the Angels, (for so they are in dede) ar ministers of God his wrath and indignation uppon the Favthless:¹³¹ whose myserie is most lamentable. 7 onely. haue 7 letters comprehending the dignitie of their vocation:¹³² The rest are particular, not onely in powi but ailso in their vocation. Like leaves they spring and grow from one branche.

These words which thow seest in the last Table, some of them unhable to be pronownced, are notwithstanding the names of those 7133 which held the fayr and bewtifull Crownes. Which names (as I sayd before) do comprehend not onely the powre, but aliso the Being of the rest.¹³⁴ The whole Composition is the truth of the words. I will ones more teach. There were 42 that appeared, besides him, which was theyr prince. The first 7,135 are called by those names, that thow seest, as OFS &c.

Δ: And so of AVZNILN &c. H : Thow hast sayde.

There are but 6 names,¹³⁶ that are in Subiection. I teache breifly. Doost thow not remember the Circle and the prick in the myddest: which was on the right hand¹³⁷ of him, that was theyr Prince? That onely representeth 7 in number which being added unto the rest maketh 49. Read the letters. Δ: I red OF &c, and he willed me to strike them out.

H: That is the name of those of the first of the 7,138 which held the Crownes in theyr hands.

¹³¹ Angels, ministers of Gods wrath.

¹³² Consider the reckening here by 7, but before he had a reckening by 6. 

¹³³ There were but 6 holding bewtifull Crownes.

¹³⁴ The Powre and being of the rest. 

¹³⁵ Now by 7.

¹³⁶ Δ: each of .7. letters. Six names in subjection.

¹³⁷  on the right hand.

¹³⁸ forte "of the first 7". videlicet.

Note: The second line,¹³⁹ is the name of the second, and so to the ende of the table. 42 letters: 42 names: 42 persons.

The first, where his fote stode, is both his Name and Character.¹⁴⁰
And so of the second, Third &c.

Notwithstanding, Generally these are the names, the first 7, the One presupposed, the rest being six in order.

This is the truth, and the some of the Tables. Yt is easy to be understode and perfect.

Whan thou wilt work for anything apperteyning unto the estate of a good King: Thow must first call uppon¹⁴¹ him which is theyr prince. Secondly the ministers of his powre ar Six:¹⁴² whose names conteyne 7 letters apeece: as thy Tables do manifest: by whome in generally, or by any one of them, in particularitie, thou shalt work for any Intent or purpose.

As concerning the letters particularly, they do concern the Names of 42 which 42, in generally, or one of them do and can work the destruction.¹⁴³ hindrance or annoyance of the estate, Condition or degree, as well for body as government, of any Wicked or yll Liuing Prince. In owtward sense, my words are true. I speak now of the use of one of the first, that I spake of, or manifested yesterday. Sayd I not, and shewed I not, which had the gouernment of Princes?¹⁴⁴ For, as it is a Mystery to a farder matter, so is it a purpose to a present use. Yf it rule worldly princis, how much more shall it work with the Princis of Creation?

Thow desyrest use, I teache use, and yet the Art is to the further

¹⁹⁸ LEE.

The Third sayd, Concenterus eius, est sine numero:
 Tamen nobiscum est in Uno, Fons et
 Caput Naturæ²⁰¹

EK: They ioyned them selues together and became,
all One Man most beawtifull to behold: Whose hed
 and to the brest, seemed to be neare to heven. His
 brest and myddle part, in the ayre: His feete
 seemed to stand on the earth. There came like a
 Fire, out of the Crown of his hed, and to enter into
 the heven, hard, by it: This great high and fayre man
 sayde, Veritas quæsitæ, nostra est.²⁰²²⁰³ EK: His apparayle is
 diuided into two halves: from the crown of his hed to his fete. The
 one half seemed to be most fresh flourishing herbes: The other
 half seemed to be of diuerse metalls.²⁰⁴ and his right fete
 seemed to be Leade.²⁰⁵ He sayd (with an Aposiopesis) thus,
 Beatus est qui Lumen capitis mei &c.²⁰⁶

EK: The rest, all, quake. He sayd farder,

Unus in Capite, unus in pectore, unus
 in pedibus.²⁰⁷

EK: Then stepped out 9, at ones.

EK: Then the great man returned, or was restored to his former

estate of three particular men agayn: and they three leaned to the
lentleman²⁰⁸ with the Cape on his sholder BOBOGEL who sayde,

Dee. Dee. Dee, at length, but not to late.²⁰⁹

EK: In the place of the former first thre, appeared L E E.

EK: Of the 9, which stept out, they of the first Ternarie²¹⁰ sayde, eche
thus orderly,

1 Volumus.

2 Possumus.

3 Quid non.²¹¹

This Ternarie sayd, Faciamus, quæ fecerunt, nam nos Tres sum~ Adam
societate.²¹²

EK: They become One man, as the other before, but a slender and a
weak one, neyther so high as the first, euer laboring or striving with it self
to stand up right, but still it bended, bowed, and inclined downward, as
thowgh it wold fall for feblenes. The Body of this Compownd man,
seamed to be of Gold glittering. When they retorned to theyr distinct
shape: they semed naked and to be sorry, and lament: And Bobogel did
put them from him, with his sworde, skabbard and all, as it hanged by his
side. Theyr letters were N A R.

209 Note. King Bobogel said this of my atteyning to such mysteries, as the
mysteries under him made shew of. -A (HM).

210 2. NAR.

EK: Then cam the Ternarie—B L N,²¹³ and orderly they sayd thus,

1 Ab illo.

2 Per illum.

3 Cum illo²¹⁴

Bob: Qui caret hijs tribus,²¹⁵ EK: He whispereth to the first Three leaning to him: and with all, seeing me muse at the Aposiopesis, he sayd,] No No, Thow shalt not dowe (Pointing to Me)

In ecclesia Dei, laborabit in Vanum.²¹⁶

EK: This Ternarie of men becam to haue one onely hed. and three bodyes and that one hed was in good proportion.

EK: The side of the Diaphonous Globe opened, and this Transformed Ternarie did point into it, toward the multitude: and the people had theyr brests naked, and semed to wepe:²¹⁷ and to wipe theyr brests, and where they wiped the place becam fayre.

EK: This Ternary did seme to stand uppon a triangular stone and to turn (as a horsmyll doth, abowt one axeltree) orderly agaynst, and by, the hole of the Globe so opened. And euery of the three bodyes, in theyr turning, as they cam agaynst the open place of the Globe, they extended, and stretch out theyr hands toward the people: The first seamed to hold a rownd ball in his hand being little, but very fayre white. The second body, his hand had in it, a little sword flamning with fyre. The third had a thing like a hatt band of lawn,²¹⁸ of many cullours, which ever as his turne cam to be agaynst the opened hole, he seamed to cast toward the people, and the people did seme to be drawn to him ward, by the Casting of it toward them.

²¹³ 3~ BLN.

These three bodyes, thowgh they turned contynually, yet did the face or Cowntenance of that One Compownd hed, stedily and immoveably regard or loke into the Globe at the forsayd hole therof.

H: A wonder to behold the heuen, much more this.

EK: Now this Ternarie separated it self, and the hole or clyft in tile Globe did shut to. These three did sit down by Bobogel.

H: Sunt semper, et Cibus illorum est unus.²¹⁹

Δ: Note: The first Ternarie, they semed to stand leaning to Bobogel. The Third Ternarie was set orderly and vicissim,²²⁰ close by Bobogel his feete, one of these betwene two of the first; euer so that orderly one of the first, and one of the Third ternarie, one of the first and one of the third; one of the first and one of the third.

EK: Then cam the Ternarie A N A.²²¹ They sayd, orderly thus,

1. Ab illo sed.

2. Cum illo sed,²²² looking on his own belly.

Δ: Then I demaunded of theyr Apparayle: and EK sayd that these were brauer than the former Ternary. Bobogel sayd, Aliqui a dignitate, Gæteri talia quia non sunt Digni.²²³ This he sayd, pointing to theyr apparayle. Then the third sayd,

3. Per illum, Per illum, Per illum,²²⁴ with a frowning cowntenance thrusting furth his hand.

217 Penitence.

221 4~ ANA.

Δ: Here I fownd a certayn error in my writing of the first Notes: which I haue amended in the writing of this:

But while that error did trubble me, the spirituail Creature sayd these wordes. Bob: The Fawt is in EK his remembrance, and not in his will. Note this,

LEE ar the Three that stand with me.

NAR are the Three that I reiect.

BLN are the Thre which are enterlincked with me.

ANA are the Three that are rejected.²²⁷

EK: They ioyne to gither into one hed and three bodyes. The Hole of the Globe opened very wyde now. This one Gompownd Hed had, many eyes, many noses, many mowthes, as thowgh it were a Cahos²²⁵ of Faces, in one hed, but three bodyes. One of this bodyes had in his hand a little Ball, bike the other before, very white, but with twynkling brightnes in it. The other two bodyes, theyr hands were emptie.

EK: They turn in order agaynst the Hole of the Globe: But the People regarded them not: but at the comming of the hand with the Ball, against the hole, the people loked a little up at it.

Bob. sayd, Et quia carebant in ardentibus ignis.²²⁶

EK: These, being dissolued into theyr former state, go and sit (with hevvy chere) by them that sat affar of from BOBOGEL. Theyr apparail semed to be simple: theyr good apparayle was gone.

Bob. sayd, Omnes naturam ad, Sed, Non in illo.²²⁸

EK: The 30 remayning,²²⁹ cam all away, and satt betwene Bobogel and the rejected Cumpany: and from that Gumpany²³⁰ cam onely 7 to the Circle agayn. Euery of these 7, sett theyr feete, eche uppon a letter of the Circle, which letters are these,²³¹

AOÏDIAB.

EK: They say, In use,²³² we are perfect~ Misused, we are Monsters. Sumus septem Januæ Naturæ, et sui ipsius qui novit Deum.²³³

EK: These 7, seme to vanish into wynde, or white smoke, and to fall into the Globe. And the ~ reiected, turn into a black smoke: and the rest of the 30²³⁴ semed also converted into black smoke, and to fall into the Globe.

Bob. sayd, In sexto et septimo sunt omnia.²³⁵

EK: The six that were next him, semed to clyng hard and close to Bobogel. (Bob: Behold.) EK: They be ioyned all into One body, and becam like the sonne, into the forme of a bowle or Globe: and so moved up or rowled up the small narrow race, or line unworne, which remayned higher then the chayre, toward the top of the Diaphanous Globe, as before is declared, so that this Princely Noble man, and his six adherents [LEE:BLN], in this manner went out of sight.²³⁶

²²⁹ ~ There remayned 10 tymes Three.

²³⁰ ~ of 30.

²³¹ Note, by theyr sitting that they are indifferent: and so they say.

²³² ~ They semed therfore to sit betwene the perfect and rejected: as indifferent.

²³⁴ Δ: beside AOÏDIAB.

²³⁵ 6, 7. -A.

H: Formator horum, Secundus²³⁷ est in Heptagono.²³⁸

They are diuided into the day, as the other wer, before: But wheras the other are chiefly uppon that day which you call Monday, so ar these to be used onely on the Sabaoth day.

Theyr use, is onely thus (obseruing the f~rmer order) with the Circle uppon the grownd.²³⁹ The first six,²⁴⁰ with theyr King and the seale of theyr Prince, taketh place in the whole body of the day: The other being 6 tymes six,²⁴¹ are diuided into the partes of the day as before. The Letters onely where they stode, are theyr names and Characters. **What doth the heuen behold or the earth conteyne, that is not (or may be) subdued, formed and made by these. What ierning, grownded uppon wisdome, with the excellencies jfl242 Nature, cannot_they manifest?**

One in heuen they know.

One and all in Man, they Know.

One and all in erth, they know.

Measure heuen by a parte, (my meaning is, by these few). Let God be Giorified: His name praysed. His Creation243 well taken, and his Creatures, well used.²⁴⁴

221 4~ ANA.

236 NOTE the narrow path, above the chayr.

237 A Bornogo.

240 Δ: of the six orders.

241 Practise. by 6.

Δ: I craued for some playner Instruction, as concerning the use of the. . . and he answered,

H: Behold: Are thy eyes so blynde? Dost thou see and wilt not see? Thy mynde telleth thee. Thy understanding fundereth, and thy Judgment doth establish it. That as thou sawest a Body in three places, and of Three Compositions: Though but two in forme, So shall this **work haue relation to 1: tyme present and present use, to 2: Mysteries far exceding it, And 3: Finally to a purpose and intent, wherby the Maiestie, and Name of God shall and may, and of force must appeare, with the Apparition of his wonders, and mervayles, yet unhard of.**²⁴⁵

Dixi.²⁴⁶

Δ: Than immediately after he began agayne, as followeth,

H: Venito, veni (inquam) adesto Veni Rex. O Rex, Rex, Rex Aquarum,²⁴⁷ Venito, venito inquam. Magna est tua; maior autem mea potestas. Deus foster, restat, regnat, et est, Quod, et sicut fuit.²⁴⁸

EK: Then cam one and sayd,

Parati sumus nomen eius Creatoris nostri, nomen, nomen
laudare Nomen (inquam) Unius nunc et viuentis.

Obscura sunt hæc animis obscuris. Vera et manifesta Veris et perfectis. Ecce adsunt.²⁴⁹ EK: He that sayd this, is as though he were a king,

²⁴³ This booke sometymes called liber Creationis, & sometymes Tabulae Creationis.

²⁴⁵ A Threfold use of this Doctrine.

²⁴⁷ Rex Aquarum. -A.

with a Crown on his hed: His apparayle was a long robe whitish: But his left arme was very white, and his right arme, black.²⁵⁰

EK: There cam after this King a Cumpany of 42: and euery one of them had a letter in his forhed, and they were 7 in a row, and six, downward.

.....

The King had written in his forhed, BABALEL.²⁵¹

The first 7, (begynning from EK his left hand toward his right) had these letters, and the second, Thirddh &c had these letters as here appeare.

E	I	L	O	M	F	O
N	E	O	T	P	T	A
S	A	G	A	C	I	Y
O	N	E	D	P	O	N
N	O	O	N	M	A	N
E	T	E	V	L	G	L

H: At the next tyme, more.

²⁵⁰ Note this Kings apparayle, and shew.

²⁵¹ King BABALEL

Δ: Omne quod uiuit laudet Deum unum et trinum, in omne æuum.²⁵² Amen.

EK: The cloth draws.

Nouemb. 20 Tuesday, a meridie circa 2ã.

Δ: After a great half howre attending, and diuerse tymes our prayers to god, The black Cloth was pulled upward: and so vanished away. H appered sitting in his chayre, and his face toward me: and so looking abowt he paused a while: half a quarter of an howr. In the meane space cam one skypping lightly, a little boy, in a grene coate, and sayd, He is here, at an ynche.²⁵³ Than he sayd, Hark. To me he sayd, Ha-sir-ha. Δ: What wilt thou say to me? I am Multin his ministei wilt thou any thing with me? I cannot tarry. Δ: Then this skipiak²⁵⁴ espyed a spirituall creature comming, and sayd, Ha, ar you there? Δ: And so went out of sight.

Δ: This was King BABALEL, with a crown of Gold on his hed, his garment whitish, and his right sleue on his arme, biak: and the left sieve very white. He seamed to stand uppon water.

The other 42 cam likewise and stode.

Bab: Veni princeps²⁵⁵ 7 principum qui sunt Aquarum Principes. Ego sum Rex potens et mirabilis in aquis: cuius potestas est aquarum visceribus. Princeps iste²⁵⁶ (Δ: pointing to a Prince, new come to sight

which had a red long robe, and a cerciet of gold on his hed2S7) est Tertius principum in Heptagonon.²⁵⁸ Δ: I sayd Heptagono: he replyed, Heptagonu)n,²⁵⁹ and sayd: Verè plane, et perspicuè dixi.

Bab: Mensurasti aquas?²⁶⁰ Befafes answered, Factum est.²⁶¹

Δ: I seemed to dowl of some matter here, and Befafes sayd, Thow shalt be answered in any dowl. I am thy frende. I haue fauored thee in many things.²⁶² Ph'ers²⁶³ haue imagined vaynely of my name. For thy loue towards me, Thow shalt know my name. I was with Salomon; I was also (unknown) with Scotus.²⁶⁴ I was, in respect of my powr:

unknown, in respect of my name. He called me Mares. Since, I was not with any. And I preserued thee from the powre of the wicked, when I told thee things of truth to come. When I rid thy howse of wycked ones, and was with thee in extremities. I was with thee. Behold I was with thee throwghlv.

Δ: Then he bad EK Ax me, yf I knew Obelison. Δ: I had to do with Obelison, but by reason of my Skryers nawghtynes, I was in dowl what I might credit. Bef: Thow shalt know this for a most manifest truth hereafter. I am Obelison, the fifth of the Seuenth,²⁶⁵ which haue the skowrging of Obelison the wicked: but not wicked for euer, neyther

²⁵⁷ The Prince his apparayle.

accursed to the ende. We Angels haue tymes. and our faultes are amended.²⁶⁶

A: Shall I Note your name, by Befafes? He answered, My name is so, in dede: The Ægyptians called me Obelison in respect of my nature. Δ: I pray you what is the Etymologie of Obelison? Bef: A pleasant deliuerer.²⁶⁷

EK: The former 7j~aue Crownes.²⁶⁸ Theyr letters stand betwene theyr feete.²⁶⁹

EILOMFO&c.

Bef: Thow hast receyued these letters already.

EK: The water seameth. continually to pass ouer these letters.

Bab: I Gouern uppon Tuesday.

1.EK: The first seuen take the water and throw it up, and it becometh clowdes.

2.The second throweth it up, and it becommeth hayle and snow. One of the first 7 sayde, Behold, Behold, Behold: All the motion of the waters, and the saltnes thereof is æqually assured by us. We giue good success in battayles, reduce ships & all manner of vessells that flote uppon the seas: Our make is great. Muse not [UA], For whan the seas are trubbled, with the wickednes or uprore of man, our Authoritie giueth victory from him that is most Victorious. Fishes and Monsters of the sea, yea all that liueth therein, are well known with us. Behold we are (generally) the Distributers of Gods Judgments uppon the waters that cover the earth.

EK: Than stept furth all the rest.

²⁶⁶NOTE: of wicked spirits, some restitution to favor.

²⁶⁷See 4th Enochian Call: "obelisong" is translated

²⁶⁸Or Cerclets perhaps.

3. The Third seuen sayd, Some of us conduct the waters through the earth. Other of us, do beautify Nature in her Composition. The rest of us are distributors and Deliverers of the Treasures and the unknown substances of the seas.²⁷⁰

Bab:_____Praised be God which hath created us, from the beginning with Glory. His Glory be augmented.

EK:_____Now the 42 die into the Water and so vanish away: and Befafes, and Babalel also were suddenly gone.

H standing up sayd, LO, Thus thou seest the glory of Gods creatures: Whome thou mayst use,²⁷¹ with the consideration of the day, their king, their Prince, and his Character. The King and prince govern for the whole day.²⁷² The rest according to the six partes of the day.

Use them, to the glory, praise, and honor of him, which created them to the Laude and praise of his Maiestie. A day is 24 howres. Δ:

But when doth that Day begin?

H:_____Thou shalt be taught the rest.

H proceeded, and sayd, Vitam dedit Deus omnibus Creaturis. Venite Veni Ignis, veni Vita mortalium (inquam) Venito. Adesdum. Regnat Deus. O Venite. Nam unus ille Regnat, cetera Vita Viuentium.²⁷³

and 6, downward. But of the first 7 the letters became to be between their feet, and the water seemed continually to pass over these letters." -Ed.

²⁷⁰ Treasures in the seas.

~ Δ: Note that he calleth that contynually A Globe. Uppon such a globe Nalvage shewed out all the Calls.

seuenth. Bnagole is the seuenth and last of this first seuen of this first Table:
accounted the first.

The second seuen by like order is gathered of Babalel, and the rest
of his septenarie. And so furth, to the ende downward as thow didst
before &c.

2. 3: In the second Table; L (the first letter therof) is out of Bobogel his last letter,
the second letter, is the sixth of Befafes; the third, is the fifth of Basmelo &c
and so you haue LEENARB.³⁴² For the rest kepe that order downward to the
ende of the last Name Bamnode. Tranversim, quasi retrograde.³⁴³

3. 4: In the Third, begyn at the lower³⁴⁴ letter [Uof the latter³⁴⁵ worde] of
the last of the second seven: and so upward, toward the right³⁴⁶ hand: Δ: The
last word is of second seven is Bnagole: the last letter therof is e: which is the
first of this Third Table: and the i, in Brisfli, is the second, and the 1 in Branglo
the thirdth, and than so furth, upward, overthwart, toward the left hand: till ye
come to Bobogel, his second letter, being 0. Then to N in Bonefor: e in
Bermale: o in Bragiop. &c.

4. 5: For the Fowrth, loke, Bobogel. Then loke to this fowrth Table the first
B of the Table is the first B of Bobogel. The second B of this Table, is the B of
Befafes. The third letter is a, the second letter of Basmelo. The fowrth letter, ~,
is the thirdth of Bernole. The fifth is the fowrth of Branglo. The sixth, is the fifth
of

341 King. . . first . . . answering to Blumaza as I perceyued 1583 Maij 5. mane by meditation: and of Necessity
must be: yf the last be for Baligon.

342 The next 1 is the last letter of Babalel, and then transversim as before, &c.

~ Traversin

~ Last.

~ Last.

346 Left.

Brisfli. The seuenth is the sixth of Bnagole. And so in to the next sevens downward orderly for the rest of the table.

5. 6: The Fifth begynneth from Bnagole upward: begynning at the last letter being e: and then upward croswise exactly tyll the B of Bobogel. And so of the next seuen, for the next: begynning at the n of Bonefon, and so furth.

6. 7: In the sixth, (the Infernal! Table) The first is B of Bobogel, The second is A of the 15th: The third is N of the 22th: the fowrth, is the fowrth of the 29: The fifth of the 36: the sixth of the 43: and the seuenth of the 49: being E in Bamnode, ~ letters being taken in that last septenarie. The second septenarie begynneth at the first of the 15th, the second at the second of the 22th, (being Y), the third at the thirdth of the 29th, then the 4th of the 30th,: the 5th of the 43th.

7. 1: The Seuenth: the first A, is the A, of Baligon, and so downward all the second letters of the 7 kings: Then all the third letters, then all the fowrth letters, then all the fifth letters, then all the sixth letters only and finally the seventh and last letters of the first names of the Septenaries.

Δ: Note, this Table is made all of Kingly substance &c.

Δ: Now I trust I understand (meterly well,³⁴⁷) the making of the 7 Tables. I wold gladly here som instruction of the great Circular table (which you call the Globe) which hath the Kn... with theyr Characters; and so within, 7 tymes 7, seuen tymes ... 7 tymes 6, seuen tymes furnished with letters and numbers ... sorts.

H: That doth apperteyn to an other tyme.³⁴⁸

EK: The Cloth was lett down, and the stone did yield voyce but nothing visible but the forsayd blak cloth.

³⁴⁸ The use of the Circular Table (here before often called a Globe) at another tyme.

H: One thing is yet wanting: a mete receptacle &c. There is yet wanting a stone &c. One there is, most excellent, hid in the secret of the depth &c. In the uttermost part of the Roman Possession.

H: Write. All lawd, Glorie and honor be unto him, which rayneth for euer. Amen. Be of good Cumfort.

Lo, the mighty hand of God is uppon thee.

Thow shalt haue it. Thow shalt haue it, Thow shalt haue it. Dost thou see, loke and styr not from thy place: EK pointed toward it.

Δ: I see it not.

H: It is sanctified, blessed, and ~ in the use of his Creatures.

Thow shalt preuayle with it, with Kings. and with all Creatures of the world: Whose beauty (in vertue) shall be more worth then the Kingdomes of the earth.

Loke, if thou see it: But styr not, for the Angel of his powre is present.

EK looked toward my west wyndow, and saw there first uppon the matts by my bokes a thing, (to his thinking) as bigg as an egg: most bright, clere, and glorious: and an angel of the heyth of a little chylde holding up the same thing in his hand toward me: and that Angel had a fyrey sword in his hand &c.³⁵⁰

H: Go toward it: and take it up.

Δ: I went toward the place, which EK pointed to: and tyll I cam within two fote of it, I saw nothing: and then I saw like a shaddow on the grownd or matts hard by my bokes under the west wyndow. The shaddow was rowndysh, and less then the palm of my hand. I put my hand down uppon it, and I felt a thing cold and hard: which, (taking up, I) perceyued to be the stone before mentioned.³⁵¹

³⁴⁹ I omitted a word, and our memories could not yeld it, this perhaps, Dignified.

³⁵⁰ An angel holding up the stone.

H: Kepe it sincerely.

Veritas in veritate: Deus in Deo, Unus in uno est.³⁵²

Let no mortall hand towche it, but thyne owne.³⁵³

Prayse God.

Δ: liii qui venturus est Indicare Sæculum per ignem sit omnis honor, laus, et gloria, in sempiterna sæcula.³⁵⁴ Amen.

 caue.

The Hieroglyphic Monad

THEOREM I

It is by the straight line and the circle that the first and most simple example and representation of all things may be demonstrated, whether such things be either non-existent or merely hidden under Nature's veils.

THEOREM II

Neither the circle without the line, nor the line without the point, can be artificially produced. It is, therefore, by virtue of the point and the Monad that all things commence to emerge in principle. That which is affected at the periphery, however large it may be, cannot in any way lack the support of the central point.

THEOREM III

Therefore, the central point which we see in the centre of the hieroglyphic Monad produces the Earth, round which the Sun, the Moon, and the other planets follow their respective paths. The Sun has the supreme dignity, and we represent him by a circle having a visible centre.

The Hieroglyphic
Monad

THEOREM IV

Although the semicircle of the Moon is placed above the circle of the Sun and would appear to be superior, nevertheless we know that the Sun is ruler and King. We see that the Moon in her shape and her proximity rivals the Sun with her grandeur, which is apparent to ordinary men, yet the face, or a semi-sphere of the Moon, always reflects the light of the Sun. It desires so much to be impregnated with solar rays and to be transformed into Sun that at times it disappears completely from the skies and some days after reappears, and we have represented her by the figure of the Horns (Cornucopia).

THEOREM V

And truly I give the completion of the idea of the solar circle by adding a semicircle for the Moon, for the morning and the evening were the first day, and it

The Hieroglyphic Monad

was therefore in the first (day) that the Light of the Philosophers was made (or produced).

THEOREM VI

We see here that the Sun and the Moon are supported upon the right-angled Cross. This Cross may signify very profoundly, and for sufficient reasons in our hieroglyph, either the Ternary or the Quaternary. The Ternary is made by the two straight lines having a copulative centre.

The Quaternary is produced by the four straight lines enclosing four right angles. Either of these elements, the lines or the right angles, repeated twice, therefore, afford us in the most secret manner the Octad, which I do not believe was known to our predecessors, the Magi, and which you should study with great attention. The threefold magic of the first Fathers and the wise men consisted in Body, Soul and Spirit. Therefore, we have here the first manifested Septenary, that is to say, two straight lines with a common point which make three, and the four lines which converge to form the central point in separating the first two.

THEOREM VII

The Elements being far from their accustomed places, the homogeneous parts are dislocated, and this a man learns by experiment, for it is along the straight lines that they return naturally and effectively to these same places. Therefore, it will not be absurd to represent the mystery of the four Elements, in which it is possible to resolve each one into elementary form, by four straight lines running in four contrary directions from one common and indivisible point. Here you will notice particularly that the geometricians teach that a line is produced by the displacement of a point: we give notice that it must be the same here, and for a similar reason, because our elementary lines are produced by a continual cascade of droplets as a flux in the mechanism of our magic.

THEOREM VIII

Besides, the kabbalistic extension of the Quaternary according to the common formula of notation (because we say one, two, three, and four) is an abridged or reduced form of the Decad. This is because Pythagoras was in the habit of saying: $1+2+3+4$ make 10. It is not by chance that the right-angled Cross—that is to say, the twenty-first letter of the Roman alphabet, which was considered as being formed by four straight lines, was taken by the most ancient of the Roman Philosophers to represent the Decad.

Further, they have defined the place where the Ternary conducts its force into the Septenary.

The Hieroglyphic Monad

THEOREM IX

We see that all this accords perfectly with the Sun and Moon of our Monad, because, by the magic of the four Elements, an exact separation upon their original lines must be made; following which the circulatory conjunction within the solar complement through the peripheries of these same lines is performed, because however long a given line may be, it is possible to describe a circle passing through its extremes, following the laws of the geometricians. Therefore, we cannot deny how useful the Sun and the Moon are to our Monad, in conjunction with the decadal proportion of the Cross.

THEOREM X

The following figure of the zodiacal sign Aries, in use amongst the astronomers, is the same for all the world (a sort of erection both cutting and pointed), and it is understood that it indicates the origin of the fiery triplicity in that part of the sky. Therefore, we have added the astronomical sign Aries to signify that in the practice of this Monad the use of fire is required.

We finish the brief hieroglyphic consideration of our Monad, which we would sum up in one only hieroglyphic context:

The Sun and the Moon of this Monad desire that the Elements in which the tenth proportion will

flower, shall be separated, and this is done by the application of Fire.

THEOREM XI

The mystical sign of the Ram, composed of two semicircles connected by one common point, is very justly attributed to the place of the equinoctial nycthemeron, because the period of twenty-four hours divided by means of the equinox denotes most secret proportions.

This I have said in respect of the Earth.

THEOREM XII

The very ancient wise men and Magi have transmitted to us five hieroglyphical signs of the planets, all of which are composed out of the signs used for the Moon and the Sun, together with the sign of the Elements and the hieroglyphical sign of Aries, the Ram, which will become apparent to those who examine these figures:

Each one of these signs will not be difficult to explain according to the hieroglyphical manner in

The Hieroglyphic Monad

view of our fundamental principles, already posited. To begin with, we will speak in paraphrases of those which possess the characteristics of the Moon: following that, of those which possess a solar character. When our lunar nature, by the science of the Elements, had accomplished the first revolution round our Earth, then it was called, mystically, Saturn. Afterwards, at the following revolution, it was named

Jupiter, and holds a very secret figure. Then the Moon, developed by yet a third journey, was represented very obscurely again by this figure which it was their custom to call Mercury. You see how this is Lunar. That it must be conducted through a fourth revolution will not be contrary to our most secret design,

whatever certain sages may say. In this manner the pure magical spirit, by its spiritual virtue, will perform the work of the albification at the place of the Moon; to us alone and as it were in the middle of a natural day he will speak hieroglyphically without words, introducing and imprinting these four geogonic figures in the pure Earth very simply prepared by us:

this last figure being in the middle of all the others.

THEOREM XIII

Now regard the mystical character of Mars! Is it not formed from the hieroglyphs of the Sun and Aries, the magistry of the Elements partly intervening? And that of Venus - I wish to know is it not produced from that of the Sun and the Elements according to the best exponents? Therefore, the planets look towards the solar periphery and the work of revivification.

In the progression we will notice this other Mercury will appear who is truly the twin brother of the first: for by the complete Lunar and Solar magic of the Elements, the Hieroglyph of this Messenger speaks to us very distinctly, and we should examine it carefully and listen to what it says. And (by the Will of God) it is

The Hieroglyphic Monad

the Mercury of the Philosophers, the greatly celebrated microcosm and ADAM. Therefore, some of the most expert were inclined to place him in a position of, and give him a rank equal to, the Sun himself. This we cannot perform in the present epoch unless we add to this coralline crystal work a certain SOUL separated from the body by the pyrognomic art. It is very difficult to accomplish this and very perilous because of the fire and the sulphur which the breath contains within it. But certainly this Soul can perform marvellous things. For example, join it by indissoluble ties to the disc of the Moon (or at least of Mercury) by Lucifer and Fire. In the third place, it is necessary that we should show (in order to demonstrate our Septenary number) that it is the Sun of Philosophers itself. You will observe the exactitude as well as the clarity with which this anatomy of our Hieroglyphic Monad corresponds to what is signified in the arcana of these two theorems.

THEOREM XIV

It is therefore clearly confirmed that the whole magistry depends upon the Sun and the Moon. Thrice Greatest Hermes has repeatedly told us this in affirming that the Sun is its father and the Moon is its mother: and we know truly that the red earth (terra lemnia) is nourished by the rays of the Moon and the Sun which exercise a singular influence upon it.

THEOREM XV

We suggest, therefore, that Philosophers should consider the action of the Sun and the Moon upon the Earth. They will notice that when the light of the Sun

The Principles of the Inferior
Astronomy, shown in the
Anatomy of our Monad.

enters Aries, then the Moon, when she enters the next sign, that is to say Taurus, receives a new dignity in the light and is exalted in that sign in respect of her natural virtues. The Ancients explained this proximity of the luminaries – the most remarkable of all – by a certain mystic sign under the name of the Bull. It is very certain that it is this exaltation of the Moon to which in their treatises the astronomers from the most ancient times bear witness. This mystery can be understood only by those who have become the Absolute Pontiffs of the Mysteries. For the same reason they have said that Taurus is the house of Venus – that is to say, of conjugal love, chaste and prolific, for

The Hieroglyphic Monad

nature rejoices in nature, as the great Ostanès concealed in his most secret mysteries. These exaltations are acquired by the Sun, because he himself, after having undergone many eclipses of his light, received the force of Mars, and is said to be exalted in this same house of Mars which is our Ram (Aries).

This most secret mystery is clearly and perfectly shown in our Monad by the hieroglyphic figure of Taurus, which is here represented, and by that of Mars, which we have indicated in Theorem XII and Theorem XIII by the Sun joined to a straight line towards the sign of Aries.

In this theory another kabbalistic analysis of our Monad offers itself, because the true and ingenious explanation is this: the exaltations of the Moon and of the Sun are made by means of the science of the Elements.

Note. – There are two things which should be particularly observed: first, that the hieroglyphic figure of Taurus is the same as the diphthong of the Greeks, which was always used in terminating the singular

gender; secondly, that by a simple transposition of place we show the letter alpha twice, by a circle and a half-circle, being simply tangents which touch one another as shown.

THEOREM XVI

We must now, in view of our subject, philosophise for a short time upon the Cross. Our Cross may be formed of two straight lines (as we have said) which are equal one to the other – that is to say, we cannot separate the lines except we do it by parting them so that we get equal lengths. But in the mystic distribution of the components of our Cross, we wish to use parts which are both equal and unequal. These parts show that a virtue is hidden under the power of the division of the Equilateral Cross into two parts, because they are of equal grandeur. In general, the Cross must be composed of equal right angles, since the nature of justice demands the perfect equality of the lines used in the decussation. In accordance with this justice, we propose to examine with care that which follows concerning the Equilateral Cross (which is the twenty-first letter of the Latin alphabet).

If, through the common point where the opposite angles meet in our Rectilineal, Rectangular, and Equilateral Cross, we imagine a straight line dividing it into two parts, then on either side of the line thus traversed we find the parts are perfectly equal and similar.

The Hieroglyphic Monad

And these parts are similar in shape to that letter of the Romans which is regarded as the fifth of the vowels, and which was frequently used by the most ancient Latin Philosophers to represent the number five. This, I conceive, was not done by them without good reason, because it is in fact the exact half of our Decad. Of these parts of the figure thus duplicated by the hypothetical division of the Cross, we must conclude it to be reasonable that each part represents the quinary, although one is upright and the other reversed in imitation of the multiplication of the square root which comes in here in a marvellous way as the circular number, that is to say, the quinary, from which we find the number twenty-five is produced (because this letter is the twentieth of the alphabet and the fifth of the vowels).

We will now consider another aspect of this same Equilateral Cross – that which follows is based upon the position shown in our Monadic Cross. Let us suppose a similar division of the Cross into two parts be made as in the drawing. Now we see the germinating shape of another letter of the Latin alphabet – the one

upright, the other reversed and opposite. This letter is used (after the ancient custom of the Latins) to represent the number fifty. From this, it seems to me, we establish our Decad of the Cross, for this is placed at the summit of all the mysteries, and it follows that this Cross is the hieroglyphic sign of perfection. Therefore, enclosed within the quinary force is the power of the Decad, out of which comes the number fifty as its own product.

Oh, my God, how profound are these mysteries! and the name EL is given to this letter! And for this very reason, we see that it responds to the decadal virtue of the Cross, because, starting from the first letter of the alphabet, L is the tenth letter, and counting backwards from the letter X, we find that it falls into the tenth place, and since we show that there are two parts of the Cross, and considering now their numerical virtue, it is quite clear how the number one hundred is produced. And if by the law of squares these

The Hieroglyphic Monad

two parts be multiplied together, they give a product of 2500. This square compared with the square of the first circular number, and applied to it, gives a difference of one hundred, which is the Cross itself explained by the square of its Decad, and is recognised as one hundred. Therefore, as this is contained within the figure of the Cross, it also represents unity. By the study of these theories of the Cross, the most dignified of all, we are thereby induced to utilise this progression, viz. one-ten-one hundred, and this is the decadal proportion of the Cross as it appears to us.

THEOREM XVII

After a due study of the sixth theorem it is logical to proceed to a consideration of the four right angles in our Cross, to each one of which, as we have shown in the preceding theorem, we attribute the significance of the quinary according to the first position in which they are placed, and in transposing them to a new position, the same theorem shows that they become hieroglyphic signs of the number fifty. It is quite evident that the Cross is vulgarly used to indicate the number ten, and further, it is the twenty-first letter, following the order of the Latin alphabet, and it is for this reason that the sages amongst the Mecubales designated the number twenty-one by this same letter. In fact, we can give a very simple consideration to this sign to find out what other qualitative and quantitative virtues it possesses. From all these facts we see that we may safely conclude, by the best kabbalistic computation, that our Cross, by a marvellous metamorphosis, may signify for the Initiates two hundred and fifty-two. Thus: four times five, four times fifty, ten,

twenty-one and one, which added together make two hundred and fifty-two. We can extract this number by two other methods as we have already shown: we recommend to the Kabbalists who have not yet made experiments to produce it, not only to study it in its conciseness, but also to form a judgment worthy of philosophers in regard to the various permutations and ingenious productions which arise from the magistrery of this number. And I will not hide from you a further memorable mystagogy: consider that our Cross, containing so many ideas, conceals two further letters if we examine carefully their numerical virtues after a certain manner, so that, by a parallel method following their verbal force with this same Cross, we recognise with supreme admiration that it is from here that LIGHT is derived (LUX), the final word of the magistrery, by the union and conjunction of the Ternary within the unity of the Word.

THEOREM XVIII

From our Theorems XII and XIII it may be inferred that celestial astronomy is the source and guide of the inferior astronomy. Before we raise our eyes to heaven, kabbalistically illuminated by the contemplation of these mysteries, we should perceive very exactly the construction of our Monad as it is shown to us not only in the LIGHT but also in life and nature, for it discloses explicitly, by its inner movement, the most secret mysteries of this physical analysis. We have contemplated the heavenly and divine functions of this celestial Messenger, and we now apply this co-ordination to the figure of the egg. It is well known that all astrologers teach that the form of

The Hieroglyphic Monad

the orbit traversed by a planet is circular, and because the wise should understand by a hint, it is thus that we interpret it in the hieroglyph, shown, which conforms in every detail with all that has gone before. Here you will note that the miserable alchemists must learn to recognise their numerous errors and to understand what is the water of the white of egg, what is the oil of the yoke of egg, and what we mean by calcined egg-shells. These inexpert impostors must learn in their despair to understand what are meant by these and many other similar expressions. Here we have shown almost all the proportions which correspond to Nature herself. This is the same Eagle's Egg which the scarab formerly broke because of the injury which the cruelty and violence of this bird caused to timid and primitive man, for this bird pursued some of them who were running to the cavern where the scarab dwelt, to implore his aid. The scarab wondered in what manner he alone could revenge such insolence,

The Hieroglyphic Monad

and, being of an ardent character, prepared to accomplish his purpose by constancy and determination, for he was short of neither power nor intelligence. The scarab pursued the eagle resolutely and made use of this very subtle trick: he let fall his ordure in the bosom of Jupiter where the egg was deposited, with the result that the God in getting rid of it threw the egg to the ground, where it was broken. The scarab by this method would have completely exterminated the whole family of eagles from the Earth had not Jupiter, in order to avoid such a calamity, resolved that, during that part of the year when the eagles watch over their eggs, no scarab should come flying near them. There-

The Hieroglyphic Monad

fore, I counsel those who are ill-treated by the cruelty of this bird, that they learn the very useful art from these solar insects (*Heliocantharis*) who live concealed and hidden for very long periods of time. By these indications and signs, for which they should be very thankful, they themselves will be able to take vengeance on their enemy. And I affirm (O King!) that it is not Aesop but Oedipus who prompts me, for he presented these things to worthy souls, and ventured for the first time to speak of these supreme mysteries of Nature. I know perfectly well that there have been certain men who, by the art of the scarab, have dissolved the eagle's egg and its shell with pure albumen and have formed thereby a mixture of all; afterwards they have reduced this mixture to a yellow liquid, by a notable process, viz. by a ceaseless circulation just as the scarabs roll their balls of earth. By this means the great metamorphosis of the egg was accomplished; the albumen was absorbed during a great many revolutions round the heliocentric orbits, and was enveloped in this same yellow liquid. The hieroglyphic figure shown here, of this art, will not displease those who are familiar with Nature.

We read that during the early centuries, this art was much celebrated amongst the most serious and ancient Philosophers, as being certain and useful. Anaxagoras performed the magistery and extracted therefrom an excellent medicine, as you may read in his book.

He who devotes himself sincerely to these mysteries will see clearly that nothing is able to exist without the virtue of our hieroglyphic Monad.

THEOREM XIX

The Sun and the Moon shed their corporeal forces upon the bodies of the inferior Elements, much more so than all the other planets. It is this fact which shows, in effect, that in the pyrognomic analysis all metals lose the aqueous humour of the Moon as well as the igneous liquor of the Sun, by which all corporeal, terrestrial, and mortal things are sustained.

THEOREM XX

We have shown sufficiently that for very good reasons the Elements are represented in our Hieroglyph by the straight lines, therefore we give a very exact speculation concerning the point which we place in the centre of our Cross. This point cannot by any means be abstracted from our Ternary. Should anyone who is ignorant of this divine learning, say that in this position of our Binary the point can be absent, we reply, he may suppose it to be absent, but that which remains without it will certainly not be our Binary; for the Quaternary is immediately manifested, because by removing the point we discontinue the unity of the lines. Now, our adversary may suppose that by this argument we have reconstructed our Binary; that in fact our Binary and our Quaternary are one and the same thing, according to this consideration, which is manifestly impossible. The point must of necessity be present, because with the Binary it constitutes our Ternary, and there is nothing that can be substituted in its place. Meanwhile he cannot divide the hypostatic property of our Binary without nullifying an integral part of it. Thus it is demonstrated that it must

The Hieroglyphic Monad

not be divided. All the parts of a line are lines. This is a point, and this confirms our hypothesis. Therefore, the point does not form part of our Binary and yet it forms part of the integral form of the Binary. It follows that we must take notice of all that is hidden within this hypostatic form and understand that there is nothing superfluous in the linear dimension of our Binary. But because we see that these dimensions are common to both lines, they are considered to receive a certain secret image from this Binary. By this we demonstrate here that the Quaternary is concealed within the Ternary. O God, pardon me if I have sinned against Thy Majesty in revealing such a great mystery in my writings which all may read, but I believe that only those who are truly worthy will understand.

We therefore continue to expound the Quaternary of our Cross as we have indicated. Seek diligently to discover whether the point may be removed from the position in which we first find it. The mathematicians teach that it may be displaced quite simply. At the moment when it is separated the Quaternary remains, and it becomes much more clear and distinct to the eyes of all.

This is not a part of its substantial proportions, but only the confused and superfluous point which is rejected and removed.

O Omnipotent Divine Majesty, how we Mortals are constrained to confess what great Wisdom and what ineffable mysteries reside in the Law which Thou hast made! Through all these points and these letters the most sublime secrets, and terrestrial arcane mysteries, as well as the multiple revelations of this unique point, now placed in the Light and examined

by me, can be faithfully demonstrated and explained. This point is not superfluous within the Divine Trinity, yet when considered, on the other hand, within the Kingdom of the four Elements it is black, therefore corruptible and watery. O thrice and four times happy, the man who attains this (almost copulative) point in the Ternary, and rejects and removes that sombre and superfluous part of the Quaternary, the source of vague shadows. Thus after some effort we obtain the white vestments brilliant as the snow.

Oh, Maximilian, May God, through this mystagogy, make you or some other scion of the House of Austria the most powerful of all when the time comes for me to remain tranquil in Christ, in order that the honour of His redoubtable name may be restored within the abominable and intolerable shadows hovering above the Earth. And now for fear that I myself should say too much I shall immediately return to the burden of my task, and because I have already terminated my discourse for those whose gaze is centred within the heart, it is now necessary to translate my words for those whose heart is centred within their eyes. Here, therefore, we can represent in some measure in the figure of the Cross that which we have already said. Two equal lines are equally and inequally crossed through the point of necessity which you see in A. The four straight lines, as in B, produce a sort of vacuum where they are withdrawn from the central point, which was their common condition, in which state they were not prejudicial, the one to the other. This is the path by which our Monad, progressing through the Binary and the Ternary into the purified Quaternary, is reconstituted within itself, united in

The Hieroglyphic Monad

equal proportions, and which now shows that the whole is equal to its combined parts, for during the time that this takes place our Monad will not admit of other units or numbers, because it is self-sufficient, and exactly so, within itself; absolute in all numbers in the amplitude of which it is diffused, not only magically but also by a somewhat vulgar process employed by the artist, which produces great results in dignity and power within this selfsame Monad, which is resolved into its own first matter; whilst that which is foreign to its nature and to its natural hereditary proportions is segregated with the greatest care and diligence and rejected for ever amongst the impurities.

THEOREM XXI

If that which is hidden within the profundities of our Monad be brought to light, or, on the contrary, if those primary parts which are exterior in our Monad are enclosed in the centre, you will see the extent to which the philosophical transformation can be produced. We will now expound to you another local commutation of our mystical Monad, using those parts from the hieroglyphic characters of the superior planets which are immediately

offered to us. Each one of the other planets for this purpose is in turn elevated to a position which was frequently assigned to them by Plato, therefore, if they are conveniently taken in this position and at this point in Aries, Saturn and Jupiter are in conjunction. By descending, the Cross represents Venus and Mercury, followed by the Sun himself with the Moon at the bottom. This will be refuted in other circles; meantime, as we have no wish to hide the philosophical treasure of our Monad, we have taken a resolution to give a reason by which the position of the Monad is by this manner displaced. Yet see! listen to these other great secrets which I know and will disclose to assist you as touching this position, which I can explain in few words. We distribute our Monad, now looked at from a different aspect, and analysed in a different manner, as is seen at B, D, C. In this new Ternary the

The Hieroglyphic Monad

figures C and D are known to all men, but the figure designated B is not easy of comprehension.

It is necessary to give careful consideration to the known forms D and C, which show that the essences are separated and distinct from the figure B: also we see that the Horns of the figure C are turned downwards towards the Earth. That part of D which illuminates C is also towards the Earth, that is to say, downwards, in the centre of which the solitary visible point alone is truly the Earth: finally these two figures D and C turned towards the lower end give a hieroglyphic indication of the Earth. Therefore, the Earth is made to represent, hieroglyphically, stability and fixation. I leave you to judge from this what is meant by C and D: from which you may take notice of a great secret. All the qualities which we have in the first place ascribed to the Sun and the Moon can here be given a perfect and very necessary interpretation, these two stars up to now having been placed in the superior

position with the horns of the Moon raised on high; but we have already spoken of this.

We will now examine, according to the fundamentals of our hieroglyphic Art, the nature of this third figure B. First, we carry to the Crown the double crescent of the Moon which is our Aries, turned round in a mystical manner. Then follows the hieroglyphic sign of the Elements, which is attached to it. As to why we use the double Moon, it may be explained that it is according to the matter, which requires a double quantity of the Moon. We speak of those grades of which in their experiments the Philosophers could find no more than four, amongst all created substances, that is to say, to be, to live, to feel and to comprehend (*esse, vivere, sentire et intelligere*). In saying that the first two of these Elements are found here, we say that they are called *argent vive* (*luna existens, viva*), all life being subject to movement, there being six principles of movement. The Cross which is attached implies that in this artifice the Elements are requisite. We have told you many times that in our theory the hieroglyph of the Moon is like a semicircle, and on the contrary the complete circle signifies the Sun, whereas here we have two semicircles separated, but touching at a common point; if these are combined, as they can be by a certain art, the product can represent the circular plenitude of the Sun. From all those things which we have considered, the result is that we can summarise, and in hieroglyphic form, offer the following:

Argent vive, which must be developed by the magistry of the Elements, possesses the power of the solar force through the unification of its two semicircles combined by a secret art.

The Hieroglyphic Monad

The circle, of which we have spoken and which we designate in the figure by the letter E, is thus accomplished and formed. You will recollect, we have said that the solar degree is not delivered to us ready to our hand by Nature, but that it is artificial and not produced by Nature, it being available to us in its first aspect in accordance with its proper nature (as in B) in two parts separated and dissolved, and not solidly united in the solar body. In fact, the semi-diameter of these half-circles is not equal to the semi-diameter of D and C, but much smaller. Everyone can see this from the manner in which we have drawn them in the diagram, from which it is clear that this same B has not as great an amplitude as D and C. The proportions in the figure confirm this, being by this means transformed into a circle from B into E. Therefore, there appears before our eyes the sign of Venus alone. We have already demonstrated by these hieroglyphical syllogisms that from B we cannot obtain the true D, and that the true C is not and cannot be completely within the nature of B; therefore, this of itself is not able to become the true "Argent Vive." You may already doubt the subject of this life and of this movement, whether it is possible, in fact, to possess it naturally or not. However, as we have already explained to the wise, all those things which are said about B, in a similar manner will be at least analogical, and all that which we have briefly taught concerning C and D can be very well applied, by analogy, to this same B accompanied by its Elements.

Indeed, that which we have attached to the nature of Aries, should exactly fit the case, because it carries this figure B, although reversed, at its summit, and

that which is attached to the figure B, is the mystical figure of the Elements. Therefore, we see by this anatomy that from the body of our Monad alone, separated in this manner by our Art, this new Ternary is formed.

This we cannot doubt, for the reason that the members which composed it reassemble and form amongst themselves of their own free will a monadic union and sympathy which is absolute. By this means we discover amongst these members a force which is both magnetic and active.

Finally I think it well to note here, by way of recreation, that this same B shows very clearly the same proportions in the malformed and rustic letter in that it carries visible points towards the top and at the front and that these letters are three in number, otherwise they number six, summarising three times three: they are crude and malformed, unstable and inconstant, made in such a manner as to appear formed of a series of half-circles. But the method of making these letters more stable and firm is in the hands of the literary experts. I have here placed before your eyes an infinitude of mysteries: I introduce a game but to interrupt a theory. Meanwhile I do not understand the efforts of certain people who rise up against me. Our Monad being reconstituted in its first mystical position and each one of its parts being ordered by Art, I advise and exhort them to search with zeal for that fire of Aries in the first triplicity, which is our equinoctial fire and which is the cause whereby our Sun may be elevated above his vulgar quality. Many other excellent things should also be studied in happy and wise meditations.

The Hieroglyphic Monad

We now pass on to another subject; we wish to point the way, not only in a friendly but also in a faithful manner, to those other secrets upon which we must insist, before we lapse into silence and which, as we have said, comprise a most remarkable infinitude of other mysteries.

THEOREM XXII

It will be readily understood that the mysteries of our Monad cannot be extracted unless one is drawn towards the pharmacy of this same Monad, and that these mysteries must not be revealed to any but the Initiates. I offer here for the contemplation of your Serene Highness, the vessels of the Sacred Art which are truly and completely kabbalistic. All those lines which unite the diverse parts of our Monad are most wisely separated; we give to each one of them a special letter, in order to distinguish them one from another as you will see in the diagram.

We inform you that in α is found a certain artificial vessel, formed of A and B with the line M. The exterior diameter is common to both A and B, and this is not different, as we see, from this the first letter of the

Greek alphabet, except by a single transposition of the parts.

We teach the true mystical sympathy first by the line, the circle, and the semicircle, and, as we have formerly said, this symmetry can only be formed of the circle and the semicircle, which are always joined for the same mystical purpose.

It follows that λ and δ are in themselves the shapes of other vessels. That is to say, λ is made of glass and δ of earth (earthenware or clay). In the second place, λ and δ may remind us of the Pestle and Mortar, which must be made of suitable substance, in which artificial unperforated pearls, lamels of crystal and beryl,

The Hieroglyphic Monad

chrysolite, precious rubies, carbuncles and other rare artificial stones may be ground to powder.

Lastly, that which is indicated by the letter ω is a small vessel containing the mysteries, which is never far from this last letter of the Greek alphabet now restored to its primitive mystagogy, and which is made by a single transposition of its component parts, consisting of two half-circles of equal size. Concerning the vulgar objects and necessities which are required in addition to the vessels, and the materials out of which they should be fashioned, it would be useless that we should treat of it here. Meanwhile a must be considered as if searching for the occasion to perform its function by a very secret and rapid spiral circulation and an incorruptible salt by which the first principle of all things is preserved, or better, that the substance which floats within the vitriol after its dissolution, shows the apprentice a primordial but very transitory specimen of our work, and if he is attentive, a very subtle and most effective way to prepare the work will be revealed to him.

Within λ , the glass vessel, during the exercise of its particular function, all air must be excluded or it will be extremely prejudicial. The corollary of ω is the agreeable man, ready, active, and well disposed at all times. Who, then, is not now able to procure the sweet and salutary fruits of this Science, which, I say, spring from the mystery of these two letters?

Some of those who would draw us away from our Garden of the Hesperides, and would make us view this a little closer as in a mirror, say that it is established that it is not formed from anything but our Monad.

But the straight line which appears in Alpha is homologous with that which, in the separation of the final analysis of our Cross, is already designated by the letter M. One may discover by these means from where the others are produced. See the scheme outlined in the table on page 33.

In these few words, I know that I give not only the principles but the demonstration to those who can see in them how to fortify the igneous vigour and the celestial origin, so that they may lend a willing ear to the great Democritus, certain that it is not mythical dogma but mystic and secret, according to which it is the medicine of the soul, the liberator from all suffering, and is prepared for those who wish for it and as he has taught; it is to be sought for in the Voice of the Creator of the Universe, so that men, inspired by God, and engendered anew, learn through the perfect disquisition of the mystical languages.

The Hieroglyphic Monad

		
Existing before the Elements	The Elements (Chaos)	After the Formation of the Elements
Mortal Adam, male & female	Consummation of the Genealogy of Elements	Immortal Adam
The Mortifying Self	CROSS	The Vivifying Self
Wrapped in Shadows	CROSS	Manifestation
Born in a stable	Sacrificed on the Cross	King of All ubiquitous
Self-conceived by own influence	Death and Burial	Reborn from its own Virtue
Power in the Seed	IHVH Decadal Virtue	Triumph in Glory
Creation of HYLE	Purification of the Elements	Transformation
Earthly Marriage	Martyrdom on the CROSS	Divine Marriage
Beginning	Middle	End

THEOREM XXIII

We now present in diagrammatic form the proportions already observed by us in the hieroglyphic construction of our Monad, which must be observed by those who wish to engrave them upon their seals or their rings, or to utilise them in some other manner. In the name of Jesus Christ crucified upon the Cross, I say the Spirit writes these things rapidly through me; I hope, and I believe, I am merely the quill which traces these characters. The Spirit draws us now towards our Cross of the Elements, with all the following measures which are also to be obtained by a reasoning process according to the subject-matter which it is proposed to discuss. Everything which exists under the heaven of the Moon contains the principle of its own generation within itself and is formed from the coagulation of the four Elements, unless it be the primary substance itself, and this in several ways not known to the vulgar, there being nothing in the created world in which the Elements are in equal proportion or in equal force. But by means of our Art, they can be restored to equality in certain respects, as the wise well know; therefore, in our Cross, we make the parts equal and unequal.

Another reason is that we can proclaim either similitude, or diversity, or unity, or plurality in affirming the secret properties of the equilateral Cross, as we have said before.

If we were to expound all the reasons which we know, for the proportions established in this way, or if we were to demonstrate the causes by another method which we have not done, although we have done so

The Hieroglyphic Monad

sufficiently for the Sages, we should transcend the limits of obscurity which we have prescribed, not without reason, for our discourse.

Take any point, as A for example, draw a straight line through it in both directions, as CAK. Divide the line CK at A by a line at right angles, which we will call DAE. Now select a point anywhere on the line

AK, let it be B, and one obtains the primary measurement of AB, which will be the common measure of our work. Take three times the length of AB and mark off the central line from A to C, which will be AC. Now take twice the distance between AB and mark it off on the line DAE at E and again at D, in such a way that the distance between D and E is four times the distance between A and B. Thus is formed our Cross of four Elements, that is to say, the Quaternary formed by the lines AB, AC, AD, AE. Now on the line BK take a distance equal to AD up the central line to I. With this point I as a centre, and IB as the radius, describe a circle which cuts the line AK at R: from the point R towards K mark a distance equal to AB, let it be RK. From the point K draw a line at right angles to the central line on both sides, forming an angle on either side of AK, which will be PFK. From the point K measure in the direction of F a distance equal to AD, which will be KF: now with K as centre and KF as radius describe a half-circle FLP, so that FKP is the diameter. Finally, at point C draw a line at right angles to AC sufficiently long in both directions to form OCQ. Now on the line CO we measure from C a distance equal to AB, which is CM, and with M as a centre and MC as a radius we describe a semicircle CHO. And in the same manner on CQ, from the point C we measure a distance equal to AB which is CN, and from the centre N, with CN as radius, we trace a semicircle CGQ, of which CNQ is the diameter. We now affirm, from this, that all the requisite measurements are found explained and described in our Monad.

The Hieroglyphic Monad

It would be well to notice, you who know the distances of our mechanism, that the whole of the line CK is composed of nine parts, of which one is our fundamental, and which in another fashion is able to contribute towards the perfection of our work: then, again, all the diameters and semi-diameters must be designated here by suppositional lines hidden or obscured, as the geometricians say. It is not necessary to leave any centre visible, the exception being the solar centre, which is here marked by the letter I, to which it is unnecessary to add any letter. Meanwhile those who are adept at our mechanism can add something to the solar periphery, by way of ornament and not by virtue of any mystical necessity: for this reason it has not been formerly considered by us. This something is a boundary ring, necessarily a line parallel to the original periphery. The distance between these parallels may be fixed at a quarter or a fifth part of the distance AB. One may also give to the crescent of the Moon a form which this planet frequently assumes in the sky, after her conjunction with the Sun—that is to say, in the form of the Horns, which you will obtain if from the point K in the direction of R you measure the distance just mentioned, i.e. the fourth or fifth part of the line AB, and if from the point thereby obtained, as a centre, you trace with the original lunar radius the second part of the lunar crescent, which joins the extremities at both ends of the first semicircle. You may perform a similar operation in respect of the positions M and N when erecting the perpendicular at each one of these centre points; we can use the sixth part of AB or a little less, from which point, as the

centre, we describe two other semicircles, using the radius of the two first, MC and NC.

Lastly, the parallels may be traced at each side of the two lines of our Cross, each side at a distance from the centre line of one-eighth to one-tenth part of the distance AB, in such a way that our Cross be in this manner formed into four superficial lines where the width is the fourth or the fifth part of this same line AB.

The Hieroglyphic Monad

I have wished in some way to sketch these ornaments in the figure which each one may reproduce according to his own fancy. It is a condition, however, that you do not commit any fault, however small, against the mystical symmetry for fear of introducing by your negligence a new discipline into these hieroglyphic measurements; for it is very necessary that during the succeeding progression in time they must be neither disturbed nor destroyed. This is much more profound than we are able to indicate, even if we wished to do so, in this small book, for we teach Truth, the daughter of Time, God willing.

We will now expound methodically certain things which you may find on your way by practising the proportions of our Monad. Then we will show by many examples the existence of four lines corresponding to the four lines of our Cross, and which in this consideration we are not able simply to announce, because of the proportions and the particular and mystical results which are produced in another fashion, from the Quaternary of these same lines. And thirdly, we will show that there exist within Nature certain useful functions determined by God by means of numbers, which we have happily obtained and which are explained either in this theorem, or in others, contained in this little book.

Finally, we will insert other things in an opportune place which, if they are conveniently understood, will produce fruits most abundantly.

We now abruptly conclude.

Our Canon of Transposition (Metathesis)

Take the same proportion which is shown in numbers when written in the natural order, after the first Monad, then from the first to the last make a continuous multiplication – that is to say, the first by the second, the product of these two by the third, and this product by the fourth, and so on until the last; the final product determines all the Metatheses possible, in respect of the proportion in space, and for the same reason in proportion to diverse objects as you wish.

I tell thee, O King, this operation will be useful unto thee in many circumstances, whether in the study of Nature or in the affairs of the government of men; for it is that which I am accustomed to use with the greatest of pleasure in the Tziruph or Themura of the Hebrews.

I know that many other powerful numbers may be produced out of our Quaternary, by virtue of arithmetic and the power of numbers. Yet he who does not understand that a very great obscurity has by this method been illuminated by those numbers which I have drawn out which have nature and distinction

The Hieroglyphic Monad

amongst such a multitude, will not be able to estimate their meaning, which is obscure and not to the point. How many will find in our numbers the authority which we have promised for the weight of the Elements; for the statements regarding measurements of time; and for the certainty of proportions which may

The Hieroglyphic Monad

be assigned to the powers and forces of things ? All this you should study in the two preceding diagrams.

Many things may be deduced from the diagrams which, it is preferable, should be studied silently rather than divulged openly in words. Meantime, let us inform you of one thing, amongst many others, disclosed now for the first time by us, in respect of this new Art; to wit, we have here established a rational cause by virtue of which the Quaternary with the Decad, in a certain manner, terminate the numerical series. We affirm that this cause is not exactly that which was described by the Masters who have preceded us, but just as we have stated it here. This Monad has been integrally and physically restored to itself – that is to say, it is truly the Monad Unitissima,

the proved unity of the images; and it is not within the power of Nature, neither can we by any art promote in it any movement or any progression whatsoever, unless it be by four super-celestial cycles or revolutions, and from this Monad is engendered that which we wish to note as the manner and course of its eminence; and for this reason, that there is not in the elemental world,

nor in the celestial or super-celestial worlds, any created power or influence which cannot be absolutely favoured and enriched by it.

It was because of the true effect of this that four illustrious men, friends of Philosophy, were upon an occasion together in the great work. One day they were astonished by a great miracle in this thing, and forthwith dedicated themselves from that day forward to sing praises to God and to preach the thrice Mighty because He had given them so much wisdom and power and so great an Empire over all other creatures.

THEOREM XXIV

Just as we commenced the first theorem of this little book with the point, the straight line, and the circle, and have extended it from the Monadic point to the extreme linear efflux of the Elements in a circle, almost analogous to the equinoctial which makes one revolution in 24 hours, so now at last we consummate and terminate the metamorphosis and the metathesis of all possible contents of the Quaternary defined by the number 24 by our present twenty-fourth theorem, to the honour and Glory of Him, as witnesseth John

The Hieroglyphic Monad

the Archpraesul of the Divine Mysteries, in the fourth and last part of the fourth chapter of the Apocalypse, who is seated on His Throne, around and in front of which the four animals, each with six wings, chant night and day without repose: "Holy, Holy, Holy is the Lord God Omnipotent, who was, is and is to come," the same as the 24 ancient ones in the 24 seats placed in the circle, adore Him and prostrate themselves, having cast their Crowns of gold to earth, saying: "Worthy art Thou, O God, to receive Glory, Honour, and Virtue, because Thou hast created all things, and out of Thy Will they have been created."

Amen.

Says the fourth letter.

He to whom God has given the will and the ability to know in this way the Divine mystery through the eternal monuments of literature and to finish with great tranquillity this work on the 25th January, having commenced it on the 13th of the same month.

In the year 1564 at Antwerp.

CONTRACTUS AD PUNCTUM

Here the vulgar eye will see nothing but Obscurity and will despair considerably.

Ohorela

Fri Jan 14, 2011

Took a nap [@ My age, that's Happy Hour!]...
I 'seen' the word:
"Ohorela"
It was 'written' as that, then it 'expanded'-
"ooooooooOOOOHOOOOooooooooooooRela"
...something like that.
-for a few times, over & over again
I know what it means in Enochian*...
But for it to 'pop up' in a 10 minute nap?
[Woke me up, actually]
I have not done any EE work for a couple of days since I finished my second
book.
"They" call me, constantly...
[I know They aren't lonely, lol]
<http://groups.yahoo.com/group/enochianmagic/message/102>

Ohorela [III]

Been an interesting couple of days...
I planned on taking a short 'magickal sabbatical' from doing any Enochian.
Enochian has a way of burning up your nervous system if performed too much-
for too long.
[I believe I fit into that criteria]
Many long-time magickians will often take a few months off every once in awhile.
Well, that didn't happen
[Taking some time off lol]
"Ohorela Papers"....."Transmission- started"
<http://groups.yahoo.com/group/enochianmagic/message/103>

***In Enochian Language: "Ohorela" means "Law"**

*"After a couple of days away from the Temple,
I returned..."*

Performing an opening rite, and *confirming*, as usual...
the '*Enochian Skehinah*', *descending*- & the Enochian Entities [EE] of
the Table of Working, *ascending*.

The EE energies quickly grab hold of the chamber, and I immerse-
mind first, into the tranquil state of Alpha level.

:Moving down and falling backwards:
...That's the best way I can articulate that comfortable, at home,
feeling.

*I am amongst the 24 Seniors- at a Round Table. I gaze upon the
crystal sphere, and see what looks like an architect's blueprint.*

I see the EE imagery flash before me. Sometimes so quickly, I can
sense it is deliberately manifested that way, so I can not absorb the
full memory the first time it is shown.

It is almost always:

- Fast Forward
- Pause
- Rewind
- Certain Segments Spliced
- Altered,
- Isolated "Stills"
- Magnified

& *finally* –

-Explained

The EE have become My Personal Friends & Allies.
To Them, I believe I am little more than a Business Partner.
Some of them, seem robotic, and some- like my brother.

Still, I always have an *unsettling uneasiness*...
EE always *command*- Respect.

Again, I am told...
“Write This Down”...

The “Ohorela Papers” were named by the EE.

They have initiated yet another project.
[Again for wide and quick distribution]
&.. For Free

The deadline for Volume #2 was January 19, 2011
I was quite a few days earlier in releasing it.
I thought I would have some vacation time due me.
Now again- this particular article is to be sent “upstream” by that
same exact date.

These writings are not my invention, nor my teachings.
I will not yell from the roof tops:
“This is how it is done!”

Rather, I am a scribe, *an* EE conduit.
EE download - I upload.
That’s the ‘arrangement’

I do not think I was Dee, Kelley nor Crowley in a past or future
lifetime...

I am no avatar
“Nor the second coming or the fourth encounter of
Pharaoh PHast.PHood or King W.AL-mart”

This is not an acid trip...

It is not New Age ‘channeling’...

I am...
–SaToGa
Enochian Mage

& ...

THIS IS ENOCHIAN MAGICK!

I will be compiling notes, directly from my
Enochian Rituals.

The Material will be put in a pleasing format which will make
sense to those who did not participate in the Ritual with me.

Grimoire, Spiral Note-Book, Voice Recorder & *sometimes*, My Wife,
are my only *physical witnesses*.

Similar to Dee & Kelley- My wife & I are considered as
'*One Part*' to the EE.

There are times when I am '*neurologically fried*'
from participating solo [in Ritual]-
& yet still... receiving a *dual dose of energy*.

I will Ground well afterwards,
and up my dosage of Potassium [Volume #1]

These "Ohorela Papers" will be a Series of EE Works.

This Volume is called "Obtuse"
[Again- Not My Idea of *Titles* or *Sub-Titles*]

*I am unsure of how many there will be, nor do I know what
these will entail.*

I do know some of the future Materials will consist of
Obscure EE Items, Texts & Tables-
such as this Table of Nalvage which most EE practitioners are not
familiar with.

[Volume #2 was similar in scope, containing the Liber Loagaeth,
Lamen, & 7 Ensigns]

The reason most mages are not aware of these obscure, rarely discussed EE Materials is because most of them laid dormant to the seeking eyes of Magickal Lodges over 100 years ago.

These Lodges gave Enochian Magick It's popularity.

The 4 WatchTowers were usually the main fixture.

There is another reason these EE Materials were '*hidden*'...

[Keep Reading...]

When I receive them, I will pass them on... Free

So keep a watchful eye on my:

Or Email me:

Enochian.mage@yahoo.com

“Moving Parts”

-ROUND TABLE OF NALVAGE-

THE FIRST EE MATERIAL RECEIVED:

Premise:

PROTOYPE OF THE 4 WATCHTOWERS TABLET.

→ *Like a Hologram-*

Everything, in "The EE Materials" -are Complete.
[Separated or as a Whole- it still equals '*One Complete Unit*']

This is why the Enochian Materials can be incorporated with *any*
Tradition or "*Free-Style*" [Neo-Enochian 'Systems']

It always carries "all of Itself", ...*even* in the smallest fragment.
["A box, within a box, within a box"]

Everything in the EE Materials have an 'Intrinsic Connection'

One Union.

"Knitting Together"...

Nalvage

October 10, 1584

-THIS IS ALL NEW-

TABLE OF NALVAGE

This Table was the *Prototype* of what sort of encryption Dr. Dee was to look forward to & enjoy.

He loved those grid patterns and loved his “Book of Soyga”
[“Agyos” means “Holy” in Hebrew -Volume #2]

The Nalvage Table was *encrypted* with 3 levels:
Heart, Skin and Flesh.

It is a machine that comes apart.

[Like the Lamen, Sigil Dei Ameth, etc.,]

The point I am trying to convey is the EE Materials were not considered ‘*just charts*’...

They were Quantum Engines with Moving Parts.

[As I explained in Volume #1, even the Heptarchial Mystica’s King, Prince and Minister names were “*Cycled*”]

Intrinsic Connections

Figure #2

The patterns [*as revealed to me*], were sometimes given to Kelley/Dee, separately, and prior... to what the info pertained to.

This way, the EE Materials would make no sense to anyone, if the sessions were to come to an abrupt halt, inadvertently.

None of the information could be comprehended- until the next piece of the puzzle was given.

Dee's times were full of political tumult, demonic interference, and Kelley's threats of quitting.

The Table of Nalvage was one piece of the later WatchTower schematic.

Many of Dee's Diaries disappeared- for a 'deliberate' reason...

-These EE Materials were for This Age-

[Discussed *explicitly* in Volumes #1 & #2]

Figure #3

We can now ascertain from Figures #1, 2 & 3...

‘THE FUNCTION OF THE TABLE OF UNION ENTITIES’:

- EXARP = SACH
‘Confirming Entities’
- HCOMA = LUAH
‘Praising Entities’
- NANTA = URCH
‘Confounding Entities’
- BITOM = LANG
‘Ministering Entities’

We can now, also ascertain...

‘THE FUNCTION OF THE 3 ENSIGN BEAERS [3 GOD NAMES (3,4,5)] OF EACH WATCHTOWER’

- **1st Continent = East WatchTower:**
Highest Life/Joy – Fire
- **2nd Continent = North WatchTower**
Life /Potentiality – Water
- **3rd Continent = South WatchTower**
Continent of “Creation” = Earth
- **4th Continent = West Watchtower**
Continent of “Discord” = Air

Original WatchTower

Order of Continents: Round Table of Nalvage

IAD = GOD

- **Continent #1:**

Iad Moz Zir = Oro Ibah Aozpi

"I am the Joy of God"

- **Continent #2:**

Iad Bab Zna = Oip Teaa Pdoce

"God's Power In Motion"

- **Continent #3:**

Iad Sor Gru = Mor Dial Hctga

"Result of God's Action"

- **Continent #4:**

Iad Ser Osf = Mph Arsl Gaiol

"God's Discord & lamentation"

→ By "reverse engineering"...we can now meditate upon
each of the properties, attributes and characteristics of each
3,4,5 God Name...

As well as the Individual WatchTower 'quality'

Example:

The Water WatchTower which is North, Green...

Continent #2:

Iad Bab Zna = Oip Teaa Pdoce
"God's Power In Motion"

→ Water is God's Power in Motion.

Magickally, we understand what the Water Element 'is'.
But the Enochian Materials have much more profound meaning to
'Their' elements*.

When we incorporate the "Black Cross" [Table of Union],
we can now fully understand the *function* and the *attributes* of the EE
Forces we are utilizing.

[Ref. TFR pg. 183 per Ave Saying the
"L" has "more FORCE than N".]

*If you compare the Heptarchial Mystica's Kings and Princes to
Traditional Planetary Correspondences, you will understand the
significant differences.

**This was explored with the Mercurial Correspondences in
"Enochian Entities - Book #2"
which is Volume #2 to
"Enochian Entities – Practice & Theory"
Volume #1
Both Books Combined Here:
<http://www.lulu.com/spotlight/SaToGa>
[ISBN 978-1-4583-6095-3](http://www.lulu.com/spotlight/SaToGa)**

From Figure #1

The '*Vision Talisman*' lays out a Diagram- and shows us how to interpret the WatchTowers, and It's Occupants.

It is encompassed by the Zodiac Belt.
[See Volume #1]

The Reverse Side of Sigil Dei Ameth

Depicts the *Order/Flow* of the WatchTowers in the *acronym*:

“ **A → G → L → A** ”

[See Volume #1]

All My Books are Free.

So When I Refer the Reader to My Prior Volumes,
It Should Not Be Misconstrued As A Sales Pitch.

The "Ohorela Papers" should be considered
Advanced Enochian Magick.

Get familiar with the *substructure* of the system, before groking the
infrastructure of it.

If you want to 'practice' Enochian in It's *purist* form- my advice is to
avoid clouding your mind with the '*flavors of the week* '...

I will not dare say:
*"just read my books until you get more than a solid foundation in the
EE Materials"*.

That would be absurd!
There are many excellent writers in the EE playing field.

However, if you introduce a wide array of variables into your
research- you may walk away totally confused.

Here's an example:

You want to learn about traveling through the Enochian Aethyrs.
You read on forums how other mages '*did it*'.
You read their adventures with the EE.

Then, you compare that to Crowley's "*Vision & the Voice*"...

Now... '*You try it at home*'...

*Instantly, your subconscious comes under scrutiny because it must
live up to the expectations of what your mind has consumed and
sorted in it's infinite data base.*

[& that's a *trademark protocol* of the EE]
(See Volume #1)

You stare into the scrying mirror until your eyes feel like onions have
been forced under your eyelids. [I hate when that happens]
You see a dark cloud pass in your gaze, then it evaporates just as
quick. After awhile, you quit. Scratching your head, thinking to
yourself...

"I thought Enochian Magick was powerful...why can't I see stuff?"

Do not raise your standard of expectation so high that you will doom yourself to disappointment from the very beginning.

Choose one or two Authors who have a credible, or at least- garners a majority of attention from fellow mages.

Start off slow and do not expect results
"Like [*enter the name of your favorite magickians here*] got"

Patience is not only a Virtue, but it is also a
Ruler in the Enochian Tool-Box!

JOHN DEE

(1527—1608)

BY

CHARLOTTE, FELL-SMITH

AUTHOR OF "MARY RICH, COUNTESS OF WARWICK"

With Portrait and Illustrations

LONDON
CONSTABLE & COMPANY LTD
1909

TABLE OF CONTENTS

CHAPTER I

BIRTH AND EDUCATION

Tercentenary of Dee's death — No life of him — Persistent misunderstanding — Birth — Parentage — At Chelmsford Grammar School — St. John's College, Cambridge — Fellow of Trinity — Theatrical enterprise — In the Low Countries — M.A. of Cambridge — Louvain University — Paris — Readings in Euclid — Correspondents abroad — Return to England.

CHAPTER II

IMPRISONMENT AND AUTHORSHIP

Books dedicated to Edward VI. — Upton Rectory — Long Leadenham — Books dedicated to Duchess of Northumberland — Ferrys informs against his "magic" — In prison — Handed over to Bonner — At Philpot's trial — Efforts to found a State Library — Astrology — Horoscopes — Choice of a day for Queen Elizabeth's coronation — Introduced to her by Dudley — Sympathetic magic — Bachelor of Divinity — In Antwerp — Monas Hieroglyphica — Preface to Billingsley's Euclid — Called a conjurer.

CHAPTER III

MORTLAKE

Proposed benefices — Propædeumata Aphoristica — Alchemical secrets — Settled at Mortlake — Journey to Lorraine — Illness — The Queen's attentions — Mines and hidden treasure — Wigmore Castle — Marriage — Death of first wife — Literary correspondence — John Stow — Diary commenced — The Hexameron Brytannicum — The British Complement — Slander and falsehood — A petty navy — The sea-power of Albion — Fisheries and foreign policy.

CHAPTER IV

JANE DEE

A comet or blazing star — Second marriage — Jane Fromond — Hurried journey abroad — Berlin and Frankfort — Birth of a son — Christening — Edward Dyer — Duc d'Alencon — Michael Lock — His sons — The Queen's visit — Sir Humphrey Gilbert at Mortlake — Adrian Gilbert — John Davis — The Queen's Title Royall — Lord Treasurer Burleigh — Death of Dee's mother — The Queen's visit of condolence — Map of America — Visits to the Muscovy House — Frobisher and Hawkins — Birth of a daughter — Accident to Arthur.

CHAPTER V

THE SEARCH FOR A MEDIUM

Assistants — Roger cook — Magic and alchemy — Psychic powers — Crystal gazing — Dreams and mysteries — Vincent Murphy and a lawsuit — Jean Bodin visits England — Quarrel between Leicester and Sussex — Mary Herbert — Sir George Peckham — The stage at Paris Garden — Mr. Secretary Walsingham — The Queen at Greenwich — Barnabas Saul as medium — Edward Talbot — Sight in the stone — The table of practice — The waxen seals.

CHAPTER VI

EDWARD KELLEY

Edward Kelley — An alias — His previous history — His mysterious powder — Marriage to Joan Cooper — Jane Dee's dislike of Kelley — The diary of the actions — How Ashmole obtained the MSS. — Book of Mysteries — The four angels — Dee's thirst for hidden knowledge — A crystal is brought — Medicina.

CHAPTER VII

THE CRYSTAL GAZERS

Kelley, the skryer — A third person — Adrian Gilbert — Kelley and an "illuder" — Dee employed to reform the Calendar — The Queen and Raleigh — Hidden treasure — Burleigh's library — Dee's precious books — Kelley rebellious — Threatens to depart — Pacified by Adrian Gilbert — His wife's letters — He goes to London — Becomes clairvoyant — Sees Mary Queen of Scots executed.

CHAPTER VIII

MADIMI

Straits for lack of money — Count Albert Laski — Aspirations toward the Polish Crown — King Stephan Bathory — Dee introduced to him by Leicester — Laski at Oxford — At Mortlake — Madimi — Galvah or Finis — Laski's guardian angel — Madimi a linguist — Kelley threatens to leave — His salary of 50 pounds — Thomas Kelley — Dee's suspicions — Kelley's tempers — His love of money.

CHAPTER IX

A FOREIGN JOURNEY

Gifts from the Queen — Departure from Mortlake — Laski and the whole party sail from Gravesend — Queenborough — The Brill — Haarlem —

Amsterdam — Harlingen — Dokkum — Instructions from Gabriel — Embden — Oldenberg — Bremen — Il's levity — Visions of England — Hamburg — Lubeck.

CHAPTER X

PROMISES AND VISIONS

Promises of wealth — Dee's doubts — His books and library destroyed by the mob — Rostock — Stettin — Posen Cathedral — Severe winter weather — The table set up — Nalvage — Sir Harry Sidney — Madimi — The Queen's affection — At Lask — Cracow.

CHAPTER XI

CRACOW

Cracow — The new Style — Dee's work on the Reformation of the Calendar — Kelley's discontent — Geographical lessons — Laski and King Stephan — Kesmark — Gabriel's pleading — Kelley repentant — A vision of four castles — Ave — Dee's patience.

CHAPTER XII

FROM CRACOW TO PRAGUE

Rowland's illness — Dee sets out for Prague — Thomas Kelley — Dr. Hageck's house — Rudolph II. — Simon's study — Interview with the Emperor — Kelley's outbursts — Dr. Jacob Curtius — Dee's natural history — The Spanish Ambassador — Jane Dee ill — A passport granted — Back to Prague — Kelley's doubts.

CHAPTER XIII

A DREAM OF GOLD

To Limburg — Michael baptised in Prague Cathedral — Easter — Poverty and distress — Kelley again restive — "Parabola de Nobis Duobus" — Return to Cracow — Mr. Tebaldo — Interviews with King Stephan — His death — Dr. Annibaldus — Back at Prague — Francisco Pucci — The Book of Enoch — Claves Angelicae — Banished by Papal edict — William Count Rosenberg — Dee at Leipsic — Letter to Walsingham — A new Nuncio — Invitation to Trebona.

CHAPTER XIV

THE CASTLE OF TREBONA

Trebona Castle — Rosenberg Viceroy of Bohemia — Invitation to Russia — Projection with Kelley's powder — A gift to Jane Dee — Letter from Kelley — Jane to her husband — Joan Kelley — Dee's friends desert him for Kelley — Arthur to be the skryer — Kelley's pretended vision — A hard and impure doctrine — Dee's scruples overridden — A solemn pact — Kelley disowns blame — End of his clairvoyance — The spirits' diary closed.

CHAPTER XV

THE END OF THE PARTNERSHIP

Letters to Walsingham — A tutor for the children — Coldness and jealousy — Furnaces constructed — Rumours and reports — Book of Dunstan — Kelley's haughtiness — Accident to Michael — The great secret — Kelley steals the best workman — Break-up of the Trebona family — Dee's letter to the Queen on the Armada — Gifts to Kelley — His departure — Coaches and horses provided — Dee quits Bohemia — Arrival in Bremen.

CHAPTER XVI

THE END OF KELLEY

Kelley in favour with Rudolph — Given a title — Corresponds with Dee — Fabulous stories of gold — Burleigh begs his return to England — A token to be sent — A prescription for his gout — Letter to Kelley — Kelley's fall from favour — Flight from arrest — Capture at Sobislaus — Imprisonment — Writings on alchemy — Letters to Dee — Attempted escape — Death.

CHAPTER XVII

RETURN TO ENGLAND

Dee's life in Bremen — Letter of safe conduct from the Queen — Writes to Walsingham — Timon Coccius — Heinrich Khunrath — Departure for England — Dr. Pezel — Events in England since Dee left — Arrival at Court — Offers of friends — Madinia born — School for the children — Death of Walsingham — Richard Cavendish — Ann Frank — The Queen at Richmond — Christmas gifts.

CHAPTER XVIII

A ROYAL COMMISSION

Loss of income — Hopes of a benefice — The Court at Nonsuch — Mary Herbert — Arthur sent to Westminster School — His disposition — Birth of Frances — Dr. William Aubrey — Deferred hopes — The commissioners' visit — Compendious Rehearsall — Dee's half-hundred years — The blinded lady Fortune.

CHAPTER XIX

DEE'S LIBRARY

The library at Mortlake — Books and instruments — Richard Chancellor's quadrant — A radius Astronomicus — Mercator's globes — A watch-clock by Dibbley — Boxes of MSS. — Seals and coats of arms — Records for the Tower — Autograph works — Recorde's Ground of Artes — Catalogue of the books — Classic authors — English authors.

CHAPTER XX

ADIEU TO COURTS AND COURTING

The Queen's gift — Anne Countess of Warwick — Christmas at Tooting — Francis Nicholls — Visitors to Mortlake — the Lord Keeper — Elizabeth Kyrton — Messengers from Laski — Mr. Webbe — Bartholomew Hickman — The Queen at Greenwich — Advantages of St. Cross — Archbishop Whitgift — The whole family to see the Queen — "Adieu to Courts and Courting" — Michael's death — Chancellor of St. Paul's — Jane's supplication — A post at last — Manchester College — Birth of Margaret — Lord Derby — A move northward.

CHAPTER XXI

MANCHESTER

Collegiate Church of Manchester — The Byrons of Clayton — Cotton's servant — Titles of the college lands — Mr. Harry Savile — Survey of the town — Christopher Saxton — A surprise visit — Governess for the girls — Witchcraft in Lancashire — Dee's library in request — Disputes among the Fellows — Perambulation of the bounds — Richard Hooker — Marking boundaries — Earl and Countess of Derby — College affairs — The Queen's sea sovereignty — Letter to Sir Edward Dyer — Humphrey Davenport — Sir Julius Caesar — Welcome gifts — Journey to London.

CHAPTER XXII

COLLEGE AFFAIRS

Absence from Manchester — A special commission — Return to the north — Grammar School inspection — Dreams and sleepless nights — Trouble with the Fellows — Unsatisfactory curates — Borrowing money on plate — Crystal gazing again — Untrue visions — Return of Roger Cook — College property in Cheshire — Arthur the chapter clerk — End of the Diary.

CHAPTER XXIII

LAST DAYS

Death of Theodore — Arthur's marriage — His horoscope — Death of the Queen — James I. and his *Demonologie* — Act against witchcraft — Dee petitions Parliament and the King at Greenwich — Passionate protest — Offers to be burned — Pleads for an Act against slander — Neglected and alone — Death of Jane — The children ill — Dee in London — Katherine his mainstay — Cruel delusions — A journey to go — Failing memory — John Pontoys — The vision fades — Death — A grave at Mortlake — Garrulous reminiscences.

APPENDICES I AND II

I. DEE'S DESCENDANTS

II. BIBLIOGRAPHY

LIST OF ILLUSTRATIONS

1. PORTRAIT OF JOHN DEE.

From the original (artist unknown) in the Ashmolean Museum, Oxford. It is inscribed on the face "Johannes Dee Anglus Londinensis Aet suae 67." The portrait was acquired by Ashmole from Dr. John Dee's grandson Rowland, and was left by him to Oxford University with his collections. It has been engraved by Scheneker and W.P. Sherlock.

2. TITLE-PAGE OF DEE'S "GENERAL AND RARE MEMORIALS PERTAINING TO THE PERFECT ART OF NAVIGATION," PRINTED BY JOHN DAY, 1577.

The motto "Plura latent quam patent" surrounds the title; above, the Queen's arms, a rose branch through a loop at each end. Allegorical drawing in a square; the date 1576 in Greek in the corners. The Queen seated at the helm of a "capital," i.e., first-class, ship; arms of England on the rudder; three noblemen standing in the waist. On the vessel's side Jupiter and Europa. Signs of famine on shore: a wheat ear upside down and a skull. A Dutch ship is anchored in the river; fore more lie at its mouth; soldiers, a small boat, a man offering a purse, and in the corner a walled town. On the rock at the river's mouth stands Lady Opportunity; the angel Raphael overhead with flaming sword, and shield bearing St. George's Cross. The sun, moon, and ten stars; rays of glory proceeding from the name of Jehovah. (See Ames, *Typographical Antiquities*, ed. Herbert, vol. i., p. 661)

3. PICTURE OF AN ALCHEMIST WITH HIS ASSISTANT TENDING STILLS.

From an engraving by Robert Vaughan in Ashmole's *Theatrum Chemicum Britonum* (1652), where it illustrates the first English translation of Thomas Norton's *Ordinall of Alchemy*, a metrical treatise in Latin, which Dee transcribed in the year 1577. His copy, bound in purple velvet, and with the index made by himself, is now Ashmolean MS. 57

"IF I HAD KNOWNE THIS AND HAD DONE SOE
I HAD AVOYDED MICKLE WOE."

THOMAS NORTON *The Ordinall of Alchimy.*

4. DIAGRAM OF THE VISION OF FOUR CASTLES.

Seen and drawn by Kelley at Cracow. From Casaubon's True Relation

5. FACSIMILE PHOTOGRAPH OF DEE'S LETTER TO QUEEN ELIZABETH ON
THE DEFEAT OF THE SPANISH ARMADA.
From the original in Harleian MS. 6986, fo. 45

A PAGE FROM THE THESAURUS AMICORUM OF TIMON COCCIUS.

6. A PAGE FROM THE ALBUM OF TIMON COCCIUS, BREMEN, 1589.
Dee's contribution to his Thesaurus Amicorum. From the original in Add. MSS.
19,065

Most Gracious Sovereigne Lady, The God of Heaven and earth,
Who hath mightilie, and evidently, given unto your most excellent
Royall Maies tie, this wonderfull Triumphant Victorie, against
your mortall enemies) be alwaies, thanked, prayesd, and glorified:
And the same God Almighty: evermore direct and defend your
most Royall Highnes from all evill and encumbrance: and finish
and confirme in your most excellent Maies tie Royall, the blessings
long since, both decreed and offered: yet, euen unto your most
gratious Royall bosom, and Lap. Happy are they, that can
perceyue, and so obey the pleasant call, of the mightie Ladies,
OPPORTUNITIE. And, Therefore, finding our duetie conuient
with a most secret becke, of the said Gracious Princess Ladies
OPPORTUNITIE, NOW to embrace, and chioye your
most excellent Royall Maies ties high favor, and gracious great
Clemencie, of CALLING me, M^r Kelsey, and our families,
hoame, into your Brytish Earthly Paradise, and Monarchie
incomparable: (and, that, about an yere since: by Master
Customer Yong, his letters,) I, and myne, (by Gods his fauor
and help, and after the most conuenient manner, we can,)
Will, from henceforth, endeavour our selues, faithfully, loyally,
carefully, warily, and diligently, to ryd and vntangle our
selues from hence: And, so, very deuotely, and Souldie,
at your Sacred Maies ties feet, to offer our selues, and all,
wherein, we are, or may be able, to serue God, and your most
Excellent Royall Maies tie. The Lord of Hosts, be our
help, and Gyde, there: and graunt vnto your most excellent
Royall Maies tie, the incomparable Triumphant Raigne, and Monarchie,
that euer was, since Mans creation. Amen.

Trebon. in the Kingdome of Boemia
the 10th of Nouembre: A.D. 1588: 1588

Your Sacred and most excellent
Royall Maies ties
most humble and dutifull
Subject, and Seruant:
John D.

DEE TO QUEEN ELIZABETH ON THE DEFEAT OF THE SPANISH ARMADA.
(See p. 198.)

7. ILLUSTRATION TO NORTON'S ORDINALL.

Engraved by Vaughan in Ashmole's Theatrum. (See above, No. 3)

“WHICH FIER MUST EVER BE COEQUALL.
IN EVERY MINUTE, AND YET PERPETUALL:
FOR IT MAY NEVER ABATE NE INCREASE,
AND YET THE FIER MAIE NEVER CEASE.”

THOMAS NORTON *The Ordinall of Alchimy.*

8. DEE'S COAT OF ARMS.

ARMS OF DEE AS SHOWN IN A CUT AT THE END OF HIS
"LETTER APOLOGETICALL" (1599).

CHAPTER I

BIRTH AND EDUCATION

“O Incredulities, the wit of fooles
That slovenly will spit on all thinges faire,
The coward’s castle and the sluggard’s cradle,
How easy ‘tis to be an infidel!”

— George Chapman

It seems remarkable that three hundred years should have been allowed to elapse since the death of John Dee in December, 1608, without producing any Life of an individual so conspicuous, so debatable, and so remarkably picturesque.

There is perhaps no learned author in history who has been so persistently misjudged, nay, even slandered, by his posterity, and not a voice in all the three centuries uplifted even to claim for him a fair hearing. Surely it is time that the cause of all this universal condemnation should be examined in the light of reason and science; and perhaps it will be found to exist mainly in the fact that he was too far advanced in speculative thought for his own age to understand. For more than fifty years out of the eighty-one of his life, Dee was famous, even if suspected and looked askance at as clever beyond human interpretation. Then his Queen died. With the narrow-minded Scotsman who succeeded her came a change in the fashion of men’s minds. The reign of the devil and his handmaidens — the witches and possessed persons — was set up in order to be piously overthrown, and the very bigotry of the times gave birth to independent and rational thought — to Newton, Bacon, Locke.

But Dee was already labelled once and for all. Every succeeding writer who has touched upon his career, has followed the leaders blindly, and has only cast another, and yet another, stone to the heap of obloquy piled upon his name. The fascination of his psychic projections has always led the critic to ignore his more solid achievements in the realms of history and science, while at the same time, these are the only cited to be loudly condemned. The learned Dr. Meric Casaubon, who, fifty years after Dee’s death, edited his Book of Mysteries — the absorbing recital of four out of the six or seven years of his crystal gazing — was perhaps the fairest critic he yet has had. Although he calls Dee’s spiritual revelations a “sad record,” and a “work of darkness,” he confesses that he himself, and other learned and holy men (including an archbishop), read it with avidity to the end, and were eager to see it printed. He felt certain, as he remarks in his preface, that men’s curiosity would lead them to devour what seems to him “not paralleled in that kind, by any book that hath been set out in any age to read.” And yet on no account was he publishing it to satisfy curiosity, but only “to do good and promote Religion.” For Dee, he is persuaded, was a true, sincere Christian, his Relation made in the most absolute good faith, although undoubtedly he was imposed upon and deluded by the evil spirits whom he sometimes mistook for good ones.

It may be well here to remark that this voluminous Book of Mysteries or True and Faithful Relation (fol. 1659), from which in the following pages there will be found many extracts, abounds in tedious and unintelligible pages of what Casaubon calls “sermon-like stuff,” interspersed with passages of extraordinary beauty. Some of the figures and parables, as well as the language used, are full of a

rare poetic imagery, singularly free from any coarse or sensual symbolism. Like jewels embedded in dull settings, here and there a gem of loftiest religious thought shines and sparkles. There are descriptive touches of costume and appearance that possess considerable dramatic value. As the story is unfolded in a kind of spiritual drama, the sense of a gradual moving development, and the choice of a fitting vehicle in which to clothe it, is striking. The *dramatis personae*, too, the “spiritual creatures” who, as Dee believed, influence the destinies of man, become living and real, as of course they were to the seer. In many respects these “actions” were an exact counterpart of the dealings inaugurated by psychical scientists 275 years later, if we omit the close investigation for fraud.

Casaubon’s successor in dealing with the shunned and avoided subject of John Dee was Thomas Smith, Fellow of Magdalen College, Oxford, who, in 1707, wrote the first connected Life of him, in a book of the *Lives of Learned Men*. It was based upon some of Dee’s autobiographical papers, and out of a total of a hundred pages, gave fifty to letters already printed by Casaubon.

After this no sustained account of Dee’s romantic career is to be found outside the pages of biographical dictionaries and magazine articles, or among writers upon necromancy, hermetic philosophy, and alchemy. Many of these decorate their collections with apocryphal marvels culled from the well-worn traditional stories of Dee and his companion, Edward Kelley. Thus, throughout his lifetime and since, he has continued to run the gauntlet of criticism. “Old imposturing juggler,” “fanatic,” “quack,” are mild terms: in the *Biographia Britannica* he is called “extremely credulous, extravagantly vain, and a most deluded enthusiast.” Even the writer on Dee in the *Dictionary of National Biography* says his conferences with the angels are “such a tissue of blasphemy and absurdity that they might suggest insanity.” Many more such summary verdicts might be quoted, but these will suffice for the present.

It has been said that no Life of Dee exists. And yet the materials for such a Life are so abundant that only a selection can be here used. His private diary, for instance, if properly edited, would supply much supplementary, useful, and interesting historical information.

It is the object of this work to present the facts of John Dee’s life as calmly and impartially as possible, and to let them speak for themselves. In the course of writing it, many false assertions have disentangled themselves from truth, many doubts have been resolved, and a mass of information sees the light for the first time. The subject is of course hedged about with innumerable difficulties; but in spite of the temptations to stray into a hundred bypaths, an endeavour has been strictly made to do no more than throw a little dim light on the point where the paths break off from the main road. If, at the end of the way, any who have persevered so far, feel they have followed a magnetic and interesting personality, the labour expended will not have been in vain. With a word of apology to serious historical readers for the incorrigibly romantic tendency of much of the narrative, which, in spite of the stern sentinel of a literary conscience, would continually reassert itself, the story of our astrologer’s strange life may now begin.

John Dee was the son of Rowland Dee; he was born in London, according to the horoscope of his own drawing, on July 13, 1527.

His mother was Jane, daughter of William Wild. Various Welsh writers have assigned to Dee a genealogical descent of the highest antiquity, and the pedigree which he drew up for himself in later life traces back his family history from his grandfather, Bedo Dee, to Roderick the Great, Prince of Wales. All authorities agree that Radnor was the county from whence the Dees sprang.

Rowland Dee, the father, held an appointment at Court, as gentleman server to Henry VIII., but was very indifferently treated by the King. This may partly account for the persistence with which Dee exhibited before Queen Elizabeth his claims to preferment at her hands. To be in habitual attendance at Court in those days, however, bred in men a great desire for place, and a courtier was but a mendicant on a grand scale.

The boy, John Dee, was early bred in "grammar learning," and was inured to Latin from his tender years. Perhaps he was not more than nine or ten when he was sent to Chelmsford, to the chantry school founded there seven years before the great school at Winchester came into existence. The master who presided over Dee's school hours in Essex was Peter Wilegh, whom the chantry commissioners in 1548 reported as a man "of good conversation" who had kept the school there for sixteen years. Dee has always been claimed by the Grammar School at Chelmsford as one of their most famous alumni, whose extraordinary career with its halo of mystery and marvel they perhaps feel little qualified to explore. Dee's testimony that at Chelmsford he was "metely well furnished with understanding of the Latin tongue" is an unconscious tribute to Peter Wilegh's teaching.

In November, 1542, Dee, being then fifteen years and four months old, left Chelmsford to enter at St. John's College, Cambridge, where, as he tells us in his autobiography, he soon became a most assiduous student. "In the years 1543, 1544, 1545, I was so vehemently bent to studie, that for those years I did inviolably keep this order: only to sleep four houres every night; to allow to meate and drink (and some refreshing after) two houres every day; and of the other eighteen houres all (except the tyme of going to and being at divine service) was spent in my studies and learning." Early in 1546 he graduated B.A. from St. John's College. At the close of the same year, Trinity College was founded by Henry VIII., and Dee was selected one of the original Fellows. He was also appointed under-reader in Greek to Trinity College, the principal Greek reader being then Robert Pember. The young Fellow created the first sensation of his sensational career soon after this by arranging some of the (*Eirene* — Peace) of Aristophanes, in which he apparently acted as stage manager and carpenter.

For this play he devised a clever mechanical and very spectacular effect. Trygaeus, the Attic vine-dresser, carrying a large basket of food for himself, and mounted on his gigantic beetle or scarab (which ate only dung), was seen ascending from his dwelling on the stage to enter the palace of Zeus in the clouds above. One has only to think of the scenic effects presented by Faust and Mephistopheles at Mr. Tree's theatre, for instance, to realise how crude and ineffective these attempts must have been; but thirty or forty years before Shakespeare's plays were written, so unusual an exhibition was enough to excite wild rumours of supernatural powers. We hear no more of theatrical performances, although several references in his after-life serve to show that his interest in the English drama, about to be born, lagged not far behind that of his greater contemporaries. He does mention, however, a Christmas pastime in St. John's College, which seems to have been

inspired by this same dramatic spirit. Of details we are totally ignorant; he only relates that the custom of electing a "Christmas Magistrate" was varied at his suggestion by crowning the chosen victim as Emperor. The first imperial president of the Christmas revels in St. John's College "was one Mr. Thomas Dunne, a very goodly man of person, stature and complexion, and well learned also," evidently a presence fit for a throne. Dee adds: "They which yet live and were hearers and beholders, they can testifie more than is meete here to be written of these my boyish attempts and exploites scholasticall."

He turned to sterner studies, and became a skilful astronomer, taking "thousands of observations (very many to the hour and minute) of the heavenly influences and operations actual in this elementall portion of the world." These he afterwards published in various "Ephemerides."

In May, 1547, Dee made his first journey abroad, to confer with learned men of the Dutch Universities upon the science of mathematics, to which he had already begun to devote his serious attention. He spent several months in the Low Countries, formed close friendships with Gerard Mercator, Gemma Frisius, Joannes Caspar Myricaëus, the Orientalist Antonius Gogava, and other philosophers of world-wide fame. Upon his return to Cambridge, he brought with him two great globes of Mercator's making, and an astronomer's armillary ring and staff of brass, "such as Frisius had newly devised and was in the habit of using." These he afterwards gave to the Fellows and students of Trinity College; he cites a letter of acknowledgment from John Christopherson (afterwards Bishop of Chichester), but upon search being made for the objects recently, through the kindness of the Master, it appears they are not now to be found. Dee returned to Cambridge in the year 1548 to take his degree of M.A., and soon after went abroad. "And never after that was I any more student in Cambridge." Before he left, he obtained under the seal of the Vice-Chancellor and Convocation, April 14, 1548, a testimonial to his learning and good conduct, which he proposed to take with him abroad. Many times did he prove it to be of some value.

In Midsummer Term, 1548, he entered as a student at the University of Louvain, which had been founded more than a hundred years before in this quaint old Brabantian town of mediaeval ramparts and textile industries. At Louvain, Dee continued his studies for two years, and here he soon acquired a reputation for learning quite beyond his years. It has been presumed that he here graduated doctor, to account for the title that has always been given him. "Doctor Dee" certainly possesses an alliterative value not to be neglected. At Cambridge he was only M.A.

Long after, when he had passed middle life, and when his remarkable genius in every branch of science had carried him so far beyond the dull wit of the people who surrounded him that they could only explain his manifestations by the old cry of "sorcery and magic," Dee made a passionate appeal to the Queen, his constant patron and employer, to send two emissaries of her own choosing to his house at Mortlake, and bid them examine everything they could find, that his character might be cleared from the damaging charges laid against him. He prepared for these two commissioners, to whose visit we shall revert in its proper place, an autobiographical document of the greatest value, which he calls "The Compendious Rehearsal of John Dee: his dutiful declaration and prooffe of the course and race of his studious life, for the space of half an hundred years, now (by God's favour and help) fully spent." It is from this narrative that the facts of his early life are

ascertainable. Perhaps we discern them through a faint mist of retrospective glorification for which the strange streak of vanity almost inseparable from attainments like Dee's was accountable. But there is every reason to reply upon the accuracy of the mathematician's story.

"Beyond the seas, far and nere, was a good opinion conceived of my studies philosophicall and mathematicall." People of all ranks began to flock to see this wonderful young man. He gives the names of those who came to Louvain, a few hours' journey from Brussels, where the brilliant court of Charles V. was assembled, with evident pride. Italian and Spanish nobles; the dukes of Mantua and Medina Celi; the Danish king's mathematician, Mathias Hacus; and his physician, Joannes Capito; Bohemian students, all arrived to put his reputation to the test. A distinguished Englishman, Sir William Pickering, afterwards ambassador to France, came as his pupil to study astronomy "by the light of Mercator's globes, the astrolabe, and the astronomer's ring of brass that Frisius had invented." For his recreation, the teacher "looked into the method of civil law," and mastered easily the points of jurisprudence, even "those accounted very intricate and dark." It was at Louvain, no doubt, that his interest in the subject of alchemy became strengthened and fixed. Stories were rife of course of the famous alchemist, Henricus Cornelius Agrippa, who had died there, in the service of Margaret of Austria, only a dozen years or so before. Agrippa had been secretary to the Emperor Maximilian, had lived in France, London, and Italy, and Louvain, no doubt, was bursting with his extraordinary feats of magic.

The two years soon came to an end, and a couple of days after his twenty-third birthday, young Dee left the Low Countries for Paris, where he arrived on July 20, 1550. His fame had preceded him, and within a few days, at the request of some English gentlemen and for the honour of his country, he began a course of free public lectures or readings in Euclid, "Mathematice, Physice et Pythagorice," at the College of Rheims, in Paris, a thing, he says, which had never been done before in any university in Christendom. His audience (most of them older than himself) was so large that the mathematical schools would not hold them, and many of the students were forced in their eagerness to climb up outside the windows, where, if they could not hear the lecturer, they could at least see him. He demonstrated upon every proposition, and gave dictation and exposition. A greater astonishment was created, he says, than even at his scarabaeus mounting up to the top of Trinity Hall in Cambridge. The members of the University in Paris at the time numbered over 4,000 students, who came from every part of the known world. He made many friends among the professors and graduates, friends of "all estates and professions," several of whose names he gives; among them, the learned writers and theologians of the day, Orontius, Mizaldus, Petrus Montaneus, Ranconetus (Ranconnet), Fernellius, and Francis Silvius.

The fruit of these years spent in Louvain and Paris was that Dee afterwards maintained throughout his life a lively correspondence with professors and doctors in almost every university of note upon the Continent. He names especially his correspondents in the universities of Orleans, Cologne, Heidelberg, Strasburg, Verona, Padua, Ferrara, Bologna, Urbino, Rome, and many others, whose letters lay open for the inspection of the commissioners on that later visit already alluded to.

An offer was made him to become a King's Reader in mathematics in Paris University, with a stipend of two hundred French crowns yearly, but he had made

up his mind to return to England, and nothing would tempt him to stay. He received other proposals, promising enough, to enter the service of M. Babeu, M. de Rohan, and M. de Monluc, who was starting as special ambassador to the Great Turk, but his thoughts turned back to England, and thither, in 1551, he bent his steps.

CHAPTER II

IMPRISONMENT AND AUTHORSHIP

“A man is but what he knoweth.” — Bacon

In December, 1551, Dee obtained, through the offices of Mr. (afterwards Sir) John Cheke, an introduction to Secretary Cecil and to King Edward VI. He had already written for and dedicated to the King two books (in manuscript): *De usu Globi Coelestis*, 1550, and *De nubium, solis, lunae, ac reliquorum planetarum*, etc., 1551. These perhaps had been sent to Cheke, the King's tutor, in the hope that they might prove useful lesson books. The pleasing result of the dedication was the gift of an annual royal pension of a hundred crowns. This allowance was afterwards exchanged for the rectory of Upton-upon-Severn, in Worcestershire, which Dee found an extremely bad bargain.

From the Beacon Hill above West Malvern Priory, the visitor may turn from inspection of the ancient British camp of Caractacus to admire the magnificent view; and across the level fields where the Severn winds, the tower of Upton church will be seen rising in the middle distance. Further west, if the day be clear, the more imposing towers of Tewkesbury and Cloucester may be discerned, while half a turn eastward will show Worcester Cathedral, not far away. Dee never lived in this beautiful place, although he was presented to the living on May 19, 1553. Even when the rectory of Long Leadenham, in Lincolnshire, was added to Upton, the two together were worth only about eighty pounds a year. Next year he declined an invitation to become Lecturer on Mathematical Science at Oxford, conveyed to him through “Mr. Doctor Smith” (Richard, D.C.L., 1528, the reformer), of Oriel College, and “Mr. du Bruarne,” of Christ Church. He was occupied with literary work, and in 1553 produced, among other things, a couple of works on *The Cause of Floods and Ebbs*, and *The Philosophical and Political Occasions and Names of the Heavenly Asterismes*, both written at the request of Jane, Duchess of Northumberland.

When Mary Tudor succeeded her young brother as queen in 1553, Dee was invited to calculate her nativity. He began soon after to open up a correspondence with the Princess Elizabeth, who was then living at Woodstock, and he cast her horoscope also. Before long he was arrested on the plea of an informant named George Ferrys, who alleged that one of his children had been struck blind and another killed by Dee's “magic.” Ferrys also declared that Dee was directing his enchantments against the Queen's life. Dee's lodgings in London were searched and sealed up, and he himself was sent to prison. He was examined before the Secretary of State, afterwards upon eighteen articles by the Privy Council, and at last brought into the Star Chamber for trial. There he was cleared of all suspicion of treason, and liberated by an Order in Council. August 29, 1555, but handed over to Bishop Bonner for examination in matters of religion. Bonner was apparently equally satisfied. Dee was certainly enjoined by him, at John Philpot's examination on

November 19, 1555, to put questions as a test of his orthodoxy. He quoted St. Cyprian to Philpot, who replied: "Master Dee, you are too young in divinity to teach me in the matters of my faith, though you be more learned in other things."

Dee deserves well of all writers and students for time everlasting because of his most praiseworthy efforts to found a State National Library of books and manuscripts, with copies of foreign treasures, wherever they might be. On January 15, 1556, he presented to Queen Mary "a Supplication for the recovery and preservation of ancient writers and monuments." Within a few years he had seen the monasteries dissolved and the priceless collections of these houses lamentably dispersed, some burned and others buried. He drew up a very remarkable address to the Queen dwelling on the calamity of thus distributing "the treasure of all antiquity and the everlasting seeds of continual excellency within this your Grace's realm." Many precious jewels, he knows, have already perished, but in time there may be saved and recovered the remnants of a store of theological and scientific writings which are now being scattered up and down the kingdom, some in unlearned men's hands, some walled up or buried in the ground. Dee uses powerful arguments to enforce his plea, choosing such as would make the most direct appeal to both Queen and people. She will build for herself a lasting name and monument; they will be able all in common to enjoy what is now only the privilege of a few scholars, and even these have to depend on the goodwill of private owners. He proposes first that a commission shall be appointed to inquire what valuable manuscripts exist; that those reported on shall be borrowed (on demand), a fair copy made, and if the owner will not relinquish it, the original be returned. Secondly, he points out that the commission should get to work at once, lest some owners, hearing of it, should hide away or convey away their treasures, and so, he pithily adds, "prove by a certain token that they are not sincere lovers of good learning because they will not share them with others." The expenses of the commission and of the copying, etc., he proposed should be borne by the Lord Cardinal and the Synod of the province of Canterbury, who should also be charged to oversee the manuscripts and books collected until a library "apt in all points" is made ready for their reception.

Finally, Dee suggests that to him be committed the procuring of copies of many famous manuscript volumes to be found in the great libraries abroad: the Vatican Library at Rome, St. Mark's at Venice, and in Bologna, Florence, Vienna, etc. He offers to set to work to obtain these, the expenses only of transcription and carriage to England to be charged to the State. As to printed books, they are to "be gotten in wonderfull abundance." In this generous offer of his life to be spent in transcribing crabbed manuscripts, we cannot see the restless genius of John Dee long satisfied, but at any rate he proved himself not seeking for private gain.

Thus was the germ of a great National Library first started by the Cambridge mathematician, nearly fifty years before Thomas Bodley opened his unique collection at Oxford, and close upon 200 years before there was founded in the capital the vast and indispensable book-mine known to all scholars at home and abroad as the British Museum. The Historical Manuscripts Commission, whose labours in cataloguing private collections of archives are also foreshadowed in Dee's supplication, only came into being with the appointment of Keepers of the Public Records, by an Act signalling the first and second years of Queen Victoria's reign.

It is needless to say that nothing came of Dee's very disinterested proposition. So he became the more industrious in collecting a library of his own, which soon

consisted of more than 4,000 volumes, which were always at the disposal of the friends who came often to see him.

They came also for another reason.

Astrology was a very essential part of astronomy in the sixteenth century, and the belief in the controlling power of the stars over human destinies is almost as old as man himself. The relative positions of the planets in the firmament, their situations amongst the constellations, at the hour of a man's birth, were considered by the ancients to be dominant factors and influences throughout his whole life. It is not too much to say that a belief in the truth of horoscopes cast by a skilled calculator still survives in our Western civilisation as well as in the East. Medical science today pays its due respect to astrology in the sign, little altered from the astrological figure for Jupiter, with which all prescriptions are still headed.

Dee, as one of the foremost mathematicians and astronomers of the time, and one employed by the Queen, became continually in request to calculate the nativity and cast a horoscope for men and women in all ranks of life. He has left many notes of people's births; his own children's are entered with the greatest precision, for which a biographer has to thank him.

When Elizabeth mounted with firm steps the throne that her unhappy sister had found so precarious and uneasy a heritage, Dee was very quickly sought for at Court. His first commission was entirely sui generis. He was commanded by Robert Dudley to name an auspicious day for the coronation, and his astrological calculations thereupon seem to have impressed the Queen and all her courtiers. Whether or no we believe in the future auguries of such a combination of influences as presided over the selection of the 14th of January, 1559, for the day of crowning Elizabeth in Westminster Abbey, we must acknowledge that Dee's choice of a date was succeeded by benign and happy destinies.

He was then living in London. We do not know where his lodging was, but several of the books belonging to his library have come down to us with his autograph, "Joannes Dee, Londini," and the dates of the years 1555, 1557, and 1558.

Elizabeth sent for him soon after her accession, and invited him to her service at Whitehall with all fair promises. He was introduced by Dudley, then and long afterwards her first favourite; so he was likely to stand well. "Where my brother hath given him a crown," she said to Dudley, or to Dee's other sponsor, the Earl of Pembroke, "I will give him a noble." This was the first of innumerable vague promises made, but it was long indeed before any real and tangible gift was conferred on the astrologer, although he was continually busied about one thing and another at the fancy of the Queen. The reversion of the Mastership of St. Catherine's Hospital was promised him, but "Dr. Willson politickly prevented me."

One morning the whole Court and the Privy Council were put into a terrible flutter by a simple piece of what was common enough in ancient times and in Egypt — sympathetic magic. A wax image of the Queen had been found lying in Lincoln's Inn Fields, with a great pin stuck through its breast, and it was supposed undoubtedly to portend the wasting away and death of her Majesty, or some other dreadful omen. Messenger after messenger was despatched to summon Dee, and bid him make haste. He hurried off, satisfied himself apparently of the harmless nature of the practical joke, and repaired, with Mr. Secretary Wilson as a witness of the whole proceedings and a proof of all good faith, to Richmond, where the Queen was. The Queen sat in that part of her private garden that sloped down to the river,

near the steps of the royal landing-place at Hampton Court; the Earl of Leicester (as Dudley had now become) was in attendance, gorgeous and insolent as ever; the Lords of the Privy Council had also been summoned, when Dee and Mr. Secretary expounded the inner meaning of this untoward circumstance, and satisfied and allayed all their fears. Something about the calm attributes of this seasoned and travelled scholar seemed always to give moral support to the Queen and her household; this is only the first of many occasions when he had to allay their superstitious fright. That she felt it essential to keep him within reach of herself may have been one reason for not giving him the appointments for which he, and others for him, constantly sued. Dee was not an easy person to fit into a living: he required one with no cure of souls attached; for this, he says, “a cura animarum annexa, did terrifie me to deal with them.” He is called a bachelor of divinity by Foxe in 1555, and as a matter of fact he does, both in 1558 and in 1564, add the letters S. D. T. to his name in his printed works. This degree also was not from Cambridge. At last he grew tired of waiting, and a certain restlessness in his character, not incompatible with the long patience of the true follower of science, drove him again abroad. His intention was to arrange for printing works already prepared in manuscript. To search among out-of-the-way bookmongers and book-lovers in high-walled German towns, for rare treasures wherewith to enrich his native country, was another magnet that drew his feet. In February, 1563, after he had been thus employed for more than a year, he wrote from the sign of the Golden Angel, in Antwerp, to Cecil, to ask if he was expected to return to England, or if he might remain to oversee the printing of his books, and continue his researches among Dutch books and scholars. He had intended, he says, to return before Easter, but this was now impossible, owing to printer’s delays. When we remember that a hundred years had barely elapsed since the first metal types had been cast and used in a hand press, it is not wonderful that Dee’s treatise, with its hieroglyphic and cabalistic signs, took long to print. He announces in the letter to Cecil a great bargain he has picked up, a work, “for which many a learned man hath long sought and dayley yet doth seek,” upon cipher writing, viz. *Steganographia*, by the famous Abbot Trithemius of Wurzburg. It is the earliest elaborate treatise upon shorthand and cipher, a subject in which Cecil was particularly interested. It was then in manuscript (first printed, Frankfort, 1606). Dee continues that he knows his correspondent will be well acquainted with the name of the book, for the author mentions it in his Epistles, and in both the editions of his *Polygraphia*. He urges its claims upon the future Lord Treasurer, already a statesman of ripe experience, in the following words: “A boke for your honor or a Prince, so meet, so nedefull and commodious, as in human knowledge none can be meeter or more behovefull. Of this boke, either as I now have yt, or hereafter shall have yt, fully wholl and perfect, (yf it peas you to accept my present) I give unto your Honor as the most precious juell that I have yet of other mens travailles recovered.”

He then goes on to beg the minister and Secretary of State to procure for him that “learned leisure (*dulcia illa ocia*) the fruit whereof my country and all the republic of letters shall justly ascribe to your wisdom and honorable zeal toward the advancement of good letters and wonderful, divine, and secret sciences.” Dee had copied in ten days, “by continual labour,” about half of the book: a Hungarian nobleman there has offered to finish the rest, if Dee will remain in Antwerp and direct his studies for a time.

“Of this booke the one half (with contynual labour and watch, the most part of 10 days) have I copyed oute. and now I stand at the curtesye of a nobleman of Hungary for writing furth the rest; who hath promised me leave thereto, after he shall perceyve that I may remayne by him longer (with the leave of my Prince) to pleasure him also with such pointes of science as at my handes he requireth.

“I assure you the meanes that I used to cumpas the knowledge where this man and other such are, and likewise of such booke as this, as for this present I have advertisement of, have cost me all that ever I could here with honesty borrow, besydes that which (for so short a time intended) I thought needefull to bring with me, to the value of xxlib. God knoweth my zeale to honest and true knowledg; for which my flesh, blud, and bones should make the marchandize, if the case so required.”

Dee did remain in the Low Countries; he completed his *Monas Hieroglyphica*, dated its prefatory dedication to the Emperor Maximilian II., at Antwerp, January 29, 1564, and added an address to the typographer, his “singular good friend, Gulielmo Silvio,” dated the following day. the book appeared in April, and he at once journeyed to Presburg, to present a copy to Maximilian. Its twenty-four theorems deal with the variations of the figure represented on our title-page, which may be roughly explained as the moon, the sun, the elements (the cross), and fire as represented by the waving line below. Dee says that many “universitie graduates of high degree, and other gentlemen, dispraised it because they understood it not,” but “Her Majestie graciously defended my credit in my absence beyond the seas.” On his return in June she sent for him to Court and desired him to read the book with her. Dee’s account of his regal pupil is given with much quaintness. “She vouchsafed to account herself my schollar in my book...and said whereas I had prefixed in the forefront of the book: *Qui non intelligit aut taceat, aut discat*: if I would disclose to her the secrets of that book she would *et discere et facere*. Whereupon her Majestie had a little perusion of the same with me, and then in most heroicall and princely wise did comfort and encourage me in my studies philosophicall and mathematicall.”[His escort had been required for the Marchioness of Northampton, who was returning from Antwerp to Greenwich. In return for this assistance the lady begged the Queen’s favour for her cavalier. elizabeth was always Dee’s very good friend, and she made a grant to him on December 8, 1564, of the Deanery of Gloucester, then void, but other counsels prevailed, and it was soon bestowed on some other man. No doubt the appointment would have given great offence, for the popular eye was already beginning to see in Dee no highly equipped mathematician, geographer and astronomer, but a conjuror and magisian of doubtful reputation, in fact, in the current jargon, one who “had dealings with the devil.” What there had been at this time to excite these suspicions beyond the fact that Dee was always ready to expound a comet or an eclipse, to cast a horoscope, or explain that the Queen would not immediately expire because a wax doll with a stiletto in its heart was found under a tree, it is hard to say. But that these rumours were extremely persistent is seen by the astrologer’s defence of himself in the “very fruitfull” preface which he, as the first mathematician of the day, was asked to write to Henry Billingsley’s first English translation of Euclid’s *Elements*, in February, 1570. This preface must be reckoned as

one of Dee's best achievements, although, as he says, in writing it, "he was so pinched with straightness of time that he could not pen down the matter as he would." He points out that Euclid has already appeared in Italian, German, High Dutch, French, Spanish and Portuguese dress, and now at last comes to England.["

In spite of its ex parte nature, a study of this preface alone must convince any reader that the author was no charlatan or pretender, but a true devotee of learning, gifted with a far insight into human progress. He covers in review every art and science then known, and some "until these our daies greatly missed" (his comments on music and harmony are truly remarkable), and comes back to his own predilection — arithmetic, "which next to theologie is most divine, most pure, most ample and generall, most profound, most subtele, most commodious and most necessary." He quotes Plato to show how "it lifts the heart above the heavens by invisible lines, and by its immortal beams melteth the reflection of light incomprehensible, and so procureth joy and perfection unspeakable." Speaking of the refraction of light, he foreshadows the telescope as he describes how the captain of either foot or horsemen should employ "an astronomical staffe commodiously framed for carriage and use, and may wonderfully help himself by perspective glasses; in which I trust our posterity will prove more skilfull and expert and to greater purpose than in these days can almost be credited to be possible." Then he alludes to a wonderful glass belonging to Sir William P., famous for his skill in mathematics, who will let the glass be seen. The passage seems to show that looking-glasses were not common, or that this particular one was a convex mirror.

"A man," he says, "may be curstly afraid of his own shadow, yea, so much to feare, that you being alone nere a certain glasse, and proffer with dagger or sword to foyne at the glasse, you shall suddenly be moved to give back (in maner) by reason of an image appearing in the ayre betweene you and the glasse, with like hand, sword or dagger, and with like quickness foyning at your very eye, like as you do at the glasse. Strange this is to heare of, but more mervailous to behold than these my wordes can signifie, nevertheless by demonstration optically the order and cause thereof is certified, even so the effect is consequent."

This mirror was given to Dee not long afterwards.

From optics he passes on to mechanics, and mentions having seen at Prague mills worked by water, sawing "great and long deale bordes, no man being by." He describes accurately a diving chamber supplied with air, and sums up some of the mechanical marvels of the world: — the brazen head made by Albertus Magnus, which seemed to speak; a strange "self-moving" which he saw at St. Denis in 1551; images seen in the air by means of a perspective glass; Archimedes' sphere; the dove of Archytas; and the wheel of Vulcan, spoken of by Aristotle; and comes down to recent workmanship in Nuremberg, where an artificer let fly an insect of iron, that buzzed about the guests at table, and then returned "to his master's hand agayne as though it were weary." All these things are easily achieved he says, by "skill, will industry and ability duly applied to proof." "But is any honest student, or a modest Christian philosopher, to be, for such like feats, mathematically and mechanically wrought, counted and called a conjuror? Shall the folly of idiots and the mallice of the scornfull so much prevaile that he who seeketh no worldly gaine or glory at their hands, but onely of God the Threasure of heavenly wisdom and knowledge of

pure veritie, shall he, I say, in the mean space, be robbed and spoiled of his honest name and fame? He that seeketh, by S. Paul's advertisement in the creatures' properties and wonderfull vertues, to find juste cause to glorifie the eternall and Almighty Creator by, shall that man be condemned as a companion of Hell-hounds and a caller and conjuror of wicked damned spirits?" Then he recounts his years of study, and asks, "Should I have fished with so large and costly a nett, and been so long time drawing, even with the helpe of Lady Philosophie and Queen Theologie, and at length have catched but a frog, nay a Devill?...How great is the blindness and boldness of the multitude in things above their capacitie!"[Then he refers to some who have appeared against him in print.

"O my unkind countrymen. O unnatural Countrymen, O unthankfull countrymen, O brainsicke, Rashe, spitefull and disdainfull countrymen. Why oppresse you me thus violently with your slaundering of me, contrary to veritie, and contrary to your own conscience? And I, to this hower, neither by worde, deede or thought, have bene anyway hurtfull, damageable, or injurious to you or yours! Have I so long, so dearly, so farre, so carefully, so painfully, so dangerously fought and travailed for the learning of wisdom and atteyning of vertue, and in the end am I become worse than when I began? Worse than a madman, a dangerous member in teh Commonwelath and no Member of the Church of Christ? Call you this to be learned? Call you this to be a philosopher and a lover of wisdom?"

He goes on to speak of examples before his time to whom in godliness and learning he is not worthy to be compared: — "patient Socrates," Apuleius, Joannes Picus and Trithemius, Roger Bacon, "the flower of whose worthy fame can never dye nor wither," and ends by summing up the people who can conceive nothing outside the compass of their capacity as of four sorts: — "vain prattling busybodies, fond friends, imperfectly zealous, and malicious ignorant." Of these he is inclined to think the fond friends the most damaging, for they overshoot the mark and relate marvels and wonderful feats which were never done, or had any spark of likelihood to be done, in order that other men may marvel at their hap to have such a learned friend.[The eloquent irony of this passage seems equalled only by its extraordinary universality, its knowledge of human character and its high philosophic spirit. At what a cost did a seeker after scientific truths follow his calling in the sixteenth century!

CHAPTER III

MORTLAKE

"In her princely countenance I never perceived frown toward me, or discontented regard or view on me, but at all times favourable and gracious, to the joy and comfort of my true, faithful and loyal heart." — DEE, of Queen Elizabeth.

The promised benefice did not yet come, although Dee's friends at Court were all busy on his behalf. Either now or later, he was actually mentioned as Provost of Eton, and the Queen "answered favourably." Mistress Blanche Parry and Mistress Scudamore, lady-in-waiting to Anne, Countess of Warwick, urged his claims for the

Mastership of St. Cross at Winchester, which it was thought Dr. Watson would soon vacate. But all he seems to have obtained was a fresh dispensation from Matthew Parker, Archbishop of Canterbury, to enjoy the two Midland rectories for ten years.[

He continued his literary work, and beside writing new manuscript treatises, bethought himself of an old one, which although printed had not received great attention. This was the *Propoedeumata Aphoristica* (London, 1558), dedicated to his old and dear friend and fellow-student at Louvain, Mercator, “my Gerard,” as he affectionately calls him. In January, 1568, Dee presented a copy of a new edition, with an address to the studious and sincere philosophical reader, dated December 24, 1567, from “our museum” at Mortlake, to “Mr. Secretary Cecil, now Lord Treasurer.” Two copies were given at the same time to the Earl of Pembroke, one for him to use or give away at his pleasure, the other, by Cecil’s advice, to be presented by him to the Queen. Within three days, Dee heard from Pembroke that she had graciously accepted and well liked his book. This gratifying information was rendered acceptable by a gift: — “He gave me very bountifully in his owne behalfe xxlib. to requite such my reverent regard of his honour.”[An interview with the Queen followed on February 16, at 2 o’clock, when there was talk between them in the gallery at Westminster “of the great secret for my sake to be disclosed unto her Majesty by Nicholas Grudius, sometime one of the secretaries to the Emperor Charles V.” Of this alchemical secret, no doubt concerning transmutation, Dee writes after, “What was the hinderance of the perfecting of that purpose, God best knoweth.”[He was now over forty, and had a natural desire to range himself and house his library. Before 1570 he took up his abode with his mother, in a house belonging to her at Mortlake, on the river Thames. It was an old rambling place, standing west of the church between it and the river. Dee added to it by degrees, purchasing small tenements adjoining, so that at length it comprised laboratories for his experiments, libraries and rooms for a busy hive of workers and servants. Mrs. Dee occupied a set of rooms of her own. Nothing of the old premises now remains, unless it be an ancient gateway leading from the garden towards the river. After Dee’s death the house passed through an interesting phase of existence, being adapted by Sir Francis Crane for the Royal tapestry works, where, encouraged by a handsome grant of money and orders from the parsimonious James, suits of hangings of beautiful workmanship were executed under the eye of Francis Cleyne, a “limner,” who was brought over from Flanders to undertake the designs. At the end of the eighteenth century, a large panelled room with red and white roses, carved and coloured, was still in existence. Early in the nineteenth century the house was used for a girls’ school, kept by a Mrs. Dubois.[Here Dee took up his abode. Its nearness to London and to the favourite places of Elizabeth’s residence — Greenwich, Hampton Court, Sion House, Isleworth, and Nonsuch — was at first considered a great advantage, and the journey to and from London was almost invariably made by water. The Queen desired her astrologer to be near at hand. When he fell dangerously ill at Mortlake in 1571, after a tedious journey abroad into the duchy of Lorraine on some mysterious errand, Elizabeth sent down two of her own physicians, Doctors Atslove and Balthorp, to attend him. Lady Sidney was also despatched with kind, and gracious, and “pithy” messages from the sovereign, and delicacies, “divers raretiess,” were supplied from the royal table to supplement his mother’s provision for the invalid. The Queen seems to have felt a special obligation to look after him, as she had sent him on some mission of her own,

which probably we shall not be far wrong in thinking connected with Dee's alchemistic experiments. Every Court in Europe at this time had astrologers and alchemists in its employ, and the Queen and Burleigh were as anxious as Dee that he should really attain the ever-elusive secret of transmutation. Dee had of course carried the Queen's passport for himself and a couple of servants, with horses, and had obtained permits through foreign ambassadors in London to travel freely through various countries.[Dee was now bent on rather a strange form of public service. On October 3, 1574, he wrote a very remarkable letter to Lord Burleigh of four and a half folio pages in that best printed hand of his which offers no excuse for skipping. His own paramount deserts are very naturally one of the main subjects. He has spent all his money and all his life in attaining knowledge. "Certes, by due conference with all that ever I yet met with in Europe, the poor English Bryttaine (*Il favorita di vostra Excellentia*) hath carried the Bell away. God Almighty have the glory." If he had only a sufficiency of two or three hundred pounds a year, he could pursue science with ease. Failing that, there is another way. Treasure trouve is a very casual thing, and the Queen is little enriched thereby, in spite of her royal prerogative. No one knows this better than the Lord Treasurer. Now, if her Majesty will grant him, but Letters Patent under her hand and seal, the right for life to all treasure he can find, he promises to give Burleigh one half, and of course to render to the Queen and Commonwealth the proportion that is theirs. It is not the gold, as wealth, that appeals to this man of books and stars: —

"The value of a mine is matter for King's Treasure, but a pott of two or three hundred pounds hid in the ground, wall, or tree, is but the price of a good book, or instrument for perspective astronomy, or some feat of importance."

He has spent twenty years in considering the subject; people from all parts have consulted him about dreams, visions, attractions and demonstrations of *sympathia et antipathia rerum*;" but it is not likley he would counsel them to proceed without permission from the State. Yet what a loss is here!

"Obscure persons, as hosiers or tanners, can, under color of seeking assays of metalls for the Saymaster, enioy libertie to dig after dreamish demonstrations of places. May not I then, in respect of my payns, cost, and credit in matters philosophical and mathematicall, if no better or easier turn will fall to my Lot from her Majestie's hands, may I not then be thought to mean and intend good service toward the Queen and this realm, yf I will do the best I can at my own cost and charge to discover and deliver true prooffe of a myne, vayn, or ore of gold or silver, in some place of her Grace's kingdom, for her Grace's only use?"

The Society of Royal Mines had been incorporated May 28, 1565, and the Queen had granted patents to Germans and others to dig for mines and ores. It was well known that the country abounded in hidden treasure. The valuables of the monasteries had been, in many cases, hastily buried before the last abbot was ejected at the dissolution. The subject had a special fascination for Dee, who was conscious of a "divining rod" power to discover the hiding places. He made a curious diagram of ten localities, in various counties, marked by crosses, near which he believed treasure to lie concealed. He ends his letter to Burleigh with a more practical and

much more congenial request. He has been lately at Wigmore Castle, and has seen a quantity of parchments and papers from which he has copied accounts, obligations, acquittances. Will the Treasurer give him a letter to Mr. Harley, keeper of the records there, asking permission to examine them and report as to the contents? "My fantasy is I can get from them, at my leisure, matter for chronicle or pedigree, by way of recreation." So he ends with an apology for his long letter and is "you Lordship's most bownden John Dee."

Nothing seems to have resulted from this letter at the time; later he did receive a grant of royalties from a mine.

in 1575 Dee married. He seems to have had no time for such an event before. He was now in his forty-eighth year, and did not execute the fatal folly (which, in his Court life, he had seen many times exemplified) of committing the indiscretion first and informing the Queen after. He duly laid before her his intention, and received in return a "very gracious letter of credit for my marriage." He also had congratulatory epistles from Leicester and from Christopher Hatton.

The Queen, when out riding in Richmond Park with her lords and ladies, would sometimes pass through the East Sheen Gate, down the hill towards the river, and would stop at the house between Mortlake Church and the Thames, desiring to be shown the latest invention of her astrologer, or the newest acquisition of his library. On the afternoon of one such windy day in march, 1576, she arrived at a slightly unlucky moment, for Dee's young wife, after a year of marriage, had just died, and not four hours earlier had been carried out of the house for burial in the churchyard opposite. Hearing this, Elizabeth refused to enter, but bade Dee fetch his famous glass and explain its properties to her outside in the field. Summoning Leicester to her assistance, she alighted from her horse by the church wall, was shown the wonderful convex mirror, admired the distorted image of herself, and finally rode away amused and merry, leaving the philosopher's distress at his recent bereavement assuaged for the moment by such gracious marks of royal interest and favour. And so this wraith of Dee's first wife fades away in the courtly picture, and we do not even know her name.

He turned more than ever to literary work and followed up the scholastic books dedicated to the young King Edward VI. and the studies of astrological hieroglyphs with books of another kind. To this year of historical labours, perhaps, belongs a letter from Dee to his "loving friend," Stow, the historian. Contrary to Dee's careful practice, it is undated, save for day and month, "this 5th of December." He has evidently been the means of introducing a fellow-author in influential quarters, for he says, "My friend, Mr. Dyer, did deliver your books to the two Earls, who took them thankfully, but, as he noted, there was no reward commanded of them. What shall be hereafter, God knoweth. So could not I have done." Then he adjures Stow to "hope as well as I," and turns from considering fruits to the sources of their toil. He sends a list of the varius ports, including the Cinque Ports, that have a mayor or bailey, all except Gravesend, which has a portreeve. Stow may get fuller information, "the very true plat," from Lord Cobham's secretary. He returns a manuscript of Asser's Saxon Chronicle; "it is not of the best and perfectest copy. I had done iwth it in an hour. If you have Floriacensis Wigornensis [the Chronicle of Florence of Worcester] I would gladly see him a little."

Stow, like Dee, was a Londoner and, within a year or two, of the same age. He had already published his *Annals of England*, which had then gone through four editions.

Dee now began to keep a diary of his doings, written in the pages and margins of three fat quarto almanacs, bound in sheepskin and clasped. Quotations have perhaps already shown that his style, his spelling, his use of words, is that we expect from a man of his wide culture and reading. He was of the new learning, though before Shakespeare and Bacon. He had also two or more distinct handwritings, a roman hand with neat printed letters, and a scribbling hand. In the former all his manuscript works and his letters are written; his diary is in the last. This diary was quite unnoticed until about 1835, when the almanacs were discovered at Oxford in the Ashmolean Library, having been acquired by Elias Ashmole, a devout believer in hermetic philosophy and collector of all alchemical writings. They were transcribed (very inaccurately) by J.O. Halliwell and printed by the Camden Society in 1842.

The books contain a strange medley of borrowings and lendings, births and deaths, illnesses, lawsuits, dreams and bickerings; observations of stars, eclipses and comets, above all of the weather (for Dee was a great meteorologist), of horoscopes, experiments in alchemy and topographical notes. Here are some of the earliest entries: —

“1577. Jan. 16. The Earl of Leicester, Mr. Philip Sidney, and Mr. Dyer, etc., came to my house.” This was Edward Dyer, Sidney’s friend, afterwards to be dramatically associated with Dee and Kelley in their reputed discovery of the secret of making gold. “Feb. 19th. great wynde S.W., close, cloudy. March 11. My fall upon my right knucklebone about 9 o’clock. Wyth oyle of Hypericon in 24 hours eased above all hope. God be thanked for such his goodness to his creatures! March 12. Abrahamus Ortelius me inuist Mortlakii.” This interesting visit from the great Dutch map-maker is entirely omitted in the printed diary. “May 20. I hyred the barber of Chyswick, Walter Hooper, to kepe my hedges and knots in as good order as he seed them then, and that to be done with twice cutting in the year, at the least, and he to have yearly five shillings and meat and drink.”

Then he speaks of a visitor, Alexander Simon, who comes from Persia, and has promised his “service” on his return, probably to assist with information on Eastern lore and wisdom. His friend and neighbour, William Herbert, sends him notes upon his already published *Monas*. Another work is ready for press, and he is constrained to raise money, whether for the printing or other expenses. In June he borrowed 40 pounds from one, 20 pounds from another, and 27 pounds upon “the chayne of gold.” On August 19, his new book is put to printing (one hundred copies) at John Day’s press in Aldersgate.

This was another of those works, so pithy and so alive in their remarkable application to the future, which have fallen with their author into undeserved neglect. Dee had made suggestions about supplying officers of the army with perspective glasses as part of their equipment. Now his friendship with the Gilberts, Davis, Hawkins, Frobisher, and others of the great sea-captains, drew his attention to the sister service and the sea power of “this blessed isle of Albion.” He had spent most of the previous year (1576) in writing a series of volumes to be entitled “General and Rare Memorials pertayning to the perfect art of Navigation.” The first

volume, *The British Monarchy, or Hexameron Brytannicum*, was finished in August. It was dedicated to Christopher Hatton in some verses beginning: —

“If privat wealth be leef and deere
To any wight on British soyl,
Ought public weale have any peere?
To that is due all wealth and toyle.

Whereof such lore as I of late
Have lern’d, and for security,
By godly means to Garde this state,
To you I now send carefully.”

The intention is better than the lines. Dee was no poet, and even a bad versifier, but he would not have been a true Elizabethan had he not on special occasions dropped into rhyme, like the rest of his peers.

The second volume, *The British Complement*, “larger in bulk than the English Bible,” was written in the next four months and finished in December. It was never published; its author tells us it would cost many hundreds of pounds to print, because of the tables and figures requisite, and he must first have a “comfortable and sufficient opportunity or supply thereto.” The necessary funds were never forthcoming, and the book remained in manuscript. A considerable part of it is devoted to an exposition of the “paradoxall” compass which its author had invented in 1557.

The third volume was mysterious; it was to be “utterly suppressed or delivered to Vulcan his custody.” The fourth was *Famous and Rich Discoveries*, a book, he thinks, “for British Honour and Wealth, of as great godly pleasure as worldly profit and delight.” It was a work of great historical research which never saw the light.

The prejudice against Dee was so strong, and he was so much misunderstood, some persons openly attributing his works to other writers, others accusing him of selfishly keeping all his knowledge to himself, many perverting his meaning through ignorance, and again one, a Dutch philosopher, publishing a treatise which was in substance a repetition of his, that he determined to withhold his name from the publication. The anonymity is not, however, very well maintained, for Dee used the flimsy device of a preface to the reader by an “unknown friend,” in which all the griefs and ill usages of that “harmless and courteous gentleman,” “that extraordinary studious gentleman,” the author, are freely aired. Under the thin disguise, Dee’s high opinion of his own merits peeps, nay stares, out. Slanders have been spread against him, a damaging letter counterfeited by Vincent Murphy, his name and fame injured; he has been called “the arch-conjurer of the whole kingdom.” “Oh, a damnable sklander,” he bursts out, “utterly untrue in the whole and in every worde and part thereof, as before the King of Kings will appear at the dreadful day.” It is no conceit on Dee’s part, with his European reputation, to say that he “had at God his most mercifull handes received a great Talent of knowledge and sciences, after long and painful and costly travails.” And he goes on to say that he is both warned by God and of his own disposition to enlarge the same and to communicate it to others, but now he finds himself discouraged; he cannot “sayl

against the winds eye,” or pen any more treatises for his disdainful and unthankful countrymen to use or abuse, or put his name to any writing. The unknown friend has no desire to flatter the studious gentleman, but considering all his contributions to learning, he may honestly say, without arrogancy and with great modesty, that “if in the foresaid whole course of his tyme he had found a constant and assistant Christian Alexander, Brytain should now now have been destitute of a Christian Aristotle”!

But he soon gets engrossed in his subject, which is to urge the importance of establishing “a Petty Navy Royall, of three score tall ships or more, but in no case fewer,” of 80 to 200 tons burden, to be thoroughly equipped and manned “as a cinfirt abd safeguard to the Realme.” He shows the security it would give to or merchants, the usefulness in “deciphering our coasts,” sounding channels and harbours, observing of tides. Thousands of soldiers, he says, “will thus be hardened and well broke to the rage and disturbance of the sea, so that in time of need we shall not be forced to use all fresh-water Soldyers,” but we shall have a crew of “hardy sea-soldyers” ready to hand. This is interesting as showing that the word “sailor” was not yet in use. Then he touches on the question of unemployment: “hundreds of lusty handsome men will this way be well occupied and have needful maintenance, which now are idle or want sustenance, or both.” “These skilful sea-soldyers will be more traynable to martiall exploits, more quick-eyed and nimble [he quotes Pericles for this], than the landsmen.” The Petty Navy Royall, as apart from the Grand Navy Royall, will look after pirates, will protect our valuable fisheries, and generally serve us in better stead than four such forts as “Callys or Bulleyn.” Coming to the financial side, he asserts that every natural born subject of this “British Empire” will willingly contribute towards this “perpetual benevolence for sea security” the hundredth penny of his rents and revenues, the five hundredth penny of his goods valuation, for the first seven years, and for the second seven the hundred and fiftieth penny and the seven hundred and fiftieth penny of goods valuation, the same, after fourteen years, to be commuted for ever to half the original contribution. He calculated this tax would amount to 100,000 pounds or over. If that is not sufficient, he would exact a second tax (exempting all such counties, towns, and the five ports, as have Letters Patent for such immunity) of the six hundredth penny of every one’s goods and revenues. He would have twenty victualling ports, in every part of the kingdom, “the incredible abuses of purveyors duly reformed.” He would have a stop put to carrying our gunpowder and saltpetre out of the realm. “Good God,” he cries, “who knoweth not what proviso is made and kept in other Common Weales against armour carrying out of their Limits?” He speaks of many hundred pieces of ordnance lately carried out of the kingdom, so that we must make new; and deplores the wholesale destruction of our forests and timber (which is needed for ships) to keep the iron works going. Then he foreshadows the Trinity House by asking for a “Grand Pilot generall of England.” He outlines a scheme of navy pensions, and in relation to the fisheries quotes sanitary statutes of Richard II. He devotes a chapter to the history of “that peaceable and provident Saxon, King Edgar,” his “yearly pastime of sailing round this island in summer, guarded by his fleet of 4,000 sail,” and speaks of the efficiency of Edgar’s navy and the maintenance of his forts upon the coast. Then he passes to his final argument. We must attain this “incredible political mystery” — the supermacy of our sea power. We must be “Lords of the Seas” in order that out “wits and travayles” may be employed at home

for the enriching of the kingdom, that “our commodities (with due store reserve) may be carried abroad,” and that peace and justice may reign. “For we must keep our own hands and hearts from doing or intending injury to any foreigner on sea or land.”

Enough has been said of this book, perhaps, to show that it is a remarkable contribution towards the history of the navy and the fishing industries of Britain. It may be contended that if within twelve years England could offer a crushing defeat to the greatest sea power of the world, and establish herself mistress of the seas, she was not in need of theoretical advice from a landsman on the subject, but at any rate Dee’s treatise voices the ideals of the times, the hopes that inspired all true lovers of their country and of their Queen in the sixteenth century. In the thunders of the Armada they were to be realised.

CHAPTER IV

JANE DEE

“Content I live, this is my stay,
I seek no more than may suffice;
I press to bear no haughty sway,
Look, what I lack my mind supplies:
Lo! thus I triumph like a king,
Content with that my mind doth bring.”
— Sir Edward Dyer.

That October the Queen and the whole Court were thrown into a perturbed state of mind by a strange appearance in the heavens. This was the comet which the Swedish astronomer, Kepler, declared to predict the appearance in the north of Europe of a prince who should lay waste all Germany, and should vanish in 1632. It was lucky for his prognostications that Gustavus Adolphus was really born in Finland, did embroil Central Europe in the Thirty Years’ War, and did die in 1632.

What the “blazing star,” as they called it, foreboded, no one at Court could tell; Dee was summoned forthwith to expound the phenomenon. “Her Majestie took great pleasure to hear my opinion, for the judgment of some had unduly bred great fear and doubt in many of the Court, being men of no small account. For three diverse dayes she did use me.” Dee did not forget to urge his suit to the Queen, not so much this time for preferment but for protection.

“Her Majestie promised unto me great security against any of her kingdom that would by reason of any my rare studies and philosophical exercises unduly seek my overthrow. Whereupon I again to her Majestie made a very faithful and inviolable promise of great importance. The first part whereof, God is my witness I have truely and sincerely performed; tho’ it be not yet evident, how truely, or of what incredible value. The second part, by God his great mercies and helps, may in due time be performed, if my plat for the meanes be not misused or defaced.”

Nearly two years passed before Dee married his second wife, Jane Fromond, of East Cheam, Surrey. She was a lady-in-waiting

at the Court to Lady Howard of Effingham, wife of the Lord Admiral (Charles Howard) who was afterwards in command of the fleet victorious against the “invincible” Spanish Armada. Lady Howard proved a true friend both to Jane and her elderly but learned husband throughout the rest of her life.

He paid a long visit to the Court at Windsor a couple of months before the marriage, staying there from November 22 to December 1, 1577, and records interviews with the Queen on various days, and with “Mr. Secretary Walsingham.” It may be presumed that the marriage was then arranged, for without the Queen’s consent it could never have taken place. Just before leaving, he had a conversation with Sir Christopher Hatton, the newly-made knight of that day (December 1).

The marriage took place on February 5, 1578, at one o’clock, as the bridegroom tells in his diary, but at what church he omits to say. Perhaps it took place in a Royal Chapel at Court. The young bride was twenty-two. She was a clever, well-born woman, hasty and quick-tempered, but of a steadfast and thorough faithfulness. It was no easy task to be the wife of a brilliant and erudite mathematician nearly thirty years her senior, but to the end of her days Jane proved herself a true and fitting helpmate, a most careful and devoted mother to her eight children. Little could she have foreseen at this bridal hour into what strange paths the coming years would lead her. Dee’s devotion to his Jane, his growing respect for her force of character, is faithfully reflected in his diary, where every detail of her doings and her health is studiously entered.

Before the end of the year, he had to leave home and undertake a sudden journey abroad at the command of the Queen’s ministers. Elizabeth, in spite of an iron constitution, was ill and distracted with toothache and rheumatic pains. She had come to Richmond from Greenwich on September 25, and the next day the fine weather broke up. “The first rayn that came for many a day,” says Dee, “all pasture about us was withered. Rayn in afternone like Aprile showres.” A week or two after this he was summoned to Hampton Court, and had a conference of two hours with the Queen, from nine to eleven in the morning. Dr. Bayly, the Queen’s physician, came to Mortlake on October 16 to consult with him, for his profound hermetic studies gave him all the prestige of a super-doctor. On the 22nd Jane (Dee still writes of her as “Jane Fromonds,” probably to distinguish her from his mother, Jane Dee) went to Hampton Court. She found the Queen no better, in fact a worse fit of paint than ever occurred on the 25th, lasting from nine in the evening till after midnight. On the 28th, Leicester and Walsingham decided to send Dee abroad to consult with some foreign physician about the malady. He was given his instructions at nine o’clock on November 4th; on the 7th he reached Gravesend, and sailed from Lee on the 9th. By three o’clock on the 14th, he was in Hamburg; in Berlin on December 6; and on the 11th at Frankfurt-upon-Oder. The entry on the 15th, “newes of Turnifer’s comming, 8 o’clock, by a speciall messenger,” looks as if the object of his journey was attained. There are no more details of the business.

The diary is resumed in March, 1579, with some trivial entries about his showing Mr. John Lewis and his son, the physician, how to draw aromatical oils, and a note of his cat getting a young fledgling sparrow that “had never had but one — the right — wing, naturally.”

Dee’s mother surrendered to him on June 15, 1579, the house and lands at Mortlake, with reversion to his wife Jane, and to his heirs and assigns after him, for

ever. The document was delivered to him by a surveyor from Wimbledon (in which parish Mortlake was included) under the tree by the church. The fine for the surrender — twenty shillings — was paid to the Queen, as Lady of the Manor, on October 31.

A month later, on his fifty-second birthday, July 13, 1579, Dee's eldest son, Arthur, was born. The event was coincident with another, for that same night, at ten o'clock, Jane's father, Mr. Fromond (Dee always adds an "s" to the name), was seized with a fit and rendered speechless; he died on Tuesday, the 14th, at four in the morning. Arthur was christened at three o'clock on the 16th; Edward Dyer and "Mr. Doctor Lewis, judge of the Admiralty," were his godfathers; his godmother was one of Dee's Welsh relations, "my cosen, Mistress Blanche Parry, of the Queen's Privy Chamber." She was represented by another cousin, Mistress Aubrey, from Kew. "August 9. Jane Dee churched," is almost the next thing recorded.

Dyer was already a person in considerable favour with the Queen. He was Sidney's great friend, and after the poet's death on the field of Zutphen, was legatee of half his books. Dyer was no mean poet himself, even among his greater compeers. He is the author of those immortal verses on "Contentment," beginning "My mind to me a kingdom is," which were set to music in 1588 by William Byrd. We shall meet him again in these pages.

Dee of course knew all about Elizabeth's long flirtation with the King of France's brother, Duc d'Alencon, and her diplomatic holding off from the match. He notes Mr. Stafford's arrival as an emissary from "Monsieur." The Queen kept a very tender spot in her heart for this ugly little deformed suitor, and Dee has a remarkable note of a call from her at Mortlake as she returned from Walsingham's on February 11, 1583: "Her Majesty axed me obscurely of Monsieur's state. I said he was

" (dead-alive).

Pupils now began to resort to Dee. "John Elmeston, student of Oxford, cam to me for dialling." "Mr. Lock brought Benjamin his sonne to me: his eldest sonne also, called Zacharie, cam then with him." This was Michael Lock, the traveller. Zachary was the eldest of Lock's fifteen children; Benjamin afterwards wrote on alchemy — A Picklock for Ripley's Castle.

It was a stormy October, of continuous rains and floods for three or four days and nights, and a "raging wynde at west and southerly." Six persons were drowned in the Kew ferry boat, "by reason of the vehement and high waters overwhelming the boat aupon the roap, but the negligens of the ferryman set there to help." Mrs. Dee had a strange dream that "one cam to her and touched her, saying, `Mistress Dee, you are conceived of child, whose name must be Zacharias; be of good chere, he sal do well, as this doth.'" This, meaning Arthur, had a sharp illness soon after, however, and when the next child arrived, in two years' time, it chanced to be a girl, who was named Katherine. So the dream went by contraries after all. Arthur was weaned in August, and his nurse discharged, with her wages, ten shillings, for the quarter ending at Michaelmas, paid in full. Dee is an exact accountant as well as diarist, and enters every payment with precise care.

The Queen came riding down from Richmond in her coach, to see what her astrologer was doing, on September 17, 1580, and put the household in a flutter. She took

“The higher way of Mortlake field, and when she came right against the church, she turned down toward my house. And when she was against my garden in the field, her Majestie stayed there a good while, and then came into the field at the great gate of the field, where her Majestie espied me at the door, making reverent and dutiful obeysance unto her; and with her hand, her Majestie beckoned for me to come to her, and I came to her coach side; her Majesty then very speedily pulled off her glove and gave me her hand to kiss; and to be short, her Majestie willed me to resort oftener to her Court, and by some of her Privy Chamber to give her to weete when I am there.”

One can picture the gorgeously dressed and pearl-bedecked Queen, her auburn hair glistening in the sun, beckoning majestically to her astrologer, bidding him attend and swell the troops of courtiers and admirers, demanding imperiously to be let know when he came, and to be kept informed of all he did. Dee was a handsome man, tall and slender; he wore a beard, pointed and rather long. Among the crowd of personable courtiers in their rich and most becoming suits, he would be no inconspicuous figure.

It was perhaps the publication of the first volume of the “General and Rare Memorials pertayning to the art of perfect Navigation” that brought Dee into intimate relations with the navigators of the time. Or it may have been his intimacy with them that suggested the work. the Hexameron appeared in September, 1577, and in November the diarist first records a visit from one of them: “Sir Umfrey Gilbert cam to me at Mortlake.” Gilbert was then living at Limehouse, engaged in writing discourses on naval strategy and discovery. A few months later, Dee mentions a suggestion he gave to Richard Hakluyt, the author of the fascinating histories of the voyages: “I told Mr. Daniel Rogers, Mr. Hakluyt of the Middle Temple being by, that Kyng Arthur and King Mary, both of them, did conquer Gelindia, lately called Friseland, which he so noted presently in his written copy of Monumenthensis, for he had no printed book thereof.” On August 5, one of Gilbert’s company, “Mr. Reynolds of Bridewell, tok his leave of me as he passed toward Dartmouth to go with Sir Umfrey Gilbert toward Hochelaga.” The expedition sailed from Dartmouth on September 23, Sir Humphrey having obtained his long-coveted charter to plant a colony in the New World in June. All his money was sunk in this unfortunate expedition, which only met diasaster at the hands of a Spanish fleet. Undaunted, however, Sir Humphrey set to work to collect more funds and information to pursue his end. With the first Dee could not help him much; with the last he believed he could, and in return he exacted a stake in the results: “1580, Aug. 28th. my dealing with Sir Humfrey Gilbert graunted me my request to him made by letter, for the royalties of discovery all to the north above the parallell of the 50 degree of latitude, in the presence of Stoner, Sir John Gilbert his servant or reteiner; and thereupon took me by the hand with faithful promises, in his lodging of Cooke’s house in Wichcross Streete, where we dyned, onely us three together, being Satterday.”

It was more than two years before Gilbert succeeded in getting enough other persons to embark their capital in his project, and then he set out on his final voyage, the second to Newfoundland (the first having been assisted by Raleigh, his half-brother, in 1578). We all know the end, how, after he had planted “his raw

colony of lazy landmen, prison birds and sailors," he set out in his little vessel, The Squirrel, to explore the coast and sandbanks between Cape Breton Island and Newfoundland, and then headed for England. In a storm off the Azores, the little ship foundered and was lost, its captain's last words being, "We are as near Heaven by sea as by land."

With another brother, Adrian Gilbert, Dee had much closer relations, as we shall shortly see. This younger half-brother of Sir Walter Raleigh was reputed "a great chemist in those days," which of course meant something of an alchemist. He is associated in one's mind with "Sidney's sister, Pembroke's mother," that accomplished and beautiful inspirer of the most exquisite epitaph ever penned, for he was one of the "ingenious and learned men" who filled her house at Wilton "so that it was like a college." The Countess of Pembroke spent a great deal yearly in the study of alchemy, and kept Adrian as a laborant for a time. He is described as a buffoon who cared not what he said to man or woman of any quality. Bringing John Davis, another of the breezy Devon sea captains, Adrian came to Mortlake to effect a reconciliation after some uncomfortable passages caused, as they found, by dishonest dealings on the part of William Emery, whom they now exposed. "John Davis say'd that he might curse the tyme that ever he knew Emery, and so much followed his wicked counsaile and advyse. So just is God!" Here again we suspect Dee's reputation for "magic" had been the trouble.

With the discovery of so many new coasts and islands across in the Western seas, the Queen was anxious to know what right she had to call them hers, and what earlier navigators had sailed to them before. After Frobisher's three voyages in search of the North-West Passage, she sent for the author of the Hexameron and bade him set forth her title to Greenland, Estoteland (Newfoundland) and Friseland. This document he calls "Her Majestie's commandment — Anno 1578." Either he prepared another, or did not present this to the Queen for two years.

1580. — "On Monday Oct. 3, at 11 of the clock before none, I delivered my two Rolls of the Queene's Majestie's title unto herself in the garden at Richmond, who appointed after dynner to heare fuder of the matter. Therefore betweene one and two afternone, I was sent for into her highness Pryvy Chamber, where the Lord Treasurer allso was, who having the matter slightly then in consultation, did seme to doubt much that I had or could make the argument probable for her highnes' title so as I pretended. Wheruppon I was to declare to his honor more playnely, and at his leyser, what I had sayd and could say therein, which I did on Tuesday and Wensday following, at his chamber, where he used me very honorably on his behalf."

The next day Dee fancied that Burleigh slighted him. He called to see him, and was not admitted; he stood in the ante-chamber when the great man came out, but the Lord Treasurer swept by and "did not or would not speak to me." Probably he was pondering deeply on important matters of state. Dee's hopes of preferment fell to the ground, and he was persuaded that "some new grief was conceyved." Dee was ambitious; he was not yet surfeited with fame; of wealth he had none, hardly even a competency; he was vain, and he knew that he had gifts which few of his countrymen could rival or even understand; and he was no longer young. Such

advantages as he could attain must be secured quickly, if they were to be enjoyed at all.

“On the 10th, at four o'clock in the morning my mother Jane Dee dyed at Mortlake; she made a godlye ende: God be prayesd therfore! She was 77 yere old.”

News of this event quickly travelled to the Court at Richmond, and the Queen determined to signalise her favour to Dee and her gratification at Burleigh's report of his geographical labours, which reached her on the same day as the news of his loss, by a personal visit of condolence.

“Oct. 10th. The Quene's Majestie, to my great cumfort (hora quinta), cam with her trayn from the court, and at my dore graciously calling me to her, on horsbak, exhorted me briefly to take my mother's death patiently, and withall told me that the Lord Threasurer had greatly commended my doings for her title, which he had to examyn, which title in two rolls he had brought home two hours before; and delivered to Mr. Hudson for me to receive at my coming from my mother's burial at church. Her Majestie remembered allso how at my wive's death, it was her fortune likewise to call uppon me.”

So the fancied slight was nothing. The Queen's second remarkably-timed visit was followed up by an haunch of venison from my Lord Treasurer, and an atmosphere of satisfaction reigned. One of the rolls of which Dee writes is still in existence. It has on one side of the parchment a large map of “Atlantis,” or America, drawn with the skill of a practised cartographer. At the top is his name, “Joannes Dee,” and the date, “Anno 1580.” Among his papers is a smaller map, upon which large tracts in the Polar regions are marked “Infinite yse.” Thge other side of the roll is devoted to proving the Queen's title to lands she would never see or hear of, under the four following heads: “1. The Clayme in Particular. 2. The Reason of the Clayme. 3. The Credit of the Reason. 4. The value of that Credit by Force of Law.”

Dee was also busied this summer attending at the Muscovy House and writing instructions and drawing a chart for the two captains, Charles Jackson and Arthur Pett, for their North-East voyage to “Cathay,” or China.

He had perhaps joined the Company of the Merchant Venturers, for in March, 1579, he had signed a letter with Sir Thomas Gresham, Martin Frobisher (as every one knows, he was knighted in the thick of the Armada fight), and others, to the Council of State, desiring that those Adventurers who have not paid shall be admonished to send in contributions without delay. Another very interesting remark tells how “Young Mr. Hawkins, who had byn with Sir Francis Drake, came to me to Mortlake, in June, 1581; also Hugh Smith, who had just returned from the Straits of Magellan.” In November, Dee is observing “the blasing star,” or comet, of which, with its long tail, he makes a drawing on the margin of his diary. By the 22nd it had disappeared: “Although it were a cler night, I could see it no more.”

On June 7, 1581, at half-past seven in the morning, Dee's second child and eldest daughter, Katherine, was born. She was christened on the 10th, her sponsors being Lady Katherine Crofts, wife of Sir James Crofts, Controller of the Queen's Household; Mistress Mary Scudamore, of the Privy Chamber, the Queen's cousin;

and Mr. Packington, also a court gentleman. The infant was put out to nurse, first at Barnes with Nurse Maspely, then transferred to Goodwife Bennett. On August 11

“Katherine Dee was shifted to nurse Garrett at Petersham, on Fryday, the next day after St. Lawrence day, being the 11th day of the month. My wife went on foot with her, and Ellen Cole, my mayd, George and Benjamin, in very great showers of rain.”

Nevertheless the little Katherine seemed to flourish, and there are entries of monthly payments of six shillings to her nurse, with allowance for candles and soap, up to August 8 of the following year, when “Kate is sickly,” and on the 20th is reported as “still diseased.” Four or five days after, she was taken from nurse Garret, of Petersham, and weaned at home. The mother had several times been over to see the child, sometimes on foot, attended by George or Benjamin, the servants, and once by water with “Mistress Lee in Robyn Jackes bote.” The children seemed in trouble at this time, for about seven weeks before Arthur “fell from the top of the Watergate Stayres, down to the fote from the top, and cut his forhed on the right eyebrow.” This was at the old landing-place at Mortlake. Their childish ailments are always most carefully recorded in the diary, even when the cause is a box on the ears — probably well earned — from their quick-tempered mother. Jane’s friends Mr. and Mrs. Scudamore, and their daughter, and the Queen’s dwarf, Mrs. Tomasin, all came for a night to Mortlake. Jane went back with Mistress Scudamore to the Court at Oatlands. A number of other visitors are named, including “Mr. Fosker of the wardrobe.”

CHAPTER V

THE SEARCH FOR A MEDIUM

“Truth is within ourselves; it takes no rise
From outward things, whate’er you may believe
There is an inmost centre in us all
Where truth abides in fulness; and around
Wall upon wall, the gross flesh hems it in,
This perfect clear perception, which is truth.
A baffling and perverting carnal mesh
Binds it and makes all error; and to KNOW
Rather consists in opening out a way
Whence the imprisoned splendour may escape
Than in effecting entry for a light
Supposed to be without.”

— Browning, Paracelsus.

Dee had always, working with and under him, a number of young students and assistants, who were admitted more or less to his inner counsels. If they proved apt and diligent, he would reward them with promises of alchemical secrets, “whereby they might honestly live”; once he promised 100 pounds, “to be paid as soon of my own clere hability, I myght spare so much.” This was a very safe

provision. Generous as he was, lavish to a fault, money never stuck near him, nor was it of the least value in his eyes, except as a means of advancing science and enriching others.

Naturally, jealousies arose among the assistants. They would suddenly depart from his service, and spread ignorant and perverted reports of his experiments. Roger Cook, who had been with his master fourteen years, took umbrage "on finding himself barred from view of my philosophical dealing with Mr. Henrick." He had imagined himself the chosen confidant, for to him Dee had revealed, December 28, 1579, what he considered a great alchemical secret "of the action of the elixir of salt, one upon a hundred." Roger was now twenty-eight, "of a melancholik nature, and had been pycking and devising occasions of just cause to depart on the sudden," for he was jealous of a newer apprentice. "On September 7th, 1581, Roger went for altogether from me." But it was not "altogether," for Roger returned when Dee was old and infirm and poor, and remained serving him almost to the end. There was always something patriarchal in Dee's care for the members of his large household, evidenced abundantly in his diary. No doubt their loyalty to him was often severely tried by harsh and cruel outside rumours, but as they knew and loved his real nature they only drew closer towards him.

A new phase of his character is now forced upon us. He has appeared hitherto as the man of learning, astronomer and mathematician, a brilliant lecturer and demonstrator, diligent in probing the chemical and alchemical secrets of which his vast reading, his foreign correspondence, and his unique library gave him cognisance. Interested in geographical discovery and history, a bibliographical and mathematical writer, his genuine contributions to science had been considerable. He had written upon navigation and history, logic, travel, geometry, astrology, heraldry, genealogy, and many other subjects. He had essayed to found a National Library, and was contemplating a great work upon the reformation of the Calendar. But these purely legitimate efforts of his genius were discounted in the eyes of his contemporaries by the absurd suspicions with which his name had been associated ever since his college days. After his arrest and trial by Bonner, he never really succeeded in shaking off this savour of something magical. The popular idea of Dee in league with evil powers was, of course, the natural result of ignorance and dull understanding. To a public reared in superstition, untrained in reasoning, unacquainted with the simple laws of gravitation, the power to raise heavy bodies in the air at will, to see pictures in a simple crystal globe, or converse with projections of the air, to forecast a man's life by geometric or planetary calculations, and to discern the influence of one chemical or mineral substance upon another, seemed diabolically clever and quite beyond human agency. Even to study Nature and her secrets was to lay oneself open to the suspicion of being a magician. We must remember that in the early years of Queen Elizabeth's reign it was thought necessary to pass an Act of Parliament decreeing that all who practised sorcery causing death should suffer death; if only injury was caused, imprisonment and the pillory would be the punishment. Any conjuration of an evil spirit was to be punished by death as a felon, without benefit of clergy or sanctuary. Any discovery of hidden treasure by magical means was punishable by death for a second offence.

But if "magic" was tottering on its throne, the reign of alchemy was still uncontested. Belief in it was universal, its great votaries in the past were of all nations. St. Dunstan of Glastonbury, Roger Bacon, Raymond Lully, Canon George

Ripley of Bridlington, Albertus Magnus, Cornelius Agrippa, Arnold de Villa Nova and Paracelsus, all their writings, and hundreds of others, Dee had in his library and constantly upon his tongue. Alchemy was not only a science, it was a religion and a romance. It was even then enduring the birth-throes and sickly infancy of modern chemistry, and the alchemists' long search for the secret of making gold has been called one of its crises. Long after this it was still an article of faith, that such a man as Robert Boyle did not deny. We cannot forget that even that great chemist, Sir Humphry Davy, revered the possibility, and refused to say that the alchemist's belief in the power to make gold was erroneous. How unlike Dante's keen irony of the dark and groping men who seek for "peltro," or tin whitened with mercury. But alchemy was bursting with many other secrets beyond the manufacture of gold. The spiritual element abounding in all minerals, and the symbolism underlying every actual substance, were deeply imbedded in it. It was a science of ideals. It ever led its followers on to scale illimitable heights of knowledge, for in order to surpass all material and rational nature, and attain the crowning end, did not God delegate His own powers to the sage? So the art of healing was thought the noblest, the most Godlike task, and no means of attaining hermetic wisdom were untried. The psychical world became every bit as real to these religious mystics as the physical and rational, which they understood so vaguely. Even the strange shapes which escaped from the retorts of the old alchemists were known to them as "souls." Their successors called them spirits. Paracelsus named them as mercury, and it was left to his pupil, Van Helmont, the true founder of all modern chemistry, to give the name of gas.

It is easy to see how Dee, the astrologer, grew into close touch with those psychic phenomena which, though they have become extremely familiar to us, as yet continue to baffle our most scientific researches. When he first became conscious of his psychic powers, and how far he himself was mediumistic, is harder to discern. It is on May 25, 1581, that he makes in his diary the momentous entry: — "I had sight in Chrystallo offered me, and I saw." We may take it that he "saw" through a medium, for he never afterwards seems to have been able to skry without one. Perhaps his first crystal had then been given him, although, as we have seen, he already owned several curious mirrors, one said to be of Mexican obsidian such as was used for toilet purposes by that ancient race. He had made a study of optics, and in his catalogue of the manuscripts of his library are many famous writings on the spectrum, perspective and burning glasses, etc. Then came the trouble with Roger, "his incredible doggedness and ungratefulness against me to my face, almost ready to lay violent hands on me." Dee hears strange rappings and knockings in his chamber. A gentleman came from Lewisham to consult him about a dream many times repeated. Dee prays with him, and "his dream is confirmed and better instruction given." A mysterious fire breaks out for the second time in "the maydens" chamber at night. The knocking is heard again, this time accompanied with a voice repeated ten times. No words apparently, but a sound like "the schrich of an owl, but more longly drawn and more softly, as it were in my chamber." He has a strange "dream of being naked and my skyn all over wrought with work like some kinde of tuft mockado, with crosses blew and red; and on my left arm, about the arm in a wreath, these words I read: — 'Sine me nihil potestis facere.' And another the same night of Mr. Secretary Walsingham, Mr. Candish and myself." Then he was ten days from home, at "Snedgreene, with John Browne, to hear and

see the manner of the doings.” Evidently some remarkable manifestation. he was becoming more interested in psychic problems, but he was not able to proceed without a medium, and the right one had not yet appeared.

Meanwhile, he fills his diary with all manner of interesting news. Vincent Murphy, the “cosener” who had defamed him, and against whom in September, 1580, he had instituted a troublesome law-suit, was condemned by a jury at the Guildhall to pay 100 pounds damages. “With much adoe, I had judgment against him.” Five or six months later, he agreed with Mr. Godolphin to release the cosener. Jean Bodin, the famous French writer on witches, and publicist, had come to England with “Monsieur,” and Dee was introduced to him by Castelnau, the French ambassador, in the “Chamber of Presence at Westminster.” Letters came from Doctor Andreas Hess, the occult philosopher, sent through Dee’s friend, Richard Hesketh, agent at Antwerp. There are also letters from Rome. John Leonard Haller, of Hallerstein by Worms, came to him to say he had received instructions for his journey into “Quinsay [or Northern china], which journey I moved him unto, and instructed him plentifully for observing the variation of the compass in all places as he passed.” He notes, as if it were a common occurrence, a “fowl falling out” between two earls at Court, Leicester and Sussex [the Lord Chamberlain], tells how they “called each other traitor, whereupon both were commanded to keepe to their chambers at Greenwich, where the Court was.” It sounds like a schoolboys’ quarrel, but the royal schoolmistress would have them both know that they were in disgrace for a time. In July, there was an eclipse of the moon, but it was “cloudy, so as I could not perceive it.” In August, about half-past eight on the night of the 26th, “a strange Meteore in forme of a white clowde crossing galaxium, lay north and south over our zenith. This clowde was at length from the S.E. to the S.W., sharp at both ends, and in the West it was forked for a while. It was about sixty degrees high, it lasted an hour, all the skye cleare about and fair star-shyne.”

Dee made a journey into Huntingdonshire, by St. Neots, to Mr. Hickman’s at Shugborough, in the county of Warwick. Young Bartholomew Hickman was afterwards to become the companion and servant of his old age, and manifested some slight mediumistic powers. On the way home, a month or two later, Dee rode into Sussex to Chailey, probably to the glass works there. The Queen and “Monsieur” were at Whitehall.

A pretty little scene was enacted at Mortlake at the New Year, when “Arthur Dee and Mary Herbert, they being but 3 years old, the eldest of them, did make as it were a shew of childish marriage, of calling each other husband and wife.” Then Dee essays a harmless little play upon words. “The first day Mary Herbert came to her father’s house at Mortlake, the second day she came to her father’s house at East Shene.” Mrs. Dee went the same day to see the baby Katherine at Nurse Garret’s, and Mistress Herbert went with her. So the two families were in great unity.

Sir George Peckham, who sailed with Sir Humphrey Gilbert, came to consult Dee about exploration in North America, and promised a share in his patent of the new lands. He also sent down his sea-master, Mr. Clement, and another gentleman, Mr. Ingram, to see the mathematician. For Sir John Killigrew, Dee devised “a way of protestation to save him harmless for compounding for the Spaniard who was robbed: he promised me fish against Lent.” Haller came again to get instructions how to transfer his money to Nuremberg, and to get letters of introduction to

Constantinople. By him, Dee sent letters to correspondents in Venice, where the German explorer was to winter.

Mr. Newbury, who had been in India, came early in the New Year. Dee recounts how the stage in that well-known old London place of amusement, the Paris Garden, on Bankside, Southwark, fell down suddenly while it was crammed with people beholding the bear-baiting. "Many people were killed thereby, more hurt, and all amazed. The godly expound it as a due plague of God for the wickedness there used, and the Sabbath day so profanely spent." Sunday was the great day for the bear-fights.

"1583. — Jan. 23. Mr. Secretarie Walsingham cam to my howse, where by good luk he found Mr. Awdrian Gilbert, and so talk was begonne of Northwest Straights discovery.

"Jan. 24. Mr. Awdrian Gilbert and John Davis went by appointment to Mr. Secretary, to Mr. Beale his house, where only we four were secret, and we made Mr. Secretarie privie of the N.W. passage, and all charts and rutters were agreed uppon in generall.

"Feb. 3. Mr. Savile, Mor. Powil the younger, travaylors, Mr. Ottomeen his sonne cam to be acquaynted with me.

"Feb. 4. Mr. Edmunds of the Privie Chamber, Mr. Lee, Sir Harry Lee, his brother, who had byn in Moschovia, cam to be acquaynted with me.

"Feb. 11. The Queene lying at Richmond went to Mr. Secretarie Walsingham to dynner; she coming by my dore graciously called me to her, and so I went by her horse side as far as where Mr. Hudson dwelt.

"Feb. 18. Lady Walsingham cam suddenly to my house very freely, and shortly after that she was gone, cam Syr Francis himself, and Mr. Dyer.

"March 6. I and Mr. Adrian Gilbert and John Davis did mete with Mr. Alderman Barnes, Mr. Townson and Mr. Yong and Mr. Hudson, about the N.W. passage.

"March 17. Mr. John Davys went to Chelsey with Mr. Adrian Gilbert to Mr. Radforths, and so, the 18th day from thence, to Devonshyre.

"April 18. The Queene went from Richmond toward Greenwich, and at her going on horsbak, being new up, she called for me by Mr. Rawly his putting her in mynde, and she sayd 'quod defertur non aufertur,' and gave me her right hand to kisse."

While these every-day events were going on and being chronicled, Dee was also occupying himself with the search for a medium. He first tried one named Barnabas Saul (he seems to have been a licensed preacher), who professed himself an occultist. Saul gives news of buried treasure — great chests of precious books hidden somewhere near Oundle in Northamptonshire, but the disappointed book-lover finds the hoard an illusion. Then Saul, who slept in a chamber over the hall at Mortlake, is visited at midnight by "a spiritual creature." The first real seance that Dee records, "Actio Saulina," took place on December 21, 1581. The skryer was bidden to look into the "great crystalline globe," and a message was transmitted by the angel Annael through the percipient to the effect that many things should be declared to Dee, not by the present worker, "but by him that is assigned to the stone." After New Year's tide, on any day but the Sabbath, the stone was to be set in the sun,

the brighter the day the better, and sight should be given. The sitters might “deal both kneeling and sitting.” When we consider how very real to a devout person in the Middle Ages apparitions of the devil and of evil spirits were, there seems nothing at all extraordinary in Dee’s belief that good spirits also might be permitted to come to his call, for purposes of good. A month or two after this, Saul was indicted on some charge and tried in Westminster Hall, but, thanks to Mr. Serjeant Walmesley and a couple of clever lawyers, he was acquitted. There was an end of his clairvoyance, however: “he confessed he neyther herd or saw any spirituall crature any more.” If the accusation against him had been that of sorcery, he was wise to risk no further appearances in Westminster Hall. He seems to have spread abroad many false reports about Dee, who reproached him bitterly when he called at Mortlake a few months later. Dee had, however, gained psychical experience by these early and tentative experiments. The field was now open for a maturer applicant. When he arrived, he was to change the whole current of Dee’s life and outlook, to become at once a helper and a stumbling-block, a servant and a master, loving as a son, treacherous as only a jealous foe. It was a strange fate that sent Edward Kelley to Dee at this moment, when everything was ripe for his appearance. And it was characteristic of the man that he was ushered into Dee’s life under a feigned name. On March 8, two days after Saul had confessed he saw and heard no more of the spirits, Dee writes in his diary, “Mr. Clerkson and his frende cam to my howse.” He makes the visit very emphatic by repeating the information: “Barnabas went home abowt 2 or 3 o’clock, he lay not at my howse now; he went, I say, on Thursday, and Mr. Clerkson came.” At nine o’clock the same night, there was a wonderful exhibition of the aurora in the northern and eastern heavens, which Dee describes minutely in Latin in the diary. The next day, March 9, he mentions Clerkson’s friend by name as “Mr. Talbot,” and shows how that individual appears to have begun ingratiating himself with his new patron by telling him what a bad man his predecessor was. Barnabas had said that Dee would mock at the new medium; Barnabas had “cosened” both Clerkson and Dee. This, Talbot professed to have been told by “a spiritual creature.” The pair proceeded at once to business. On the 10th, they sat downto gaze into “my stone in a frame given me of a friend,” with very remarkable results. Information was vouchsafed that they should jointly together have knowledge of the angels, if the will of God, viz., conjunction of mind and prayer between them, be performed. They were bidden to “abuse not this excellency nor overshadow it with vanity, but stick firmly, absolutely and perfectly in the love of God for his honour, together.” There were forty-nine good angels, all their names beginning with B, who were to be answerable to their call. The first entry that Dee makes in his Book of Mysteries concerning Talbot is as follows: —

“One Mr. Edward Talbot cam to my howse, and he being willing and desyrours to see or shew something in spirituall practise, wold have had me to have done something therein. And I truely excused myself therein: as not, in the vulgarly accountd magik, neyther studied or exercised. But confessed myself long tyme to have byn desyrours to have help in my philosophicall studies through the cumpany and information of the blessed Angels of God. And thereuppon, I brought furth to him my stonein the frame (which was given me of a frende), and I sayd unto him that I was credibly informed that to it (after a sort) were answerable Aliqui Angeli boni. And also that I was once willed by a skryer to call for the good Angel Annael

to appere in that stone in my owne sight. And therefore I desyred him to call him, and (if he would) Anachor and Anilos likewise, accounted good angels, for I was not prepared thereto.

“He [Talbot] settled himself to the Action, and on his knees at my desk, setting the stone before him, fell to prayer and entreaty, etc. In the mean space, I in my Oratory did pray and make motion to God and his good creatures for the furthering of this Action. And within one quarter of an hour (or less) he had sight of one in the stone.”

The one to appear was Uriel, the Spirit of Light. On the 14th, the angel Michael appeared, and gave Dee a ring with a seal. Only on two other occasions does a tangible object pass between them. Dee was overjoyed at the success of his new “speculator” or “skryer”; the sittings were daily conducted until March 21, when the medium was overcome with faintness and giddiness, and Michael, who was conversing with him, bade them rest and wait for a quarter of an hour. The next day, Talbot departed from Mortlake, being bidden by Michael to go fetch some books of Lord Monteagle’s which were at Lancaster, or thereby, and which would else perish.

He returned before long, and all through April, instructions were being given at the sittings for the future revelations. elaborate preparations were needed, and they were described in minute detail.

By April 29, a square table, “the table of practice,” was complete. It was made of sweet wood, and was about two cubits high (“by two cubits I mean our usual yard”), with four legs. On its sides certain characters, as revealed, were to be written with sacred yellow oil, such as is used in churches. Each leg was to be set upon a seal of wax made in the same pattern as the larger seal, “Sigilla AEmeth,” which was to be placed upon the centre of the table, this seal to be made of perfect, that is, clean purified wax, 9 inches in diameter, 27 inches or more in circumference. It was to be an inch and half a quarter of an inch thick, and upon the under-side was to be a figure as below.

It was a mystical sign, similar to those in use in the East, and also used by contemporary astrologers

[INSERT ILLUSTRATION]

The four letters in the centre are the initials of the Hebrew words, “Thou art great for ever, O Lord,” which were considered a charm in the Middle Ages.

The upper side of the seal was engraved with an elaborate figure obtained in the following manner. First, a table of forty-nine squares was drawn and filled up with the seven names of God — “names not known to the angels, neither can they be spoken or read of man. These names bring forth seven angels, the governors of the heavens next unto us. Every letter of the angels’ names bringeth forth seven daughters. Every daughter bringeth forth seven daughters. Every daughter her daughter bringeth forth a son. Every son hath his son.”

The seal “was not to be looked upon without great reverence and devotion.”

It is extremely curious and interesting to relate that two of these tablets of wax, “Sigillum Dei,” and one of the smaller seals for the feet of the table, with a crystal globe, all formerly belonging to Dee, are still preserved in the British

Museum, having come there from Sir Thomas Cotton's library, where the table of practice was also long preserved.

The spirits were kind enough to say: "We have no respect of cullours," but the table was to be set upon a square of red silk as changeable (i.e., shot) as may be, two yards square, and a red silk cover, with "knops or tassels" at the four corners, was to be laid over the seal, and to hang below the edge of the table. The crystal glove in its frame was then to be set upon the centre of the cover, resting on the seal with the silk between.

The skryer seated himself in "the green chair" at the table, Dee at his desk to write down the conversations. These were noted by him then and there at the time, and he is careful to particularise any remark or addition told him by the Ckryer afterwards. Once a spirit tells him: "There is time enough, and we may take leisure." Whereupon Dee conversed directly with the visitant; sometimes apparently only Talbot hears and repeats to him what is said. A golden curtain was usually first seen in the stone, and occasionally there was a long pause before it was withdrawn. Once Dee writes: "He taketh the darkness and wrappeth it up, and casteth it into the middle of the earthen globe." The spirits generally appeared in the stone, but sometimes they stept down into a dazzling beam of light from it, and moved about the room. On some occasions a voice only is heard. At the close of the action, the "black cloth of silence is drawn," and they leave off for the present.

There are very few comments or general impressions of the actions left by Dee, but on one occasion he does use expressions that show his analytical powers to have been actively at work to account for the phenomena. He brought his reason to bear upon the means of communication with the unseen world in a remarkable manner. In speaking to the angels one day he said: "I do think you have no organs or Instruments apt for voyce, but are meere spirituall and nothing corporall, but have the power and property from God to insinuate your message or meaning to ear or eye [so that] man's imagination shall be that they hear and see you sensibly."

As Plotinus says, "Not everything which is in the soul is now sensible, but it arrives to us when it proceeds as far as sense."

The minute descriptions of the figures seen are of course characteristic of clairvoyant or mediumistic visions. In the case of Bobogel, the account of his "sage and grave" attire — the common dress of a serious gentleman of the time — may be quoted.

"They that now come in are jolly fellows, all trymmed after the manner of Nobilities now-a-dayes, with gylt rapiers and curled haire, and they bragged up and downe. Bobogel standeth in a black velvet coat, and his hose, close round hose of velvet upperstocks, over layd with gold lace. He hath a velvet hat cap with a black feather in it, with a cape on one of his shoulders; his purse hanging at his neck, and so put under his girdell. His beard long. He had pantoffolls and pynsons. Seven others are apparelled like Bobogel, sagely and gravely."

CHAPTER VI

EDWARD KELLEY

"Kelley did all his feats upon

The Devil's looking-glass, a stone
Where, playing with him at bo-peep,
He solv'd all problems ne'er so deep."

— Butler, *Hudibras*

It is now time to inquire who this Talbot, this seer and medium, was. Where did he come from, and what was his previous history?

That he came to the Mortlake philosopher under a feigned name is perhaps not so damning an accusation as might at first sight appear. There was in his case, certainly, every reason why he should change his identity, if possible, but an alias in those days was so common a thing that perhaps more stress has been laid upon Kelley's than is strictly fair.

The whole of Kelley's story is so wildly and romantically coloured, it is so incredible, and so full of marvels, that it is extremely difficult to know what to believe. There is no disentangling the sober facts of his life from the romance attributed to him; indeed, there are no sober facts, as the reader will see when the accepted traditions of this extraordinary man's career are laid down.

From March 8 to November, 1582, Edward Talbot, the skryer, came and went in the Mortlake establishment, gazed in the crystal, and ingratiated himself into his employer's liking. Then he disappeared, and Edward Kelley took his place. There had been a quarrel of some kind, precursor of many others, and Dee opens his fourth Book of Mysteries, on November 15, "after the reconciliation with Kelley." Henceforth "E.K." is his name.

Kelley was born at Worcester, on August 1, 1555, as appears by the horoscope drawn for him by the astrologer. He began life as an apothecary's apprentice, and showed some aptitude for his calling. It has been stated that, under the name of Talbot, he studied for a short time at Oxford, but left abruptly under a cloud. A few years later, he was exposed in the pillory in Lancaster for having either forged ancient title deeds or coined base money. Both feats are accounted to him. The next incident in his career is a charge of having dug up a newly buried "caitiff's" corpse in Walton-le-Dale churchyard, Lancashire, for the purpose of questioning the dead, or "an evil spirit speaking through his organs," respecting the future of "a noble young gentleman," then a minor. After this savoury episode, Kelley is reported to have been wandering in Wales (it is suggested that he was hiding from justice), when he stumbled accidentally upon an old alchemical manuscript and two caskets or phials containing a mysterious red and white powder. Another version of this discovery is that Dee and Kelley together found the powder at Glastonbury. This we may dismiss. Wherever he procured it, Kelley undoubtedly owned a small quantity of some substance which he regarded as of priceless value, inasmuch as, if properly understood and manipulated, it could be used for transmuting baser metals into gold.

The reputation of the learned doctor of Mortlake, who was known all over the Continent, was a favourite at Court, and in touch with every adventure by sea or land, had of course reached Kelley. Dee's parsonage of Upton-on-Severn, near Worcester, did not trouble him much with responsibility, but it must have been on one occasional visit to it that he received from the Dean of Worcester Cathedral a Latin volume, in which he inscribed the gift thus: "Joannes Dee, 1565, Februarii 21. Wigorniae, ex dono decani ecclesiae magistri Beddar."

With the powder that he did not know how to use, and the alchemical manuscript which he could not decipher, and which yet might contain the invaluable secret (if indeed there is any truth in the story of his find), Kelley, the adventurer, sought out some means of introduction to the man so likely to help him. He had dabbled in alchemy, and came to Mortlake with something of a reputation, for Dee speaks of him as “that lerned man.” It is utterly unlikely that Dee had heard anything of Kelley’s exploits in the north. Such doings would scarcely penetrate the solmen recesses of the laboratory on the Thames side. So Kelley arrived, and was recieved in all good faith. He told Dee that the last seer, Barnabas, had “cosened” him, and seems to have at once impressed himself favourably upon the astrologer, who at the moment was without a reliable assistant. The sittings began, as we have seen, in March, and were successful immediately. In May the message comes that “none shall enter into the knowledge of these mysteries but this worker,” and Kelley’s position is secured.

Kelley was now about twenty-seven years old, and unmarried. He was bidden by the spirits on April 20 to take a wife, “which thing to do,” he told Dee, “I have no natural inclination, neither with a safe conscience may I do it.” but Michael had made him swear on his sword to follow his counsel, so he married reluctantly, not long after, Joan, or Johanna, Cooper, of Chipping Norton, who was eight years his junior, and about nineteen.

There was little love on his side apparently, but the girl seems at any rate to have essayed to do her duty as a wife. She was apparently a complete stranger to the Dees, although soon to become part of their household. What were Jane’s feelings at the thought of this invasion of her domestic peace we can only guess from an entry in Dee’s diary made two days after one of these first sittings. Dee does not write much about his wife in his diary, save only entries relating to her health, and this one he has carefully erased, as if he thought some disloyalty to her was involved in it. It is, however, possible to make it out almost entirely. “1582, 6 May. Jane in a merveyulous rage at 8 of the cloke at night, and all that night, and next morning till 8 of the cloke, melancholike and ch[?ided me] terribly for....” Something illegible follows, and then this: “that come to me only honest and lerned men.” Finally, “by Mr. Clerkson his help was [?pacified].” What can this mean save that she had taken a violent dislike to, and disapproval of, Kelley; that she mistrusted his honesty and wished they might have no more to do with him; that it was only by his friend Clerkson’s help that she was at last quieted? Her woman’s intuition was scarcely at fault; however kindly she came to treat her husband’s medium afterwards, however charitable she showed herself, she was right in suspecting no good to come to Dee through association with Kelley.

The accounts of the actions with the spirits which took place under Kelley’s control were minutely written down by Dee, as we have seen, mostly during the time of the sittings. The papers had a romantic history. The last thirteen books, which were in Sir Thomas Cotton’s library, were printed by Dr. Meric Casaubon about fifty years after Dee’s death, under the title of *A True and Faithful Relation of what passed for many Yeers between Dr. John Dee, a Mathematician of Great Fame in Q. Elizabeth and K. James their Reigns, and some Spirits: Tending (had it succeeded) To a General Alteration of most States and Kingdomes in the World...With a Preface confirming the reality (as to the Point of Spirits) of this Relation; and shewing the several good Uses that a sober Christian may make of all*

(folio 1659). Casaubon in his learned preface maintains stoutly that the visions were no distempered fancy, that Dee acted throughout with all sincerity, but that he was deluded. His book sold with great rapidity; it excited so much controversy, and incurred such disapproval from Owen, Pye, and the other Puritan divines, that it came near being suppressed; only the excellent demand for it prevented its confiscation, for not a copy could be found. The True Relation contains the record of all actions after the beginning of June, 1583. The earlier conversations, from the first with Barnabas, and Talbot's appearance on the scene, are still to be found in manuscript, they having in some way parted company from those of which Cotton had possession.

These earlier papers were acquired by the antiquary, Elias Ashmole, in a rather romantic way. Ashmole had been visiting William Lilly, the astrologer, at Horsham, in August, 1672, when on his return his servant brought him a large bundle of Dee's autograph MSS. which a few days before he had received from one of the warders of the Tower. The warder called on Ashmole at the Excise Office, and offered to give them in exchange for one of Ashmole's own printed works. The Windsor Herald cheerfully agreed, and sent him a volume "fairly bound and gilt on the back," of which of his works we know not.

Now for the history of the papers. Mrs. Wale, the warder's wife, had brought them with her dower from her lamented first husband, Mr. Jones, confectioner, of the Plow, Lombard Street. While courting, these young people had picked up among the "joyners in Adle Street" a large chest whose "very good lock and hinges of extraordinary neat work" took their fancy. It had belonged, said the shopman, to Mr. John Woodall, surgeon, father of Thomas Woodall, surgeon to King Charles II. and Ashmole's friend. He had bought it probably at the sale of Dee's effects in 1609, after his death. The Joneses owned the chest for twenty years without a suspicion of its contents. Then, on moving it one day, they heard a rattle inside. Jones prized open the space below the till, and discovered a large secret drawer stuffed full of papers, and a rosary of olive-wood beads with a cross, which had caused the rattle. The papers proved to be the conferences with angels from December 22, 1581, down to the time of the printed volume; the original manuscripts of the (unprinted) books entitled, "48 Claves Angelicae," "De Heptarchia Mystica," and "Liber Scientiae Auxiliis et Victoriae Terrestris." We may imagine Ashmole's excitement when he found he had in his hand the earlier chapters of the very remarkable book that was still in every one's mouth, published only thirteen years before.

We may now briefly examine this remarkable and voluminous Book of Mysteries. In view of the fact that it is perhaps the earliest record of mediumistic transactions, the first attempt to relate consecutive psychic transmissions, in fact a sort of sixteenth century Proceedings of a Society for Psychical Research, it seems to warrant investigation at some length.

The first book (still in manuscript) opens with a Latin invocation to the Almighty, and an attribution of all wisdom and philosophy to their divine original source. It ends "O beata et super benedicta omnipotens Trinitas, concedas mihi (Joanni Dee) petitionem hanc modo tali, qui tibi maxime placebit, Amen." Then comes a table of the four angels — Michael, Gabriel, Raphael, and Uriel, their particular attributes, and their descent from Annael. A long prayer in English follows, which gives a remarkable insight into Dee's attitude of mind. Unfeigned humility towards God, a certain unconsciousness of self and of his own particular

acquirements, are mingled with a calm assumption of authority and power to enter into the heart of knowledge. This was perhaps the chief characteristic of the exalted mysticism so prevalent at the time in a small section of alchemists, especially on the Continent. Dee was its representative in England, having, of course, imbibed much of it during his residence abroad. Paracelsus had been dead but forty years. His disciples everywhere were seeking three secrets which were to fulfil his teaching — the secret of transmutation, the elixir of life, and the philosophic stone, key to all wisdom. Bruno was still alive, developing his theories of God as the great unity behind the world and humanity. Copernicus was not long dead, and his new theories of the solar system were gradually becoming accepted. Galileo was still a student at Pisa, his inventions as yet slumbering in his brain. Montaigne was writing his gentle satires on humanity. Everywhere and in every sphere new thought was beginning to stir.

Dee did not scruple to claim in his prayer gifts like those bestowed upon the prophets. He deprecates any kind of traffic with unauthorised or unreliable spirits, and acknowledges again the only Source of wisdom. But since he has so long and faithfully followed learning, he does think it of importance that he should know more. The blessed angels, for instance, could impart to him things of at least as much consequence as when the prophet told Saul, the son of Kish, where to find a lost ass or two! A spirit afterwards told him that ignorance was the nakedness wherewith he was first tormented, and “the first plague that fell unto man was the want of science.”

He had reached that state of mind when he seemed unable to discern any boundary line between finite and infinite. His hope and his confidence were alike fixed on nothing less than wresting all the secrets of the universe from the abyss of knowledge, or, at any rate, as many of them as God willed. He explains how from his youth up he has prayed for pure and sound wisdom and understanding,

“such as might be brought, under the talent of my capacitie, to God’s honour and glory and the benefit of his servants, my brethren and sisters. And forasmuch as for many yeres, in many places, far and nere, in many books and sundry languages, I have wrought and studied, and with sundry men conferred, and with my owne reasonable discourse laboured, whereby to fynde or get some yinking, glimpse, or beame, of such the aforesaid radicall truthe:...And seeing I have read in they books and records how Enoch enjoyed thy favor and conversation, with Moses thou wast familiar, And also that to Abraham, Isaac, and Jacob, Josua, Gedeon, Esdras, Daniel, Tobias, and sundry other, the good angels were sent, by thy disposition, to instruct them, informe them, help them, yea in worldly and domesticall affairs; yea and sometimes to satisfy theyr desires, doubts and questions of thy secrets; and furthermore, considering the Shewstone which the high priests did use by thy owne ordering, wherein they had light and judgments in their great doubts, and considering also that thou (O God) didst not refuse to instruct the prophets (then called seers), to give answers to common people of things oeconomicall, as Samuel for Saul, seeking for his father’s asses, being gone astray: and as other things, vulgar true predictions, whereby to win credit unto their weightier affairs. And thinking within myself the lack of thy wisdom to me to be of more importance than the value of an Ass or two could be to Cis (Saul his father): And remembering what good counsaile thy apostle James giveth, saying Si quies autem vestrum etc. And

that Solomon the wise, did so, even immediately by thyselfe, attayne to his wonderfull sidome: Therefore, Seeing I was sufficiently taught and confirmed that this wisdome could not be come by at mans hand, or by human powre, but onely from thee (O God) mediately or immediately. And having allwayes a great regarde and care to beware of the filthy abuse of such as willingly and wittingly did invoke and consult (in divers sorte) Spirituall Creatures of the damned sort: Angels of darknes, forgers and patrons of lies and untruths; I did fly unto thee by hartly prayer, full oft, and in sundry manners: sometymes crying unto thee *Mittas Lucem tuam et veritatem, tuam quoe me ducant, etc.*”

Then he goes on to say that his slight experience with two different persons has convinced him of God’s wish to enlighten him through His angels. He has heard of a man accounted a good seer and skryer, a master of arts and preachger of the Word, and through his means he has seen spiritual apparitions “either in the christalline receptab\cle, or in open ayre.” He hopes to have help from this person until “some after man or meanes are sent him from on high.” But Saul — for it is Saul he means — is not devout, sincere and honest. Evil spirits have come to him, much to Dee’s terror “but that thou didst pitch thy holy tent to my defence and comfort.” He has quoted to Saul Roger Bacon’s warning to wicked devil-callers; but the man cannot brook rebuke, and is angry at being further debarred from the mysteries “which were the only things I desired, through thy grace.” He begs, most humbly and deprecatingly for leave to note down the actions, and asks that Annael may come to his help.

Barnabas having proved so unreliable, he rejoiced at having found another skryer. The one accessory wanting, when all the table and seals were comlete, was a “shewstone.” Dee seems already to have owned several. He had used a crystal before this time, but a new one was desirable. One evening, towards sunset, a little child angel appears standing in the sunbeams from the western window of the study, holding in its hand a thing “most bright, most clere and clorius, of the bigness of an egg.” Michael with his fiery sword appeared and bade Dee “Go forward, take it up, and let no mortall hand touch it but thine own.”

Michael tells them, too, that he and Kelley are to be joined in the holy work, united as if one man. But one is to be master, the other minister; one the hand, the other the finger. They are to be contented with their calling, for vessels are not all of one bigness, yet all can be full. Dee is reminded that all his knowledge is “more wonderful than profitable, unless thou art led to a true use of the same.”

Another spirit, *Medicus Dei*, or *Medicina*, says, “Great are the purposes of him whose medecine I carry,” and on one of the early march days utters some remarkable words on the precious doctrine of the universality of the Light: —

“Your voices are but shadows of the voices that understand all things. The things you look on because you see them not indeed, you also do name amiss...

“We are fully understanding. We open the eyes from the sun in the morning to the sun at night. Distance is nothing withus, unless it be the distance which separateth the wicked from His mercy. Secrets there arenone, but that are buried in the shaddow of man’s sould....Iniquitie shall not range where the fire of his piercing judgment and election doth light.”

Calvin had been dead but twenty years, but with his scheme of election and eternal reprobation Dee had no affinity. His mind was far more in harmony with the ancient hermetic teaching that medicine, healing, was the true road to all philosophy.

CHAPTER VII

THE CRYSTAL GAZERS

“To follow knowledge like a sinking star
Beyond the utmost bound of human thought.”

— Tennyson, *Ulysses*

It is a curious picture to call up, that of the strangely assorted pair seated in the inner room at Mortlake, acting out this spiritual drama. Dee had asked for instructions about the room for the sittings: “May my little farthest chamber serve, if the bed be taken down?” The table, covered with its cloth stood in the centre upon the seals. Kelley, perhaps with the black cap he is credited with having always worn, pulled close over his cropped ears, was seated at it. Dee at his desk sat writing in the great folio book. He was now fifty-six years old; his beard was long, but perhaps not yet “as white as milk,” as Aubrey describes it. He did not apparently ever see the visions himself. Once he reproachfully said, “You know I cannot see or skry.” He conversed with the spirits and sometimes heard what they said; but to the eye and ear of his body they were invisible; hence his dependence upon a skryer.

The sole object of his ambition was the attainment of legitimate wisdom. When conversing with the angels, how near within his grasp it seemed! Michael’s exposition seemed almost to promise it to him: —

“‘Wilt thou have witt and wisdom? Here it is.’

“Michael points each time to a figure of seven squares shown within a circle of light.

“‘The exaltation and government of princes is in my hand.

“‘In counsayle and Nobilitie, I prevayle.

“‘The Gayne and Trade of Merchandise is in my hand. Lo! here it is.

“‘The Qualitie of the Earth and Waters is my knowledge, and I know them. And here it is.

“‘The motion of the Ayre and those that move in it, are all known to me. Lo! here they are.

“‘I signifie wisdom. In fire is my government. I was in the beginning and shall be to the end.

“‘Mark these mysteries. For this knowne, the state of the whole earth is knowne, and all that is thereon. Mighty is God, yea, mighty is he who hath composed for ever. Give diligent eye. Be wise, merry and pleasant in the Lord.’“

Quite early in the actions, it was told them that a third person was necessary to the complete work. Adrian Gilbert was the first selected, and permission was given for him to be made “privie of the mysteries, but not to be a practiser.”

Gilbert was making ready for a voyage to the North-West. Dee and the spirits seem to think it may be a kind of missionary enterprise, and Dee asks for (but does

not actually obtain) a geographical description of the country he is going to. The answer is that Dee knows about it, as indeed he did, sufficiently well, as we have seen, to draw very good charts of North America and the Frozen Seas. An angel named Me tells him he must counsel A.G. and be his father. "Who made the sun of nothing? Who set Nature to thrust up her shoulder amongst trees and herbs like a gentle fire? How great is his power in those in whom he kindleth a soul of understanding."

In Dee's absence in London, at the Muscovy House, on Maundy Thursday (March 28), Kelley tried to summon Medicina again, but was only visited by an "illuder." Next day Dee asks for "the veritie of his doings," and is told that darkness has presumed to put itself in place of light. Kelley will not be overthrown, but he is to brag not. "When I yoked your feathers together, I joined them not for a while." The illuder is made to confess deception and is consumed by fire, and Dee turns to his skryer with "Master Kelley, is your doubt of the spirit taken away?"

Dee had been requested to prepare a calculation for the reformation of the Calendar, or at any rate to give his opinion on the scheme propounded by Pope Gregory. His calculations were approved by all the English mathematicians of the time, but the Queen, advised by the bishops, did not see her way to adopt them in effect. Dee tells his angel friends how "grieved" he is that "Her Majestie will not reform the Kalendar in the best terms of veritie." He desires counsel what to do.

Easter Day passed, and the crystal gazing still went on. The sittings were often long. On April 3, Dee ventured to tell his visitor that "it will be dark soon, and our company will expect our coming down to supper. If without offence we might now leave off, it might seem good to do so." Three days after, he again offered a slight remonstrance, asking why they had not been warned of Mistress Frances Howard's coming, a gentlewoman of Her Majestie's Privy Chamber. She had caused interruption of their exercise for a full hour, or two. Was this to be forgiven her because of her great charity, and goodness in procuring the Queen's alms for many needy people?

The Queen was then at Richmond, and Dee was several times at Court. He seems to have been there to bid her adieu when she left for Greenwich on the 18th: — "At her going on horseback, being new up, she called for me, by Mr. Rawly his putting her in mynde, and she sayd, 'quod defertur non aufertur,' and gave me her right hande to kisse."

Dee was now puzzling over some mysterious papers brought him by Kelley, whether those he is reported to have found in Wales of Glastonbury we can scarcely decide, but they seem to concern ten places in England where treasure was supposed to be hid. There is a curious drawing of them in the MS. diary: "After coming from the Court, I thought I would try to discover the ciphers of the paper E.K. brought me as willed to do, found at Huets Cross, with a book of magic and alchemy, to which a spiritual creature led them." Dee was by no means the easy dupe of Kelley that he has been called. Two or three months after he first knew him he writes in his diary of his "abominable lyes"; and he here makes a very telling remark, an aside, so to speak: "Of this K., I doubt yet."

Kelley's hot, uncontrollable nature and his overbearing ways had already begun to appear. There was an outbreak at supper one night because Charles Sled had "done him an injurie in speeche at my table." Probably some story of his early

career had been raked up. A voice next morning says to him appropriately: "Serve God and take hold of nettles."

The manuscript in crabbed signs puzzled the astrologer desperately, and he was unhappy at the delay. An angel tells him they are to be "rocks in faith." "While sorrow be measured thou shalt bind up thy fardell." He is not to seek to know the mysteries till the very hour he is called. "Can you bow to Nature and not honour the workman?"

A new spirit visits them, Il, "a merie creature, apparelled like a Vyce in a [morality] play. He skipped here and there." Dee asks where is his Arabic book of tables that he has lent and lost. Il says it is in Scotland and is nothing worth. Then Dee asks about the Lord Treasurer's books, for he had not seen Burleigh's library, and had all the rival collector's jealousy over his own treasures. He was never quite sure that Burleigh was his friend; there seemed always a suspicion in his mind where the Lord Treasurer was concerned. The feeling was reflected in a curious dream that he had soon after the beginning of his partnership with Kelley: "I dreamed on Saturday night that I was deade, and afterwards my bowels wer taken out. I walked and talked with divers, and among other with the Lord Thresorer, who was cum to my howse to burn my bookes when I was dead. I thought he looked sourely on me." Now, Il tells him that Burleigh has no books "belonging to Soyga," and explains that name as in "the language of Paradise, before Babel's aery tower." Dee takes up a lexicon to look for the word, but Il points to another book on "the mysteries of Greek, Latin and Hebrew." Then Il becomes very practical, and says: "Your chimney will speak against you anon," and Dee remembers that he had hidden there "in a cap-case" the records of his doings with Saul and the others. Il advises Kelley to communicate to his employer the book and the powder, and all the rest of the roll. "True friends are not to hide anything each from the other."

This was perhaps the cause of the "great and eager pangs" that now took place between Dee and Kelley. The medium pretends to fear they are dealing with evil spirits. He bursts into a passion, declares he is a cumber to the house, and dwells there as in a prison. He had better be far away in the open country, where he can walk abroad, and not be troubled with slanderous tongues. He is wasting his time there, and must follow some study whereby he may live. As for these spirit mysteries, Adam and Enoch knew them before the Flood. Dee responds gravely to this tirade: He will wait God's time, and he will not believe a stone will be given them and no bread. As to Kelley's necessities, are not his own far greater? At the present moment, he owes 300 pounds, and does not know how to pay it. He has spent forty years, and travelled thousands of miles, in incredible forcing of his wit in study, to learn, or bowel out, some good thing, yet he would willingly go up and down England in a blanket, begging his bread, for a year or more, if at the end he might be sure of attaining to godly wisdom, whereby to do God service for His glory. He was resolved either willingly to leave this world, to enjoy the fountain of all wisdom, or to pass his days on earth in the enjoyment of its blessings and mysteries.

Another violent scene occurred before long; this time the mistress of the house was the one offended. Dee says: "By A[drian] G[ilbert] and Providence, E.K.'s vehement passions were pacified. He came back again to my house, and my wife was willing and quiet in mind and friendly to E.K. in word and countenance. A new pacification in all parts confirmed and all upon the confidence of God his service faithfully performed." Kelley's wife had not yet joined him at Mortlake, but

he had occasional letters from her. One found him in a tender religious mood, about to “pray in his bedchamber, on a little prayer book which Mr. Adrian Gilbert had left here, ad it lay on the table during the action.” It was Seven Sobbes of a Sorrowful Soul for Sinne, in English metre, “made by Mr. William Harris.” When he opened it, he found some automatic script in the end, or, as he calls it, a counterfeit of his own hand. He took it to Dee, who saw in it the work of a wicked spirit trying to shake their confidence. The next evening, both prayed against their enemy, Kelley on his knees before the green chair standing at the chimney. Uriel appeared and said temptation was requisite. “If it were not, how should men know God to be merciful?” He speaks to Kelley: — “Thou, O yongling, but old sinner, why dost thou suffer thy blindness to increase? Why not yield thy Limbs to the service and fulfilling of an eternal veritie? Pluck up thy heart, and follow the way that leadeth to the knowledge of the end.” He explains how the trouble is caused by Belmagel, “the firebrand who hath followed thy soul from the beginning.”

The whole of this spring, the pair of partners had been busily engaged in preparing the various things — the table, the wax seals, the ring and lamin — required for use. Most complicated diagrams of letters and figures had also been dictated to them, and Kelley, whose mathematical training had been slight, was sometimes very exhausted. Once fire shoots out of the crystal into his eyes, and when it is taken back, he can read no more. As Dee remarks one day to a spirit, apologising for his many questions: “For my parte I could finde it in my heart to contynue whole days and nights in this manner of doing, even tyll my body should be ready to synk down for weariness before I could give over, but I feare I have caused weariness to my friends here.” A journey is foretold, but first of all Kelley is to go to the places of hidden treasure, and bring earth, that it may be tested. He may be away ten days. He bought a “pretty dun mare” for the journey, of “good man “Penticost,” for which he paid three pounds ready money in angels. A day or two after, he took boat to London to buy a saddle, bridle, and “boote-hose.”

At supper the night before he started, in a clairvoyant state, he had an extraordinary prophetic sight of the execution of Mary Queen of Scots, a beautiful woman having her head cut off by a tall black man. He also speaks of seeing the sea, covered with many ships. Uriel warns them that foreign Powers are providing ships “against the welfare of England, which shall shortly be put in practice.” It is hardly necessary to remind the reader that the Queen of Scots’ execution and the defeat of the Spanish Armada took place in two following years, 1587, 1588, four years after this vision.

CHAPTER VIII

MADIMI

“Therefore for spirits I am so far from denying their existence that I could easily believe that not only whole countries but particular persons have their tutelary and guardian angels. It is not a new opinion, but an old one of Pythagoras and Plato. There is no heresy in it, and if not manifestly defined in Scripture, yet it is an opinion of good and wholesome use in the cours and actions of a man’s life, and would serve as an hypothesis to solve many doubts whereof common philosophy affordeth no solution.”

Dee's costly apparatus and experiments, his large establishment and generous treatment of his servants and assistants, his entertainment of great folk, were all heavy drains upon his resources. He spent lavish amounts upon books and manuscripts for his library; he contributed as able to some of the Adventurers' funds. He borrowed freely, and he had sometimes to run long bills. Beside the rent of the two livings (about eighty pounds a year) he had no fixed income. The Queen was ever promising him benefices which either never fell vacant, or when they did, had to be bestowed elsewhere. At the time he first fell in with Kelley, he knew not where to turn for money. Almost at this very moment, however, a rich patron appeared unexpectedly on the horizon and changed Dee's outlook for several years.

On March 18, 1583, Mr. North came to Mortlake bringing a "salutation" from Albert or Adelbert Laski, Count Palatine of Siradia, a Polish Prince then about to arrive on a visit to the Queen. He wished to make Dee's acquaintance, to see his library, and discuss magic, of which he had made a study. Laski was one of the most powerful of the Polish nobles reconverted to Catholicism. He had taken a very prominent part in the patriotic movement of a few years before in Poland, when almost every European sovereign had made a bid for the Polish crown. Elizabeth's old suitor, the Duc d'Alencon, had actually worn it a month or two before escaping in the night to his brother of France. Laski was a dashing adventurer of heroic courage, quite unscrupulous as to cost; and although he had favoured the claims of the Emperor of Austria, he had, openly at least, agreed in the people's victorious choice of Stephan Bathory. When that Transylvanian Prince had been elected King in 1576, Laski had taken a prominent part in affairs. He was popular and ambitious, not without aspiration towards the Polish crown himself. Burleigh, in writing of him to Hatton, called him "a personage of great estimation, few in the Empire of the greatest exceed him in sovereignty and power." He is described by contemporary writers as a most learned man, handsome in stature and lineaments, richly clothed, "of very comely and decent apparel," and of graceful behaviour. He wore his beard very long, not clipped close like the English courtiers. He arrived in London by Harwich on May Day, and proceeded to Winchester House, Southwark, where he made his headquarters during his stay. There seemed some doubt about how he was to be received, whether he was actually in favour or in disgrace with King Stephan. Burleigh desired Hatton to get some Essex nobleman — Lord Rich or Lord Darcy — to meet him at Harwich with proper state, "if he is the very Count Palatine of the House of Laski." Hatton replied that he must wait to hear more from Leicester, for in his letter to the Queen the visitor has called her "the refuge of the disconsolate and afflicted," so perhaps he is out of favour after all.

Dee first saw Laski on May 13, at half-past seven in the evening, in the Earl of Leicester's apartments at the Court at Greenwich, when he was introduced by Leicester himself.

Five days after the first meeting, Laski "came to me at Mortlake withonly two men. He cam at afternone and tarryed supper, and [till] after sone set." Near a month elapsed before his next visit, when he made a sort of royal progress down the Thames from Oxford to Mortlake.

“June 15 about 5 of the clock, came the Polonian Prince, Lord Albert Lasky, down from Bissham, where he had lodged the night before, being returned from Oxford, whither he had gone of purpose to see the university, where he was very honorably used and entertained. He had in his company Lord Russell, Sir Philip Sydney and other gentlemen: he was rowed by the Queene’s men, he had the barge covered with the Queene’s cloth, the Queene’s trumpeters, etc. He came of purpose to do me honor, for which God be praised!”

The visit was repeated on the 19th, when the distinguished foreigner was hospitably entertained for the night. The Queen was then at Greenwich, but on July 30 she and her court proceeded in great splendour up the river to Sion House. She passed by Dee’s door, and probably paused as usual for a greeting. Next morning Leicester rode over to Mortlake, and put the household in commotion by announcing that Lasky and others would come to dine at Mortlake on the next day but one. These festivities were a great tax on the astrologer’s means, and he confessed sincerely that he was “not able to prepare them a convenient dinner, unless I should sell some of my plate or some of my pewter for it. Whereupon her Majestie sent unto me very royally, within one hour after, forty angels of gold [20 pounds] from Sion, whither her Majestie was now come from Greenwich.” Leicester’s secretary, Mr. Lloyd, was despatched post-haste with the gift, prompted, as Dee adds, “through the Earle his speech to the Queene.” One imagine Leicester’s somewhat peremptory suggestion and the Queen’s impulsive acquiescence. In minor matters she was woman enough to relish being sometimes dictated to. The secretary also brought what was hardly less acceptable to Dee, viz., “Mr. Rawligh his letter unto me of her Majestie’s good disposition unto me.” Raleigh was then in great favour with the Queen.

In the intervals between these visits of the Prince, the spirits had been consulted about Lasky’s prospects. They had at once interested themselves in him, and Madimi, one of the most fascinating of these psychical projections, had vouchsafed some kind of genealogical information, connecting him with the Lacys and Richard, Duke of York. She was the first of the female angels who appeared to Dee, as it seemed in answer to his arguments reproving Trithemius, who had asserted that no good spirits ever took the shape of women. Madimi, who suddenly appeared on May 28, was “like a pretty girle of 7 or 9 years, attired in a gown of Sey, changeable green and red, with a train”; her hair was “rowled up before and hanging down very long behind.” She came into the study and played by herself; “she seemed to go in and out behind my books;...the books seemed to give place sufficiently, one heap with the other, while she passed between them.” She announced that her elder sister would come presently, and corrected Dee’s pronunciation of her name. “My sister is not so short as you make her: Esemeli not Esemeli.” Madimi was a very clever and accomplished little fairy. She learned Greek, Arabic, and Syrian on purpose to be useful to Dee. On June 14 Dee asked the spirit Galvah, or Finis, what she had to say about the “Polandish Lord Albertus Lasky.” The reply came, “Ask me these things to-morrow.” But when the next day came, Kelley, the seer, “spent all that afternoon (almost) in angling, when I was very desirous to have had his company and helping hand in this action.” So at the next sitting Galvah administers to Kelley a sharply pointed reproof: “You, sir, were best to hunt and fish after Verity.” Dee adds that “she spake so to E.K. because he spent

too much time in Fishing and Angling.” Then he asked if Laski should return to Poland in August, if his relation with the Prince should bring him credit, and how should he “use himself therein to God’s liking, his country’s honour, and his own credit.” Galvah replied oracularly: “He shall want no direction in anything he desireth.” “Whom God hath armed, no man can prevaile against.” Again, on June 19, Dee asked if it would be best for the Prince to take the first opportunity of going homeward.

“It shall be answered soon,” replied Galvah.

“May he be present at the action?”

“Those that are of this house are not to be denied the Banquets therein.”

“May I request you to cause some sensible apparition to appear to him, to comfort him and establish his minde more abundantly in the godly intent of God his service?”

“If he follow us, let him be governed by us. But whatsoever is of flesh is not of us.”

“You perceive how he understandeth of the Lord Treasurer his grudge against him. And perhaps some others also are of like malicious nature. What danger may follow hereof, or encombrance?”

“The sum of his life is already appointed; one jot cannot be diminished. But he that is Almighty can augment at his pleasure. Let him rejoice in poverty, be sorry for his enemies, and do the works of justice.”

Then the “cloud of invisibility” — a drop scene between the acts — came over Galvah, and she disappeared.

Next day Laski was present at the action. An angel named Jubanladec appeared, and said he was appointed the Prince’s “good governour or Angel,” “the keeper and defender of this man present.” He bade him “look to the steps of his youth, measure the length of his body, live better and see himself inwardly.” Excellent advice, which might have been continued had not a man named Tanfield, attached to the Prince, arrived suddenly at Mortlake, with a message from the Court, and, contrary to all good manners, burst into the study. Laski had gone out another way through the oratory to meet him. The angel was annoyed, and prophesied rather unkindly that in five months the rash interrupter should be devoured by fishes of the sea. Was he drowned then or ever? Then the thread was resumed.

“What do ye seek after? Do ye hunt after the swiftness of the winds? Or are you imagining a form unto the coulds? Or go ye forth to hear the braying of an Asse, which passeth away with the swiftness of the air? Seek for true wisdom, for it beholdeth the highest and appeareth unto the lowest.”

Then Laski’s guardian angel becomes extremely practical and interesting: “Cecil hateth him [Laski] to the heart, and desireth he were gone hence. Many others do privily sting at him.”

Dee endeavours to keep him to the point.

“For his return, what is your advice? Perhaps he wanteth necessary provision, and money.”

“He shall be helpen, perhaps miraculously. Let him go so soon as he can conveniently.”

“I say again, perhaps he wanteth money; but the Treasures of the Lord are not sent to them whom he favoureth.”

“His help shall be strange. The Queen loveth him faithfully and hath fallen out with Cecil about him. Leicester flattereth him. His doings are looked into narrowly. But I alwayes inwardly direct him. I will minister such comfort to him as shall be necessary in the midst of all his doings.”

Mingled with these sayings were some propheticall utterances about Laski overcoming the Saracens and Paynims with a bloody cross shown in his hand, and about Dee’s passing to his country and aiding him to establish his kingdom. Then the familiar spirit sank through the table like a spark of fire, “seeming to make haste to his charge, I mean the Lord Laski.”

On Wednesday, the 26th, Laski again being present, the good angel Il appeared with a besom in his hand. The Prince’s pedigree was then barely begun, but on June 29 the clever little Madimi promised to finish the book exactly as Dee would have written it. It was no matter where the book was left, she told him, locked up or lying about. “Your locks are no hindrance to us.”

“You have eased my heart of a thousand pound weight,” ejaculated Dee, fervently. “Now I shall have leisure to follow my sute, and to do all Mr. Gilbert’s businesse.”

Madimi was much too learned a scholar for Kelley, who on this same day grew very angry with her for speaking to him in Greek, of which he knew nothing, not even the alphabet. As an alternative she gave him Arabic. “Unless you speak some language which I understand, I will expresse no more of this Gibberish,” he said, rudely.

Poor Dee! His skryer was a constant anxiety to him. Like every medium since known, he would sometimes apply himself and sometimes not, was often honest and yet frequently a cheat.

Dee writes: —

“My heart did throb oftentimes this day, and I thought E.K. did intend to absent himself from me, and now upon this warning, I was confirmed, and more assured that it was so. Whereupon seeing him make such haste to ride to Islington, I asked him why he so hasted to ride thither. And I said if it were to ride to Mr. harry Lee, I would go thither also, to be acquainted with him; seeing now I had so good leisure, being eased of the book writing [through Madimi’s good offices]. Then he said that one told him the other day that the Duke did but flatter him, and told him other things, both against the Duke and me. I answered for the Duke and myself, and also said that if the forty pound annuity which Mr. Lee did offer him was the chief cause of his mind feeling that way (contrary to some of his former promises to me), that then I would assure him of fifty pounds yearly, and would do my best by following of my sute [with the Queen] to bring it to passe as soon as possibly I could, and thereupon did make him promise upon the Bible. Then E.K. again, upon the same Bible, did swear unto me constant friendship and never to

forsake me: And moreover said that unless this had so faln out, he would have gone beyond the Seas, taking ship at Newcastle, within eight days next. And so we did plight our faith to one another, taking each other by the hands upon these points of brotherly and friendly fidelity during life, which Covenant I beseech God to turn to his honour, glorie and service, and the comfort of our brethren (his children) here on earth.”

This reconciliation was not for long, in spite of the promised salary, and soon another scene occurred. On June 5 Dee write that from nine in the morning Kelley was “in a marvellous great disquietness of mind, fury and rage,” because his brother Thomas Kelley brought him word, first, that a commission was out to attach and apprehend him as a felon for coining money; second, that his wife, whom he had left at Mistress Freeman’s house at Blockley, having heard from Mr. Hussey that he was a cosener, had gone home to her mother, Mrs. Cooper, at Chipping Norton. Dee is “touched with a great pang of compassion,” grieved that any Christian should use such speeches and be of so revenging a mind, even more than he is distressed that his own credit shall be endangered for embracing the company of such a disorderly person, especially if he be arreseted at Mortlake, “which will be no small grief and disgrace.” But he so generously resolves to stand by his friend. Kelley, it seems, had been met coming from Islington with his scroll, book and powder, and had been threatened to “be pulled in pieces” if he brought them to Dee. A drawing in the margin of the MS. shows the book to have had a cross on the cover, one clasp, and deep metal bands across its two sides. Presumably these were some of the treasures reported to have been found at Glastonbury.

A day or two after, June 18, Kelley again simulated great fear and distress at seeing evil spirits. He protested he would skry no more, and was so excited that he brought on himself the wise rebuke from Galvah: “He that is angry cannot see well.” He seems to have wished to show Laski some reprobate spirits in Dee’s study, but the older man wisely kept the crystal and teh “table of communion” under his own control. It was, perhaps, partly cunning that made Kelley, although he really possessed extraordinary mediumistic powers, so sceptical. “I am Thomas Didymus,” he says to the spirits. “How can ye persuade me ye are no deluders?”

Three days after this, Dee was writing letters to Adrian Gilbert, in Devonshire, when Madimi suddenly appeared to Kelley, who was seated in the green chair.

Dee said, “How is the mind of Mr. Secretary toward me? Methinketh it is alienated marvellously.”

Dee had long been on neighbourly terms with Sir Francis and Lady Walsingham. If any cause existed for supposing both Burleigh’s and Walsingham’s attitude toward him was changed, it may have been that the Lord Treasurer, the great finanacier of the time, resented his constant applications for a salary from the exchequer, while Walsingham, with his intimate knowledge of foreign affairs, perhaps misdoubted this intimacy between Dee and the scheming Polish Prince. Curiously enough, it was through this very intimacy with Laski that both Burleigh and Walsingham came later to regard the alchemists in the light of a valuable national asset.

Madimi replied —

"The Lord Treasurer and he are joyned together, and they hate thee. I heard them when they both said, thou wouldst go mad shortly. Whatever they can do against thee, assure thyself of. They will shortly lay a bait for thee, but eschew them."

D. — "Lord have mercy upon me, what bait, I beseech you, and by whom?"

M. — "They have determined to search thy house, but they stay untill the Duke be gone."

D. — "What would they search it for?"

M. — "They hate the Duke, both, unto death."

Then with a sharp caution to Kelley to deal uprightly with Dee, and a protestation from him of his "faithful mind" to his master, she goes on to reveal the suspicions attached to Laski: —

M. — "Look unto the kind of people about the Duke in the manner of their diligence."

D. — "What mean you by that? His own people? Or who?"

M. — "The espies."

D. — "Which be those?"

M. — "All. There is not one true."

D. — "You mean the Englishmen."

M. — "You are very grosse if you understand not my sayings."

D. — "Lord! what is thy counsel to prevent all?"

M. — "The speech is general. The wicked shall not prevail."

D. — "But will they enter to search my house or no?"

M. — "Immediately after the Duke his going, they will."

D. — "To what intent? What do they hope to find?"

M. — "They suspect the Duke is inwardly a traitor."

Dee replies with sincerity, "They can by no means charge me, no not so much as with a traitorous thought."

M. — "Though thy thoughts be good, they cannot comprehend the doings of the wicked. In summe, they hate thee. Trust them not. They shall go about shortly to offer thee friendship. But be thou a worm in a heap of straw."

D. — "I pray you expound that parable."

M. — "A heap of straw being never so great, is no weight upon a worm. Notwithstanding every straw hindereth the worm's passage. See them and be not seen of them; dost thou understand it?"

It now seemed certain that Dee and his skryer were to embark their fortunes with Laski. Dee begs for particular instructions when they had better take ship, what shall be done with all the furniture prepared and standing in the chamber of practice? Is it best for the Pole to resort hither oft, or to stay quiet at his house in London?

Madimi retorts —

"Thou hast no faith. He is your friend greatly and intendeth to do much for you. He is prepared to do thee good, and thou art prepared to do him service. Those

who are not faithful shall die a most miserable death, and shall drink of sleep everlasting.”

A couple of days after, on July 4, Dee returning from Court, found Kelley making preparation to go away for five days, having fixed to meet some companions in Mortlake, others in Brentford. Doubtless he found all this mystical and angelic society somewhat of a bore, and was yearning for an outburst a little more to his taste. Dee, who had seen Laski in London, knew that he intended to come down to Mortlake within a day or two, “who also,” he says, “delighted in E.K. his company.” So he wrote a short note in very polite Latin to the “Nobilissimi Princeps,” bidding him put off his visit, as “our Edward” was about to take a journey, and would not be home for five days, or so he says: “Quid sit ipsa veritas.”

He showed Kelley the letter. Kelley took great offence at these words, suspecting some secret understanding between the two against him. Dee gently referred to Kelley’s own words that his return might be within, or at the end of, five days. Kelley, angry and suspicious, seized the letter and tore it up.

Soon after, Kelley beholds “a spiritual creature” by his right shoulder, telling him to go clean away, for if he stays there he will be hanged. If he goes with the Prince, he will cut off his head, and (to Dee)

“You mean not to keep promise with me. And therefore if I might have a thousand pound to tarry, yea, a kingdom, I cannot. Therefore I release you of your promise of 50 pounds yearly stipend to me, and you need not doubt but God will defend you and prosper you, and can of the very stones raise up children unto Abraham. And again, I cannot abide my wife, I love her not, nay, I abhor her, and here in the house I am misliked because I favour her no better.”

Dee endeavoured to calm this turbulent young man, spoke of his confidence in him in his dealings with their spiritual friends, but such doings and sayings as these, he points out, are not meet and fitting.

Kelley flung out of the room in a passion, mounted his mare, and rode off furiously towards Brentford, clattering out of the house with such commotion that Jane came running up to her husband’s study to know what was the matter. It was about seven o’clock in the evening.

“‘Jane,’ I said, ‘this man is marvellously out of quiet against his wife, for her friends their bitter reports against him behind his back, and her silence thereat, etc. He is gone,’ said I, ‘but I beseech the Almighty God to guide him and defend him from danger and shame. I doubt not but God will be merciful to him, and bring him at length to such order as he shall be a faithful servant unto God.’”

Then a remarkable thing happened. By ten o’clock that night (the long midsummer twilight barely over), the prodigal returned, and mounted softly up the study stairs, “unbooted, for he was come in a boat from Brentford. When I saw him, I was very glad inwardly. But I remained writing of those records as I had yet to write, of last Tuesday’s action.

“‘I have lent my mare,’ he said, ‘and so am returned.’

“‘It is well done,’ said I.

"Thereupon he sate down in the chair by my table where he was wont to sit. He took up in his hand the books which I had brought from London, of the Lord Laskie, written to him in his commendations." Evidently books sent to Kelley by way of compliment.

Almost immediately, Madimi, who seemed to have a special wardship over books, appeared. She patted the parchment cover of one and would have taken it out of Kelley's hand. Dee heard the strokes, he says. He took a paper and, greeting his visitor, noted the conversation.

D. — "Mistresse Madimi, you are welcome in God for good, as I hope. What is the cause of your coming now?"

M. — "To see how you do."

D. — I know you see me often, but I see you onely by faith and imagination."

M. (who is always more personal than the other spirits) —

"That sight is perfecter than his," pointing to Kelley.

D. (with emotion) — "O Madimi, shall I have any more of these grievous pangs?"

M. (oracularly) — "Curst wives and great Devils are sore companions."

D. — "In respect of the Lord Treasurer, Mr. Secretary and Mr. Rawly, I pray you, what worldly comfort is there to be looked for? Besides that I do principally put my trust in God."

M. — "Madder will staine, wicked men will offend, and are easie to be offended."

D. — "And being offended, will do wickedly, to the persecution of them that mean simply."

M. — "Or else they were not to be called wicked."

D. — "As concerning Alb. Laski, his pedigree, you said your sister would tell all."

M. — "I told you more than all your Dog painters and Cat painters can do."

Kelley interrupts Dee's questions about Laski's pedigree and parentage, impatiently, with

K. — "Will you, Madimi, lend me a hundred pounds for a fortnight?"

M. — "I have swept all my money out of doors."

D. — As for money, we shall have that which is necessary when God seeth time."

Then Madimi, becoming serious, addresses to Kelley a beautiful exposition of the unity of all things: "Love is the spirit of God uniting and knitting things together in a laudable proportion." She turns sharply to him, with

"What dost thou hunt after? Speak, man, what doest thou hunt after?...Thou lovest not God. Lo, behold, thou breakest his commandments: thy bragging words are confounded...If thou hast none of these [faith, hope, love] thou hast hate. Dost thou love Silver and Gold? The one is a Thief; the other is a Murderer. Wilt thou seek honour? So did Cain. But thou hast a just God that

loveth thee, just and virtuous men that delight in thee. Therefore be thou virtuous.”

Next follows a remarkable scene. Madimi summons Barma and his fourteen evil companions, who have assumed possession of Kelley, with the words “Venite Tenebrae fugite spirito meo,” and orders them to return to the Prince of Darkness: “Depart unto the last cry. Go you thither....The hand of the Lord is like a strong oak. When it falleth it cutteth in sunder many bushes. The light of His eyes shall expel darkness.”

Kelley sees the whole crew sink down through the floor of the chamber: “A thing like a wind came and pluckt them by the feet away.” He professes his deliverance: “Methinketh I am lighter than I was, and I seem to be empty and to be returned from a great amazing. For this fortnight, I do not well remember what I have done or said.”

“Thou art eased of a great burden. Love God. Love thy friends. Love thy wife.”

And with this parting injunction, and a psalm of thanksgiving from Dee, the story of Kelley’s wild attack of temper, or as it was regarded in the sixteenth century, his possession, for the present ends. Nor is there any record of further dealings with spirits for more than two months.

CHAPTER IX

A FOREIGN JOURNEY

“Friends are everywhere to him that behave himself well, and a prophet is not esteemed in his country.”

— Robert Burton

There is a hiatus in the *Liber Mysteriorum* after this tempestuous scene with Kelley. We can, however, slightly fill it up from Dee’s other diary. It seems as if the skryer went away, leaving behind at Mortlake the poor slighted wife, who must have joined him there, for Dee notes on July 7 payment of wages to a servant he dismissed, “in the presens of Goodman Hilton and Mistress Kelley in my study.”

On the 30th, as we have seen, the Queen came in grand procession, heralded with music and song, down the river to Sion. The next day, Leicester’s secretary brought letters and gifts. On August 1, John Halton, a London minister, called; also a Worcestershire man, “a wicked spy came to my howse, whom I used as an honest man, and found nothing wrong, as I thought. He was sent to E.K.”

This entry is characteristic of the philosopher who, in spite of all his learning, was, as regards men, of so confiding and innocent a nature that he ended by being infinitely more deceived by another Worcestershire man — Kelley, for whom he entertained to the last a most faithful friendship.

Then we come on a very entertaining remark in the diary: “Aug. 18. A great tempest of wynde at midnight. Maxima era E. K. cum uxore ejus.” Kelley had

returned, and his wife was treated to another of his outbreaks, by comparison with which the gale outside was slight.

This is the last entry in the diary before Dee's departure for Poland with Laski.

The Prince proposed to take the whole party from Mortlake back with him to the Continent. He was reputed to be deeply in debt, and seems to have entertained wild hopes that they, aided by the spirits, would provide him with gold, and secure to him the crown of Poland. Kelley foresaw an easy and luxurious life, plenty of change and variety suited to his restless, impetuous nature. He hadn't as yet been out of England. There were very obvious reasons that he should quit the country now if he would escape a prison. Dee had been a great traveller, as we know, and these were not the attractions to a man of his years. He went in obedience to a supposed call, in the hope of furthering his own knowledge and the Prince's good. The notion of providing for himself and his family lay doubtless at the back of his mind also, but he had all a genius's disregard for thrift and economy, and though very precise and practical about small details, as his diary proves, his mind refused to contemplate these larger considerations of ways and means.

He disposed of the house at Mortlake to his brother-in-law, Nicholas Fromond, but in such a loose and casual way that before his return he found himself compelled to make a new agreement with him. He took no steps about appointing a receiver of the rents of his two livings, and when he came back the whole six years were owing, nor did he ever obtain the money. He says he intended at the most to be absent one year and eight months. It was more than six years before he again set foot in England.

So, unprepared, he left Mortlake about three in the afternoon of Saturday, September 21, 1583. He met the Prince by appointment on the river, and travelled up after dark to London. A certain secrecy was observed about the journey. Laski, as we have seen, was under some suspicion of Walsingham and Burleigh, whose business it had become to learn news from every Court in Europe. He was suspected of plots against the King of Poland.

In the dead of night, Dee and Laski went by wherries to Greenwich, "to my friend Goodman Fern, the Potter, his house, where we refreshed ourselves." Probably a man whom Dee had employed to make retorts and other vessels for his chemical work. Perhaps they met there the rest of the party, but on the whole it seems more probable that all started together from Mortlake. The exit of such a company from the riverside house must have been quite an event. At Gravesend, a "great Tylte-boat" rowed up to Fern's house, on the quay, and took them out to the two vessels arranged to convey them abroad. These ships, which Dee had hired, were lying seven or eight miles down stream — a Danish double fly-boat, in which Laski, Dee, Kelley, Mrs. Dee and Mrs. Kelley and the three children, Arthur, Katherine and Rowland Dee, embarked at sunrise on Sunday morning; and a boyer, "a pretty ship," which conveyed the Prince's men, some servants of Dee, and a couple of horses. They sailed at once, but the wind coming from N.W., they anchored on the Spits. The fly-boat dragged her anchor, and the wind suddenly changing to N.E., they were in danger of grounding. However, next morning they made Queenborough Haven, and landed in small fishing boats. On the landing, the boat in which the party were seated was nearly upset. Water came in up to their knees, an oar was lost, and they were in considerable peril, but Kelley seems to have risen to the occasion by baling water out of the bottom with a great gauntlet. Dee

thinks he saved their lives. Dee, poor man, was dropped from the captain's back on landing into ooze and mud, so that he was "foule arrayed" on reaching "Queenborough town, up the crooked creek." "God be praised for ever that all that danger was ended with so small grief or hurt," is his cheerful comment.

After three nights ashore, they again embarked, and at daybreak on the 27th sailed out into the Channel. On the 29th they landed at Brill. Here Laski's guardian angel, Jubanladec, seems to have granted them an interview. They only paused for two or three days, and hurried on, travelling forward each day by the sluggish Dutch canals, having exchanged their vessel for a hoy of Amsterdam at Rotterdam. They passed through Tergowd and Haarlem to Amsterdam; here they stayed three days, and Dee despatched Edmond Hilton with his heavy goods by sea to Dantzic. By Enkhuisen they sailed up the Zuyder Zee to Harlingen, then took the canals again in little "scuts," or small boats, to Leewarden, thence to Dokkum, in West Friesland, in some still smaller craft. On the Sunday spent at Dokkum, Gabriel appeared in the crystal, and delivered to them the most searching and exalted code of ideals for the conduct of their lives. Everything was laid bare before his relentless and unerring eyes. They were bidden to live in brotherly charity, the imperfections of each to be by the other "perfectly shadowed in charity."

"Bear your own infirmities, and so the infirmities of others, with quiet and hidden minde...The Cross of Christ is the comparison in mildness over thy brethren...He that forsaketh the world for the love of God in Christ shall have his reward, but he that forsaketh himself shall be crowned with a diadem of glory. Bridle the flesh. Riotousness is the sleep of death and the slumber to destruction. Feed the soul, but bridle the flesh, for it is insolent. Look to your servants. Make them clean. Let your friendship be for the service of God. All friendship else is vain and of no account. Persevere to the end. Many men begin, but few end. He that leaveth off is a damned soul."

From Dokkum the travellers put out to sea again, beyond the islands, and sailed up the Western Ems to Embden. They arrived after dusk, and found the city gates shut, so they lay all night on shipboard. Next morning, the 18th October, Laski took up his quarters at "The White Swan," on the quay, for he was to remain there to see the Landgrave, and obtain money. The others "lay at 'The Three Golden Keys,' by the English House," and left early next morning by a small boat to sail up the river Ems to Leer, and thence by a little tributary to Stickhuysen and Apen — "a very simple village," and so on to Oldenburg. A night there, and then on by Delmenhorst to Bremen, where they lodged at "an old widow, her house, at the signe of the Crown."

Here Il, the jaunty spirit who was like a Vice in a morality play, again appeared to them, clad in a white satin jerkin, ragged below the girdle. The curtain lifted, and his first words were theatrically light.

"Room for a player! Jesus! who would have thought I should have met you here?"

D. (solemnly). — "By the mercies of God we are here. And by your will and propriety and the power of God, you are here."

Il. "Tush, doubt not of me, for I am Il."

Kelley (with rebuke). — "My thinketh that the gravity of this action requireth a more grave gesture, and more grave speeches."

Il. — "If I must bear with thee for speaking foolishly, which art but flesh and speakest of thy own wisdom, how much more oughtest thou to be contented with my gesture, which is appointed of Him which regardeth not the outward form, but the fulfilling of His will and the keeping of His commandments, etc., etc."

Kelley. — "I do not understand your words. I do only repeat your sayings."

Il. — "It is the part of a servant to do his duty, of him that watcheth to look that he seeth...Do that which is appointed, for he that doeth more is not a true servant."

Il turns from Kelley to Dee. "Sir, here is money, but I have it very hardly. Bear with me, for I can help thee with no more. Come on, Andras; where are you, Andras?" he calls.

Andras, in a bare and shabby gown, "like a London 'prentice," appears, but empty-handed.

Il. — "This is one of those that forgetteth his businesse so soon as it is told him."

Andras. — "Sir, I went half-way."

Il. — "And how then? Speak on. Speak on."

Andras. — "Then, being somewhat weary, I stayed, the rather because I met my friends. The third day, I came thither, but I found them not at home. His family told me he had gone forth."

Il. — "And you returned a coxcomb. Well, thus it is. I placed thee above my servants, and did what I could to promote thee. But I am rewarded with loytring and have brought up an idle person. Go thy way, the officer shall deliver thee to prison, and there thou shalt be rewarded. For such as do that they are commanded deserve freedom; but unto those that loytre and are idle, vengeance and hunger belongeth."

Then Dee questions Il about Laski, and whether he is having any success in his efforts to obtain money, about Laski's brother-in-law, Vincent Seve, whose errand in England is not yet completed, and whether they shall all arrive safe at Cracow, or the place appointed.

Kelley has a sight of Master Vincent in a black satin doublet, "cut with cross cuts," a ruff and a long cloak, edged with black or blue. Then Il goes off into a mystical rhapsody, at the end of which he suddenly falls "all in pieces as small as ashes."

Next day, Kelley sees Master Vincent again, walking down by Charing Cross, accompanied by "a tall man with a cutberd, a sword and skie-coloured cloack." He passes on towards Westminster and overtakes a gentleman on horseback with five followers in short cape-cloaks and long moustaches. The rider is a lean-visaged man in a short cloak and with a gold rapier. His horse wears a velvet foot cloth. (It sounds like a vision of Raleigh.)

They are merry. Vincent laughs heartily and shows two broad front teeth. He has a little stick in his crooked fingers. The scar on his left hand is plainly seen. He has very high straight close boots. They arrive at Westminster Church (the Abbey). Many people are coming out. A number of boats lie in the river, and in the gardens at Whitehall a man is grafting fruit trees. The lean-visaged man on horseback

alights, and goes down towards, and up, the steps of Westminster Hall, Vincent with him. His companion walks outside and accosts a waterman. The waterman asks if that is the Polish bishop? The servant wants to know what business it is of his. A messenger comes down the steps of the Hall and says to Vincent's man that his master shall be despatched to-morrow. The servant saith he is glad of it. "Then all that shew is vanished away."

There are one or two allusions here to an emissary from Denmark who has brought a bag of amber. Il also says he has much business in Denmark. Frederick, the King of Denmark, was in frequent correspondence with Queen Elizabeth at this time.

At Bremen, where they stayed a week, Dee says that Kelley, when skrying by himself, was given a kind of rambling prophetic verse of thirty-two lines, which he prints, foretelling the downfall of England, Spain, France and Poland. In fact, a general debacle of nations. It is very bad prophecy and still worse poetry, but evidently inspired by the highly diplomatic foreign relations of Elizabeth and her two ministers.

On leaving Bremen, the party travelled by Osterholz to Harburg, on the left bank of the Elbe. They crossed the river and went on by coach to Hamburg. Laski had then rejoined them, but stayed behind in Hamburg, at "the English house," probably the consul's. Dee and the rest reached Lubeck on November 7.

CHAPTER X

PROMISES AND VISIONS

"Search while thou wilt; and let thy reason go
To ransom truth, e'en to th'abyss below;
Rally the scattered causes; and that line
Which nature twists be able to untwine.
It is thy Maker's will; for unto none
But unto reason can He e'er be known."

— Sir Thomas Browne

The dealings which Kelley had in Lubeck with the spirits seem to throw a light on all his relations with Dee. Kelley is gaining confidence; he sees that he is already able to dupe his employer considerably. He has only to manipulate the conversations a little to show up often his so-called sincerity. He can pretend he is aghast at Il's levity, and he seems to have been cunning enough when the spirits very often blamed him.

Buthis dreams of advancement in wealth and fame were no nearer accomplishment. He had seen through Dee's ambition. It was very different from his own, but he thought he could use it to his own advantage. Dee was now flattered without stint.

So at the sitting in November 15 he sees eleven noblemen in rich sables. One, wearing a regal cap trimmed with sable, is seated on a chair beset with precious stones. "He is a goodlier man than the Lord A.L." He addresses Dee with glittering promises. He is the King or the Emperor, and is represented in the margin of the diary by a crown. He says to Dee: —

“Pluck up thy heart and be merry, pine not thy Soul away with inward groanings, for I will open unto thee the secrets of Nature and the riches of the world, and withal give thee such direction that shall deliver thee from many infirmities both of body and mind, ease thee of they tedious labours and settle thee where thou shalt have comfort.

“Thanks be given unto the Highest now and ever.

“Why doest thou [hesitate] within thy thought? Hast thou not need of comfort?”

“Yes, God knows, for I am half confounded.”

“Then first determine within thyself to rest thee for this winter. Secondly, open thy mind to desire such things as may advance thy credit and enrich thy family, reap unto thee many friends and lift thee up to honour. For I will stir up the mindes of learned men, the profoundest in the world, that they shall visit thee. And I will disclose unto you such things as shall be wonderful and of exceeding profit. Moreover I will put to my hands and help your proceedings, that the world may talk of your wisdom hereafter. Therefore wander not farther into unknown places: contagious, the very seats of death for thee and thy children and such as are thy friends. If thou enquire of me where and how, I answer, everywhere, or how thou wilt. Thou shalt forthwith become rich, and thou shalt be able to enrich kings and help such as are needy. Wast thou not born to use the commodity of this world? were not all things made for man’s use?”

Here are the old dreams of the philosopher’s stone, the elixir of life, the transmutation of metals and all the works of alchemy, for which both these travellers were adventuring their lives in a foreign land. Dee does not seem exactly dazzled by these allurements. He only begs leave to ask questions, and seeks to keep the speaker to the point. “Are they to stay there and not to go on with Laski? Where are they to spend the winter?”

“Where you will,” comes the answer. “Are you so unwise as to go with him now? Let him go before, and provide for himself and the better for you. In the Summer, when it is more fair, you can follow. The weather now will be hard and the travel unfit for children. Heap not up thy wife’s sorrow.”

“I desire to live in quiet that my spirit may the better attend to the service of God.”

“Well, you are contented?”

Dee asks again, are they to part from Laski? Will it not be prejudicial to their arrangement, they having entered into a kind of covenant with him? “Are you not content?” the visitor repeats.

Then he did impart some remarkable information to Dee, in which there was certainly a grain of telepathically conveyed truth.

“Your brother is clapped up in prison. How like you that? Your house-keeper I mean.”

This evidently refers to Nicholas Fromond.

“They examine him. They say that thou hast hid divers secret things. As for thy books, thou mayst go look at them at leisure. It may be that thy house may be burnt for a remembrance of thee, too. Well, if they do, so it is. I have given thee my counsel, and desired to do thee good. The choice is thine.”

There is no evidence that Fromond was imprisoned, but he was a poor protector of his brother-in-law’s valuable effects. He was powerless against a mob who broke into Dee’s house not long after his departure from Mortlake, made havoc of his priceless books and instruments, and wrought irreparable damage. It was not nearly two months since Dee had left Mortlake, and, moving from place to place, it was unlikely that he had heard any news from thence. No date has ever been assigned to this action of the mob. It is quite conceivable that it actually took place on this day, November 15, and that by Kelley’s clairvoyant or telepathic power the news was communicated across the sea and continent to Dee.

The poor astrologer was torn with doubts and misgivings. He fell upon his knees, uttering a piercing supplication to the “Author of all truth and direction of such as put their trust in him.”

“I most humbly beseech thee consider these promises thus to me propounded. If they be true and from thee, confirm them. If they be illusions and not from thee, disprove them. For hardly in my judgment they do or can agree with our former precepts and order taken by thee.”

And again, in an agony:

“O Lord, I doubt of these promises of ease, wealth, and honour: I suspect the whole apparition of the eleven to be an illusion. O confirm my judgment or disprove it.”

So he seeks for a revelation of guidance, writes letters to Laski, and waits. Soon he perceives these temptations to have come from “a very foolish devil.” He decides that they will continue to throw in their lot with Laski, who rejoined them in Lubeck. He left again to visit the Duke of Mecklenburg, they meanwhile going by Wismar to Rostock and Stettin, which place they reached at ten o’clock on Christmas morning. Laski joined them in a fortnight. They passed on by Stayard to Posen, where Dee adds an antiquarian note that the cathedral church was founded in 1025, and that the tomb of Wenceslaus, the Christian king, is of one huge stone. It was here that Dee began to enter curious notes about Kelley in the *Liber Peregrinationis*, written in Greek characters, but the words are Latin words, or more frequently English. The supposition is that Kelley was unacquainted even with the Greek alphabet. Dee kept his other foreign diary, written in an *Ephemerides Coelestium* (printed in Venice, 1582), secret from his partner, for Kelley had obtained possession of an earlier one kept in England and had written in it unfavourable comments, as well as erased things, about himself. Dee had the last word, and has added above Kelley’s “shameful lye,” “This is Mr. Talbot’s, his own writing in my booke, very unduely as he came by it.” The various diaries sound, perhaps, confusing to the reader, but are really quite simple. By the private diary is meant the scraps in the Bodleian Almanacs, edited by Halliwell for the Camden

Society, in which he seldom alludes to psychic affairs. The Book of Mysteries is the diary in which he relates all the history of the crystal gazing. The printed version (True Relation) begins with Laski's visit to Mortlake on May 28, 1583.

Winter had now set in with unwonted rigour, and one is amazed at the celerity with which this great caravanserai of people and goods pushed on from place to place. From Stettin to Posen, for instance, is more than 200 miles, and it was accomplished within four days and apparently with only one stop. Then southwards into the watery district between the Oder and the Warthe, where the country was so icebound that they had to employ five-and-twenty men to cut the ice for their coaches for a distance as long as two English miles. On February 3 they reached Lask, on the Prince's own property, and at last were comfortably housed in the Provost's "fair house by the Church." Here Dee was ill with ague, but the table was set up, and a new spirit called Nalvage appeared in the globe. Nalvage's "pysiognomy was like the picture of King Edward the Sixth. His hair hangeth down a quarter of the length of the cap, somewhat curling, yellow." Dee, of course, had seen the young King when he presented his books, so this is a first-hand reminiscence. Nalvage stood upon a round table of mother-of-pearl, and revealed to them many cabalistic mysteries, tables of letters and names. There was a terrible vision of Mrs. Dee lying dead, with her face all battered in, and of the maid Mary being pulled out of a pool of water half drowned. But it seems to portend no more than did another piece of ill news conveyed at the same time: "Sir Harry Sidney died upon Wednesday last. A privy enemy of yours." Dee says, "I ever took him for one of my chief friends," and adds, with unconscious humour:

"Note. At Prague, Aug. 24, I understood that Sir H. Sidney was not dead in February nor March, no, not in May last. Therefore this must be considered. Doctor Hagek, his son, told me."

This note makes us realise for a moment how slowly news travelled from England to the Continent in this year of grace 1584.

The informant, Madimi, "a little wench in white," told Dee that she had been in England at his house, and all there were well. The Queen said she was sorry she had lost her philosopher. But the Lord Treasurer answered, "He will come home shortly a begging to you." "Truly," adds Madimi, "none can turn the Queen's heart from you." Then, recurring to Mortlake, she says: "I could not come into your study. The Queen hath caused it to be sealed." This no doubt after the breaking in of the rioters. Dee was counselled to go and live at Cracow. He would like to be led step by step, and begs to know what house "is in God's determination for me and mine." Madimi answers, "As wise as I am, I cannot yet tell what to say." Dee demurs to the expense, and reproaches her for not telling them sooner. Needless cost would have been saved, and he does not know if Laski will have enough money for yet another move. He had rather Kesmark had been redeemed before Laski went to Cracow. Perhaps then his credit with the people would be greater.

Laski had heavily mortgaged his estates in Poland; he was in debt, and he had apparently raised a loan on his Kesmark property for a large sum of money. The bond was to expire on St. George's Day, April 23 next, and without the Emperor's help Dee did not see how it could be met. Kelley recurs to the Danish treasure he had found in England, hidden in ten places, which they would fain have

transported to Poland now, very speedily, for Laski's use. Dee is anxious to know from Madimi whether his rents are being duly received in England by his deputy or not, "whether Her Majesty or the Council do intend to send for me again or no." They ask instructions from Gabriel about Kelley's red powder, and how they shall use it. Dee seeks for information about the Prince's wife, whom they have not yet seen, but they doubt she is not their sound friend. He begs for medicine for his ague. And again, shall he take the pedestal, being made in Lask for the holy table, on to Cracow when they go, "rather than make a new one there, both to save time and to have our doings the more secret"? This pedestal was for the crystal to rest in upon the table. Three iron hasps and padlocks were also made at Lask for the table. If any answer to these questions was vouchsafed by the spirits, it was in the usual enigmas.

Part of Dee's baggage, a chest left at Toon on their way out, not having arrived, they did not immediately obey the injunction to move on to Cracow, but after about five weeks in Lask, they again journeyed forward.

CHAPTER XI

CRACOW

"Sir, to a wise man all the world's his soil:
It is not Italy, nor France, nor Europe
That must bound me if my fates call me forth.
Yet, I protest it is no salt desire
Of seeing countries, shifting a religion;
Nor any disaffection to the State
Where I was bred, and unto which I owe
My dearest plots, hath brought me out: much less
That idle, antique, stale, grey-headed project
Of knowing men's minds and manners."

— Jonson, Volpone, or The Fox

At the close of the sixteenth century, Cracow was at the height of its fame and prosperity. It was still the capital of Poland, and the residence of her kings, as well as the seat of the university founded two hundred years before by Casimir the Great. The Gothic cathedral erected under the same king, the burial place of Polish monarchs, was already adorned with sculptures and bronzes, the work of Renaissance artists from Florence and Siena. The visitor of today will find himself surrounded by churches and other buildings dating from the twelfth, fourteenth, and sixteenth centuries. Amid the ramparts of the Austrian fortress can still be traced here and there the older fortifications.

The city lies in the centre of a vast plain, almost at the confluence of two rivers, the Vistula and Rudowa. Across this plain from the north-west the travellers came, and reached Cracow in the afternoon of March 13, 1584.

"We were lodged in the suburbs by the church, where we remained a seven night, and then we (I and my wife) removed to the house in St. Stephen Street, which I had hired for a year for 80 gylvers of 30 groschen. And Master Edward Kelley came to us on Friday in the Easter week by the new Gregorian Kalendar,

being the 27 day of March by the old Kalendar, but the sixth day of April by the new Kalendar, Easter Day being the first day of April in Poland, by the new Gregorian institution.”

From the time of arriving in Poland Dee is careful to enter the dates in both old and new styles. The New Style was then extremely new, it having been introduced by Pope Gregory XIII. only a couple of years before, and universally adopted by all Roman Catholic countries. England, in all the fervour of her recently established Protestantism, would have none of it, but still desired not to lag behind in needful reforms. Dee, as already stated, had been commissioned before he left England to make calculations by which the calendar could be suitably adopted in this country. The Roman Church had assumed the chronology adopted by the Council of Nice to be strictly correct. But Dee desired to ascertain the actual position of the earth in relation to the sun at the birth of Christ, as a basis on which to rectify the calendar. The result of his calculations would have omitted eleven instead of ten days.

Dee's book (which was never printed, but remains in manuscript among the Ashmolean MSS.) was entitled “A Playne discourse and humble advise for our gracious Queene Elizabeth, her most Excellent Majestie, to peruse and consider as concerning the needful Reformation of the Vulgar Kalendar for the civile yeres and daies accompting or verifying, according to the tyme truely spent.” It was finished and delivered to Burleigh on February 26, 1583. To him it was inscribed with these rather playful verses: —

“Το οτι, and Το διοτι
I shew the thing and reason why,
At large, in briefe, in middle wise
I humbly give a playne advise;
For want of tyme, the tyme untrew
If I have must, command anew
Your honour may, so shall you see
That love of truth doth govern me.”

Burleigh proposed that skilful men in science, as Mr. Digges, be called from the universities to peruse the work and confer. But the Council of State consulted Archbishop Grindal and three of the bishops who recommended the rejection of Dee's scheme, chiefly on the ground that it emanated from Rome, and so their opposition delayed this desirable public reform in England for 170 years. Dee agreed to grant the ten days for the sake of conformity with the rest of the world, if his calculation that eleven were strictly accurate was publicly announced. It will be remembered that in 1742, when the change was made, eleven days were omitted from the calendar.

The household at Cracow now consisted of Mrs. Dee, Arthur, Katherine, Rowland and his nurse, and the maid Mary, Mrs. Kelley and her husband, a servant named John Crocker and a boy. It was augmented before long.

The actions with the spirits soon recommenced. Kelley began very unfairly by trying sittings alone, for he was importunate to know how the Prince was going

to treat them as regards money. But he seems only to have drawn reproof and much excellent counsel on himself from Nalvage.

The next few weeks were taken up with instructions from Gabriel and Nalvage, consisting of letters, numbers and words in a strange Eastern or angelic language, to which Dee probably had some key, though they appear unintelligible. The partners were bidden to keep the Sabbath, and Dee resolves to go always to church. Kelley seems to have turned restive once again. On April 17 he declared he would sit no more to receive these A.B.C. messages unless they were better explained. "There is your boy, John," he said; "he can well enough give you these simple signs. You need me no longer. I will be gone." As Casaubon remarks, "he was ever and anon upon projects to break with Dee."

Two days after, Dee heard him come upstairs to his own study, and called him in. Dee's study was an inner room through one that opened on to the stairs, at the foot of which was a door. He explained that he had now a distinct clue to the meaning of the tables of letters on which he had long been puzzling; dwelt on how essential it was to miss not a single letter, or else the words would err. He asked him, in fact, to resume his skrying, and encouraged him by saying that he knew he "would come to like better this due and methodical manner of our friends' proceeding," if only he would continue. Kelley scornfully replied that their teachers were mere deluders, and no good or sufficient teachers. In two years they had not made them able to understand, or do anything. "In two years," he said boastingly, "I could have learned all the seven liberal arts and sciences, if I had first learned Logick." He protested he would have no more to do with the spirits in any manner or way, wished himself in England, and vowed if the books were his he would burn them all. "These spiritual creatures are not bound to me. Take John for your skryer."

Dee pathetically recapitulated his long desire for wisdom, his faith that more knowledge will be granted him. Kelley went out leaving Dee buried in prayer.

In two days, Kelley was again submissive to the spirits, who bade him not mistrust. "Let him that is a servant and is commanded to go, go. And let not the earth rise up and strive against the plowman." So they go on again with their cabalistic letters and signs. In the beginning of May, Dee notes: "E.K. is very well persuaded of these actions now, thanked be the Highest."

Later in the month he says: "There happened a great storm or temptation to E.K. of doubting and mistaking our instructors and their doings, and of contemning and condemning anything that I knew or could do. I bare all things patiently for God his sake." Kelley at the same time says: "I am contented to see and to make true report of what they will show, but my heart standeth against them."

That night after the sitting, he again swore he would not go on skrying. The morning after, Dee knocked at his study door, and bade him come, for Nalvage had left off the previous day in the middle of an interesting geographical lesson about unknown parts of the earth, and had told them to be ready to continue it next morning. Kelley was obdurate, and Dee retired to prayer. In half an hour, the skryer burst in with a volume of Cornelius Agrippa's in his hand, where he said all the countries they were told about yesterday were described and written down. "What is the use," he said, "in going on with this farce, if they tell us nothing new?" Dee replied that he was glad to see Kelley had such a book of his own; that Nalvage in giving those ninety-one new names of countries, all of seven letters, was answering

his particular request; that he had verified the lands in the charts of Gerardus Mercator and Pomponius Mela, which he had at hand and produced, "and now," he said triumphantly, "we know exactly what angels govern which countries, in case we are ever called to practise there." Nalvage had described the natives of the countries and the products, suggesting that in Greenland a vein of gold might be found. "Your wilful phantasie," Dee ended to Kelley, "perverts your reason; and whereas you find fault with our instructors, I, who much more narrowly peruse their words, know that they give direct answers to my questions, except indeed when you misreport them, or I make a mistake in hearing or writing." So three days were lost, as Dee bemoans in the margin, and then Kelley was again induced to resume his skrying.

On the 25th, Laski arrived and left again for Kesmark. He now intended to redeem his property there. But King Stephan and his Chancellor were both set against him, and he wished Dee to go with him to the Emperor of Austria, Rudolph II.

Instructions were now given that they must be ready to go with Laski to the Emperor, must make themselves apt and meet, for until no remembrance of wickedness is left among them they cannot forward the Lord's expeditions. Gabriel tells Kelley at some length of his many faults. Dee did not hear this, but considerably does not ask for a repetition of the catalogue. He only bids Kelley listen well. Gabriel says if any will be God's minister, he must sweep his house clean, without spot. He must not let his life be a scandal to the will of the Lord.

"God finds thee, as he passes by in his Angel, fit in matter, but, my brother, God knows, far unfit in life. O consider the Dignity of thy creation. See how God beareth with thy infirmity fromtime to time. Consider how thou art now at a Turning where there lieth two wayes. One shall be to thy comfort, the other to perpetual woe."

Gabriel's dart, like a flame of fire, is upright in his hand. He pleads with Kelley in such adorable gentleness and with such tender and ecstatic weeping, that both his hearers cannot withhold their tears. Gabriel's words so moved Kelley that he professed absolute repentance for all his dealings with wicked spirits, vowed he would burn whatsoever he has of their trash and experiments, and write a book setting forth their horrible untruth, and blasphemous doctrine against Christ and the Holy Ghost. It is curious that among the other errors he renounced was the Eastern doctrine that a fixed number of souls and bodies have always been in the world, and that a man's soul goes from one body to another, viz., into the new-born child. In the light of after-events, it is significant that another belief abjured is that to the chosen there is no sin.

Dee was overjoyed, and full of thanksgiving. He believed utterly in Kelley's conversion, all the more because of his former lapses. If anything were wanting to prove it, it was to be found in the humble and patient spirit in which this impracticable, volcanic skryer of his now sat on patiently for two hours and a half before the stone without either cloud, veil, or voice appearing. This to Kelley was "no light pang." Nay, he argues that servants must wait as long as their Master pleases, and the time is better spent than in any human doings. He opens his wayward heart to Dee, the man without guile, and avows that he had fully intended at his last outburst, ten days before, to have gone away secretly with those with whom he had so long dealt had they not threatened him with beggary — a thing,

adds Dee, that he most hated and feared. Therefore, till this time he had been a hypocrite. Now, in his new-found elation, he cares not for poverty; life eternal is more than riches and wealth. He that can be hired with money to forsake the devil is no Christian. He will doubt no more, but believe. Dee adds that he omits many others of his godly sayings, thinking these sufficient to write down. He had no suspicion of any ill faith. His love for Kelley was truly unbounded in its long-suffering. He offered a fervent thanksgiving for the conversion, and for Satan's defeat, and prayed for them both for "continual zeal, love of truth, purity of life, charitable humility and constant patience to the end."

The same atmosphere continued next day, June 11. Kelley protests he could sit for seven years awaiting a vision. They do wait nearly four hours. Evidently Kelley converted is not going to be so good a medium as Kelley unregenerate. Dee explains the non-appearance as retribution for the three days wasted before. But they are all rather depressed, especially the Prince.

Then a vision appears of the castle of Grono, in Littau, where the King of Poland then was. Stephan's arms are seen over the gate. A man like an Italian is beheld, carrying an iron chest within which are an image in black wax, a dead hand, and so on. The promise is that Laski shall be King of Poland.

Early next morning Kelley, lying awake in bed, had a vision which he or Dee afterwards embodied in the curious diagram facing [?].

It may be taken as a sample of the kind of intricate complications of theurgy which often absorbed the pair for days together.

The vision was expounded by Ave, something in the following manner: —

A VISION.

East and West, North and South, stand four sumptuous and belligerent Castles, out of which sound Trumpets thrice. From every Castle, a Cloth, the sign of Majesty, is cast. In the East it is red, like new-smitten blood. In the South, lily-white. In the West, green, garlick-bladed like the skins of many dragons. In the North, hair-coloured, black like bilberry juice. Four trumpeters issue from the Castles, with trumpets pyramidal, of six cones, wreathed. Three Ensign bearers, with the names of God on their banners, follow them. Seniors, Kings, Princes as train bearers, Angels in four phalanxes like crosses, all in their order, march to the central Court, and range themselves about the ensigns.

IT VANISHETH.

The dazzling, shifting formation seems to proceed in a glorious pageant of colour, and then to rest, frozen into a minutely exact phantasticon of harmony.

Now for the meaning of the allegory. The Castles are Watch towers provided against the Devil, the Watchman in each is a mighty angel. The ensigns publish the redemption of mankind. The Angels of the Aires, which come out of the Crosses, are to subvert whole countries, without armies, in this war waged against the Powers of Darkness.

Many weeks were taken up with tables of letters for the games, angels, seniors, etc.

Kelley is again sometimes very much tempted to doubt the good faith of the angelic visitants, more especially as he sadly fears that good angels will not provide them with the needful money that the Prince requires for the success of his cause. One day, Dee wrote in his diary: "E.K. had the Megrom sore." Kelley read this, and "A great temptation fell on E.K., upon E.K. taking these words to be a scoff, which were words of compassion and friendship." After this Dee resorts more frequently to the use of his Greek characters.

The Dees were still living near the church of St. Stephen, where Kelley was a frequent visitor. Laski lodged with the Franciscans in their convent. The revelations were now of tables of letters again, intended, Dee things, that they may learn the names of angels and distinguish the bad from the good. (The bad angels' names are said to be all of three letters.) He hopes Ave is about to reveal the healing medicines; the property of fire; the knowledge, finding, and use of metals; the virtues of stones, and the understanding of arts mechanical. But Ave says it is the wicked spirits who give money coined, although there are good angels who can find metals, gather them and use them. Then Madimi appears, after a long absence, and addressing Dee as "my gentle brother," tells him that Ave is a good creature and they might have made more of him. She wants to know why they have not gone to the Emperor Rudolph. The old excuse of poverty is pleaded.

That evening, June 26, at seven o'clock, Dee sat in his study considering the day's action, when Kelley entered and asked if he understood it. He, it seems, had burst out again, had raged and abused Michael and Gabriel, called Ave a devil, made "horrible speeches." There had been a most terrible storm of thunder and rain, and Kelley always appeared sensitive to these electric disturbances. Now he is penitent once more, acknowledges his words were "not decent," and begs forgiveness of God and Dee. The talk lasted long, and several calls to supper were unheeded; then, just as they were leaving the room, Kelley felt something warm and heavy on his shoulder, and behold! it was Ave come to acknowledge his repentance. Dee hands him his Psalter book, and with three prayers devoutly said, all is smooth again, and they go down to supper.

Dee's patience and humility seemed unending. In conversing with the spirits he is always, as it were, face to face with God. His replies are made direct to the Majesty of the Divine. When Kelley is blamed he assumes equal blame.

Ave. — "Which of you have sought the Lord for the Lord his sake?"

D. — "That God can judge. We vaunt nothing of our doings, nor challenge anything by the perfection of our doings. We challenge nothing, Lord, upon any merits, but fly unto thy mercy, and that we crave and call for. Curiosity is far from our intents."

CHAPTER XII

FROM CRACOW TO PRAGUE

"Since all men from their birth employ sense prior to intellect, and are necessarily first conversant with sensible things: some, proceeding no farther, pass through life considering these as first and last; and apprehending what is painful to be evil, what is pleasant good, they deem it sufficient to shun the one and pursue

the other. Some pretending to greater reason than the rest, esteem this wisdom; like earth-bound birds, though they have wings they are unable to fly. The secret souls of others would recall them from pleasure to worthier pursuits, but they cannot soar: they choose the lower way, and strive in vain. Thirdly, there are those — divine men — whose eyes pierce through clouds and darkness to the supernal vision, where they abide as in their own lawful country.”

— Plotinus

All this time, Dee is so absolutely absorbed with his spiritual visions that we know very little about his outer existence. For three years after he left England, he neglected to enter anything in his ordinary diary, and the *Liber Mysticus* contains nothing of everyday affairs.

In this July, 1584, however, at Cracow, he does enter an important piece of information about his boy Rowland, the baby then about a year and a half old.

“1584. Remember that on Saturday the fourteenth day of July by the Gregorian Calendar, and the fourth day of July by the old Calendar, Rowlande my childe (who was born Anno 1583, January 28 by the old calendar) was extreemely sick about noon or mid-day, and by one of the clock was ready to give up the ghost, or rather lay for dead, and his eyes set and sunck in his head.

“I made a vow if the Lord did foresee him to be his true servant, and so would grant him life, and confirm him his health at this danger, and from this danger, I would during my life on Saturdays eat but one meal.”

Although we never find this vow referred to again, there is no doubt that Dee devoutly kept his bargain. Rowland did grow up and had other remarkable escapades.

Still the journey to Prague to the Emperor Rudolph was postponed, and it was not until the first day of August that the trio set off. Dee and Kelley were ready to go sooner, but Laski had not sufficiently recovered his finances. The party had been augmented by the arrival of Kelley's brother, Thomas, and Edmond Hilton, son of Dee's old friend, Goodman Hilton, who had sometimes lent him money, and who in 1579 had requested leave for his two sons to resort to Dee's house. Thomas Kelley accompanied the Prince and his pair of crystal gazers. The women were left behind under Edmond Hilton's charge.

Five or six days after arriving in Prague, on the day of the Assumption of the Blessed Virgin Mary, August 15, Dee was settled in the house of Dr. Hageck, by Bethlem in Old Prague (Altstadt), kindly lent him for his use. The house was not far from the old Rathhaus, the great clock tower of which, dated 1474, and the Council Chamber, still exist. It was also near the Carolinum or University, founded by Charles IV. in 1383, in whose hall John Huss a hundred and fifty years before had held his disputations. When Dee and his party arrived in the city Tycho Brahe was still alive, though not yet a resident in Prague. Prague was the city of alchemists. The sombre, melancholy Emporer himself relieved his more seriuous studies by experiments in alchemics and physics. A mania for collecting rare and valuable objects provided him with a still lighter pastime. He painted, read much, and worked in iron, was a good linguist, and a regular dilettante. Unmarried, and with

all the weaknesses of the Habsburgs, for nearly thirty years out of his long life and far too protracted reign he was quite mad. Not many years after his reception of Dee he ceased to make any pretence of public appearance.

The excellent little study or “stove” (from “stube,” German for study) in Dr. Hageck’s house had been since 1518 the abode of some student of alchemy, skilful of the holy stone. The name of the alchemist, “Simon,” was written up in letters of gold and silver in several places in the room. Dee’s eyes also fell daily on many cabalistic hieroglyphs, as well as on drawings or carvings of birds, fishes, flowers, fruits, leaves and six vessels, all the work, he presumed, of Simon baccalaureus Pragensis. Over the door were the lines:

“Immortale Decus par gloriaque illi debentur
Cujus ab ingenio est discolor hic paries,”

and on the south wall of the study was a long quotation from some philosophical work ending with

“Ars nostra est Ludus puero cum labor mulierum. Scitote omnes filii artis hujus, quod nemo potest colligere fructus nostri Elixiris, nisi per introitum nostri lapidis Elementati, et si aliam viam quaerit, viam nunquam intrabit nec attinget. Rubigo est opus, quod sit ex solo auro, dum intraverit in suam humiditatem.”

In these congenial surroundings skrying was at once resumed. Madimi (now grown into a woman) was the first visitor, and Dee hastened to inquire for his wife and child at Cracow. He notes that his first letter from her arrived on the 21st. She joined him before long. He was told to write to the Emperor Rudolph. He did so on August 17, and he relates in the epistle the favourable attention he has received from Charles V. and his brother Ferdinand, Rudolph’s father, the Emperor Maximilian II., who accepted the dedication of his book *Monas Hieroglyphica*, and others of the imperial house. He signs the letter, “Humillimus et fidelissimus clientulus Joannes Dee.”

After waiting a week he sent the letter by Laski’s secretary to the Spanish ambassador, Don Guglielmo de Sancto Clemente, who was to present it to Rudolph. With it he also sent a copy of his *Monas*. The same night he heard by Emerich Sontag, the secretary, that the Emperor had graciously accepted the book, and within three or four days would appoint a time for giving him an audience.

He received letters from England on August 27, which were dated April 15 and 16. His brother-in-law, Nicholas Fromond, told him that Mr. Gilbert, Mr. Sled, and his bookseller had used him very ill. Doubtless he was expecting some money from the sale of his books. Mrs. Dee was much upset at her brother’s defections, and poor Dee was worried all round, for, as he writes in the margin of his diary, “Satan is very busy with E.K. about this time.” Kelley seems to have been making friends with young Simon Hageck, son of “our host,” as Dee calls him. To furnish his own study he has bought a clock of Mrs. Hageck for five ducats, which was so good a bargain that she requested “a quart of wine” (probably a quarter hogshead) thrown in. She herself does not seem to have benefited much by the largess, for Kelley and Laski’s man Alexander proceeded to get drunk on it, and fell to fighting and quarrelling. Dee, who had stayed writing in his study instead of going to supper,

was warned by the city watchman to keep better peace in his house. Looking from his window to account for the caution, he saw Laski's man sitting on a great stone, and called him to come in. When he had heard the tale he went off to Hageck's to "understand the very truth," and there found Kelley lying in a drunken sleep on a form. This was a relief. He was better pleased to think that angry words had been spoken "when wine, not wit, had rule," and persuaded Laski's man to stay in his lodgings that night instead of raging forth into the street. Already a scandal had been made which he foresaw would do him much harm. Next morning Kelley had a madder fit than ever.

"Much ado. Emerich and his brother (Thomas Kelley) and I had to stop or hold him from going on Alexander with his weapon. At length we let him go, in his doublet and hose without a cap or hat on his head, and into the street he hasted with his brother's rapier drawn, and challenged Alexander to fight. But Alexander said 'Nolo, Domine Kelleie, Nolo.' Hereupon E.K. took up a stone and threw after him as after a dog, and so came into the house again in a most furious rage for that he might not fight with Alexander. The rage and fury was so great in words and gestures as might plainly prove that the wicked enemy sought either E.K. his own destroying of himself, or of me, or of his brother. This may suffice to notify the mighty temptation and vehement working of the subtle spiritual enemy, Satan, wherewith God suffered E.K. to be tempted and almost overcome: to my great grief, discomfort, and most great discredit, if it should come to the Emperor's understanding. I was in great doubt how God would take this offence, and devised with myself how I might with honesty be cleared from the shame and danger that might arise if these two should fight. At the least, it would cross all good hope here with the Emperor for a time, till God redressed it."

By this time Dee had become skilled and tactful in dealing with his turbulent squire, and he soon brought him to quietness by yielding to his humour and saying little. At mid-day came Dee's messenger from Cracow, bringing letters from and tidings by word of mouth of his dear wife Jane, "to my great comfort." Much he was in need of comfort, and when a letter from the Emperor arrived the same day, desiring to see him, Kelley's enormities began to assume less desperate proportions.

Dee started at once to the Castle, the Palace of Prague, and waited in the guard-chamber, sending Emericus to the Lord Chamberlain, Octavius Spinola, to announce his coming.

"Spinola came to me very courteously and led me by the skirt of the gown, through the dining chamber to the Privie chamber, where the Emperor sat at a table, with a great chest and standish of silver before him, and my Monads and Letters by him."

Rudolph thanked Dee politely for the book (which was dedicated to his father), adding that it was "too hard for his capacity" to understand; but he encouraged the English philosopher to say on all that was in his mind. Dee recounted his life history at some length, and told how for forty years he had sought, without finding, true wisdom in books and men; how God had sent him His Light, Uriel, who for two years and a half, with other spirits, had taught him, had finished

his books for him, and had brought him a stone of more value than any earthly kingdom. This angelic friend had given him a message to deliver to Rudolph. He was to bid him forsake his sins and turn to the Lord. Dee was to show him the Holy Vision.

“This my commission is from God. I feign nothing, neither am I a hypocrite, an ambitious man, or doting or dreaming in this cause. If I speak otherwise than I have just cause, I forsake my salvation,” said he.

Rudolph was probably very much bored by this mystical rhapsody. He excused himself from seeing the vision at this time, and said he would hear more later. He promised friendship and patronage, and Dee, who says he had told him almost more than he intended of his purposes, “to the intent they might get some root or better stick in his minde,” was fain to take his leave. In a few days he was informed, through the Spanish ambassador, that one Doctor Curtius, of the Privy Council, “a wise, learned, and faithful councillor,” was to be sent to listen to him on the Emperor’s behalf. Uriel, whose head had been bound of late in a black silk mourning scarf because of Kelley’s misdoings, now reappeared in a wheel of fire, and announced favour to Rudolph.

“If he live righteously and follow me truly, I will hold up his house with pillars of hyacinth, and his chambers shall be full of modesty and comfort. I will bring the East wind over him as a Lady of Comfort, and she shall sit upon his castles with Triumph, and she shall sleep with joy.”

To Dee, he says, has been given “the spirit of choice.” Dee petitions that his understanding of that dark saying may be opened: “Dwell thou in me, O Lord, for I am frail and without thee very blind.”

The conference between Dee and Curtius on September 15 lasted for six hours. It took place at the Austrian’s house, whither Dee was permitted, it seems, to take the magic stone and the books of the dealings. Dee in all good faith promised that many excellent things should happen to Rudolph, if only he would listen to the voice of Uriel. Dee’s sincerity, credulous though it appears, was as yet unshaken. He lived in a transcendental atmosphere, and trembled, as he believed, on the brink of a great revelation. The very heavens seemed opening to him, and soon, he thought, he would probe knowledge to its heart.

Kelley, on the other hand, was under no delusion. He had worked the spirit mystery for long enough without profit; already he was beginning to more than suspect that the game was played out; that their dreams of Laski as King of Poland, dispensing wealth and favour to his two helpers, were never to be realised; that the Emperor’s favour would be equally chimerical and vain; and that some more profitable occupation had better be sought. At the back of his mind lay always the hope of the golden secret. Somehow and somewhere this last aspiration of the alchemist must be realised.

At the very time when the two learned doctors were holding their confabulation, Kelley, says Dee, was visited at their lodgings with a wicked spirit who told him that Dee’s companion would use him like a serpent, “compassing his

destruction with both head and taylor; and that our practices would never come to any fruitful end."

This was a true prophecy indeed, but many things were yet to come to pass.

Uriel now instructs Dee to write to the Emperor and tell him that he can make the philosopher's stone: in other words, that he can transmute base metal into gold. In the next breath Uriel foretells that Rudolph shall be succeeded by his brother Ernest, for when he sees and possesses gold (which is the thing he desireth, and those that counsel him do also most desire), he shall perish, and his end shall be terrible. Dee shall be brought safely home to England. Uriel used a curious simile, that Dee "shall ascend the hills as the spiders do." Dee, with his knowledge of many sciences, has never shown himself a naturalist, but he here gives us an interesting scrap of natural history. He writes in the margin: "Perhaps spiders flying in the air, are carried by strings of their own spinning or making, or else I know not how."

Dee's suit with the Emperor did not much progress. His ministers were naturally envious of this foreigner, and many whispers, as well as louder allegations against the two Englishmen, were abroad, although, as San Clemente told him, the Emperor himself was favourable. The Spanish ambassador was friendly enough, and Dee dined several times at his table. He professed to be descended from Raymond Lully, and, of course, like every educated person of the fifteenth and sixteenth centuries, was a believer in the virtues of the philosopher's stone. He bade them not regard the Dutchmen's ill tongues, "who can hardly brook any stranger." Dee wrote again to the Emperor a letter of elaborate compliment and praise of *vestroae sacrae Coesarae Majestatis*, in which he offered to come and show him the philosopher's stone and the magic crystal.

Still nothing came of it, and these needy adventurers in a foreign land began to get into deadly straits. "Now were we all brought to great penury: not able without the Lord Laski's, or some heavenly help, to sustain our state any longer." Dee returned from a dinner at the Spanish ambassador's to find Kelley resolved to throw up the whole business and start for England the next day, going first to Cracow to pick up his wife. If she will not go he must set off without her, but go he will. He will sell his clothes and go to Hamburg, and so to England. It is all very well for the spirits to promise spiritual covenants and blessings; but as Kelley said to Uriel, "When will you give us meat, drink and cloathing?"

At this time the women and children did join the party from Cracow, although Dee does not record it in his diary. But on September 27 Dr. Curtius called to see him at his lodging in Dr. Hageck's house by Bethlem, and he says "saluted my wife and little Katherine, my daughter." Dee laid before him some of the slanders that he knew were going about. He had been called at Clemente's table a bankrupt alchemist, a conjuror and necromantist, who had sold his own goods and given the proceeds to Laski, whom he had beguiled, and now he was going to fawn upon the Emperor. Curtius was at last induced to spread before the Emperor his report of the conference he had held (by command) with Dee. "Rudolph," said Curtius, "thinks the things you have told him almost either incredible or impossible. He wants you to show him the books." Then the talk became the learned gossip of a couple of bookish and erudite scholars. Dee produced some rare editions which the others had never seen. Curtius offered the loan of one of his own works, *De Superficierum Divisionibus*, printed at Pesaro. After this, with mutual courtesies

offered on both parts, “after the manner of the world,” Curtius took his horse, and returned homeward.

Jane Dee was ailing at this time, and Dee was much distressed. Gabriel, when consulted, told him that the true medicine is trust in the God of Hosts and in His Son Christ. “The Lamb of Life is the true medecine of comfort and consolation.” He did, however, condescend to give a remarkable precription for her use, concocted of a pint of wheat, a live pheasant cock, eleven ounces of white amber, and an ounce of red wine, all distilled together. Dee, though no Christian Scientist, was willing enough to administer the strange decoction, but says he knows not where or how to get a cock pheasant. In the spring of the next year, Jane’s fourth child, Michael, was born. He was always rather sickly, and died when nine years old. Theodore, her fifth child, was only thirteen when he too died, but all the six other children grew up.

Curtius and Dee became good friends. The Austrian showed his English acquaintance several of his inventions connected with the quadrant and with astronomical tables, and Dee confided to him the secret of a battering glass he had contrived for taking observations on a dark night. The glass was left at Cracow with his books and other goods, but he would gladly go and fetch it to show the Emperor. This led to Dee’s request for a passport to enable him to travel, with servants, wife and children, where he would in the Emperor’s dominions at any time within a year. He drew it up himself on October 8, 1584, and the Emperor granted it without demur. Dee soon started for Cracow to bring the rest of his goods to Prague, but the diary for the month of November is missing, and the following book opens on December 10, when he had set out from Cracow to return to Prague. “Master Kelley” was with him, John Crocker, and Rowland and his nurse, who had been left behind when Mrs. Dee and the two elder children joined her husband in Prague. As before, more than a week was occupied with the journey, which was made in a coach, with horses bought of “Master Frizer.” In Prague a new lodging was found in a house belonging to two sisters, of whom one was married to Mr. Christopher Christian, the registrar of Old Prague. Dee hired the whole house from him at a rent of 70 “dollars” or thalers a year, to be paid quarterly.

“On Saturday afternoon, January 12, 1585, I removed clean from Doctor Hageck, his house by Bedlem, and came with all my household to the House which I had hired of the two sisters (married) not far from the Market Place in old Prage.”

He announced his return to the Spanish ambassador and to Dr. Curtius, and continued his interviews with “the schoolmaster” daily.

Some of the sittings recorded at this time are really of the nature of school lessons, which to a man of Dee’s acquirements must have seemed rather elementary, yet he humbled himself as a child to learn. One day geographical and ethnographical information is imparted about America, or, as Dee calls it, “Atlantis”; Cathay; the Bactrian desert; and Phalagon, a country of which Dee says he never heard. Another day, minerals and their properties form the subject of the lesson.

Much was said about the doubting, incredulous spirit of Kelley, which Dee always feels is the hindrance to further knowledge. At length he is given permission to choose another skryer if he will: “Take whomsoever thou wilt in

whose face the Lord shall seem to dwell, and place him with this Seer, and let him stand seven times by him. I will take the spirit from him and will give it unto the same that standeth by, and he shall fulfill my word that I have begun.”

But Dee was strangely reluctant to part with Kelley. He loved him like a son, he yearned over his soul, and he entertained more lively hopes than ever of his real conversion, for Kelley had at last consented to partake of the sacrament with his older friend. Dee uttered aloud a solemn prayer: —

“O God, thou hast coupled us two together in thy election, and what the Lord hath joyned, no fleshly fancy of mine shall willingly separate. But if it be thy will, seeing he is so hard to give credit to thy holy messengers, without some proof in work first past, as for example this doctrine of the philosopher’s stone, that so he may come to be allowed, though he imitate Thomas Didymus in his hard and slow belief. And because he is to receive the pledge of thy mercies, and mystery of the heavenly food, we would gladly hear of that holy sacrament some discourse for our better instruction, and his better encouragement to the mystery receiving.”

Then was delivered a remarkable homily expounding Protestant Christian belief upon several points: the Creation, the fall of Adam (because he wanted the beauty and excellency of God’s spirit for which he was created); of the sacrament of Christ’s body, “the holy sign of peace between God and man”; and the mystery and wonder of the rite as shown to the disciples, not, as the wicked do, “tying the power and majesty of God and His omnipotence to the tail or end of reason, to be haled as she will....It is a holy miracle, and thou must believe, as the Disciples did, that thou partakest of the true Body of Christ sub forma panis. But receiving ceasing, the Sacrament ceaseth also.” This in answer to Dee’s interposed question. The Hussite doctrine of the permanence of the sacred element in the common food when blessed was of course much in men’s minds in Prague. So with an injunction to “share this doctrine with your wives,” this exposition ends.

CHAPTER XIII

A DREAM OF GOLD

“Now, Epicure,
Heighten thyself, talk to her all in gold,
Rain her as many showers as Jove did drips
Unto his Danaid, shew the gold a miser
Compared with Mammon. What! the stone will do’t.
She shall feel gold, taste gold, hear gold, sleep gold.”
— Jonson, *The Alchemist*

On February 27, 1585, Dee and Kelley, with Thomas Kelley, rode with great secrecy to Limburg, six miles from Prague, in obedience to Madimi, who however told them on arriving that Rudolph knew of their departure. Dee suspected Laski’s man, Sontag, of treachery. Michael appeared to them there, and instructed Dee to name his new-born child Michael. The infant was baptised by the Court chaplain in Prague Cathedral (which is dedicated to the very unpopular Saint Vitus) on March

18, the Spanish ambassador being godfather and the Lady Dietrichstein, wife of the Emperor's major-domo, godmother.

Kelley was still murmuring under the mystical dealings of the angels. "Let them give me somewhat profitable to my body, or some wisdom to my mind's behoof, and then I will believe in them," he says. Then he protests he will confess all to the priest, and if the holy father does not allow their doings or counsel to be genuine, neither will he.

The remarkable answer that Dee gives again shows us how in advance he was of his times in matters spiritual as well as scientific. "The authority of good angels or messengers from God is greater," says he, "than the authority of the Pope, or priests."

So the weeks went on. Kelley postponed the day of taking the sacrament. At Easter will be a fit time. He will wait till then. He is tired of skrying: "I pray you to deal with another. Here is John, a boy in the house. You may use him." Thus, for the third time, a boy is suggested.

It is a curious piece of psychology, or crystallogmancy, that Kelley, who possessed the mediumistic powers, was always so reluctant to use them, while Dee, who as Madimi told him, had clearer sight than his skryer, was entirely unable to open up communication with the unseen.

Money was scarcer than ever. "My wife being in great perplexity, requested E.K. and me that the annexed petition might be propounded to God and his good angels, to give answer or counsel in the cause." Jane's petition set out simply that they had no provision for meat and drink for their family, that it "would discredit the actions wherewith they are vowed and linked unto the heavenly majesty" to lay the ornaments of their house or coverings of their bodies in pawn to the Jews, and that the city was full of malicious slanders. Aid and direction are implored how or by whom they are to be aided and relieved. The spirits, while reminding her grandiloquently that she is only a woman, full of infirmities, frail in soul, and not fit to enter the synagogue, yet favourably listen, and bid her be faithful and obedient as she is yoked, promising that she and her children shall be cared for. Meanwhile her husband is to gird himself together and hasten to see Laski and King Stephan.

This injunction seems not to have been obeyed for some time, for Dee was now very busy inditing letters to Queen Elizabeth and to other of his friends in England. He was reminded of it later when something went wrong, and another crisis arrived with Kelley. On March 27, a Wednesday, Dee was busy in his study, when the skryer burst in, demanding unceremoniously a copy of a certain magic circle of letters which he professed to have had revealed to him by spirits at Oxford. He wished to show it to a Jesuit priest with whom he had made friends. He protested he would quit the company of the spirits with whom they had recently dealt and return to his former associates — the evil set. Dee said he had no leisure to look for the paper now, he was writing letters of importance, and in a week's time or when able, he would see it was found. This of course was irritating. Kelley stormed and raged, said the old man should not stir his foot from the room till it had been produced, and was about to lock up the door when Dee caught him by the shoulders, "calling aloud to my folks. They came in all, and my wife, and so afterwards by degrees his fury assuaged, and my folks, my wife and his, went away, and after he had sitten two or three hours with me, he saw on my head, as I sat

writing, Michael stand with a sword, who willed him to speak, which he did forbear to do above a quarter of an hour.”

Kelley, like a spoilt child, demanded of Michael if he should have his circle of letters. The angel addressed him then in a passage of exceeding beauty, seeming to scorch and wither the promptings of the skryer’s evil nature, while wrestling at the same time with all the powers of darkness for his soul: —

“O Jehovah, whose look is more terrible to thy angels than all the fires thou hast created,...wilt thou suffer one man to be carried away, to the dishonouring and treading under foot of thee and thy light, of thee and thy truth? Can one man be dearer unto thee than the whole world was? Shall the heavens be thrown headlong down, and he go uncorrected?”

He intimates to the partners that their work and calling is greater than honour, money, pride and jewels. As it is great, so must their temptation be great.

“Therefore God has framed one of you as a stiffe-made Ashe, to bind up the continuance of his work, and to be free from yielding unto Satan.”

As for the other, Michael promises Kelley that no evil spirit shall visibly show himself unto him any more as long as he is in the flesh.

“Whosoever therefore appeareth hereafter is of good.”

Thus begins to yawn before the pair the most dangerous pitfall of all. Pride and confidence in the perfect intuition of God’s will has led many a good and holy man astray. Soon even the stiff-made ash is to arrive at the pitch of believing that their teachers cannot err, and then comes a terrible downfall. Michael in an exquisite little parable bids them cleave fast together. And again it is clear why the elder man, the seeker after hidden knowledge, the pure-minded and gentle-hearted old mathematician and astrologer, though torn in pieces with his partner’s wild outbursts, his notorious cupidity, impatience, and evil living, yearned over him and his rebellious youth as a mother over her child. Like Michael, he seems involved in a prolonged struggle for the rescue of his soul from the demons in whose power he devoutly believed.

“PARABOLA DE NOBIS DUOBUS.

“A wood grew up, and the trees were young, and lo! there arose a great Tempest from the North, and the Seas threw out the air that had subtilly stolen himself into them. And the winds were great. And behold there was one Tree which was older than the rest, and had grown longer than that which shot up by him. This Tree could not be moved with the wind, but the Tree that was young was moved to and from with the wind, and strook himself oftentimes upon the stiff-set tree. The Forrester came and beheld, and said within himself, ‘The force of this wind is great. See this young Tree beateth himself in pieces against the greater. I will go home, and will bring my ground instruments, and will eradicate him, and I will place him farther off. Then if the winds come, he shall have room to move.’

But when he came home, the Lord of the Wood seeing him in a readiness with his Mattock and his spade, asked him of his goings, which told the thing in order unto his Master. But lo! his Master rebuked him, and he said thus: `When the winds are not, they increase, they are not hurtful one to the other. Suffer them therefore. When the young Tree taketh roots, and shall look up unto some years, his roots shall link themselves with and under the roots of the greater. Then, though the winds come, they shall not be hurtful one to another, but shall stand so much the more fast, by how much the more they are wrapped together; yea, when the old tree withereth, he shall be a strength unto him, and shall add unto his age as much as he hath added unto his youth.'

“And he ceased to dig.

“Be not you therefore haled in sunder, neither be you offended one at another. Peradventure Reason would set you aside. But God will not. Behold, if you break the yoke that you are in and runne astray, he that erreth shall perish, even so shall he that standeth also be desolate. Love therefore one another, and comfort one another, for he that comforteth his brother comforteth himself....Let youth yield to ripe years...You have vowed that one of you do nothing without the other's counsel, but you shall not be two counsellors. Let the Doer occupie the superiority. The Seer, let him see and look after the doings of that he seeth, for you are but one body in this work.”

In April, Dee and Kelley returned to Cracow. As they were nearing the city they saw a great whirlwind wreathing up the dust and shooting forward in a southerly direction. They found their house let under them to a “forced-in tenant,” but as Dee had brought his keys, he effected an entrance, and secured at least a bedstead. By the aid of his lawyer, Mr. Tebaldo, “an ancient practitioner in Polish causes,” he obtained a decree against his landlord that without six months' notice he could not be ejected. They took up their abode in the College of Nyepolonize. Laski now joined them in Cracow, and took Dee on May 23 to an audience of King Stephan. Stephan was seated by the south window of his principal audience and banqueting chamber, looking out upon the beautiful new gardens that he was then making. Polite speeches of greeting in Latin passed between the two, but there was scant time for more before the Vice-Chancellor and Chief Secretary, with others, came in, bringing Bills for the King to read and sign. Stephan had small time to spare for visionary alchemists. His very glorious reign was crowded with great achievements. Though a strong Catholic himself, he respected the liberties of his Protestant subjects, won back the Russian provinces for Poland, reformed the universities and established the Jesuits in educational seminaries, and protected the Jews. He died very suddenly about a year after Dee's third interview with him. Dee has the following very valuable note of his death, entered in the diary a few weeks after his arrival at Trebona Castle in 1586: “December 11, Stephan Poloniensis obiit: natus anno 1530, die 13 Januarii, hora quarta mane min 25, in Transylvania. Obiit hora secunda post medium noctem, ut intellexi ex literis Dni Lasky, receptis die 29 per Alexandrum.”

Dee also visited Dr. Hannibal (Annibaldus), the famous divine, and discussed with him his commentaries on Latin authors- -Hermes Trismegistus and Mandellus. He partook of the Communion at the Bernardine convent where the Doctor was a professor. Three times within Easter week did he communicate, “that

in all manner of wayes I might have a clean and quiet conscience.” On “Easter Monday, very devoutly, in St. Stephan’s Church, E.K. received the Communion, to my unspeakable gladness and content, being a thing so long and earnestly required and urged of him by our spiritual good friends.” As Dee wrote to Walsingham, “Saul had become a Paul.”

It was a very short interlude. For Laski had not yet paid him the “money long since due,” and Kelley once more vows he will leave, for the “actions are unsuccessful and are to be cut off.” Laski was again admitted to the sittings, and King Stephan granted them another interview. Laski urged the King to take the two alchemists into his service and give them “a yearly maintenance.” In obedience to his instructors, Dee promises to make the philosopher’s stone, if the King will bear the charge. He does not profess that he can, but he believes the angels will teach him the secret. Stephan was not so sanguine. In the King’s private chamber, a sitting was held, with the crystal set before him, but he remained unconvinced. He gave no encouragement, and in August the pair, hopeless of patronage from Poland, returned to Prague, where Jane and Joan Kelley, the children and the servants, had been left under Edmond Hilton’s care.

An anglicised Italian pervert, Francisco Pucci, now appeared upon the scenes and was admitted to the sittings at the shew-stone. Pucci had been a Lyons merchant, but had “laid aside his trade to study sacred letters,” and become a theological disputant of the current type. Professing himself a Protestant, he came to Oxford to study, graduated M.A. in 1574, and in London, Basle, Antwerp, and other places, became an open and notorious writer and champion against the Church which he had abjured. He had followed Socinus to Cracow, and had noisily opposed the Jesuits there. Soon after he recanted, became a Romish priest and secretary to a cardinal in Rome, where he died in 1606, and was buried in the Church of San Onofrio on the Janiculum.

On his information it appears that three copies of Dee’s manuscripts were burned in Prague, April 10, 1586. These were the Book of Enoch, the Forty-eight Keys of the Angels (*Claves Angelicae*) and the *Liber Scientioe Auxilii et Victoria Terrestris*, works which had been written down from the spirit revelations since the partnership with Kelley had commenced. The books burned were not of course the originals, the two first of which still exist. Of the Book of Enoch there are three copies, one made by Kelley, a remarkable tribute to the mechanical skill in draughtsmanship, the extraordinary application and ability, of this very versatile personage. It contains hundreds of diagrams of figures, round or rectangular in shape, composed of an infinite number of minute squares each containing a letter or figure. These letters occur in every possible combination and order, some reading straight across the page, others diagonally, and so on. Dee gives an extraordinary story of the restoration on April 30 of the books said to have been burned, by a man like a gardener, invisible to himself, to Joan Kelley, and to all in the garden at the time, save Kelley. The gardener placed them under an almond tree in Carpio’s vineyard, on a sloping bank between the banqueting house and the “cliff side.” Trickery of Kelley’s, no doubt.

The feeling against these foreign adventurers grew strong in the city. Sixtus V., who had succeeded as Pope, issued a Papal edict, dated May 29, 1586, banishing Dee and Kelley from Prague within six days. It seemed to trouble them very little, for Dee was already away on a visit to a new patron, William Ursinus, Count

Rosenberg, at his country seat on the Moldau. From thence he went to see some glass works at Volkanau, about twelve miles north of the city; then he proceeded to Leipsic in time for the fair on May 11. There he met Lawrence Overton, an English merchant to whom Jane Dee had given kind attention and hospitality when he had fallen ill in her house a year before. Overton had returned from England, where he had seen Edmond Hilton, sent in November with letters to the Queen, Sir Francis Walsingham, and others. Hilton was expected back shortly. Overton was on the point of returning to England, and by him another letter to the Secretary was despatched.

Dee's letters to Walsingham, with their veiled allusions to secret affairs, form one of the grounds upon which the supposition has been based that he was employed by the Queen's minister as a secret spy and diplomatic agent abroad, and that his cabalistic diagrams contained a cipher. An elaborate theory was constructed to support this contention.

From this letter it is evident that Dee wishes his friends in England to believe that he and his partner have already found the hidden secret, but he wraps his words in due mystery, and it is impossible to say exactly when Kelley first professed to have made, and when he induced his partner to believe that he actually had made, the gold on which his heart was set. That Dee's heart was equally fixed on the discovery is indisputable, but from what a different cause!

"To ye Rt. Hon^{ble}. Sr. Fr. Walsingham Knt, her most excellent Maties.
Principal Secretary my singular good Fr^d. and Patron with speed.

"Right Honorable Sir,

"Albeit I have almost in vain come a hundred miles (from Prague to this Leipsic Mart) hoping either to meet my servant there with answer to my former letters, sent in November last to her Majesty (when also I wrote unto your honour and others). And so with speed from this Leipsick to have sent again most speedily, as occasion should have served. and now I find neither servant neither letter from him, neither word of mouth, yet all this notwithstanding; and whatsoever the hindrance or delay hereof may be (whether the keeping back of my letters from her Majesty, or the manifold and important most weighty affairs public hindring or delaying her Majesty's most gracious discreet and wise resolution herein. Or what other occasion else hath and doth cause this long and wonderful delay of answer receiving); all this notwithstanding, I thought good before I set up my coach to write, and most humbly to salute your honour very faithfully, dutifully and sincerely, with great and the same good will that my Letter some years since written to your Honour (but then a stumbling block unto your Honour and others for the strangeness of the phrases therein) doth pretend. So it is, right Honorable, that the merciful providence of the Highest, declared in his great and abundant graces upon me, and mine, is so wonderful and mighty, that very few, unless they be present witnesses, can believe the same. Therefore how hard they are to be believed there, where all my life and doings were construed to a contrary sense, and processe of death contrived and decreed against the Innocent, who cannot easily judge?

"I am forced to be brief. That which England suspected, was also here, for these two years almost, secretly in doubt, in question, in consultation, Imperial and Royal, by Honourable Espies; fawning about me and by others discoursed upon,

pryed and peered into. And at length both the chief Romish power and Imperial dignity are brought to that point resolutely that partly they are sorry of their so late reclaiming their erroneous judgment against us and of us, and seek means to deal with us so as we might favour both the one and the other; and partly to Rome is sent, for as great authority and power as can be devised; and likewise here all other means and wayes contrived, how by force or for feare they may make us glad to follow their humours. But all in vain, for force human we fear not, as plainly and often I have to the Princes declared. And otherwise than in pure verity and godlinesse we will not favour any (my words may seem very marvellous in your Honours ears, but mark the end, we have had, and shall have, to deal with no babes). I have full oft, and upon many of their requests and questions, referred myself to her Majesties answer thus in vain expected. Nuncius Apostolicus Germanicus Malaspina, after his year's suit to be acquainted with me, at length had such his answer that he is gone to Rome with a flea in his eare, that disquieteth him and terrifieth the whole state Romish and Jesuitical. Secretly they threaten us violent death, and openly they fawn upon us. We know the Sting of Envy and the fury of fear in tyrannical minds, what desperate attempts they have and do often undertake. But the God of Heaven and Earth is our Light, Leader and Defender. To the World's end, his mercies upon us will breed his praises Honour and glory. Thus much, very rhapsodically yet faithfully, tanquam dictum sapienti, I thought good to commit to the safe and speedy conveyance of a young merchant here called Lawrence Overton, which if it come to your Honours hand before my Servant have left his despatch, I may by your honor be advertised. Your Honour is sufficient from her Majesty to deal and proceed with me, if it be thought food. But if you make a Council Table Case of it, Quot homines, tot sententioe. And my Commission from above is not so large: Qui potest capere, capiat."

The almost apostolical flavour which Dee permits himself to impart to some of this letter, owing to the greatness of his believed mission, shows to what a height of "rhapsodical" fervours his spirit had now attained. It is still more emphasised in the concluding passage, which begins, however, very practically, with an anxious thought cast back to his English possessions. His desire that Thomas Digges, the eminent mathematician to whom his calculations for the reformed calendar had been submitted, should be sent over to inspect their doings, was curious, but it shows that he, at any rate, wished to deal openly and conceal nothing. He ends thus:

"Sir, I trust I shall have Justice, for my house library, goods and Revenues, etc. Do not you disdain, neither fear to bear favour unto your poor innocent neighbour. If you send unto me Master Thomas Digges, in her Majestie's behalf, his faithfulness to her Majesty and my well liking of the man, shall bring forth some piece of good service. But her Majesty had been better to have spent or given away in alms, a Million of gold, than to have lost some opportunities past. No human reason can limit or determine God his marvellous means of proceeding with us. He hath made of Saul (E.K.) a Paul, but yet now and then visited with a pang of human frailty. The Almighty bless her Majestie both in this World and eternally; and inspire your heart iwth some conceiving of his merciful purposes, yet not utterly cut off from her Majesty to enjoy.

From Leipsic this 14 of May, 1586,
at Peter Hans Swarts house.

Your Honours faithful welwisher to use and command for the
honour of God and her Majesties best service,

“John Dee.”

On being ejected from Prague, Dee removed his family and goods to Erfurt, but in spite of the influence of Dr. Curtius, and of a friend of Rosenberg, he was not allowed to hire a house there, for the Italian was before him. Pucci called on Dee after supper, and held out hopes that he might obtain permission for their return to Prague, for the new Nuncio, the Bishop of Piacenza, was inclined to a more favourable view than Malaspina. Pucci protested that they were only to be examined and if found heretical to be sent to Rome. He brought an invitation for their return, if they would promise not to exercise magical arts. Dee, who was starting early next morning to look at a house at Saalfeld, wherein to settle his exiled family, bade Kelley copy it and rode off. On the ride he thought it over. Pucci he had never liked, neither had Jane. “His household behaviour was not acceptable to our wives and family. He had blabbed our secrets without our leave. He was unquiet in disputation.” Dee summed up the man as a spy, the letter as a bait, and set to work to devise a way of being rid of him “by quiet and honest means.” He was absent two or three days, but the Italian was still there when he returned, urging them to go to Rome. Dee rebuked him for curiosity and interference, and accused him of conspiring against them; he, a mere probationer and not yet owned of the spirits (who in fact had said he was “leprous” and should be “cut off”), to presume an equal authority with them in their revelations!

Dee wrote a dignified letter to the Nuncio, and despatched it by the Italian, who was to receive from John Carpio, a wealthy neighbour and friend of theirs in Prague, a sum of fifty dollars for his expenses. The travellers went on to Cassel and to Gotha, but it was not long before a permanent asylum offered for the exiles. Their new patron, Count Rosenberg, was a friend worth having, for he was all-powerful with Rudolph; he was Viceroy of Bohemia and a Knight of the Golden Fleece. His influence and protection were now to be at the Englishmen’s disposal. On August 8, Rosenberg obtained from the Emperor a partial revocation of the decree against them, since they were permitted by it to reside freely in any of his lordship’s towns, cities or castles. They settled on September 14, 1586, at Tribau or Trebona, in Southern Bohemia, and here for about two years their wanderings came to an end.

Dee resumed the writing of his private diary, in which he had made no entry for three years, the last event recorded there being the departure of the family from Mortlake just three years before, on September 21, 1583. He opened a new volume, an Ephemerides Coelestium, calculated for the years 1581-1620, by Joh. Antonius Maginus, printed in Venice, 1582. The first entry made in it was Michael’s birth at Prague on February 12, 1586; the next was their arrival at Trebona (for it will be more convenient to follow Dee’s latinised version of the name).

CHAPTER XIV

THE CASTLE OF TREBONA

“Welcome the sour cup of prosperity!
Affliction may one day smile again: and until then,
Sit down, sorrow.”

— Shakespeare, *Love’s Labour Lost*

Tribau, or Wittingau, the Trebona or our story, is a small village lying in the beautiful undulating scenery of the Ludnitz, a small tributary of the river Moldau. It is a few miles from Neuhaus and Weseli, not many from the town of Budweis, on the Upper Moldau, in Southern Bohemia.

In 1586 it consisted of little beside the castle, a Rathhaus, quarters for a small garrison, and a cluster of dwellings where Dee tells a fire broke out on Whit Sunday, 1585, and destroyed several houses. The castle was one of Rosenberg’s many residences in Bohemia, and apparently a favourite one. the Viceroy was now just over fifty (he was born on March 10, 1535); he married about this time, and his wife constantly accompanied him on his visits to Trebona. They had also another castle at Neuhaus, beside a residence with beautiful gardens bordering the Moldau opposite Prague. They were frequently on the wing, flitting from Krumau to Vienna and from Vienna back to Prague. He welcomed the English travellers himself at Trebona, assigned them their rooms, and promised them all that heart could desire.

The actions, which had long been interrupted, were now resumed in “a goodly chapel next my chamber,” where all the “appurtenances” were set up, with the “angelicall stone” in its frame of gold upon the table. Rosenberg had been already admitted to the sittings, in obedience to directions received on October 14. When the communications were made in English, Dee translated them into Latin for his benefit. But experiments with Kelley’s powder were now all-engrossing, and even the spirits pass for a time into the background. Kelley went off to Prague for three weeks and was followed by Rosenberg. Dee remained with his wife and children; after their hardships, poverty, dangerous and wandering life, poor Jane must have been thankful for so luxurious a shelter. Visitors for Dee constantly arrived. Among them was Dr. Victor Reinhold, the astronomer. Pucci also came for a fortnight.

In December Dee received a very flattering invitation from the Emperor of Russia (Feodor Ivanowich) to go and take up his residence at Moscow in the Court. Dee’s fame as a learned astrologer and mathematician had spread to Russia; still more was his reputation as an alchemist bruited abroad: perhaps he was already credited with having actually made gold by projection or transmutation.

The first intimation of the Emperor’s wish was conveyed by Thomas Simkinson, an Englishman, of Hull, commissioned by Edward Garland to go to Brunswick or Cassel, or wherever Dee might be found, and beg him to remain there until Garland could come from Russia. He might tell Dee that the Emperor, having certain knowledge of his learning and wisdom, is marvellous desirous for him to come to his country, and had given Garland a sealed letter of invitation, promising a sum of 2,000 pounds yearly and free diet from the royal kitchen if he will come. His charges of removing shall be paid, and he shall travel royally with 500 hourses

to convey him through the land. If he thinks the salary offered too little, Garland, when he arrives, will assure him that if he asks as much more, he shall have it. The "Lord Protector," too, Prince Boris, took Garland in his arms on his departure and promised 1,000 roubles from his own purse beside the Emperor's allowance.

Simkinson reached Trebona on September 18, and at once declared his flattering errand. "On December 8 at noon, Garland came to me from the Emperor of Moschovia, according to the articles before sent unto me by Thomas Simkinson." On December 17, at Trebona, Edward Garland drew up a paper repeating all the former promises in the Emperor's name, and signed it, with Kelley, his brother Francis Garland, and others, as witnesses.

There is no doubt that the Emperor thought he was inviting to his Court the man who could fill his coffers and bring glory and prestige to his name. Hakluyt hints at it when he says the offer was made partly for his counsel about discoveries to the North-East, partly for some other weighty occasions. Dee was no self-seeker, or Court flatterer, although this was the fifth sovereign he says he might have served. The offer seems never to have tempted him from his loyalty to his own Queen. He bade Garland at once dismiss six out of the eight Russian servants he had brought to attend them on their journey, and turned to matters more important.

"On 19th December, to the great gratification of Master Edward Garland and Francis, his brother, which Edward had been sent to me with a message from the Emperor of Muschovia, that I should come to him, E.K. made projection with his powder in the proportion of one minim (upon an ounce and a quarter of mercury) and produced nearly an ounce of best gold; which gold we afterwards distributed from the crucible, and gave one to Edward."

It is quite significant that Kelley made the gold, Kelley showed it, and Dee is content to give him all the credit. The pangs and heartburnings and jealousies have yet to come. Now he only felt that at last he was victorious in his long quest. He was on the crest of the wave. His hour had come.

How the wonderful trick was done, Kelley could best describe.

Kelley was now constantly riding to Prague, or making longer expeditions to Poland, for he still had hopes of getting more money from Laski. By March his hope seems to have been realised, for Dee notes that Kelley paid him about 500 ducats in two or more sums (about 233 pounds). This plenitude of money of course encouraged the idea abroad that they were actually making it. When he returned from Prague on January 18, Kelley brought a handsome present from Rosenberg to Jane Dee, in the shape of a beautiful jewelled chain, the value of which was "esteemed at 300 duckettes," says Dee, "200 the juell stones and 100 the gold." In three days Kelley had posted off again to Prague, to join Rosenberg at his house in the scity. This time he took with him his brother Thomas, Francis Garland, and a Bohemian servant, Ferdinand Hernyck. No doubt he was pursuing his experiments for the "multiplying" of gold in the city, away from Dee.

Kelley's letter to Dee announcing this arrival of his in Prague is the only communication between this strange pair of partners that seems to have survived. It shows that erratic and wayward creature in a gentle and even affectionate light, and although its pious protestations are obviously overdone, it pictures for us quite

vividly the relations between the two, and partly accounts for the strength of the tie that bound Dee to his intractable pupil, soon to become his master. For while Dee laboured laboriously and scientifically with his alchemical compounds, Kelley at one bound overleaped the chasm and by some process best known to himself professed to have arrived at the goal.

To Dee's single-hearted nature such success was magnificent, wonderful. He began forthwith to treat his quondam skryer with added respect; the expression "Dominus Kelley" creeps once into the diary; and Kelley grew arrogant and overbearing. For the moment, however, he is all for friendship and respect.

"Prage. 1587. 25 Januarii." [This in Dee's hand.] (addressed) "To the Right Worshipful and his assured friend Mr. John Dee Esquire, give these. Magnifico Domino, Domino Dee.

"Sir. My hearty commendations unto you, desiring your health as my own; my Lord was exceeding glad of your Letters, and said, 'Now I see he loveth me,' and truly as far as I perceive he loveth us heartily. This Sunday in the Name of the Blessed Trinity I begin my journey [to Poland], wherein I commend me unto your prayers, desiring the Almighty to send his fortitude with me. I commend me unto Mrs. Dee a thousand times, and unto your little babes: wishing myself rather amongst you than elsewhere. I will by God's grace about twenty days hence return in the mean season all comfort and joy be amongst you.

"Your assured and immoveable friend

"E. KELLEY."

When this letter reached Trebona, Dee had gone riding with two horsemen of the city of Neuhaus, hoping to meet Rosenberg, who he thought would return that way from Vienna to Prague. Mrs. Dee at once despatched the servant Ludovic to meet his master. So Dee received Kelley's affectionate letter "in the highway, without Platz," a village about half-way to Neuhaus. Ludovic carried also a little note from Jane to her husband. It is the only letter of hers we have, but it confirms all that we suspect. We know her to have been a well-educated, well-read woman; the writing is strong and clear; and did not Francis Pucci describe her as a learned woman, "lectissima femina"? She must also have been an extraordinarily capable one to have controlled and managed her large household of children, assistants, apprentices, servants and miscellaneous visitors, often in the absence of her husband, and in a foreign land, constantly moving on from place to place in this nomadic life they led. Dee has a charming name for her. Somewhere in a letter he speaks of "my payneful Jane." Full of pains she must indeed have been, the model wife for an elderly, incomprehensible husband, using her intellectual powers to accommodate her family, while the learned man pursued his angelic visions and his alchemical experiments unhampered. Above all things she must have been a peacemaker, hot and hasty although she sometimes was. Here is the letter to the husband who had only left her that morning: —

"Swethart. I commend me unto you, hoping in God that you ar in good health as I, and my children, with all my household, am here, I prayse God for it. I have non other matter to write unto you at this time."

There is a capable and managing sound about “my” children and “my” household, which leads one to wonder what this practical housewife thought of all the angelic promises which were never kept or performed. At the outset of the mysterious Kelley doings she was, we know, in her impetuous way, annoyed, angry, probably contemptuous, but by this time she perhaps had grown either to believe in them or tolerantly to acquiesce. She was only thirty- two, yet she had lived through many strange experiences and was soon to be put to the strongest test possible to a woman.

By April Kelley was once more settled as part of the household, and on the 4th the crystal gazing was resumed. He professed to hear instructions to Rosenberg, who was present, to build a commonwealth, render tribute to Rudolph, and he shall be Duke of Brandenburg. To himself things are said he is not reluctant to hear. We have seen how almost immediately after his marriage he took a violent dislike to his wife. In the four years, it seems, he had reproached her for giving him no child. To him generation was the root principle of alchemy, and the phase of it in which he centred his attention. It is always the marriage of the red man, copper, and the white woman, mercury, that is to tinge the whole world with gold. Now a voice tells him why he is barren. Not because of his reckless, disordered life, but because she was of his own choosing — the wrong woman! Therefore he is to be seedless and fruitless for ever. Had it not been for the Dees’ kindness to her, and especially Jane’s, poor neglected Joan Kelley would have had but a sorry time. She was only twenty-four; lively and docile, she seemed to please everyone but her husband. Pucci, with perhaps a little flattery, calls her “*rarum exemplum juvenilis sanctitatis, castitatis, atque omnium virtutem.*” If she had not all the virtues, she at least had several. Her brother, Edmund Cooper, and another friend so loved her that they came over from England a year later on purpose to see if she and her husband could not be more reconciled.

Kelley had been more unsettled than ever, discontented with his wife, with his calling, its results, and above all with his position and his poverty. What was a pittance of fifty pounds a year to a man in constant intercourse with princes and nobles, with credulous fools possessed with dreams of gold? The same qualities that attracted Dee were equally magnetic with others. Laski loved him; Edward Dyer deserted his old friend Dee for this newcomer, a nobody. He had made himself invaluable to Rosenberg, who seems to have had implicit faith in his powers. Rosenberg induces the Emperor to employ him. Had he not already found the secret of projection? Was he not the possessor of the magic powder which waited only for the opportunity to be transformed into countless heaps of ducats? Only money was wanting, and that he could certainly get. But he must first be released from this galling position of medium. He told Dee that all through this Lent he had prayed once a day at least that he might “no more have dealing to skry.” At Easter-time he did receive a promise to be set free from the crystal gazing, as he desired, but his wish for freedom was not exactly approved by the angelic ministers.

“Is it a burthen unto thee to be comforted from above? O foolish man! By how much the heavens excel the earth, by so much doth the gift that is given thee excel all earthly treasure. Notwithstanding, thou shalt not at any time hereafter be constrained to see the judgment of the Highest, or to hear the voices of heaven, for thou art a stumbling block to many....And the power which is given thee of seeing

shall be diminished in thee, and shall dwell upon the first begotten son of him that sitteth by thee.”

The selection of a child as Kelley’s successor seems not to have been altogether unexpected. It had been hinted in Prague a year before that a boy would serve for the office; but that the choice would fall upon Dee’s own son must have come as a dreadful surprise, at any rate to his mother. No doubt the old man regarded it as a mark of special heavenly honour.

It is more likely that Jane, with her practical mind, regarded the change of medium with anything but satisfaction. Arthur was now seven and three quarters of a year old, a clever child, already well grounded in Latin, but far too tender in years and disposition to be made the subject of any psychological experiments. Fortunately for him, his skrying was a dismal failure, although it seems to have bent his childish mind towards the occultism he followed in after-life. Distinguished physician as he afterwards become, both at home and in the service of the Emperor of Russia, he was a true son of his father, and maintained to the end of his life a belief in alchemy and transmutation which nothing could shake.

Kelley was desired to initiate the child.

“I thereupon thinking that E.K. would, should or best could, instruct and direct the childe in that exercise, did alwayes await that E.K. would of himself call the boy to that exercise with him; and so much the rather because he said that he was very glad now that he should have a Witness of the things shewed and declared by spiritual creatures: And that he would be more willing to do what should be so enjoined to him to do, than if only he himself did see. But when E.K. said to me that I should exercise the child and not he, and that he would not, I thereupon appointed with myself to bring the childe to the place, and to offer him, and present him to the service of Seeing and Skrying from God and by God’s assignment.”

Then Dee drew up a petition to put in the child’s mouth that he might be “a true and perfect seer, Hearer, Declarer and Witness of such things as might be revealed to him either immediately or mediately by the angels.” Three times a day for three days he was to offer this prayer thrice over, while seated at the stone. The poor child happily beheld in the magic crystal nothing more than dots and pricks, letters and lines, and “a young man in a white leathern doublet and a grey cloke, like hans of Gloats, his cloak,” of all which even his father could make little. On the fourth day came Kelley, to see how Arthur and his skrying progressed. But still the child saw nothing. Then Kelley applied himself to skry as usual. Looking from the gallery window, he had already without any crystal seen Il and Madimi, also Uriel, who justifies their words. What they command he hesitates to say. Next day he is again the percipient; the result is the same. At length, with feigned reluctance, he tells Dee of a vision of strange and subversive portent. It is so repugnant to him that he can hardly impart it. Madimi, throwing aside all her garments, mysteriously bids them participate in all things one with another. Kelley affects not to understand, but after more hesitation expounds to Dee that the sharing is to be in everything, even of their wives. All things are to be in common between them.

Dee, to whom Madimi is invisible, though he hears her voice, fiercely rebukes her: “Such words are unmeet for any godly creature to use. Are the

commandments of God to be broken?" This participation, he insists to Kelley, can be meant only in a Christian and godly sense. Kelley construes the injunction very differently, but he affects a chaste horror and swears for the hundredth time that he will deal no more with the spirits.

Then Madimi, with scathing irony, addresses them both as "fools, and of little understanding." Not content to be hearers, would they be "Lords, Gods, judgers of the heavens"? She turns away. "Your own reason riseth up against my wisdom. Behold, you are free. Do that which most pleaseth you."

It is a comfort to learn that the child Arthur had all this time fallen down "in a swoond." He was indeed very ill for some time afterwards, and small wonder.

Dee protested and argued with Kelley and with Madimi. He was consumed with grief and amazement that good angels could propound "so hard and unpure a doctrine." Had he not offered his very soul "as a pawn to discharge E.K. his crediting of them to the good and faithful ministers of Almighty God"? Was it not his life's work to withdraw Kelley from any kind of association with the bad spirits who had frequented him before he came to Mortlake?

Until two in the morning of this April 18, 1587, the pair sat up arguing, talking, praying. Kelley held forth about a little spirit, Ben, who had that day appeared to him in his laboratory alone, and had shown him how to distil oil from spirit of wine "over a retort in two silver dishes whelmed one upon another, with a hole through the middle and a sponge between them, in which the oil would remain." Ben had foretold Elizabeth's death in July (she lived for sixteen years), the death of the King of Spain and the Pope; in fact, a general moribundity of sovereigns. Francis Garland was a spy sent by Burleigh to see what they were doing; Rosenberg would be shortly poisoned; famine and bloodshed would cover the land. Many other dire calamities would happen if they were not conformable to the voice; chief of all, the virtue should be taken from Kelley's precious powder; it would be rendered unprofitable, and he would become a beggar. It was Ben, he says, who had brought him his powder.

Dee replied that he had found so much halting and untruth in Kelley's reports of actions when he was not present, that he would believe nothing save what by better trial he found to be true. But at last his resistance seemed to be overridden, and in the chill of the early morning he went to bed, heavy at heart in spite of his delusion. His poor wife was lying awake, wondering what turn their ill-starred fortunes were next to take.

"`Jane,' I said, `I can see that there is no other remedy, but as hath been said of our cross-matching, so it must needs be done.'"

Poor Mrs. Dee, shocked and horrified, fell a-weeping and trembling for a full quarter of an hour, then burst into a fury of anger. At last she implored her husband never to leave her. "I trust," said she, "that though I give myself thus to be used, that God will turn me into a stone before he would suffer me in my obedience to receive any shame or inconvenience." She would eat neither fish nor flesh, she vowed, until this action, so contrary to the wholesome law of God, and so different from former actions, which had often comforted her; was confirmed. Both the indignant women demanded a repetition of the action.

In obedience to Raphael's counsel, a solemn pact or covenant was humbly drawn up by Dee on the 21st, and signed by these four strange partners in delusion. It promised blind obedience, with secrecy upon pain of death to any of the four. It deprecated all intention of impurity and guilt. Its subscribers promise to captivate and tread under foot all human timorous doubting that the true original power and authority of sins releasing or discharging is from the Creator. True Christian charity spiritual, perfect friendship and matrimonial liberty between the four is vowed, and they beseech that this "last mystical admonishment" be not imputed to them for rashness, presumption, or wanton lust.

Dee's hand is unmistakable in the document. He regarded the new development apparently only as a symbol of further spiritual union, and a means of obtaining a closer entrance into the secrets of all knowledge. It was no matter to him, he says, if the women were imperfectly obedient. "If it offend not God, it offended not mee, and I pray God it did not offend him."

Kelley drew up a paper the day after Dee's, washing his hands of the whole matter, protesting that he did not believe so damnable a doctrine would be commanded, recounting his warnings to his worshipful Master Dee, and so on. On May 6 Dee spread his covenant, a document of the most truly devout character, before the holy south table in the chapel of the castle, with many prayers for divine guidance. The next day Kelley obtained the paper, cut it in pieces and destroyed it, made away with one of the crystals (which was found again under Mrs. Dee's pillow), and threatened to depart elsewhere with John Carpio. Coldness and jealousy fell between the pair.

So ended the whole extraordinary episode of the Talbot- Kelley spiritualistic revelations. Madimi appeared for the last time on May 23. Then the *Liber Mysteriorum* is closed. For twenty years there are no more records of angels' visits. And the few pages that remain are written in a halting hand in Dee's stricken old age, when he was seldom visited by his unseen friends, badly though he needed their comfort. No other medium like Kelley was ever found. One can only wonder whether, after so rude an awakening, even Dee would have implicitly trusted anyone again. These five years with the skryer had filled him to the brim with a consciousness of some power beyond his wit to control, a power amazing in its ingenuity to torture him. He had asked Madimi piteously if he should suffer any more of these pangs. He knew now that he would. Yet, in spite of all, these marvellous doings had brought him hours of exquisite happiness, moments when he had seemed lost in the unity of the combined wisdom of the ages, which to him meant — God.

CHAPTER XV

THE END OF THE PARTNERSHIP

"If all you boast of your great art be true,
Sure willing poverty lives most in you."

— Ben Jonson, Epigram to Alchymists.

Dee now resumed diligently his writing in the other diary, which becomes a strange medley of daily affairs small and great. He sent Francis Garland to England

with another letter to Walsingham, dated June 17, begging him to continue his opinion of Dee's fidelity towards Her Majesty and the realm. It would be useless as yet to render any account of commodity to them or their country reaped by this peregrination, "but I trust more will be glad of our coming home than were sorry of our going abroad." He has not heard from Mr. Justice Young since May twelvemonth, but hopes his pitiful case of the books and other injuries endured have, by Walsingham's favour, had some redress. There is no news of importance but the Polish King's election, "the mysteries whereof, by the time this bearer reaches England, will be known to you." "Remember me to your good lady and to your daughter Lady Sidney." Money was now plentiful enough, and on September 1 Dee covenanted with John Basset (who had arrived at Trebona on August 20) "to teach the children the Latin tongue, and I do give him seven ducats by the quarter, and the term to begyne this day; and so I gave him presently seven ducketts of Hungary in gold, before my wife. God speede his work." Arthur, who was just over eight, was getting on with his "grammar"; Katherine was six. Thus was another element introduced into the oddly assorted household, and on September 4 Dee writes: "Basset his hurly burly with T. Kelley." Payments to Basset were entered regularly each quarter until August following, when the tutor, whose real name seems to have been Edward Whitlock, went off to Budweis on pretence of buying "cullors" — perhaps for painting, and never returned.

Various visitors came to Trebona, among them Pucci, bringing Christian Francke, the author of some books written against the Jesuits. Rosenberg returned to Trebona, and finding a constraint existing in the relations of the household, set himself to reconcile them. "July 19th. a certayn kind of recommendation between our wives. Next day some relenting of E.K., also by my Lord's entreaty." Rosenberg came and went frequently, so did his wife. Lord Biberstein, a friend of theirs, came to make Dee's acquaintance.

Alchemical experiments were being prosecuted with vigour. It was Dee's turn to make something prized, even if it were not gold. "Sept. 28th. I delivered to Mr. Ed. Kelley (earnestly requiring it as his part) the half of all the animal which was made. It is to weigh 20 ounces; he wayed it himself in my chamber. He bought his weights purposely for it. My Lord had spoken to me before for some, but Mr. Kelley had not spoken." Secrecy being necessary, he is evidently using a word of hidden meaning.

Kelley was constantly riding to Prague, and in October, while he was away, "John Carpio [who had joined them at Trebona] did begyn to make furnaces over the gate. He used of my rownd bricks, and for the yern pot was contented now to use the lesser bricks, 60 to make a furnace." Experiments on a large scale were about to be begun, and when Kelley returned a week later, *terribilis expostulatio*, etc., is the entry under his name. Edmond Hilton returned from England, and a month later Francis Garland, bringing letters from Edward Dyer. He brought also letters from Court advising their return home. People in the neighbourhood were beginning to talk about the strange doings of the foreigners in the Castle, and the Captain Critzin of the Guard disdained to come to a wedding supper in the Rathhaus because Dee and Kelley were to be present. The household grew larger and larger. Thomas Kelley was married in June. In December, "Mr. John Carpio went towards Prague to marry the maiden he had trubbled; for the Emperor's Majestie, by my Lord Rosenberg's means, had so ordered the matter." He was absent till February 16, and

in April brought his wife. Dee turned back to his books of tables, figures and symbols. “The 30 and 31 day I began to frame myself toward the practice of the Heptagonos of my 4th boke. God prosper my purpose.” Kelley, on the other hand, was absorbed in alchemical studies. Perhaps the secret he had once professed to have captured had again eluded him.

“Dec. 12 afternone somewhat. Mr. Ed. Keley his lamp overthrow, the spirit of wyne being spent to[o] nere, and the glas being not stayed with buks abowt it, as it was wont to be; and the same glas so flitting on one side, the spirit ws spilled out, and burnt all that was on the table where it stood, lynnen and written books — as the bok of Zacharius withthe Alkanor that I translated out of French for some by spirituall could not [?]; Rowlaschy his third boke of waters philosophicall; the boke called Angelicum opus, all in pictures of the work from the beginning to the end; the copy of the man of Budwise Conclusions for the Transmutation of metalls, and 40 leaves in 40, intituled, Extractiones Dunstani, which he himself extracted and noted out of Dunstan his boke, and the very bok of Dunstan was but cast on the bed hard by from the table.”

The “very bok of Dunstan” was no doubt a copy of the manuscript *Tractatus...de lapide philosophorum*, which was formerly ascribed to the Saint of Glastonbury. It was the constant companion of these two alchemists, held in awe and great esteem, as we see by Dee’s words above.

In his new liberation from crystal gazing, Kelley became a changed and haughty being. He was established in his own apartments, and when he felt weary his former master was now summoned imperiously to come and amuse him! He sends the old man a message by his brother Tomas, saying, “You study too much, it is too late in the day to go to Cromlaw, as you intended, he wishes you to come to pass the tyme with him at play.” Dee mildly consents: “I went after dynner and payd, he and I against Mr. F. Garland and Mr. Rob., tyll supper tyme in his dyning rome, and after supper he came and the others, and we played there two or three houres and frendely departed. This was then after the great and wonderful unkindness used toward me in taking my man.” A week or two later Kelley sent for Dee late in the evening to come to his laboratory over the gate, to see how he distilled sericon, “according as in time past and of late he heard of me out of Riplay. God lend his heart to all charity and vertue.”

It is evident that Kelley was jealously and secretly working at his experiments apart from Dee. He had learned much alchemy from his master and his master’s wonderful library in the four years, but there was still knowledge stored in chambers of Dee’s brain of which he could not pick the lock. To enter those inner recesses had been doubtless Kelley’s aim when he represented the spirits as bidding them share everything with each other. But he, on his part, had no intention of sharing anything that he discovered.

The year 1588 began badly, for the child Michael, on New Year’s Day,

“going childyshly with a sharp stick of eight inches long and a little wax cadell light on the top of it [evidently the child was keeping Christmastide in good old German fashion], did fall uppon the playn bords in Marie’s chamber, and the sharp point of the stik entred through the lid of his left ey toward the corner next the nose, and so

persed through, insomuch that great abundance of blud came out under the lid, in the very corner of the sayd ey. The hole on the outside is not bygger than a pin's hed; it was anoynted with St. John's oyle. The boy slept well. God spede the rest of the cure. The next day after, it apperid that the first towch of the stikes point was at the very myddle of the apple of the ey, and so (by God's mercy and favor) glanced tothe place where it entred; with the strength of his hed and the fire of his fulness. I may make some shew of it to the prayse of God for his mercies and protection."

Dee of course was as skilled in medicine as any doctor of the time. He rendered medical assistance when Thomas Kelley's wife, Lydia, miscarried with twin boys. He notes his own symptoms carefully: "June 19, I had a grudging of the ague. June 22, I did evidently receive the ague and layd down. Jan. 17. The humming in my ears began." Another time "I was very sik uppon two or three sage leaves eten in the morning; better suddenly at night. When I cast them up, I was well."

The coldness between the two became unbearable to Dee, the peacemaker, of whom Aubrey relates that if ever any of his neighbours fell out, "he would not let them alone until he had made them friends." In April, he wrote to Kelley and his wife "2 charitable letters, requiring at theyre hands mutual charity." The same day he made friends with Captain Critzin, and on Sunday, when Jane ws churched after Theodore's birth, received the Communion with her. He hears of some fresh treachery of Pucci, and of Rosenberg's displeasure, but all is forgotten on May 10, when Kelley "did open the great secret to me, God be thanked!" A few days after, "Mistris Kelley received the sacrament, and to me and my wife gave her hand in charity, and we rushed not fromher." The reconciliation does not seem to have been altogether comlete. Every visitor throughout that summer, Edmund Cooper, Joan Kelley's brother; Mr. Thomas Southwell, his friend; Edward Dyer, Francis Garland, and Count Rosenberg, all seem to have tried to patch up the quarrel, but things only grew worse.

The "great secret" opened by Kelley was no doubt the professed secret of the gold. Dee must very soon have found out the true value of this "secret," but apparently he continued to believe that Kelley had honestly transmuted base metal, and was keeping the method to himself. Nothing was less likely than that he would share his knowledge, even with the master who had taught him all he knew. The first essential in alchemy was secrecy. It is characteristic of Dee that he seems to have been more pained at Kelley's want of confidence in him, than chagrined at not knowing the secret. Of jealousy that Kelley was, or seemed to be, the successful alchemist, there is no trace. But Kelley was gradually undermining all Dee's influence and friendship with Rosenberg, who was their one powerful friend. The Viceroy of Bohemia had much influence with the Emperor. He was costantly at the Castle or with Kelley in Prague. Kelley had stolen the old man's best workman, and was now turning all his friends against him. Rosenberg and Kelley were always working in secret, while he was left outside in the cold. "September 15th, the Lord Chancellor cam to Trebona and went away on the 17th. The rancor and dissiumlation now evident to me, God deliver me! I was not sent for." The pathos of the situation is irresistible. The man of a Continental reputation, whom five emperors had honoured, must stand aside and see his upstart pupil made much of and set onthe high-road to fortune. But Fate was more just than she seemed, and

Dee, who clung to the honest and true way, had in the end the better lot. Not in ease or success, truly; but who would not rather leave behind him the reputation of a sincere man deluded than that of a deceiver, even though not unmasked? Till then Dee says he had been “chief governor of our philosophical proceedings, but little by little I became hindered and crossed by fine and subtle devices, laid first by the Bohemians, somewhat by Italians, and lastly by my own countrymen.”

The strange partnership had now run its tempestuous course to the end, and the heterogeneous colony of English men and women at Trebona was about to break up, never all to meet again. The first to depart was Mistress Kelley, thankful, no doubt, to disentangle herself from the web of pretences, deception and bickerings. On October 17, “Mistress Kelley and the rest rode towards Pouchartz in the morning.” She was on her way to England, and only once thereafter does this young woman’s name enter into our story.[On November 23, Francis Garland and Mr. Dyer’s servant, Edward Rowley, who had come back a week or two earlier, left for England. Dee sent by them a most important letter to the Queen, also letters to Dyer, Mr. Young, and to Edmond Hilton. News from England travelled slowly, and Dee had not long since heard of the glorious defeat of the Spanish Armada of the previous May. The victorious captains, Frobisher, Drake, Hawkins, were all well known to him, and with the Admiral in chief command, Lord Howard of Effingham, he was very familiar at Court, for his wife had been Jane’s early patron and friend. Patriot that Dee was, yearning to get back to England, he now wrote to the Queen a letter of congratulation (dated November 1-, 1588) upon the splendid victory of her navy. It was couched in the graceful and fantastic terms of homage of the day, and is a literary production well befitting a man of his reputation. The letter is reproduced from the original. It is printed by Ellis in *Letters of Eminent Men*.

[REPRODUCTION OF LETTER GOES HERE]

He speaks in it of his proposed return, and begs for a safe conduct through all the domains of princes and potentates which lay between him and home. “Happy are they that can perceive and so obey the pleasant call of the mightie Lady Opportunitie.” The answer, of course, took long to come, but he began to make his preparations slowly. He gave to Kelley the wonderful convex glass which the Queen had so often admired. A fortnight after, Kelley gave it to Rosenberg, and the Count presented it to the Emperor. Dee says the Emperor had long esteemed it, but he has not told us when he showed it to Rudolph. He had described the mirror in his Preface to Billingsley’s *Euclid* (see ante, p. 25).

On February 4 he also made over to Kelley “the powder, the books, the glass, and the bone, for Rosenberg, and he thereupon gave me discharge in writing of his own hand subscribed and sealed.” Rosenberg was away, and did not trouble to return to bid him good-bye. Instead he wrote to Kelley to take his leave of Dee for him, and said that he would send instructions to his man Menschik to “dispatch him,” perhaps with some settlement of a financial character.

On the afternoon of February 16, 1588, Kelley rode away to Prague, taking most of the assistants with him: John Carpio, F. Garland, Simkinson. Dee never saw him again.

Three new coaches had been ordered in Budweis, and when they were ready, Dee dispatched Edmond Hilton (who had returned from England in December) to Prague to buy a dozen coach and saddle horses. Money was plentiful at this time, the practice of economy was impossible to Dee, so he set off to travel homewards in state, as became a man to whom an emperor had offered a princely salary. It was very unnecessary, even absurd, but it was characteristic of Dee and his exalted ideas, not so much of himself, as of his peculiar mission. The journey cost, as he reckoned up afterwards, more than 600 pounds. The horses — twelve young Hungarian coach horses and three Wallachees for the saddle- -cost 120 pounds, and cheap they were at that. The three new coaches, with harness, saddles and bridles, cost 60 pounds; and the hiring of two or three waggons for his goods, books, furniture, vessels, etc., ran into 110 pounds. Then he had an escort of twenty-four soldiers from Diepholt to Oldenburg, as permitted by the Emperor's passport; and from Oldenburg to Bremen, the Duke of that province sent six musqueteers to protect him. It was a dangerous time to ride abroad, as he says, not long before the outbreak of the Thirty Years' War. A party of eighteen horsemen had lain in wait for his caravan for five days, but a warning came through a Scot in the garrison of Oldenburg, and Robert, the Landgrave of Hesse, extended his powerful protection.

The train of coaches and waggons, with the travellers and their baggage, left Trebona on March 11. The Castle had been their home for a year and a half, and we can fancy Jane, at any rate, dreading to take up once more the old wandering life. For it was to be a year and three-quarters more before they set foot in England. On the 18th they were in Nuremburg, where they stayed two nights; on March 26 they reached Frankfurt-am-Main, and on April 19, five weeks after leaving Trebona, they were in Bremen, their present destination.

CHAPTER XVI

THE END OF KELLEY

“All you that faine philosophers would be,
And day and night in Geber's kitchen broyle,
Wasting the chips of ancient Hermes' tree,
Weening to turn them to a precious oyle,
The more you worke the more you loose and spoile.
To you, I say, how learned soe'er you be,
Go burn your Bookes and come and learne of me.”
— Sir Edward Kelley, Metrical Treatise on Alchemy.

Before continuing the story of Dee's life in Bremen and his return to England, the end of Kelley's extraordinary meteoric career, which six more years extinguished, must be briefly traced.

Dee expected Kelley to join him at Stade. He confidently thought they would return to England together, obedient to the Queen's summons. But Kelley was now a great man with Rudolph, who had given him an estate and a title, and established him at his Court in Prague as a citizen and councillor of state. Apparently he succeeded in keeping up the deception of making gold. The news of his promotion was conveyed by Dee to Walsingham, at Barn Elms, in a letter dated August 22, 1589,

to which we shall again return. He speaks of Kelley as “my great friend, yet in Boemia,” and surmises that Walsingham may have heard direct from him, who is “now in most favourable manner created a Baron of the Kingdom of Boemia.”

The actual title conferred was *eques auratus*, a synonym for “miles” which took its origin in the fact that a knight’s armour was gilded. In English it was of course “Sir.” The title must have been conferred on Kelley very soon after Dee left Trebona in March; for by the end of June he is called Sir Edward by a couple of Englishmen, Robert Tatton and George Leycester, who with Edmond Hilton were at Trebona then, and came on to Dee at Bremen. Kelley commissioned them to take down particulars of the treachery of one Parkins, a Jesuit in Prague, who was plotting with the King of Spain and the Pope against England. He wished of course to score “his faithful discoverie of this treason.” He also desired Burleigh and others in England to know what great honour had been done him, and he obtained in February, 1590, a confirmation of the grant of his title to send him over, lest there should be any doubt in English minds. The document, curiously enough, is countersigned by Dr. Jacob Curtius, the acquaintance of three years before.

Constant letters passed between the two former fellow-workers through the year 1590, the messenger being either Thomas Kelley or Francis Garland. All manner of wild stories were current in England, and have been gathered up and repeated by every writer upon Dee and Kelley. The sober Anthony Wood relates that gold was so plentiful in Trebona before Dee left that the young Arthur played with gold quoits made by projection, while a youthful Count Rosenberg (he seems a quite fictitious person) was throwing about silver playthings procured by the like means. Burleigh had written for a specimen of their wonderful art, and it said that the Queen was actually the recipient of a warming-pan, from the copper or brass lid of which a piece had been cut, transmuted into gold, and replaced. Elias Ashmole goes further in the story to say that “without Sir Edward’s touching or handling it, or melting the metal, onely warming it in the Fire, the Elixir being put thereon, it was transmuted into pure gold.” He adds that he has heard from a credible person (who has seen them) that Kelley made rings of gold wire twisted twice round the finger, which he gave away, to the value of 4,000 pounds: at the marriage of Rosenberg’s servant before alluded to. Ashmole adds: “This was highly generous, but to say the truth, openly Profuse beyond the modest limits of a sober philosopher.” Sir Thomas Browne says he heard from Arthur Dee, his friend, conclusive evidence of the manufacture of gold. The reader may smile at these fairy tales, but what is to be said of a staid and sober minister like Burleigh being ready to credit the truth of Kelley’s exploits, whether convinced by the warming-pan, or by other means? In a long letter to Edward Dyer, in 1591, who was then acting as the Queen’s agent in Germany, he urges him to use every means in his power to induce “Sir Edward Kelley to come over to his native country and honour her Majesty with the fruits of such knowledge as God has given him.” Dyer had been Dee’s friend for a great many years, as we know, and was Arthur’s godfather, but he transferred all his attentions to Kelley as soon as that clever trickster began making gold. Dee only says he “did injure me unkindlie.” Kelley and Dyer became inseparable, and Dyer wrote home to Burleigh wonderful reports of Kelley’s miracles. Ignoring all that had passed, Burleigh is ready to welcome the quondam coiner, forger, or what not, with open arms back to the service of his Queen. “If his knowledge is as certain as you make it, what would you have me think could stay him from flying to the

service of his own sovereign?" If he is afraid of old reports, actions, disgrace, being brought up against him (and we know Kelley's record was none of the cleanest), let him be assured that he shall have his Queen's protection "against all impediments that shall arise." Burleigh becomes almost poetical as he speaks of the patronage of "such a Princess, who never yet was stained with any breach of Promise to them that deserved her favour. If I did not know to whom I write, who has had long experience of her rare vertues,...I could use many arguments to move any man never to mistrust her." He implores Dyer to induce Kelley to come. If he does not come, it can only be because by cunning or legerdemain he has deceived them and cannot do what he promises, or else he is an unnatural disloyal man and subject. In case Kelley will not come, he asks if Dyer cannot send a very small portion of his powder to make a demonstration to the Queen's own sight. What the Treasurer would like most of all is that Kelley should "send her Majesty as a token a good round sum of money, say enough to defray the charges of the navy for this summer," for the ships of Spain were gathering courage after their defeat. "But wishers and woulders were never good householders," he ends. The Queen is at his house at Theobalds, and will be some time longer. He would not be content the time were tripled, so he "had but one corn of Sir Edward Kelley's powder." Burleigh and Kelley were also in direct correspondence. Beside urging his return, the Lord Treasurer, who seemed to consider Kelley as the storehouse of the elixir of life as well as of the philosopher's stone, begs for a prescription with the proof of manufactured gold. In a brief note of February 18, 1591, Kelley says he will shortly send the good thing desired for your health." He has received the salutations sent through Mr. Dyer, and "at his return you shall know how I thank you." This, the only original letter of Kelley's to be traced, characteristically promises what he never meant to do. Burleigh replied in May, again begging him to send "something of your operation to strengthen me afore next winter against my old enemy the gout." He once more strongly urges Kelley's return. How can he hesitate to bestow the gifts that God has given him rather upon his own Prince and Countrie than upon strangers?

Kelley of course did not return, but apparently wrote again, urging powerful reasons of excuse. Burleigh's faith in him began to shake. He sent a last imperative recall, some of which may be quoted from the rough draft written in his own hand. It shows once more what sort of men the great Queen had to serve her, and what a Queen she was to serve.

Beginning "Good Sir Edward Kelley," Burleigh acknowledges Kelley's letters by Dyer. "Without particular knowledge of your impediments, I may not give any such censures as others soe unconsiderately, yea uncharitably, may doe. You confess a desire to return to your native countrie; your minde draws to your sovereign. This is commendable, yet many say if you come not, it is because you cannot perform what has been reported of you. Malicious persons say you are an imposter, like some in other countries have been proved. You fear severe punishment. Now, good knight, though I write thus plainly to you, yet such is my credit in Mr. Dyer, such my allowance of your loyal profession, such opinion do I firmly conceive of your wisdom and love expressed in your letters, such my perswasion of your habillitie to performe what Mr. Dyer has reported (by reason of the estimation, honor and credit I see that you have gotton by yr behaviour), that I rest only

unsatisfied in your delaye of coming; and I am expressly commanded by Her Majestie to require you to have regard to her honour, and according to the tenor of her former letters, to assure yrself singularly favoured in respect of the benefit you may bring to Her Majestie....

“Be assured of worldly reward. You can make yr Queen so happie for her, surely as no subject she hath can do the like. Good Knight, let me end my letter conjuring you, in God’s holy name not to keep God’s gift from yr natural countrie, but rather help make Her Majestie a glorious and victorious power against the mallice of hers and God’s enemies. Let honor and glory move yr naturall hart to become honorable in yr own countrie rather than in a strange one, and leave a monument of yr name with posterity. Let no other country bereave us of this felicitie: that only, yea only by you, I say, is to be expected. Let no time be lost; we are all mortall: you that should be author, this noble Queen yt should be receiver thereof.”

Then he politely acknowledges some gift Kelley has sent. Instead of an ingot of gold, it seems more like a geological specimen for a museum, and certainly does not excite the Lord Treasurer’s immense gratitude.

“All this in answer to your by Dyer. I thank you for the montayn or rock sent safely from Staden. I will place it in my house, where I bestow other things of workmanship, and it shall be memoryall of yr kindness, wishing I might receive some small receipt from you yt might comfor my spyritts in myn age, rather than my coffers with any welth, for I esteeme helth above welth.”

But Kelley knew better than to face the astute Englishmen at home. In Prague he felt secure, and all too bitterly he learned his mistake. A couple of independent letters from two English merchants to Burleigh and to Edward Wootton give the exciting story of his fall from favour.

He had been established in a house of his own close to the Palace; his wife and brother had rejoined him; Edward Dyer made it his headquarters. One day, the last of April, perhaps even before Burleigh’s letter was dispatched, he was suddenly arrested by the fitful Rudolph’s command, and thrown into prison. A large force of the imperial guard, accompanied by the City Provost and one of the Secretaries of State, burst uninvited into his house to take him whilst at dinner. But a friend at Court had whispered a word, and the evening before he had ridden off with one attendant towards Rosenberg. The intruders had to be content with haling off brother Thomas to prison, “pinacled like a thief.” They searched the house thoroughly, broke open doors, and thrust their halberds into the beds or any place where “Sir Edward” might possibly lie hid. Satisfied he was not there, they sealed up certain of the rooms, laid some of the servants in chains — one was afterwards “racked” — and departed, leaving a guard over “Lady Kelley” and Mr. Dyer, forbidding them to stir from the house. Returning with their news to the Emperor, Rudolph “cursed in the Dutch manner,” and gave orders to search the town and the highways.

Kelley had ridden off many miles towards his patron, the all-powerful Rosenberg, but being weary and fasting, halted at the inn at Sobislaus, fed, and threw himself on a couch to sleep. By three days after, May 2, the soldiers had tracked him

down; and roughly seizing him, they cut open his doublet with a knife to search for concealed valuables or papers, vowing they cared not whether they took him dead or alive to the Emperor. Kelley appealed to his all-powerful friend, Rosenberg. "In Bohemia," says the merchant in his letter, "it is a rule that his Majesty dares do nothing without the Earl's consent, he being Burgrave of Prague, the immediate person and officer under the Crown." Rudolph was already sinking into the melancholy and madness in which he ended his days. However, Rosenberg's protection did not avail. Kelley was taken to the Castle of Purglitz, three miles from Prague, and there he was closely confined for more than two years.

And now for the cause of Rudolph's displeasure, and the reason of the arrest.

First, it is surmised to be debt, but the merchant adds that although Kelley is known to owe a large sum to two Cologne merchants who trade in jewels, he owes nothing to the Emperor, nor ever had put him to any charge, save for coals and house room.

Next it is thought he was in league with a professed gold-maker from Venice, executed by the Duke of Bavaria at Munich, on April 25. (Of him, too, Burleigh has written in his letter to Dyer.) Thirdly, the Emperor's fear that Kelley would depart for England is adduced. Dyer had brought autograph letters from the Queen recalling him. A doctor's son in the town, who had served Sir Philip Sidney in England, and knew her hand, had reported this. It was of course an invention; and the merchant opines Dyer is of too rare a discretion to permit secret letters to be seen or even heard of; it is more likely that Kelley has some time or other vaunted at table that the Queen had sent for him. "He is a man who taketh, as I hear, a pleasure that Princes desire him." Fourthly, it is the doing of the powerful family of the Poppels, second family in the kingdom, and great enemies of the Rosenbergs, who have been "the setters up and principal maintainers of Sir Edward Kelley hitherto." The fifth report is that Kelley had distilled an oil or medicine for the Emperor's heart disease, which was poison. Lastly, the writer comes to what he takes for the true reason of Rudolph's anger.

An Italian, named Scoto, having cast imputations on Kelley's powers of projection, the Emperor sent for him to come and make proof of his art at Court. Kelley of course excused himself, saying he was sick. Three times he was summoned, and then the guard was despatched to bring him. The accusation was Laesus Mejestatis, and the city wonders what will be the end. The Emperor dare not openly execute him, for fear of Rosenberg and the strong feeling in the State for a change of ruler. Yet he may easily be put to death secretly in that castle where he is confined, "and Rosenberg not know otherwise than that he liveth, or is dead by disease. Almost grown now to be a common Practice in the Empire, and in the Palatine especially, noted that way."

This dark hint is almost a prophecy of Kelley's fate; but the doom was not yet quite prepared. On December 5, 1593, Dee received news of his having been set at liberty on the previous October 4, just two and a half years after his arrest. Not a word of him in Dee's diary in the meantime, until March 12 of that year, when the old man records that he dreamt much of Kelley two nights running, "as if he wer in my house, familiar, with his wife and brother."

Kelley characteristically says he was "utterly incapable of remaining idle even in prison, and employed his time in writing alchemical treatises," from which it seems he was allowed books and papers, for his writings are mere compilations

from ancient chief masters of the art. In *The Stone of the Philosophers*, dedicated to Rudolph, he speaks of two imprisonments, tells him grandiloquently that he has for two or three years (1588-91) used great labour and expense to discover for him that which might afford profit and pleasure; and adds, with great bombast, "If my teaching displeases you, you are still wandering astray from the true scope and aim of this matter, utterly wasting your money, time, labour and hope." Truth is more desirable than anything else, and posterity will discover that he is to be counted among those who have suffered for it. Kelley as a sufferer for truth is highly entertaining, but he goes on to make a still more distasteful allusion. "It always way, and always will be, the way of mankind to release Barabbas and crucify Christ."

Beside this treatise Kelley certainly produced an earlier writing of some sort on the subject, which Dee discussed with the Archbishop of Canterbury on July 13, 1590. It had apparently incurred his displeasure. Mr. Waite attributes two other short papers to Kelley, *The Humid Path* and *The Theatre of Terrestrial Astronomy*. A couple of rather quaint alchemical poems — one of thirty-nine stanzas, from which the heading of this chapter is taken — are doubtless by him, perhaps written also in captivity.

During the next year letters were two or three times exchanged between Kelley and Dee, and in March, 1595, Francis Garland, who had then not long returned from Prague, "came to visit me and had much talk with me of E.K." Kelley was apparently then restored to the Emperor's favour, for on August 12, Dee says he "receyved Sir Edward Kelley's letters of the Emperor, inviting me to his servyce again." Did Kelley think there might be further hints to be got from his old alchemical master? Then under date of November 25, 1595, Dee enters this curt note: "the news that Sir Edward Kelley was slayne." Never thereafter does he mention this adventurer's name.

The prevalent story is that Kelley was again imprisoned in one of Rudolph's castles, and that, attempting to escape by a turret window, he fell from a great height and broke both legs, receiving other injuries, from which he shortly died. It is even said with some amount of credibility, that the Queen wrote imperatively to Dyer to secure his release, and that everything was prepared in readiness to convey him secretly to England, and that he was escaping for that purpose when the accident happened. This story has hardly been tracked home to its source. It may be true. On the other hand, the end may have come in the more swift and secret manner suggested by the English merchant. In either case, the spirit warning of eleven years before, that he should die a violent death, was fulfilled. Into his forty years as much adventure, folly, trickery and deceit, fortune, fame, favour, riches and poverty, had been crowded as could supply material for many a volume of romance.

Some of the incidents were indeed used a few years after his death by more than one dramatist. Dee had only quitted the world about a year and a half when Kelley's pretensions, Dee's learning, and the whole paraphernalia of alchemy, were severely satirised by Ben Jonson in *The Alchemist* (1610), a play which reflects all the crudest superstitions of the time. The credulous knight, Sir Epicure Mammon, describes Subtle, the alchemist, as

"A divine instructor can extract
The soul of all things by his art; call all
The virtues and the miracles of the sun

Into a temperate furnce; teach dull nature
What her own forces are.
A man the Emperor
Has courted above Kelley; sent his medals
And chains to invite him.”

In Butler’s *Hudibras*, first published in 1663, but written ten or fifteen years earlier, Dee and Kelley are again cited, though the satire is chiefly directed against Sidrophel, i.e., William Lilly. The devil is said to have appeared “in divers shapes to Kelley;” and in the description of Sidrophel, these lines occur:

“He had been long toward mathematics,
Optics, philosophy and statics,
Magic, horoscopy, astrology,
and was old dog at physiology;...
He had read Dee’s Prefaces before
The Devil and Euclid, o’er and o’er;
And all the intrigues ‘twixt him and Kelley,
Lescus, and the Emperor, would tell ye.”

One may wonder how much these scurrilous references had to do with fixing Dee’s reputation in the eyes of his immediate posterity.

CHAPTER XVII

RETURN TO ENGLAND

“If I have done my dutiful service any way to her Majesties well liking and gracious accepting, I am greatly bound to thank Allmighty God, and during my life to frame the best of my little skill to do my bounden duty to her most excellent Majestie.”

— Dee, *Compendius Rehearsall*

Upon Dee’s arrival in Bremen on April 19, 1598, a house was at once hired, and the family moved in on May 13. He put out his three saddle horses to grass in the town meadow till Michaelmas, for nine ducats, and presented the twelve Hungarian coach horses to the Landgrave of Hesse, to whose kindness he had been indebted for protection as he passed through his territories. In June, Thomas Kelley, his wife Lydia; Francis Garland, and Dyer’s man, Edward Rowley, left for England. At the same time Edmond Hilton returned to Prague. An agreement or bond had been entered into between the late partners that the proceeds of the wonderful discovery should be shared. Hilton was back on July 30, with news of Kelley: perhaps not good news, for three nights after, towards daybreak, Dee’s sleep was disturbed by a “terrible” dream, which visited him not for the first time, that “Mr. Kelley would by force bereave me of my books.” Hilton left almost immediately for England with a letter from Dee to Walsingham to disclose the treason of the Jesuit, Parkins. This letter has been already referred to [p. 201 in original], but it contains other interesting matter, all conveyed in Dee’s beautiful neat hand. He has already

written to acknowledge the Queen's gracious letter of safe conduct, received from Walsingham, but Hilton and the two English gentlemen, Tatton and Leycester, are still detained at Stade, waiting for a wind. After speaking of the designs of the Jesuit, he goes on to give the Secretary an important summary of the state of affairs in the Low Countries, where the struggle for independence was well advanced. "The Provinces all incline to a desire to endure one fortune and become one whole united. They acknowledge Her Majestie's Wars to be just but uncompassable. Their minds are getting alienated from us, only fayr means and great wisdom will win them over." He has taken counsel of "the one of all the inhabitants the most sharp-witted, the greatest understander of all occurrences generall of secret purposes; the best languaged one (as knowing Hebrew, Greek, Latin, French, Italian, Dutch, etc.); and one employed in the councils; one who was courageous in the first bickerings with Spaniards at Antwerp; who has observed all the beginnings and proceedings of errors, political and military, committed on all hands. Now and then he visiteth me, and I have asked him to pen his opinion on what can be done to recover and reform the States, but as yet he has not found leisure." Then he begs the Secretary's leniency if he has offended in writing of matters not pertaining to him, "and of which no doubt your honour has already had all necessary advertisement from properly authorised persons." He will write no more of public affairs, his coming thither was no public but his private cause, the beginning of his "nere return-making into my most derely beloved Native Country."

At the same time (August 20), Dee wrote to his friend, Mr. Justice Young, that the messengers had been delayed twenty-five days waiting for a wind; that he feared the Low Countries were bent on shaking off the Queen's authority if they could; and that he feared he sould have "to endure this Breamish habitation this winter, as I do not hear a word of the approach of Sir Ed. Kelley, or of Mr. Dyer's return."

In Bremen, Dee mingled with all the learned and distinguished men of the time. A memento of this period is to be found in an album, the *Thesaurus Amicorum*, of Timon Coccious (or Koch), a young Bremen student who died while at Leyden University three or four years after. The album of white vellum, faded and yellowed with age, with its edges still shining with the mellow lustre of old gold, was the receptacle of autographs, wise and pithy sayings, original or quoted, all inscribed after the beginning of July, 1589. Sayings from Plautus and Seneca, Juvenal, Pythagoras and Homer, follow and press close upon the wisdom of Boethius, from *De Consolatione*, and the divine poetry of Dante. The first to write in the book was Bruno, Count Mansfeldt, Helmstad, July 1. He is followed by Dr. Cristoph Pezel, then Professor of Divinity and superintendent of the churches at Bremen, and on the seventh page is Dee's beautiful signature and his motto — in the light of posterity's unchallenged view of him, full of irony — "Nothing useful if not honest."

Mr. Hart, minister of the English colony at Stade, who had escaped from the Spanish service in Flanders with Sir William Stanley, and the Deputy Governor of Stade, both came from the port town near by to see Dee. Dr. Heinrich Khunrath was the chief writer of the advanced school of alchemists who passed from the pursuit of material gold to the discovery of incorruptible spiritual treasures hidden in the palaces of truth to which they provided a spiritual key; and it is a pregnant fact that all of his books were published after this conference with Dee. Daniel Vander Muelen was another visitor, and from Mr. Southwell Dee had news that Edward

Dyer was sent on a mission to Denmark. Two or three weeks later, he met Dyer unexpectedly in the town. News came of Rosenberg, and several of Dee's men left him to return to Kelley. He was warned to leave his house in Bremen.

By November, Dee resolved to wait no longer for Kelley, but to start for England. He still hoped, however, to meet that individual ere he embarked. On November 19, his whole party took ship by the Vineyard. A crowd of townspeople and students collected to bid him good speed, and to see the homeward bound travellers off; quite a little scene took place, which must have pleased and flattered Dee immensely, for there was no lack of a man's full share of vanity in him. Pezel had composed some verses on his departure, had got them printed the night before, and as the party were leaving Bremen for the seaport, a few miles away, the Professor distributed copies as a parting surprise. The travellers arrived in the Thames at Gravesend on December 2, and on landing the next day went straight to the house of Mr. Justice Thomas Young, at Stratford. We may imagine Jane's relief at getting her children safely back to England, with the addition of Michael, born at Prague, nearly four years, and little Theodore, born at Trebona, nearly two years before.

Since Dee's departure from England six years ago, great events had happened. The "invincible" Armada of Philip had been beaten in a six days' running fight up the Channel. The Queen's hated rival, Mary Queen of Scotland, had been put to death; Leicester's short dictatorship of the Netherlands had begun and come to an end. Leicester had been dead about a year. New favourites had arisen in the Queen's favour. But even more significant than these public affairs had been the upward movement in literature, the birth of dramatic art, a passionate outburst of poetic fervour, the growth of a taste for well-disciplined prose. Many splendid fruits of this movement had not yet seen the light, Sidney's *Arcadia* and the first part of Spenser's *Faerie Queen* were to be issued within a few months; the first play of Shakespeare was publicly performed within little more than a year of Dee's return. But Lyly and Marlowe had already, during his absence, given *Campaspe*, *Tamburlaine* and *Doctor Faustus*, to be performed by actors in the first stationary home of the earlier nomadic players, the theatres of Shoreditch, immediately to be followed by those of Bankside. Bacon was perhaps even then meditating his *Essays*, published some half a dozen years later; Hooker issued the first books of his monumental *Laws of Ecclesiastical Polity* within four years; and Nash, Peele, Green, and a horde of other writers, were contributing to establish the English literary renaissance. One can scarcely help wondering how much the fabulous stories of Dee and Kelley, which must have reached Marlowe's ears, contributed to his splendid dramatisation of the Faust legend (first printed in Frankfurt in 1587). But after all, even the story of Dee's angels and Kelley's gold, pales before the lurid glow of the stories of the earlier alchemists, Agrippa and Paracelsus.

Dee landed in England a disappointed and a partly disillusioned man, clinging to a belief which was yet useless, unprofitable to him. He could prove nothing of Kelley's exploits. But he lost no time in repairing to Court, and on December 19 he was graciously received by the Queen at Richmond.

On Christmas Day he first slept in his own house at Mortlake, and beheld for himself his ruined and rifled library, with its precious books and instruments missing. He himself was in dire straits. He had little left him save his wife and children, and some still faithful friends. He took the house over as a tenant from

his brother-in-law, Fromond, and settled down in the old quarters. Adrian Gilbert was the first visitor, generously offering “as much as I could require at his hands, both for my goods carried away, and for the mynes.” Very soon Thomas Kelley arrived and followed suit by offering the loan of ten pounds in gold; he afterwards “sent it me in Hungary new duckettes, by John Croker the same evening. He put me in good hope of Sir Edward Kelley his returning.”

A second daughter was born, and christened at Mortlake, on March 5. The name given her was Madinia, suggested by the busy little spirit who had been so helpful at her first coming. The child was christened at Mortlake on the 5th, Sir George Carew as godfather, Lady Cobham and Lady Walsingham, godmothers. Letters came from Kelley by Garland in March, and replies were despatched by Thomas Kelley in April. Dee is careful to give his former skryer his full title: — “Sir Edward Kelley, Knight, at the Emperor’s Court at Prague.” “Francis Garland was by, and Mr. Thomas Kelley, his wife. God send them well thither and hither again.”

On Lady Day, the children begin to go to school with Mr. Lee at Mortlake. “I gave him his house rent and forty shillings yerely for my three sons and my daughter. The house rent was allmost 4s. yerely, of Mr. Fisher his new house.” Arthur was now ten, Katherine nine, Rowland seven and Michael five. The youngest boy, Theodore, born at Trebona February 28, 1588, was rather more than two. Dee notes that he was “wened” on August 14, 1589. Katherine was not long under the Mortlake schoolmaster, for on May 21 “my dowghter was put to Mistress Brayce at Braynford [Brentford], hir mother and Arthur went with her after dynner.” On April 15, he writes of his neighbour and friend, the Vice-Chancellor: “Good Sir Francis Walsingham died at night hora undecima.” Burleigh was the only one of the old friends left. He records an interesting visit from “the two gentlemen, the unckle, Mr. Richard Candish, and his nephew, the most famous Mr. Thomas Candish, who had sayled round abowt the world.” Cavendish was a Suffolk man. His wonderful voyage occupied two years and nearly two months. He died at sea within a couple of years from Dee’s note. The uncle Cavendish interested himself with the Queen and the Archbishop to obtain for Dee the Provostship of Eton. This, too, fell to the ground, and Cavendish considerably sent him a hogshead of claret. He also lent or gave money to Dee and his wife, in all 302 pounds: in “ryalls and angels.” Dee gave him in return one of his most valued treasures — an alchemical work: —

“A copy of my Paracelsus, twelve lettres, written in French with my own hand, and he promised me before my wife never to disclose to any that he hath it; and that if he dye before me he will restore it agayne to me; but if I dy befor him that he shall deliver it to one of my sonnes, most fit among them to have it. Theoddor had a sore fall on his mowth at mid-day.”

Dee’s income was now almost a negligible quantity. The parsonages had paid him no rent since he left England. He went two or three times to Lambeth, and talked boldly to Archbishop Whitgift of his right to them.

He began to interst himself in his immediate neighbourhood with the idea of stopping the “Bacchus Feast,” at Brentford, a rowdy celebration which had excited his indignation and of which he gave the Bishop of London a warning.

In August a domestic tragedy occurred: one of the women servants became melancholy and went out of her mind. Lunacy being a disease beyond even Dee's medical knowledge, and for 300 years after, being treated more or less as demoniacal possession, it is no wonder that the remedies he tried were ineffectual. It seems another instance of the false views of Dee's character that have been repeated over and over again, that the editor of his Manchester diary urges as proof of Dee's magic and evil experiments that "some of the inmates of his house became suicides when in his service."

"Aug. 2. Nurs her great affliction of mynde. Aug. 22. Ann my nurse had long byn tempted by a wycked spirit, but this day it was evident how she was possessed of him. God is, and hath byn, and shall be her protector and deliverer. Amen.

"25th. Ann Frank was sorrowful, well comforted, and stayed in Gods mercyes acknowledging.

"26th. At night I anoynted (in the name of Jesus) Ann Frank, her brest, with the holy oyle.

"30th. In the morning she required to be anoynted, and I did very devoutly prepare myself and pray for vertue and powr, and Christ his blessing of the oyle to the expulsion of the wycked, an then twyse anoynted, the wycked one did resist a while.

"Sept. 8. Nurse Ann Frank wold have drowned herself in my well, but by divine Providence I cam to take her up befor she was overcome of the water."

After this Dee had the woman carefully watched.

"Sept. 29. Nurse Ann Frank most miserably did cut her own throte, afternone abowt four of the klok, pretending to be in prayer before her keeper, and suddenly and very quickly rising from prayer, and going toward her chamber as the mayden her keper thoght, but indede straight way down the stayrs into the hall of the other howse behind the doore did that horrible act. And the mayden who wayted on her at the stayr fote followed her and missed to fynde her in three or fowr places, tyll at length she hard her ratle in her owne blud."

In november the Queen came to Richmond and sent for Dee. She offered gaily to send him something to "kepe Christmas with." This promise was repeated to his friend, Richard Cavendish, a week or so later: "she told him she wold send me an hundred angells to kepe my Christmas withall. Next day, December 4, the Queen's Majestie called for me at my dore, circa 3 1/2 a meridie, as she passed by, and I met her at the East Shene Gate, where she graciously putting down her mask did say with mery chere, 'I thank thee, Dee. There was never promise made but it was broken or kept.'"

The thanks were obviously ironical for the reminder of the promise; the rest of the speech was rather cruelly jocose, for, as Dee adds, she had promised to send the money that day. However, on the 6th, an earnest of the gift arrived, in the shape of 50 pounds. On the 14th, she again called for Dee as she rode by his door, "to take ayre," and he met her at the park gate as before. He does not indicate the subject of the conversation, but it was probably a request on his part for some kind of royal

permission to continue his experiments in alchemy or transmutation, for on the 16th he tells of a visit from Richard Cavendish, who has received from the Queen, “warrant by word of mouth to assure me to do what I wold in philosophie and alchemie, and non shold chek, controll, or molest me.” Coupled with this message, she sent another promise to make up the 100 pounds.

Dee’s mind was now bent, he says, to deal with his “alchemical exercises,” and the only distractions he appears to have had were the constant visitors and small disasters of the children. The boy Rowland fell into the Thames on August 5, over head and ears, about noon or soon after. Their favourite place of play seems to have been on the river bank, and accidents there were of no infrequent occurrence. Arthur, when a child, had fallen from the top of the Water-gate Stairs to the bottom, and had cut his forehead badly. Theodore also had a nasty fall.

CHAPTER XVIII

A ROYAL COMMISSION

“A wise man never goes the people’s way:
But, as the planets still move contrary
To the world’s motion, so doth he, to opinion.
He will examine, if those accidents
Which common fame calls injuries, happen to him
Deservedly or no? Come they deservedly,
They are no wrongs then, but his punishments:
If undeservedly and he not guilty,
The doer of them, first, should blush, not he.”

Jonson, *The New Inn*

Dee had now abandoned all hope of recovering the two Midland parsonages, the small income of which was all that lay between him and utter dependence upon charity. His thoughts were now set on the mastership of St. Cross, at Winchester, a benefice which he had already, some twenty years before, petitioned the Queen to grant. Dr. Bennett, the present master, who had then obtained it, might now, he thought, fitly be made a bishop. The Countess of Warwick secured from the Queen a promise that Dee should have it, “if it were a living fit for me.” The Archbishop of Canterbury affirmed that it was most fit for Dee and Dee for it. The Lord Treasurer protested, “I will do what I can with her Majestie to pleasure you therein, Mr. Dee.” Lady Warwick, faithful to his cause, repeated her request the following year, and still there was no news of Bennett attaining a mitre. Dee went to Court at Nonsuch in August, and a day or two after his return dined, at Burleigh’s invitation, with the Lord Treasurer and his two sons, Sir Robert and Sir Thomas Cecil, at Mr. Maynard’s, at Mortlake. Burleigh also sent him venison and invited him again to meet Lord Cobham.

All promised their influence in obtaining for him the coveted Mastership. But it was another castle in the air. His friends were extremely good to him. In May, 1591, he says:

“Sir Thomas Jones, Knight (unaxed) offered me his castell of Emlyn in Wales to dwell in so long as he had any interest in it, whose lease dureth yet twelve yeres, freely with commodities adjoining unto it; and also to have as much mow land for rent as myght pleasure me sufficiently. The 27th day he confirmed the same his offer agayn before Mr. John Harbert, Master of the Requestes, in his hall at Mortlake, which his offers I did accept of and he was glad thereof.”

He could never have entertained the idea of going to live in Wales, but no doubt it was policy to accept all offers. Herbert was an old friend and neighbour. His daughter Mary and Arthur had played at a childish marriage years before. They seem to have been playfellows still, after the Dees' long absence, for in this June an accident happened to Arthur “at Mr. Herbert's, about sun setting.” He was “wounded in his hed by his wanton throwing of a brik-bat upright, and not well avoyding the fall of it again. The half-brick weighed 2 1/2 lb.” On May 3 of the following year, Arthur aged thirteen, became a Westminster scholar. “Wensday at ten of the clock Arthur was put to Westminster Schole, under Mr. Grant and Mr. Camden.” He came back home in two or three weeks, perhaps only for a few days, and Dee in returning him to lessons wrote a characteristic letter to his friend, William Camden, the antiquary. It shows how carefully the father had studied the child's health, abilities, and the quick temper, inherited from his mother. There is a tender touch in that mother's forethought to furnish the boy with means towards a special cleanliness which the provision for ablutions at Westminster did not contemplate. The “little chest with lock and key” for the firstborn son to take to school is always a family event of magnitude.

“22 May 1592.

“Worshipfull Sir. I have here returned your scholer unto your jurisdiction, beseching you to shew your charitable affection towards him: he had more and in better order then he will recover speedily. Of your great skylle and faithfull industrie in your function, it is most certayne to your great credit and merit. Of the wonderfull Diversitie of Childrens Dispositions, much you can say by experience: but of myne (this Arthure) I am to request you to conceyve at my hands, that he is of an exceding great and haughty mynd naturally, ready to revendge rashly. The naturall inclination is to me evydent: as who hath [Sol] in horoscopo, and [Mars] in corde Leonis. Dictum sapienti sat esto: for vera curatura you may alter this naturall courage to true fortitude and not to frayle rash fancies: Socrates did overcome by grace Divine and his industrie, his untowardness, signified by the Art physiognomicall — you know the historie. This spirituall grammaticall concords of good manners I have great care that all my imps may be instructed in, to the more apt and skilfull serving of our Creator. Syr, my wife hath delivered unto him some more apparayle and furniture in a little chest with lock and key, yea, and with some towales to wype his face on after the morning and other washings of hands and face: willing him to buy him a stone basen and a pott, or a potter, to have allways clene and wholsom water in for his use.

“The boy liketh abundance of meate well: but very bashfully he sayd that there proportion of Drinke is somewhat to[o] little. I pray you by discretion listen to the voyce and opinion of the rest of the counsells within him, for now & in the

summer seasons, the proportion of Drink naturally doth increase above winters appetite thereof.

“Thus I am bold to cumber your wurship with these my speedy ragged lynes. And therein I besече you of one thing more, that his writing, both of roman and secretary hand decay not, but rather be amended: for a fayre writing is often tymes a good grace to matter very simple.

“Wherefore know that today they have at the right Wurshipfull Mr. Deans [Dr. Nowell’s] very honorable guests, and that this night it is intended that they will sup and lodge all night at Fullham. God bless your wurship and prosper you in all & ever your true and faithful wellwisher.

“John Dee.

“To the Worshipfull my singular friende Mr. Camden these be delivered.”

On New Years’ Day, 1592, “at the sunrising exactly,” Dee’s third daughter was born. She was christened Frances on the afternoon of the 9th, and sent off with her nurse to Barn Elms the same day. In August her father notes, “Remember that all things is payd to our nurse at Barnes for the girle Francys Dee from hir birth untill the ende of her eighth month, lacking 12s., and on Sunday the 27th of this August we gave the nurse ten shillings. The eighth month ended the twelfth of this month.” The child stayed on with her nurse till February 14 of the next year, when she was fetched home, “the woman very unquiett and unthankfull.”

Two entries, “March 9, the Pryvy Seale at night,” and March 16, “the great Seale,” refer to a promise given by the Queen to Dee’s cousin, Dr. William Aubrey, of Kew, now Vicar General and one of the Masters of Requests, about five rectories in the Welsh diocese of St. Davids, which Dee was to have when they fell vacant. They were only worth 74 pounds 11s. 2d. in all, and Dee says he never received a penny from them.

Things were so desperate that at last, on November 9, 1592, he drew up a supplicattion which his friend, Lady Warwick presented the same day to the Queen at Hampton Court. This document, which Dee says Elizabeth took in her own hand to read herself, instead of handing it to a secretary, begged for a personal audit of, and investigation into, the state of his affairs. It is probably a unique petition, and in reading it we are scarcely astonished at the confidence with which the old astrologer, now grown old in the Queen’s service, claims her consideration and provision. He appears to regard it as little less than a national reproach that a man of science like himself should be left in beggary. And so indeed it was. For thirty- four years had the Queen, true to the Tudor motto — to use everyone as a servant, to owe no gratitude, only acceptance or approval — spent promises upon him, but she had never given him a chance of providing for himself.

“Forasmuch as the intolerable extremitie of the injuries and indignities which your most excellent Majestie’s faithfull and dutifull servant, John Dee, hath for some years last past endured, and still endureth, is so great and manifold as cannot in friefe be unto your Majestie expressed, neither without good prooffe and testimonie have credit with your Majesties, and because also without speedy and good redress therein performed, it is to be doubted that great and incredible

inconveniences and griefs may ensue thereof in sundry sortes, (which yet may easily be prevented) your Majestie's foresaid most humble and most zealously faithfull servant beseecheth your Majestie to assign twoe or more meet and worthy persons, nobly and vertuously minded, who may and will charitably, indifferently, advisedly, and exactly, see, hear and perceive at the house of your Majestie's said servant in Mortlake, what just and needful occasion he hath thus to make most humble supplication unto your Majestie; and so of things there seen, heard, and perceived, to make true and full report and description unto your Majesty. And thus your Majestie's foresaid most dutiful servant beseecheth the Almighty God most mercifully, prosperously and alwayes to bless and preserve your most excellent Majesty royal. Amen.

"A. 1592. Nov. 9."

The result of this unusual request was that two commissioners were at once appointed by the Queen. Within a fortnight Sir John Wolley, Secretary for the Latin Tongue to Queen Elizabeth, and one of her Privy Council, and Sir Thomas Gorges, Knight, of the Queen's Wardrobe, were seated in Dee's "late library room" at Mortlake, prepared to listen to his manifesto.

We may be sure he had long been preparing for this day. He seated the two gentlemen at a table in the middle of the room, placing near them a couple of other tables spread, one with letters and records of his "studious life for the space of a halfe hundred years, now by God's favour fully spent," the other, with all his own books, printed and manuscript, a complete author's collection of original works. At the suggestio of the commissioners he had occupied the space of thirteen days in praparing the autobiography which he called "The Compendious Rehearsall of John Dee, his dutifull declaration, etc.," so freely quoted in these pages. "It was in some order of method most briefly and speedily contribed against this day;" and in every respect, save that of chronological order, it is a pattern document. It gives the impression of having been written down in fragments, each incident or recital being complete in itself and most carefully dated, on a separate sheet of paper, and then the sheets shuffled and picked out by chance to follow each other for putting together. The story leaps from college day sin 1547 to travels in 1571, on to Christmas gifts in 1590, back to the Queen's visit in 1575, thence to his improsonment and appearance before the Star Chamber in 1555, and his reformation of the Calendar in 1582. He passes very lightly over his late travels abroad, merely ading that he "was very ungodly dealt withall, when I meant all truth sincerity, fidelity and piety towards God, my Queen and Country." The catalogue of his works is valuable, but it is unnecessary to print it in the present volume. He concludes his list of eight printed and thirty-six manuscript works ("some perfectly finished and some unfinished yet") with the very latest, the Compendious Rehearsall itself, adding that there were many other books, pamphlets and discourses not set down. He explains that the list is given neither "as they were written nor by order of yeares," but hastily as they came next to hand "out of diverse chests and baggs wherein they lay." He ends the chapter with a remarkable proof of the fecundity of his still active brain, in spite of his sixty-five years.

“The most part of all these here specified lye here before you on the table on your left hand; but by other books and writings of another sort (if God grant me health and life thereto of some ten or twelve years), I may hereafter make plain and without doubt this sentence to be true, Plura latent, quam patent.” What other works he did accomplish in the sixteen years yet to run of his long life, he described in an Appendix to the Rehearsal, written about two years afterwards, and printed by Hearne, and by the Chetham Society at the end of the autobiographical narrative, to which he had already added a short chapter giving an account of the result of the Commissioners’ visit, calling it “The Sequel of the Premisses.”

To return to the day of the visit, November 22, 1592. The Queen’s Secretary and the Gentleman of her Wardrobe arrived at Mortlake probably in the morning, and stayed to dinner. Having seated them at the tables in the library, Dee read to them, or related with the manuscript at hand, the story of the “halfe hundred” years spent in the attainment of “good learning,” which he reckoned from his leaving Chelmsford Grammar School for Cambridge. It was, of course, drawn up with the skill of a practised author, divided into fourteen chapters, each with an attractive and pithy title. “Her Majesties specially Gracious and very Bountifull favours towards me used etc.,” is by far the longest; the shortest is the twelfth: “The Resolution for Generall, very easy, and speedy Remedy in this Rare and Lamentable Case.” The remedy he suggests is to make him either Master of St. Cross; Warden of Manchester; Provost of Eton; or Master of Sherborne, one of which posts had been already promised him four times in three years. The tenth chapter is “The hard making of provision for some hundred pounds [?a year] for the maintenance of me, my wife, our children and family for these three last years, and that but with a meane dyet and simple apparel: I having not one Peny of certaine Fee, revenue, stipend or Pension, either left me, or restored unto me, or of any yet bestowed on me.” He shows how at his return three years before, he found himself penniless; cut off for ever from his two parsonages; disappointed as yet of the large yearly allowance promised him for his life from Bohemia. Probably on parting from the then affluent Kelley, some bond was entered into by him or by Rosenberg to transmit to him a share of the enormous profits they expected from the multiplication of the gold. “To save us from hunger starving,” he had had to appeal to friends, and he records gratefully that some who had been unfriendly before he left came to his aid on his return. They “put to” their helping hands in many ways, and alredy he had received from them a sum of 500 pounds and more. Yet he has had to pawn his plate little by little until all was gone. “After the same manner went my wife’s jewels of gold, rings, bracelets, chaines and other our rarities, under the thraldom of the userer’s grips, till non plus was written upon the boxes at home.” He has borrowed upon sureties, upon his personal bill of hand, upon his word, upon his promise, and he has run up accounts, so that now he is in debt for 333 pounds, beyond the 500 pounds. “The true accounts of all these gifts, loans, and debts upon score, talley, or book, is here before your Honours;” how the usurer devoureth him and how he is “daily put to shame, may be seen.” Other necessary expenses amounted to 267 pounds, so that he has spent but 566 pounds in three years for housekeeping,” and that with great parsimony, and with gifts from good friends of “wine, whole brawnes, sheep, wheat, pepper, nutmegg, ginger, sugar, etc., and other things for the apparel of me, my wife and our children.” He has mortgaged his house for 400 pounds, and now will have to sell it for half it cost to

pay his debts, he and his family to become wanderers and homeless vagabonds, furnished only with bottles and wallets. What shall he do, he pitifully begs, that he may prevent his name being handed down to posterity as a warning to lovers and students of truth not to follow in his steps and be given to such disgraceful shifts and indignities? He ends with a passage of true eloquence:

“Therefore, seeing the blinded Lady, Fortune, doth not govern in this commonwealth, but justitia and prudentia, and that in better order than in Tully’s Republica, or Books of Offices, they are laid forth to be followed and performed: most reverently and earnestly (yea, in manner with bloody teares of heart), I and my wife, our seaven children and our servants (seaventeene of us in all), doe this day make our petition unto your Honours that upon all godly, charitable and just respects had of all that you have this day seene, heard, and perceived, you will make such report unto her most excellent Majestie (with humble request for speedy reliefe), that we be not constrained to do or suffer otherwise than becometh Christian and true faithfull obedient subjects to do or suffer. And all for want of due mainteynance.”

CHAPTER XIX

DEE’S LIBRARY

The commerce of books accosteth and secondeth all my course, and everywhere assisteth me. It comforts me in age, and solaces me in solitarinesse. It easeth me of the burden of a wearysome sloth, and at all times rids me of tedious companies. It abateth the edge of fretting sorrow and...is the best munition I have found in this human peregrination. — Montaigne, *Essays* (Florio)

The account of the library at Mortlake as it was when Dee left it in 1583, forms one of the most valuable parts of the *Compendious Rehearsall*. Comparing it with the catalogue which he made before leaving with Laski, we can see at a glance of what intrinsic value was this collection of precious books which so often haunted its owner in his dreams. Two original copies of the Catalogue of manuscripts remain, one of which is dated September 6, 1583, a fortnight before he sailed from England, and there is a third, made by Ashmole from one of these.

The library contained, however, not only books and manuscripts, to the number of four thousand, bound and unbound, but scientific instruments collected from several parts of Europe. The books alone Dee valued at 2,000 pounds in the current value of the day, for many of them were unique autographia of famous and rare authors. As a further proof of this estimate, he cited to the two Commissioners a great volume in Greek, two others in French, and a third in High Dutch, which together cost him, and his friends for him, 533 pounds, as the endorsements upon them will show.

The instruments included a valuable quadrant, used and he says made, by his friend, Richard Chancellor, the navigator to Russia and the White Seas. It measured five feet in semi-diameter, and Dee relates that Chancellor and he together made observations of the sun’s height at meridian with it, before this exploring seaman sailed on his last voyage (in which he and his crew perished) in

1556. Many years after, the quadrant was repaired and re-engraved by Mr. Bromfield, the Lieutenant of Ordnance who had given it to Dee, at a cost of 20 pounds. On Dee's return to Mortlake, he found it barbarously hacked to pieces with hammers.

There was also a ten foot radius Astronomicus, (some early form of telescope), its staff and cross divided with equal markings, like Chancellor's quadrant. It swung in a frame, and could be easily directed to any point in the heavens, or used for mensuration on the earth.

A couple of globes of Gerard Mercator's best make were among the most valuable contents of the library, especially as upon the celestial globe Dee had marked his own observations of comets, their place and path in the heavens. There were other objects which Mercator had constructed specially for Dee, viz., three theorics, two with horizon and meridian lines in copper. A number of compasses of many kinds were among the objects, for Dee had invented, as we have seen, what he calls a "Paradoxall Cumpass." There was also a great piece of load-stone, or "magnes-stone," of extraordinary virtue. It had been sold for five shillings, but "being divided up and parted with piece-meal it made more than 20 pounds."

"There was also an excellent watch-clock, made by one Dibley, a notable workman, long since dead, by which clock the tyme might sensibly be measured inteh seconds of an houre, that is, not to faile the 360th. part of an houre. The use of this clock was very great, more than vulgar."

Then in the three laboratories, the chambers and garrets, were stores of "chemical stuff," which he had been twenty years getting together. Also a great cart-load of special vessels for chemical use, some earthen, some of glass, metal and mixed stuff, which he had brought from Lorraine when Mr. Powell and he had gone over in 1571. Of these, only a few broken bits remained. He describes other things left in his other or "open" library, and in particular a "great bladder with about four pounds weight of a very sweetish thing, like a brownish gum in it, artificially prepared by thirty tymes purifying it; whosoever came by it hath more than I could well afford him for one hundred crownes, as may be proved by witnesses yet living."

As regards the manuscript treasures of the library, he mentions specially a great case or frame of boxes, full of rare evidences of lands in Ireland which had been in the hands of some of the ancient Irish Princes. Agreements for submission and tributes, with seals appended, and many other valuable records of the descent of these manors to such families as the Mortimers, the de Burghs, the Clares, etc. How he came by these, save in the way of a collector, does not appear. His interest in Welsh ancestry would account for his amassing Welsh records, of which he says there were many deeds of gift from Welsh princes and nobles, of land devoted by them to the foundation and enriching of religious houses. Norman deeds also dating back to the Conquest. These were all methodically stored away in separate boxes, each marked on the front — "the fore part of the boxes" — with chalk, explaining its contents. When he returned from his six years wandering abroad, and looked in the poor boxes, he found the name outside was all that was left. The deeds had been "imbezzled away, every one of them, which is a loss of great value in sundry respects, as antiquaries can testify for their part, and noble heralds can tell

for their skill, and as her Majesties officers, for her interest and titles Royall, may think in their consideration.”

Near this great chest of boxes stood another box, very much less in size, measuring only two feet by one and a half, which was filled with nothing but seals of coats of arms; many of these were named, and had already proved invaluable to students of heraldry and genealogy, as well as to the Queen’s Heralds who had carefully examined them, also a number of other antiquaries as Camden, Stow and others. The Clerks of the Records in the Tower had sat whole days in the library at Mortlake, “gathering rareties to their liking out of them.” Dee was no blind collector, hoarding things because they were of value to himself. He was a true altruist, gaining his knowledge to share with others.

“Unto the Tower I had vowed these my hardly gotten muniments (gotten as in manner out of a dunghill, in the corner of a church, wherein very many were utterly spoiled by rotting, through the raine continually, for many yeares before, falling on them through the decayed roof of that church, lying desolate and waste at this houre).

“But truly well deserve they the imprisonment of the Tower, that will now still keepe them, if any publique warning by her Majestie or her right honorable Councill were given for restitution of them to the Office in the Tower.”

Dee’s own works were of course in the library although not included in his catalogue. He drew up a list of them for his Apology to the Archbishop in 1595, by which it appears that before he left England eight had been published. The unprinted books and treatises, some, he owns, not perfectly finished, numbered forty-six. To these others were added before he died; two that may be especially named were upon the Three Oracular Sentences of the Ancients: *Nosce te ipsum*, *Homo Homini Deus*, and *Homo Homini Lupus*, (1592); and a “Treatise upon the Queen’s Sovereignty over the Seas,” a fitting subject indeed for an author who had personally known most of the great navigators, and who had already written so intelligently upon the navy and the coast fisheries of “Albion.” The book was undertaken at the request of “an honorable friend in Court.” It had, of course, a long Latin title — *Thalattocratia Brytannica*, etc. It was finished at Manchester and dated September 20, 1597. Another work projected, and perhaps partly finished, was to be called *De Horizonte Aeternitatis*, to consist of three treatises in answer to Andreas Libavius, who had published a book written in misapprehension of something in Dee’s *Monas*.

We spare the reader the long list of titles of Dee’s own books, poured out in an almost continuous stream since *The Art of Logicke*, in English, printed 1547, during his college days. The only idle years as regards literary output, from then up to his departure for life abroad in 1583, seem to have been 1563, 1564, and 1566-9.

The most important of his printed contributions to knowledge are mentioned in these pages. One more may be alluded to here — his edition, in 1582, of Robert Recorde’s arithmetical work, *The Ground of Artes*, etc. Dee had probably known this accomplished physician, antiquary and mathematician at Cambridge, where Recorde was a tutor before 1545. Recorde was afterwards Comptroller of the Mint at Bristol, and Surveyor of Mines and Money to King Henry VIII., but he died a youngish and impoverished man, in the King’s Bench Prison, Southwark, in 1558.

He introduced algebra into this country; was something of an astrologer and a good mathematician. His choice of titles for his books was ingenious. In *The Whetstone of Witte* (1557), the signs for plus, minus and equality were first used in this country. In his *Castle of Knowledge*, a beautiful and dignified hymn of his own composition appears. *The Ground of Artes*, his first work (1540), went through eleven editions before Dee augmented it and added some of his apologetic doggerel rhymes.

That which my friend hath well begun
For very love to common weale
Need not all whole to be new done
But new increase I do reveale.

Something herein I once redrest,
And now again for thy behoofe
Of seale, I doe, and at request,
Both mend and add, fit for all prooffe.

Of numbers use, the endlesse might
No wit nor language can expresse,
Apply and try, both day and night,
And then this truth thou wilt confesse.

I. Dee.

From original and autograph works we may now turn to the miscellaneous contents of Dee's library — a truly vast and precious collection for one private gentleman of precarious fortune to won in the sixteenth century. Printed books were by no means easy to obtain, and manuscript copies entailed a great expenditure of skill, industry, time and cost. The text was often ignorantly or corruptly rendered by an imperfect scribe or copyist, and the scholar and collector could not rest satisfied without several versions of one work.

The cataloguer of the 200 most important manuscripts — Dee himself — enters with exactitude the size and substance of each volume. The bulk of course were in quarto, although a few folios and octavos are mentioned. Most of them were written upon parchment, but a certain number were on paper. Bindings were not noticed, chiefly because as yet few were bound. Two of Roger Bacon's tracts, however, on the multiplication of species, and on perspective, the owner describes as together "in paste-bords with strings." These identical tracts, in Dee's own hand, and now being edited by Mr. Robert Steele, from the originals in the Mazarine Library, *Bibliothèque Nationale*, Paris. From Dee they passed to Sir Richard Eden, afterwards to the Kenelm Digby Library. Treatises on kindred subjects often followed straight upon each other on the same parchment, and sometimes as many as twenty composed a single manuscript, included under a list of titles numbered as one. In some cases the treatise is described as a fragment. Once he writes "the second tract is cut out and to be answered for."

The owner's tastes and pursuits point, of course, to a large representation among his books, of works in philosophy, alchemy, astrology and medicine, with a substantial proportion dealing with metallurgy, geometry, optics, physics, Ptolomaic and Copernican astronomy, and every branch of science already known in a crude

form to Dee's famous predecessors. There are also historical chronicles; works of devotion and ethics; with a fair sprinkling of authors upon poetry, music, and the gentler arts.

Taking first the classics: Dee names the Meno, Phaedo and Timaeus of Plato; writings of Aristotle, Socrates and Hippocrates, of Cicero, Cato and Archimedes. A copy of Pliny's *Mundi Historia*, Lib. ii., Frankfort, 1543, now in the British Museum, bears Dee's signature, Louvain, January, 1550, and many of his notes. Of Euclid he had many copies, and Augustine was his guide and confessor. A vast number of Arabic and Persian writers were comprehended in the list. He was particularly rich in manuscripts of the early and mediaeval writers upon alchemy and the philosopher's stone: Hermes Trismegistus, Geber, Albertus Magnus, John Sacrobosco, Raymond Lully, Philip Alstade, and Arnold de Villa Nova. Other sciences are represented by Guido Bonatus, Anselmus de Boot (Boetius), Alhazen, John of Saxony, Jacob Alkind, and Petrus Peregrinus and a score of learned writers. Dee's own perfect and clean copy of the rare printed Epistle of Peregrinus, upon the Magnet (Augsburg, 1558), is now in the British Museum. It bears his name, "Joannes Dee, 1564," in faded ink, with many and copious notes written by its owner mostly in his large copy-book hand, with a few in the scribbling writing which he used for speed, and some marginal sketches.

Several of the manuscripts named in Dee's list are to be found among the Cotton MSS. at the Museum; in Trinity College, Dublin; and at Oxford and Cambridge.

Of English authors, who are very numerous in the list, the most eagerly sought after, judging by the number of works included by one author, were Roger Bacon and Robert Grosseteste, Bishop of Lincoln. Bacon's writings were owned by Dee in fragments. Some had been already collected and printed in Nuremburg and Paris. The only other writer as often repeated in the catalogue is Boethius, whose *Consolation of Philosophy* had tempted King Alfred into literary translation some seven hundred years before. Dee notes that he gave a manuscript of it in Greek to the Library of Cracow, on July 27, 1584. Some of the ethical and philosophical works of St. Isidore, the canonised Bishop of Seville, were duplicated. Thomas Aquinas; Duns Scotus; Richard of Wallingford, Abbot of St. Albans; Robert of Holcot, the Bible Commentator; Robert of Gloucester; William of Woodford, the Franciscan opponent of Wycliffe; Richard Rolle (de Hampole), the hermit and ethical writer, are among his other English authors. A finely illuminated history of the last years of King Richard II., by a French gentleman who was in his suite, once the property of Dee, is now in the Lambeth Library. His manuscript *Life of Edward the Confessor*, by Ethelred, Abbot of Rievaulx, is another treasure that has survived the wreck of time. It is now among the Harleian MSS. at the British Museum, with his name and the date 1575 inscribed.

Of the three or four thousand printed volumes even Dee's industry has left no catalogue. Many of them he mentions in his diaries, as Holinshed's and Stow's *Chronicles*; the Arabic book that was lost; the collection of writings upon demonology and witchcraft, which were to be so useful to his Lancashire neighbours in after life. The books of the alchemist of Louvain, Cornelius Agrippa, he once speaks of as lying open in the window of his study, and therefore in constant use in the "actions," whether theurgic or alchemistic.

He refers no doubt to Agrippa's *de Occulta Philosophia* (Cologne? 1533), a work enormously read in all countries in the sixteenth and seventeenth centuries, and translated into many languages. Another book by the alchemist of Queen Margaret of the Netherlands had an even greater popularity in England, France, Germany and Italy. This was *On the Nobility and Excellence of the Female Sex* (*de nobilitate et procellentia foeminei sexus*) which in the translation by Henry Care in 1670 becomes magnified into *Female Pre-eminence; or, the Dignity and Excellency of that Sex above the Male*. It is dedicated to Queen Catharine of Braganza.

These are a very few of the authors and writings contained in the manuscript catalogue. Such as they are, however, they give us a faint glimpse into that realm of learning and romance wherein Dee, shut into his library at Mortlake, roamed a free citizen of the world and dwelled where he would.

CHAPTER XX

ADIEU TO COURTS AND COURTING

Let me weep
My youth and its brave hopes, all dead and gone,
In tears which burn! Would I were sure to win
Some startling secret in their stead, a tincture
Of force to flush old age with youth, or breed
Gold, or imprison moonbeams till they change
To opal shafts! — only that hurling it
Indignant back, I might convince myself
My aims remained supreme and pure as ever.
— Browning, *Paracelsus*.

The immediate result of the Commissioners' visit to Mortlake was a gift of a hundred marks from the Queen. The Countess of Warwick sent off "her gentleman, Mr. Jones, very speedily," to tell Dee that Sir Thomas Gorges "had very honorably dealt for" him in the matter, and that the gift was granted. The money was brought next day (December 2) by Sir Thomas himself. He brought also a letter "full of courtesie and kindness and a token of six old angells of gold," from Lady Howard to Jane. Dee seems to have become intimate with Lady Warwick through his early friendship with John Dudley, Earl of Warwick, who died, aged twenty-four, in 1554. In his Preface to Euclid, Dee has left an etched portrait of his own age. "No two besides himself," says Dee, "can so well say what roots vertue had fastened in his brest, what rules of godly and honorable life he had framed to himself, what vices noteable he took great care to eschew, what prowesses he purposed and meant to achieve."

Dee's "few lynes of thankfulness" to the Queen for her gift were probably written at once, but only delivered by Lady Warwick on February 15, at Hampton Court, on the eve of a move to Somerset House.

On the strength of this dole, Dee was able to settle some pressing debts, and to hire a coach and go off with his wife and Arthur and Kate, to spend Christmas and New Year's Day at Tooting, "at Mr. R. Luresey his howse." The Lord Treasurer, he reports, lay dangerously sick at the time. On the 2nd they returned. On the 7th,

welcome letters, perhaps containing money, arrived from Count Laski in Livonia, to which Dee replied on the 20th, sending his letter by a Danish ship called the John of Dansk.

His reputation as an astronomer and mathematician now procured for Dee a pupil, from whom he was to receive in exchange a considerable gift or loan.

“March 17, 1593. At six after none received from Mr. Francis Nicholls 15 pounds, part of one hundred pounds, the rest whereof, 85 pounds, is to be receyved from Mr. Nicholls within a fortnight after the annunciation of Our Lady next; and after that in the beginning of June 100 pounds, and in Julie the third hundred pounds, and I am to teach him the conclusion of fixing and teyming of the moon.”

A rather unwise purchase seems to have been made this may; Dee bought the “next mansion house, with the plat and all the appertenances abowt it,” of Mr. Mark Pierpoint, of Mortlake. It is true the whole mansion only cost 32 pounds, but it entailed other purchases and soon had to be mortgaged. Possession was not obtained till the autumn. A “hovel” in the yard was bought from Goodman Welder in July for a new angel and five new shillings. The bargain with Pierpoint was concluded in the street, when “before Jane my wife, I gave him a saffron noble in earnest for a drink penney.”

Crowds of visitors came to Mortlake to dine. Mr. Beale (who was a borrower of books from Dee — his own Famous and Rich Discoveries, and the Chronica Hollandiae Magnae), and his wife; Francis Blount, uncle of Sir Charles, who had been in Constantinople; Mistress Banister; Mr. Redhead, one of the Queen’s gentlemen ushers, and his wife; the mother of John Pontoys, about whom we shall hear more; Mr. Gubbens, book-binder, and Mrs. Gubbens, and many others. Hospitable as ever, Dee had offered shelter for two months to Antony Ashley, Clerk of the Council, his wife and family, “who used me worshipfully and bountifully for our friendship. They had my mother’s chamber, the mayde’s chamber, and all the other house.”

Not only books were lent, but instruments also. “On Thursday, Mr. Saunders of Ewell, sent home my great sea cumpass, but without a needle. It came in the night by water.”

In August he is much in train with the Lord Keeper, Sir John Eckford, at Kew. On the 8th he dined there, again on the 17th, this time taking Mrs. Dee and Katherine, who at twelve was sufficiently grown up to dine out. On the 28th he was all day with the Lord Keeper. The entries we have here, “Mr. Web and the philosopher came as I was with the Lord Keeper,” and “Mr. Web and the philosopher cam again,” pique one’s curiosity.

At the end of the month, Dee notes the departure from his service “uppon no due cause known to me,” of Elizabeth Kyrton, a servant who had been with him twelve years, had passed through the vicissitudes of travel-life in Bohemia, as Rowland’s nurse; left in charge of him, as we have seen, in Cracow when the others went on to Prague. She had served five years on apprenticeship and seven for wages: five at four and two at five nobles a year. Of her wages there was now four pounds four shillings due. Dee in paying her, presented a new half-angel; Jane Dee gave her another; Arthur half-a-crown for him and his brother (Rowland), and Katherine the like sum for herself and Madinia. Elizabeth’s going seems to have

upset the domestic arrangements for a month or so later Dee makes an unusual entry about his wife: "Jane most desperately angry in respect of her maydes." Margery Thornton, Elizabeth's successor, left next day, and Dorothy Legg came for 30s. yearly.

A messenger from Laski arrived, Mr. Cornelio Camaiere, and stayed a week. These constant communications do not by any means support the contention that Laski parted with Dee in anger, ruined by his costly experiments. It is more probable that Laski was urging him to return and continue Kelley's work.

The Countess of Cumberland, Lord Willoughby and his sister, the Countess of Kent, came to visit Dee. Willoughby dined and next day sent him 20 pounds. Dee was annoyed by "Mr. Gray, the Lady Cumberland's preacher, his wrangling and denying and despising alchemicall philosopher." A New Year's gift of 20 angels, in a new red velvet purse, came to Jane Dee from the Lord Keeper.

Michael Peiser, doctor to the Duke of Brandenburg, visited Dee, also Walter Van der Laen, "an astronomer of great promise." Mr. John Aske sent as a present two little doubtle gilt bowls, weighing thirteen ounces and a half. "Sir Thomas Willes offer philosophical cam to my hands, by Mr. Morrice Kiffen." The children, Madinia and Theodore, were not very well. Several visits were paid to Mr. Webbe, who had been in the Marshalsea prison since the days before Christmas. His chests and boxes were sealed up. It is possible he was the Mr. Webbe who was employed by the Queen to visit and report on Dyer and Kelley at Prague. He may even have been suspected of bringing some of Kelley's manufactured gold to Dee. Bartholomew Hickman and his brother were a good deal to and fro; Bartholomew was first brought to Dee as a lad by his uncle, in 1578, with an introduction from Sir Christopher Hatton. Now, his daughter Jane was taken into service. Dee gave him a nag that the Lord Keeper had presented, and he rode frequently "homeward," to Shugborough in Warwickshire. In December 1594, Dee "preferred" him to Lord Willoughby's service at the Barbican, and there is a whole history about his livery, which was ordered from a Fleet Street tailor, Mr. Jonson.

Dee's health was now often affected in one way or another. The first mention of trouble in the kidneys was in 1592, when, at Court at Greenwich, a midnight seizure was eased by a glyster, applied by Dr. Giffard. There were other slight attacks, and in March 1594, he had a

"Great fit of stone in my left kidney: but I drunk a draught of white wyne and salet oyle, and after that, crabs' eyes in powder with the bone in the carp's head, and about four of the clock I did eat tosted cake buttered, and with sugar and nutmeg on it, and drunk two great draughts of ale with it; and I voyded within an hour much water and a stone as big as an Alexander seed. God be thanked! Five shillings to Robert Web part of his wages."

This servant was discharged on June 23 with forty shillings for a full satisfaction of all things. "On July 1, I gave Robert yet more, a French crown for a far well."

A year and a half passed after the visit of the Commissioners, and beside the immediate result of a donation of a hundred marks, nothing had accrued to better Dee's position. He determined then to redouble his efforts and bring something to

pass. He certainly had enlisted the aid of powerful friends, although no doubt there were still many suspicious enemies.

On May 3, 1594, the Queen sent for him to come to her in the privy garden at Greenwich, between six and seven o'clock in the evening. She received him alone save for the presence of her two ladies, Lady Warwick, Dee's very good friend, and Lady Cecil. Dee presented her with a writing which he calls "the heavenly admonition," which he says she took with grateful thanks. On the 18th, he writes "Her Majestie sent me agayne the copy of the letter of E.K. with thanks by the Lady Warwick." He had received letters from Kelley four or five weeks earlier, on March 28, and he probably had copied out for her certain passages, doubtless referring to the fabulous transmutation of metals. Did he still hold out hopes that he might be able to achieve a like success? On the 21st, "Sir John Wolley moved my sute to her Majesty. She granted after a sort, but referred all to the Lord of Canterbury." "On the 25th. Dr. Aubrey moved my sute to her Majesty, and answered as before." His suit was promotion to the Mastership of St. Cross, the post which had so long been the goal of his hopes, but which he was never destined to attain. He had set out at length in his Rehearsall for the Commissioners, sundry good reasons why he desired it, "rather than any other living, see, or dignity of like value in any other place." First, he gave as a reason his longing to retire to a quiet spot away from the multitude and hoards of friends and acquaintances, chance visitors, and distinguished strangers, who positively "haunted" his house at Mortlake. There, he could deny himself to no one without offence or breach of friendship. It was fatally easy and cheap for every curious person from London, or from the Court, to find his way down to that big rambling place by the riverside, with whose stills and furnaces, and wonderful doings, rumour was so rife. So much for privacy, next for economy. Fuel, coals, bricks, and all things necessary for his purpose, will be cheaper at Winchester than near London; the glass-houses of Sussex are not far away, and he will be able to give personal supervision to the making of special vessels. At Mortlake there are too many eyes and tongues. The south coast is within easy reach, and it will be possible to communicate with his friends abroad, to get over things and workers necessary, and "have the more commodious place for the secret arrival of special men to come unto me there at St. Crosses; some of which men would be loath to be seen or heard of publicly in Court or City." Is it possible that he is still thinking of Kelley, who, though then (1592) an Emperor's favourite and the bearer of a title, could easily in England be identified with Talbot the coiner, forger, and necromancer of former days?

Then Dee sets out in his Rehearsall the capacity of the dwelling at St. Cross, which is roomy enough to entertain rare and excellent men from all parts of the world, as well as any of his fellow-countrymen. This will be for the honour and credit of England. There is room also for lodging his staff of mechanical assistants; for a printing house to be set up for "reproducing good, rare, and antient bookes in Greek and Latin," and "some of my own, to be printed with my own ordering and oversight." Then he lays stress upon the desirable surroundings, a chapel where divine service is held every day, for bringing up his children and family devoutly. He ends with the advantages of Winchester School, close at hand, not only for his four sons "to become Grammarians in," but for his obtaining help from the "good Greek and Latin Grammarians and fair writers in that school, for copying out books for her Majesty."

He is teeming with all these projects and activities in spite of his sixty-five years. He was a born librarian; and still had a national library of books and manuscripts at heart as much as when, nearly forty years before, he had tried in vain to induce Queen Mary to found one.

Dee's eloquent persuasions so far prevailed with the Queen that a draft was prepared before the end of May, granting to Lord Cobham the next advowson of "Holyrood," or St. Cross, at Winchester, in the Queen's gift, to present to John Dee, M.A., on the death or resignation of Dr. Robert Bennett, the present incumbent.

Having drawn up this very full account of his doings and writings, to present to the Commissioners, Dee was naturally anxious that the appeal should be as widespread and far-reaching as possible. Archbishop Whitgift had shown himself favourably inclined, and Dee determined to approach him with a copy of that part of the Rehearsall in which he recited the titles of the books he had written. He prepared a Letter containing a brief Discourse apologeticall with a plaine Demonstration and fervent protestation for the lawful sincere and very faithful and christian course of the philosophicall studies and exercises of a certaine studious gentleman, an ancient servant to her most excellent Majesty Royall, addressed to the Archbishop; he probably presented it himself during this summer of 1595. It is a protest and an appeal, and emphatically states that from his youth he has used good honest lawful and Christian means to attain such knowledge as shall honour God, his country and his Queen. It ends with a prayer that he may be found of the Archbishop, and undoubtedly acknowledged by the wise and just, to have been a zealous and faithful student in the school of Verity and an ancient Graduate in the school of Charity.

On June 3, Dee and Jane, accompanied by all their seven children, four boys and three girls, their ages ranging from Arthur, the Westminster boy of fifteen, to Frances, the baby of two and a half, presented themselves before the Queen at Sion House, Isleworth. Jane was permitted to kiss her hand. Evidently this was an expression of thanks for the official preliminaries of the grant of St. Cross. The Archbishop was present, and Dee humbly requested him to come to his "cottage." The invitation was repeated on the 6th, when Dee supped with the Primate. Things were not, however, settled so quickly. Dr. Robert Bennett had to be provided with a better position before he would resign; some hitch occurred, and on June 29, after a visit to the Archbishop, at Croydon, the poor man writes distractedly of his broken hopes: —

"After I had hard the Archbishop his answers and discourses, and after that he had byn the last Sonday at Tybalds with the Quene and Lord Threasorer, I take myself confounded for all suing or hoping for anything that ever was. And so adiew to court and courting tyll God direct me otherwise! The Archbishop gave me a payre of sufferings [sic] to drinke. God be my help as he is my refuge. Amen."

Everything fell through, and things began to look darker than ever. Michael, who had been a delicate child, fell ill in July. On the 6th, he "becam distempered in his head and bak and arms." Dee himself was unwell, complaining of headache and internal pains, but he does not forget to note that he paid "Letice my servant 5s., part of her wages, with part whereof she is to buy a smok and nekercher." Michael's illness was short: "July 13th, in ortu solis, Michael Dee did give up the ghost, after

he said `O Lord, have mercy upon me!’“ His father omits any reference to the child’s burial.

The summer passed with very little to record in the diary beyond a visit on Aug. 25, from Ferard, the herbalist of quaint and fragrant memory; another on the 30th, from “Monsieur Walter Mallet, who took his leave to go to Tholose. He had the fix oyle of saltpetre.” Dee sends letters in September to Kelley, and in October determines on another appeal to royal favour. But Elizabeth was getting old and hard to move; Burleigh also was failing. Dee wrote in his wife’s name to Lady Scudamore, her old friend and Katherine’s godmother, begging her to intercede with the Queen that either he might appear and declare his case before the Council, or else have a licence under the Great Seal to go where he would. St. Cross was farther off than ever; England cold and inhospitable; and he prepared to say a final good-bye to courts and courting at home, and betake himself to Germany, or Austria, or some other land. Francis Garland arrived on December 2 from Prague, “just as I came five years ago to a day from Bremen to England.” Little profit indeed had he reaped in that five years.

On the 7th, “Jane delivered her supplication with her own hand to the Queen, as she passed out of the privy garden at Somerset House, to go to dinner with Sir Thomas Heneage at the Savoy.” Elizabeth handed the letter to the Lord Admiral, but took it again from him, and kept it on her cushion. The next day, the Lord Admiral and Lord Buckhurst reminded her of the matter; presently she told the Archbishop that she wished Dee to have Dr. Day’s place of Chancellor at St. Paul’s. “8th Dec. The Chancellorship presented. The Archbishop of Canterbury willing,” he writes; but this was apparently another castle in the air, for Dr. William Day was not appointed Bishop of Winchester till a year later, November 23, 1595, and although Dee’s name appears as Chancellor under the date of December 8, 1594, he seems never to have held office.

His friends, however, were not idle. In a month’s time, January 3, Archbishop Whitgift was recommending Elizabeth to grant him the Wardenship of Christ’s College, Manchester, in her own gift. Dr. William Chadderton, who was then Warden and Bishop of Chester, was to be promoted to the see of Lincoln, and here was an opening for Dee. On February 5, Sir John Wolley endeavoured to get her to sign the patent for his appointment, “but she deferred it.” Dee was up and down to London from Mortlake, and on February 10, at two in the afternoon, he “took a cut-purse taking his purse out of his pocket in the Temple.” On April 18, the Queen did sign the bill, when it was offered her by Dee’s friend and neighbour at Mortlake, John Herbert, Master of the Requests. On May 25, 26, 27, it passed the Signet, the Privy Seal, and the Great Seal; and, as a climax to his entry in the diary, Dee adds, “3 pounds 12s. borrowed of my brother Arnold,” doubtless to pay the fees.

The Earl of Derby gave him letters of introduction, and he was soon in correspondence with Oliver Carter, one of the Fellows; with Thomas Williams, another; and with Mr. Goodier, lessee of the tithes belonging to the Warden and Fellows. Carter and Williams were already at law with each other, and soon were both to be at loggerheads with Dee and his laudable desires to set the tangled affairs of the college straight. Carter was one of the moderators of the monthly lecture in Manchester, had great influence, and seems to have been unprepared to welcome a Warden of Dee’s reputation.

“July 31st. The Countess of Warwick did this evening thank her Majestie in my name, and for me, for her gift of the Wardenship of Manchester. She toke it graciously and was sorry that it was so far from hense, but that some better thing neer hand shall be fownd for me; if opportunitie of time would serve, her Majestie wold speak with me herself. I had a bill made by Mr. Wood, one of the clerks of the signet, for the first frutes forgiving by her Majestie.”

So at length there was something tangible in prospect. Things had to be settled up at Mortlake and preparations made for the journey northward. We may be sure that Dee's gratification at receiving a post of some sort, after a lifetime of waiting, was mixed with regret at quitting the place that had been his home for so long. His “yong coosen, John Aubrey, came in May to recreate himself for a while,” and stayed nearly a month.

On August 14, Jane's youngest child, a girl, was born. She was baptised at Mortlake as Margaret Dee on the afternoon of August 27; godfather, the Lord Keeper; godmothers, the Countesses of Cumberland and Essex, all three represented by deputy. The Countess of Essex was Walsingham's only daughter and heir. She had been Sidney's widow, and was now married to Essex.

Dee was now entertained often by Lord Derby at Russell House, once to meet some German guests. On October 9 he dined with Sir Walter Raleigh at Durham Place. This palace in the Strand had seen many vicissitudes before it had been given to Raleigh by the Queen. Originally the residence of the northern bishops, it had been seized by an earlier king. Lady Jane Grey had been wedded there. Her too ambitious father-in-law had gone thence to the Tower and the scaffold. Catholic plots against Elizabeth had been hatched by Spaniards in this, her own house, and now the great seaman, fresh from far Guiana, was housed in a little turret, overlooking the river and the ships.

Dee was anxious to reclaim, before going to his new home, an Arabic book lent to some friend in Oxford. He had written to Mr. Harding and Mr. Abbott several times for its return about a year and a half before. Now, on October 20, he sent his man Richard Walkden to Oxford to find and bring it. The man returned from a fruitless errand, but on November 19 “my Arabic book was restored by God's favour.” His gratitude expressed itself in a practical manner to the trusted Richard:

“I delivered unto Richard Walkedyne my man, Mr. Robert Thomas his fustian dubbet, for 10 shillings of his wages. I gave him more when he was to ride down with my wife: 10s., whereof 6s. 4d. was due to him that he had layd out for me. The other 3s. 6d. was of his wages.”

A portion of goods and furniture had already been despatched towards Manchester by a carrier named Percivall, and on the 26th Jane and her children all set off by coach towards Coventry, a usual half-way halting place on the high-road to Lancashire. A last piece of business was transacted on December 23 with John Norton, stationer, to whom Dee owed money, perhaps for printing: “I payd him ten pownds in hand and was bound in a recognisance before Doctor Hone for the payment of the rest, 10 pounds yearly, at Christmas, and Midsummer 5 pounds, tyll 53 pounds 14s. 8d. more were paid.” The same day he received 30 pounds in part payment of 100 pounds for the house at Mortlake, which he had lent to Mr. Paget.

CHAPTER XXI

MANCHESTER

“He hath, my lord, wrung from me my slow leave,
By laboursome petition; and, at last,
Upon his will I sealed my hard consent.”

— Shakespeare, Hamlet

The Collegiate Church, now the Cathedral of Manchester, was founded about 1420 in this already ancient town by Thomas de la Warre, baron and priest, rector or parson of St. Mary's, Manchester, and lord of the manor. The flourishing town of woollen industries, introduced by the Flemings a hundred or more years earlier, demanded a new and more capacious church; and De la Warre, the last of his noble house, determined to provide buildings in which a Warden, priests or Fellows, and choristers, should be continually resident, as well as to found a new church. He gained the consent of his parishioners to the appropriation of estates belonging to the existing rectory, as an income for the college, and supplemented it from his own lands in the district. He also obtained a charter of foundation from Henry V., dated May 9. The college was dissolved by Edward VI. and refounded by Henry VIII.; but by the time of Elizabeth its lands had been plundered, sold or leased, she herself becoming a sharer in the profits of spoliation until there was hardly any clear property left. At the instance of Dean Nowell, an inquiry was instituted, with the result that the college was granted a new charter in 1578, as Christ's College, to consist of a Warden, four Fellows, and two chaplains, with choristers. Nowell and Oliver Carter were two of the first Fellows. The second Warden was Dr. Chadderton, who had been Leicester's chaplain, and was Bishop of Chester. Under him the Catholics were relentlessly persecuted, Manchester prisons were filled, and the famous Marprelate printing press was discovered and seized. Chadderton's promotion to the see of Lincoln in 1595 made an opening for our persistent place-beggar to be disposed of at last.

Dee arrived in Manchester on Monday afternoon, February 15, 1596, and took up his abode in the college. On the following Saturday he was installed in the Wardenship, between nine and eleven o'clock, as he tells us. He has unfortunately left no account of the ceremony. His first business was to become acquainted with the tenants of the college lands, and the owners of tithes which constituted its revenue. On April 2, he says Sir John Byron and his son, Mr. John Byron, dined with him at the college. This family, although Newstead had been acquired some forty or fifty years previously, were still often resident on their Lancashire estates. Clayton, near Manchester, was in fact then their chief residence. A little later in the month, Dee records the courts kept for the manor of Newton, in Manchester parish, of which the Warden and Fellows were lords. The Dean and Canons, the present representatives of Warden and Fellows, still hold a court leet twice a year for this manor.

There is an interesting letter from Dee to Robert Bruce Cotton, the antiquary, dated in May this year, throwing light on his relations with the people in his employ — copyists, assistants or apprentices. He had brought with him from

Mortlake Antony Cowley, who had formerly been in Cotton's service. Dee was anxious to know if he had departed from the employ of his late master with his good will.

"Truely, for my part, I will receyve none to my simple service (man or woman) unleast they come from theyr Masters or Mistresses with theyr well liking of suche their departure from them. Therefore, I wold, by this bearer, gladly receyve your answer herein, by word of mouth or by your letter. And so shall I be free from all offence giving to your worship, or any els in this cause: as I am most free from coveting, desyring or longing after my neighbour's wife or any servant of his. If I might have a thousand pounds to sollicite or procure any mans servant to forsake his master or mistress, and to come to me or any other, I wold not do it, God knowes."

In about three weeks Dee received a reply to this considerate letter, evidently not entirely satisfactory, for on June 3 he paid Antony Cowley 20s. and discharged him. Next day "Antony went forth early from my house, I know not whither."

Dee now began to direct his whole attention to his charge: the college and the college lands. A royal commission was appointed to sit and examine its internal affairs. On June 18 "the commission for the college was sent to London to be engrossed in the Duchy office." Dee was a layman; he had always stipulated he should have no cure of souls attached to whatever benefice he might hold. For the daily services at Manchester he employed a succession of curates (mostly unsatisfactory), to whom he paid "wages 50s. for three months." He was far more interested in the temporal than the spiritual welfare of his college, and indeed his desire for such an appointment seems rather to have been solely prompted by the selfish, if necessary, wish for an income and means to pursue his own studies in peace. He was to find neither in Manchester.

In June he received a visit from Mr. Harry Savile, the antiquary, of the Bank, Halifax, and by him he sent a request to Christopher Saxton, of Dunningley, near Halifax, to come and arrange a survey of the town of Manchester, and consult about the parish boundaries. Saxton was a well-known character of the time, the holder of a patent from the Queen, whose arms appear upon the maps he made of the three counties of Chester, York and Lancaster. They were the first maps of Britain made from actual survey, and had been issued as an atlas in 1579, most of the maps having been engraved in 1577. His visits to Dee lasted over three weeks; notes are entered of his measuring the township and visiting Hough Hall, the seat of Nicholas Mosely, the Lancashire clothier who, two or three years later, became Lord Mayor of London and was knighted by Queen Elizabeth. The boys, Arthur and Rowland; the two faithful assistants, Crocker and Walkden accompanied Dee and Mr. Saxton on the peregrination. Harry Savile seems to have made one of the party also. Unfortunately, Saxton's Manchester survey is not now known to be in existence.

A surprise visit was paid to the Warden on June 26 by his landlord, the Earl of Derby, and a large party of ladies and gentlemen, including Lady Gerard, wife of the Master of the Rolls; her daughter Frances, and her husband, Sir Richard Molyneux, of Sefton, a former member for the county of Lancaster. Their son-in-law, Mr. Richard Hoghton, of Hoghton Towers, and others, also accompanied the Earl. The

Warden says: "They came suddenly upon me after three of the clock. I made them a skoler's collation, and it was taken in good part. I browght his honor and the ladyes to Ardwick Green toward Lyme, to Mr. Legh his howse, 12 myles off." Mrs. Legh was Lady Gerard's second daughter, so it was altogether a family party that descended so unexpectedly on the Warden, and no doubt ate merrily of his "scholar's collation." The only absence from Manchester recorded by the Warden (except the two years in London) was on August 13 this year, when he says that he "rid toward York and Halifax, returning from York on the 20th."

On September 1, Mary Goodwyn came "to govern and teach" the two younger children, Madinia, aged six, and Margaret, one year old. There was a field or two let with the College House, and the Warden now turned farmer, getting a small drove of seventeen head of cattle up from his kinsfolk in Wales to graze the pasture. They were brought up by the "courteous Griffith David, nephew to Mr. Thomas Griffith, and were a present." Dee had to visit Sir John Byron about the college tenants.

"Who pretended that we have part of Faylesworth Common within our Newton Heath, which cannot be proved, I am sure. We wer agreed that James Traves (being his bayly) and Franis Nutthall, his servant for him, shold with me understand all circumstances, and so duly to proceed."

The close of the year was marked by an episode which might have gone far towards clearing Dee's character from the aspersions still being cast upon him. Nowhere was superstition and belief in witchcraft more prevalent than in Lancashire, and in November and December of this year he seems to have been applied to for advice as regards a woman and seven children, said to have become demoniacally possessed through the influence of one Hartley, a "conjurer." Dee's curate, Matthew Palmer, happened to go in as Hartley was praying over the woman in a fit. He demanded what he was doing.

"`Praying.'

"`Thou pray! thou canst not pray,' quoth he. `What prayer canst thou say?'

"`None,' saith he, `but the Lord's Prayer.'

"`Say it,' quoth he, the which as I remember, he could not say."

Dee "utterly refused to meddle with the affair, and advised the father to consult with godlye preachers and appoint a private fast." Perhaps he remembered that when he asked, long before, if he had done well concerning Isabel Lister, vexed of a wicked spirit, the angel's reply had been "Friend, it is not of thy charge." He sent for Hartley, and "so sharply rebuked him that the children had more ease for three weeks after." The devils were finally exorcised by a godly preacher, John Darrell, or, as we suspect, by the children's release from Hartley's attentions, who was hanged soon after. Dee's library, a good part of which he must have moved to Manchester, was constantly in request at this time. It was rich in books on demonology and possession, and Lancashire justices of the peace who had to deal with these cases of witchcraft brought before them seem to have resorted to such works, for and against the persecution and annihilation of witches, as the *De Praestigiis Daemonum* (Basle, 1566) of John Wier, the *Fustis Daemonum* and the *Flagellum Daemonum* of the monk Hierom Menghi (Frankfort 1582, Boulogne 1586). All these Dee records lending to Mr. Edmund Hopwood, of Hopwood, a deputy- lieutenant and ecclesiastical commissioner, as well as a J.P. Wier or Weier was very likely known

to Dee at Louvain. He was one of the earliest apologists for these unfortunate folk, and pleaded that, their brains being disordered by melancholy, they merited pity, not punishment. His book contains the first account of "The Pied Piper of Hamelin," from the archives of the town of Hamelin. A Spanish grammar was lent to Mr. Barlow for his son. Mr. Matthew Heton was the borrower of theological works, including the *Concordantiae Bibliorum* (1555) of Robert Stephens, the illustrious printer of the New Testament; and a Calvinistic treatise, *De Coena Domini*, written by Dr. Pezel, who had, we remember, commemorated Dee's departure from Bremen in 1589 by verses. Dee lent Heton books, but Heton lent Dee ten pounds on a bill of hand. To John Cholmeley "I lent my Latyn booke in 8vo, *De Morbis Infantum*."

The disputes over tithes and lands belonging to the college naturally affected the Warden's income, and Dee found himself compelled to borrow small sums as before. Finally he was reduced to raise money on his plate, and especially on the handsome double gilt tankard, with a cover, which was the christening gift of the Countess of Hertford to her god-daughter Frances. It weighed 22 ounces, and Dee tells how he delivered it to Charles Leigh, one of the college "singing men," to lay in pawn in his own name with Robert Welsham, the goldsmith, "till within two days after May-day next. My daughter Katherine and John Crocker [the old servant], and I myself [John Dee], were at the delivery of it and waying of it, in my dyning chamber. It was wrapped in a new handkercher cloth." All that was obtained on the tankard was 4 pounds of the current value.

In the spring of 1597, Dee records, on May 4, the last of the Rogation days of the year, a very interesting topographical event, viz., the perambulation of the bounds of old Manchester by himself, the curate, and the clerk.

Away in the south-eastern corner of England, in the little village of Bourne, near Canterbury, about this very time, Richard Hooker, the saintly scholar, was performing a similar perambulation, of which Izaak Walton has left us the immortal picture. A homily was prepared for the service, a psalm sung, and the malediction pronounced, "Cursed be he that removes his neighbour's landmark." Izaak Walton tells us that Hooker, to look at, was an

"Obscure harmless man in poor clothes, his loins girt in a coarse gown or canonical coat; of a mean stature and stooping, yet more lowly in the thoughts of his soul; his body worn out, not with age, but study and holy mortification. Yet he would by no means omit the customary procession; persuading all, both rich and poor: if they desired the preservation of loe and their parish rights and liberties, to accompany him in his perambulation; and most did so. In which perambulation, he would express more pleasant discourse than at other times, and would then always drop some loving and facetious observations, to be remembered against the next year, especially by the boys and young people; still inclining them, and all his present parishioners, to meekness and mutual kindnesses and love, because love thinks no evil, but covers a multitude of sins."

The Warden of Manchester has not left us such an impression of the ancient antiquarian custom performed as a holy rite of devotion, but as an exact topographer and mathematician he has given a highly valuable record: —

1597. "May 4. I with Sir Robert Barber, curate, and Robert Tilsley, clerk of Manchester parish church, with diverse of the town of diverse ages, went in

Perambulation to the bownds of Manchester parish: began at the Leeless Birche against Prestwicke parish, and so had vew of thre corner stake, and then down tyll Mr. Standysh new enclosure on Thelmore, wher we stayed, and vewed the stake yet standing in the back of the dich; [it] being from the corner eleven measures of Mr. Standley's stik, then in his hand, and 2 fote more; which stik I did measure afterward, and it did conteyn in length: feet 5, ynch 3. The total mesure: fete 69, ynches 9. At which place Teblow, servant to Mr. Ashton of Chaderton, did meet us. The survey geometricall of the very circuits of Manchester parish wer ended in this, being the sixth day of my work folks doings."

In the Chetham Library is a holograph letter from Dee to the rector of Prestwich, William Langley, dated two days before this perambulation, informing him of the project for making a chart of the parish bounds, and inviting him,

"As one side of our parish in Thielmore doth border upon some parts of your parish of Prestwicke, to request some one or two of the auncient of your parish to be also beholders of our bounds, notifying toward your parish in that place. My neighbours do intend to come on Wensday next, in the morning about 9 or 10 of the klok, to that part that is by Goodman Smehears't's house, and so toward the birche tree that is called the Leeless Byrche, and thereabouts, for a little space; to beggyn the vew of the bownds and meres of Manchester parish: by the order of an enjoyned work by the higher powres, for avoyding of undue encroaching of any neighbourly parish one on the other. You understand me sufficiently well, I dowt not. Pardon my boldness so bluntly to borde you with so homely a sute.

"Your wurships sincere

"Wellwisher in Christe,

"John Dee, Warden."

John Crocker and several other men were occupied for some weeks in marking the boundaries of the manor; they met with extraordinary opposition from the landowners, and on June 14 Dee alludes to a riot that took place at Newton, Captain Bradley and others endeavouring to hinder the college employees in their labour. What with opposition abroad and difficulties with his curate at home, Dee was finding the coveted appointment no bed of roses. He records another of his characteristic dreams — the dreams of a bibliophile, to whom books are treasures as dear almost as his children: —

"This night I had the vision and shew of many bokes in my dreame, and among the rest was one great volume, thik, in large quarto, new printed, on the first page whereof as a title in great letters was printed Notus in Judaea Deus. Many other books methought I saw, new printed, of very strange arguments. I lent Mr. Edmund Hopwood of Hopwood my Malleus Maleficarum to use till New Year's tyde next, a short thik old boke, with two clasps, printed anno 1517."

It was now early August. So Hopwood, who was bent on mastering the subject of witchcraft, was to have about four months to study The Hammer for Witches, a book first issued in 1489, after the Bull against sorcery of Pope Innocent VIII., by the three sorcery inquisitors. It was translated into German,

Hexenhammer, and formed the text-book of procedure against witches in Germany. Its authors give emphasis to their learned observation that witch-craft is more natural to women than men, because of the inherent wickedness of their hearts! In mediaeval times there appeared, alas! no safe and inconspicuous path for ordinary women. The entire sex consisted apparently of either angels or devils.

On a Sunday in August, Dee entertained the Earl and Countess of Derby at a “banket at my loding at the College, hora 4 1/2.” They had newly taken up their residence at Alport Park, which had been the college property before the dissolution of the monasteries. It is now in the heart of the city, somewhere near the Midland Railway works.

There was scant time for literary labours amid so much entertaining topographical work and litigation; but in September Dee sent to his former friend, now Sir Edward Dyer, a treatise he had some time written on “The Queen’s Title Royal and Sea Sovereignty in St. Georges Channel and all the Ocean adjoining to England, Scotland and Ireland.” He quotes in it so freely from his British Monarchy (see ante, p. 39) that he encloses a copy of that work, written twenty years before, in case his correspondent does not possess one handy. The letter gives such a graphic picture of the state into which the college affairs had fallen, and of the characteristic energy with which Dee set about to try and reform them, that it must be quoted at some length. When the accompanying volume and manuscript have been fully discussed, the writer passes on to the

“intricate, cumbersome, and lamentable affairs of estate of this defaced and disordered college, whereunto not only I am assigned for my portion of mayntenance, for me and all myne, but also, by college oath, bownde to see unto the right and dignitie thereof. Which hat bred unto me already, both wonderfull care of mynde and no little payne taking, ever since my entrance, and daylie doth and will brede me more and more. And hath browght me likewise in great debt, by reason of the pore Revenue of my stipend (of only iiij s. a day for me and all myne), and that in these tymes of very great dearth here, yea, so great, that unleast (in his most fatherly Providence) the Almighty God had stirred up some mens hartes to send me, this present yere, from Dantzic, some barrells of kye; from Wales some cattall, and from Hull some fish for Lent: God knoweth that it passed all our wittes and habilitie to devise or use any other meanes, sufficient to the preserving of the lives of me and my familie together, being now but of eightene persons, most nedefull: I my wife and our children, being the one half of them. So hard and thynne a dyet, never, in all my life, did I, nay was I forced, so long to use: Neyther did ever any household servants of myne have so slender allowance at their Table. And yet all that hath not so much pynched me inwardly as the cares and cumbers for the college affaires have done, for they have altered, yea barred and stayed my whole course of life, and bereaved me of my so many yeres contynued Joyes, taken in my most esteemed studies and exercises.

“But as it pleaseth the king of heven and earthe thus to deale with me: So I beseche him to give me grace to like best of this his long leading of me per multas tribulationes. And Beside all the rest, This encreaseth my grief: that I know no one as yet of her Majesties most honorable Privy Counsaile, who willingly and comfortably will listen unto my pitifull complainte and Declaration: How this Colledg of Manchester is almost become No College, in any respect; I say in any

respect, forr I can verifie my wordes to[o] manifestly. But why do I cumber yr wurship (thus abruptlie) with such my colledg cumbers? Pardon me, I pray you, the pang of my mynde, half amazed, when the multitude of these cumbers and of the confused and intricate causes of this Colledge, do russh at once into my fantazie. But, undowtedly, either God will give me grace sufficient and send me might help (tempore opportune) to end them, or else they will help to hasten my deliverance from these and all other vayne and earthly Actions humayne.

“Sir, how well (and that hartily) not onely I, but my paynfull Jane, and my children of discretion, allso do, at God’s handes, wich unto yr wurship, you my easily gesse, for it is our duetie.

“And so, I beseche your wurship undowtedly to perswade your selfe of us.
Manchester, September 8, A. 1597.

“Yor wurships in fidelitie and sinceritie,

“John Dee.”

A new steward of the college was appointed: Humphrey Davenport, who afterwards became Chief Baron of the Exchequer, and as such delivered judgment upon ship money in Hampden’s case. Very few allusions to domestic and family matters occur in the diary for these Manchester years, but in November, 1597, an accident is recorded to Arthur, who was at home for a time. He was amusing himself by fencing with Edward Arnold, one of Dee’s men and his usual messenger to London, when the foyne or thrust of the rapier of his opponent damaged his left eye. The lad was now about seventeen, probably already entered at Christ Church, Oxford.

Correspondence with friends in London, as Dr. Julio, a well-known physician of the time, and Dr. Caesar (afterwards Sir Julius Caesar and Master of the Rolls), both of Italian origin, sometimes relieved the Warden’s tedious and tiresome disputes with the Fellows, the tenants and the tithe owners of the college.

To Caesar, as Master of the Requests, Dee wrote on October 2, 1596, on behalf of William Nicholson, about an action he had brought against two persons for enclosing moor and mine land at Reddish. Some idea of the lawless proceedings of the time may be gathered from Dee’s description of the injuries the plaintiff had received in having his barns pulled down and his corn and hay, “to the quantitie of a great number of loads, cast out of doors, which some of my family beheld.” Dee adds pointedly: “I shall be forced ere it be long to fly to your direction and help in causes Judiciall”; and ends by a reference to Caesar’s recent marriage, six months earlier, to a Manchester lady (Alice, daughter of Christopher Green): “God bless you and your new Joye.”

Oliver Carter was more troublesome than ever, and lawsuits were instituted by the Warden both against him and George Birch, another of the Fellows. On Sunday, September 25, Dee writes: “Mr. Oliver Carter, his impudent and evident disobedience in the church.” There was evidently a scene, though not, as Mr. Halliwell has it, caused by Carter’s “dissoluteness in the church.” There was no house for the Warden, but the fines of the Fellows for absence were by the last charter to be devoted to its provision. If they did not pay, Dee had to meet the rent himself. At the beginning of 1598 there were four lawsuits on the Warden’s hands, but he records that he “stayed” them all, for one cause or another, one until Sir John Byron returned. In Januaru the college gate and a large piece of the wall fell down at

midnight, so there were repairs to be made. He had a letter from John Pontoys, the friend who had sent him twenty-one loads of Dantzic rye, very useful for consumption. Another welcome contribution for domestic use arrived at this time, viz., “two lings and two haberdines from Mr. Harry Savill, from Lichefield.” Haberdines are dried and salted cod. He records an eclipse of the sun on February 25, with the comment that although it was a cloudy day there was great darkness about half-past nine.

In March, the entries in the diary end abruptly, and are not resumed again till June, 1600, a period of more than two years, of which there appears no record. The time was apparently spent in London or at Mortlake; the purpose of the journey was no doubt to represent to the Privy Council or other authorities the terribly involved state of affairs in Manchester, where the college had become almost “no college.”

CHAPTER XXII

COLLEGE AFFAIRS

“I came among a people who relied much on dreams. And I told them except they could distinguish between dream and dream they would mash or confound all together. For there were three sorts of dreams. For multitude of business sometimes caused dreams; and there were whisperings of Satan in man in the night season; and there were speakings of God to man in dreams.”

George Fox, Journal

The Warden was apparently absent from his charge at Manchester for two years and a quarter, between March, 1598, and June, 1600. When he resumed his diary to chronicle his return, it appeared that he had been very busy in London, arranging for a special commission to sit in the college chapter house, to inquire into encroachments made upon the manor of Newton. His wife and two elder sons, Arthur and Rowland; Mary Nicholls, daughter of his old friend and pupil, Francis Nicholls; all travelled with him from London. What became of the younger children we can only guess. The party set out on the 10th and arrived in Manchester on June 18. Rowland was then seventeen, a Grammar School boy on Bishop Oldham’s foundation in Manchester. Early in the following December, he obtained an exhibition at Oxford from the school. Dee, as Warden, was charged with certain official visits of inspection of the Grammar School, and was by no means always pleased with the result. He says, for instance, on August 5 of this year, “I visited the Grammar Schole, and fownd great imperfections in all and every of the scholers, to my great grief.” Of an earlier visit he says it was “to see the ower, &x., for Mr. Heton,” i.e., to see the clock.

Dee had almost completed his seventy-third year, and had maintained his bodily strength on the whole remarkably well. This summer he observed that for the first time in his life his pulse assumed the well-known symptom of intermittent beating, or pulsation. With all his usual exactitude, he records that his pulse kept on missing a pulsation after the fifth, or the seventh, or eleventh beat, although it was for the rest strong and equal. He mentions a great many sleepless nights. “Nocte Amaritudo mea,” “Circa mediam noctem Amaritudo mea,” are entries that occur with some frequency. On July 7, he says, “This morning, as I lay in my bed, it

came into my fantasy to write a boke: *De differentiis quibusdam corporum et spirituum.*” His views on this subject are again sometimes noted. If they are not about books, they concerned that long-frustrated hope of his life, that he might actually one day, and by no fraud or trickery, stumble on the secret which Kelley had professed to know. By this time, Dee must have been assured of Kelley’s knavery, and yet his faith in the possibilities of alchemy remained unshaken to the end. “I had a dream after midnight,” he says, “of my enjoying and working of the philosopher’s stone, with other. My dream was after midnight, toward day.” Alas! this pleasure he was never to enjoy in the flesh. Next night: “I dreamed that along betwene Aldgate and the postern on Tower Hill did men stand in a lane, with pikes in theyr hands, as though more should come to them, or that they wayted for somebody. But theyr regard and looking was directly to Y Towre, where certeyn great personages dyd stand; and one of them as upon a stage did declare with a loud voice to the pikemen, matter of importance, very loud.”

The description of the topography of his dream, given by this Londoner born, is very exact. The gate of Aldgate, taken down in 1606, was the eastern postern of the City, not far from St. Botolph’s Curch. So the lane of pikemen was a very long one, or seems so to us, who know the distance covered with hundreds of buildings and a network of streets.

There was little time now for him to devote to alchemy by day. His work lay in a more practical direction: —

“July 17. I willed the Fellows to com to me by nine the next day. July 18. They cam. It is to be noted of the great pacifications, unexpected of man, which happened this Friday; for in the fore-noone (betwene nine and ten) when the Fellows were greatly in doubt of my heavy displeasure, bu reason of their manifold misusing of themselves against me, I did with all lenity interteyn them, and shewed the most part of the things that I had brought to pass at London for the Colleg good; and told Mr. Carter (going away) that I must speak with him alone. Robert Leghe and Charles Legh [the singing men] were by. Secondly, the great sute between Redich men and me was stayed, and by Mr. Richard Holland, his wisdom. Thirdly, the organs, uppon conditions, wer admitted. And fourthly, Mr. Williamson’s resignation granted, for a preacher to be gotten from Cambridge.”

Richard Holland, of Reddish and Heaton House, was a man of some note in Manchester, a feoffee of the Grammar School, and three or four times sheriff of the county. The “preacher gotten from Cambridge” to succeed the last unsatisfactory curate was William Bourne, a Fellow of St. John’s. “July 31. We held our audit, I and the Fellows, for the two yeres last past in my absence: Olyver Carter, Thomas Williams and Robert Birch, Charles Legh, the elder, being receyver.” This entry in the diary seems to make it plain that Dee was absent from Manchester during the whole of the two years of which we have no account. In July, too, Dee records the loan of his second part of Holinshed’s Chronicle to Mr. Randall Kemp.

In September, the commissioners appointed by the Bishop of Chester again met, and called Dee before them in the church, “about thre of the clok after none, and did deliver to me certain petitions put up by the Fellows against me to answer before the 18th of this month. I answered them all eodem tempore; Yet they gave me leave to write at leisure.” The commissioners were Richard Holland and

William Langley, both of whom we have met before, with the rector of Stockport, Richard Gerard. Things perhaps were set on a little better foundation for a time. Points of dispute were referred to the steward, Humphrey Davenport, "Counsayler, of Grays Inn," and Oliver Carter, the contentious Fellow, died within three or four years.

The last troublous years in Manchester must be briefly passed over, and indeed the material for them is scanty. Dee had to borrow money on more plate, "double gilt potts with cover and handells," "bowles and cupps with handles," from Edmund Chetham, the high master of the Grammar School; and he had not been able to redeem them when Chetham's father and executor made his will in March, 1603. He says in it that Dee delivered to his son "six severall parcells of Plate to be kept as a payne or pledge for the same [loan], which by reason of my said executorshippe are now come into my possession," and he wills the ten pounds lent upon them to his other sons Humfrey and Ralphe. When, if ever, the pieces were redeemed, does not appear. Another valuable article — "a silver salt, dubble gilt, with a cover, waying 14 oz.," had to be deposited with Adam Holland in January 1601, for a loan of five pounds for one year. Dee's store of plate, though large, was being heavily drained and irrevocably scattered in this way. The old man doubtless saw his treasures, the gifts of friends and patrons of half a century, disappear with feelings of deep chagrin and disappointment, mingled with memories of past triumphs, and little light upon the future. A piece of the plate came to light at the Tudor Exhibition in the New Gallery in 1890, when a silver cup, the property of Mrs. John Hookham Frere (said to be Dee's great-great-niece), was exhibited. Writing of this cup to her son Bartle Frer, about the end of the eighteenth century, Mrs. Frere says, "My great thrice- great uncle, John Dee, because he was a wise man, was taken for a conjurer. I have his silver cup now here with me, and you may drink of it, but I know no story in the family that he ever divined by it. It serves me here for a sugar basan." Evidently Mrs. Frere took an entirely rational view of the powers attributed to her famous ancestor.

Perhaps in these sad days he looked back regretfully to the glorious visions and promises made him by those angelic visitors in the years when he and his skryer lived in the Courts of kings and emperors, and were consulted and deferred to as seers and wise men. Even the thoughts of suspicions harboured; of secret and open foes, at home and abroad; the recollection of heart burnings and passionate scenes with the incalculable Kelley, must have seemed dazzlingly brilliant as compared with these grey hopeless years. It is little wonder that he began to seek among his assistants and friends another skryer, through whom he might renew some glimmer of the former days. Mr. Francis Nicholls, who had come to Mortlake in 1593 to learn astrology, seems to have been tried. He was frequently with the Warden, and his daughter Mary stayed for two or three months with the Dees in Manchester on their return from London. She would be a companion in age for Katherine, and the Warden tells how the two girls, his wife and himself, partook of the sacrament together on August 10, 1600. Bartholomew Hickman was more successful as a medium than Mr. Nicholls, and yet at first not always to be trusted. Dee had learned by now to be very discriminating, and he found many of the "reports of sight and hering spirituall," obtained through this skryer, so untrue that he made a bonfire of all the writings on Michaelmas Day, before his wife; Mr. Nicholls; his brother, William Nicholls, and a Mr. Wortley. "A copy of the first

part, which was afterward fownd, was burnt before me and my wife.” The revelations afterwards transmitted through Bartholomew were not so treated, and were evidently considered by Dee to be genuine messages from the unseen. His visitors left the next day after the Michaelmas bonfire, the Warden accompanying them on foot as far as Deansgate, where they parted. On his return home a surprise awaited the old man.

Dee’s servants, many of them, attached themselves to him for life, as we have seen. They, at least, regarded him without suspicion. He was no invoker of devils or conjurer of evil spirits to them. No master could be kinder, more gentle, considerate or more strictly honourable. In whatever straits he found himself, he always contrived to pay, and faithfull record in his diary the payment of, their wages. We have seen how he writes to Sir Edward Dyer of their diet. It will be remembered that one of his early apprentices, Roger Cook, left him after fourteen years, jealous that another man should be admitted to processes from which he was excluded. This was over twenty years ago, nor had his name ever been mentioned in the diary since. Now, Roger Cook reappeared in Manchester, quite unsought, offering and promising

“his faithful and diligent care and help, to the best of his skill and powre, in the processes chymicall, and that he will rather do so than be with any in England; which his promise the Lord blesse and confirm! He told me that Mr. Anthony (his late master) considered him very liberally and frendely, but he told him that he had promised me. Then he liked in him the fidelity of regarding such his promise.”

A week or two later, on November 1, Dee writes that R.C. began to distil. Afterwards there seems to have been cause for suspicion that Roger had spread false reports about his former employer, but the mistake was generously acknowledged; matters were cleared up, and peace once more reigned: —

“Feb. 2. Roger Cook, his supposed plat laying to my discredit was by Arthur, my sone, fownd by chaunce in a box of his papers, in his own handwriting, circa meridiem, and afternone about 1 1/2 browght to my knowledg face to face. All was mistaken and we reconcyled godly. Feb. 5. O libera nos a malo. Feb. 10. Reconciliation between us, and I did declare to my wife, Katherine my dowghter, Arthur and Rowland, how things were mistaken.”

In October, Sir George Booth, High Sheriff of Cheshire, came to Manchester to see the steward of the college, Humphrey Davenport, of Gray’s Inn, about some of the college property in Cheshire, which he held. Booth had been knighted since his last visit. After all parties had been interviewed, they came to a mutual agreement that the Warden and Fellows would accept the arbitrament of the steward on the point in question, his decision to be delivered after the lawyer had paid his next visit to London. Davenport’s clerk, John Radclyffe, and Mr. Dumbell were at the college at the time, but Dee says “they hard not our agreement, we were in my dining room.”

He received a kind letter from the Bishop of Chester (Richard Vaughan), recommending Mr. Thomas Billings to him for a curacy. He does not say if the spiritual ministrations of Mr. Billings were accepted. The commissioners were still

sitting, and in November they made an award against Mr. James Ashton, of Chadderton, for holding the manor or property of Nuthurst while its title belonged to the college. There was a final scene with Oliver Carter in the college, before Mr. Birch, Robert and Charles Leigh. At the college audit on December 2, Dee was allowed his portion of 7 pounds yearly for house rent up to the Michaelmas before. A grant was now made to Arthur of the chapter clerkship, but the holder, Owne Hodges, was only going to relinquish it on condition of 6 pounds being paid for his patent. So more silver had to be pledged to meet a loan.

The last entry made by Dee in his diary is on April 6, 1601, when he made "Mr. Holcroft, of Vale Royall, his first acquaintance, at Manchester, by reason of Mr. William Herbert, his servant. He used me and reported of me very freely and worshiply."

For the concluding seven years of the old man's life there are only a few scanty outside records on which to rely, beside two or three fragmentary entries printed in the end of the Book of Mysteries. In such a practised and ready writer as our aged mathematician and astrologer, the failure to set down records seems to betoken failing strength of both intellect and body.

CHAPTER XXIII

LAST DAYS

"If I read aught in Heaven,
Or Heaven write aught of fate, by what the stars,
Voluminous or single characters
In their conjunction met, give me to spell,
Sorrows and labours, opposition, hate
Attends thee; scorns, reproaches, injuries."

— Milton, *Paradise Regained*

A few days after the diary closes, Dee's fourth son, Theodore, died. The boy was just over thirteen, perhaps at the Grammar School. Michael, we remember, had died at Mortlake seven years before, so the only sons left were Arthur and Rowland, both now grown almost to man's estate. Within about a year, Arthur married, and soon embarked on his successful career as a physician in London, Manchester, Moscow and Norwich, to which we can return later.

Arthur's wife was Isabella, daughter of Edmund Prestwich, Justice of the Peace, of Manchester, a member of a family whose name is perpetuated by a large district of the town. The marriage took place in 1602, when Arthur was twenty-four, his bride just under twenty. The young couple settled with or near his parents at first, and Dee had the joy of seeing grandchildren grow up around him. Four of Arthur's twelve children were born during the old man's life, and he pleased himself by drawing a horoscope for two of these, Margarita 1603, and Jane 1605, on the vellum leaves of a small square manuscript volume which still fills us with wonder at his boundless industry. It contains an anatomical drawing of the human body and tables of astrological signs for its different parts, aphorisms, studies of medicine, the actions of metals, and other hermetic notes. Arthur's horoscope, drawn and expounded by his father in the same book, is sufficiently remarkable,

with its prophecy that he should have good fortune from a prince, and die abroad, a violent death. In the centre of the figure, Arthur himself has added the words “sententia patris mei de mea nativitate erat. Magna bona cum multis malis.” Arthur only added one horoscope, that of his seventh child, Isabel, born 1614; otherwise, as they appeared almost annually (twelve in eighteen years), he contented himself with simply writing names and dates on leaves of coarse paper, added to the beginning and end of his father’s little commonplace book, which has been rebound roughly in cheap modern cloth.

Beyond these events, there is nothing to tell of the next three years, which are without a single jotting of his own in any of his diaries; but the old prejudices and suspicions must have revived in a very active and bitter form. The aged student could endure them less patiently than before. He had lost hope of outliving them; he had lost his Queen, who, though she had held out to him promises of preferment as unsubstantial as a mirage of the desert, had ever been friendly and kind; had constantly welcomed, nay, invited, him to her presence; and had apparently maintained her faith in him to the last. Burleigh’s death in 1598, and now the Queen’s, left him without patron and protector. Elizabeth died at Richmond on March 23, 1603, but Dee, presumably, was far away in Manchester, and not near at hand at Mortlake, even had he been required. The course of the magnificent life was run, and no prognostications of her astrologer could put hope into the physicians and courtiers watching around that royal deathbed. The Queen was seventy, and had reigned for fifty-three years.

From King James there was nothing to be hoped for Dee, the man familiar with occult sciences. The Scotsman felt himself a special expert on the subject of witches, demons and magic. Had he not attended the infamous trials of 1590 and 1591? And was he not the author of a book intended to shatter the doubts of those who were still unconvinced of the infamy? He was aghast at the new and unorthodox views of apologists like Wier and Reginald Scot, and upon his accession promptly ordered *The Discoverie of Witchcraft* (1584), by the last named, to be publicly burned. James’s *Demonologie* is a strange piece of reasoning, a plea, in fact, for the devil, with whom he seems to be on particularly intimate terms. “God’s hangman” — that is the title awarded him — is, according to King James, able to return and reanimate any dead body. He announces his faith in the power of conjurers to invoke the devil when they choose, and to invest others with his spirit. He adjures all pious people to unite in exterminating and utterly destroying all persons so possessed: a somewhat unkind request, since he has previously allowed that such objects of reprobation are permitted to exist in order that the godly may be warned!

The first Parliament of James met on March 19, 1604. On the 27th a new and more stringent Act against Witchcraft was brought into the House of Lords. It was referred to the bishops, who discovered it was imperfect, and had a fresh one drawn. On June 9 the execrable Act that disfigured our statute book for 150 years became law. This haste, it was supposed, was used to meet offences exposed by the Scottish trials, now again evidently revived and much talked of in England. It is significant to remember that Shakespeare finished writing *Macbeth* in 1606. In what way Dee felt himself specially involved, unless by the publication, in 1603, of Harsnet’s tirade against impostures and exorcists, it is hard to conjecture, but the times were ripe for him to make, at this identical moment, a passionate appeal to the King and

Parliament. On June 5 he presented to James, in the Palace at Greenwich, a petition couched in the strongest and most piteous terms that any man could devise.

He urged upon the King

“to cause your Highnesse said servant to be tryed and cleared of that horrible and damnable, and to him most grievous and dammageable sclaunder, generally, and for these many yeares last past, in this kingdom raysed and continued, by report and Print against him, namely that he is or hath bin a conjurer or caller or invocator of divels.”

He went on to relate how he had published many times his “earnest apologies against the slander [one we remember in his preface to Billingsley’s Euclid in 1570, and another, the letter to the Archbishop in 1595, he had republished in 1599 and 1603], and yet this ungodly and false report, so boldly, constantly and impudently avouched,” has been uncontrolled and unpunished for so many years; and, moreover, in spite of all, some writer, either a “malicious forraine enemy or an English traytor to the flourishing State and Honor of the Kingdom,” on January 7, 1592, had called him, John Dee, in print, “the conjuror of the Queen’s Privy Council.” It seems, therefore, very needful that the suppliant shall be brought to trial, for the credit of the Lords of the Privy Council as well as for his own.

“Therefore he offereth himself willingly to the punishment of Death, yea eyther to be stoned to death, or to be buried quicke, or to be burned unmercifully, if by any due, true, and just meanes, the name of conjuror, or caller, or invocator of Divels or damned Sprites, can be proved to have beene or to be duely or justly reported and told of him (as to have been of his doing) were true, as they have been told or reasonably caused any wondering among or to the many-headed multitude, or to any other whoseever else.”

Dee’s sympathies were so strongly with the unfortunate, persecuted, so-called witches, that he was willing to throw in his lot with them and share the same fate. He ends this extraordinary petition with “a great and undoubted hope” that the King will “soon redress his farder griefs and hindrances, no longer of him possibly to be endured, so long hath his utter undoing, by little and little, beene most unjustly compassed.”

Following up this petition, the poor man, grown desperate, three days later (June 8) presented an address in verse to Parliament, begging them to pass “an Act Generall against slander, with a special penal order for John Dee, his case.” He was far too much in earnest to be suspected of any humorous intention, but a thought of the needful reformation such an Act might have wrought in the country by this time cannot be suppressed. Certainly it would have been a more creditable piece of legislation than the Act which afforded such wicked and cruel pretext for espionage and terrorism, and for putting unfortunate lunatics — called witches — to death by hanging, burning and stoning by a mob.

It seems as if Dee’s ruined and beggared condition, the long procession of disappointments he had patiently borne, had entirely destroyed the sense of proportion in his mind between personal and public affairs. Continual brooding over the thought of the neglect, the suspicion, that his undeniable talents had undergone, the obstinate slander, ignorant incredulity, or flat denial of things in which he most truly put his faith, all distorted by his natural vanity and good

opinion, seems to have convinced him that his crushed and melancholy fate was little short of a national disaster. This feeling had become an obsession.

There was unfortunately nothing in his halting verses to induce Parliament to pay any heed to a tiresome old petitioner, a survival from the last century and the last reign, who had outlived every contemporary inclined to believe in him, and whose course was now nearly run.

Nor did James respond in any way to his heartbroken petition. Robert Cecil, and all who wished to stand well with him, took their cue from the King, and Dee in his old age was left forsaken and alone.

The following is the address to Parliament: —

“TO THE HONORABLE ASSEMBLIE
OF THE COMMONS IN THE PRESENT PARLIAMENT.”

“The Honor due unto you all,
And reverence to you each one,
I do first yeeld most speciall;
Grant me this time to heare my mone.

“Now (if you write) full well you may,
Fowle sclandrous tongues and divelish hate,
And help the truth to beare some sway
In just defence of a good Name.

“In sundry sorts, this sclander great
(Of conjurer) I have sore blamde:
But wilfull, rash, and spiteful heat,
Doth nothing cease to be enflamde.

“Your helpe, therefore, by Wisdom’s lore,
And by your Powre, so great and sure,
I humbly crave, that never more
This hellish would I shall endure.

“And so your Act, with Honour great
All Ages will hereafter prayse;
And Truth, that sitts in Heavenly sear,
Will in like case your comforts rayse.

Most dutifully in all humilitie at your commandment, John Dee,
servant and Mathematician to his most royall Majestie.

An. 1604. Junij 8.”

Dee’s good name was one of his dearest possessions, but he had long seen it shadowed and dimmed. Another treasure — his “painful” Jane — the wife who had loyally cleaved to him through good and ill report, was to be the next of which he was to be bereft. She was so much his junior that he might reasonably have expected her to tend his declining years and to survive him. But it was thoroughly

in keeping with her unselfish character and devoted life that her death came as a sacrifice to duty. In the spring of 1605, a terrible scourge of plague visited Manchester. She nursed her children safely through the epidemic, but fell a victim to it herself. She died and was buried on March 23 in the collegiate church of St. Mary. The old man had no heart to take up his pen and record her death. The bare fact is all we know, from another source; and the fate of all Jane's children, save Arthur, is wrapped in a like mystery. At her death, Jane was a month under fifty years old; the twenty-seven years of her married life had been crowded years, the one thought in them all to watch over and ward her great childlike, learned, marvellous husband and her children. Now she passed the task on to her daughter Kate, who faithfully fulfilled it.

A few fragments of angelic visions, which after nearly twenty years were once again vouchsafed, are all that remain to tell of the last two years of the old man's life.

Bartholomew Hickman was the skryer, and Dee was in London, "at Mrs. Goodman her house," very ill. On March 20 and 29, Raphael appeared, to comfort him as regards his alarming symptoms of haemorrhage, and bade him use the medical skill that God had given him. Dee, in utter dejection, owned that he was beaten in his "great attempt to make the council privy of my beggary, and to offer the Earl of Salisbury such my duties as I may perfect to his account." He was right to hope nothing from the great Burleigh's little-minded son. Robert Cecil lacked almost everything that had made William Cecil great, even a great sovereign to serve.

In July Dee was again in London, this time staying in Westminster, at the "Three Kings" in King Street. Katherine was with him, his devoted daughter, now a woman of twenty-six, apparently unmarried. Two companions or servants, Patrick Saunders and Thomas Turner, were in attendance. On the 9th, the angel Raphael came to the sad and broken old man of eighty, holding out promises and hopes that seem cruelly delusive. But Dee was still wrapped in that inviolable armour of faith or credulity that had already withstood so many severe shocks. Whether he now actually beheld Raphael, whether he still with his ears heard the angel's voice, or whether only within his spiritual consciousness he felt the impulse and the message, is quite immaterial. But it is noticeable that there are now no descriptions of Raphael as an apparition. The message is all he heeds. As he is sinking slowly down into his grave from natural decay, there is a double and figurative meaning to be read into the angel's words. Raphael bade him first believe that his perishing bodily frame shall be restored and made sound, for, however reluctant he at his great age may feel, he is to go shortly on a long journey to friends beyond the sea, where the secrets of wisdom, the philosopher's stone, the book of St. Dunstan, and "that Jewel that was delivered," shall be made known to him. He is not to go alone, for his good friend, John Pontoys, will come from Dantzic to be his stay and helper. "Therefore set thy things in order for thy Wardenship, and all thy other worldly affairs, as shortly as thou canst, by all means possible." He is not to mistrust because of his physical weakness, for he shall have long life like Hezekiah, and instead of living in want or beholden to those who love him not, he shall be provided for where he shall be able to do God service. He shall enjoy fame and memory to the end, and Raphael will accompany him, as he did the young Tobias, on his journey. Perhaps Dee remembered the mystical words of Gabriel, used to him at Cracow in April of 1584, —

“Happy is he that hath his skirts tied up and is prepared for a journey, for the way shall be open unto him, and in his joynts shall there dwell no wearinesse. His meat shall be as the tender dew, as the sweetness of a bullock’s cud. For unto them that have shall be given, and from them that have not shall be taken away. For why? The burr cleaveth to the willow stem, but on the sands it is tossed as a feather without dwelling. Happy are they that cleave unto the Lord, for they shall be brought unto the storehouse, and be accounted and accepted as the ornaments of his beauty.”

[The old man penned on a slip of paper some notes to aid his failing memory when next he should see his instructor. In two days, on July 11, he was able to put the questions.

What country shall he go to?

The answer is, where he will. “Thou hast been a great traveller, and it is referred to thy own choice,” subject to divine approval. Dee suggests Germany, and receives consent.

Whom shall he take with him besides John Pontoys? What about his daughter Katherine, and the young man, Patrick Saunders?

The answer is very emphatic. It shows how dependent the old man had become upon this elder daughter of his old age. “John Dee, thou of thyself dost best know that without thy daughter, thou canst not be without her.”

Certainly he could not part from Katherine, even with Pontoys as his “special comfort and aid,” and the “honest and well-disposed young man,” Saunders, who had been sent on purpose to go with him.

What about books and appurtenances? Is Mr. Bardolf to go? What shall Arthur do in his intended travel? “Shall I ever return to England, and shall I keep a title to enjoy my house when I do return?” Will the King grant a licence, or will it not be another disappointment, like so many that have gone before?

It is all a vain and illusory and impossible chimera. The only journey left for the old man to take was the one to “that undiscovered bourne from whence no traveller returns.” Still, the wonderful visions perhaps brought him ecstatic hours. His brain was yet strong and clear, less worn out than his body, but like all old people, he lived over again and loved to dwell upon the past. A few days later he sat talking after dinner to Bartholomew “of divers my doings with Mr. Kelley.” He had forgotten little of these dazzling experiences, and perhaps to while away the time he read his precious diaries over and over again. But of later events his memory was failing: “I asked Bartholomew if he had ever seen my jewel that was brought since it was set in gold [this had been done more than twenty years before], and he thought that he had not seen it.” Surely tactful politeness on Bartholomew’s part. “Whereupon I went speedily to my chest, unlocked it, and took it out, and undid the case and set the stone in his due manner.”

Soon Raphael appeared in the stone, and Dee heard his voice, promising that the powder (i.e., Kelley’s powder) which he was keeping — “the which thou dost make account of as no better but dust” — should be turned to its right use.

Is it possible that the old belief in the golden secret had at last been killed? The powder was now but dust, as the old man would soon become, and as all his fixed dreams of projection had ever been.

The last entry in the spiritualistic diary was made on September 7, 1607, but whether Dee was at Mortlake or in London cannot be said. Pontoys had arrived. He was anxious to know if he would be thought fit to serve Dee in Bartholomew's absence. Also he earnestly desired to know his guardian angel, and he would fain hear also "the end of the Polish troubles."

Captain Langham, it is hoped, is going to lend 100 pounds; if not, Pontoys will set to work "to win some help for money by distillations and alchemical conclusions." Poverty is again stretching her gaunt fingers over this fond dreamer of gold. He had missed his "silver double gilt bell salt" and many other things from his house. He is "bereaved of his own goods." The truth was that Arthur had secretly taken them away to sell or pawn, in order to provide necessities for the family. Dee has been expecting a sum of money from the Emperor Rudolph, how much he does not know. But Raphael tells him to "let it go and speak no further of it. The Emperor of all emperors will be thy comfort. Thou hast no more need of him [Rudolph], only to keep good will and friendship betwixt him and thee." [Then Raphael fades into the eternal invisible, and the last word of the angelic visions is written.

In the private diary, kept in the almanack from Venice throughout this last year, there is little beside the bare stroke marking the months off into weeks, as was Dee's usual habit. The strokes are continued beyond the month of his death, December, 1608. The last written entry is on December 19, and is almost illegible. It is in the old man's hand and appears to read "tonitrum a Corffe."

On which day at the death of the old year, Dee's spirit joined those others that had always been so near to him, we do not know, or on what precise date he was buried in the chancel of the church standing so close to the house at Mortlake which had been his home for thirty years. The parish registers for five years are missing, and the stone which Aubrey says marked his grave has long since disappeared.

Fifty years later, John Aubrey talked to Goodwife Faldo, an old woman of eighty who had known him, and was shown a slab from which the brass had disappeared. She said that her mother had tended him in his sickness before he died in his own house in Mortlake, "next the house where the tapestry hangings are made." Evidently his last days were passed in the cottage which he had purchased many years before to add to the larger house, inherited from his mother. The old woman's gossip was interesting to Aubrey, for he was a grandson of Dee's cousin and neighbour, Dr. William Aubrey, the Master of Requests who had helped Dee to the Manchester post. She was full of marvellous stories, of course, for Dee's reputation for "magic" was impelled to survive him. But they were harmless stories enough: he had "layed a storm for Sir Everard Digby"; he had recovered a basket of clothes which she as a girl, and one of his younger daughters of her own age, had negligently lost together; he had bidden a butler who had lost his master's plate on a boat coming down from London by water to go back on a certain day, and he would see the man who had taken the wrong basket by exchange: the butler had done so and had found his plate; he had told a woman that she laboured under the evil tongue of an ill neighbour; he would not recover some lost horses, though he was offered several angels. He used to distil egg-shells, and kept a great many stills going. He had given and built the gallery to the church at Mortlake, and Goody Faldo's father was the carpenter that worked on it. "He was a great peacemaker, and

if any of the neighbours fell out, he would never let them alone till he had made them friends.” “A mighty good man he was.”

The old woman remembered that he entertained the Polish ambassador not long before he died, and showed to him the eclipse of the sun, in a dark room. She could call to mind the stone upon his grave: it was between the tombstones of two other servants of Queen Elizabeth, Mr. Holt and Mr. Miles, upon both of which were brasses. The children, she said, dreaded him because he was accounted a conjurer, and yet whenever they strayed into the church, they would run straight to play upon his gravestone. There were steps at the upper end of the chancel when he was buried, but the minister laid them plain in Olver's days, and then the stone that covered Dr. Dee was removed. She could recall his appearance: a man tall and slender, clad in a gown like an artist's gown, with hanging sleeves and a slit.

These garrulous reminiscences give us a picture of the old philosopher's end more valuable than any mere formal entry of the date. Some day, however, it may be possible to recover that.

Meanwhile, Dee's memory may be entrusted to the kinder judges of to-day, who will be more charitable because more enlightened and less impregnated with superstition. They may see in him a vain, presumptuous and much deluded person, but at any rate they must acknowledge his sincere and good intentions; his personal piety; his uncommon purity of thought and mind. If, in his thirst for knowledge of the infinite unknowable, he pushed back the curtain farther than was wise or justifiable, did he harm any one's reputation beside his own? Did he not suffer all the penalty in his own miserable failure, so far as comfort and prosperity in material things were concerned? In all the vague hopes held out by him to Queen, Princes and Emperors, of enriching them through his alchemical skill, he was no conscious charlatan, playing a part to lure them on, but a devout believer in man's power and purpose to wrest scientific secrets from the womb of the future. Can we look back upon the discoveries of three hundred years and feel his certainty was vain? The powers of electricity, the training to our uses that marvellous and long concealed agency and light; the healing virtues of radium, should be worth more to us than much manufactured gold.

APPENDIX I

THE DESCENDANTS OF JOHN DEE

When the aged mathematician died at Mortlake in 1608 he left to survive him five or six out of his eight children. Michael, born at Prague, had died on his father's birthday in 1594. Theodore, born at Trebona, died at Manchester 1601. Arthur and Rowland were left. Katherine was his companion to the end. The three younger girls, Madinia, Frances and Margaret, had, for anything we know, survived the plague which was so fatal to their mother, but there is no trace of either of them after that event in March, 1606. Aubrey, indeed, did hear from Goody Faldo of a daughter, whose name he thinks was Sarah, married to a flax dresser of Bermondsey. Dee had no daughter Sarah, and Aubrey does not suggest a name for the problematic husband.

Arthur, the eldest son, we have followed through a childhood of accidents to his selection and setting apart with a solemn rite to be his father's "skryer" in the

magic crystal, in the eighth year of his age. We have traced the failure of that ill-advised choice, and have seen the lad of thirteen sent off to Westminster School with a little trunk and his mother's blessing. The next events in his life recorded by his father are his being wounded by a foyne while fencing with Edward Arnold, and the grant of the chapter clerkship of Manchester, in 1600.

He married in 1602, lived for a while in Manchester, and began practising medicine. Wood says he spent some time at Oxford, but his name has so far not been found in any college admissions. In his will he is described as "Doctor of Physic." Probably he took his degree abroad. His marriage to Isabella Prestwich, daughter of a well-known Manchester justice of the peace, took place when he was twenty-two, and it is to be presumed that he continued living on in Manchester until his father left that city some time in 1605 or 1606, after the sad death of his wife. Arthur set up a practice in London some time about that year, although precise dates are not obtainable. He seems to have followed the common usage of hanging outside his door a list or "table" of medicines, and their excellent therapeutic properties, which were said to effect certain cures of several diseases. This attracted the attentio of the censors appointed by the Royal College of Physicians, who proceeded against him forthwith, under the powers granted them against empiricks, which they had exercised since the foundation of the College in the early years of Henry VIII. The learned members of the college esteemed this "crime" such an "intolerable cheat and imposture," that they summoned Arthur Dee to appear before them with his remedies that they might impose a due penalty upon his presumption. The rest of the story is unrelated, and we cannot say what fine or order was his reward.

He seems, either through inflence or talent, to have made his mark as a doctor. In July, 1614, he was recommended by the Archbishop of Canterbury and the Lord Chancellor to be elected physician of Thomas Sutton's newly founded hospital, the Charterhouse, and we may presume the appointment was made. In May, 1627, Charles I. recommended him as physician to the Emperor of Russia, and in June it was agreed to send letters out by him or his agent, the stipulation being made that he must sail at once, "or not have passage this year."

He took up his abode at Moscow, if not in the splendour and riches offered to his father, at least sufficiently provided for to maintain his huge family in comfort. Four or five of his twelve children died in infancy; the complete list of them, as given in his father's book of horoscopes in the British Museum, is as under: —

Margaret	born	April 4, 1603.
Jane	"	March 31, 1605.
John	"	July 24, 1606 (died).
Arthur	"	March 16, 1608.
Maria	"	February 24, 1612.
Rowland	"	September 8, 1613.
Isabel	"	September 5, 1614.
Frances	"	October 25, 1615.
William	"	August 27, 1617.
John	"	March 30, 1619.
Edmund	baptised	August 27, 1620.
	buried	September 23, 1621.

Anna born

January 15, 1622.

Arthur's wife, Isabella Dee, died July 24, 1634. About this time he returned to England and settled in Norwich, near his friend, Sir Thomas Browne, who was then busily engaged in writing down the ethical and theological conclusions which he called the *Religio Medici*. Browne was, of course, the younger man. Writing in 1658, a few years after Arthur's death, to Elias Ashmole, Sir Thomas tells of the many talks about the doings of Dee and Kelley that he had with "my familiar friend, sonne unto old Doctor Dee, the mathematician," who had "lived many years and died in Norwich." Browne sent to Ashmole "the scheme of Arthur's nativity, erected by his father, Dr. John Dee," a copy from the original, made by Arthur himself, with comments added by a Moscow astrologer, Franciscus Murrerus.

Dr. Arthur, in spite, or perhaps because, of his early environment, retained until his dying day a devout belief in the possibilities of alchemy to make projection or transmutation. He had grown up in the fixed idea that the ever-exclusive secret would soon be found out. In fact, he was persuaded that divers workers had indeed discovered the art. The child of seven or eight, who had played with quoits or playthings, which he understood had been turned into gold upon the premises, was likely to retain this conviction. To doubt it would be to cast a slur upon his father's memory. Of Kelley his recollections — the recollections of a boy under nine — could be but dim and hazy, untouched with any possible scepticism or critical judgment. After the February day when Kelley rode off to Prague in 1588, neither Arthur or his father had ever set eyes on this adventurer again.

He had succeeded in convincing his old friend of the truth of these recollections, for Browne writes of him as "a persevering student in hermetically philosophy, who had no small encouragement, having seen projection made, and with the highest asseverations he confirmed unto his death that he had ocularly, undeceivably and frequently beheld it in Bohemia. And to my knowledge, had not an accident prevented, he had, not many years before his death, retired beyond the sea and fallen upon the solemn process of the great work."

Continuing the correspondence six months later, when additional matter rises to mind, Sir Thomas writes again to Ashmole, in 1675, with more particulars of the "solemn process."

"I was very well acquainted with Dr. Arthur Dee, and at one time or another he has given me some account of the whole course of his life. I have heard the doctor say that he lived in Bohemia with his father, both at Prague and in other parts. That Prince or Count Rosenberg was their great patron, who delighted much in alchemie. I have often heard him affirme, and sometimes with oaths, that he had seen projection made, and transmutation of pewter dishes and flaggons into silver, which the goldsmiths at Prague bought of them. And that Count Rosenberg played at quoits with silver quoits made by projection as before. That this transmutation was made by a powder they had, which was found in some old place, and a book lying by it containing nothing but heiroglyphicks; which book his father bestowed much time upon, but I could not hear that he could make it out. He said also that Kelley dealth not justly by his father, and that he went away with the greatest part of the powder, and was afterwards imprisoned by the Emperor in a castle, from whence attempting to escape down the wall, he fell and broke his leg, and was imprisoned again. That his father, Dr. John Dee, presented Queen Elizabeth

with a little of the powder, who having made trial thereof, attempted to get Kelley out of prison, and sent some [persons] to that purpose, who, giving opium in drink unto the keepers, laid them so fast asleep that Kelley found opportunity to attempt an escape; and there were horses readie to carry him away; but the business unhappily succeeded as is before declared. Dr. Arthur Dee was a young man [he was a boy of eight] when he saw this projection made in Bohemia, but he was so inflamed therewith that he fell early upon that study, and read not much all his life but books of that subject; and two years before his death, contracted with one Hunniades, or Hans Hanyar, in London, to be his operator. This Hans Hanyar having lived long in London and growing in yhears, resolved to return into Hungary. He went first to Amsterdam, where he was to remain ten weeks, till Dr. Arthur came to him. the Dr. to my knowledge was serious in this businesse and had provided all in readiness to go, but suddenly he heard that Hans Hanyar was dead.”

During his residence in Moscow, Arthur compiled a book of alchemical notes and extracts, which was published at Paris in 1631 under the title of *Fasciculus Chemicus*, etc. Ashmole, among his early enthusiastic labours upon alchemical authors prosecuted under the name of “James Hasolle,” translated this into English in 1650. While the book was at press in the beginning of the year, he wrote to Arthur, apparently as a stranger, informing him of his occupation, and putting at the same time a question or two upon his father’s books.

Arthur’s reply, dated Norwich, January 31, 1649 [50], now in the Bodleian Library, begins by expressing regret that “you or any man should take pains to translate any book of that nature into English, for the art is vilified so much already by scholars that daily do deride it, in regard they are ignorant of the principles. How then can it any way be advanced by the vulgar? But to satisfie your question, you may be resolved that he who wrote Euclid’s Preface was my father. The *Fasciculus*, I must cofess, was my labour and work.” He ends by saying that he will be in London that day week, and if Ashmole wants to see him, he may hear of him in Butler’s Court at the end of Lombard Street, at his son Rowland Dee’s warehouse. The writing, and especially the signature of this letter, are good testimonies to the care bestowed by William Camden of Westminster School on the boy’s handwriting. His father, as we remember, had asked for special supervision of the roman hand, since matter, poor in itself, but set down in a good style, did, in his opinion, often receive more attention than good material badly written and expressed.

Browne had received from Arthur a complete catalogue of all his father’s writings, both finished and intended. But there was one not included, viz., the *Book of Mysteries*. Sir Thomas, writing in 1675, says he never heard him say one word of “the *Book of Spiritts* sett out by Dr. Casaubone, which if hee had knowne I make no doubt butt hee would have spoake of it unto mee, for he was very inquisitive after any manuscripts of his father’s, and desirous to print as many as he could possibly obtain.” He goes on to say that Arthur understood that Sir William Boswell, the English Resident in Holland, owned a number of Dee’s MSS., which he had collected and kept in a trunk in his Dutch home. Boswell refused many applications from Arthur for leave to print some of these, which the famous mathematician’s son considered should not be locked up from the world. Boswell announced his intention of printing them himse, which of course he never did.

Nor did the Book of Spirits see the light of day during Arthur's lifetime. Perhaps had Casaubon appealed to him as Ashmole had done, it would never have been issued at all. A son would certainly have remonstrated against this revelations, this tearing down the veil from the inner tabernacle of his father's soul.

Arthur died in the autumn of 1651, eight years before Casaubon published his book. He made his will on September 17, describing himself as Doctor of Physick, of the city of Norwich, and leaving a small legacy of twenty shillings to the poor of the parish of St. George Tombland, in which he had lived.

Only three sons out of his seven, and three daughters of the six are named in the will, all the others being dead, unless it was Arthur, the eldest, who had been a merchant in Amsterdam. There is a legacy of twenty pounds to his wife.

The second son, Rowland, was established, as we have seen, in Lombard Street as a merchant. To him Arthur had already given his father's portrait, now in the Ashmolean Museum and reproduced as the Frontispiece to this book; and a painted coat of arms. Sir Thomas Browne, who had often seen it, speaks of an addition made to the coat by grant of the Emperor Rudolph in the shape of a mathematical figure; probably the delta which Dee always used for his name in the spiritual diary. To Rowland's wife there is a legacy of twenty pounds.

"To John Dee, my youngest son," Arthur left one hundred pounds and his gold seal ring with the coat of arms cut in a sapphire. John was a Russia merchant.

There is no mention of his eldest child and daughter, Margaret, who is said to have married another Russia merchant named Abraham Ashe.

To three sons-in-law, "my son Grymes;" "my son Anguish" (this was the husband of his youngest child, Anne); and "my son Fowell," he leaves respectively a plush coat; a saddle and pistol; and a black gown and plush suit.

To each of his three daughters, their wives (none of them mentioned by name), he gives 20 pounds; and to the two elder, his two iron-barred sealskin trunks with long cushions and foot carpets, feather bed, blankets, bolsters and coverlets. He appoints his friend John Toley, of Norwich, his executor, and gives him his watch and silver chain, with a square box of cypress wood, double-leafed, with drawers. His servant, John Sergeant, is to have all the contents of his extensive wardrobe, consisting of his coloured cloth suit and and cloak; black suit and cloak lined with rough bayes (Norwich was the seat of the bay and say industry); his winter pair of boots, and two pairs of summer boots; his "hatts;" his "stokins whatsoever;" his black satin doublet; shirts; six of his "worst-falling bands and ruffs;" and forty shillings due for wages at the Michaelmas following.

Arthur Dee died before October 16 of the same year, 1650, when the will was proved by John Toley.

Rowland, Arthur's fourth son, married and died in 1687, when his wife was executrix of his will. Rowland's sons by this wife Jane (d. 1698) were Rowland, born March 25, 1646, married October, 1675; Elizabeth Gardiner of Aldersgate (d. September, 1698); and Duncan, born November 3, 1657. Both were educated at Merchant Taylors' School on the Bishop of Peterborough's foundation (see below). Duncan went on to St. John's College, Oxford, and entered the legal profession. He was chosen Common Serjeant of London in 1700. He defended Dr. Sacheverell for four days of his trial in the House of Lords in 1710; died in 1720, and was buried in St. Mary Aldermanbury. By his wife Mary (d. Stoke Newington, March 24, 1728) he left a son Henry (d. 1725), others having died young.

David Dee, born in Shropshire, of St. Mary's Hall, Oxford, rector of St. Bartholomew the Great, Smithfield, 1587 — 1605, is said to have been a grandson of Bedo Dee. If so, he must have been either brother or cousin of John Dee of Mortlake, who, strange to say, alludes nowhere in his diary to any relation of the name of Dee, although he speaks often of his Welsh kinsfolk, and of his cousin Aubrey. As he died at Mortlake in 1608, aged eighty and a half, David, who survived him twelve years, must have been his junior. David Dee was deprived of St. Bartholomew, "for what," says Newcourt, "I know not"; but he was brought back there to be buried on February 3, 1620. By his wife Martia, daughter of John Rogers, David Dee had three sons, of whom Francis, the eldest, was educated at Merchant Taylors' School and St. John's College, Cambridge. He entered the Church, held various livings in London and elsewhere, and four years before his death was consecrated Bishop of Peterborough. By his will (dated May 28, 1638), he gave his rectory of Pagham, Sussex, to found two fellowships and two scholarships in St. John's College, one of which was to be held for ever by "one of my kindred or of my name, from either Merchant Taylors' School, London, or from Peterborough School." We have seen that two of John Dee's great grandchildren were sent to Merchant Taylors', and one, Duncan, proceeded to St. John's, probably on this foundation. The Bishop's eldest son, Adrian Dee, Canon of Chichester, died unmarried, but his younger sons, John and Daniel, left descendants.

APPENDIX II

BIBLIOGRAPHY

The principal authorities for Dee's Life are his own Diaries, already frequently cited in the foregoing pages, viz.: —

(1) The Private Diary. The original notes comprising this are in two 4to almanacks in the Bodleian Library, Oxford, numbered Ashmolean MSS. 487, 488. They were transcribed and printed for the Camden Society (1842), with numerous omissions, by Mr. J.O. Halliwell [-Phillipps]. The Manchester portion of this Diary, covering the years 1595-1601, was edited with much local knowledge and care by Mr. J. Eglington Bailey, and privately printed; only twenty copies (1880). Mr. Bailey also reprinted from Notes and Queries (May, 1879) his paper on Dee and the Steganographia of Trithemius.

(2) The Spiritual Diary, or Liber Mysteriorum, divided by Dee into separate books, each dealing with a special epoch. The first five books, with an appendix to the fifth — dating in all from December 22, 1581, to May 23, 1583 — are comprised in Sloane MSS. 3188, at the British Museum. The remaining books, actually twelve but not consecutively numbered, were printed by Dr. Meric Casaubon in The True and Faithful Relation, etc., 1659, fol. Three of them are entitled "Libri Mystici Apertorii Carcoviensis Sabbatici"; three "Mysteriorum Pragensium Confirmatio"; and the two last "Liber Resurrectionis" and "Mysteriorum divinatorum memorabilia." This ends on May 23, 1587. About a dozen pages of occurrences taking place in 1607 are printed by Casaubon at the end of his book, from stray papers.

Dee's autobiographical Compendious Rehearsall ranks next in importance. The original MS. was partly burned in the fire in the Cottonian Library, but a transcript made by Dr. Thomas Smith (author of a life of Dee, see below) was printed

by Hearne in the Appendix to *Johannis Glastoniensis Chronicon* (Oxford, 1726). This printed version was collated with Ashmole's transcript of the original (Ashmolean Ms. 1788), and edited by James Crossley for the Chetham society, in *Autobiographical Tracts of Dr. John Dee, Warden of the College of Manchester*, 1851. In his preface, the editor promises another volume of correspondence and selections of Dee, which never appeared.

The Latin life of Dee, *Vitae Eruditissimorum et Illustrium Virorum*, by Dr. Thomas Smith (1707); the article in the *Biographia Britannica*, edited by Kippis (1778, etc.), largely based upon the foregoing, and upon Strype's *Annals* (1725, etc.); some account in Wood's *Athenae Oxoniensis* (Bliss), i. 639, 640, and *Fasti*, i. 143; in Foxe's *Acts and Monuments*, ed. Townsend, vii., 77, 85, 349 n., 638, 641, 642, 681, 734, 756, 783, 784; and in Ashmole's *Theatrum Chemicum Britannicum* (1652), pp. 478-483; with Aubrey's *Lives*, ed. by Dr. A. Clark (1898); and *A Treatise of Religious and Learned Men* (1656), by Edward Leigh, are further sources. For the Manchester years, Hibbert and Ware's *Foundations of Manchester* (1833) is useful; and for Dee's descendants, see a *General Account of Families derived from Bedo Dee*, by H.B. Wilson (1815) and his *History of Merchant Taylors' School* (1812-14). Later writers who have descanted more or less at large upon the romantic episodes of Dee's partnership with Kelley, as apart from any other achievement of his long life, are William Godwin, in his *History of the Necromancers* (1834); Charles Mackay, *Memoirs of Extraordinary Popular Delusions* (1841); Isaac Disrael, *Amenities of Literature* (1841); W. Cooke-Taylor's *Romantic Biography of the Age of Elizabeth* (1842); A. E. Waite in his *Lives of Alchemical Philosophers* (Edinburgh, 1888), *Studies in Myticism* (1906), and *The Alchemical Writings of Edward Kelley* (1893); Thomas Seccombe, *Twelve Bad Men* (1894); Adelung's *Geschichte der Menschlichen Narrheit* (1785-9); Lenglet de Fresnoy's *Histoire de la Philosophie Hermetique* (1742); Manget's *Bibliotheca Chemica Curiosa* (Geneva, 1702), and Louis Figuier's *L'Alchimie et les Alchimistes* (1856).

Purely fictitious accounts are those in John Dee, *Astrologer of Queen Elizabeth*, by "Hippocrates, jun." (1899), and "John Roby's" *Traditions of Lancashire* (1906).

For the study of witchcraft in the sixteenth century the following may be consulted: George Gifford, *Subtle Practices of Witches* (1587); T.A. Spalding, *Elizabethan Demonology*, etc. (1880); James I., *Demonologie* (1603); Meric Casaubon, *Treatise on Spirits, Witches, etc.* (1672); Reginald Scot, *Discoverie of Witchcraft* (1584, 3rd edition 1605); Sir Walter Scott, *Letters on Demonology and Witchcraft* (1830); Henry Howard, Earl of Northampton, *Defensative against Poyson* (1583), and many other kindred works.

For the history of crystal gazing see Caspar Peucer, *Les Devins* (Antwerp, 1584); M.A. del Rio, *Disquisitionum Magicarum*, 1599; Pierre de l'Ancre, *L'Incredulite et Miscreance du Sortilege* (Paris, 1622); Guido Bonatus, *The Astrologer's Guide* (1866); Andrew Lang, in *Psychical Research of the Nineteenth Century* (1901), and *Introduction to Northcote's Crystal Gazing* (1905); Mrs. de Morgan, *From Matter to Spirit* (1863); Sir William Crookes, *Psychic Force and Modern Spiritualism* (1871), and his *Researches in the Phenomena of Spiritualism* (1874); Miss Goodrich Freer's *Essays in Psychical Research* (1899), where she compares the revelations of the spirits to Dee with the work "of a lady novelist of the eighties"!; M. Camille Flammarion's popular and numerous works; F. W.

Myers' *Phantasms of the Living* (1886) and his *Human Personality* (1903); with the *Proceedings of the Psychical Research Society*, will all afford information upon psychical and spiritualistic progress. The consummate description of John Inglesant's tragic and pregnant vision of his brother's murder, seen before hand in the crystal, as related by J.H. Shorthouse, will occur to everyone.

Dee's own writings were extraordinarily numerous. In his *Rehearsall* he enumerated forty-nine. There is a list of seventy- nine in Cooper's *Athenae Cantabrigensis*, vol. ii., pp. 505-509; but some of these are doubtful: e.g., No. 66, *Treatise of the Rosicrucian Secrets*, etc.; for the Rosicrusians only came into existence about the time of Dee's death. Others are but notes from among Ashmole's manuscripts. One (No. 75) is the horoscope or nativity of Kelley, drawn or erected by Dee, which Ashmole has printed in his *Theatrum* (p. 479). To add to Mr. Cooper's list there are some Latin verses in Henry Perry's *Egluryn Phraethineb* (1595).

All the printed books by Dee are extremely rare. There is much information about them in Ames, *Typographical Antiquities* (e.d Herbert). Copies of thirteen are in the British Museum Library, including those of other writers to which he contributed prefaces, additions and notes, as *Recorde's Grounde of Arts* (many editions); Billingsley's *Euclid*; Roger Bacon's *de Secretis operibus artis et naturae*, etc. and various *Ephemerides*. There are three copies of the *General and Rare Memorials pertaining to the Perfect Art of Navigation*;" and both the enditionsof his *Letter...Apologeticall*, etc., addressed to the Archbishop as a protestation and plea for the course of "the philosophicall studies and exercises of a certaine studious gentleman" (1599, 1603). The petitions addressed to the House of Commons and the King are printed on broadsides (1604). There are also three copies of Casaubon's *True Relation* in the British Museum, one of them collated with the original MS. by William Shippen, of Stockport, 1683.

No adequate idea of the remarkable doings of Dee and Kelley over the crystal can be entertained without a study of Dee's manuscript "Book of Enoch" in Sloane MSS., 663, 120, and 2,599, 1-45; and his "Claves Angelicae," 3191 in the same collection. the diagrams of complicated arrangement of letters and figures, their neatness of execution, mathematical precision and etymological intricacy are no less amazing than the clear bold text in which the descriptions are written in printing hand. Regretfully it was decided not to reproduce an example, owing to the lack of pictorial value.

The Portrait of Dee, now in the Ashmolean Museum at Oxford, reproduced as Frontispiece to this volume, was painted when he was 67; it belonged to his grandson, Rowland Dee, and at his death it passed to the possession of Elias Ashmole and was by him bequeathed to the University of Oxford. It has been engraved by Scheneker and W.P. Sherlock. Engraved portraits of Dee and Kelley, by Francis Cleyne, are included, with Roger Bacon; Paracelsus; the prophet Mahomet; and Apollonius of Tyana, on the title-page of Casaubon's volume. Dee's is the same as an anonymous engraving inthe Print room, British Museum, from a younger (German) portrait, in a furred gown and peaked cap; the globe and compasses are in his right hand.

A number of stones and crystals, purporting to be Dr. Dee's, have from time to time been exhibited. Two were at the Tudor Exhibition; another was sold at Sotheby's in 1906, and is now in Dresden. That formerly in the possession of Lord

Londesborough (once Horace Walpole's) appears to have been actually the Doctor's; also the globe of smoky quartz now in the British Museum.

The Pedigree which Dee made, tracing his descent from the mythical times of King Arthur, and showing Queen Elizabeth, through her Welsh ancestry, as related to the same source, is illuminated with coats of arms and a small coloured profile portrait of "John Dee, philosophus," in a cap and furred gown. He here (Cotton Charter, xiv. 1) describes his grandfather, Bedo Dee, as a soldier fighting under the Emperor Maximilian I., in 1512; his father, Rowland Dee, armiger, as gentleman sewer to King Henry VIII.; and himself as a philosopher.

JOHN DEE

(1527—1608)

BY

CHARLOTTE, FELL-SMITH

AUTHOR OF "MARY RICH, COUNTESS OF WARWICK"

With Portrait and Illustrations

LONDON
CONSTABLE & COMPANY LTD
1909

TABLE OF CONTENTS

CHAPTER I

BIRTH AND EDUCATION

Tercentenary of Dee's death — No life of him — Persistent misunderstanding — Birth — Parentage — At Chelmsford Grammar School — St. John's College, Cambridge — Fellow of Trinity — Theatrical enterprise — In the Low Countries — M.A. of Cambridge — Louvain University — Paris — Readings in Euclid — Correspondents abroad — Return to England.

CHAPTER II

IMPRISONMENT AND AUTHORSHIP

Books dedicated to Edward VI. — Upton Rectory — Long Leadenham — Books dedicated to Duchess of Northumberland — Ferrys informs against his "magic" — In prison — Handed over to Bonner — At Philpot's trial — Efforts to found a State Library — Astrology — Horoscopes — Choice of a day for Queen Elizabeth's coronation — Introduced to her by Dudley — Sympathetic magic — Bachelor of Divinity — In Antwerp — Monas Hieroglyphica — Preface to Billingsley's Euclid — Called a conjurer.

CHAPTER III

MORTLAKE

Proposed benefices — Propædeumata Aphoristica — Alchemical secrets — Settled at Mortlake — Journey to Lorraine — Illness — The Queen's attentions — Mines and hidden treasure — Wigmore Castle — Marriage — Death of first wife — Literary correspondence — John Stow — Diary commenced — The Hexameron Brytannicum — The British Complement — Slander and falsehood — A petty navy — The sea-power of Albion — Fisheries and foreign policy.

CHAPTER IV

JANE DEE

A comet or blazing star — Second marriage — Jane Fromond — Hurried journey abroad — Berlin and Frankfort — Birth of a son — Christening — Edward Dyer — Duc d'Alencon — Michael Lock — His sons — The Queen's visit — Sir Humphrey Gilbert at Mortlake — Adrian Gilbert — John Davis — The Queen's Title Royall — Lord Treasurer Burleigh — Death of Dee's mother — The Queen's visit of condolence — Map of America — Visits to the Muscovy House — Frobisher and Hawkins — Birth of a daughter — Accident to Arthur.

CHAPTER V

THE SEARCH FOR A MEDIUM

Assistants — Roger cook — Magic and alchemy — Psychic powers — Crystal gazing — Dreams and mysteries — Vincent Murphy and a lawsuit — Jean Bodin visits England — Quarrel between Leicester and Sussex — Mary Herbert — Sir George Peckham — The stage at Paris Garden — Mr. Secretary Walsingham — The Queen at Greenwich — Barnabas Saul as medium — Edward Talbot — Sight in the stone — The table of practice — The waxen seals.

CHAPTER VI

EDWARD KELLEY

Edward Kelley — An alias — His previous history — His mysterious powder — Marriage to Joan Cooper — Jane Dee's dislike of Kelley — The diary of the actions — How Ashmole obtained the MSS. — Book of Mysteries — The four angels — Dee's thirst for hidden knowledge — A crystal is brought — Medicina.

CHAPTER VII

THE CRYSTAL GAZERS

Kelley, the skryer — A third person — Adrian Gilbert — Kelley and an "illuder" — Dee employed to reform the Calendar — The Queen and Raleigh — Hidden treasure — Burleigh's library — Dee's precious books — Kelley rebellious — Threatens to depart — Pacified by Adrian Gilbert — His wife's letters — He goes to London — Becomes clairvoyant — Sees Mary Queen of Scots executed.

CHAPTER VIII

MADIMI

Straits for lack of money — Count Albert Laski — Aspirations toward the Polish Crown — King Stephan Bathory — Dee introduced to him by Leicester — Laski at Oxford — At Mortlake — Madimi — Galvah or Finis — Laski's guardian angel — Madimi a linguist — Kelley threatens to leave — His salary of 50 pounds — Thomas Kelley — Dee's suspicions — Kelley's tempers — His love of money.

CHAPTER IX

A FOREIGN JOURNEY

Gifts from the Queen — Departure from Mortlake — Laski and the whole party sail from Gravesend — Queenborough — The Brill — Haarlem —

Amsterdam — Harlingen — Dokkum — Instructions from Gabriel — Embden — Oldenberg — Bremen — Il's levity — Visions of England — Hamburg — Lubeck.

CHAPTER X

PROMISES AND VISIONS

Promises of wealth — Dee's doubts — His books and library destroyed by the mob — Rostock — Stettin — Posen Cathedral — Severe winter weather — The table set up — Nalvage — Sir Harry Sidney — Madimi — The Queen's affection — At Lask — Cracow.

CHAPTER XI

CRACOW

Cracow — The new Style — Dee's work on the Reformation of the Calendar — Kelley's discontent — Geographical lessons — Laski and King Stephan — Kesmark — Gabriel's pleading — Kelley repentant — A vision of four castles — Ave — Dee's patience.

CHAPTER XII

FROM CRACOW TO PRAGUE

Rowland's illness — Dee sets out for Prague — Thomas Kelley — Dr. Hageck's house — Rudolph II. — Simon's study — Interview with the Emperor — Kelley's outbursts — Dr. Jacob Curtius — Dee's natural history — The Spanish Ambassador — Jane Dee ill — A passport granted — Back to Prague — Kelley's doubts.

CHAPTER XIII

A DREAM OF GOLD

To Limburg — Michael baptised in Prague Cathedral — Easter — Poverty and distress — Kelley again restive — "Parabola de Nobis Duobus" — Return to Cracow — Mr. Tebaldo — Interviews with King Stephan — His death — Dr. Annibaldus — Back at Prague — Francisco Pucci — The Book of Enoch — Claves Angelicae — Banished by Papal edict — William Count Rosenberg — Dee at Leipsic — Letter to Walsingham — A new Nuncio — Invitation to Trebona.

CHAPTER XIV

THE CASTLE OF TREBONA

Trebona Castle — Rosenberg Viceroy of Bohemia — Invitation to Russia — Projection with Kelley's powder — A gift to Jane Dee — Letter from Kelley — Jane to her husband — Joan Kelley — Dee's friends desert him for Kelley — Arthur to be the skryer — Kelley's pretended vision — A hard and impure doctrine — Dee's scruples overridden — A solemn pact — Kelley disowns blame — End of his clairvoyance — The spirits' diary closed.

CHAPTER XV

THE END OF THE PARTNERSHIP

Letters to Walsingham — A tutor for the children — Coldness and jealousy — Furnaces constructed — Rumours and reports — Book of Dunstan — Kelley's haughtiness — Accident to Michael — The great secret — Kelley steals the best workman — Break-up of the Trebona family — Dee's letter to the Queen on the Armada — Gifts to Kelley — His departure — Coaches and horses provided — Dee quits Bohemia — Arrival in Bremen.

CHAPTER XVI

THE END OF KELLEY

Kelley in favour with Rudolph — Given a title — Corresponds with Dee — Fabulous stories of gold — Burleigh begs his return to England — A token to be sent — A prescription for his gout — Letter to Kelley — Kelley's fall from favour — Flight from arrest — Capture at Sobislaus — Imprisonment — Writings on alchemy — Letters to Dee — Attempted escape — Death.

CHAPTER XVII

RETURN TO ENGLAND

Dee's life in Bremen — Letter of safe conduct from the Queen — Writes to Walsingham — Timon Coccius — Heinrich Khunrath — Departure for England — Dr. Pezel — Events in England since Dee left — Arrival at Court — Offers of friends — Madinia born — School for the children — Death of Walsingham — Richard Cavendish — Ann Frank — The Queen at Richmond — Christmas gifts.

CHAPTER XVIII

A ROYAL COMMISSION

Loss of income — Hopes of a benefice — The Court at Nonsuch — Mary Herbert — Arthur sent to Westminster School — His disposition — Birth of Frances — Dr. William Aubrey — Deferred hopes — The commissioners' visit — Compendious Rehearsall — Dee's half-hundred years — The blinded lady Fortune.

CHAPTER XIX

DEE'S LIBRARY

The library at Mortlake — Books and instruments — Richard Chancellor's quadrant — A radius Astronomicus — Mercator's globes — A watch-clock by Dibbley — Boxes of MSS. — Seals and coats of arms — Records for the Tower — Autograph works — Recorde's Ground of Artes — Catalogue of the books — Classic authors — English authors.

CHAPTER XX

ADIEU TO COURTS AND COURTING

The Queen's gift — Anne Countess of Warwick — Christmas at Tooting — Francis Nicholls — Visitors to Mortlake — the Lord Keeper — Elizabeth Kyrton — Messengers from Laski — Mr. Webbe — Bartholomew Hickman — The Queen at Greenwich — Advantages of St. Cross — Archbishop Whitgift — The whole family to see the Queen — "Adieu to Courts and Courting" — Michael's death — Chancellor of St. Paul's — Jane's supplication — A post at last — Manchester College — Birth of Margaret — Lord Derby — A move northward.

CHAPTER XXI

MANCHESTER

Collegiate Church of Manchester — The Byrons of Clayton — Cotton's servant — Titles of the college lands — Mr. Harry Savile — Survey of the town — Christopher Saxton — A surprise visit — Governess for the girls — Witchcraft in Lancashire — Dee's library in request — Disputes among the Fellows — Perambulation of the bounds — Richard Hooker — Marking boundaries — Earl and Countess of Derby — College affairs — The Queen's sea sovereignty — Letter to Sir Edward Dyer — Humphrey Davenport — Sir Julius Caesar — Welcome gifts — Journey to London.

CHAPTER XXII

COLLEGE AFFAIRS

Absence from Manchester — A special commission — Return to the north — Grammar School inspection — Dreams and sleepless nights — Trouble with the Fellows — Unsatisfactory curates — Borrowing money on plate — Crystal gazing again — Untrue visions — Return of Roger Cook — College property in Cheshire — Arthur the chapter clerk — End of the Diary.

CHAPTER XXIII

LAST DAYS

Death of Theodore — Arthur's marriage — His horoscope — Death of the Queen — James I. and his *Demonologie* — Act against witchcraft — Dee petitions Parliament and the King at Greenwich — Passionate protest — Offers to be burned — Pleads for an Act against slander — Neglected and alone — Death of Jane — The children ill — Dee in London — Katherine his mainstay — Cruel delusions — A journey to go — Failing memory — John Pontoys — The vision fades — Death — A grave at Mortlake — Garrulous reminiscences.

APPENDICES I AND II

I. DEE'S DESCENDANTS

II. BIBLIOGRAPHY

LIST OF ILLUSTRATIONS

1. PORTRAIT OF JOHN DEE.

From the original (artist unknown) in the Ashmolean Museum, Oxford. It is inscribed on the face "Johannes Dee Anglus Londinensis Aet suae 67." The portrait was acquired by Ashmole from Dr. John Dee's grandson Rowland, and was left by him to Oxford University with his collections. It has been engraved by Scheneker and W.P. Sherlock.

2. TITLE-PAGE OF DEE'S "GENERAL AND RARE MEMORIALS PERTAINING TO THE PERFECT ART OF NAVIGATION," PRINTED BY JOHN DAY, 1577.

The motto "Plura latent quam patent" surrounds the title; above, the Queen's arms, a rose branch through a loop at each end. Allegorical drawing in a square; the date 1576 in Greek in the corners. The Queen seated at the helm of a "capital," i.e., first-class, ship; arms of England on the rudder; three noblemen standing in the waist. On the vessel's side Jupiter and Europa. Signs of famine on shore: a wheat ear upside down and a skull. A Dutch ship is anchored in the river; fore more lie at its mouth; soldiers, a small boat, a man offering a purse, and in the corner a walled town. On the rock at the river's mouth stands Lady Opportunity; the angel Raphael overhead with flaming sword, and shield bearing St. George's Cross. The sun, moon, and ten stars; rays of glory proceeding from the name of Jehovah. (See Ames, *Typographical Antiquities*, ed. Herbert, vol. i., p. 661)

3. PICTURE OF AN ALCHEMIST WITH HIS ASSISTANT TENDING STILLS.

From an engraving by Robert Vaughan in Ashmole's *Theatrum Chemicum Britonum* (1652), where it illustrates the first English translation of Thomas Norton's *Ordinall of Alchemy*, a metrical treatise in Latin, which Dee transcribed in the year 1577. His copy, bound in purple velvet, and with the index made by himself, is now Ashmolean MS. 57

"IF I HAD KNOWNE THIS AND HAD DONE SOE
I HAD AVOYDED MICKLE WOE."

THOMAS NORTON *The Ordinall of Alchimy.*

4. DIAGRAM OF THE VISION OF FOUR CASTLES.

Seen and drawn by Kelley at Cracow. From Casaubon's True Relation

5. FACSIMILE PHOTOGRAPH OF DEE'S LETTER TO QUEEN ELIZABETH ON
THE DEFEAT OF THE SPANISH ARMADA.
From the original in Harleian MS. 6986, fo. 45

A PAGE FROM THE THESAURUS AMICORUM OF TIMON COCCIUS.

6. A PAGE FROM THE ALBUM OF TIMON COCCIUS, BREMEN, 1589.
Dee's contribution to his Thesaurus Amicorum. From the original in Add. MSS.
19,065

Most Gracious Sovereigne Lady, The God of Heauen and earth,
Who hath mightilie, and evidently, given vnto your most excellent
Royall Maies tie, this wonderfull Triumphant victorie, against
your mortall enemies) be alwaies, thanked, prayesd, and glorified:
And the same God Almighty: euer more direct and defend your
most Royall Highnes from all euill and encumbrance: and finish
and confirme in your most excellent Maies tie Royall, the blessings
long since, both decreed and offred: yet, euen vnto your most
gratious Royall bosom, and Lap. Happy are they, that can
perceyue, and so obey the pleasant call, of the mightie Ladies,
OPPORTVNITIE. And, Therefore, finding our duetie conuient
with a most secret becke, of the said Gracious Princess Ladies
OPPORTVNITIE, NOW to embrace, and enioye your
most excellent Royall Maies ties high fauor, and gracious great
Clemencie, of CALLING me, M^r Kelsey, and our families,
hoame, into your Brytish Earthly Paradise, and Monarchie
incomparable: (and, that, about an yere since: by Master
Customer Yong, his letters,) I, and myne, (by Gods his fauor
and help, and after the most conuenient manner, we can,)
Will, from henceforth, endeuour our selues, faithfully, loyally,
carefully, warily, and diligently, to ryd and vntangle our
selues from hence: And, so, very deuotely, and seruauntlie,
at your Sacred Maies ties feet, to offer our selues, and all,
wherein, we are, or may be able, to serue God, and your most
Excellent Royall Maies tie. The Lord of Hosts, be our
help, and Gyde, there: and graunt vnto your most excellent
Royall Maies tie, the incomparable Triumphant Raigne, and Monarchie,
that euer was, since Mans creation. Amen.

Trebon. in the Kingdome of Boemia
the 10th of Nouembre: A.D. 1588: 1588

Your Sacred and most excellent
Royall Maies ties
most humble and deuot
Subject, and Seruant:
John D.

DEE TO QUEEN ELIZABETH ON THE DEFEAT OF THE SPANISH ARMADA.
(See p. 198.)

7. ILLUSTRATION TO NORTON'S ORDINALL.

Engraved by Vaughan in Ashmole's Theatrum. (See above, No. 3)

“WHICH FIER MUST EVER BE COEQUALL.
IN EVERY MINUTE, AND YET PERPETUALL:
FOR IT MAY NEVER ABATE NE INCREASE,
AND YET THE FIER MAIE NEVER CEASE.”

From an illustration to his Letter and Apology, presented to the Archbishop of Canterbury 1599, second edition 1603

CHAPTER I

BIRTH AND EDUCATION

“O Incredulities, the wit of fooles
That slovenly will spit on all thinges faire,
The coward’s castle and the sluggard’s cradle,
How easy ‘tis to be an infidel!”

— George Chapman

It seems remarkable that three hundred years should have been allowed to elapse since the death of John Dee in December, 1608, without producing any Life of an individual so conspicuous, so debatable, and so remarkably picturesque.

There is perhaps no learned author in history who has been so persistently misjudged, nay, even slandered, by his posterity, and not a voice in all the three centuries uplifted even to claim for him a fair hearing. Surely it is time that the cause of all this universal condemnation should be examined in the light of reason and science; and perhaps it will be found to exist mainly in the fact that he was too far advanced in speculative thought for his own age to understand. For more than fifty years out of the eighty-one of his life, Dee was famous, even if suspected and looked askance at as clever beyond human interpretation. Then his Queen died. With the narrow-minded Scotsman who succeeded her came a change in the fashion of men’s minds. The reign of the devil and his handmaidens — the witches and possessed persons — was set up in order to be piously overthrown, and the very bigotry of the times gave birth to independent and rational thought — to Newton, Bacon, Locke.

But Dee was already labelled once and for all. Every succeeding writer who has touched upon his career, has followed the leaders blindly, and has only cast another, and yet another, stone to the heap of obloquy piled upon his name. The fascination of his psychic projections has always led the critic to ignore his more solid achievements in the realms of history and science, while at the same time, these are the only cited to be loudly condemned. The learned Dr. Meric Casaubon, who, fifty years after Dee’s death, edited his *Book of Mysteries* — the absorbing recital of four out of the six or seven years of his crystal gazing — was perhaps the fairest critic he yet has had. Although he calls Dee’s spiritual revelations a “sad record,” and a “work of darkness,” he confesses that he himself, and other learned and holy men (including an archbishop), read it with avidity to the end, and were eager to see it printed. He felt certain, as he remarks in his preface, that men’s curiosity would lead them to devour what seems to him “not paralleled in that kind, by any book that hath been set out in any age to read.” And yet on no account was he publishing it to satisfy curiosity, but only “to do good and promote Religion.” For Dee, he is persuaded, was a true, sincere Christian, his *Relation* made in the most absolute good faith, although undoubtedly he was imposed upon and deluded by the evil spirits whom he sometimes mistook for good ones.

It may be well here to remark that this voluminous *Book of Mysteries* or *True and Faithful Relation* (fol. 1659), from which in the following pages there will be found many extracts, abounds in tedious and unintelligible pages of what Casaubon calls “sermon-like stuff,” interspersed with passages of extraordinary beauty. Some of the figures and parables, as well as the language used, are full of a

rare poetic imagery, singularly free from any coarse or sensual symbolism. Like jewels embedded in dull settings, here and there a gem of loftiest religious thought shines and sparkles. There are descriptive touches of costume and appearance that possess considerable dramatic value. As the story is unfolded in a kind of spiritual drama, the sense of a gradual moving development, and the choice of a fitting vehicle in which to clothe it, is striking. The *dramatis personae*, too, the “spiritual creatures” who, as Dee believed, influence the destinies of man, become living and real, as of course they were to the seer. In many respects these “actions” were an exact counterpart of the dealings inaugurated by psychical scientists 275 years later, if we omit the close investigation for fraud.

Casaubon’s successor in dealing with the shunned and avoided subject of John Dee was Thomas Smith, Fellow of Magdalen College, Oxford, who, in 1707, wrote the first connected Life of him, in a book of the *Lives of Learned Men*. It was based upon some of Dee’s autobiographical papers, and out of a total of a hundred pages, gave fifty to letters already printed by Casaubon.

After this no sustained account of Dee’s romantic career is to be found outside the pages of biographical dictionaries and magazine articles, or among writers upon necromancy, hermetic philosophy, and alchemy. Many of these decorate their collections with apocryphal marvels culled from the well-worn traditional stories of Dee and his companion, Edward Kelley. Thus, throughout his lifetime and since, he has continued to run the gauntlet of criticism. “Old imposturing juggler,” “fanatic,” “quack,” are mild terms: in the *Biographia Britannica* he is called “extremely credulous, extravagantly vain, and a most deluded enthusiast.” Even the writer on Dee in the *Dictionary of National Biography* says his conferences with the angels are “such a tissue of blasphemy and absurdity that they might suggest insanity.” Many more such summary verdicts might be quoted, but these will suffice for the present.

It has been said that no Life of Dee exists. And yet the materials for such a Life are so abundant that only a selection can be here used. His private diary, for instance, if properly edited, would supply much supplementary, useful, and interesting historical information.

It is the object of this work to present the facts of John Dee’s life as calmly and impartially as possible, and to let them speak for themselves. In the course of writing it, many false assertions have disentangled themselves from truth, many doubts have been resolved, and a mass of information sees the light for the first time. The subject is of course hedged about with innumerable difficulties; but in spite of the temptations to stray into a hundred bypaths, an endeavour has been strictly made to do no more than throw a little dim light on the point where the paths break off from the main road. If, at the end of the way, any who have persevered so far, feel they have followed a magnetic and interesting personality, the labour expended will not have been in vain. With a word of apology to serious historical readers for the incorrigibly romantic tendency of much of the narrative, which, in spite of the stern sentinel of a literary conscience, would continually reassert itself, the story of our astrologer’s strange life may now begin.

John Dee was the son of Rowland Dee; he was born in London, according to the horoscope of his own drawing, on July 13, 1527.

His mother was Jane, daughter of William Wild. Various Welsh writers have assigned to Dee a genealogical descent of the highest antiquity, and the pedigree which he drew up for himself in later life traces back his family history from his grandfather, Bedo Dee, to Roderick the Great, Prince of Wales. All authorities agree that Radnor was the county from whence the Dees sprang.

Rowland Dee, the father, held an appointment at Court, as gentleman server to Henry VIII., but was very indifferently treated by the King. This may partly account for the persistence with which Dee exhibited before Queen Elizabeth his claims to preferment at her hands. To be in habitual attendance at Court in those days, however, bred in men a great desire for place, and a courtier was but a mendicant on a grand scale.

The boy, John Dee, was early bred in "grammar learning," and was inured to Latin from his tender years. Perhaps he was not more than nine or ten when he was sent to Chelmsford, to the chantry school founded there seven years before the great school at Winchester came into existence. The master who presided over Dee's school hours in Essex was Peter Wilegh, whom the chantry commissioners in 1548 reported as a man "of good conversation" who had kept the school there for sixteen years. Dee has always been claimed by the Grammar School at Chelmsford as one of their most famous alumni, whose extraordinary career with its halo of mystery and marvel they perhaps feel little qualified to explore. Dee's testimony that at Chelmsford he was "metely well furnished with understanding of the Latin tongue" is an unconscious tribute to Peter Wilegh's teaching.

In November, 1542, Dee, being then fifteen years and four months old, left Chelmsford to enter at St. John's College, Cambridge, where, as he tells us in his autobiography, he soon became a most assiduous student. "In the years 1543, 1544, 1545, I was so vehemently bent to studie, that for those years I did inviolably keep this order: only to sleep four houres every night; to allow to meate and drink (and some refreshing after) two houres every day; and of the other eighteen houres all (except the tyme of going to and being at divine service) was spent in my studies and learning." Early in 1546 he graduated B.A. from St. John's College. At the close of the same year, Trinity College was founded by Henry VIII., and Dee was selected one of the original Fellows. He was also appointed under-reader in Greek to Trinity College, the principal Greek reader being then Robert Pember. The young Fellow created the first sensation of his sensational career soon after this by arranging some of the (*Eirene* — Peace) of Aristophanes, in which he apparently acted as stage manager and carpenter.

For this play he devised a clever mechanical and very spectacular effect. Trygaeus, the Attic vine-dresser, carrying a large basket of food for himself, and mounted on his gigantic beetle or scarab (which ate only dung), was seen ascending from his dwelling on the stage to enter the palace of Zeus in the clouds above. One has only to think of the scenic effects presented by Faust and Mephistopheles at Mr. Tree's theatre, for instance, to realise how crude and ineffective these attempts must have been; but thirty or forty years before Shakespeare's plays were written, so unusual an exhibition was enough to excite wild rumours of supernatural powers. We hear no more of theatrical performances, although several references in his after-life serve to show that his interest in the English drama, about to be born, lagged not far behind that of his greater contemporaries. He does mention, however, a Christmas pastime in St. John's College, which seems to have been

inspired by this same dramatic spirit. Of details we are totally ignorant; he only relates that the custom of electing a "Christmas Magistrate" was varied at his suggestion by crowning the chosen victim as Emperor. The first imperial president of the Christmas revels in St. John's College "was one Mr. Thomas Dunne, a very goodly man of person, stature and complexion, and well learned also," evidently a presence fit for a throne. Dee adds: "They which yet live and were hearers and beholders, they can testifie more than is meete here to be written of these my boyish attempts and exploites scholasticall."

He turned to sterner studies, and became a skilful astronomer, taking "thousands of observations (very many to the hour and minute) of the heavenly influences and operations actual in this elementall portion of the world." These he afterwards published in various "Ephemerides."

In May, 1547, Dee made his first journey abroad, to confer with learned men of the Dutch Universities upon the science of mathematics, to which he had already begun to devote his serious attention. He spent several months in the Low Countries, formed close friendships with Gerard Mercator, Gemma Frisius, Joannes Caspar Myricaëus, the Orientalist Antonius Gogava, and other philosophers of world-wide fame. Upon his return to Cambridge, he brought with him two great globes of Mercator's making, and an astronomer's armillary ring and staff of brass, "such as Frisius had newly devised and was in the habit of using." These he afterwards gave to the Fellows and students of Trinity College; he cites a letter of acknowledgment from John Christopherson (afterwards Bishop of Chichester), but upon search being made for the objects recently, through the kindness of the Master, it appears they are not now to be found. Dee returned to Cambridge in the year 1548 to take his degree of M.A., and soon after went abroad. "And never after that was I any more student in Cambridge." Before he left, he obtained under the seal of the Vice-Chancellor and Convocation, April 14, 1548, a testimonial to his learning and good conduct, which he proposed to take with him abroad. Many times did he prove it to be of some value.

In Midsummer Term, 1548, he entered as a student at the University of Louvain, which had been founded more than a hundred years before in this quaint old Brabantian town of mediaeval ramparts and textile industries. At Louvain, Dee continued his studies for two years, and here he soon acquired a reputation for learning quite beyond his years. It has been presumed that he here graduated doctor, to account for the title that has always been given him. "Doctor Dee" certainly possesses an alliterative value not to be neglected. At Cambridge he was only M.A.

Long after, when he had passed middle life, and when his remarkable genius in every branch of science had carried him so far beyond the dull wit of the people who surrounded him that they could only explain his manifestations by the old cry of "sorcery and magic," Dee made a passionate appeal to the Queen, his constant patron and employer, to send two emissaries of her own choosing to his house at Mortlake, and bid them examine everything they could find, that his character might be cleared from the damaging charges laid against him. He prepared for these two commissioners, to whose visit we shall revert in its proper place, an autobiographical document of the greatest value, which he calls "The Compendious Rehearsal of John Dee: his dutiful declaration and proove of the course and race of his studious life, for the space of half an hundred years, now (by God's favour and help) fully spent." It is from this narrative that the facts of his early life are

ascertainable. Perhaps we discern them through a faint mist of retrospective glorification for which the strange streak of vanity almost inseparable from attainments like Dee's was accountable. But there is every reason to reply upon the accuracy of the mathematician's story.

"Beyond the seas, far and nere, was a good opinion conceived of my studies philosophicall and mathematicall." People of all ranks began to flock to see this wonderful young man. He gives the names of those who came to Louvain, a few hours' journey from Brussels, where the brilliant court of Charles V. was assembled, with evident pride. Italian and Spanish nobles; the dukes of Mantua and Medina Celi; the Danish king's mathematician, Mathias Hacus; and his physician, Joannes Capito; Bohemian students, all arrived to put his reputation to the test. A distinguished Englishman, Sir William Pickering, afterwards ambassador to France, came as his pupil to study astronomy "by the light of Mercator's globes, the astrolabe, and the astronomer's ring of brass that Frisius had invented." For his recreation, the teacher "looked into the method of civil law," and mastered easily the points of jurisprudence, even "those accounted very intricate and dark." It was at Louvain, no doubt, that his interest in the subject of alchemy became strengthened and fixed. Stories were rife of course of the famous alchemist, Henricus Cornelius Agrippa, who had died there, in the service of Margaret of Austria, only a dozen years or so before. Agrippa had been secretary to the Emperor Maximilian, had lived in France, London, and Italy, and Louvain, no doubt, was bursting with his extraordinary feats of magic.

The two years soon came to an end, and a couple of days after his twenty-third birthday, young Dee left the Low Countries for Paris, where he arrived on July 20, 1550. His fame had preceded him, and within a few days, at the request of some English gentlemen and for the honour of his country, he began a course of free public lectures or readings in Euclid, "Mathematice, Physice et Pythagorice," at the College of Rheims, in Paris, a thing, he says, which had never been done before in any university in Christendom. His audience (most of them older than himself) was so large that the mathematical schools would not hold them, and many of the students were forced in their eagerness to climb up outside the windows, where, if they could not hear the lecturer, they could at least see him. He demonstrated upon every proposition, and gave dictation and exposition. A greater astonishment was created, he says, than even at his scarabaeus mounting up to the top of Trinity Hall in Cambridge. The members of the University in Paris at the time numbered over 4,000 students, who came from every part of the known world. He made many friends among the professors and graduates, friends of "all estates and professions," several of whose names he gives; among them, the learned writers and theologians of the day, Orontius, Mizaldus, Petrus Montaneus, Ranconetus (Ranconnet), Fernellius, and Francis Silvius.

The fruit of these years spent in Louvain and Paris was that Dee afterwards maintained throughout his life a lively correspondence with professors and doctors in almost every university of note upon the Continent. He names especially his correspondents in the universities of Orleans, Cologne, Heidelberg, Strasburg, Verona, Padua, Ferrara, Bologna, Urbino, Rome, and many others, whose letters lay open for the inspection of the commissioners on that later visit already alluded to.

An offer was made him to become a King's Reader in mathematics in Paris University, with a stipend of two hundred French crowns yearly, but he had made

up his mind to return to England, and nothing would tempt him to stay. He received other proposals, promising enough, to enter the service of M. Babeu, M. de Rohan, and M. de Monluc, who was starting as special ambassador to the Great Turk, but his thoughts turned back to England, and thither, in 1551, he bent his steps.

CHAPTER II

IMPRISONMENT AND AUTHORSHIP

“A man is but what he knoweth.” — Bacon

In December, 1551, Dee obtained, through the offices of Mr. (afterwards Sir) John Cheke, an introduction to Secretary Cecil and to King Edward VI. He had already written for and dedicated to the King two books (in manuscript): *De usu Globi Coelestis*, 1550, and *De nubium, solis, lunae, ac reliquorum planetarum*, etc., 1551. These perhaps had been sent to Cheke, the King's tutor, in the hope that they might prove useful lesson books. The pleasing result of the dedication was the gift of an annual royal pension of a hundred crowns. This allowance was afterwards exchanged for the rectory of Upton-upon-Severn, in Worcestershire, which Dee found an extremely bad bargain.

From the Beacon Hill above West Malvern Priory, the visitor may turn from inspection of the ancient British camp of Caractacus to admire the magnificent view; and across the level fields where the Severn winds, the tower of Upton church will be seen rising in the middle distance. Further west, if the day be clear, the more imposing towers of Tewkesbury and Cloucester may be discerned, while half a turn eastward will show Worcester Cathedral, not far away. Dee never lived in this beautiful place, although he was presented to the living on May 19, 1553. Even when the rectory of Long Leadenham, in Lincolnshire, was added to Upton, the two together were worth only about eighty pounds a year. Next year he declined an invitation to become Lecturer on Mathematical Science at Oxford, conveyed to him through “Mr. Doctor Smith” (Richard, D.C.L., 1528, the reformer), of Oriel College, and “Mr. du Bruarne,” of Christ Church. He was occupied with literary work, and in 1553 produced, among other things, a couple of works on *The Cause of Floods and Ebbs*, and *The Philosophical and Political Occasions and Names of the Heavenly Asterismes*, both written at the request of Jane, Duchess of Northumberland.

When Mary Tudor succeeded her young brother as queen in 1553, Dee was invited to calculate her nativity. He began soon after to open up a correspondence with the Princess Elizabeth, who was then living at Woodstock, and he cast her horoscope also. Before long he was arrested on the plea of an informant named George Ferrys, who alleged that one of his children had been struck blind and another killed by Dee's “magic.” Ferrys also declared that Dee was directing his enchantments against the Queen's life. Dee's lodgings in London were searched and sealed up, and he himself was sent to prison. He was examined before the Secretary of State, afterwards upon eighteen articles by the Privy Council, and at last brought into the Star Chamber for trial. There he was cleared of all suspicion of treason, and liberated by an Order in Council. August 29, 1555, but handed over to Bishop Bonner for examination in matters of religion. Bonner was apparently equally satisfied. Dee was certainly enjoined by him, at John Philpot's examination on

November 19, 1555, to put questions as a test of his orthodoxy. He quoted St. Cyprian to Philpot, who replied: "Master Dee, you are too young in divinity to teach me in the matters of my faith, though you be more learned in other things."

Dee deserves well of all writers and students for time everlasting because of his most praiseworthy efforts to found a State National Library of books and manuscripts, with copies of foreign treasures, wherever they might be. On January 15, 1556, he presented to Queen Mary "a Supplication for the recovery and preservation of ancient writers and monuments." Within a few years he had seen the monasteries dissolved and the priceless collections of these houses lamentably dispersed, some burned and others buried. He drew up a very remarkable address to the Queen dwelling on the calamity of thus distributing "the treasure of all antiquity and the everlasting seeds of continual excellency within this your Grace's realm." Many precious jewels, he knows, have already perished, but in time there may be saved and recovered the remnants of a store of theological and scientific writings which are now being scattered up and down the kingdom, some in unlearned men's hands, some walled up or buried in the ground. Dee uses powerful arguments to enforce his plea, choosing such as would make the most direct appeal to both Queen and people. She will build for herself a lasting name and monument; they will be able all in common to enjoy what is now only the privilege of a few scholars, and even these have to depend on the goodwill of private owners. He proposes first that a commission shall be appointed to inquire what valuable manuscripts exist; that those reported on shall be borrowed (on demand), a fair copy made, and if the owner will not relinquish it, the original be returned. Secondly, he points out that the commission should get to work at once, lest some owners, hearing of it, should hide away or convey away their treasures, and so, he pithily adds, "prove by a certain token that they are not sincere lovers of good learning because they will not share them with others." The expenses of the commission and of the copying, etc., he proposed should be borne by the Lord Cardinal and the Synod of the province of Canterbury, who should also be charged to oversee the manuscripts and books collected until a library "apt in all points" is made ready for their reception.

Finally, Dee suggests that to him be committed the procuring of copies of many famous manuscript volumes to be found in the great libraries abroad: the Vatican Library at Rome, St. Mark's at Venice, and in Bologna, Florence, Vienna, etc. He offers to set to work to obtain these, the expenses only of transcription and carriage to England to be charged to the State. As to printed books, they are to "be gotten in wonderfull abundance." In this generous offer of his life to be spent in transcribing crabbed manuscripts, we cannot see the restless genius of John Dee long satisfied, but at any rate he proved himself not seeking for private gain.

Thus was the germ of a great National Library first started by the Cambridge mathematician, nearly fifty years before Thomas Bodley opened his unique collection at Oxford, and close upon 200 years before there was founded in the capital the vast and indispensable book-mine known to all scholars at home and abroad as the British Museum. The Historical Manuscripts Commission, whose labours in cataloguing private collections of archives are also foreshadowed in Dee's supplication, only came into being with the appointment of Keepers of the Public Records, by an Act signalling the first and second years of Queen Victoria's reign.

It is needless to say that nothing came of Dee's very disinterested proposition. So he became the more industrious in collecting a library of his own, which soon

consisted of more than 4,000 volumes, which were always at the disposal of the friends who came often to see him.

They came also for another reason.

Astrology was a very essential part of astronomy in the sixteenth century, and the belief in the controlling power of the stars over human destinies is almost as old as man himself. The relative positions of the planets in the firmament, their situations amongst the constellations, at the hour of a man's birth, were considered by the ancients to be dominant factors and influences throughout his whole life. It is not too much to say that a belief in the truth of horoscopes cast by a skilled calculator still survives in our Western civilisation as well as in the East. Medical science today pays its due respect to astrology in the sign, little altered from the astrological figure for Jupiter, with which all prescriptions are still headed.

Dee, as one of the foremost mathematicians and astronomers of the time, and one employed by the Queen, became continually in request to calculate the nativity and cast a horoscope for men and women in all ranks of life. He has left many notes of people's births; his own children's are entered with the greatest precision, for which a biographer has to thank him.

When Elizabeth mounted with firm steps the throne that her unhappy sister had found so precarious and uneasy a heritage, Dee was very quickly sought for at Court. His first commission was entirely sui generis. He was commanded by Robert Dudley to name an auspicious day for the coronation, and his astrological calculations thereupon seem to have impressed the Queen and all her courtiers. Whether or no we believe in the future auguries of such a combination of influences as presided over the selection of the 14th of January, 1559, for the day of crowning Elizabeth in Westminster Abbey, we must acknowledge that Dee's choice of a date was succeeded by benign and happy destinies.

He was then living in London. We do not know where his lodging was, but several of the books belonging to his library have come down to us with his autograph, "Joannes Dee, Londini," and the dates of the years 1555, 1557, and 1558.

Elizabeth sent for him soon after her accession, and invited him to her service at Whitehall with all fair promises. He was introduced by Dudley, then and long afterwards her first favourite; so he was likely to stand well. "Where my brother hath given him a crown," she said to Dudley, or to Dee's other sponsor, the Earl of Pembroke, "I will give him a noble." This was the first of innumerable vague promises made, but it was long indeed before any real and tangible gift was conferred on the astrologer, although he was continually busied about one thing and another at the fancy of the Queen. The reversion of the Mastership of St. Catherine's Hospital was promised him, but "Dr. Willson politickly prevented me."

One morning the whole Court and the Privy Council were put into a terrible flutter by a simple piece of what was common enough in ancient times and in Egypt — sympathetic magic. A wax image of the Queen had been found lying in Lincoln's Inn Fields, with a great pin stuck through its breast, and it was supposed undoubtedly to portend the wasting away and death of her Majesty, or some other dreadful omen. Messenger after messenger was despatched to summon Dee, and bid him make haste. He hurried off, satisfied himself apparently of the harmless nature of the practical joke, and repaired, with Mr. Secretary Wilson as a witness of the whole proceedings and a proof of all good faith, to Richmond, where the Queen was. The Queen sat in that part of her private garden that sloped down to the river,

near the steps of the royal landing-place at Hampton Court; the Earl of Leicester (as Dudley had now become) was in attendance, gorgeous and insolent as ever; the Lords of the Privy Council had also been summoned, when Dee and Mr. Secretary expounded the inner meaning of this untoward circumstance, and satisfied and allayed all their fears. Something about the calm attributes of this seasoned and travelled scholar seemed always to give moral support to the Queen and her household; this is only the first of many occasions when he had to allay their superstitious fright. That she felt it essential to keep him within reach of herself may have been one reason for not giving him the appointments for which he, and others for him, constantly sued. Dee was not an easy person to fit into a living: he required one with no cure of souls attached; for this, he says, “a cura animarum annexa, did terrifie me to deal with them.” He is called a bachelor of divinity by Foxe in 1555, and as a matter of fact he does, both in 1558 and in 1564, add the letters S. D. T. to his name in his printed works. This degree also was not from Cambridge. At last he grew tired of waiting, and a certain restlessness in his character, not incompatible with the long patience of the true follower of science, drove him again abroad. His intention was to arrange for printing works already prepared in manuscript. To search among out-of-the-way bookmongers and book-lovers in high-walled German towns, for rare treasures wherewith to enrich his native country, was another magnet that drew his feet. In February, 1563, after he had been thus employed for more than a year, he wrote from the sign of the Golden Angel, in Antwerp, to Cecil, to ask if he was expected to return to England, or if he might remain to oversee the printing of his books, and continue his researches among Dutch books and scholars. He had intended, he says, to return before Easter, but this was now impossible, owing to printer’s delays. When we remember that a hundred years had barely elapsed since the first metal types had been cast and used in a hand press, it is not wonderful that Dee’s treatise, with its hieroglyphic and cabalistic signs, took long to print. He announces in the letter to Cecil a great bargain he has picked up, a work, “for which many a learned man hath long sought and dayley yet doth seek,” upon cipher writing, viz. *Steganographia*, by the famous Abbot Trithemius of Wurzburg. It is the earliest elaborate treatise upon shorthand and cipher, a subject in which Cecil was particularly interested. It was then in manuscript (first printed, Frankfort, 1606). Dee continues that he knows his correspondent will be well acquainted with the name of the book, for the author mentions it in his Epistles, and in both the editions of his *Polygraphia*. He urges its claims upon the future Lord Treasurer, already a statesman of ripe experience, in the following words: “A booke for your honor or a Prince, so meet, so nedefull and commodious, as in human knowledge none can be meeter or more behovefull. Of this booke, either as I now have yt, or hereafter shall have yt, fully wholl and perfect, (yf it peas you to accept my present) I give unto your Honor as the most precious juell that I have yet of other mens travailles recovered.”

He then goes on to beg the minister and Secretary of State to procure for him that “learned leisure (*dulcia illa ocia*) the fruit whereof my country and all the republic of letters shall justly ascribe to your wisdom and honorable zeal toward the advancement of good letters and wonderful, divine, and secret sciences.” Dee had copied in ten days, “by continual labour,” about half of the book: a Hungarian nobleman there has offered to finish the rest, if Dee will remain in Antwerp and direct his studies for a time.

“Of this booke the one half (with contynual labour and watch, the most part of 10 days) have I copyed oute. and now I stand at the curtesye of a nobleman of Hungary for writing furth the rest; who hath promised me leave thereto, after he shall perceyve that I may remayne by him longer (with the leave of my Prince) to pleasure him also with such pointes of science as at my handes he requireth.

“I assure you the meanes that I used to cumpas the knowledge where this man and other such are, and likewise of such booke as this, as for this present I have advertisement of, have cost me all that ever I could here with honesty borrow, besydes that which (for so short a time intended) I thought needefull to bring with me, to the value of xxlib. God knoweth my zeale to honest and true knowledg; for which my flesh, blud, and bones should make the marchandize, if the case so required.”

Dee did remain in the Low Countries; he completed his *Monas Hieroglyphica*, dated its prefatory dedication to the Emperor Maximilian II., at Antwerp, January 29, 1564, and added an address to the typographer, his “singular good friend, Gulielmo Silvio,” dated the following day. the book appeared in April, and he at once journeyed to Presburg, to present a copy to Maximilian. Its twenty-four theorems deal with the variations of the figure represented on our title-page, which may be roughly explained as the moon, the sun, the elements (the cross), and fire as represented by the waving line below. Dee says that many “universitie graduates of high degree, and other gentlemen, dispraised it because they understood it not,” but “Her Majestie graciously defended my credit in my absence beyond the seas.” On his return in June she sent for him to Court and desired him to read the book with her. Dee’s account of his regal pupil is given with much quaintness. “She vouchsafed to account herself my schollar in my book...and said whereas I had prefixed in the forefront of the book: *Qui non intelligit aut taceat, aut discat*: if I would disclose to her the secrets of that book she would *et discere et facere*. Whereupon her Majestie had a little perusion of the same with me, and then in most heroicall and princely wise did comfort and encourage me in my studies philosophicall and mathematicall.”[His escort had been required for the Marchioness of Northampton, who was returning from Antwerp to Greenwich. In return for this assistance the lady begged the Queen’s favour for her cavalier. elizabeth was always Dee’s very good friend, and she made a grant to him on December 8, 1564, of the Deanery of Gloucester, then void, but other counsels prevailed, and it was soon bestowed on some other man. No doubt the appointment would have given great offence, for the popular eye was already beginning to see in Dee no highly equipped mathematician, geographer and astronomer, but a conjuror and magisian of doubtful reputation, in fact, in the current jargon, one who “had dealings with the devil.” What there had been at this time to excite these suspicions beyond the fact that Dee was always ready to expound a comet or an eclipse, to cast a horoscope, or explain that the Queen would not immediately expire because a wax doll with a stiletto in its heart was found under a tree, it is hard to say. But that these rumours were extremely persistent is seen by the astrologer’s defence of himself in the “very fruitfull” preface which he, as the first mathematician of the day, was asked to write to Henry Billingsley’s first English translation of Euclid’s *Elements*, in February, 1570. This preface must be reckoned as

one of Dee's best achievements, although, as he says, in writing it, "he was so pinched with straightness of time that he could not pen down the matter as he would." He points out that Euclid has already appeared in Italian, German, High Dutch, French, Spanish and Portuguese dress, and now at last comes to England. [

In spite of its ex parte nature, a study of this preface alone must convince any reader that the author was no charlatan or pretender, but a true devotee of learning, gifted with a far insight into human progress. He covers in review every art and science then known, and some "until these our daies greatly missed" (his comments on music and harmony are truly remarkable), and comes back to his own predilection — arithmetic, "which next to theologie is most divine, most pure, most ample and generall, most profound, most subtele, most commodious and most necessary." He quotes Plato to show how "it lifts the heart above the heavens by invisible lines, and by its immortal beams melteth the reflection of light incomprehensible, and so procureth joy and perfection unspeakable." Speaking of the refraction of light, he foreshadows the telescope as he describes how the captain of either foot or horsemen should employ "an astronomical staffe commodiously framed for carriage and use, and may wonderfully help himself by perspective glasses; in which I trust our posterity will prove more skilfull and expert and to greater purpose than in these days can almost be credited to be possible." Then he alludes to a wonderful glass belonging to Sir William P., famous for his skill in mathematics, who will let the glass be seen. The passage seems to show that looking-glasses were not common, or that this particular one was a convex mirror.

"A man," he says, "may be curstly afraid of his own shadow, yea, so much to feare, that you being alone nere a certain glasse, and proffer with dagger or sword to foyne at the glasse, you shall suddenly be moved to give back (in maner) by reason of an image appearing in the ayre betweene you and the glasse, with like hand, sword or dagger, and with like quickness foyning at your very eye, like as you do at the glasse. Strange this is to heare of, but more mervailous to behold than these my wordes can signifie, nevertheless by demonstration optically the order and cause thereof is certified, even so the effect is consequent."

This mirror was given to Dee not long afterwards.

From optics he passes on to mechanics, and mentions having seen at Prague mills worked by water, sawing "great and long deale bordes, no man being by." He describes accurately a diving chamber supplied with air, and sums up some of the mechanical marvels of the world: — the brazen head made by Albertus Magnus, which seemed to speak; a strange "self-moving" which he saw at St. Denis in 1551; images seen in the air by means of a perspective glass; Archimedes' sphere; the dove of Archytas; and the wheel of Vulcan, spoken of by Aristotle; and comes down to recent workmanship in Nuremberg, where an artificer let fly an insect of iron, that buzzed about the guests at table, and then returned "to his master's hand agayne as though it were weary." All these things are easily achieved he says, by "skill, will industry and ability duly applied to proof." "But is any honest student, or a modest Christian philosopher, to be, for such like feats, mathematically and mechanically wrought, counted and called a conjuror? Shall the folly of idiots and the mallice of the scornfull so much prevaile that he who seeketh no worldly gaine or glory at their hands, but onely of God the Threasure of heavenly wisdom and knowledge of

pure veritie, shall he, I say, in the mean space, be robbed and spoiled of his honest name and fame? He that seeketh, by S. Paul's advertisement in the creatures' properties and wonderfull vertues, to find juste cause to glorifie the eternall and Almighty Creator by, shall that man be condemned as a companion of Hell-hounds and a caller and conjuror of wicked damned spirits?" Then he recounts his years of study, and asks, "Should I have fished with so large and costlly a nett, and been so long time drawing, even with the helpe of Lady Philosophie and Queen Theologie, and at length have catched but a frog, nay a Devill?...How great is the blindness and boldness of the multitude in things above their capacitie!"[Then he refers to some who have appeared against him in print.

"O my unkind countrymen. O unnatural Countrymen, O unthankfull countrymen, O brainsicke, Rashe, spitefull and disdainfull countrymen. Why oppresse you me thus violently with your slaundering of me, contrary to veritie, and contrary to your own conscience? And I, to this hower, neither by worde, deede or thought, have bene anyway hurtfull, damageable, or injurious to you or yours! Have I so long, so dearly, so farre, so carefully, so painfully, so dangerously fought and travailed for the learning of wisdom and atteyning of vertue, and in the end am I become worse than when I began? Worse than a madman, a dangerous member in teh Commonwelath and no Member of the Church of Christ? Call you this to be learned? Call you this to be a philosopher and a lover of wisdom?"

He goes on to speak of examples before his time to whom in godliness and learning he is not worthy to be compared: — "patient Socrates," Apuleius, Joannes Picus and Trithemius, Roger Bacon, "the flower of whose worthy fame can never dye nor wither," and ends by summing up the people who can conceive nothing outside the compass of their capacity as of four sorts: — "vain prattling busybodies, fond friends, imperfectly zealous, and malicious ignorant." Of these he is inclined to think the fond friends the most damaging, for they overshoot the mark and relate marvels and wonderful feats which were never done, or had any spark of likelihood to be done, in order that other men may marvel at their hap to have such a learned friend.[The eloquent irony of this passage seems equalled only by its extraordinary universality, its knowledge of human character and its high philosophic spirit. At what a cost did a seeker after scientific truths follow his calling in the sixteenth century!

CHAPTER III

MORTLAKE

"In her princely countenance I never perceived frown toward me, or discontented regard or view on me, but at all times favourable and gracious, to the joy and comfort of my true, faithful and loyal heart." — DEE, of Queen Elizabeth.

The promised benefice did not yet come, although Dee's friends at Court were all busy on his behalf. Either now or later, he was actually mentioned as Provost of Eton, and the Queen "answered favourably." Mistress Blanche Parry and Mistress Scudamore, lady-in-waiting to Anne, Countess of Warwick, urged his claims for the

Mastership of St. Cross at Winchester, which it was thought Dr. Watson would soon vacate. But all he seems to have obtained was a fresh dispensation from Matthew Parker, Archbishop of Canterbury, to enjoy the two Midland rectories for ten years.[

He continued his literary work, and beside writing new manuscript treatises, bethought himself of an old one, which although printed had not received great attention. This was the *Propoedeumata Aphoristica* (London, 1558), dedicated to his old and dear friend and fellow-student at Louvain, Mercator, “my Gerard,” as he affectionately calls him. In January, 1568, Dee presented a copy of a new edition, with an address to the studious and sincere philosophical reader, dated December 24, 1567, from “our museum” at Mortlake, to “Mr. Secretary Cecil, now Lord Treasurer.” Two copies were given at the same time to the Earl of Pembroke, one for him to use or give away at his pleasure, the other, by Cecil’s advice, to be presented by him to the Queen. Within three days, Dee heard from Pembroke that she had graciously accepted and well liked his book. This gratifying information was rendered acceptable by a gift: — “He gave me very bountifully in his owne behalfe xxlib. to requite such my reverent regard of his honour.”[An interview with the Queen followed on February 16, at 2 o’clock, when there was talk between them in the gallery at Westminster “of the great secret for my sake to be disclosed unto her Majesty by Nicholas Grudius, sometime one of the secretaries to the Emperor Charles V.” Of this alchemical secret, no doubt concerning transmutation, Dee writes after, “What was the hinderance of the perfecting of that purpose, God best knoweth.”[He was now over forty, and had a natural desire to range himself and house his library. Before 1570 he took up his abode with his mother, in a house belonging to her at Mortlake, on the river Thames. It was an old rambling place, standing west of the church between it and the river. Dee added to it by degrees, purchasing small tenements adjoining, so that at length it comprised laboratories for his experiments, libraries and rooms for a busy hive of workers and servants. Mrs. Dee occupied a set of rooms of her own. Nothing of the old premises now remains, unless it be an ancient gateway leading from the garden towards the river. After Dee’s death the house passed through an interesting phase of existence, being adapted by Sir Francis Crane for the Royal tapestry works, where, encouraged by a handsome grant of money and orders from the parsimonious James, suits of hangings of beautiful workmanship were executed under the eye of Francis Cleyne, a “limner,” who was brought over from Flanders to undertake the designs. At the end of the eighteenth century, a large panelled room with red and white roses, carved and coloured, was still in existence. Early in the nineteenth century the house was used for a girls’ school, kept by a Mrs. Dubois.[Here Dee took up his abode. Its nearness to London and to the favourite places of Elizabeth’s residence — Greenwich, Hampton Court, Sion House, Isleworth, and Nonsuch — was at first considered a great advantage, and the journey to and from London was almost invariably made by water. The Queen desired her astrologer to be near at hand. When he fell dangerously ill at Mortlake in 1571, after a tedious journey abroad into the duchy of Lorraine on some mysterious errand, Elizabeth sent down two of her own physicians, Doctors Atslove and Balthorp, to attend him. Lady Sidney was also despatched with kind, and gracious, and “pithy” messages from the sovereign, and delicacies, “divers raretiess,” were supplied from the royal table to supplement his mother’s provision for the invalid. The Queen seems to have felt a special obligation to look after him, as she had sent him on some mission of her own,

which probably we shall not be far wrong in thinking connected with Dee's alchemistic experiments. Every Court in Europe at this time had astrologers and alchemists in its employ, and the Queen and Burleigh were as anxious as Dee that he should really attain the ever-elusive secret of transmutation. Dee had of course carried the Queen's passport for himself and a couple of servants, with horses, and had obtained permits through foreign ambassadors in London to travel freely through various countries.[Dee was now bent on rather a strange form of public service. On October 3, 1574, he wrote a very remarkable letter to Lord Burleigh of four and a half folio pages in that best printed hand of his which offers no excuse for skipping. His own paramount deserts are very naturally one of the main subjects. He has spent all his money and all his life in attaining knowledge. "Certes, by due conference with all that ever I yet met with in Europe, the poor English Bryttaine (*Il favorita di vostra Excellentia*) hath carried the Bell away. God Almighty have the glory." If he had only a sufficiency of two or three hundred pounds a year, he could pursue science with ease. Failing that, there is another way. Treasure trouve is a very casual thing, and the Queen is little enriched thereby, in spite of her royal prerogative. No one knows this better than the Lord Treasurer. Now, if her Majesty will grant him, but Letters Patent under her hand and seal, the right for life to all treasure he can find, he promises to give Burleigh one half, and of course to render to the Queen and Commonwealth the proportion that is theirs. It is not the gold, as wealth, that appeals to this man of books and stars: —

"The value of a mine is matter for King's Treasure, but a pott of two or three hundred pounds hid in the ground, wall, or tree, is but the price of a good book, or instrument for perspective astronomy, or some feat of importance."

He has spent twenty years in considering the subject; people from all parts have consulted him about dreams, visions, attractions and demonstrations of *sympathia et antipathia rerum*;" but it is not likley he would counsel them to proceed without permission from the State. Yet what a loss is here!

"Obscure persons, as hosiers or tanners, can, under color of seeking assays of metalls for the Saymaster, enioy libertie to dig after dreamish demonstrations of places. May not I then, in respect of my payns, cost, and credit in matters philosophical and mathematicall, if no better or easier turn will fall to my Lot from her Majestie's hands, may I not then be thought to mean and intend good service toward the Queen and this realm, yf I will do the best I can at my own cost and charge to discover and deliver true prooffe of a myne, vayn, or ore of gold or silver, in some place of her Grace's kingdom, for her Grace's only use?"

The Society of Royal Mines had been incorporated May 28, 1565, and the Queen had granted patents to Germans and others to dig for mines and ores. It was well known that the country abounded in hidden treasure. The valuables of the monasteries had been, in many cases, hastily buried before the last abbot was ejected at the dissolution. The subject had a special fascination for Dee, who was conscious of a "divining rod" power to discover the hiding places. He made a curious diagram of ten localities, in various counties, marked by crosses, near which he believed treasure to lie concealed. He ends his letter to Burleigh with a more practical and

much more congenial request. He has been lately at Wigmore Castle, and has seen a quantity of parchments and papers from which he has copied accounts, obligations, acquittances. Will the Treasurer give him a letter to Mr. Harley, keeper of the records there, asking permission to examine them and report as to the contents? "My fantasy is I can get from them, at my leisure, matter for chronicle or pedigree, by way of recreation." So he ends with an apology for his long letter and is "you Lordship's most bownden John Dee."

Nothing seems to have resulted from this letter at the time; later he did receive a grant of royalties from a mine.

in 1575 Dee married. He seems to have had no time for such an event before. He was now in his forty-eighth year, and did not execute the fatal folly (which, in his Court life, he had seen many times exemplified) of committing the indiscretion first and informing the Queen after. He duly laid before her his intention, and received in return a "very gracious letter of credit for my marriage." He also had congratulatory epistles from Leicester and from Christopher Hatton.

The Queen, when out riding in Richmond Park with her lords and ladies, would sometimes pass through the East Sheen Gate, down the hill towards the river, and would stop at the house between Mortlake Church and the Thames, desiring to be shown the latest invention of her astrologer, or the newest acquisition of his library. On the afternoon of one such windy day in march, 1576, she arrived at a slightly unlucky moment, for Dee's young wife, after a year of marriage, had just died, and not four hours earlier had been carried out of the house for burial in the churchyard opposite. Hearing this, Elizabeth refused to enter, but bade Dee fetch his famous glass and explain its properties to her outside in the field. Summoning Leicester to her assistance, she alighted from her horse by the church wall, was shown the wonderful convex mirror, admired the distorted image of herself, and finally rode away amused and merry, leaving the philosopher's distress at his recent bereavement assuaged for the moment by such gracious marks of royal interest and favour. And so this wraith of Dee's first wife fades away in the courtly picture, and we do not even know her name.

He turned more than ever to literary work and followed up the scholastic books dedicated to the young King Edward VI. and the studies of astrological hieroglyphs with books of another kind. To this year of historical labours, perhaps, belongs a letter from Dee to his "loving friend," Stow, the historian. Contrary to Dee's careful practice, it is undated, save for day and month, "this 5th of December." He has evidently been the means of introducing a fellow-author in influential quarters, for he says, "My friend, Mr. Dyer, did deliver your books to the two Earls, who took them thankfully, but, as he noted, there was no reward commanded of them. What shall be hereafter, God knoweth. So could not I have done." Then he adjures Stow to "hope as well as I," and turns from considering fruits to the sources of their toil. He sends a list of the various ports, including the Cinque Ports, that have a mayor or bailey, all except Gravesend, which has a portreeve. Stow may get fuller information, "the very true plat," from Lord Cobham's secretary. He returns a manuscript of Asser's Saxon Chronicle; "it is not of the best and perfectest copy. I had done iwth it in an hour. If you have Floriacensis Wigornensis [the Chronicle of Florence of Worcester] I would gladly see him a little."

Stow, like Dee, was a Londoner and, within a year or two, of the same age. He had already published his *Annals of England*, which had then gone through four editions.

Dee now began to keep a diary of his doings, written in the pages and margins of three fat quarto almanacs, bound in sheepskin and clasped. Quotations have perhaps already shown that his style, his spelling, his use of words, is that we expect from a man of his wide culture and reading. He was of the new learning, though before Shakespeare and Bacon. He had also two or more distinct handwritings, a roman hand with neat printed letters, and a scribbling hand. In the former all his manuscript works and his letters are written; his diary is in the last. This diary was quite unnoticed until about 1835, when the almanacs were discovered at Oxford in the Ashmolean Library, having been acquired by Elias Ashmole, a devout believer in hermetic philosophy and collector of all alchemical writings. They were transcribed (very inaccurately) by J.O. Halliwell and printed by the Camden Society in 1842.

The books contain a strange medley of borrowings and lendings, births and deaths, illnesses, lawsuits, dreams and bickerings; observations of stars, eclipses and comets, above all of the weather (for Dee was a great meteorologist), of horoscopes, experiments in alchemy and topographical notes. Here are some of the earliest entries: —

“1577. Jan. 16. The Earl of Leicester, Mr. Philip Sidney, and Mr. Dyer, etc., came to my house.” This was Edward Dyer, Sidney’s friend, afterwards to be dramatically associated with Dee and Kelley in their reputed discovery of the secret of making gold. “Feb. 19th. great wynde S.W., close, cloudy. March 11. My fall upon my right knucklebone about 9 o’clock. Wyth oyle of Hypericon in 24 hours eased above all hope. God be thanked for such his goodness to his creatures! March 12. Abrahamus Ortelius me invisit Mortlakii.” This interesting visit from the great Dutch map-maker is entirely omitted in the printed diary. “May 20. I hyred the barber of Chyswick, Walter Hooper, to kepe my hedges and knots in as good order as he seed them then, and that to be done with twice cutting in the year, at the least, and he to have yearly five shillings and meat and drink.”

Then he speaks of a visitor, Alexander Simon, who comes from Persia, and has promised his “service” on his return, probably to assist with information on Eastern lore and wisdom. His friend and neighbour, William Herbert, sends him notes upon his already published *Monas*. Another work is ready for press, and he is constrained to raise money, whether for the printing or other expenses. In June he borrowed 40 pounds from one, 20 pounds from another, and 27 pounds upon “the chayne of gold.” On August 19, his new book is put to printing (one hundred copies) at John Day’s press in Aldersgate.

This was another of those works, so pithy and so alive in their remarkable application to the future, which have fallen with their author into undeserved neglect. Dee had made suggestions about supplying officers of the army with perspective glasses as part of their equipment. Now his friendship with the Gilberts, Davis, Hawkins, Frobisher, and others of the great sea-captains, drew his attention to the sister service and the sea power of “this blessed isle of Albion.” He had spent most of the previous year (1576) in writing a series of volumes to be entitled “General and Rare Memorials pertayning to the perfect art of Navigation.” The first

volume, *The British Monarchy, or Hexameron Brytannicum*, was finished in August. It was dedicated to Christopher Hatton in some verses beginning: —

“If privat wealth be leef and deere
To any wight on British soyl,
Ought public weale have any peere?
To that is due all wealth and toyle.

Whereof such lore as I of late
Have lern’d, and for security,
By godly means to Garde this state,
To you I now send carefully.”

The intention is better than the lines. Dee was no poet, and even a bad versifier, but he would not have been a true Elizabethan had he not on special occasions dropped into rhyme, like the rest of his peers.

The second volume, *The British Complement*, “larger in bulk than the English Bible,” was written in the next four months and finished in December. It was never published; its author tells us it would cost many hundreds of pounds to print, because of the tables and figures requisite, and he must first have a “comfortable and sufficient opportunity or supply thereto.” The necessary funds were never forthcoming, and the book remained in manuscript. A considerable part of it is devoted to an exposition of the “paradoxall” compass which its author had invented in 1557.

The third volume was mysterious; it was to be “utterly suppressed or delivered to Vulcan his custody.” The fourth was *Famous and Rich Discoveries*, a book, he thinks, “for British Honour and Wealth, of as great godly pleasure as worldly profit and delight.” It was a work of great historical research which never saw the light.

The prejudice against Dee was so strong, and he was so much misunderstood, some persons openly attributing his works to other writers, others accusing him of selfishly keeping all his knowledge to himself, many perverting his meaning through ignorance, and again one, a Dutch philosopher, publishing a treatise which was in substance a repetition of his, that he determined to withhold his name from the publication. The anonymity is not, however, very well maintained, for Dee used the flimsy device of a preface to the reader by an “unknown friend,” in which all the griefs and ill usages of that “harmless and courteous gentleman,” “that extraordinary studious gentleman,” the author, are freely aired. Under the thin disguise, Dee’s high opinion of his own merits peeps, nay stares, out. Slanders have been spread against him, a damaging letter counterfeited by Vincent Murphy, his name and fame injured; he has been called “the arch-conjurer of the whole kingdom.” “Oh, a damnable sklander,” he bursts out, “utterly untrue in the whole and in every worde and part thereof, as before the King of Kings will appear at the dreadful day.” It is no conceit on Dee’s part, with his European reputation, to say that he “had at God his most mercifull handes received a great Talent of knowledge and sciences, after long and painful and costly travails.” And he goes on to say that he is both warned by God and of his own disposition to enlarge the same and to communicate it to others, but now he finds himself discouraged; he cannot “sayl

against the winds eye,” or pen any more treatises for his disdainful and unthankful countrymen to use or abuse, or put his name to any writing. The unknown friend has no desire to flatter the studious gentleman, but considering all his contributions to learning, he may honestly say, without arrogancy and with great modesty, that “if in the foresaid whole course of his tyme he had found a constant and assistant Christian Alexander, Brytain should now now have been destitute of a Christian Aristotle”!

But he soon gets engrossed in his subject, which is to urge the importance of establishing “a Petty Navy Royall, of three score tall ships or more, but in no case fewer,” of 80 to 200 tons burden, to be thoroughly equipped and manned “as a cinfirt abd safeguard to the Realme.” He shows the security it would give to or merchants, the usefulness in “deciphering our coasts,” sounding channels and harbours, observing of tides. Thousands of soldiers, he says, “will thus be hardened and well broke to the rage and disturbance of the sea, so that in time of need we shall not be forced to use all fresh-water Soldyers,” but we shall have a crew of “hardy sea-soldyers” ready to hand. This is interesting as showing that the word “sailor” was not yet in use. Then he touches on the question of unemployment: “hundreds of lusty handsome men will this way be well occupied and have needful maintenance, which now are idle or want sustenance, or both.” “These skilful sea-soldyers will be more traynable to martiall exploits, more quick-eyed and nimble [he quotes Pericles for this], than the landsmen.” The Petty Navy Royall, as apart from the Grand Navy Royall, will look after pirates, will protect our valuable fisheries, and generally serve us in better stead than four such forts as “Callys or Bulleyn.” Coming to the financial side, he asserts that every natural born subject of this “British Empire” will willingly contribute towards this “perpetual benevolence for sea security” the hundredth penny of his rents and revenues, the five hundredth penny of his goods valuation, for the first seven years, and for the second seven the hundred and fiftieth penny and the seven hundred and fiftieth penny of goods valuation, the same, after fourteen years, to be commuted for ever to half the original contribution. He calculated this tax would amount to 100,000 pounds or over. If that is not sufficient, he would exact a second tax (exempting all such counties, towns, and the five ports, as have Letters Patent for such immunity) of the six hundredth penny of every one’s goods and revenues. He would have twenty victualling ports, in every part of the kingdom, “the incredible abuses of purveyors duly reformed.” He would have a stop put to carrying our gunpowder and saltpetre out of the realm. “Good God,” he cries, “who knoweth not what proviso is made and kept in other Common Weales against armour carrying out of their Limits?” He speaks of many hundred pieces of ordnance lately carried out of the kingdom, so that we must make new; and deplores the wholesale destruction of our forests and timber (which is needed for ships) to keep the iron works going. Then he foreshadows the Trinity House by asking for a “Grand Pilot generall of England.” He outlines a scheme of navy pensions, and in relation to the fisheries quotes sanitary statutes of Richard II. He devotes a chapter to the history of “that peaceable and provident Saxon, King Edgar,” his “yearly pastime of sailing round this island in summer, guarded by his fleet of 4,000 sail,” and speaks of the efficiency of Edgar’s navy and the maintenance of his forts upon the coast. Then he passes to his final argument. We must attain this “incredible political mystery” — the supermacy of our sea power. We must be “Lords of the Seas” in order that our “wits and travayles” may be employed at home

for the enriching of the kingdom, that “our commodities (with due store reserve) may be carried abroad,” and that peace and justice may reign. “For we must keep our own hands and hearts from doing or intending injury to any foreigner on sea or land.”

Enough has been said of this book, perhaps, to show that it is a remarkable contribution towards the history of the navy and the fishing industries of Britain. It may be contended that if within twelve years England could offer a crushing defeat to the greatest sea power of the world, and establish herself mistress of the seas, she was not in need of theoretical advice from a landsman on the subject, but at any rate Dee’s treatise voices the ideals of the times, the hopes that inspired all true lovers of their country and of their Queen in the sixteenth century. In the thunders of the Armada they were to be realised.

CHAPTER IV

JANE DEE

“Content I live, this is my stay,
I seek no more than may suffice;
I press to bear no haughty sway,
Look, what I lack my mind supplies:
Lo! thus I triumph like a king,
Content with that my mind doth bring.”
— Sir Edward Dyer.

That October the Queen and the whole Court were thrown into a perturbed state of mind by a strange appearance in the heavens. This was the comet which the Swedish astronomer, Kepler, declared to predict the appearance in the north of Europe of a prince who should lay waste all Germany, and should vanish in 1632. It was lucky for his prognostications that Gustavus Adolphus was really born in Finland, did embroil Central Europe in the Thirty Years’ War, and did die in 1632.

What the “blazing star,” as they called it, foreboded, no one at Court could tell; Dee was summoned forthwith to expound the phenomenon. “Her Majestie took great pleasure to hear my opinion, for the judgment of some had unduly bred great fear and doubt in many of the Court, being men of no small account. For three diverse dayes she did use me.” Dee did not forget to urge his suit to the Queen, not so much this time for preferment but for protection.

“Her Majestie promised unto me great security against any of her kingdom that would by reason of any my rare studies and philosophical exercises unduly seek my overthrow. Whereupon I again to her Majestie made a very faithful and inviolable promise of great importance. The first part whereof, God is my witness I have truely and sincerely performed; tho’ it be not yet evident, how truely, or of what incredible value. The second part, by God his great mercies and helps, may in due time be performed, if my plat for the meanes be not misused or defaced.”

Nearly two years passed before Dee married his second wife, Jane Fromond, of East Cheam, Surrey. She was a lady-in-waiting

at the Court to Lady Howard of Effingham, wife of the Lord Admiral (Charles Howard) who was afterwards in command of the fleet victorious against the “invincible” Spanish Armada. Lady Howard proved a true friend both to Jane and her elderly but learned husband throughout the rest of her life.

He paid a long visit to the Court at Windsor a couple of months before the marriage, staying there from November 22 to December 1, 1577, and records interviews with the Queen on various days, and with “Mr. Secretary Walsingham.” It may be presumed that the marriage was then arranged, for without the Queen’s consent it could never have taken place. Just before leaving, he had a conversation with Sir Christopher Hatton, the newly-made knight of that day (December 1).

The marriage took place on February 5, 1578, at one o’clock, as the bridegroom tells in his diary, but at what church he omits to say. Perhaps it took place in a Royal Chapel at Court. The young bride was twenty-two. She was a clever, well-born woman, hasty and quick-tempered, but of a steadfast and thorough faithfulness. It was no easy task to be the wife of a brilliant and erudite mathematician nearly thirty years her senior, but to the end of her days Jane proved herself a true and fitting helpmate, a most careful and devoted mother to her eight children. Little could she have foreseen at this bridal hour into what strange paths the coming years would lead her. Dee’s devotion to his Jane, his growing respect for her force of character, is faithfully reflected in his diary, where every detail of her doings and her health is studiously entered.

Before the end of the year, he had to leave home and undertake a sudden journey abroad at the command of the Queen’s ministers. Elizabeth, in spite of an iron constitution, was ill and distracted with toothache and rheumatic pains. She had come to Richmond from Greenwich on September 25, and the next day the fine weather broke up. “The first rayn that came for many a day,” says Dee, “all pasture about us was withered. Rayn in afternone like Aprile showres.” A week or two after this he was summoned to Hampton Court, and had a conference of two hours with the Queen, from nine to eleven in the morning. Dr. Bayly, the Queen’s physician, came to Mortlake on October 16 to consult with him, for his profound hermetic studies gave him all the prestige of a super-doctor. On the 22nd Jane (Dee still writes of her as “Jane Fromonds,” probably to distinguish her from his mother, Jane Dee) went to Hampton Court. She found the Queen no better, in fact a worse fit of paint than ever occurred on the 25th, lasting from nine in the evening till after midnight. On the 28th, Leicester and Walsingham decided to send Dee abroad to consult with some foreign physician about the malady. He was given his instructions at nine o’clock on November 4th; on the 7th he reached Gravesend, and sailed from Lee on the 9th. By three o’clock on the 14th, he was in Hamburg; in Berlin on December 6; and on the 11th at Frankfurt-upon-Oder. The entry on the 15th, “newes of Turnifer’s comming, 8 o’clock, by a speciall messenger,” looks as if the object of his journey was attained. There are no more details of the business.

The diary is resumed in March, 1579, with some trivial entries about his showing Mr. John Lewis and his son, the physician, how to draw aromatical oils, and a note of his cat getting a young fledgling sparrow that “had never had but one — the right — wing, naturally.”

Dee’s mother surrendered to him on June 15, 1579, the house and lands at Mortlake, with reversion to his wife Jane, and to his heirs and assigns after him, for

ever. The document was delivered to him by a surveyor from Wimbledon (in which parish Mortlake was included) under the tree by the church. The fine for the surrender — twenty shillings — was paid to the Queen, as Lady of the Manor, on October 31.

A month later, on his fifty-second birthday, July 13, 1579, Dee's eldest son, Arthur, was born. The event was coincident with another, for that same night, at ten o'clock, Jane's father, Mr. Fromond (Dee always adds an "s" to the name), was seized with a fit and rendered speechless; he died on Tuesday, the 14th, at four in the morning. Arthur was christened at three o'clock on the 16th; Edward Dyer and "Mr. Doctor Lewis, judge of the Admiralty," were his godfathers; his godmother was one of Dee's Welsh relations, "my cosen, Mistress Blanche Parry, of the Queen's Privy Chamber." She was represented by another cousin, Mistress Aubrey, from Kew. "August 9. Jane Dee churched," is almost the next thing recorded.

Dyer was already a person in considerable favour with the Queen. He was Sidney's great friend, and after the poet's death on the field of Zutphen, was legatee of half his books. Dyer was no mean poet himself, even among his greater compeers. He is the author of those immortal verses on "Contentment," beginning "My mind to me a kingdom is," which were set to music in 1588 by William Byrd. We shall meet him again in these pages.

Dee of course knew all about Elizabeth's long flirtation with the King of France's brother, Duc d'Alencon, and her diplomatic holding off from the match. He notes Mr. Stafford's arrival as an emissary from "Monsieur." The Queen kept a very tender spot in her heart for this ugly little deformed suitor, and Dee has a remarkable note of a call from her at Mortlake as she returned from Walsingham's on February 11, 1583: "Her Majesty axed me obscurely of Monsieur's state. I said he was

" (dead-alive).

Pupils now began to resort to Dee. "John Elmeston, student of Oxford, cam to me for dialling." "Mr. Lock brought Benjamin his sonne to me: his eldest sonne also, called Zacharie, cam then with him." This was Michael Lock, the traveller. Zachary was the eldest of Lock's fifteen children; Benjamin afterwards wrote on alchemy — A Picklock for Ripley's Castle.

It was a stormy October, of continuous rains and floods for three or four days and nights, and a "raging wynde at west and southerly." Six persons were drowned in the Kew ferry boat, "by reason of the vehement and high waters overwhelming the boat aupon the roap, but the negligens of the ferryman set there to help." Mrs. Dee had a strange dream that "one cam to her and touched her, saying, `Mistress Dee, you are conceived of child, whose name must be Zacharias; be of good chere, he sal do well, as this doth.'" This, meaning Arthur, had a sharp illness soon after, however, and when the next child arrived, in two years' time, it chanced to be a girl, who was named Katherine. So the dream went by contraries after all. Arthur was weaned in August, and his nurse discharged, with her wages, ten shillings, for the quarter ending at Michaelmas, paid in full. Dee is an exact accountant as well as diarist, and enters every payment with precise care.

The Queen came riding down from Richmond in her coach, to see what her astrologer was doing, on September 17, 1580, and put the household in a flutter. She took

“The higher way of Mortlake field, and when she came right against the church, she turned down toward my house. And when she was against my garden in the field, her Majestie stayed there a good while, and then came into the field at the great gate of the field, where her Majestie espied me at the door, making reverent and dutiful obeysance unto her; and with her hand, her Majestie beckoned for me to come to her, and I came to her coach side; her Majesty then very speedily pulled off her glove and gave me her hand to kiss; and to be short, her Majestie willed me to resort oftener to her Court, and by some of her Privy Chamber to give her to weete when I am there.”

One can picture the gorgeously dressed and pearl-bedecked Queen, her auburn hair glistening in the sun, beckoning majestically to her astrologer, bidding him attend and swell the troops of courtiers and admirers, demanding imperiously to be let know when he came, and to be kept informed of all he did. Dee was a handsome man, tall and slender; he wore a beard, pointed and rather long. Among the crowd of personable courtiers in their rich and most becoming suits, he would be no inconspicuous figure.

It was perhaps the publication of the first volume of the “General and Rare Memorials pertayning to the art of perfect Navigation” that brought Dee into intimate relations with the navigators of the time. Or it may have been his intimacy with them that suggested the work. the Hexameron appeared in September, 1577, and in November the diarist first records a visit from one of them: “Sir Umfrey Gilbert cam to me at Mortlake.” Gilbert was then living at Limehouse, engaged in writing discourses on naval strategy and discovery. A few months later, Dee mentions a suggestion he gave to Richard Hakluyt, the author of the fascinating histories of the voyages: “I told Mr. Daniel Rogers, Mr. Hakluyt of the Middle Temple being by, that Kyng Arthur and King Mary, both of them, did conquer Gelindia, lately called Friseland, which he so noted presently in his written copy of Monumenthensis, for he had no printed book thereof.” On August 5, one of Gilbert’s company, “Mr. Reynolds of Bridewell, tok his leave of me as he passed toward Dartmouth to go with Sir Umfrey Gilbert toward Hochelaga.” The expedition sailed from Dartmouth on September 23, Sir Humphrey having obtained his long-coveted charter to plant a colony in the New World in June. All his money was sunk in this unfortunate expedition, which only met diasaster at the hands of a Spanish fleet. Undaunted, however, Sir Humphrey set to work to collect more funds and information to pursue his end. With the first Dee could not help him much; with the last he believed he could, and in return he exacted a stake in the results: “1580, Aug. 28th. my dealing with Sir Humfrey Gilbert graunted me my request to him made by letter, for the royalties of discovery all to the north above the parallell of the 50 degree of latitude, in the presence of Stoner, Sir John Gilbert his servant or reteiner; and thereupon took me by the hand with faithful promises, in his lodging of Cooke’s house in Wichcross Streete, where we dyned, onely us three together, being Satterday.”

It was more than two years before Gilbert succeeded in getting enough other persons to embark their capital in his project, and then he set out on his final voyage, the second to Newfoundland (the first having been assisted by Raleigh, his half-brother, in 1578). We all know the end, how, after he had planted “his raw

colony of lazy landmen, prison birds and sailors," he set out in his little vessel, The Squirrel, to explore the coast and sandbanks between Cape Breton Island and Newfoundland, and then headed for England. In a storm off the Azores, the little ship foundered and was lost, its captain's last words being, "We are as near Heaven by sea as by land."

With another brother, Adrian Gilbert, Dee had much closer relations, as we shall shortly see. This younger half-brother of Sir Walter Raleigh was reputed "a great chemist in those days," which of course meant something of an alchemist. He is associated in one's mind with "Sidney's sister, Pembroke's mother," that accomplished and beautiful inspirer of the most exquisite epitaph ever penned, for he was one of the "ingenious and learned men" who filled her house at Wilton "so that it was like a college." The Countess of Pembroke spent a great deal yearly in the study of alchemy, and kept Adrian as a laborant for a time. He is described as a buffoon who cared not what he said to man or woman of any quality. Bringing John Davis, another of the breezy Devon sea captains, Adrian came to Mortlake to effect a reconciliation after some uncomfortable passages caused, as they found, by dishonest dealings on the part of William Emery, whom they now exposed. "John Davis say'd that he might curse the tyme that ever he knew Emery, and so much followed his wicked counsaile and advyse. So just is God!" Here again we suspect Dee's reputation for "magic" had been the trouble.

With the discovery of so many new coasts and islands across in the Western seas, the Queen was anxious to know what right she had to call them hers, and what earlier navigators had sailed to them before. After Frobisher's three voyages in search of the North-West Passage, she sent for the author of the Hexameron and bade him set forth her title to Greenland, Estoteland (Newfoundland) and Friseland. This document he calls "Her Majestie's commandment — Anno 1578." Either he prepared another, or did not present this to the Queen for two years.

1580. — "On Monday Oct. 3, at 11 of the clock before none, I delivered my two Rolls of the Queene's Majestie's title unto herself in the garden at Richmond, who appointed after dynner to heare fuder of the matter. Therefore betweene one and two afternone, I was sent for into her highness Pryvy Chamber, where the Lord Treasurer allso was, who having the matter slightly then in consultation, did seme to doubt much that I had or could make the argument probable for her highnes' title so as I pretended. Wheruppon I was to declare to his honor more playnely, and at his leyser, what I had sayd and could say therein, which I did on Tuesday and Wensday following, at his chamber, where he used me very honorably on his behalf."

The next day Dee fancied that Burleigh slighted him. He called to see him, and was not admitted; he stood in the ante-chamber when the great man came out, but the Lord Treasurer swept by and "did not or would not speak to me." Probably he was pondering deeply on important matters of state. Dee's hopes of preferment fell to the ground, and he was persuaded that "some new grief was conceyved." Dee was ambitious; he was not yet surfeited with fame; of wealth he had none, hardly even a competency; he was vain, and he knew that he had gifts which few of his countrymen could rival or even understand; and he was no longer young. Such

advantages as he could attain must be secured quickly, if they were to be enjoyed at all.

“On the 10th, at four o’clock in the morning my mother Jane Dee dyed at Mortlake; she made a godlye ende: God be prayesd therfore! She was 77 yere old.”

News of this event quickly travelled to the Court at Richmond, and the Queen determined to signalise her favour to Dee and her gratification at Burleigh’s report of his geographical labours, which reached her on the same day as the news of his loss, by a personal visit of condolence.

“Oct. 10th. The Quene’s Majestie, to my great cumfort (hora quinta), cam with her trayn from the court, and at my dore graciously calling me to her, on horsbak, exhorted me briefly to take my mother’s death patiently, and withall told me that the Lord Threasurer had greatly commended my doings for her title, which he had to examyn, which title in two rolls he had brought home two hours before; and delivered to Mr. Hudson for me to receive at my coming from my mother’s burial at church. Her Majestie remembered allso how at my wive’s death, it was her fortune likewise to call uppon me.”

So the fancied slight was nothing. The Queen’s second remarkably-timed visit was followed up by an haunch of venison from my Lord Treasurer, and an atmosphere of satisfaction reigned. One of the rolls of which Dee writes is still in existence. It has on one side of the parchment a large map of “Atlantis,” or America, drawn with the skill of a practised cartographer. At the top is his name, “Joannes Dee,” and the date, “Anno 1580.” Among his papers is a smaller map, upon which large tracts in the Polar regions are marked “Infinite yse.” Thge other side of the roll is devoted to proving the Queen’s title to lands she would never see or hear of, under the four following heads: “1. The Clayme in Particular. 2. The Reason of the Clayme. 3. The Credit of the Reason. 4. The value of that Credit by Force of Law.”

Dee was also busied this summer attending at the Muscovy House and writing instructions and drawing a chart for the two captains, Charles Jackson and Arthur Pett, for their North-East voyage to “Cathay,” or China.

He had perhaps joined the Company of the Merchant Venturers, for in March, 1579, he had signed a letter with Sir Thomas Gresham, Martin Frobisher (as every one knows, he was knighted in the thick of the Armada fight), and others, to the Council of State, desiring that those Adventurers who have not paid shall be admonished to send in contributions without delay. Another very interesting remark tells how “Young Mr. Hawkins, who had byn with Sir Francis Drake, came to me to Mortlake, in June, 1581; also Hugh Smith, who had just returned from the Straits of Magellan.” In November, Dee is observing “the blasing star,” or comet, of which, with its long tail, he makes a drawing on the margin of his diary. By the 22nd it had disappeared: “Although it were a cler night, I could see it no more.”

On June 7, 1581, at half-past seven in the morning, Dee’s second child and eldest daughter, Katherine, was born. She was christened on the 10th, her sponsors being Lady Katherine Crofts, wife of Sir James Crofts, Controller of the Queen’s Household; Mistress Mary Scudamore, of the Privy Chamber, the Queen’s cousin;

and Mr. Packington, also a court gentleman. The infant was put out to nurse, first at Barnes with Nurse Maspely, then transferred to Goodwife Bennett. On August 11

“Katherine Dee was shifted to nurse Garrett at Petersham, on Fryday, the next day after St. Lawrence day, being the 11th day of the month. My wife went on foot with her, and Ellen Cole, my mayd, George and Benjamin, in very great showers of rain.”

Nevertheless the little Katherine seemed to flourish, and there are entries of monthly payments of six shillings to her nurse, with allowance for candles and soap, up to August 8 of the following year, when “Kate is sickly,” and on the 20th is reported as “still diseased.” Four or five days after, she was taken from nurse Garret, of Petersham, and weaned at home. The mother had several times been over to see the child, sometimes on foot, attended by George or Benjamin, the servants, and once by water with “Mistress Lee in Robyn Jackes bote.” The children seemed in trouble at this time, for about seven weeks before Arthur “fell from the top of the Watergate Stayres, down to the fote from the top, and cut his forhed on the right eyebrow.” This was at the old landing-place at Mortlake. Their childish ailments are always most carefully recorded in the diary, even when the cause is a box on the ears — probably well earned — from their quick-tempered mother. Jane’s friends Mr. and Mrs. Scudamore, and their daughter, and the Queen’s dwarf, Mrs. Tomasin, all came for a night to Mortlake. Jane went back with Mistress Scudamore to the Court at Oatlands. A number of other visitors are named, including “Mr. Fosker of the wardrobe.”

CHAPTER V

THE SEARCH FOR A MEDIUM

“Truth is within ourselves; it takes no rise
From outward things, whate’er you may believe
There is an inmost centre in us all
Where truth abides in fulness; and around
Wall upon wall, the gross flesh hems it in,
This perfect clear perception, which is truth.
A baffling and perverting carnal mesh
Binds it and makes all error; and to KNOW
Rather consists in opening out a way
Whence the imprisoned splendour may escape
Than in effecting entry for a light
Supposed to be without.”

— Browning, Paracelsus.

Dee had always, working with and under him, a number of young students and assistants, who were admitted more or less to his inner counsels. If they proved apt and diligent, he would reward them with promises of alchemical secrets, “whereby they might honestly live”; once he promised 100 pounds, “to be paid as soon of my own clere hability, I myght spare so much.” This was a very safe

provision. Generous as he was, lavish to a fault, money never stuck near him, nor was it of the least value in his eyes, except as a means of advancing science and enriching others.

Naturally, jealousies arose among the assistants. They would suddenly depart from his service, and spread ignorant and perverted reports of his experiments. Roger Cook, who had been with his master fourteen years, took umbrage "on finding himself barred from view of my philosophical dealing with Mr. Henrick." He had imagined himself the chosen confidant, for to him Dee had revealed, December 28, 1579, what he considered a great alchemical secret "of the action of the elixir of salt, one upon a hundred." Roger was now twenty-eight, "of a melancholik nature, and had been pycking and devising occasions of just cause to depart on the sudden," for he was jealous of a newer apprentice. "On September 7th, 1581, Roger went for altogether from me." But it was not "altogether," for Roger returned when Dee was old and infirm and poor, and remained serving him almost to the end. There was always something patriarchal in Dee's care for the members of his large household, evidenced abundantly in his diary. No doubt their loyalty to him was often severely tried by harsh and cruel outside rumours, but as they knew and loved his real nature they only drew closer towards him.

A new phase of his character is now forced upon us. He has appeared hitherto as the man of learning, astronomer and mathematician, a brilliant lecturer and demonstrator, diligent in probing the chemical and alchemical secrets of which his vast reading, his foreign correspondence, and his unique library gave him cognisance. Interested in geographical discovery and history, a bibliographical and mathematical writer, his genuine contributions to science had been considerable. He had written upon navigation and history, logic, travel, geometry, astrology, heraldry, genealogy, and many other subjects. He had essayed to found a National Library, and was contemplating a great work upon the reformation of the Calendar. But these purely legitimate efforts of his genius were discounted in the eyes of his contemporaries by the absurd suspicions with which his name had been associated ever since his college days. After his arrest and trial by Bonner, he never really succeeded in shaking off this savour of something magical. The popular idea of Dee in league with evil powers was, of course, the natural result of ignorance and dull understanding. To a public reared in superstition, untrained in reasoning, unacquainted with the simple laws of gravitation, the power to raise heavy bodies in the air at will, to see pictures in a simple crystal globe, or converse with projections of the air, to forecast a man's life by geometric or planetary calculations, and to discern the influence of one chemical or mineral substance upon another, seemed diabolically clever and quite beyond human agency. Even to study Nature and her secrets was to lay oneself open to the suspicion of being a magician. We must remember that in the early years of Queen Elizabeth's reign it was thought necessary to pass an Act of Parliament decreeing that all who practised sorcery causing death should suffer death; if only injury was caused, imprisonment and the pillory would be the punishment. Any conjuration of an evil spirit was to be punished by death as a felon, without benefit of clergy or sanctuary. Any discovery of hidden treasure by magical means was punishable by death for a second offence.

But if "magic" was tottering on its throne, the reign of alchemy was still uncontested. Belief in it was universal, its great votaries in the past were of all nations. St. Dunstan of Glastonbury, Roger Bacon, Raymond Lully, Canon George

Ripley of Bridlington, Albertus Magnus, Cornelius Agrippa, Arnold de Villa Nova and Paracelsus, all their writings, and hundreds of others, Dee had in his library and constantly upon his tongue. Alchemy was not only a science, it was a religion and a romance. It was even then enduring the birth-throes and sickly infancy of modern chemistry, and the alchemists' long search for the secret of making gold has been called one of its crises. Long after this it was still an article of faith, that such a man as Robert Boyle did not deny. We cannot forget that even that great chemist, Sir Humphry Davy, revered the possibility, and refused to say that the alchemist's belief in the power to make gold was erroneous. How unlike Dante's keen irony of the dark and groping men who seek for "peltro," or tin whitened with mercury. But alchemy was bursting with many other secrets beyond the manufacture of gold. The spiritual element abounding in all minerals, and the symbolism underlying every actual substance, were deeply imbedded in it. It was a science of ideals. It ever led its followers on to scale illimitable heights of knowledge, for in order to surpass all material and rational nature, and attain the crowning end, did not God delegate His own powers to the sage? So the art of healing was thought the noblest, the most Godlike task, and no means of attaining hermetic wisdom were untried. The psychical world became every bit as real to these religious mystics as the physical and rational, which they understood so vaguely. Even the strange shapes which escaped from the retorts of the old alchemists were known to them as "souls." Their successors called them spirits. Paracelsus named them as mercury, and it was left to his pupil, Van Helmont, the true founder of all modern chemistry, to give the name of gas.

It is easy to see how Dee, the astrologer, grew into close touch with those psychic phenomena which, though they have become extremely familiar to us, as yet continue to baffle our most scientific researches. When he first became conscious of his psychic powers, and how far he himself was mediumistic, is harder to discern. It is on May 25, 1581, that he makes in his diary the momentous entry: — "I had sight in Chrystallo offered me, and I saw." We may take it that he "saw" through a medium, for he never afterwards seems to have been able to skry without one. Perhaps his first crystal had then been given him, although, as we have seen, he already owned several curious mirrors, one said to be of Mexican obsidian such as was used for toilet purposes by that ancient race. He had made a study of optics, and in his catalogue of the manuscripts of his library are many famous writings on the spectrum, perspective and burning glasses, etc. Then came the trouble with Roger, "his incredible doggedness and ungratefulness against me to my face, almost ready to lay violent hands on me." Dee hears strange rappings and knockings in his chamber. A gentleman came from Lewisham to consult him about a dream many times repeated. Dee prays with him, and "his dream is confirmed and better instruction given." A mysterious fire breaks out for the second time in "the maydens" chamber at night. The knocking is heard again, this time accompanied with a voice repeated ten times. No words apparently, but a sound like "the schrich of an owl, but more longly drawn and more softly, as it were in my chamber." He has a strange "dream of being naked and my skyn all over wrought with work like some kinde of tuft mockado, with crosses blew and red; and on my left arm, about the arm in a wreath, these words I read: — 'Sine me nihil potestis facere.' And another the same night of Mr. Secretary Walsingham, Mr. Candish and myself." Then he was ten days from home, at "Snedgreene, with John Browne, to hear and

see the manner of the doings.” Evidently some remarkable manifestation. he was becoming more interested in psychic problems, but he was not able to proceed without a medium, and the right one had not yet appeared.

Meanwhile, he fills his diary with all manner of interesting news. Vincent Murphy, the “cosener” who had defamed him, and against whom in September, 1580, he had instituted a troublesome law-suit, was condemned by a jury at the Guildhall to pay 100 pounds damages. “With much adoe, I had judgment against him.” Five or six months later, he agreed with Mr. Godolphin to release the cosener. Jean Bodin, the famous French writer on witches, and publicist, had come to England with “Monsieur,” and Dee was introduced to him by Castelnau, the French ambassador, in the “Chamber of Presence at Westminster.” Letters came from Doctor Andreas Hess, the occult philosopher, sent through Dee’s friend, Richard Hesketh, agent at Antwerp. There are also letters from Rome. John Leonard Haller, of Hallerstein by Worms, came to him to say he had received instructions for his journey into “Quinsay [or Northern china], which journey I moved him unto, and instructed him plentifully for observing the variation of the compass in all places as he passed.” He notes, as if it were a common occurrence, a “fowl falling out” between two earls at Court, Leicester and Sussex [the Lord Chamberlain], tells how they “called each other traitor, whereupon both were commanded to keepe to their chambers at Greenwich, where the Court was.” It sounds like a schoolboys’ quarrel, but the royal schoolmistress would have them both know that they were in disgrace for a time. In July, there was an eclipse of the moon, but it was “cloudy, so as I could not perceive it.” In August, about half-past eight on the night of the 26th, “a strange Meteore in forme of a white clowde crossing galaxium, lay north and south over our zenith. This clowde was at length from the S.E. to the S.W., sharp at both ends, and in the West it was forked for a while. It was about sixty degrees high, it lasted an hour, all the skye cleare about and fair star-shyne.”

Dee made a journey into Huntingdonshire, by St. Neots, to Mr. Hickman’s at Shugborough, in the county of Warwick. Young Bartholomew Hickman was afterwards to become the companion and servant of his old age, and manifested some slight mediumistic powers. On the way home, a month or two later, Dee rode into Sussex to Chailey, probably to the glass works there. The Queen and “Monsieur” were at Whitehall.

A pretty little scene was enacted at Mortlake at the New Year, when “Arthur Dee and Mary Herbert, they being but 3 years old, the eldest of them, did make as it were a show of childish marriage, of calling each other husband and wife.” Then Dee essays a harmless little play upon words. “The first day Mary Herbert came to her father’s house at Mortlake, the second day she came to her father’s house at East Shene.” Mrs. Dee went the same day to see the baby Katherine at Nurse Garret’s, and Mistress Herbert went with her. So the two families were in great unity.

Sir George Peckham, who sailed with Sir Humphrey Gilbert, came to consult Dee about exploration in North America, and promised a share in his patent of the new lands. He also sent down his sea-master, Mr. Clement, and another gentleman, Mr. Ingram, to see the mathematician. For Sir John Killigrew, Dee devised “a way of protestation to save him harmless for compounding for the Spaniard who was robbed: he promised me fish against Lent.” Haller came again to get instructions how to transfer his money to Nuremberg, and to get letters of introduction to

Constantinople. By him, Dee sent letters to correspondents in Venice, where the German explorer was to winter.

Mr. Newbury, who had been in India, came early in the New Year. Dee recounts how the stage in that well-known old London place of amusement, the Paris Garden, on Bankside, Southwark, fell down suddenly while it was crammed with people beholding the bear-baiting. "Many people were killed thereby, more hurt, and all amazed. The godly expound it as a due plague of God for the wickedness there used, and the Sabbath day so profanely spent." Sunday was the great day for the bear-fights.

"1583. — Jan. 23. Mr. Secretarie Walsingham cam to my howse, where by good luk he found Mr. Awdrian Gilbert, and so talk was begonne of Northwest Straights discovery.

"Jan. 24. Mr. Awdrian Gilbert and John Davis went by appointment to Mr. Secretary, to Mr. Beale his house, where only we four were secret, and we made Mr. Secretarie privie of the N.W. passage, and all charts and rutters were agreed uppon in generall.

"Feb. 3. Mr. Savile, Mor. Powil the younger, travaylors, Mr. Ottomeen his sonne cam to be acquaynted with me.

"Feb. 4. Mr. Edmunds of the Privie Chamber, Mr. Lee, Sir Harry Lee, his brother, who had byn in Moschovia, cam to be acquaynted with me.

"Feb. 11. The Queene lying at Richmond went to Mr. Secretarie Walsingham to dynner; she coming by my dore graciously called me to her, and so I went by her horse side as far as where Mr. Hudson dwelt.

"Feb. 18. Lady Walsingham cam suddenly to my house very freely, and shortly after that she was gone, cam Syr Francis himself, and Mr. Dyer.

"March 6. I and Mr. Adrian Gilbert and John Davis did mete with Mr. Alderman Barnes, Mr. Townson and Mr. Yong and Mr. Hudson, about the N.W. passage.

"March 17. Mr. John Davys went to Chelsey with Mr. Adrian Gilbert to Mr. Radforths, and so, the 18th day from thence, to Devonshyre.

"April 18. The Queene went from Richmond toward Greenwich, and at her going on horsbak, being new up, she called for me by Mr. Rawly his putting her in mynde, and she sayd 'quod defertur non aufertur,' and gave me her right hand to kisse."

While these every-day events were going on and being chronicled, Dee was also occupying himself with the search for a medium. He first tried one named Barnabas Saul (he seems to have been a licensed preacher), who professed himself an occultist. Saul gives news of buried treasure — great chests of precious books hidden somewhere near Oundle in Northamptonshire, but the disappointed book-lover finds the hoard an illusion. Then Saul, who slept in a chamber over the hall at Mortlake, is visited at midnight by "a spiritual creature." The first real seance that Dee records, "Actio Saulina," took place on December 21, 1581. The skryer was bidden to look into the "great crystalline globe," and a message was transmitted by the angel Annael through the percipient to the effect that many things should be declared to Dee, not by the present worker, "but by him that is assigned to the stone." After New Year's tide, on any day but the Sabbath, the stone was to be set in the sun,

the brighter the day the better, and sight should be given. The sitters might “deal both kneeling and sitting.” When we consider how very real to a devout person in the Middle Ages apparitions of the devil and of evil spirits were, there seems nothing at all extraordinary in Dee’s belief that good spirits also might be permitted to come to his call, for purposes of good. A month or two after this, Saul was indicted on some charge and tried in Westminster Hall, but, thanks to Mr. Serjeant Walmesley and a couple of clever lawyers, he was acquitted. There was an end of his clairvoyance, however: “he confessed he neyther herd or saw any spirituall crature any more.” If the accusation against him had been that of sorcery, he was wise to risk no further appearances in Westminster Hall. He seems to have spread abroad many false reports about Dee, who reproached him bitterly when he called at Mortlake a few months later. Dee had, however, gained psychical experience by these early and tentative experiments. The field was now open for a maturer applicant. When he arrived, he was to change the whole current of Dee’s life and outlook, to become at once a helper and a stumbling-block, a servant and a master, loving as a son, treacherous as only a jealous foe. It was a strange fate that sent Edward Kelley to Dee at this moment, when everything was ripe for his appearance. And it was characteristic of the man that he was ushered into Dee’s life under a feigned name. On March 8, two days after Saul had confessed he saw and heard no more of the spirits, Dee writes in his diary, “Mr. Clerkson and his frende cam to my howse.” He makes the visit very emphatic by repeating the information: “Barnabas went home abowt 2 or 3 o’clock, he lay not at my howse now; he went, I say, on Thursday, and Mr. Clerkson came.” At nine o’clock the same night, there was a wonderful exhibition of the aurora in the northern and eastern heavens, which Dee describes minutely in Latin in the diary. The next day, March 9, he mentions Clerkson’s friend by name as “Mr. Talbot,” and shows how that individual appears to have begun ingratiating himself with his new patron by telling him what a bad man his predecessor was. Barnabas had said that Dee would mock at the new medium; Barnabas had “cosened” both Clerkson and Dee. This, Talbot professed to have been told by “a spiritual creature.” The pair proceeded at once to business. On the 10th, they sat downto gaze into “my stone in a frame given me of a friend,” with very remarkable results. Information was vouchsafed that they should jointly together have knowledge of the angels, if the will of God, viz., conjunction of mind and prayer between them, be performed. They were bidden to “abuse not this excellency nor overshadow it with vanity, but stick firmly, absolutely and perfectly in the love of God for his honour, together.” There were forty-nine good angels, all their names beginning with B, who were to be answerable to their call. The first entry that Dee makes in his Book of Mysteries concerning Talbot is as follows: —

“One Mr. Edward Talbot cam to my howse, and he being willing and desyrours to see or shew something in spirituall practise, wold have had me to have done something therein. And I truely excused myself therein: as not, in the vulgarly accountd magik, neyther studied or exercised. But confessed myself long tyme to have byn desyrours to have help in my philosophicall studies through the cumpany and information of the blessed Angels of God. And thereuppon, I brought furth to him my stonein the frame (which was given me of a frende), and I sayd unto him that I was credibly informed that to it (after a sort) were answerable Aliqui Angeli boni. And also that I was once willed by a skryer to call for the good Angel Annael

to appere in that stone in my owne sight. And therefore I desyred him to call him, and (if he would) Anachor and Anilos likewise, accounted good angels, for I was not prepared thereto.

“He [Talbot] settled himself to the Action, and on his knees at my desk, setting the stone before him, fell to prayer and entreaty, etc. In the mean space, I in my Oratory did pray and make motion to God and his good creatures for the furthering of this Action. And within one quarter of an hour (or less) he had sight of one in the stone.”

The one to appear was Uriel, the Spirit of Light. On the 14th, the angel Michael appeared, and gave Dee a ring with a seal. Only on two other occasions does a tangible object pass between them. Dee was overjoyed at the success of his new “speculator” or “skryer”; the sittings were daily conducted until March 21, when the medium was overcome with faintness and giddiness, and Michael, who was conversing with him, bade them rest and wait for a quarter of an hour. The next day, Talbot departed from Mortlake, being bidden by Michael to go fetch some books of Lord Monteagle’s which were at Lancaster, or thereby, and which would else perish.

He returned before long, and all through April, instructions were being given at the sittings for the future revelations. elaborate preparations were needed, and they were described in minute detail.

By April 29, a square table, “the table of practice,” was complete. It was made of sweet wood, and was about two cubits high (“by two cubits I mean our usual yard”), with four legs. On its sides certain characters, as revealed, were to be written with sacred yellow oil, such as is used in churches. Each leg was to be set upon a seal of wax made in the same pattern as the larger seal, “Sigilla AEmeth,” which was to be placed upon the centre of the table, this seal to be made of perfect, that is, clean purified wax, 9 inches in diameter, 27 inches or more in circumference. It was to be an inch and half a quarter of an inch thick, and upon the under-side was to be a figure as below.

It was a mystical sign, similar to those in use in the East, and also used by contemporary astrologers

[INSERT ILLUSTRATION]

The four letters in the centre are the initials of the Hebrew words, “Thou art great for ever, O Lord,” which were considered a charm in the Middle Ages.

The upper side of the seal was engraved with an elaborate figure obtained in the following manner. First, a table of forty-nine squares was drawn and filled up with the seven names of God — “names not known to the angels, neither can they be spoken or read of man. These names bring forth seven angels, the governors of the heavens next unto us. Every letter of the angels’ names bringeth forth seven daughters. Every daughter bringeth forth seven daughters. Every daughter her daughter bringeth forth a son. Every son hath his son.”

The seal “was not to be looked upon without great reverence and devotion.”

It is extremely curious and interesting to relate that two of these tablets of wax, “Sigillum Dei,” and one of the smaller seals for the feet of the table, with a crystal globe, all formerly belonging to Dee, are still preserved in the British

Museum, having come there from Sir Thomas Cotton's library, where the table of practice was also long preserved.

The spirits were kind enough to say: "We have no respect of cullours," but the table was to be set upon a square of red silk as changeable (i.e., shot) as may be, two yards square, and a red silk cover, with "knops or tassels" at the four corners, was to be laid over the seal, and to hang below the edge of the table. The crystal glove in its frame was then to be set upon the centre of the cover, resting on the seal with the silk between.

The skryer seated himself in "the green chair" at the table, Dee at his desk to write down the conversations. These were noted by him then and there at the time, and he is careful to particularise any remark or addition told him by the Ckryer afterwards. Once a spirit tells him: "There is time enough, and we may take leisure." Whereupon Dee conversed directly with the visitant; sometimes apparently only Talbot hears and repeats to him what is said. A golden curtain was usually first seen in the stone, and occasionally there was a long pause before it was withdrawn. Once Dee writes: "He taketh the darkness and wrappeth it up, and casteth it into the middle of the earthen globe." The spirits generally appeared in the stone, but sometimes they stept down into a dazzling beam of light from it, and moved about the room. On some occasions a voice only is heard. At the close of the action, the "black cloth of silence is drawn," and they leave off for the present.

There are very few comments or general impressions of the actions left by Dee, but on one occasion he does use expressions that show his analytical powers to have been actively at work to account for the phenomena. He brought his reason to bear upon the means of communication with the unseen world in a remarkable manner. In speaking to the angels one day he said: "I do think you have no organs or Instruments apt for voyce, but are meere spirituall and nothing corporall, but have the power and property from God to insinuate your message or meaning to ear or eye [so that] man's imagination shall be that they hear and see you sensibly."

As Plotinus says, "Not everything which is in the soul is now sensible, but it arrives to us when it proceeds as far as sense."

The minute descriptions of the figures seen are of course characteristic of clairvoyant or mediumistic visions. In the case of Bobogel, the account of his "sage and grave" attire — the common dress of a serious gentleman of the time — may be quoted.

"They that now come in are jolly fellows, all trymmmed after the manner of Nobilities now-a-dayes, with gylt rapiers and curled haire, and they bragged up and downe. Bobogel standeth in a black velvet coat, and his hose, close round hose of velvet upperstocks, over layd with gold lace. He hath a velvet hat cap with a black feather in it, with a cape on one of his shoulders; his purse hanging at his neck, and so put under his girdell. His beard long. He had pantoffolls and pynsons. Seven others are apparelled like Bobogel, sagely and gravely."

CHAPTER VI

EDWARD KELLEY

"Kelley did all his feats upon

The Devil's looking-glass, a stone
Where, playing with him at bo-peep,
He solv'd all problems ne'er so deep."

— Butler, *Hudibras*

It is now time to inquire who this Talbot, this seer and medium, was. Where did he come from, and what was his previous history?

That he came to the Mortlake philosopher under a feigned name is perhaps not so damning an accusation as might at first sight appear. There was in his case, certainly, every reason why he should change his identity, if possible, but an alias in those days was so common a thing that perhaps more stress has been laid upon Kelley's than is strictly fair.

The whole of Kelley's story is so wildly and romantically coloured, it is so incredible, and so full of marvels, that it is extremely difficult to know what to believe. There is no disentangling the sober facts of his life from the romance attributed to him; indeed, there are no sober facts, as the reader will see when the accepted traditions of this extraordinary man's career are laid down.

From March 8 to November, 1582, Edward Talbot, the skryer, came and went in the Mortlake establishment, gazed in the crystal, and ingratiated himself into his employer's liking. Then he disappeared, and Edward Kelley took his place. There had been a quarrel of some kind, precursor of many others, and Dee opens his fourth Book of Mysteries, on November 15, "after the reconciliation with Kelley." Henceforth "E.K." is his name.

Kelley was born at Worcester, on August 1, 1555, as appears by the horoscope drawn for him by the astrologer. He began life as an apothecary's apprentice, and showed some aptitude for his calling. It has been stated that, under the name of Talbot, he studied for a short time at Oxford, but left abruptly under a cloud. A few years later, he was exposed in the pillory in Lancaster for having either forged ancient title deeds or coined base money. Both feats are accounted to him. The next incident in his career is a charge of having dug up a newly buried "caitiff's" corpse in Walton-le-Dale churchyard, Lancashire, for the purpose of questioning the dead, or "an evil spirit speaking through his organs," respecting the future of "a noble young gentleman," then a minor. After this savoury episode, Kelley is reported to have been wandering in Wales (it is suggested that he was hiding from justice), when he stumbled accidentally upon an old alchemical manuscript and two caskets or phials containing a mysterious red and white powder. Another version of this discovery is that Dee and Kelley together found the powder at Glastonbury. This we may dismiss. Wherever he procured it, Kelley undoubtedly owned a small quantity of some substance which he regarded as of priceless value, inasmuch as, if properly understood and manipulated, it could be used for transmuting baser metals into gold.

The reputation of the learned doctor of Mortlake, who was known all over the Continent, was a favourite at Court, and in touch with every adventure by sea or land, had of course reached Kelley. Dee's parsonage of Upton-on-Severn, near Worcester, did not trouble him much with responsibility, but it must have been on one occasional visit to it that he received from the Dean of Worcester Cathedral a Latin volume, in which he inscribed the gift thus: "Joannes Dee, 1565, Februarii 21. Wigorniae, ex dono decani ecclesiae magistri Beddar."

With the powder that he did not know how to use, and the alchemical manuscript which he could not decipher, and which yet might contain the invaluable secret (if indeed there is any truth in the story of his find), Kelley, the adventurer, sought out some means of introduction to the man so likely to help him. He had dabbled in alchemy, and came to Mortlake with something of a reputation, for Dee speaks of him as “that lerned man.” It is utterly unlikely that Dee had heard anything of Kelley’s exploits in the north. Such doings would scarcely penetrate the solmen recesses of the laboratory on the Thames side. So Kelley arrived, and was recieved in all good faith. He told Dee that the last seer, Barnabas, had “cosened” him, and seems to have at once impressed himself favourably upon the astrologer, who at the moment was without a reliable assistant. The sittings began, as we have seen, in March, and were successful immediately. In May the message comes that “none shall enter into the knowledge of these mysteries but this worker,” and Kelley’s position is secured.

Kelley was now about twenty-seven years old, and unmarried. He was bidden by the spirits on April 20 to take a wife, “which thing to do,” he told Dee, “I have no natural inclination, neither with a safe conscience may I do it.” but Michael had made him swear on his sword to follow his counsel, so he married reluctantly, not long after, Joan, or Johanna, Cooper, of Chipping Norton, who was eight years his junior, and about nineteen.

There was little love on his side apparently, but the girl seems at any rate to have essayed to do her duty as a wife. She was apparently a complete stranger to the Dees, although soon to become part of their household. What were Jane’s feelings at the thought of this invasion of her domestic peace we can only guess from an entry in Dee’s diary made two days after one of these first sittings. Dee does not write much about his wife in his diary, save only entries relating to her health, and this one he has carefully erased, as if he thought some disloyalty to her was involved in it. It is, however, possible to make it out almost entirely. “1582, 6 May. Jane in a merveyulous rage at 8 of the cloke at night, and all that night, and next morning till 8 of the cloke, melancholike and ch[?ided me] terribly for....” Something illegible follows, and then this: “that come to me only honest and lerned men.” Finally, “by Mr. Clerkson his help was [?pacified].” What can this mean save that she had taken a violent dislike to, and disapproval of, Kelley; that she mistrusted his honesty and wished they might have no more to do with him; that it was only by his friend Clerkson’s help that she was at last quieted? Her woman’s intuition was scarcely at fault; however kindly she came to treat her husband’s medium afterwards, however charitable she showed herself, she was right in suspecting no good to come to Dee through association with Kelley.

The accounts of the actions with the spirits which took place under Kelley’s control were minutely written down by Dee, as we have seen, mostly during the time of the sittings. The papers had a romantic history. The last thirteen books, which were in Sir Thomas Cotton’s library, were printed by Dr. Meric Casaubon about fifty years after Dee’s death, under the title of *A True and Faithful Relation of what passed for many Yeers between Dr. John Dee, a Mathematician of Great Fame in Q. Elizabeth and K. James their Reigns, and some Spirits: Tending (had it succeeded) To a General Alteration of most States and Kingdomes in the World...With a Preface confirming the reality (as to the Point of Spirits) of this Relation; and shewing the several good Uses that a sober Christian may make of all*

(folio 1659). Casaubon in his learned preface maintains stoutly that the visions were no distempered fancy, that Dee acted throughout with all sincerity, but that he was deluded. His book sold with great rapidity; it excited so much controversy, and incurred such disapproval from Owen, Pye, and the other Puritan divines, that it came near being suppressed; only the excellent demand for it prevented its confiscation, for not a copy could be found. The True Relation contains the record of all actions after the beginning of June, 1583. The earlier conversations, from the first with Barnabas, and Talbot's appearance on the scene, are still to be found in manuscript, they having in some way parted company from those of which Cotton had possession.

These earlier papers were acquired by the antiquary, Elias Ashmole, in a rather romantic way. Ashmole had been visiting William Lilly, the astrologer, at Horsham, in August, 1672, when on his return his servant brought him a large bundle of Dee's autograph MSS. which a few days before he had received from one of the warders of the Tower. The warder called on Ashmole at the Excise Office, and offered to give them in exchange for one of Ashmole's own printed works. The Windsor Herald cheerfully agreed, and sent him a volume "fairly bound and gilt on the back," of which of his works we know not.

Now for the history of the papers. Mrs. Wale, the warder's wife, had brought them with her dower from her lamented first husband, Mr. Jones, confectioner, of the Plow, Lombard Street. While courting, these young people had picked up among the "joyners in Adle Street" a large chest whose "very good lock and hinges of extraordinary neat work" took their fancy. It had belonged, said the shopman, to Mr. John Woodall, surgeon, father of Thomas Woodall, surgeon to King Charles II. and Ashmole's friend. He had bought it probably at the sale of Dee's effects in 1609, after his death. The Joneses owned the chest for twenty years without a suspicion of its contents. Then, on moving it one day, they heard a rattle inside. Jones prized open the space below the till, and discovered a large secret drawer stuffed full of papers, and a rosary of olive-wood beads with a cross, which had caused the rattle. The papers proved to be the conferences with angels from December 22, 1581, down to the time of the printed volume; the original manuscripts of the (unprinted) books entitled, "48 Claves Angelicae," "De Heptarchia Mystica," and "Liber Scientiae Auxiliis et Victoriae Terrestris." We may imagine Ashmole's excitement when he found he had in his hand the earlier chapters of the very remarkable book that was still in every one's mouth, published only thirteen years before.

We may now briefly examine this remarkable and voluminous Book of Mysteries. In view of the fact that it is perhaps the earliest record of mediumistic transactions, the first attempt to relate consecutive psychic transmissions, in fact a sort of sixteenth century Proceedings of a Society for Psychical Research, it seems to warrant investigation at some length.

The first book (still in manuscript) opens with a Latin invocation to the Almighty, and an attribution of all wisdom and philosophy to their divine original source. It ends "O beata et super benedicta omnipotens Trinitas, concedas mihi (Joanni Dee) petitionem hanc modo tali, qui tibi maxime placebit, Amen." Then comes a table of the four angels — Michael, Gabriel, Raphael, and Uriel, their particular attributes, and their descent from Annael. A long prayer in English follows, which gives a remarkable insight into Dee's attitude of mind. Unfeigned humility towards God, a certain unconsciousness of self and of his own particular

acquirements, are mingled with a calm assumption of authority and power to enter into the heart of knowledge. This was perhaps the chief characteristic of the exalted mysticism so prevalent at the time in a small section of alchemists, especially on the Continent. Dee was its representative in England, having, of course, imbibed much of it during his residence abroad. Paracelsus had been dead but forty years. His disciples everywhere were seeking three secrets which were to fulfil his teaching — the secret of transmutation, the elixir of life, and the philosophic stone, key to all wisdom. Bruno was still alive, developing his theories of God as the great unity behind the world and humanity. Copernicus was not long dead, and his new theories of the solar system were gradually becoming accepted. Galileo was still a student at Pisa, his inventions as yet slumbering in his brain. Montaigne was writing his gentle satires on humanity. Everywhere and in every sphere new thought was beginning to stir.

Dee did not scruple to claim in his prayer gifts like those bestowed upon the prophets. He deprecates any kind of traffic with unauthorised or unreliable spirits, and acknowledges again the only Source of wisdom. But since he has so long and faithfully followed learning, he does think it of importance that he should know more. The blessed angels, for instance, could impart to him things of at least as much consequence as when the prophet told Saul, the son of Kish, where to find a lost ass or two! A spirit afterwards told him that ignorance was the nakedness wherewith he was first tormented, and “the first plague that fell unto man was the want of science.”

He had reached that state of mind when he seemed unable to discern any boundary line between finite and infinite. His hope and his confidence were alike fixed on nothing less than wresting all the secrets of the universe from the abyss of knowledge, or, at any rate, as many of them as God willed. He explains how from his youth up he has prayed for pure and sound wisdom and understanding,

“such as might be brought, under the talent of my capacitie, to God’s honour and glory and the benefit of his servants, my brethren and sisters. And forasmuch as for many yeres, in many places, far and nere, in many books and sundry languages, I have wrought and studied, and with sundry men conferred, and with my owne reasonable discourse laboured, whereby to fynde or get some yinking, glimpse, or beame, of such the aforesaid radicall truthe:...And seeing I have read in they books and records how Enoch enjoyed thy favor and conversation, with Moses thou wast familiar, And also that to Abraham, Isaac, and Jacob, Josua, Gedeon, Esdras, Daniel, Tobias, and sundry other, the good angels were sent, by thy disposition, to instruct them, informe them, help them, yea in worldly and domesticall affairs; yea and sometimes to satisfy theyr desires, doubts and questions of thy secrets; and furthermore, considering the Shewstone which the high priests did use by thy owne ordering, wherein they had light and judgments in their great doubts, and considering also that thou (O God) didst not refuse to instruct the prophets (then called seers), to give answers to common people of things oeconomicall, as Samuel for Saul, seeking for his father’s asses, being gone astray: and as other things, vulgar true predictions, whereby to win credit unto their weightier affairs. And thinking within myself the lack of thy wisdom to me to be of more importance than the value of an Ass or two could be to Cis (Saul his father): And remembering what good counsaile thy apostle James giveth, saying Si quies autem vestrum etc. And

that Solomon the wise, did so, even immediately by thyselfe, attayne to his wonderfull sidome: Therefore, Seeing I was sufficiently taught and confirmed that this wisdome could not be come by at mans hand, or by human powre, but onely from thee (O God) mediately or immediately. And having allwayes a great regarde and care to beware of the filthy abuse of such as willingly and wittingly did invoke and consult (in divers sorte) Spirituall Creatures of the damned sort: Angels of darknes, forgers and patrons of lies and untruths; I did fly unto thee by hartly prayer, full oft, and in sundry manners: sometymes crying unto thee *Mittas Lucem tuam et veritatem, tuam quoe me ducant, etc.*”

Then he goes on to say that his slight experience with two different persons has convinced him of God’s wish to enlighten him through His angels. He has heard of a man accounted a good seer and skryer, a master of arts and preachger of the Word, and through his means he has seen spiritual apparitions “either in the christalline receptab\cle, or in open ayre.” He hopes to have help from this person until “some after man or meanes are sent him from on high.” But Saul — for it is Saul he means — is not devout, sincere and honest. Evil spirits have come to him, much to Dee’s terror “but that thou didst pitch thy holy tent to my defence and comfort.” He has quoted to Saul Roger Bacon’s warning to wicked devil-callers; but the man cannot brook rebuke, and is angry at being further debarred from the mysteries “which were the only things I desired, through thy grace.” He begs, most humbly and deprecatingly for leave to note down the actions, and asks that Annael may come to his help.

Barnabas having proved so unreliable, he rejoiced at having found another skryer. The one accessory wanting, when all the table and seals were comlete, was a “shewstone.” Dee seems already to have owned several. He had used a crystal before this time, but a new one was desirable. One evening, towards sunset, a little child angel appears standing in the sunbeams from the western window of the study, holding in its hand a thing “most bright, most clere and clorius, of the bigness of an egg.” Michael with his fiery sword appeared and bade Dee “Go forward, take it up, and let no mortall hand touch it but thine own.”

Michael tells them, too, that he and Kelley are to be joined in the holy work, united as if one man. But one is to be master, the other minister; one the hand, the other the finger. They are to be contented with their calling, for vessels are not all of one bigness, yet all can be full. Dee is reminded that all his knowledge is “more wonderful than profitable, unless thou art led to a true use of the same.”

Another spirit, *Medicus Dei*, or *Medicina*, says, “Great are the purposes of him whose medecine I carry,” and on one of the early march days utters some remarkable words on the precious doctrine of the universality of the Light: —

“Your voices are but shadows of the voices that understand all things. The things you look on because you see them not indeed, you also do name amiss...

“We are fully understanding. We open the eyes from the sun in the morning to the sun at night. Distance is nothing withus, unless it be the distance which separateth the wicked from His mercy. Secrets there arenone, but that are buried in the shaddow of man’s sould....Iniquitie shall not range where the fire of his piercing judgment and election doth light.”

Calvin had been dead but twenty years, but with his scheme of election and eternal reprobation Dee had no affinity. His mind was far more in harmony with the ancient hermetic teaching that medicine, healing, was the true road to all philosophy.

CHAPTER VII

THE CRYSTAL GAZERS

“To follow knowledge like a sinking star
Beyond the utmost bound of human thought.”

— Tennyson, *Ulysses*

It is a curious picture to call up, that of the strangely assorted pair seated in the inner room at Mortlake, acting out this spiritual drama. Dee had asked for instructions about the room for the sittings: “May my little farthest chamber serve, if the bed be taken down?” The table, covered with its cloth stood in the centre upon the seals. Kelley, perhaps with the black cap he is credited with having always worn, pulled close over his cropped ears, was seated at it. Dee at his desk sat writing in the great folio book. He was now fifty-six years old; his beard was long, but perhaps not yet “as white as milk,” as Aubrey describes it. He did not apparently ever see the visions himself. Once he reproachfully said, “You know I cannot see or skry.” He conversed with the spirits and sometimes heard what they said; but to the eye and ear of his body they were invisible; hence his dependence upon a skryer.

The sole object of his ambition was the attainment of legitimate wisdom. When conversing with the angels, how near within his grasp it seemed! Michael’s exposition seemed almost to promise it to him: —

“Wilt thou have witt and wisdom? Here it is.”

“Michael points each time to a figure of seven squares shown within a circle of light.

“The exaltation and government of princes is in my hand.

“In counsayle and Nobilitie, I prevayle.

“The Gayne and Trade of Merchandise is in my hand. Lo! here it is.

“The Qualitie of the Earth and Waters is my knowledge, and I know them. And here it is.

“The motion of the Ayre and those that move in it, are all known to me. Lo! here they are.

“I signifie wisdom. In fire is my government. I was in the beginning and shall be to the end.

“Mark these mysteries. For this knowne, the state of the whole earth is knowne, and all that is thereon. Mighty is God, yea, mighty is he who hath composed for ever. Give diligent eye. Be wise, merry and pleasant in the Lord.”

Quite early in the actions, it was told them that a third person was necessary to the complete work. Adrian Gilbert was the first selected, and permission was given for him to be made “privie of the mysteries, but not to be a practiser.”

Gilbert was making ready for a voyage to the North-West. Dee and the spirits seem to think it may be a kind of missionary enterprise, and Dee asks for (but does

not actually obtain) a geographical description of the country he is going to. The answer is that Dee knows about it, as indeed he did, sufficiently well, as we have seen, to draw very good charts of North America and the Frozen Seas. An angel named Me tells him he must counsel A.G. and be his father. "Who made the sun of nothing? Who set Nature to thrust up her shoulder amongst trees and herbs like a gentle fire? How great is his power in those in whom he kindleth a soul of understanding."

In Dee's absence in London, at the Muscovy House, on Maundy Thursday (March 28), Kelley tried to summon Medicina again, but was only visited by an "illuder." Next day Dee asks for "the veritie of his doings," and is told that darkness has presumed to put itself in place of light. Kelley will not be overthrown, but he is to brag not. "When I yoked your feathers together, I joined them not for a while." The illuder is made to confess deception and is consumed by fire, and Dee turns to his skryer with "Master Kelley, is your doubt of the spirit taken away?"

Dee had been requested to prepare a calculation for the reformation of the Calendar, or at any rate to give his opinion on the scheme propounded by Pope Gregory. His calculations were approved by all the English mathematicians of the time, but the Queen, advised by the bishops, did not see her way to adopt them in effect. Dee tells his angel friends how "grieved" he is that "Her Majestie will not reform the Kalendar in the best terms of veritie." He desires counsel what to do.

Easter Day passed, and the crystal gazing still went on. The sittings were often long. On April 3, Dee ventured to tell his visitor that "it will be dark soon, and our company will expect our coming down to supper. If without offence we might now leave off, it might seem good to do so." Three days after, he again offered a slight remonstrance, asking why they had not been warned of Mistress Frances Howard's coming, a gentlewoman of Her Majestie's Privy Chamber. She had caused interruption of their exercise for a full hour, or two. Was this to be forgiven her because of her great charity, and goodness in procuring the Queen's alms for many needy people?

The Queen was then at Richmond, and Dee was several times at Court. He seems to have been there to bid her adieu when she left for Greenwich on the 18th: — "At her going on horseback, being new up, she called for me, by Mr. Rawly his putting her in mynde, and she sayd, 'quod defertur non aufertur,' and gave me her right hande to kisse."

Dee was now puzzling over some mysterious papers brought him by Kelley, whether those he is reported to have found in Wales of Glastonbury we can scarcely decide, but they seem to concern ten places in England where treasure was supposed to be hid. There is a curious drawing of them in the MS. diary: "After coming from the Court, I thought I would try to discover the ciphers of the paper E.K. brought me as willed to do, found at Huets Cross, with a book of magic and alchemy, to which a spiritual creature led them." Dee was by no means the easy dupe of Kelley that he has been called. Two or three months after he first knew him he writes in his diary of his "abominable lyes"; and he here makes a very telling remark, an aside, so to speak: "Of this K., I doubt yet."

Kelley's hot, uncontrollable nature and his overbearing ways had already begun to appear. There was an outbreak at supper one night because Charles Sled had "done him an injurie in speeche at my table." Probably some story of his early

career had been raked up. A voice next morning says to him appropriately: "Serve God and take hold of nettles."

The manuscript in crabbed signs puzzled the astrologer desperately, and he was unhappy at the delay. An angel tells him they are to be "rocks in faith." "While sorrow be measured thou shalt bind up thy fardell." He is not to seek to know the mysteries till the very hour he is called. "Can you bow to Nature and not honour the workman?"

A new spirit visits them, Il, "a merie creature, apparelled like a Vyce in a [morality] play. He skipped here and there." Dee asks where is his Arabic book of tables that he has lent and lost. Il says it is in Scotland and is nothing worth. Then Dee asks about the Lord Treasurer's books, for he had not seen Burleigh's library, and had all the rival collector's jealousy over his own treasures. He was never quite sure that Burleigh was his friend; there seemed always a suspicion in his mind where the Lord Treasurer was concerned. The feeling was reflected in a curious dream that he had soon after the beginning of his partnership with Kelley: "I dreamed on Saturday night that I was deade, and afterwards my bowels wer taken out. I walked and talked with divers, and among other with the Lord Thresorer, who was cum to my howse to burn my bookes when I was dead. I thought he looked sourely on me." Now, Il tells him that Burleigh has no books "belonging to Soyga," and explains that name as in "the language of Paradise, before Babel's aery tower." Dee takes up a lexicon to look for the word, but Il points to another book on "the mysteries of Greek, Latin and Hebrew." Then Il becomes very practical, and says: "Your chimney will speak against you anon," and Dee remembers that he had hidden there "in a cap-case" the records of his doings with Saul and the others. Il advises Kelley to communicate to his employer the book and the powder, and all the rest of the roll. "True friends are not to hide anything each from the other."

This was perhaps the cause of the "great and eager pangs" that now took place between Dee and Kelley. The medium pretends to fear they are dealing with evil spirits. He bursts into a passion, declares he is a cumber to the house, and dwells there as in a prison. He had better be far away in the open country, where he can walk abroad, and not be troubled with slanderous tongues. He is wasting his time there, and must follow some study whereby he may live. As for these spirit mysteries, Adam and Enoch knew them before the Flood. Dee responds gravely to this tirade: He will wait God's time, and he will not believe a stone will be given them and no bread. As to Kelley's necessities, are not his own far greater? At the present moment, he owes 300 pounds, and does not know how to pay it. He has spent forty years, and travelled thousands of miles, in incredible forcing of his wit in study, to learn, or bowel out, some good thing, yet he would willingly go up and down England in a blanket, begging his bread, for a year or more, if at the end he might be sure of attaining to godly wisdom, whereby to do God service for His glory. He was resolved either willingly to leave this work, to enjoy the fountain of all wisdom, or to pass his days on earth in the enjoyment of its blessings and mysteries.

Another violent scene occurred before long; this time the mistress of the house was the one offended. Dee says: "By A[drian] G[ilbert] and Providence, E.K.'s vehement passions were pacified. He came back again to my house, and my wife was willing and quiet in mind and friendly to E.K. in word and countenance. A new pacification in all parts confirmed and all upon the confidence of God his service faithfully performed." Kelley's wife had not yet joined him at Mortlake, but

he had occasional letters from her. One found him in a tender religious mood, about to “pray in his bedchamber, on a little prayer book which Mr. Adrian Gilbert had left here, ad it lay on the table during the action.” It was Seven Sobbes of a Sorrowful Soul for Sinne, in English metre, “made by Mr. William Harris.” When he opened it, he found some automatic script in the end, or, as he calls it, a counterfeit of his own hand. He took it to Dee, who saw in it the work of a wicked spirit trying to shake their confidence. The next evening, both prayed against their enemy, Kelley on his knees before the green chair standing at the chimney. Uriel appeared and said temptation was requisite. “If it were not, how should men know God to be merciful?” He speaks to Kelley: — “Thou, O yongling, but old sinner, why dost thou suffer thy blindness to increase? Why not yield thy Limbs to the service and fulfilling of an eternal veritie? Pluck up thy heart, and follow the way that leadeth to the knowledge of the end.” He explains how the trouble is caused by Belmagel, “the firebrand who hath followed thy soul from the beginning.”

The whole of this spring, the pair of partners had been busily engaged in preparing the various things — the table, the wax seals, the ring and lamin — required for use. Most complicated diagrams of letters and figures had also been dictated to them, and Kelley, whose mathematical training had been slight, was sometimes very exhausted. Once fire shoots out of the crystal into his eyes, and when it is taken back, he can read no more. As Dee remarks one day to a spirit, apologising for his many questions: “For my parte I could finde it in my heart to contynue whole days and nights in this manner of doing, even tyll my body should be ready to synk down for weariness before I could give over, but I feare I have caused weariness to my friends here.” A journey is foretold, but first of all Kelley is to go to the places of hidden treasure, and bring earth, that it may be tested. He may be away ten days. He bought a “pretty dun mare” for the journey, of “good man “Penticost,” for which he paid three pounds ready money in angels. A day or two after, he took boat to London to buy a saddle, bridle, and “boote-hose.”

At supper the night before he started, in a clairvoyant state, he had an extraordinary prophetic sight of the execution of Mary Queen of Scots, a beautiful woman having her head cut off by a tall black man. He also speaks of seeing the sea, covered with many ships. Uriel warns them that foreign Powers are providing ships “against the welfare of England, which shall shortly be put in practice.” It is hardly necessary to remind the reader that the Queen of Scots’ execution and the defeat of the Spanish Armada took place in two following years, 1587, 1588, four years after this vision.

CHAPTER VIII

MADIMI
